## MESSAGE

It gives me immense pleasure to know that College of Management And Computer Science, Yavatmal in collaboration with Smt. Nankibai Wadhvani Kala Mahavidyalay, Yavatmal is organizing International Interdisciplinary Conference on "Academic Research and Innovation in Teaching and Arising Inclination in Professional Education" (ARIT-AIPE-2019) on 27<sup>th</sup> & 28<sup>th</sup> December, 2019.

I whole-heartedly appreciate the courage and conviction of the organizers for venturing the organization of an academic event of such a huge magnitude. I am sure that this event shall prove great motivation for many contemporary institutions and shall go a long way in cultivating the research culture.

I convey my hearty greeting and the best wishes to the organizers for the phenomenal success of the conference.

(Dr. Rajesh Jaipurkar)  
Pro-Vice-Chancellor

## MESSAGE

I have been extremely delighted to note that our College Of Management and Computer Science, Yavatmal is organizing an Inter Disciplinary International Conference on Academic Research and Innovation in Teaching & Arising Inclination in Professional Education (ARIT – AIPE 2019) on 27<sup>th</sup> & 28<sup>th</sup> December, 2019. I'm confident that our students and budding researchers of the countries will hugely benefit from the knowledge, experiences and expertise of the eminent academicians who have travelled a long distance from different parts of the world to participate in the conference. The eloquent speeches, scholarly interactions and fruitful discussion will definitely enrich the knowledge of researchers.

I convey my sincere greetings and best wishes to the Principal and all his colleagues on the Organizing Committee for the resounding success of this landmark academic event.

## MESSAGE

Dear Friends,

It gives me immense pleasure to write a message for a two days interdisciplinary international conference on Academic Research and Innovation in Teaching and Arising Inclination in Professional Education, being held in the cotton city on 27th and 28th December 2019 in the premises of College of Management and Computer Science, Yavatmal. As the President of Yavatmal Zilla Vikas Samiti, Yavatmal, I can fully understand the importance of Academic Research and Innovation. I cordially welcome all delegates and experts, to this academic extravaganza.

There is a growing need and increasing demand in the field of Academic Research and Innovation in Teaching and Arising Inclination in Professional Education. This conference shares an insight into the recent research and cutting edge technologies, which gains immense interest with the colossal and exuberant presence of adepts, young and brilliant researchers, business delegates and talented student communities. I am sure the delegates, young researchers and academicians attending the conference will gain a lot from the scientific sessions, discussions and pave their own paths towards successful profession.

I thank all the organizing secretary and committees for their continued efforts toward making this conference a success.

**Shri. Jagdishji Wadhawani**

President,

Yavatmal Zilla Vikas Samiti, Yavatmal

## PRINCIPAL'S MESSAGE

It's a matter of great pleasure that our college is organizing Two Day International Conference on 27<sup>th</sup> & 28<sup>th</sup> December, 2019. The purpose behind this intellectual activity is to provide an opportunity to students, teachers, scholars and academicians to assemble at the one platform and get their ideas exchanged. The title of the conference incorporates multidisciplinary stand-points from where it would be possible to get the present status of changes taking place in each field.

The theme of the conference is quite important as it suggests the growing interest of the students as well as the scholars in management studies and in information technology these days. I highly appreciate this step because a conference on topic like this and that too on an international level is a big challenge to us.

In today's world of globalization where innovation is growing and expanding with amazing speed, such seminars and conferences play a very vital role in creating insights among the participants regarding several issues. Today, it is necessary for the students as well as the teachers to acquire application-oriented knowledge. For teachers it is more important to use modern technique so that they can teach all the new things to their students. I firmly believe that it should go with solid plans and designs in mind. Let's therefore go forward with an intense sensibility to acquaint ourselves with new global scenario and innovative techniques that we need to be equipped with the multi tasking capabilities. It becomes our responsibility as an individual to restructure our personality in a new era.

This conference is a step forward in acquiring such capabilities. I sincerely hope that this event might inculcate some application-oriented knowledge among all the participants. It is my duty to express deep sense of gratitude towards the all the staff members who has given his valuable time for this conference.

I wish you all the best on this occasion.

A handwritten signature in blue ink, which appears to read 'Ritesh D. Chandak'. The signature is written in a cursive style and is positioned above the printed name.

**Prof. Ritesh D. Chandak**  
Principal, CMCS, Ytl.

## PRINCIPAL'S MESSAGE

On behalf of Smt. Nankibai Wadhvani Kala Mahavidyalaya, Yavatmal I extend a very warm welcome to all the delegates and participants present today for the interdisciplinary International Conference on the subject "Academic Research and Innovation in Teaching and Arising Inclination in Professional Education." SNWKMY has borne the mantle of excellence, committed to ensure the students their own space to learn, grow and broaden their horizon of knowledge by indulging into diverse spheres of learning. In our endeavor to raise the standards of discourse, we continue to remain aware in order to meet with the changing needs of our stakeholders. We are organising this two day international conference in collaboration with College of Management and Computer Science on "Academic Research and Innovation in Teaching and Arising Inclination in Professional Education."

Globalisation, privatisation and digitalisation today have dramatically reshaped the education system in India and have created tremendous opportunities for internationalization, especially transnational or cross-border education. Various educational institutions have partnered with foreign institutions to provide best form of education to the students. However, many challenges and obstacles are being faced in the strategic planning and the mechanics of bringing internationalization of the education system into action. We wish to discuss and deliberate on the dynamics of Academic Research and Innovation in Teaching and Arising Inclination in Professional Education in the country and across borders.

The Conference aims to bring different ideologies under one roof and provide opportunities to exchange ideas face to face, to establish research relations and to find global partners for future collaboration. The themes and sub-themes for this conference are indicative of relevant research areas to give the prospective authors innovative prepositions about the ambit of discussion.

There are various pillars of the Education System in a nation. We have invited eminent dignitaries from different sectors to get a better understanding of these pillars of the Education System and the several strategies involved.

We wish to welcome and thank our eminent keynote speakers, invited principals and delegates. Last but not the least; we would also like to thank the staff, the teachers, the organizers and the students for their contribution in successfully organizing and managing this event. This event wouldn't have been possible without their guidance and constant support.

We welcome you all to College of Management and Computer Science, Yavatmal and hope that this conference will act as a medium for all of us present here to ponder upon the topic of discussion, challenge us to strive towards it and inspire us at the same time. Thank you!

**Dr. Jayant M. Chatur**

## The Library's Role in Teaching and Learning

**Shri Arvind Sambhaji Pazare,**

Librarian, Bharatiya Mahavidyalaya Morshi

### Abstract

*It is an accepted fact that teachers are usually not born but made. Good teachers nurture their knowledge and skills through constant and deliberate efforts. One of the prerequisite to be good teacher is to understand the teaching learning process in more depth. This facilitates better appreciation of the teaching profession as well as the process of imparting education. As gateways to knowledge and culture, libraries play a fundamental role in society. The resources and services they offer create opportunities for learning, support literacy and education, and help shape the new ideas and perspectives that are central to a creative and innovative society. Library offers the resources and encourages the thinking process, creativity, inquisitiveness and makes the learning more fruitful. The function of library is to provide textbooks, references, periodicals, research conducted till date on various subjects to students, teachers and researchers.*

**Keywords:** Education, Teaching, Learning, Library

### Introduction:

Education can be defined as the process of acquiring knowledge or habit through instruction or study. Education is the process of bringing desirable change in the behaviour of human beings. The behavioural changes must be directed towards a desirable end. There should also be changed in Knowledge, attitude, skills and understanding. With the growing need of society, education has converted to many shapes such as adult, child, Physical, health, Technical education and so on. The common types of Education are worth mentioned below those are Formal Education, Non formal education and Informal Education. Formal Education is that type of education in which the learner is involved in institution activities which based on hierarchal structured grading, uniform subjects and required full time and leads to some Certificates, Degree or Diploma etc. Non Formal Education is learner oriented and life environment. The learners are free hand and built on learner participation. This type of education is flexible and don't have the level of curriculum and syllabus. This form of education is dependent on expert and qualified teacher. It depends on the skill and capacity of individual some example of non formal educations is swimming class, sports program and Seminar etc. In Informal education process the individual is learning from his daily experiences and environment where an individual is working. This type of education in a lifelong process and people can learn from the experiences of other individuals some examples are how to deals with complex situation in home or outside. In comparison to primary and secondary education, the role of library in teaching and learning is much more important since library is considered a prime requirement in indian education. The entire academic and research process is fully dependent on library network. A library also plays an important role in enhancing a teacher's effectiveness and classroom performance. It promotes individual and group learning, helps in developing students' vocabulary, enhancing comprehension, developing the habit of silent reading and developing problem-solving attitude among students. The role of library and librarian in recent era has changed as a result of techno-driven world. Library is considered „the heart“ of a university or an institute offering higher education. Library services are one of the most widely used and accepted in the modern world. Academic community particularly in a university utilizes library services for research and teaching purposes. Academic work is supported by library. Therefore, library is rightly regarded as the heart of an academic institution.

### Teaching Learning Process :

The role of learning is extremely important in the preparation of adolescents and youth for citizenship in a democratic society. The learning process represents the channel through which the adolescents strive to acquire the habits, skills, knowledge, attitude, values and appreciation, which are necessary for effective participation in a democracy. Learning therefore becomes a process by which changes in behavioral patterns are

produced through experience. Learning is brought about through teaching, teaching process is the arrangement of environment within which the students can interact and study how to learn. The process of teaching learning aims at transmission of knowledge, imparting skills and formation of attitudes, values and behavior. Educationists have been trying to analyse the learning process in terms of the requirements of the individual and the society. Academic library is the vital component which develops the teaching-learning and research activity. It serves as a key factor to accomplish the aims and objectives of the higher education. The University Education Commission established in 1948-49 under the chairmanship of an eminent academician and president of India clearly mentioned the importance of library in educational and research field: “ The library is the heart of all the University work: directly so, as regards its research work, which derives its life from research work.

The aims and objectives of an academic library are:

- To provide the facilities for advanced teaching, learning, study and research work.
- To encourage the qualitative academic environment of teaching and research.
- To provide proper guidance and training in order to prepare the students for master and doctorate degree.
- To improve the quality of education at various level.
- To enhance the research output by faculty through useful information resources. To cooperate with other institutions with respect of information resources.

Library offers the resources and encourages the thinking process, creativity, inquisitiveness and makes the learning more fruitful. The function of library is to provide textbooks, references, periodicals, research conducted till date on various subjects to students, teachers and researchers. The thirst-area in research field is emphasized and requisite instructional material is also provided to define the concepts more logically.

### How do libraries support teaching and learning?

A library is fundamentally an organized set of resources, which include human services as well as the entire spectrum of media (e.g., text, video, hypermedia). Libraries have physical components such as space, equipment, and storage media; intellectual components such as collection policies that determine what materials will be included and organizational schemes that determine how the collection is accessed; and people who manage the physical and intellectual components and interact with users to solve information problems.

### Libraries serve at least three roles in learning. 1. Practical role 2. Cultural role 3. Social & intellectual roles

- First, Practical role in sharing expensive resources. Physical resources such as books and periodicals, films and videos, software and electronic databases, and specialized tools such as projectors, graphics equipment and cameras are shared by a community of users. Human resources--librarians support instructional programs by responding to the requests of teachers and students and by initiating activities for teachers and students. Responsive services include maintaining reserve materials, answering reference questions, providing bibliographic instruction, developing media packages, recommending books or films, and teaching users how to use materials. Proactive services include selective dissemination of information.
- Second, Cultural role in preserving and organizing artifacts and ideas. Great works of literature, art, and science must be preserved and made accessible to future learners. Although libraries have traditionally been viewed as facilities for printed artifacts, primary and secondary school libraries often also serve as museums and laboratories. Libraries preserve objects through careful storage procedures, policies of borrowing and use, and repair and maintenance as needed. In addition to preservation, libraries ensure access to materials through indexes, catalogs, and other finding aids that allow learners to locate items appropriate to their needs.
- Third, Social and Intellectual roles in bringing together people and ideas. This is distinct from the practical role of sharing resources in that libraries provide a physical place for teachers and learners to meet outside the structure of the classroom, thus allowing people with different perspectives to interact in a knowledge space that is both larger and more general than that shared by any single discipline or affinity group. Browsing a catalog in a library provides a global view for people engaged in specialized study and offers

opportunities for serendipitous insights or alternative views. In many respects, libraries serve as centers of interdisciplinarity--places shared by learners from all disciplines. Digital libraries extend such interdisciplinarity by making diverse information resources available beyond the physical space shared by groups of learners. One of the greatest benefits of digital libraries is bringing together people with formal, informal, and professional learning missions. By making the broad range of information resources discussed below available to students and teachers in schools, digital libraries open new learning opportunities for global rather than strictly local communities.

### Conclusion:

A library also plays an important role in enhancing a teacher's effectiveness and classroom performance. It promotes individual and group learning, helps in developing students' vocabulary, enhancing comprehension, developing the habit of silent reading and developing problem-solving attitude among students. As gateways to knowledge and culture, libraries play a fundamental role in society. The resources and services they offer create opportunities for learning, support literacy and education, and help shape the new ideas and perspectives that are central to a creative and innovative society.

## Analysis Of 2D Geometric Transformation In Computer Graphics

Mr. Yogesh Marotrao Patil \*1 Mr. Umesh R. Kantode 2

1 Dept. of Comp. Sci., College Of Management And Computer Science, Yavatmal, Dist- Yavatmal,

2 Dept. of Comp. Sci., College Of Management And Computer Science, Yavatmal, Dist- Yavatmal,

### Abstract

*Computer Graphics is changing the world of graphics rapidly. Computer Graphics is a broad spectrum describing every aspect on the computer which is neither a typing text nor audio. It can be video, an image and an animation or anything else, that can be visualized on computer and is represented in the form of pixels. Pixel is the nothing but the smallest unit of Computer Graphics. Computer Graphics is an art of drawing lines, objects, pictures, etc with the help of programming languages like C, C++, etc with the help of computer graphics. Users can control the operations or it can be system dependent. Computer Graphics generally realized around various geometrical transformation like translation, scaling, rotation, shearing, reflection.*

**Keywords:** Computer Graphics, Transformation, Translation, Scaling, Rotation, Shearing, Reflection.

### Introduction

Computer Graphics definitely seems astonishing and are often mostly complicated to make requiring bulk of time as well as efforts. The advanced technique, hardware, software available today has automated most of things. But depending on circumstances, it is always not possible. Earlier, development in computer graphics was started in mid to late 1950 and was designed using vector graphics. With the advancement in time, there are the changes in the methods also. Methods like, raster graphics is introduced making things more interesting and easy. But the problem still persists as it doesn't look real and that's the reason which stopped raster graphics being the mainstream technology.

Nowadays, 3D graphics are widely used to design everything with features like depth and originality. It is not much different than 2D graphics apart from the fact that 3D has an extra dimension both works on similar algorithms. Similar effects like 3D, can be achieved in 2D by using different techniques. Animation is one step ahead, where moving graphics or objects are used. It doesn't matter how complicated and advanced graphics is, it can be achieved by using same basic algorithms and transforming techniques.

Various techniques are used to designed Cartesian coordinate system i.e., 2D graphics and amongst them, the most important one is geometrical transformation. i.e., by applying rules, we can change some graphics into something else. The various available transformations are translation, scaling, rotation, shearing and reflection. If the transformation is applied on 2D plane, it is called as 2D transformation. In order to obtain desired output, it is important to move, change size and orientation of the graphics (objects) on the screen.

### Transformation Types

We can combine images, text, geometrical objects, equations and much more in 2D graphics. These components can be manipulated by using 2D geometric transformation like translation, scaling, rotation with the help of software and hardware components. Software components used are modeling, manipulating, rendering, storing and viewing and hardware components are digital memory buffer, TV monitor and display controller.

#### 1. Translation Transformation

In order to move every pixel of the object to a constant distance in particular direction, transformation is applied to that object. As the shape of the object doesn't change, it can be described as rigid motion. To translate two dimensional point, translation distances  $t_x$  and  $t_y$  is added to the original coordinate position  $(X, Y)$  to move the point to new position  $(X', Y')$ .

$$X' = X + tx$$

$$Y' = Y + ty$$

$T = (tx, ty)$ , Where  $(tx, ty)$  is translation vector.

Above equation can be written in the form of matrix as follows,

$$P = \begin{bmatrix} X \\ Y \end{bmatrix}$$

$$P' = \begin{bmatrix} X' \\ Y' \end{bmatrix}$$

In general,

$$P' = P + T$$

In this we are trying to move the object away from the origin. In contrast, if want to move the object towards the origin, above equation can be modified as follows,

$$X' = X - tx$$

$$Y' = Y - ty$$

$$T = (tx, ty)$$

In general,  $P' = P - T$

## 2. Rotation Transformation

An object can be repositioned along a circular path by applying rotation. We have to specify rotation angle ( $\Theta$ ) and the position  $(X', Y')$  of the rotation point where object rotates either in clockwise, anti-clockwise direction or rigid.

The original coordinates of point  $P(X, Y)$  can be represented as,

$$\cos \phi = \frac{X}{r}, \text{ is } X = r \cos \phi \quad \text{--- (1)}$$

and  $\sin \phi = \frac{Y}{r}, \text{ is } Y = r \sin \phi \quad \text{--- (2)}$

Now angle after rotation  $P$  to  $P'$  is  $\phi + \Theta$ ,  
 i.e.,

$$\cos(\phi + \theta) = \frac{X'}{r}$$

$$X' = r \cos(\phi + \theta)$$

$$\sin(\phi + \theta) = \frac{Y'}{r}$$

$$Y' = r \sin(\phi + \theta)$$

Now we have,

$$\begin{aligned} \cos(\phi + \theta) &= \cos\phi \cos\theta - \sin\phi \sin\theta \\ \sin(\phi + \theta) &= \sin\phi \cos\theta + \cos\phi \sin\theta \end{aligned}$$

$$X' = r \cos\phi \cos\theta - r \sin\phi \sin\theta \text{ ----- (3)}$$

$$X' = X \cos\theta - Y \sin\theta$$

$$Y' = r \sin\phi \cos\theta + r \cos\phi \sin\theta \text{ ----- (4)}$$

$$Y' = Y \cos\theta + X \sin\theta$$

$$\text{Or } Y' = X \sin\theta + Y \cos\theta$$

i.e., 
$$\begin{bmatrix} X' \\ Y' \end{bmatrix} = \begin{bmatrix} X \\ Y \end{bmatrix} \begin{bmatrix} \cos\theta & \sin\theta \\ -\sin\theta & \cos\theta \end{bmatrix}$$
 is clockwise direction rotation.

In anti-clockwise direction rotation,

i.e., 
$$\begin{bmatrix} X' \\ Y' \end{bmatrix} = \begin{bmatrix} X \\ Y \end{bmatrix} \begin{bmatrix} \cos(-\theta) & \sin(-\theta) \\ -\sin(-\theta) & \cos(-\theta) \end{bmatrix}$$

$$\begin{bmatrix} X' \\ Y' \end{bmatrix} = \begin{bmatrix} X \\ Y \end{bmatrix} \begin{bmatrix} \cos\theta & -\sin\theta \\ \sin\theta & \cos\theta \end{bmatrix}$$

### 3 Scaling

To resize an object, scaling transformation is used. We can stretch, shrink, and compress an object in scaling transformation process. There are two types of scaling, uniform scaling where the coordinates values changes uniformly where three coordinates have same scaling factor and in non-uniform scaling it is not mandatory same in all the coordinate direction.

For scaling object with coordinates (X,Y) the scaling factors are (Sx, Sy) and resulted coordinates are (X',Y')

$$\text{i.e., } X' = X.S_x$$

$$\text{and } Y' = Y.S_y$$

$$\text{or } P' = S.P$$

Where Sx, Sy are scaling factor for X, Y respectively.

In matrix form

$$P' = \begin{bmatrix} X' \\ Y' \end{bmatrix} \quad S = \begin{bmatrix} S_x & 0 \\ 0 & S_y \end{bmatrix} \quad P = \begin{bmatrix} X \\ Y \end{bmatrix}$$

$P' = P.S$ , Here S is scaling factor.

Scaling is performed to the origin (0,0) not around the center of the any object.

Conditions for scaling,

- If Scale is greater than 1 results in expansion of object and moves it away from the origin.
- If Scale is equal to 1 there will be No Change in the object.
- If Scale is less than 1 then it compress the object and moves it towards origin.

#### 4 Shearing

Translation, Rotation and Shearing transformations are included in graphic package. But there are some other transformations exists which are not widely used by are useful.

Shearing is a transformation which changes the shape of an object such that object is made of layers and these layer's slides over each other. There are two shear transformations. In X-Shear, the Y coordinates are fixed and X coordinates are changed; making vertical line to skew either left or right and is represented as follows

$$X_{sh} = \begin{bmatrix} 1 & 0 & 0 \\ Sh_x & 1 & 0 \\ 0 & 0 & 1 \end{bmatrix}$$

$$X' = X + Sh_x \cdot Y$$

$$Y' = Y$$

In contrast, Y Shear transformation allows to change Y coordinates where as X coordinates are kept unchanged; causing horizontal line to skew.

$$Y_{sh} = \begin{bmatrix} 1 & Sh_y & 0 \\ 0 & 1 & 0 \\ 0 & 0 & 1 \end{bmatrix}$$

$$Y' = Y + Sh_y \cdot X$$

$$X' = X$$

#### 5 Reflection

It produces the mirror image of an object. By rotating an object 180 degrees along the reflective axis, the mirror image will be produced relative to an axis of reflection. The reflection axis can be chosen anywhere in 2D plane. Basically the mirror image of any object can be generated about X axis, by changing Y values where X values are kept fixed. Whereas reflection about Y axis is achieved by changing X values of the coordinate position and Y values are kept fixed.

#### 6. Composite Transformations

It is combination of two or more transformation. The aim of composite transformation is to achieve efficiency. By calculating the matrix product for the individual transformation matrix for sequence of transformation can be build as composite transformation and is generally called as composition of matrix.

If there are two transformation T1 and T2 on different plane respectively, then it results in single transformation T which is a combination of T1 and T2.

$T=T1.T2$

$[T][X]=[X][T1][T2][T3]...[TN]$

Where  $[Tn]$  is any combination of transformation.

Here, sequence of transformation is important, as it results in different solution i.e.  $[T1].[T2]$  is different than  $[T2].[T1]$ .

### Conclusion

In this paper, we have discussed various 2D geometrical transformations and how they can be transformed. These transformations are center of Computer Graphics and are also applicable in 3D graphics, modeling and animation. We have also focused on the methods and techniques of applying these transformations in reliable way. There is always a scope for better techniques and we will try to find a better, efficient and faster method which can be applied on the transformations for better result as desired.

## A Study Of Impact Of Demonetisation On Small Medium Entreprize (Sme)

**Mr. Husain Anwarali Bharmal**

Department of Management (MBA), College Of Management And Computer Science,  
Yavatmal, Dist- Yavatmal

### Abstract

*Demonetisation is that the method of devaluing each piece of currency to zero. The Indian Government has set to demonetized Rs.500 and Rs.1,000 denomination notes in circulation which call directly affected the someone, business and Indian economy. It's necessary to review the impact of demonetisation on small and medium enterprise sectors and others and their response concerning achievements of demonetisation once three years of completion of announcement of demonetisation. Demonetisation established badly in each sectors however the {arena} that is affected principally is that the SME's wherever the shopping for and commercialism of goods are quite slow. Businessman's perception was modified concerning demonetisation, throughout demonetisation amount they were a lot of looking forward to sensible results however once three years they're foiled from demonetisation. Majority individuals area unit assuming that demonetisation helped in edge black money however in bit wherever as some individuals think that it had been mostly useful. Individuals admitted that demonetisation wasn't abundant booming in reducing corruption, checking terrorist and naxalite activities and for moving towards cashless economy. However demonetisation was booming in reducing pretend currency notes.*

*Keywords: black money, economy, demonetisation, income, perception, small traders*

### Introduction

Demonetisation is the process of devaluing a piece of currency to zero. It is changing the value of a particular denomination of currency to zero, making it a piece of paper with absolutely no value. On November 8, 2016, the Prime Minister of India announced on television that currency notes of Rs.500 and Rs.1,000 would be demonetized and withdrawn from the market with immediate effect (RBI 2016b). It directly affected the common man, trade and the Indian economy. The two demonetized denominations i.e.500 rupee and 1,000 rupee currency notes are in trend of 86.4% (RBI 2016).

Demonetisation is not a new phenomenon for the world or India. There are many pieces of evidence of demonetisation in the world and some of them in India. It can be rolled out in the economy to overcome many socio-economic problems present in the country such as black money, forgery, inflation, corruption, etc. (Bisen et al., 2017). The tax research team (2016) stated in favor of demonetisation in their work paper.

After the announcement, banks and ATMs were crowded to exchange old notes and withdraw new currency (PTI 2016a). The common people stood in queues in banks for several hours, with the media reporting on the sufferings experienced by the people, especially those who did not have access to credit cards or mobile wallets (TNN 2016). As more days passed, the press reported that in both urban and rural India, the country's large informal economy (Kalyani 2016) was disrupted, and Demonetisation's negative impact on gross domestic product (GDP) (PTI 2016b)

There will be no unpleasant expenditure on marriages and other ceremonies. So society will be less materialistic and people more rational. The destruction of fake money will give a big boost to the Indian economy and the real estate sector so far.

Things will become cheaper. Indian currency will get respect in the international market. There will be a great investigation on money related to terrorism and hence terrorist activities. Corruption will be reduced to a great extent as people will stop the tendency of wealth accumulation using wrong means.

This will bridge the gap between Hades and Havelis. However, there may be some difficulties for a few months. But this inconvenience will be temporary and short-lived.

### Impact Of Demonetisation On Sme's

The small and medium-sized enterprise (SME) sector is a large part of the economy, contributing eight percent of GDP, while employing more than 80 million people a year. Most SMEs are traditionally run, family-

run businesses. Broadly, there are two types of players in the market. One, established businesses because their promoters saw the opportunity sooner rather than later and quickly became successful businesses.

While demonetisation focuses heavily on the inconvenience of the general public, 86% of Indian cash is suddenly invalid and the short-to-medium-term impact can be brutal for small businesses. The importance of Micro, Small, and Medium Enterprises (MSME) cannot be overstated. According to SME Ministry estimates, the sector will create 100 million jobs through 46 million units.

If the GDP growth control due to demonetisation is estimated at 50 bps at the low end to 300 bps at the high end, they may expect the impact of MSME to be greater than the rest of the economy. Their virtuous cash cycle begins almost exclusively from a cash-based cost base cash. It encourages the business to generate revenue with cash.

- Demonetisation is not a surgical strike; This is a carpet bomb. It affects everyone. The re-establishment takes time as everyone tries to secure their newly acquired currency from an uncertain future, even slowing down the cost process. In the case of SMEs, most people are unaware of payments coming from customers for a while; It dried up liquidity in the form of unaccounted currency. If customers don't pay, SMEs protect what they have and this means they buy less and produce less. Buying less means more sluggishness for those who provide them with raw material and less, and supply shortages leading to inflation over what is available.
- We see reforms coming soon in the form of incentives. I am optimistic that the government is aware of the first issue and will take steps to restart the money wheel rolling in the market. This can take many forms, such as the advance announcement of GST and BTT, or the elimination or drastic reduction of service tax and VAT until GST is introduced. Taking action on taxes encourages people to spend without fear of tax, which is currently seen as a systematic 'robbery' with minimal or no revenue.
- Improvement in Government Procedures and Monitoring. This is done as a measure to prevent black money from being produced in the new currency. Government processes re-design processes to obtain licenses and approvals easily and old recurring requirements are omitted. Taxes and other compliance officers must be monitored to ensure that the policing does not give birth to the under-table settlement culture again.
- Visible use of funds collected in banks on infrastructure development that benefits people quickly. We will look at the money invested in those aspects which bring quick results for all classes. The current change has received quick pains with promises of long-term benefits, but we need to remember that a large part of our society will need quick gains to survive before enjoying long-term benefits.
- SMEs will invest in self-development and improvement in terms of technology, infrastructure and training, becoming part of the taxable books now to self-utilize increased profitability with unaccounted income.
- By design, SMEs and businesses will now have two options. Pay or spend more tax for scaling and this will have a double effect on the overall improvement in the economy.
- There are lots of positive and negative effects of the current move. Nobody can be sure of the future in the present and this uncertain environment is certainly not good. Results in uncertainty depend on the mindset and, currently, while people are taking it positively, they are certainly beginning to realize possible pitfalls, if measures are not taken at the right time. Communication will be the key to ensure stability. And, while I am impressed by the bold step taken by the Prime Minister, I am also concerned about the mammoth task ahead of him to make it a success, as the war against black money has not yet started in my mind. Demonetisation is simply a war cry that declares the beginning of a war.

## Findings

- Demonetisation requires a wholesale rethinking of the participants in the parallel economy. Businesses first need to think about getting into the banking system, the second digitizing and the third full declaration. The move will take months before the planned implementation of the GST, so major resets have to be made for practices and psychology.
- Reducing legitimate, competitive businesses through lower prices through cash transactions will probably end, or at least reduce. This generally improves the overall competitiveness of SMEs. Organizations with organized systems and planning processes will make the transition quicker, which will give them a clear advantage, resulting in a significant contribution of 38% or more to GDP.

- Prior to Front Capital, most SMEs had trouble assessing credit prior to demonetisation due to a large number of unaccounted transactions. Once the initial setback period has passed and businesses have streamlined their processes and accounting, they will be able to access credit markets more efficiently and at a better price, thus reducing their funding costs.
- Front labor may have some pain. Small businesses rely on migrant workers, which are frequently moving across India. Many of these workers do not have valid IDs or have valid IDs in the state in which they work. Lack of income immediately after demonetisation forces them, thereby hurting business continuity and increasing recruitment and training costs.

## Conclusion

Demonetisation by the government is a major setback for the economy. In the medium term, the effect of the shock is how much of the currency will be replaced at the end of the replacement process and to what extent the currency has ended. While it has been argued that the cash that will be extinguished will be "black money" and, therefore, must be extinguished correctly to establish a distorted stimulus structure in the economy, this argument is based on impressions rather than facts.

If the money disappears, as some hoarders would not like to appear with their cash pile, the economy would not benefit. On the other hand, if money finds its way into the economy, it can have a meaningful impact. The experiences of various countries, however, suggest that the move was one of a series that failed to recover the debt-burdened and inflation-ridden economy.

De-monetization has already affected small and medium enterprises. As the bulk of the transactions in this sector are cash-based, the lack of liquidity will result in a slowdown in economic activity. In the medium and long term, however, there is reason for optimism. The inflow of deposits should logically allow for lower interest rates while reducing investment in this sector. In addition, a change in the direction of cashless transactions would encourage registration between such enterprises and allow them to benefit from central and state schemes and incentives. Access to low-cost capital should also improve if there is a significant shift to a digital and cashless economy.

## A Need Of Financial Literacy For The Success Of Financial Inclusion

**Mr. Ritesh D. Chandak**

Principal, College of Management  
And Computer Science, Yavatmal

### Abstract: -

*Financial Inclusion is not new concept for India, from last so many years we are trying to get success in this field. Government of India also has launched so may schemes to spread this in India. Even after all this affords few segments of Indian Population, mostly rural and poor people, are still not getting the benefits from this due to various reasons. One reason may be lack of financial illiteracy among that class of People. In this paper I am trying to explain the need of financial literacy to get success in Financial Inclusion initiative in India.*

*Key Words:- Financial Inclusion, Financial Literacy, Economic Development.*

### Introduction

In the Indian, the concept of financial inclusion was first introduced in the year 2005 by the Reserve Bank of India by releasing the Annual Policy Statement. Soon, the concept started to spread in every part of the country. It was mainly introduced to provide services to every corner of the country including the remote area. All banks were asked to minimize regulations regarding account opening processes for the economically poor sections of the society. Government banks were instructed to work together towards 100% financial inclusion by taking part in campaigns started by the RBI.

### Objectives of Study

- 1) To understand the meaning of Financial Inclusion & Financial Literacy.
- 2) To understand the need of Financial Inclusion for the economic development of country.
- 3) To study the need of Financial Literacy for the success of Financial Inclusion.

### Research Methodology

Research methodology is partly descriptive, partly exploratory and partly casual. For this study data and information has been collected with the help of Books, Magazines, Newspapers, Research Articles, Research Journals, E-Journals, RBI Report.

### Meaning of Financial Inclusion

Financial Inclusion can be explained as the method of providing banking and financial services to every individual in the society. It primarily aims to include everybody in the society by giving them basic financial services without looking at a person's income level or savings. Financial inclusion mainly focuses on providing reliable financial solutions to the economically weaker sections of the society without having any unfair treatment.

“Financial inclusion may be defined as the process of ensuring access to financial services and timely and adequate credit where needed by vulnerable groups such as weaker sections and low income groups at an affordable cost”  
(The Committee on Financial Inclusion, Chairman: Dr. C. Rangarajan).

### Need of Financial Inclusion

As per the report made by Department of Financial Service in 2011, only 58.7% of households are availing banking services in the India. However, as compared with previous census 2001, availing of banking services increased due to various affords of Government of India & RBI.

Since banking services are in the good of the public, it is necessary that the main objective of public policy is to provide banking and payment services to the entire population without discrimination. But in the current banking system segment of the population, especially the rural & poor sections of the society are still outside the limits of banks. The percentage of adult population in the bank account is only 58.7%, this means 41.30% of the population unfortunately not using this facility, and this percentage is higher in rural areas.

It is now widely accepted that financial exclusion leads to non-accessibility, non-affordability and non-availability of financial products. The limited access to funds in an underdeveloped financial system limits the availability of their own funds to individuals and also leads to high cost loans from informal sources such as moneylenders. Due to lack of access to bank accounts and remittance facilities, the person pays high fees for basic financial transactions.

The absence of a bank account also poses a risk of security and loss of interest from holding cash. They impose real costs on all individuals. The long and persistent lack of banking services in a large part of the population leads to a decline in investment and the ability to reduce social tensions due to social exclusion. Thus, financial inclusion is a clear strategy for accelerated economic growth and is considered important for achieving inclusive growth in the country.

#### **The following points justify the need for Financial Inclusion in India.**

- Indian economy is growing at a rate of 8.5. % to 8% per annum.
- Industry and services contribute the most.
- Agriculture is growing at a rate of only 2%.
- Behind this is limited access to affordable financial services (credit / insurance )
- Providing secure access.
- Formal payment system for all Savings / deposit insurance
- Provides formal identification
- Aids social and political stability

#### **Financial Inclusion Schemes in India**

The Government of India is launching several special schemes aimed at financial inclusion. These schemes intend to provide social security to the weaker sections of society & people residing in rural area. After much planning and research by many financial experts and policy makers, the government started the schemes keeping financial inclusion in mind. These schemes have been launched in different years.

- Prime Minister Jan Dhan Yojana (PMJDY)
- Atal Pension Yojana (APY)

#### **Meaning of Financial Literacy**

Financial literacy is defined as the possession of knowledge and skills that enable informed and effective wealth management. It is the education and understanding of how money is made, spent, and saved, as well as skills and the ability to use financial resources to make decisions. It includes generating, investing, spending and saving of money.

This concept is applicable to both individuals and organizations.

For Individuals, he must be able to balance a wealth, understand personal income taxes, and understand the concept of budgeting to make wise decisions with money. These skills are critically important, as of now, many individuals lack this basic knowledge and as a result are unable to meet their daily expenses.

On the other hand, businesses man should have understand the financial statements, production schedules, cost sheets, and many other types of reports to make decisions about the future of the company.

### **Need of Financial Literacy**

Financial literacy has assumed more importance especially in recent years. Financial markets have become increasingly complex and common man find it is very difficult to make decisions. Financial Literacy is considered important support for financial inclusion, financial development and promotion financial stability.

Financial development is widely recognized as an important determinant of economic Development (Levine, 2005). It can be argued that limited financial literacy serves as a barrier to demand for financial services if individuals are not familiar or comfortable with products, they will not demand them.

Financial inclusion comes with potential risks. Recent experience in the microfinance sector has shown that poor people take loans that they do not have ability to serve. Farmers have also taken loans which they have not been able to repay. Many have been driven to suicide due to debt problems.

Financial literacy can be broadly defined as the ability to be familiar and Understanding of financial market products, especially in order of rewards and risks make an informed choice. It refers to the ability to make and take informed decisions effective decisions about the use and management of funds. It is considered as important requirement to function effectively in modern society.

Financial literacy is required in both developed and developing countries. Increasing number and complexity of financial products, continuous change government's policy and different services from financials Institute for Individuals, and the Increasing Importance of Personal Retirement Planning it is imperative that financial literacy is important in every developed country.

Financial literacy in developing countries can be seen as the first step reducing Poverty and Development. Given the low level of financial literacy in India, the need for financial literacy is even greater. Large sections of the population are still financial illiterate and they still out of formal financial establishment especially in rural areas.

Everyone saves money for future needs but most of the time is to save outlook Surplus money without preparing household budget, prioritizing personal budget Financial goals, without properly allocating investment across different asset classes and Without understanding the actual rate of return (after adjusting for inflation). Individuals are required to make many financial decisions during their lifetime. Examples of Such needs are high for sister / daughter marriage, one's own marriage, children. Financial education is very important for making education, saving for retirement, etc. informed decision.

### **Conclusion**

The process of economic development should touch all sections of society. Lack of access to financial services and lack of information for low income groups, poor farmers and weaker sections of society (especially women) have been recognized as a serious threat to economic progress, particularly in developing countries. Recent developments in banking sector have positively impacted the financial inclusion process like the facility of automated teller machines (ATMs), credit / debit cards, online money transactions, internet banking, etc. Government of India is promoting digital financial services. All this affords will be successful only after the financial literacy in India.

### **Limitation of the Study**

The Present study is based on the review of various research papers of eminent scholars in the area of financial inclusion & financial literacy. Therefore in the present study, no empirical analysis has been done based on the primary data.

## Technology Enhance High Performance And Mass Participation In Sports

Uday N. Manjre ,Associate Professor<sup>1</sup>,

Vijay V. Pande, Assistance Professor<sup>2</sup>,

Degree College of Physical Education, Amravati

### Abstract

*The analyzes of innovations technological which is used in high-level sport and how mass participants will benefit from advancements. After the discussion, progressive practices of different successful sporting competitions and competitors. The carefully review high-performance facility development and utilization practices, as well as examples of modern equipment and technology being applied in multiple high-performance athlete service areas, such as general fitness, sport-specific training, restoration, nutrition, medicine, and psychology. This section also emphasizes examples of national and local high-performance technology practices for enhancing mass participation, such as evolving networks of comprehensive multisport training centers available for nurturing every possible age and socioeconomic group. Finally, suggestions are made to provide communities, in partnership with universities or local level, with recreation and sport technologies which are free or affordable for all, everyone to utilize and enjoy the new technologies.*

Keywords : sport technology, high performance, mass participants, Neuropriming ,Dry Needling.

### Introduction

If we see the history of sports, sport participants have benefited from new methods of fitness training, adaptation to extreme conditions, innovative medical care, and technology originally developed for sports personal. These advances are passed down to general troops and, finally, to the masses. Today, the society drives fitness through sport, but elite sport itself, when managed systematically, is becoming a leading force for mass sport participation and technological advancements, ultimately benefiting everyone . High-performance (HP) coaches now lead teams of biomechanists, physicians, endocrinologists, engineers, and other technology specialists, developing systems and structures for the most effective and efficient preparation of athletes to competitions. Developmental level coaches and sport administrators, in turn, promote mass participation in order to maximize the pool of potential elite athletes with the ancillary benefit to their communities' well-being. Many advanced technologies originated in government-supported in elite sport, or rehabilitation research programs.

Apart from this some advance technology is considered are as- Sport-specific training, Sport restoration and medicine, Dry needling for High performance and mass participation in sports.

### General fitness

Appropriate fitness testing has great unrealized potential as a critical component within physical education and mass/elite sport However, Internet-based physical activity assessment and interactive technology were only utilized.

Uniquely offered for each age, Global Test Operation is highly individualized, employing swimming and skiing as optional testing items in addition to running. Lifestyle-related skills such as camping, recommended weekly physical activities, and fitness knowledge tests were only included in Global Test Operation. While comprehensive and technologically advanced, Only Global Test Operation was designed to connect testing results to sporting programs, requiring a database created in the country. There may be a need to develop a global fitness test program as monitoring youth fitness from the international perspective is of concern. Fitness tests should include all age groups integrating knowledge tests, optional test items from Eastern exercises such as yoga, and various alternatives to running.

### Sport restoration and Medicine

Neuropriming is a process of using electrical stimulation to increase plasticity in the brain prior to an activity, neural plasticity can be defined as the ability of the central nervous system to adapt in response to changes in the environment or lesions, this process purports to decrease the amount of input required for neurons to fire, and helps neurons fire together, enabling more rapid strengthening of connections in the brain. When paired with quality training, this results in increased strength, explosiveness, endurance, and muscle memory. Although most of the evidence is anecdotal for the product Halo at this time, many high-level athletes and coaches use this technology. According to Halo , athletes training for strength- and power-intensive sports received neurostimulation treatment in the form of transcranial direct current stimulation (tDCS) from the Halo

Neurostimulation System and in turn demonstrated significantly greater improvement in their jumping ability compared to nonstimulation athletes. One specific example highlighted by Halo identified that even with identical training, Halo Sport users on the USA Ski team produced 13% more jump force compared to a control group, and reached goal performance 5 days sooner compared to a control group (45% faster).

### Dry Needling (DN)

It is used to treat musculoskeletal injuries, pain, and muscle tension reduction. Most of the current literature has shown the effectiveness of DN on latent trigger points but there has also been success in its use to increase range of motion (ROM) after a muscle strain and after an ACL reconstruction. Myofascial pain is a common form of pain that arises from muscles or related fascia and is usually associated with myofascial trigger points (MTrP) and musculoskeletal injuries. The most common method for MTrP is inserting a needle directly into the MTrP and leaving it in place for a short period of time (30 seconds–1 minute). A modified version of this technique is to oscillate the needle in and out of the MTrP during the treatment for the same amount of time. Both techniques are effective when a local twitch response is elicited. Most likely as a result of depolarization of the involved muscle fibers, which expresses as local twitches. Once the muscle has stopped twitching, the spontaneous electrical activity subsides and the pain and dysfunction decreases. This form of intervention has seen good results in the treatment of MTrPs. In addition to focusing on MTrPs within a muscle to release tension, there have also been studies that focus on MTrPs to increase ROM, short-term muscle endurance, and return to performance in elite athletes.

### Conclusions

As these innovative approaches become more affordable, portable, and popular, the challenge will continue to be, how to bridge the gap between high-tech and common use? How can we design these new technologies so that the masses improve their lives? how can we effectively teach all users to interpret the data generated by the innovative techniques?. When it is understood and used properly, the ultimate goal of mass participation fueling elite sport which circles back to mass sport involvement will be realized. These issues and recommendations given in this ,should be considered by sport, health, education, and national governments. Sport governing bodies, universities, and research centers, and corporations should be stimulated and coordinated to devote more effort toward studies, development strategies, and policies for technological innovations which benefit both high performance and public health.. The responsibility of bridging this gap falls on schools and universities, in coordination with local government officials, to revise training programs of sports scientists for this new age of big data analysis and individualization of these high-tech innovations the wider public can safely and effectively utilize.

### Abstract

*Most of the commercial transactions are performed on Internet with the help of on-line shopping. The huge amount of data available on Internet puts an extra overload to the user in performing on-line task. Recommender Systems are being used widely to reduce this extra overload and recommend the scrutinized product to the customers. Many data mining techniques available are frequently being used for recommendation technology to enhance the online business. In this paper we try to give an overview of recommendation techniques and change of trends in recommender systems. SWOT analysis is discussed that give an idea about the respective effects of recommender systems on business strategies. Finally we conclude that there is a scope of research to overcome the limitations in existing systems.*

**Keywords:** Data Mining, E-Commerce, Online Business, Product Recommendation, SWOT Analysis, Web Mining.

### Introduction

Joe Pine, in his book Mass Customization (Pine, 1993), argues that companies need to shift from the old world of mass production where “standardized products, homogeneous markets, and long product life and development cycles were the rule” to the new world where “variety and customization supplant standardized products.” Pine further argues that, companies need to develop multiple products that meet the multiple needs of multiple customers.

With the arrival of emerging technologies and the fast growth of Internet, the world is moving towards e-world where most of the things are digitized and available on a mouse click. Most of the commercial transactions are performed on Internet with the help of on-line shopping that makes e-commerce to become more popular. Customers are buying more and more products on the Web and business organizations are selling more and more products on the Web. Whenever a user wants to buy a product on the Web, he visits an online store and looks for item of his interest. There are many popular e-commerce sites like Filpcart.com and Amazon.com etc. Such online stores sell many items. There are many brands and models available for a single item. The opportunity for the customer to select from a large number of products increases the burden of information processing before he decides which products meet his needs. Customer may face the problem of information overload, in case he is not sure about product of his choice. He may come across a situation, where he may be unable to decide which product to buy. Whenever, a user visits a site and selects a product to buy, the sites recommend him some more products to buy. By giving some information about the product and the user's profiles, product Recommender systems attempt to predict products in which a user might be interested.

E-commerce sites use recommender systems to suggest products to their customers. The products can be recommended based on the top overall sellers on a site, based on the demographics of the customer, or based on an analysis of the past buying behavior of the customer as a prediction for future buying behavior. These techniques are part of personalization on a site, because they help the site adapt itself to each customer. Recommender systems automate personalization on the Web, enabling individual personalization for each customer. Personalization to this extent is one way to realize Pine's ideas on the Web. Thus, Pine would probably agree with Jeff Bezos, CEO of Amazon.com™, when he said “If I have 2 million customers on the Web, I should have 2 million stores on the Web.”

## Literature Review

The current research literature on Web-based recommender systems is focused on techniques and computer algorithms to produce the content of the actual recommendations, rather than any usability and user-related issues. Author of [1] indicated that the current recommendation systems on e-commerce sites resemble a “black box,” providing no transparency concerning how and why they should be implemented. They also indicated that providing explanations in recommendation systems can improve automated collaborative filtering.

To determine user preferences in recommender systems, Rashid et al. [2] conducted an experiment where they studied collaborative filtering systems the recommender sites use to present to each new user an accurate rating of recommended products. They concluded that while recommender systems research is scarce, the proper strategy for eliciting information from users in recommender systems depends on the dimension of user experience along which the system is trying to optimize. They also concluded that in general, systems that make good guesses on what items people will rate are likely to do well with both reducing user effort and producing acceptable recommendations.

According to research conducted in the e-commerce area, the main techniques that recommender systems use to come up with suitable products are the non-personalized approach, attribute-based recommendations, item-to-item correlations, and people-to-people correlations. The non-personalized approach produces recommendations from other customers’ feedback on similar products. Attribute-based recommendations are based on the description of the product properties and their relation to the customers’ interests. Item-to-item correlation recommendations are based on customers’ interest on similar products, and people-to-people correlation recommendations are based on the similarity in the buying histories of two or more customers. Author of [3] also divided the recommender systems into automatic, semi-automatic, and manual categories based on the level of conscious customer input they need (where systems are more automatic with fewer conscious user decisions involved).

As part of a similar study, author of [4] put computer algorithms used in recommender systems into five categories in an algorithm survey he conducted. They include collaborative, content-based, demographic, utility-based, and knowledge-based algorithms. Collaborative algorithms are used to locate similar product interests between customers. Content-based algorithms are used to find similar product interests among customers based on descriptions of the products they shop or search for. Demographic algorithms focus on the customers’ demographic information such as age and gender to produce appropriate product recommendations. Utility algorithms are concerned with the services offered as part of the recommendations, such as shipping, wrapping, and promotion. And finally, knowledge-based algorithms use the comprehensive knowledge the system has about the specific customer and infers the product that might interest the same customer. Burke also surveyed existing hybrid algorithms, which combine the five algorithms. He confirmed that in a number of cases, hybrid algorithms perform better than using one algorithm. These articles indicate that researchers put significant efforts to improve the back-end algorithms of recommender systems to produce accurate and efficient recommendations for online shoppers.

In one of the earlier studies examining the Human-Computer Interaction (HCI) aspects of such systems, author of [5] found that some of the interface issues including graphics and color are not strongly correlated to the ease of use and perceived usefulness of recommender systems.

In their innovative approach, author of [6] designed and evaluated a new kind of recommender system called “Kalas” which used social navigation to recommend food recipes. They concluded that the explicitness of the social texture in which the recommender systems are presented, such as comments and recommendations being presented in a formal versus informal language, appears to be more important than other social information attached to recipes. However, their study did not discuss further issues concerning the applicability of their findings to general recommendation systems in e-commerce, especially on whether the social elements such as customer comments and reviews concerning the product would affect the overall perceived usefulness and usability of such a system.

A few studies concentrated on user issues concerning e-commerce product recommendations on a mobile device screen. These types of recommendations are different from the regular Web based recommendations on larger screens as there is not enough space on a mobile screen to display both the main product and the recommender product(s). Therefore, mobile recommendations usually involve single recommended products that are sent to or accessed by the shoppers. In this context, Miller et al. (2003) [7] studied recommender systems on a Personal Digital Assistant (PDA). Interestingly, they indicated that users like feedback when they are presented on an interactive interface. They also found that users prefer extra information concerning the product be displayed upon request. A few lines of extra information on the limited mobile screen were found by the users to improve their knowledge regarding the recommendations. However, the authors did not explore the exact nature of this extra information requested by the users.

Similarly, Kim et al. (2004) developed the Visual Content Recommender System (VISCORS) for mobile devices accessing the Web. It is initially designed as a recommender system that presented pictures of recommended products on cell phone and other mobile screens. They indicated that showing images of recommended products is better than using plain text for descriptions of the products. This application is limited to shopping images only, and there is no information on the effectiveness of combination of the image and text on the usefulness of a recommender system. A well-organized interface with a carefully designed product list and additional product information such as product description and image in e-commerce will have a great impact on the sales. They concluded that easy navigation and a well-organized layout of the interface can improve accessibility of the product information to online shoppers.

### Overview Of Product Recommender Systems

The products can be recommended on the basis of the top overall sellers on a site, on the demographics of the consumer, or on an analysis of the past buying behaviour of the consumer as a prediction for future buying behaviour [8]. Recommender systems enhance e-commerce sales in four ways: helping customers find products they wish to purchase; converting browsers into buyers; improving cross-sell by suggesting additional products for the customer to purchase; improving loyalty by creating a value-added relationship between the site and the customer [9].

Recommender systems are technologies that assist businesses to implement one-to-one marketing strategies. Recommender systems rely on customer purchase history to determine customer preferences and to identify products that customers may purchase. Supporting product recommendation services can strengthen the relationship between the buyer and seller and thus increase profit [9].

#### A. Collaborative Filtering Recommender Method

Collaborative filtering (CF) has been known to be the most successful recommendation technique although a variety of recommendation techniques has been developed recently, and has been used in a number of different applications such as recommending web pages, movies, articles and products [10]. The goal of the CF is to suggest new items or to predict the utility of a certain item for a particular user, based on the user's previous likings and the opinions of other like-minded users. The basis of collaborative filtering (C.F) is the user's opinion. There are three main parts of a recommender system.

1. Representation of data
2. Neighbourhood formation
3. Recommendation generation.

However, CF suffers from two fundamental problems. Sparsity: stated simply, most users do not rate most items and hence the user-item rating matrix is typically very sparse. Therefore the probability of finding a set of users with significantly similar ratings is usually low. First-rater Problem: an item cannot be recommended unless a user has rated it before. This problem applies to new items and also to obscure items and is particularly detrimental to users with eclectic tastes [11].

It is believed that the collaborative filtering is the most successful technology for being used as a recommendation system till early decade of the new millennium [12]. The products recommendation is done on

the basis of opinions of other customers. This opinion includes the trends of a particular customer on several products and several customers on a particular product. These systems try to find the neighbor of an item. Neighbors are considered as the customers that either rated different product in a same way as the target customer or they seem to show their affinity for a particular product same as the target [13].

Another problem associated with C.F is scalability. As discussed in the previous sections that collaborative filtering uses neighbour algorithm that requires computations. And the computation increases proportionally to the number of customers and products both.

### B. WebCF-AR

WebCF-AR is a model-based recommendation method [11] that addresses the sparsity and the scalability problems of existing CF-based recommender systems. Web usage mining analyzes customers' shopping behaviors on the Web and collects their implicit ratings. This increases the number of ratings rather than obtaining subjective ratings, thereby reduces the sparsity. The scalability problem is addressed by using the dimensionality reduction technique together with the model-based approach. Product taxonomy is employed as a dimensionality reduction technique that identifies similar products and groups them together thereby reducing the rating matrix. Association rule mining, as a model-based approach, is applied to identify relationships among products based on such a product grouping and these relations are used to compute the prediction score.

The entire procedure of WebCF-AR is divided into four phases: grain specification, customer preference analysis, product association analysis, and recommendation generation.

### C. Association Rule Mining

Given a set of transactions where each transaction is a set of items (itemset), an association rule implies a knowledge or pattern in the form of  $X \Rightarrow Y$ , where  $X$  and  $Y$  are itemsets;  $X$  and  $Y$  are called the body and the head, respectively. The support for the association rule  $X \Rightarrow Y$  is the percentage of transactions that contain both itemsets  $X$  and  $Y$  among all transactions. The confidence for the rule  $X \Rightarrow Y$  is the percentage of transactions that contain itemsets  $Y$  among transactions that contain itemset  $X$ . Support represents the usefulness of the discovered rule and the confidence represents certainty of the rule. Association rule mining is the discovery of all association rules that are above a user-specified minimum support and minimum confidence. Apriority algorithm is one of the prevalent techniques used to find association rules [14]. Association rule mining has been widely used in the field of recommender systems.

### D. WebCF-PT

WebCF-PT is a recommendation method based on Web usage mining and the product taxonomy to improve the recommendation quality and the system performance of current CF-based recommender systems [15]. The overall procedure of WebCF-PT is divided into four phases: grain specification, customer profile creation, neighbourhood formation, and recommendation generation. The input data consist of Web server log files, product database, customer database and purchase database. The endmost output is the personalized product recommendation list. Using the recommendation list, the Web retailer may be able to perform effective one-to-one marketing campaigns of providing individual target customer with a personalized product recommendation by the delivery of email or by the presence of personalized Web pages, etc. This method has some prominent advantages. First, WebCF-PT applies the product taxonomy both to reducing the sparsity in the rating database and to improve the scalability of searching for neighbours. Second, it develops a Web usage mining technique to capture implicit ratings by tracking customers' shopping behaviours on the Web and applies it to reducing the sparsity. Third, it develops a Web usage mining technique to choose proper products to recommend from the neighbourhood [16].

### Problems Of Recommendation Systems

Various techniques that are used in a recommender system suffer some of the hurdles that may be described in terms of basic problems as:

**Sparsity Problem:** The main reason behind data sparsity is that most users do not rate most of the items and the available ratings are usually sparse that affects the quality of recommendation. As Collaborative

filtering is dependent over the rating matrix in most cases, it suffers from this problem. Many researchers [17][18] have attempted to alleviate this problem; still this area demands more research.

**Cold Start problem:** Cold start problem refers to the situation when a new user or item just enters the system. Generally three kinds of cold start problems are considered which are: new user problem, new item problem and new system problem. In such type of cases, it is really very difficult to provide recommendation, as there is very less information about new user is available and also for a new item, no ratings are usually available. Thus collaborative filtering is unable or cannot make useful recommendations in case of new item as well as new user. However in such cases, content based methods can provide recommendation as they do not depend on any previous rating information of other users to recommend the item.

**Scalability:** Scalability is the property of system which indicates the ability of the system to handle growing amount of information in a graceful manner. As there is a huge growth in information over internet, it is obvious that the recommender systems are having an explosion of data and thus it is a great challenge to handle with continuously growing demand. Some of the existing algorithms which are available for recommender system deal with the computations which increase with growing number of users and items. In Collaborative filtering computations grow exponentially and get expensive, sometimes leading to inaccurate results. Methods that are proposed for handling this scalability problem and speeding up recommendation formulation are based on approximation mechanisms. Even if they improve performance, most of the time they result in accuracy reduction [18].

**Over Specialization Problem:** Users are restricted to getting recommendations which resemble to those already known or defined in their profiles [18] in some cases and it is termed as over specialization problem. It prevents user from discovering new items and other available options. However, for all recommendation systems, diversity of recommendations is a desirable feature.

### Swot Analysis In Business Context

The formulation of business strategies are considered as decision making techniques. Therefore it is very important to know the factors that affect decisions that we make. In [19] five factors have been discussed that is important in making decisions which are opposite psychological needs, motivational style, dominant motivational style, determining key styles and domain of experience.

With the help of SWOT analysis [2] we can easily assess the recommendation system as a basis for making business strategies for marketing and advertisement.

SWOT Analysis is a useful technique for understanding Strengths and identifying Opportunities that may exist, and finding out the Weaknesses and knowing the Threats we may face. It is used in a business context; a SWOT Analysis helps to carve a sustainable niche in market. When we use SWOT analysis in a personal context, it helps to develop career in a way that takes best advantages of the talents, abilities and opportunities. A diagrammatic representation of SWOT analysis for product recommendation is shown in Fig.

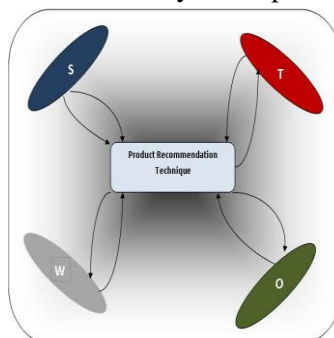

Fig 1: SWOT Analysis for Product Recommendation.

In the table 1, the four factors of SWOT analysis is discussed.

**Table 1: SWOT Analysis for Recommender Systems**

SWOT Analysis parameter	Product Recommendation Technique's Features
Strength	Top online retailer in the world like Amazon. com use product recommendation techniques.
Weakness	False positive and false negative errors
Opportunity	Rapid growth in online shopping
Threat	Information overload over Internet

Electronic commerce is defined as business transactions that take place over telecommunications networks where the process of buying and selling products, services and information over computer networks occurs. While e-commerce continued to be a global phenomenon, retailers started looking for new frontiers to reach customers. Hence since late nineties, companies started to present recommendations of alternative products to customers on their Web pages.

### Conclusion

Several recommendation systems have been proposed that are based on collaborative filtering, content based filtering and hybrid recommendation methods and so far most of them have been able to solve the problems while providing better recommendations. As there is enormous growth of information on the web, it is required to work on this research area to explore and provide new methods that can provide recommendation in a various range of applications while considering the quality and privacy aspects. Hence, we conclude that the current recommendation systems needs improvement for present and future requirements of better recommendation qualities which will give benefit in decision making policies to the brand business giants.

2 Dept. of Comp. Sci., College Of Management And Computer Science, Yavatmal, Dist- Yavatmal,

### Abstract

*Digital Education to students has become the need for overall development of every nation. Since more than half of the population of India lives in rural areas, it is necessary to explore the students from such areas by introducing them to the Digital education to assist the traditional learning process. Digital Education not only boosts the interest of rural students in education but also help them to match the competitive environment at the job places by learning various technologies.*

*Keywords: Digital Education, Digital Learning, Rural Areas, Education*

### I. Introduction

Digital learning is a learning that is assisted by the use of computers, laptops, tablets and smart phones. Though traditional methods of teaching are still in practice, digital learning helps the students to learn and implement the concept easily. It is a tool that will not replace teachers but will assist them to present their knowledge to large number of students who have limited access. Digital learning not only educates, but it creates empowerment among all the young lives it touches.

With the emergence of Internet, mobile phones, various mobile apps, tablets, laptops, and other modern devices, everything has become more and more digitalized in today's world. The education system in urban India is also modernized to a large extent, making way for digitalization. Since large number of International schools is setting up, digital education is making its way into the education system of India and is taking the place of the traditional classroom training.

Since the growth of every nation is directly proportional to the growth of its youth, one of the main motives of educators around the world, especially in India, is making the current generation learners future-ready. However, India's high youth population will be of help to the economy only if universal education is achieved all over India.

The main problem Indian rural students face is that all the innovations are easily available to improve the quality of urban education while the rural learners does not receive the same exploration and remain largely neglected. With 65 per cent of the population residing in rural India, education there truly deserves much more attention. In India where illiteracy is one of the biggest problems in rural areas, lack of easy access, lack of teachers, teacher absenteeism and poor quality of teachers, lack of facilities, lack of interest, poverty, gender differentiation, lack of infrastructure, high drop-out ratio specially among female students are some other major reasons which are holding back the progress in rural education. But above all, the two major factors that affect education in rural areas are the lack of good teachers and availability of digital tools.

But with the use of digital education and technology the current domain of rural education can be boosted. Rural students will definitely benefit from educational tools and increased access to information and resources. Moreover they will also grow and mature from the networking and connectedness created by technology. They will be explored to a world of global and diverse friendships expanding their boundaries and perspectives of who and what they can be. Rural students would then find it easy to compete with their suburban and urban counterparts. It has been found that urban learners always secure better grades than their rural counterparts. It is not the lack of caliber that is affecting their performance, but the lack of resources and opportunities available to them. Moreover, it can't be said that teaching is not a motivating profession. Even in rural areas we can find many passionate teachers who want to bring a change in the rote learning techniques. However, poor remuneration, lack of technologies, non teaching duties and inadequate training are few of the factors that discourage the teachers in rural areas to give their 100 percent to the students. Technology, on its

part, has the potential to positively affect the quality of education, and also to break the digital divide between the rural and urban parts.

## II. Why Digital Education In Rural Areas

India has the largest population of children and youth in the world, around 43 crore/ 430 million in the age group of 0-18 years. These children and youth are the future of nation and therefore, it is necessary that they are provided with necessary means to explore and grow their potential. A digitized education system which is the need for overall growth of country can make a way in this direction. In order to accomplish this, it is imperative that we address some prevailing concerns such as orthodox teaching methods, shortage of qualified teachers, highly disproportionate student-teacher ratio, and inadequate digital teaching materials that affect the quality of education.

The ratio of rural-urban enrollment of students in schools is a massive 7:5. Nearly 60 percent rural students up to the age of ten, lack basic reading skills. They are even unable to solve simple mathematical problems. Though that there has been an elevation in Pupil Teacher Ratio (PTR) from 32 in 2009-10 to 24 in 2015-16, but the problem of single teacher schools is still a major concern in rural parts of the country. Recent study reveals that out of the total schools in the country about 8.8 percent schools in rural areas still have single teacher which accounts for 97,273 single teacher schools in India. Such barriers not only lead to poor quality of education, but also contribute to most important issue i.e. high dropout rates in rural schools—nearly 50 percent by the age of fourteen. Furthermore as the dropout of students in schools is above average level, very few students move ahead and pursue their college education. This results in wasting their secondary education and fails to get suitable job in the market.

The foundation for improving quality, accessibility and affordability of education in rural areas of the country can be laid down by encouraging technology interventions and digitized education. With the help of technology aforementioned problems can be overcome. Education can be digitized in rural areas by providing multimedia teaching tools to teachers and engaging students through learning methods that utilize digital tools, such as smart-boards, LCD screens, videos, etc., to teach them different concepts. Use of technology will make possible for a single teacher to deliver information remotely across several locations. Problem of shortage of teachers can also be solved using interactive digital learning media in these schools.

As of 2016, it has been found that 9, 07,585 posts for teachers are still vacant in elementary schools and 1, 06,906 posts in secondary schools. However teachers in rural areas being not that familiar to digital tools, may face certain challenges, such as limited training in using digital tools, exposure to technology, and apprehension of new ways of teaching. Therefore, it is crucial to impart adequate technology training to teachers. This can be implemented by means of training programs initiated by the government as well as by non-governmental organizations (NGOs). Out of the total school children in rural areas, around 20.24 percent students shows disinterest in studies. Interactive learning assisted by digitization can make learning in classrooms interesting and, in turn, will motivate students to attend school regularly.

### Initiatives taken by the Government and NGOs towards improving digital Education in rural areas:

An important factor for developing rural education in India is the necessary infrastructural support for digitalization of education. 'E-Kranti' is one of the major steps taken by government of India in collaboration with various telecom service providers to digitize the country by covering various areas of country with basic infrastructural set-up for internet services.

In the Union Budget for 2018-19, the government's focus has been towards raising the standard of education by integrating technology into the rote learning techniques. The government has allocated Rs 456 crore for digital education.

Government is now motivating the role of NGOs along with the interested participant players from the various private sectors in spreading digital education tools across Indian villages. It is focusing on improving the quality of education in rural areas by integrating the technology and utilizing the resource capacity of these companies. The primary focus is being laid down on switching from blackboards to digital boards.

With the intent of expanding access to e-learning for students from economically challenged backgrounds, a digital program called “Learn, Out of the Box” has been launched in partnership between Vodafone Foundation and Pratham Education Foundation. Under this program, Vodafone’s WebBox (essentially a smartphone repackaged as a keyboard), is given to teachers in low-cost schools throughout India. The WebBox serves as a low-cost “smart class platform,” which enables the teachers to show videos, images, and other relevant curriculum content in class. Teachers can also carry the WebBox at home so as to prepare for class, inputting classroom activities, quizzes, and project assignments.

The government also runs schools like Jawahar Navodaya Vidyalayas, primarily for children from rural India, to increase access to education through digital learning platforms. Jawahar Navodaya Vidyalayas, works in collaboration with the multi-national corporation Samsung, to provide access to digital learning to several students but also train teachers to use interactive technology.

While NGOs are putting their efforts alongside the government for digital education in rural India, the next logical step would be to bring common effort of both entities together and implement these initiatives on a large scale to maximize the impact.

### III. Significance Of Digital Education To Rural Students

The teaching approaches in most of the rural schools of India today consist of rote learning. However, in today’s hyper-competitive environment, such traditional way learning without current technology aids won’t take students far. If we digitize education in such areas, there are several ways we can revolutionize the current education system, making teaching and learning more effective. Here’s why:

**Class Attendance Ratio can be increased:** Technology attracts the rural students. Their desire to attend the school increases with the word computer. Even parents show more willingness in this case.

**It’s more appealing:** In rural areas where the number of disinterested students is more, tools such as power point presentation, video lectures makes learning fun and engaging not only for them but teachers as well.

**Interactive:** With digital education, classroom teaching which a kind of rote learning have become more fun and interactive. Children tend to be more attentive in rural areas. Along with the listening they also view it on the screen which makes their learning more effective. When they get to learn by means of videos, sounds and visuals which go hand-in-hand it becomes for a child to grasp.

**Vocabulary:** Digital Learning on an online screen helps students develop language skills. By reading eBooks or accessing study materials online, they learn new words and expand their vocabulary especially in the English language which is the main lagging factor in rural areas.

**It’s comprehensive:** Computer education builds up the required confidence and narrows down the gap between urban and rural education. Qualified teachers can be hired instead of unqualified. This approach not only promote competency, but it also keeps students more motivated and engaged.

### IV. Conclusion

The future of education in every country is digital. Going a step ahead, this field will create newer developments such as unconventional methods of learning. Since education system is an integral part of every school, college and university, with digital approach of teaching and learning, there is an immense scope for improvement in the educational system today.

It is important to restate that, through a comprehensive and widespread digital platform, children and youth from all sections of society, especially rural areas, can strengthen their access to technology which will help them to gain knowledge and additional skills leading to greater learning outcomes. Innovative use of digital tools can make a difference for creating vital impact to solve some of the key issues in rural education of India.

Improving and increasing the use of technology in the rural classroom has a wider scope and is an ever-changing and ever-expanding field. There are still number of challenges imposed by funding and underdeveloped internet networking, but the future looks bright for rural schools. Collective effort taken by the

teachers in rural areas and government policies to impart digital education to rural students shows that, a greater number of rural students are graduating and pursuing higher education degrees than ever before.

## CSR Initiatives Of Business Enterprises With Special Reference To Amravati City

**Anurag mohod**

Technical Recruiter, Collabera Technologies Pvt. Ltd, Vadodara, Gujrat.

**Dr. Mahek Iram Qureshi (Assistant Professor)**

School of Commerce and Management, G. H. Rasoni University, Amravati

### Abstract

#### Area:

*Corporate Social Responsibility is a much awaited term which is not new but very much in fashion today, synonymous with philanthropic activities of the firm.. In the present study the focus is mainly on business enterprises that have huge potential and can change the corporate social responsibility scenario in Amravati city.*

**Methodology:** *In the present study enterprises are selected with the objective to study and find out the corporate social responsibility practices adopted by them and their perception towards corporate social responsibility. The data has been collected through questionnaire from the owners of the enterprises.*

**Findings:** *The finding focused mainly on corporate social responsibility and its impact on the performance of business enterprises. The results gave an insight to how business enterprises are contributing towards the development of community through corporate social responsibility.*

**Managerial Implications:** *The study will help the future researchers in developing the framework of corporate social responsibility in business enterprises. And it will change their perception towards business development. It will help us to find out the economic and social impact of corporate social responsibility with reference to business enterprises.*

**Limitations:** *Only few business enterprises have been taken due to limitation of time and reach.*

Keywords: Corporate Social Responsibility (CSR), Business Enterprises.

### Introduction

CSR is a new buzz word in business world. It has gained important position in overall planning of business enterprises. Businesses in today's time use resources extensively. Hence it is imperative for businesses to create and produce goods and services to fulfill the consumer needs. The impact of business world is seen in every sphere of life. If we talk about our economy after 1991 there has been rapid growth in the economy. This decision gave a boost to economy and so international companies enter into our country. Globalization brought up big challenges both internally and externally. Internally companies had to empower employees, use the resources optimally; they had to improve the production process, human resource management and marketing strategies across products and services and across countries. Externally the firm had to create and sustain various relationships with the ever growing number of stakeholders who demand their share from the business in the form of benefits. Corporate Social Responsibility is an obligation of firm to give the society in return what they have taken from the society. CSR initiatives show concern for all stakeholders

- Investors
- Consumers
- Employees
- Suppliers
- And society in general

Corporate social responsibility basically orients the sustainable value in terms of human, social, environmental and economic capital. Today corporate social responsibility has attracted public attention and has received global resonance. Society demands that businesses should be accountable so constantly becoming complex and challenging. It is imperative for the businesses to create value for itself through CSR activities. Large number of business enterprises has been engaged in socially relevant activities out of

concern for business planning. Thus, the debate on corporate social responsibility as also the promotional instruments has remained somewhat skewed towards the large scale sector in India. It is also important that, with its agility and dynamism, the sector has displayed admirable innovativeness and adaptability to survive the recent economic downturn and recession.

### Objectives of the Study:

- To find out the Corporate Social Responsibility initiatives being practiced in the different business enterprises for present study.
- To find out organizations perception towards the Corporate Social Responsibility practices being adopted.

### Literature Review

Corporate social responsibility is not a new concept for business enterprises in India but if we look from the point of view of Amravati it is very rare that corporate social responsibility is being implemented here. In Indian context if we see we find that business enterprises have been doing corporate social responsibility in some form or the other and they are aware about it. There are many business enterprises that are not aware about the term but growing attention of other corporate towards CSR compel them to engage in CSR activities. Corporate social responsibility is equally demanded by government, customers, consumers, consumer associations, trade unions and also non-governmental organizations.

Many entrepreneurs interpret corporate social responsibility initiative as charity; however, this isn't a sustainable model, as such initiatives would suffer at the slightest pressure on the profitability of the enterprise. Business should understand that CSR is their inseparable responsibility towards society and should interwoven CSR initiatives along with other goals.

### Method:

Knowing and understanding the scenario of corporate social responsibility in Amravati is the objective behind this study. In the present study data was collected through questionnaire from the owners of the business enterprises. An effort has been taken to find out the initiatives in context of corporate social responsibility of businesses in Amravati.

The researcher visited 50 enterprises amongst them 35 business enterprises agreed to co operate hence data has been collected from them. Presence of corporate social responsibility activities is very rare in these companies because of many reasons but it is present in some form or the other. The perspective taken for study is, what is the perception of these enterprises towards corporate social responsibility and what are the corporate social responsibility activities done by them. The study undertaken on variables viz:

- Knowledge of the companies regarding social responsibility,
- Areas of social responsibility more significant for the enterprises,
- Underlying motivations for CSR initiative
- Areas in which company has realized significant operations,
- Problems the enterprises has faced recently,
- Measures adopted by the enterprises to reduce environmental impact,
- Concrete actions towards community in which the company operates,
- Incorporating greater transparency to the market in which they operate
- Benefits of the adoption of measures for social responsibility,
- Problems related to the development of initiatives in the field of CSR activities

To get inputs on these variables in the present study questionnaire has been devised and response has been elicited. The data generated by the primary survey was processed by statistical computation to draw meaningful conclusions.

**Results:**

From the results it is found out that corporate social responsibility activities in enterprises is prevalent in Amravati. There is huge scope of corporate social responsibility. Only few enterprises here are involved in social responsibility activities. The cumulative data of responses on the variables related to corporate social responsibility activities have been presented below in table numbers I to 13. The detailed results are discussed in tables below.

Sr.No.	PARTICULAR	NO OF RESPONSES	Percentage
1	System of governance transparency and relationship with customers	17	48%
2	Health and development of employees	18	51%
3	Practices of responsible business	25	71%
4	Climatic changes	5	14%
5	Social responsible investing	24	68%
6	Partnership with community	5	14%

**Table 1: Areas in Which Organizations Realized Significant Operations.**

From the above table it can be clearly seen that maximum percent i.e. 71% of the enterprises consider the CSR operations related to practices of responsible business are very significant followed by social responsible investing. Hence it can be said that most enterprises find these operations are significant for their business image. Also a considerable number of enterprises have given a positive opinion about taking CSR activities to a prospect of good health and development of their employees, employees of the organization being the biggest asset for any enterprise.

Sr.No.	Particular	No Of Responses	Percentage
1	STRONGLY AGREE	18	51%
2	AGREE	15	43%
3	DISAGREE	2	6%
4	STRONGLY DISAGREE	0	0%

**Table 2: Agreeableness Of Organizations To Get Help From Governments To Provide Some Focused Areas To Implement Social Welfare Activity.**

In the above table it can be observed that highest number of organizations i.e. 51% strongly agree and 43% agree that organizations must get help from governments to provide some focused areas to implement social welfare activity. Researcher even while personally talking to the businesses found their interest in the same.

Sr.No.	Particular	No Of Responses	Percentage
1	DONATIONS	21	60%
2	SPONSORSHIPS	12	34%
3	NO RESPONSE	2	6%

**Table 3: Results of Corporate Social Responsibility Actions Of Enterprises Towards Community.**

From the above table it can be seen that only 2% of enterprises are not in activities like giving financial support to local community activities and projects, whereas 60% believe in giving donations and 34% in sponsorships to pay their social responsibility.

Sr.no.	Particular	No of Responses	Percentage
1	STRONGLY AGREE	21	60%
2	AGREE	13	37%
3	DISAGREE	1	3%
4	STRONGLY DISAGREE	0	0%

**Table 4: Recognition for Doing Well In the Area of Social Activities**

From the above table it can be interpreted that business enterprises doing well in the area of social activities should get recognition in the society.

Sr.no.	PARTICULAR	No of Responses	PERCENTAGE
1	Environmental care	26	74%
2	Education	15	43%
3	Healthcare	22	63%
4	Peripheral development	12	34%
5	Housing	9	26%
6	Village adoption	3	9%
7	Community involvement	14	40%
8	Employment and employability	7	20%
9	Rural sports	5	14%
10	Welfare	4	11%

**Table 5: CSR Activities of the Enterprises**

In the above table it can be observed that maximum enterprises i.e. 74% and 63% are highly involved in the environmental care and healthcare CSR activities this can also be seen in the tables 6 and 7. Whereas CSR activities done by the entrepreneurs in the fields of education peripheral development and community involvement is a bit ok and very low in all the other fields.

Sr.no.	PARTICULAR	No of Responses	Percentage
1	Pollution control	15	43%
2	Solid waste Management	5	14%
3	Development of Green belt	13	37%
4	Energy Saving	18	51%
5	Rain water harvesting	9	26%
6	Safety and Environment initiatives taken by the company has improved awareness among the people towards Safety and Environment	9	26%
7	Enterprise has grown trees which improved greenery, water levels and general Environment.	0	0%

**Table 6: Results Of Corporate Social Responsibility Measures Of Enterprises Adopted To Reduce Environmental Impact.**

From the above table it is prominently seen that CSR measures taken by enterprises for environmental impact are mostly done by saving energy i.e. 51% of the responses show. Also responses for development of green belt and rain water harvesting and safety and environment initiatives taken by the company have improved awareness among the people towards safety and environment are on the higher side i.e.37%, and 26% respectively.

Sr.no.	PARTICULAR	No of Responses	Percentage
1	Support to Primary / Secondary Education	9	26%
2	Scholarships to students	9	26%
3	Infrastructure to Schools/Colleges	1	3%
4	Furniture, Play equipment etc. to schools / Colleges	7	20%
5	Trainings to students	5	14%
6	Provide Hostel Buildings to students	8	23%
7	Special School buildings to Physically Challenged Persons	2	6%

**Table 7: Results of Corporate Social Responsibility measures of enterprises adapted to educational development.**

It can be seen in the table above those CSR measures of enterprises in case of educational developments in comparatively low by the entrepreneurs

Sr.no.	PARTICULAR	No of Responses	Percentage
1	Health checkup camps	10	29%
2	Treated water supply	4	11%
3	Provide Hospital buildings	2	6%
4	Provide Blood Banks	11	31%
5	Mobile clinics	2	6%
6	Support & Associate to Special Care hospitals	4	11%

**Table 10: Results of Corporate Social Responsibility measures of enterprises adopted for healthcare perspective.**

The above table shows scope for CSR activities in healthcare sector by the entrepreneurs.

Sr.no.	PARTICULAR	No of Responses	Percentage
1	Safety / Quality	19	54%
2	Interaction with people	14	40%
3	Community Welfare Centers	5	14%
4	Multipurpose Halls	2	6%
5	Tech. improvements	10	29%
6	Placement linked trainings	2	6%

**Table 11: Results of Corporate Social Responsibility measures of enterprises adopted for community involvement.**

CSR activities seem to be having a wide scope in the sector of community involvement.

Sr.no.	PARTICULAR	No of Responses	Percentage
1	Roads	10	29%
2	Water Tanks	10	29%
3	Bridges	1	3%
4	Drainages	6	17%

**Table 12: Results of Corporate Social Responsibility measures of enterprises adopted for peripheral development.**

It can be seen in the table above that Peripheral development can have a good scope in CSR if taken interest by the government and enterprises.

Sr.no.	PARTICULAR	No of Responses	Percentage
1	Any Special Focus on development of deprived / down trodden sections of society like SC/ST etc	1	3%
2	Special. Focus on Function Halls to perform Social functions	4	11%
3	Special Focus on Water Supply schemes in Tribal areas	0	0%
4	Special Focus on Skill development training to tribal youth	8	23%
5	Special Focus on Hostel accommodation to promote education	4	11%

**Table 13: Results of special focus on Corporate Social activities.**

From the above table it can be seen the CSR activities is having a very low scope from social point and needs to be given attention.

### Analysis by Average Method:

To draw some meaningful conclusions data needs to be analyzed further. Opinion of respondents on questions 12, 13, 14 & 15 are clubbed to find out the overall opinion of enterprises towards CSR activities. In this attempt weighted scores like 1 given to strongly agree, 2 to agree, 3 to disagree, and 4 to strongly disagree were given. Hence if the maximum responses come on the lower side of the score there is a positive opinion and if it is on the higher side then there is a negative opinion. Lower side being 4 ( $Score\ 01 * 04\ No.\ Of\ Responses$ ) and higher side will be 16 ( $Score\ 04 * 04\ No.\ Of\ Responses$ )

Calculating the weighted average of the responses based on above formulae is 5.89 which indicate that most of the entrepreneurs have positive opinion towards CSR activities.

### Correlation analysis of type of organization with the opinion for CSR activities:

Question number 4 i.e. type of organizations and the responses of the group of CSR opinion questions 12,13,14,15 were put into correlation analysis and the value came out to be 0.039, which indicates that there is no correlation between the type of organizations and opinion for CSR of enterprises.

### Discussion

Knowing about social responsibility creates an impact on the stakeholders of the firm. Previous researches have revealed the importance of corporate social responsibility in large firms as they earn huge profits and they have immense scope for corporate social responsibility. If we talk about the problems which the companies have faced recently then we find that as such the problems are very less and business enterprises are managing it properly, some of the problems are employee safety, irregular work, overtime etc. It has also been found out that business enterprises have also adopted certain measures to reduce environmental impact like they are doing waste recycling, they have provisions for energy saving and are using renewable resources. It has also been found out that the enterprises give clear information about their

products and services which is highly remarkable. Employee satisfaction is the major concern of employees here so entrepreneurs are putting effort to satisfy the employees completely.

### Conclusion

It is remarkable that most companies are aware about corporate social responsibility and benefits associated with it, so it is an opportunity of greater development under corporate social responsibility activities. In the present study only 35 enterprises have been covered and the growth of enterprises in Amravati is highly dependable on growth of society so it becomes imperative for the business enterprises to develop the society and the community they are working in. The study revealed that very few business enterprises are consciously engaged in implementing corporate social responsibility initiatives. The reason can be attributed to lack of financial resources, no support from the side of government (like incentives and schemes), no important impact on the image of the enterprise and lack of awareness in the society. Further, good relations with stakeholders emerged as the most important factor underlying the perception of respondent business enterprises towards the impact of implementing corporate social responsibility practices. There is an urgent need therefore to understand the responsible business practices adopted by the business enterprises. Responsible business practices can be conceptualized as consisting of two dimensions -

- The ethical behaviors of the corporation
- And the Corporate Social Responsibility practices that it adopts

Study also focuses on what are the types of CSR they are practicing and at what level as well as in future what are the practices the entrepreneurs will want to adopt.

## Critical Evaluation Of Medical Tourism In India. Opportunity And Threats

**Dr.Prashant.P.Karekar**

College of Management and Computer Science,  
Department of Management, Yavatmal

### Abstract

*Medical tourism is becoming a popular option for tourists around the world. It includes primarily and predominantly biomedical procedures related to travel and tourism. The term medical tourism has been coined by travel agencies and the mass media to describe the fast-growing practice of traveling across international borders to receive high-tech medical care. Different countries like Thailand, Malaysia, India etc. aggressively promote medical tourism. India's main competitive advantages in medical tourism are the following factors: a low cost advantage, a good reputation in the advanced health segment (cardiovascular surgery, organ transplantation, eye surgery, etc.) and the variety of tourist destinations available in the country. Key industry concerns include: lack of government initiatives, lack of coordinated efforts to promote the industry, no accreditation mechanism for hospitals and the lack of consistent pricing policies and standards in all hospitals. Medical tourism or health tourism is a fast-growing multi-billion dollar industry around the world. It is an economic activity that involves the trade in services and represents the mingling of two of the world's largest industries: medicine and tourism. The paper highlights the strengths of Indian medical tourism services providers and highlights a number of issues that could affect the industry's growth opportunities. This paper focuses on the key issues and opportunities of Indian medical tourism that enable it to overcome national and international barriers to improving its medical services. Finally, this article analyzes the main reasons why the developing country like India attracts foreign tourists for medical treatment.*

**KEYWORDS:** Medical Tourism, SWOT, Yoga, Unani, Siddha, Ayurveda, Naturopathy

### Introduction And Significance Of Medical Tourism

Medical tourism is a new form of a niche tourism market which has been rapidly growing in the recent years. The term medical tourism is the act of traveling to other countries to obtain medical, dental and surgical care. According to Goodrich & Goodrich (1987), medical tourism is the attempt to attract tourists by deliberately promoting its health-care services and facilities, in addition to its regular tourist amenities

Laws (1996) has defined medical tourism as a travel from home to other destination to improve one's health condition as one type of leisure. This includes getting indigenous and alternative medical services, and any other form of tourism undertaken with the purpose of addressing a health concern.

Connell (2006) describes medical tourism as a popular mass culture where people travel to overseas countries to obtain healthcare services and facilities such as medical, dental and surgical care whilst having the opportunity to visit the tourist spots of that country. Carrera and Bridges (2006) have defined medical tourism as travel which is systematically planned to maintain one's physical and mental health condition.

According to GATS (General Agreement on Trade and Services), medical tourism is the second mode of trade in health services. In this mode, customers (patients) leave their home country to obtain health care services with high quality and affordable prices Blouinet al., (2006). Monica (2007) has defined that medical tourism occurs when international patients travel across boundaries for their healthcare and medical needs. It can be defined as provision of cost effective private medical care in collaboration with the tourism industry for patients needing surgical and other forms of specialized treatment.

Bookman & Bookman (2007) have defined medical tourism as travel with the aim of improving one's health, and also an economic activity that entails trade in services and represents two sectors: medicine and tourism. Medical tourism according to Dhaene (2009) is looking for available quality combined with cost effective and low price health services while offering a similar level of safety to the patient. It has become 60 billion US dollar a year business with growing rate about 20% by a year which could increase to 100 billion US dollar by 2012. (Herrick, 2007)

Normally, the majority of medical tourists come from the industrialized countries of the world especially Europe, the UK, Middle East, Japan, U.S. and Canada where the cost of medical treatment is very expensive and there are often long waiting times for treatments. Other than India, countries that are currently promoting medical tourism are Thailand, Malaysia, Singapore, South Korea Bolivia, Brazil, Belgium, Cuba, Costa Rica, Hungary, and Jordan. Private sector development in emerging economies— such as India, Thailand, Singapore, and certain Latin American nations— attracts foreign patients for relatively cheaper care: the uninsured, the underinsured, or those who prefer not to wait for treatment under a national health insurance system.

The main reasons for the growing popularity in medical tourism in India are: (a.) the long waiting lists in the developed countries, (b) the low cost of medical treatments in India than the other developed countries. In India, complicated surgical procedures are being done at one-tenth of the cost as compared to the procedures in the developed countries, ( c) The affordable international air fares and favorable exchange rates, (d) the Internet; with the development of communications, new companies have emerged who acts as middlemen between international patients and hospital networks, giving patients easy access to information, prices and option, (e) the state-of-art technology, specialist doctors, nurses and paramedical staffs that has been adopted by the big hospitals and diagnostics centers in India. In India, the medical education system also caters to the ever increasing demand for the delivery of the quality health care services all over the country ( Suthin et al., 2007).

In order to realize the full potential of this industry, it is needed to develop a strategic plan on medical tourism in India. This paper highlights the strategy that needs to be implemented for shaping India as one of the key destinations for medical tourism across the globe.

### Objectives Of The Study

This research works explores opportunities, discusses its key challenges and designing the suitable strategies for developing medical tourism in India.. It is based on a review of the literature, including published research, web sites, newspapers, and the travel and tourism magazines that carry medical tourism related information. This helps to design the strategies being used for promoting medical tourism in India. This research work also strives to understand why some developing countries like India are more successful in promoting medical tourism than others. In other words, it also emphasizes over the competitive advantages of India over other countries. Lastly, it gives an approximate comparison of the cost of medical treatments offered in India, USA, Thailand and Singapore

### Medical Tourism In India – The Current Scenario And Its Different Modes:

Medical Tourism is poised to be the next Indian success story after Information Technology. According to a Mckinsey-CII study the industry's earning potential estimated at Rs.5000- 10000 Crores by 2012 (CIIMckinsey, 2002). Medical tourism can contribute Rs 5,000-10,000 crore additional revenue for up-market tertiary hospitals by 2012 and will account for 3-5% of the total healthcare delivery market, says the Confederation of Indian Industry (CII)- McKinsey study on healthcare (2002: pp.1-2). Horowitz and Rosenweig (2007) have identified the following countries as being medical tourism destination: China , India, Israel, Singapore, Malaysia, Philippines, United Arab Emirates, Argentina, Bolivia, Brazil, Colombia, Costa Rica , Cuba , Jamaica, Mexico, United States, Belgium, Germany, Hungary, South Africa and Australia.

The major service providers in Indian medical tourism are: the Apollo Hospitals, Escorts Hospital, Fortis Hospitals, Breach Candy, Hinduja, Mumbai's Asian Heart Institute, Arvind Eye Hospitals, Manipal Hospitals, Mallya Hospital, ShankaraNethralaya etc. AIIMs, a public -sector hospital is also in the fray. In terms of locations – Delhi, Chennai, Bangalore and Mumbai cater to the maximum number of health tourists and are fast emerging as medical tourism hubs. It also visualizes high-end healthcare services through Indian BPO firms like Hinduja TMT, Apollo Heart Street, Comat Technologies, Datamatics and Lapiz that work in the areas of claim adjudication, billing and coding, transcriptions and form processing. One- stop centres in key international markets to facilitate patient flow and stream lining immigration for healthcare are envisaged. The

CII, along with Indian Health Care Federation (IHCF), wants to establish an Indian healthcare brand synonymous with safety trust and excellence. Therefore, it is clear that the opportunities and challenges for growth in the health sector are seen primarily within the private/corporate sector, not in the public sector.

Nowadays medical tourism in India includes advanced and life savings health care services like open transplants, cardio vascular surgery, eye treatment , knee/hip different cosmetic surgeries and alternate systems of medicine. Also leisure aspect medical traveling/wellness tourism may be included on such medical travel trips. India provides a variety of medical services to overseas patients.

The medical tourism structure in India is depicted in figure 1.

Figure 1: The Medical Tourism structure in India

Figure 1: The Medical Tourism structure in India

### The Table 1 Gives A Classification Of The Services Spectrum Of Medical Tourism In India Vis-À- Vis Its Competitive Countries

India has a very old civilization of more than 5000 years and is known for her cultural and religious diversities with diverse geographical landmarks. The traditional arts and crafts add to her appeal to attract tourists. In India, according to the famous words “AtithiDevoBhava” refers tourists are treated as God. In India, in addition to existence of modern medicine, indigenous or traditional medical practitioners continue to practice throughout the country. Popular indigenous healthcare traditions include Ayurveda, Siddha, Unani, Naturopathy, and Yoga. Ayurveda provides a complete system of preventive medicine and healthcare, which has been proven as its effectiveness over a long period in India. The science of Ayurveda is based on the knowledge of the human constitution. If every individual knows his or her own constitution, they can understand what constitutes a good diet and lifestyle for themselves. The five great elements, viz., ether, air, fire, water and earth are manifested into the three Dashas or biological organizations known as Vata, Pitta and Kapha. These biological organizations are used by an individual to gain a full understanding of all aspects of bodily functions, in order to establish the harmonious balance required for a healthy existence. Ayurveda is based on natural herbs, which gives distinct advantage

The Siddha system defines disease as the condition in which the normal equilibrium of the five elements in human beings is lost resulting in different forms of discomfort. The diagnostic methods in Siddha medical system are based more on the clinical acumen of the physician after observation of the patient, pulse and diagnosis and clinical history.

Unani system of medicine believes that the body is made up of four basic elements viz., earth, air, water and fire, which have different temperaments i.e. cold, hot, wet and dry. After mixing and interaction of four elements a new compound having new temperament comes into existence i.e. hot-wet, hot-dry, cold-wet and cold-dry. Unani system of medicine believes in promotion of health, prevention of diseases and cure.

Naturopathy has several references in the Vedas and other ancient texts, which indicate that these methods were widely practised in ancient India. Naturopathy believes that the human body possesses inherent self-constructing and self-healing powers. Naturopathy differs slightly with other systems of medicine, as it does not believe in the specific cause of disease and its specific treatment but takes into account the totality of factors responsible for diseases such as one’s unnatural habits in living, thinking, working, sleeping, or relaxation, and the environmental factors that disturb the normal functioning of the body. Yoga is a science as well an art of healthy living physically, mentally, morally and spiritually. Yoga is believed to be founded by saints and sages of India several thousand years ago. Yoga has its origin in the Vedas, and its philosophy is an art and science of living in tune with the universe. Yoga, the art and science of maintaining physical and mental well-being, has its origin in India. It is an instrument to self evolvment and enlightenment, through physical and mental well-

being. Various Yogic postures gently massage internal vital organs, keeping them in perfect condition. Cholesterol levels are kept in check and the blood pressure is normalized. This internal harmony cleanses and detoxifies the body and boosts the immune system.

All these traditional healthcare systems are attracting national and international patients, and generate tourism flows

### Growth, Opportunities And Process Of Medical Tourism In India:

The commitment to provide comprehensive healthcare to all citizens, irrespective of their paying capacity, was given up by the Indian government after 30 years of Indian independence. After the globalization and liberalization of Indian economy on 1991, the government of India has opened up medical service to the voluntary and private sectors for foreign tourists and other citizens who can pay to get the high-tech medical services. The rapid growth of the private sector over the 1980s and the emergence of a corporate health sector in the 1990s was a part of the comprehensive policy that chooses to promote these segments. This was done through shifting subsidies in terms of cheap land, concessions from equipment and drug import, placing these institutions on government panels and making them a part of government insurance schemes in addition to providing trained personnel and expert physicians through state –supported medical education.

As a part of medical tourism, India is recognized as the cradle for test tube babies and is popular for surrogacy services (Qaders and John, 2009). Over than these, India offers high- tech cardiac, pediatric, dental, cosmetic and orthopedic surgical services as well as the traditional healing systems. The medical tourism definitely does not cater to emergency services. The services provided are largely knee joint replacement, hip replacement (mostly orthopedic), bone marrow transplant, bypass surgery and cosmetic surgery etc. Hospitals also advertise for preventive health check ups for familymembers accompanying the patients in addition to alternative medicine services ( Peacock, 2009).

Procedure	US	India	Thailand	Singapore
Heart bypass	1,30,000	10,000	11,000	18,500
Heart valve replacement	1,60,000	9,000	10,000	12,500
Angioplasty	57,000	11,000	13,000	13,000
Hip replacement	43,000	9,000	12,000	12,000
Hysterectomy	20,000	3,000	4,000	6,000
Knee replacement	40,000	8,500	10,000	13,000
Spinal fusion	62,000	5,500	7,000	9,000

*International figures based on hospital quotes in named countries*

*Source: <http://www.docstoc.com/docs/12163631/MEDICAL-TOURISM/P/36>*

**Table 2: Cost comparison between India, USA, Thailand and Singapore (Approximated figures in US\$)**

Quality care, relatively cheaper services compared to the west, package deals and cheap services from the tourism and hospitality sectors are the biggest attraction of medical tourism in India. The price differentials of various procedures for Singapore, Thailand and India with the USA reveal the economic advantage offered to interested patients by India.

The health care sector in India has witnessed an enormous growth in infrastructure in the private and voluntary sector. The Indian government predicts that India's health-care industry of \$17 billion-a-year, could grow 13 per cent in each of the next six years, can be boosted up to 30 per cent annually if bundled with tourism sector (International Marketing Conference on Marketing & Society, 8-10 April, 2007, IIMK)

**Key Issues To The Medical Tourism Industry In India** As various countries are at loggerheads to get a greater share in the medical tourism industry, India needs to carve out a distant niche for itself, by leveraging its

existing strengths and thereby offering a unique value proposition. Generally, there are three types of medical tourists

The country like India is facing the following issues/challenges to become a tourist destination with competent medical tourism industry. They are:

1. Lack of infrastructural facilities like lack of connectivity, lack of coordinating system, poor power supply and poor water supply.
2. Most Indian hospitals are also facing the lack of trust from the foreign patients. The hospitals have observed poor hygiene awareness in medical attendants, unhygienic food handling, and lack of proper hospitality services, heterogeneous pricing of services and no industry standards.
3. The government can play a vital part to upgrade the medical tourism sector. But the industry is facing the following problems which are caused by the governments. They are: (a) no regulations, (ii) taxation anomalies, (c) bureaucratic roadblocks, (d) no works on land reforms, (e) lack of long-term investor friendly policies and (f) instability with respect to terrorism and communal tensions.
4. On the part of insurance and allied services, the medical tourism industry in India is also facing some key bottlenecks. They are: (a) inadequate insurance cover, (b) underdeveloped insurance market in India, (c) insurance frauds and (d) overseas companies refusing reimbursement.
5. The following challenges, due to the infrastructural parts in medical tourism sector in India, are: (a) poor accessibility, (b) lack of capital, (c) lack of Community participation and awareness, (d) lack of involvement from rural sector, (e) lack of concern for sustainability, (f) complex visa procedures, (g) lack of good language translators, and (h) poor airport facilities.
6. Apart from these, there are some specific issues to promote medical tourism in India. They are: (a) quality accreditations to the Indian hospitals and service providers, (b) training and Development to the Doctors, Nurses and Para medical staffs, (c) lack of customer oriented approach

**Medical Tourism In India – Swot Analysis**

The figure 3 depicts the SWOT (Strengths, Weaknesses, Opportunities and Threats) analysis on the Indian medical tourism Industry in its current state:

Strengths	Weakness
<ul style="list-style-type: none"> <li>• Quality Service at Affordable Cost</li> <li>• Vast supply of qualified doctors</li> <li>• Strong presence in advanced healthcare e.g. cardiovascular, organ transplants – high success rate in operations</li> <li>• International Reputation of hospitals and Doctors</li> <li>• Diversity of tourism destinations and experiences</li> </ul>	<ul style="list-style-type: none"> <li>• No strong government support / initiative to promote medical tourism</li> <li>• Low Coordination between the various players in the industry– airline operators, hotels and hospitals</li> <li>• Customer Perception as an unhygienic country</li> <li>• No proper accreditation and regulation system for hospitals</li> <li>• Lack of uniform pricing policies across hospitals</li> </ul>
Opportunities	Weaknesses
<ul style="list-style-type: none"> <li>• Increased demand for healthcare services from countries with aging population (U.S, U.K)</li> <li>• Fast-paced lifestyle increases demand for wellness tourism and alternative cures</li> <li>• Shortage of supply in National Health Systems in countries like U.K, Canada</li> <li>• Demand from countries with underdeveloped healthcare facilities</li> <li>• Demand for retirement homes for elderly people especially Japanese</li> </ul>	<ul style="list-style-type: none"> <li>• Strong competition from countries like Thailand, Malaysia, Singapore</li> <li>• Lack of international accreditation</li> <li>• Overseas medical care not covered by insurance providers</li> <li>• Under-investment in health infrastructure</li> </ul>

*Figure 3: SWOT analysis on Indian medical tourism*

## Conclusion

India is in an advantageous position to take advantage of global opportunities in the field of medical tourism. The role of the government is crucial to the development of medical tourism. The government should take steps as a regulator and mediator of private investment in health care. Mechanisms need to be developed to allow foreign tourists for medical purposes to obtain a faster visa, allowing patients at each entry point to contact the immigration office for quick approval. Tax incentives for service providers, reduction of import tariffs for medical devices, committees promoting and promoting medical tourism are some of the initiatives that can be taken. There is also a need to develop supporting infrastructures, such as transport services, to facilitate tourism in India. The tourism, health, information and communication departments need to work together for efficient patient care. This paper has recommended some of the medical tourism strategies to further promote medical tourism in India. These include building and promoting India's image as a destination for quality medical tourism, creating and promoting a new combination of medical tourism products, maintaining a high quality standard of treatment at a reasonable price and providing informative online and offline materials and their provision to potential customers. Achieving the accreditation / standard to ensure the quality of treatment and emphasizing the needs and requirements of the existing target markets must also be included

## A Review On Study Of E-Commerce And Its Impact On Market And Retailers' In Yavatmal

**Prof. Pratiksha D. Kawalkar**

College of Management and Computer Science, Yavatmal.

### Abstract

*In today's life internet plays and vital role. We use internet daily almost for every single work for doing online transactions shopping, online payment and connecting people worldwide with the help of social media. That's why the E-commerce or E- business can plays important role in business world. Before E-commerce people done buying and selling without internet they physically in market. But after E-commerce people's life is more convenient because of number of advantage and benefits of E-commerce. E-commerce made people's life easier to buying goods online. There is number of site which provides online buying and selling facilities to the people. Online shopping, online net banking and online transaction is the part of the E-commerce which is done mostly by the users/ peoples. Due to E-commerce websites they can see various options for their continents purchases and selling product. E-commerce website can allow buying and selling goods or products in convenient way for the customers and retailers according to their choices at affordable prices. E-commerce website has lot of impact on retailers and different markets. In this paper we can discuss about the impact of E-commerce on retailers and different markets.*

**Keywords:** E-commerce, impact, markets, retailers

### Introduction

Ecommerce, also known as electronic commerce or internet commerce, refers to the buying and selling of goods or services using the internet, and the transfer of money and data to execute these transactions. Ecommerce is often used to refer to the sale of physical products online, but it can also describe any kind of commercial transaction that is facilitated through the internet. Whereas e-business refers to all aspects of operating an online business, ecommerce refers specifically to the transaction of goods and services. The [history of ecommerce](#) begins with the first ever online sale: on the August 11, 1994 a man sold a CD by the band Sting to his friend through his website Net Market, an American retail platform. This is the first example of a consumer purchasing a product from a business through the World Wide Web or "ecommerce" as we commonly know it today. Since then, ecommerce has evolved to make products easier to discover and purchase through online retailers and marketplaces. Independent freelancers, small businesses, and large corporations have all benefited from ecommerce, which enables them to sell their goods and services at a scale that was not possible with traditional offline retail.

### Different Markets And Retailers In Yavatmal

#### 1 MARKETS:

- **PHYSICAL MARKET:** Physical market is a market where customers People come physically entered and face to face interact with sellers and buys the goods / product and services according to their different choices and buying capacity with the help of exchange of money. For example Grocery shop, Clothing shops, shopping mall are the examples of physical markets.
- **NON PHYSICAL MARKETS/VIRTUAL MARKETS:** Non physical / Virtual market is the market where customers or people do not go physically to the seller and do not interact face to face with them. They can buying product from internet with the help of different different shopping sites and exchange money electronically choosing online payment mode. For example zomato, swiggy, dominos are the example of non-physical markets.
- **AUCTION MARKET:** In an Auction market, buyers enter competitive bids and seller submit competitive offers at the same time. The price at which a stock trader presents the highest prices that a buyer willing to pay and lowest price that seller is willing to accept. For example Auction market in Yavatmal.

- **MARKET FOR INTERMEDIATE GOODS:** Intermediate goods are items that are used in making of finished product from them. in other words, they are the inputs for other products or the ingredients of finished goods. Suppliers of intermediate goods sell them to manufacturers for the inclusion in their final products. For example ready to eat packets, furniture merchant, dairy products, and so on.

## 2 RETAILERS

- **Departmental store:** Departmental store is a store which is combination of multiple small stores under one company which offers different types of variety of product under one roof. It adds value for the customer due to offer a wide variety of products at a one place. Elements mall is the good example of departmental store in Yavatmal.
- **Supermarkets:** Supermarkets typically sell food and beverages however currently thanks to customers wouldlike it additionally sell fashion, electronic connected things. it's an honest shopping for power that why it sells at low costs. Mamta super bazaar, kiran super market, purushottam super market, sanjivani super markets this area unit the instance of super markets in Yavatmal
- **Warehouse retailers:** Warehouse retailers are situated at the place where the premises rent is very low so that they can store, display and sell large amount of products. HP Gas agency, Indian Gas Agency, Govt, warehouse, this are the example of warehouse retailers.
- **Specialty Retailers:** Specialty Retailers sell a special service or product and provide expert knowledge and good service to customers. They add values by adding accessories and related products in the same outlet. Ranade brothers, Manoj bakery, Aadity bakers, Cotton king, John players, domino's this are the example of Specialty retailers.
- **Convenience Retailer:** Usually part of a retail location which sells gasoline primarily, but also sells a limited range of grocery merchandise and auto care products at a premium "convenience" price from a brick-and-mortar store. Grocery store, Cold rink store, stationary store, etc are the example of Convenience retailers.
- **E-Tailer:** E-Tailers are those sellers who provide the facility to customers to buy the product through internet and offers home delivery using which they can reach to customers within a big geographic area and can supply goods to them. They have low rent and overhead that's why they offer competitive prices. Zomato, Swiggy and Domino's this are the example of E-Tailors.
- **Discount Retailer:** Discount retailers are those retailers which offer discounts on less fashionable brands by taking it from the suppliers and resell the product till end of line and return the left products at the discounted price to the supplier. Flipkart, Myntra, Raymond shop, Cotton king, Aurelia Shop, etc are the example of discount retailers.

## 3 IMPACT OF E-COMMERCE ON MARKETS AND RETAILERS

### 3.1 IMPACT ON MARKETS

- **Promotion of Product:** Through the e-commerce we can promote our product interesting way to attract various customers towards us and also provide lots of important information about product directly to them and also create awareness about the product. It reduced the cost of offline promotion because the internet can directly interact to the customer and save amount of advertisement cost can be used in different areas of business.
- **Customer Service:** New business man can set their brand image for customer on internet by using attractive logos and images at an affordable prices for the customers. Customer service plays an important role because customer can search products detailed information about product. or marketplace which offers the product and can compared their prices with deferent market places.
- **Brand Image:** Brand image develops and conveys the product's character in a very distinctive manner completely different from its competitor's image. The whole image consists of assorted associations in

consumers' mind - attributes, advantages and attributes. Brand attributes area unit the useful and mental connections with the brand that the purchasers have.

- **Advertisement:** Traditionally advertisement were one way to attract customers towards the product and let them know about the new product launching or market place but now though e-commerce advertisement are two way in which customer can browse the market place and product, can compare the prices and quality and also ask question to the online retailers.
- **Customization:** Customized product can be made available according the needs and test of the customer. It has made a best platform of business in market and new customer can be attracted.
- **Order Making Process:** Traditional way of making order can takes lots of time and expenses but with e-commerce the order taking is so easy and also reduces lots of time and expenses of a customer and the can make more sales.
- **Customer value:** Traditionally method of purchasing can attaining big value from customer was the main interest. Customer attraction is an important part of sellers to maintain long term relationship with them attaining long term value by offering special discount for the customers.

### 3.2 Impact on Retailers

- **Turnover:** Due to e-commerce the customer the turnover of offline has reduced which is warning signal for the enterprise.
- **Profit Margin:** Because of e-commerce arrival in the markets offline retailers are suffering from pricing. To survive on market the retailers can sell their products in low price which is covers their operational cost only and they do not earn profit margin.
- **Discount:** Offline retailers can offer or sell their products at discount rate because as compare offline retailers online retailers can offers heavy discount on products to attract lots of customers towards them.
- **Variety of Stocks:** The online retailers can have variety of goods which offline retailers cannot compete with them because they can have only limited stocks of goods at the end of the year the left stocks can gave huge loss to the offline retailers.
- **Customer Service:** Offline retailer can provide different services time to time to the customers which online retailers can fails. Such as repairs and goods and services, home delivery and after sales services like online shop.
- **Window Shopping:** A low price offered by online stores to their customer and leads them to window shopping at physical stores and they buy products online. Due to which they have prospective customer's more than actual customers.
- **Advertisement:** Offline retailers focus only on the advertisements to focus lots of people to make them attracts towards the product for increase their sales. They do not leave any single chance to make an advertisement which attracts customers.

### Conclusion

This paper conclude that the E-commerce is very good for us because its provides huge range of products with different variety of products and service with lots of information and attractive images and customers affordable prices at our doorsteps. In our city there are lots of people can use the option of online purchasing because it provide convenience to customers and help to the enterprises to expand their business over internet , E-commerce have good impact on market which help to reduce cost of advertisement it helps to attract many customers through internet. New brand can be develop and make good relationship with customer and provide various products according to customers' needs and choice. But e-commerce has its bad impacts also on offline retailers because customers buys on low price from online shops due to which they also have to lower their price and does not get any profit on goods. Retailer cannot maintain huge stocks like online shops because it will cost huge loss to them due to in case their goods were not sold. They have to spend lots of money on offline advertisements to attract customers. Along with the impacts of E-commerce also offers some

limitation in terms of retailers and markets that is website cost for make an advertisement also to create and maintain website a lot of money required; infrastructure cost . to fulfill the online orders of the customers, and also the orders of online retailers have to maintained huge stock in a big warehouse which cost a lot, also look forward to the security and fraud, due to popularity of online shops criminal elements also affect on the business it will hack the information and can misuse them. In E- commerce customer's trust is very important. It is difficult to customers to trust a new brand without looking, touching and face to face interaction.

## A Review On Consumer Attitude And Perception Towards Green Product

**Komal S. Panpaliya**

College of Management and Computer Science, Yavatmal

### Abstract

*This study aims to put forth the concept of Green marketing and approach of consumer for green product. Indian industry has been fast growing. Customers are changing their perceptions towards the products preferring biodegradable products as there is a growing awareness to protect the environment and they prefer to use the products that preserve the environment by significantly reducing the pollution. Promotion and adoption of green products & technologies is necessary for conservation of natural resources as they are rare and also for sustainable development. As a result, companies are increasingly using strategies for the promotion and adoption of green products and services. However, the acceptability of green marketing concept is still lacking among the consumers as there is lack of awareness about eco-friendly products and services, ineffective advertisements by manufacturers, lack of standardization of government rules and regulations and promotional strategies fails to attract the customers but many of them buy green products in order to save environment. So, the present paper tries to explore the concept of green marketing and study the consumer attitude and perception towards Green Product.*

**Keywords:** Green Marketing, Green Products, Green Consumer, Consumer Attitude, Consumer Perception

### Introduction

One of the greatest problems that the world is facing today is that of Environmental Pollution, increasing with every passing year and causing irretrievable damage to the World. People have started to pay attention towards this issue as they are getting aware about the damages that chemicals and industrial gases are causing to the environment. This results as disturbing the natural balance. Over the last twenty years, public support for environmental protection has waxed and waned. Despite the difference in concern, the green movement is arguably one of the most important social movements in recent history. Consumers today are paying more concern about environmental degradation and negative impact of their uses of product and services on environment. The reason for this concern could be visible climatic changes, global warming and increasing air and water pollution. Thus, using green marketing by the organizations not only provides an opportunity to meet consumer expectations and address their environmental concerns, but also helps to gain a competitive advantage and a strong consumer base. Also, the concept of green or ecological marketing calls upon businesses to follow ethical and green practices while dealing with customers, suppliers, dealers, and employees. It has been seen that Companies have started taking an initiative by marketing themselves as green companies. Even the Public Sector Units and state governments are now paying attention towards environmental issues such as global warming, pollution, or water contamination and have started taking steps to prevent environmental pollution.

The purpose of this study is to discuss the effects of environmental awareness, green product features, green product prices, green product advertisements and consumers' perception and also consumers attitude towards the green marketing.

### Review Of Literature

Rapidly changing environment is now a major concern for the people throughout the world, making them more and more concerned about the environment. The research literature is examined in the historical process at the level of environmental awareness of consumers is increasing continuously. However consumers evoked their environmental interest with environmentally friendly consumer behavior. The green marketing concept began in late 1900s, when people became more aware of the impact businesses were having on the planet. But still many of them were unaware about these.

Saxena, R. & Khandewal, P.K. (2010) in "Can Green Marketing be used as a tool for Sustainable Growth? A study performed on Customers in India- an Emerging Economy" analyzed that people's concern for a healthy

environment to live and preference of environment friendly products and services to consume significantly present among the respondents of the study.

AyselBoztepe(2012) in " Green Marketing and Its Impact on Consumer Buying Behavior" studied about environmental awareness, green promotion activities, green product features and a green pricing effect were found to be statistically significant for consumer buying behavior.

BikramjitSingh(2015) in "Consumer Perception towards Green Products: A Factor Analytic Approach" analyzed consumer perception towards environment friendly products on some factors namely desire, trustworthiness, preference, awareness, etc. and also companies should make long run policies for environment sustainability.

### Objective Of Study

1. To study the concept of green marketing in brief.
2. To investigate the consumers perception towards green products.
3. To study the consumers attitude towards green products.

### Before green marketing

Before Green marketing the products produced and consumed by consumers had an adverse effect on environment. Also natural resources were being depleted, increase percentage of greenhouse gases in the environment due to the burning of fossil fuels, depletion of ozone layer due to certain chemicals and global warming, etc. Thus, leads to harmful environment and unhealthy life.

### Scope Of Green Marketing

Green marketing is not simply setting products based on their environmental benefits, but it is a wider thought. Green marketing involves developing products that are environment friendly or less harmful to the environment. It includes several areas ranging from conservation to regulating of pollution. Companies should make every possible effort to conduct research and development in order to come up with eco-friendly products in the interest of the consumers well being in particular and that of society's in general.

### Green Marketing

Here, term 'green' is indicative of purity. Green here stands for pure in quality and fair or just in dealing. Concept of green marketing concerns with the protection of ecological environment. Modern marketing has created lots of problems. Production, consumption and disposal of several products affect environment adversely. Excessive pollution has aggravated the Nature and the Nature starts behaving in unnatural ways (in form of global warming v/s global cooling, heavy rains v/s draught, and other natural calamities like frequent earthquakes and tsunami, cyclones, epidemics, and so forth). It is an attempt to protect consumer's welfare and environment (the nature) through production, consumption, and disposal of eco-friendly products.

Basically, green marketing concerns with three aspects:

1. Promotion of production and consummation of pure/quality products,
2. Fair and must be just while dealing with customers and society, and
3. Protection of ecological environment.

Green marketing (also known as eco-marketing or sustainable marketing) is the practice of marketing the product based on its environmental benefits.

The 3 R's of Green Marketing are

1. Reuse: Reuse of products and parts (Use things again and again.)
2. Reduce: Reduction of waste generation (Don't be wasteful. Reduce garbage.)
3. Recycle: Use of recycled resources (Recycle resources for reuse.)

## Green Product

This and other eco facts like 9 out of 10 people worldwide breathe polluted air, 500 Billion to 1 Trillion plastic bags end up in landfills each year worldwide, and a plastic bag can take up to 1,000 years to decompose, etc.

...has drawn attention of the end consumer towards green products and their benefits. Called the green generation, these consumers are more inclined to “going green”; they believe in making decisions that are environmentally friendly and use products that are sustainable and cause very less or no pollution.

A green product is a sustainable product designed to minimize its environmental impacts during its whole life-cycle and even after it's of no use.

Green products are usually identified by having two basic goals – reducing waste and maximizing resource efficiency. They are manufactured using toxic-free ingredients and environmentally-friendly procedures and are certified by recognized organizations like Energy star, Forest Stewardship Council, etc.

Some of the characteristics of a green product are:

- Grown without the use of toxic chemicals and within hygienic conditions
- Can be recycled, reused and is biodegradable in nature
- Comes with eco-friendly packing
- Uses the least resources
- Is eco-efficient
- Has reduced or zero carbon footprint
- Has reduced or zero plastic footprint

Some Examples of Green products are Cloth Napkins, Cloth or Cotton Shopping Bags, Recycled Fabric Clothes, Reusable Water Bottles, Solar Phone Charger, LED Bulbs, etc.

## Green Consumer

Consumers who choose environmentally friendly products and services over traditional ones are termed as green consumers.

Green consumer are one who avoids products that are likely to endanger the health of the consumer or others; cause significant damage to the environment during manufacture, use or disposal; consume a disproportionate amount of energy; cause unnecessary waste; use materials derived from threatened species or environments; involve unnecessary use of, or cruelty to animals; adversely affect other countries and so on.

## Consumer Perception Towards Green Products

It's a consumer perception that plays a vital role in company's ability to attract new customers and also helps to retain the existing one. The companies have an ability to control many factors that build individual perception of brand and their products. Consumer perception is just what your customer and potential customer think of your organization. It directly impacts the attraction of new customers and also the capacity to maintain good relationship with current customers. Green marketing influence the consumers perception through factors that are-

Advertising, influencers, and personal experience. Also green marketing tries to create positive customer perception.

## Consumers Attitude Towards Green Products

Consumer attitude is defined as a feeling of favorableness or unfavorableness that an individual has towards an object. We know that an individual with a positive attitude is more likely to buy a product and which results in the possibility of liking or disliking a product. Understanding consumer attitudes can help a business understand customers better and perhaps even change their attitudes. A consumer attitude is made up of three main elements: cognitive information, affective information, and information concerning a consumer's past behavior and future intentions. In alternative words, attitude consists of thoughts or beliefs, feelings, and behavioral intentions towards a particular thing, which in this case is usually a good or service. For example,

you may have a very positive view of a particular sports car (i.e. you believe it performs better than most), it makes you feel good, and you intend to buy it.

Belief plays an important role for consumers because; it can be either positive or negative towards an object. For example, some may say coffee is good and relieves tension, others may say too much of coffee is not good for health. Human beliefs are not accurate and changes according to situations.

Consumers have a certain specific feelings towards some products or brands. Sometimes these feelings are based on certain beliefs and sometimes they may are not.

Behavioral intention shows the plans of consumers with respect to the products. Sometimes this logical result of beliefs or feelings, but not always. Consumers in the recent era belief that green products are environmental friendly and are good for their health and also useful for their future generation. Thus, this kind of attitude a consumer has about the green product which result them to purchase it. But many of them does not get effect by environment safety and health even do not consider it worthy to buy such products.

## Conclusion

One thing that is being reiterated is that the present consumption levels are high and are unsustainable. Therefore there is a necessity for green marketing and a need for a shift in the consumer's behavior and attitude towards more environmental friendly life styles. In this paper we studied about the green marketing and also the consumer's attitude and perception towards it. It is also concluded that most of people in current era are also unaware about green marketing and even if they are aware about it but they shoe there negligence and may also not consider them shelf to pay extra for the eco friendly products. But many of them are beginning to realize their role and responsibilities towards the environment. Although this change is not happening quickly, but it is happening. Consumers are changing their attitude and are willing to pay a little extra towards green products, organizations are taking notice of the demands and behavior and attitude of the consumers. And also trying to create positive consumer perception towards green marketing.

## **A Review On Formulation Of Strategies For Developing E-Enterprises In Today's Era With Reference To Small Town.**

**Surbhi M. Darda**

College of Management and Computer Science, Yavatmal

### **Abstract**

*This research paper looks into the Strategies for developing E-enterprises in today's era with reference to small towns. Many changes have occurred in today's era. During recent year and organizations are concentrating on the move towards e -Business and e -commerce. creating development enterprises strategies, means to think about their future, but it also try to control the future, to action about the future. Formulation of strategies for developing enterprises involves designing a desired future and an effective way to make it happen by strategy, it's plan the future action directions of the company, and directions designed to meet certain goals.*

**Keywords:** E-enterprises, E-Business, E-commerce , Strategies

### **Introduction.**

The global economy has changed considerably in recent years and organisations are feeling significant pressure from a triangle of forces. Rapid developments in global competition affect performance figures while increasing customer demands have raised productivity and quality issues. New digital information and communication technologies are also driving and facilitating much of the adaptation of businesses, now a days Organisations are shifting towards e-Commerce and e-Business in order to stay competitive in the new environment. Firstly, the organisation must recognise why they want to become an e-Enterprise and what the benefits to the business will be. Secondly the critical success factors for e-Enterprises must be identified to allow the formulation of a strategy that will assist in the transition. The strategy will then help in the developing e-enterprises in today's era. The successful transition to an e-Enterprise will be dependent on the available resources within the organisation. Resources include the skills of staff with respect to technical knowledge of e-Commerce and e-Business, the dynamics of project management teams and existing business strategies.

### **E-Enterprises**

The terms e-commerce and e-business are being used interchangeably, however they both have different interpretations that have different impact and influence on today's businesses. The only similarity prevailing is the electronic medium which includes use of Internet for Electronic Data Interchange (EDI) and Electronic Funds Transfer (EFT) to conduct business activities.

### **E-Business**

E-Business is associate abbreviation of electronic business which includes e-commerce transactions as well as online execution of internal business processes like management of production, inventory, risk, finance etc. It's a broader and more complicated strategy that focuses on efficiency and cost savings. Online Business or e-business is a business or commercial transactions that includes sharing information across the internet. E-Business involves utilization of digital technologies to transform both the internal processes as well as an organisation's interactions with external parties . Resources of ancient information systems are combined with the use of the Web to link crucial business systems directly to all key players (customers, employees, partners and suppliers). An e-Business can sell product on-line (e-Commerce), however it will also link those sales to its back-end systems for order processing and delivery fulfillment. The link involves the 'back-office' (traditional data/transaction processing jobs), 'front-office', and a variety of network management jobs.

### **E-Commerce**

E-Commerce is associate abbreviation of electronic commerce where any transaction is executed over the web. It caters for buying, marketing and selling of products and services. These transactions activities primarily involve financial transactions are termed as "e-commerce".

E-commerce (abbreviation for "electronic commerce") is trading in products or services using computer networks, such as the Internet. It attracts technologies like mobile commerce, electronic funds transfer, supply in chain management, Internet marketing, online transaction processing, electronic data interchange (EDI), inventory management systems, and automated data collection. Modern electronic commerce normally uses the World Wide Web for at least one part of the transaction's life cycle, though it may also use alternative technologies such as e-mail.

**Review Of Literature**

In 2001 Amit, R. and Zott, C. 'Value Creation in E-Business' find out that The rapid pace of technological developments coupled with the growth of e-businesses gives rise to enormous opportunities for the creation of new wealth. This paper Analyze and theoretical development helps to bridge the strategic management and the entrepreneurship literatures. Specifically, we have grounded the development of the theory in the received strategy and entrepreneurship research and in the data set, respectively.

**Need for formulation of e-enterprise strategies for small towns.**

If your business is a Retail store which is selling products or services, you might be interested in helpful articles on how to reach more customers by using E-business. For this purpose and to attract more customers while retaining old once its needed to use some strategies in efficient and effective ways. Now a days the competition in the market is increasing and customers have become the king of the market, they have many options to meet their needs Yes, people are getting attracted towards ecommerce which helps them make life more comfortable. There is no need for a customer to run to the store when required some thing he can just go to the online site and purchase whats hw want .Ecommerce plays a very important role as they help customers to meet their demand by making purchases, by paying at any time any where so it becomes very essential for the businessman to follow the strategies in the small town, achieve success and to earn morfe profit and grow up their business world wide. Hence to make E-enterprise more effective and to reach more customers an marketer must formulate strategies in order to have existence in market and competitive world.

**Steps involved in formulation of strategy****1. Increase e-commerce search usability**

Managing a web store for two groups of potential customers:

- Visitors who know what they want to buy.
- Visitors who want to browse.

Customers who know exactly what they're looking for want to find the right information as soon as possible. Creating a high performance search experience is an important feature for your customers, because if customers can't find what they are looking for, they will buy it from another store.

The second category is potential customers who want to browse through the online store and compare items. They use navigation menus and move into product categories and pages. You should organize the menu bar and categories into natural easy-to-use sections.

**2. Use high-quality photographs and good product descriptions**

Include beautiful product images and photos to attract potential customer attention. Outside the brick-and-mortar world, customers cannot touch the product and their purchasing decisions are entirely based on product images and opinions. Make sure you give proper and good description about your product as people will come to know about your product only through Photographs and descriptions.

**3. Try personalizing the home page**

Personalization is a technique that records what customers have seen or visited on their last session, and makes new purchase suggestions on each visit based on the store's past experience. This could be personalization based on previous behavior, such as previous purchases, or real-time data such as location or time.

**4. Optimize shopping cart functionality**

To prevent customers from leaving their shopping carts, you should be sure that the functionality of the shopping cart is correct and easily navigable. Testing is often the way to understand weaknesses.

**5. Creating Email Lists**

If your online business is not using email marketing as an outlet, then you are missing out on big sales. Use sign-up forms, give something in return for an e-mail address such as a discount code or even a small present. Make sure you win the trust of the customer and never send an email without the user's consent, otherwise you risk winding up in the SPAM folder and no one wants to ruin their brand. Don't forget to include an option where the customer is able to join your mailing list as part of the checkout process.

**6. Improve Your Social Media Strategy**

The social media strategy devised by your marketing team should be integrated with your content strategy. Creating content from your e-commerce website should be published and shared on social media, as it guarantees you a larger audience and increased visibility.

Visual social networks such as Instagram, Snapchat, and Pinterest are generally best for online shops that are selling products, however, Twitter and Facebook are undervalued as there are also more than 75% of all Internet users.

### 7. Formulate advertising strategies

E-commerce shop ads can help improve your online visibility and increase sales. Whatever you choose, analyzing and tracking traffic to your website is an important part.

### 8. Implement User Generated Content

The idea of UGC (User Generated Content) is simple: Users post content (video clips, images, testimonials, reviews and blogs) online through social media and other sites regarding your store, brand or product. Organic content produced can be a positive or negative experience with an online store or products. UGS can help you get more leads for your e-commerce website.

### Conclusion

Peoples of small town generally prefers store purchasing. But as competition increases development towards E-enterprises has become essential it helps to attract large number of audience and also retain old once. To develop E-enterprise effectively it is necessary to make and develop new strategies. In this Paper we have studied how to formulate the strategies for developing E-enterprise and its usage for a smalltowns.

## विपणनामध्ये ई-वाणिज्य व ई-व्यापाराचे फायदे

प्रा. डॉ. सुनिल एन. ढेरे

सहयोगी प्राध्यापक, कला व वाणिज्य महाविद्यालय,  
बोरी अरब, ता. दारव्हा, जि. यवतमाळ

### प्रस्तावना

आज जवळपास सर्व देशात डिजिटल भारताची संकल्पना पूर्ण करण्यासाठी प्रयत्नरत आहेत. पूर्वी व्यापार-व्यवसाय म्हणजे बाजार पेठेत जावून खरेदी-विक्री करणे. आज ही संकल्पना बदलली आहे. संगणकामुळे प्रत्येक क्षेत्राची कायापालट झालेली आहे. संगणकामुळे कार्ये करणे सुलभ झाले. सोबतच इंटरनेटच्या वापरामुळे सर्व जग जवळ आले. व्यावसायिक क्षेत्रात संगणक व इंटरनेटच्या वापरामुळे ईलेक्ट्रॉनिक ही संज्ञा जवळपास आली. ई-वाणिज्य म्हणजे ईलेक्ट्रॉनिक साधनांच्या माध्यमातून व्यवसाय करणे होय. या करीता प्रत्यक्षात कुठेही न जाता ग्राहक घराच्या घरी बसून वस्तूची ऑर्डर देवू शकतो. घरपोच वस्तूविषयी विक्रेत्याला विनंती करू शकतो. कमी अवधित वस्तू घरी स्विकारू शकतो. रकमेचे शोधनसुध्दा घरबसल्या केल्या जाते. त्यासाठी कोणत्याही विक्री केंद्रात जाण्याची गरज नाही. ह्या सर्व क्रिया संगणकाने इंटरनेटच्या माध्यमातून पुरविल्या आहेत. यात क्रेता व विक्रेता अमोर-समोर येण्याची गरज नाही. इंटरनेटवरून एकमेकांशी संपर्क करता येते. दोघेही एकमेकांशी परिचित नाही, तरी सुध्दा त्यांचे मध्ये वस्तूची व सेवांची देवाण-घेवाण होत असते. इंटरनेटच्या माध्यमातून वस्तूच्या व सेवांच्या आदान-प्रदान करण्यात येणा-या व्यवहारास ई-वाणिज्य असे म्हणतात.

### ई-वाणिज्याचा विकास

इ.स.न १८४४ मध्ये ईलेक्ट्रॉनिक कॉमर्सची सुरुवात झाली. सॅम्युअल मोर्स यांनी आपला पहिला संदेश टेलिग्रामच्या सहाय्याने पाठविला. सन १८५८ मध्ये त्यांनी न्युयार्क शोअर्स बाजारातील शोअर्सच्या किंमतीची युरोप आणि उत्तर अमेरिकेच्या किंमतशी तुलना करून इतरत्रही माहिती पाठविली. सन १८७७ पर्यंत वेस्टर्न युनियन ही मुख्य टेलिग्राम कंपनीने संपूर्ण जगात ग्राहकांना माहितीचे आदान-प्रदान सशुल्क पुरवित असे टेलिफोन हे एक सेकंदाचे माध्यम बनले. पुढे इंटरनेटच्या वापरामुळे विसाव्या शतकात व्यापारी जगात क्रांती झाली. व्यापारी व ग्राहक संगणकाच्या माध्यमातून एकमेकांशी संदेशवहन करू लागले. सन १९९४ मध्ये नेटस्कॉप कॉम्प्युनिकेशन कंपनीने आपले पहिले ग्राफीकल ब्राउझर इंटरनेटचा उपयोग करणा-यांना उपलब्ध करून दिले क्रांती घडवून आणली. आणि ई-वाणिज्याच्या सर्व व्यापारी कार्यास जलदगतीने सुरुवात झाली. १९९५ मध्ये इंटरनेटवरून पुस्तक व इतर वस्तूची विक्री करण्यासाठी **amazon.com** या वेबसाईटची निर्मिती केली. त्या माध्यमातूनच ई-व्यापाराची सुरुवात केली. ह्याच कालावधीत अनेक वेबसाईट्स वेबवर आल्यात. प्रत्येक संकेतस्थानावरून वस्तूची खरेदी-विक्री मोठ्या प्रमाणात होवू लागली. अधिकोष, विमा, संग्रहण इत्यादिचे व्यवहार सुध्दा इंटरनेटवरून होवू लागले. आता ई-व्यापाराची जागा ई-वाणिज्याने घेतली.

### व्याख्या

“ई-वाणिज्य हा वाणिज्याकरीता उपयुक्त अशा क्रियांचा संच आहे. ज्या इंटरनेटच्या माध्यमातून केल्या जातो.”

“ईलेक्ट्रॉनिकस कॉमर्स म्हणजे इंटरनेटवरून वस्तू व सेवा यांची होणारी देवाण-घेवाण होय.”

“व्यापा-यांचे ऑनलाईन नियोजन करून डिजिटल कॅश आणि म्फ ईलेक्ट्रॉनिक देश इंटरनेटच्या मदतीने वस्तू आणि सेवांची खरेदी-विक्री करणे म्हणजे ई-कॉमर्स होय.”

वरील व्याख्यावरून असा निष्कर्ष निघतो की, WWW वरून माहिती मागविणे, आदेश देणे, बिजक प्राप्त करणे व पाठविणे व WWW वरून सुरक्षित साधनांचा उपयोग करून रकमेचे शोधन करणे म्हणजे ई-कॉमर्स होय.

यात ई-मेल, ई-मनी, EDI इत्यादी सारख्या तंत्रज्ञानाचा उपयोग केला जातो.

ई-वाणिज्यासाठी आवश्यक असणारे घटक:-

- |                        |                          |                           |
|------------------------|--------------------------|---------------------------|
| १) वस्तू               | २) वेबसाईट प्रसारण कंपनी | ३) वेबसाईट                |

ई मार्केटींग (E-marketing)

ऑनलाईन व्यापार ही संकल्पना भ्रामक दुकाने (Virtual Malls) यावर आधारित आहेत. प्रत्यक्ष दुकाने थाटून विक्री करण्यापेक्षा वेबसाईट उघडून त्याद्वारे वस्तू विक्री करणे म्हणजे ऑनलाईन व्यापार होय. यामुळे जाहिरात करण्यापासून तर वस्तू व सेवांचा पुरवठा करण्यापर्यंत सर्व कार्ये ऑनलाईन केली जातात. ऑनलाईन व्यापाराची संकल्पना सर्वप्रथम इ.स.१९९० मध्ये अॅमेझॉन डॉट कॉम आणि ई बे डॉट कॉम या दोन व्यापारी संस्थांनी उदयास आणली. आपल्या ग्राहकांना घरबसल्या खरेदी करता यावी म्हणून या दोन संस्थांनी सर्वप्रथम इंटरनेटद्वारे सेवा देण्यास सुरुवात केली. आज वर्ल्ड वाईड वेबवर असणा-या अनेक वेबसाईट्सपैकी ९०: वेबसाईट या ऑनलाईन व्यापार करणा-या आहेत. कमी वेळात, कमी भांडवलात आणि कमी खर्चात हा व्यापार होत असल्याने दिवसेंदिवस याची लोकप्रियता वाढते आहे. मुख्य म्हणजे कोणतेही भौतिक कार्यालय किंवा विक्रीकेंद्र निर्माण करण्याची गरज नसल्याने हा व्यापार अधिक सुलभ आणि व्यवस्थापनाच्या दृष्टीने लवचिक असा आहे. ऑनलाईन व्यापारासाठी ग्राहक शोधण्याचीही गरज भासत नाही कारण ग्राहक स्वतः वस्तूंची ऑनलाईन जाहिरात पाहून वस्तू खरेदीसाठी प्रेरित होतो आणि व्यापारी संस्थेशी संपर्क साधतो.

ई-व्यापारातील विक्री पद्धती:- ई-व्यापारातील विक्री पद्धती प्रामुख्याने पुढील प्रकारच्या आहेत.

- १) निश्चित किंमतीवर :- उत्पादकाने निश्चित केलेल्या किंमतीवर ग्राहक खरेदी करू शकतात. वस्तूची वेबसाईटवर जाहिरात होत असतांनाच या किंमती प्रदर्शित होत असतात. या किंमती पाहूनच ग्राहक खरेदीचा निर्णय घेतात व आपला आदेश नोंदवितात.
- २) लिलाव:- उत्पादकाने ठरवून दिलेल्या किमान किंमतीपेक्षा किती जास्त किंमत ग्राहक देवू शकतो. याबाबत लिलाव मांडण्यात येतो. जो ग्राहक जास्त किंमत देण्यास तयार असेल त्याला वस्तू विकण्यात येते.
- ३) उलटा लिलाव:- यात ग्राहक स्वतः एखाद्या वस्तूसाठी किती किंमत देण्यास तयार आहे हे आधी उत्पादकाला कळवितो. व उत्पादकाकडून किंमतीची विचारणा करतो. जो उत्पादक कमीत कमी किंमतीला वस्तूचा पुरवठा करेल त्या उत्पादकाकडून ती वस्तू ग्राहक विकत घेतो.
- ४) विनिमय:- ग्राहक व विक्रेता एकाच वेळी वेबसाईटवर आपल्या किंमती जाहीर करतात. त्यावर दोघांमध्ये विनिमय होऊन एक किंमत निश्चित केली जाते. व विक्रीचा व्यवहार पूर्ण होतो.

ई-व्यापाराचे फायदे:- ई-व्यापाराचे पुढील फायदे आहेत.

- १) ग्राहक घरबसल्या आरामात आपल्या सोयीने वस्तूची खरेदी करू शकतात. त्यामुळे त्यांची इतर महत्वाची

कामे ते योग्य प्रकारे करू शकतात.

- २) दुकानदार किंवा विक्रेत्यालाही ऑनलाईन व्यापारामुळे २४ तास विक्रीकेंद्रावर उपस्थित राहण्याची आवश्यकता नसते. त्यामुळे विक्रेता देखील इतर उत्पादक कार्यात आपला वेळ लावू शकतो.
- ३) ई-व्यापाराला वेळेचे बंधन नसल्याने वस्तूंची खरेदी विक्री कोणत्याही वेळेत करता येते. त्यामुळे या व्यापाराला २४/७ व्यापार असेही म्हणतात. म्हणजे आठवड्याचे सातही दिवस, दिवसाचे २४ ही तास हा व्यापार सुरू असतो.
- ४) या व्यापारामुळे मध्यस्थांचे उच्चाटन होत असल्याने वस्तूच्या किंमतीतील मध्यस्थांचा नफा कमी होऊन वस्तू कमी किंमतीत ग्राहकांना उपलब्ध होतात. त्यामुळे दर्जेदार व उत्तम गुणवत्तेच्या वस्तू ग्राहक योग्य किंमतीत प्राप्त करून खरेदीचे समाधान प्राप्त करू शकतात.
- ५) केवळ वस्तूंच्या विक्रीपर्यंतच हा व्यापार सिमित नसून वस्तूंसाठी विक्रेयोत्तर सेवा देखील ऑनलाईन व्यापारांतर्गत सुरू झाल्या आहेत. त्यामुळे ग्राहकांच्या समस्या तत्परतेने सोडविणे शक्य झाले आहे.

ई-व्यापाराच्या मर्यादा:- ई-व्यापाराच्या पुढील मर्यादा सांगता येतात.

- १) ई-व्यापारात गुप्ततेची मर्यादा आहे. ऑनलाईन पध्दतीने शोधन करतांना बरेचदा ग्राहकांना धोका निर्माण होऊ शकतो.
- २) ई-व्यापारात घरपोच सेवा दिली जाते. बरेचदा त्यामुळे ग्राहकांनी पसंत केलेलीच वस्तू त्यांच्या घरापर्यंत जाईल याची खात्री नसते, किंवा प्रदानासाठी बराच कालावधी लागू शकतो.
- ३) इंटरनेटवरून वस्तूंची माहिती घेऊन ग्राहकांना वस्तू खरेदी करावी लागते. परंतु प्रत्यक्षात वस्तूची हाताळणी करून त्यानंतर वस्तू खरेदीचा निर्णय ग्राहक यात घेऊ शकत नाही.
- ४) ई-व्यापारात ग्राहक व व्यापारी किंवा उत्पादक यांची प्रत्यक्ष भेट होत नाही. त्यामुळे पारंपारिक व्यापारात ज्याप्रमाणे वैयक्तिक संबंध व्यापारी व ग्राहक यांच्यात निर्माण होतात. तसे संबंध ई-व्यापारात निर्माण होण्याची शक्यताच नसते. त्यामुळे व्यापारी व ग्राहक यांच्या सामाजिक जाणीवा नष्ट होण्याची शक्यता अधिक असते.
- ५) विक्री झालेली वस्तू ई-व्यापारात पुन्हा परत घेतली जात नाही. तसेच विक्री परत करण्याची प्रक्रियाही किचकट आहे. त्यामुळे ग्राहकांना वस्तू नापसंत असेल तरी त्याला ती वस्तू परत करण्यासाठी फार मोठ्या कंटाळवाण्या प्रक्रियेला समोर जावे लागते.

अशाप्रकारे ई-व्यापाराच्या मर्यादा असल्या तरी आधुनिक युगात हा व्यापार दिवसेंदिवस लोकप्रिय होत आहे.

निष्कर्ष

- इंटरनेटकरीता दूरसंचार सेवा, मॉडेम याची गरज असते. परंतु ही सेवा शहरात उपलब्ध होते. बहुतेक खेड्यात आजही उपलब्ध नाही.
- आधुनिक तंत्रज्ञान हे सर्वानाच अवगत नाही त्यामुळे बरेच व्यक्ती ई-व्यवहार करण्यासाठी धाडस करीत नाही.
- अनेकांच्या मनात याविषयी गैरसमज आहेत. तसेच वस्तू मागविल्यास मनासारखी मिळेल याची शाश्वती नाही.
- एकदा मागविलेली वस्तू परत करण्याची सोय नाही.
- तंत्रज्ञानात बिघाड झाल्यास अनेक अडचणींना सामोरे जावे लागते.

## Some Applications Of Boolean Algebra In Switching Circuits

**Prof. Sudhir N. Velukar**

Department Of B.C.A.,  
College Of Management And Computer Science, Yavatmal

### Abstract

Our main objective in working in this research paper is to provide some information to understand the use of boolean algebra, with the help of circuits combining with some relay circuits, and some practical examples that enable us to fully understand why does boolean algebra important?. the examples used in this research paper are simple to understand and are able to illustrate the main purpose of this work.

**keywords-** air conditioner, sensor, circuit, output, gas leakage, choking, plasma gasification, heat torch, air pressure, waste valve.

### Introduction

In this paper some applications of Boolean algebra are shown through some real-life examples using relay circuits. An example of toxic waste incinerator in which the author uses a sensor to open the waste valve to detect a good flame in the toxic waste incinerator so that toxic waste cannot come out if the waste in the chamber does not burn properly. So to reduce time and reduce costs and protect the environment from toxic fuels, we apply sensors. Using this idea I used these sensors on another example such as A.C and PLASMA GASIFICATION by which we can extend the life of the object and make more profit by saving with energy and cost. In this paper we consider an example of A.C and install four sensors to check the leakage of gas, choking, temperature and pressure.

The English mathematician George Boole (1815–1864) sought to symbolize Aristotle's system of logic. Boole wrote a treatise on the subject in 1854, titled An Investigation of the Thoughts of Laws, entitled Mathematical Principles of Logic and Probability, which introduced several laws of the relation between mathematical values to one of two values. Limited: true or false, 1 or 0. Their mathematical system is known as Boolean algebra. This is a world in which all other possibilities are invalidated by fiat.

As one might surmise, this is not the kind of math you want to use when balancing a checkbook or calculating a current through a resistor. However, Claude Shannon of MIT fame considered how Boolean algebra can be applied to on-and-off circuits, where all signals are represented as "high" (1) or "low" (0). His 1938 thesis, titled A Symbolic Analysis of Relay and Switching Circuits, put Boole's theoretical work to use in a way Boole could never have imagined; allowing us to design digital circuits and A powerful mathematical tool was given to perform the analysis. It is an abstract mathematical system mainly used in computer science and in expressing relationships between sets (groups of objects or concepts). The notational system was developed by the English mathematician George Boole c.1850 to allow algebraic manipulation of logical mathematics. Such manipulations may or may not make a statement true and show how a complex statement can be rearranged into a simpler, more convenient form without altering its meaning.

### Boolean arithmetic

Let us begin our search for Boolean algebra by adding numbers together:

$$0 + 0 = 0$$

$$0 + 1 = 1$$

$$1 + 0 = 1$$

$$1 + 1 = 1$$

Boolean algebra by multiplication:

$$0 \times 0 = 0$$

$$0 \times 1 = 0$$

$$1 \times 0 = 0$$

$$1 \times 1 = 1$$

And there circuit

Boolean multiplication

## Air Conditioner

### What is an air conditioner?

An air conditioner is a device, system, or mechanism designed to extract heat from the area using a refrigeration cycle. In construction, a complete system of heating, ventilation and air conditioning is referred to as HVAC. The purpose is to provide comfort during hot or cold weather, at home or in the car.

A simple style diagram of the refrigeration cycle:

- 1) Condensing Coil,
- 2) Expansion Valve,
- 3) Evaporator Coil,
- 4) Compressor.

A poorly maintained air conditioning system can sometimes promote the growth and spread of microorganisms, such as *Legionella pneumophila*, the infectious agent responsible for legionnaire's disease or thermophilic actinomycetes.

We can assume some conditions in AC where we can use Boolean algebra's application and will see how our A.C can be more secure from internal problems which occurred in it and can have long life. These conditions are like level of the gas, inner temperature of A.C, choking problem in window due to some waste and leakage of gas. The level of the gas should be proper in the A.C, if the level of the gas is low, AC will not work efficiently and also lead to the power wastage. Our aim is to monitor this level of the gas at a saturated level for keeping A.C continues on working. Now we want to implement a sensor which senses the level of gas in the refrigerator section of A.C. Let level of the gas is maintained at a saturated level and if level of gas goes down from that level, sensor will automatically shut off the A.C. Suppose low level of gas is denoted by "0" and saturated level is denoted by "1". Hence power supply to the A.C will be "on" till the sensor show constant level.

We can implement an another sensor for the inner temperature of A.C, the temperature of inner equipment's reaches so high that a fault can be occurred in the A.C for safety purpose we can put a sensor in A.C which will shut down A.C before reaching the temperature at that level automatically.

For this we set a critical temperature for that sensor beyond which it will not allow A.C to work. Let us consider temperature less than that critical temperature is "1" and  $\geq$  to that critical temperature is "0".

Third sensor is for choking, as it is not so important but we can't neglect it. If the flow of air is not as smooth as it should be from all over the window of the A.C or there is some waste in the window, by putting a sensor, we can keep an eye on it and if it happens A.C will automatically shut down.

We can put a fourth sensor which is for leakage of gas, if there is a leakage in gas chamber then A.C will not cool properly and it is also unhealthy, so we will put a sensor so if gas is leaking, A.C will shut down .So we consider leakage as "0" and not showing leakage as "1".

Now from above discussion we reach at a situation that if all sensors are showing value "1" then only in that condition A.C will be "on" and for designing the circuit for this situation we have to first draw the truth table.

- Low level of gas sensor value is "0" Otherwise "1"
- Temperature above critical value sensor value "0" Otherwise "1"
- If there is some choking sensor value is "0" Otherwise "1"
- If there is a leakage of gas sensor value "0" Otherwise "1"

Truth table for this design is as followed:

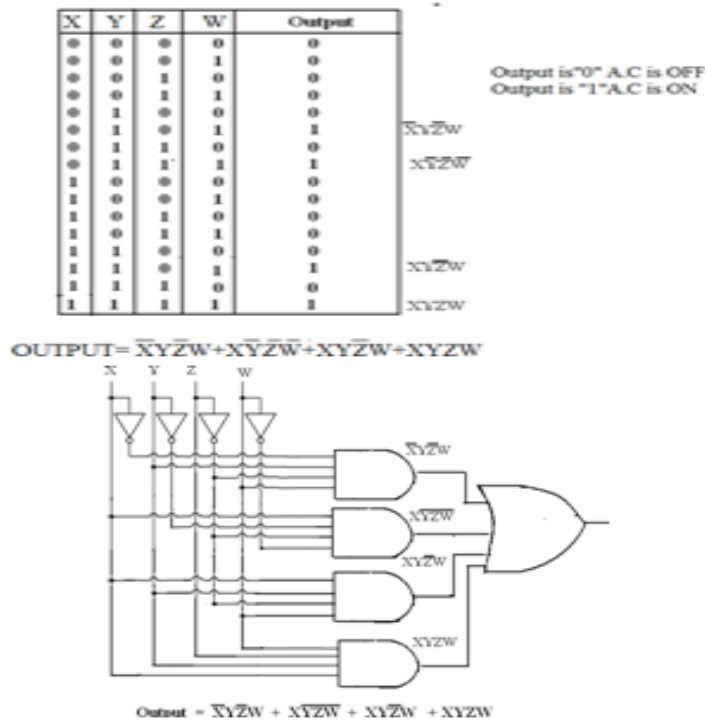

**Out put = XYZW**

A	B	C	D	Output
0	0	0	0	0
0	0	0	1	0
0	0	1	0	0
0	0	1	1	0
0	1	0	0	0
0	1	0	1	0
0	1	1	0	0
0	1	1	1	0
1	0	0	0	0
1	0	0	1	0
1	0	1	0	0
1	0	1	1	0
1	1	0	0	0
1	1	0	1	0
1	1	1	0	0
1	1	1	1	1

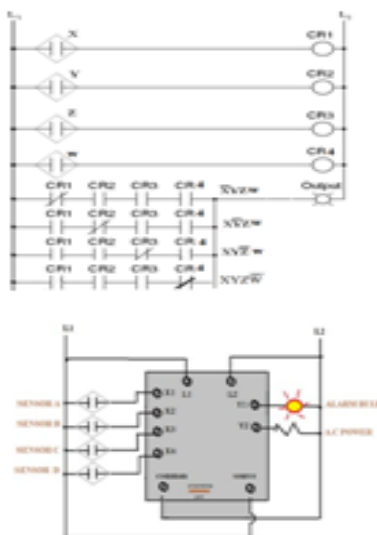

output is "0" A.C is OFF  
 output is "1" A.C is ON

Nothing is so ideal or remains ideal like that always. There will occur some little bit problem and. A rare problem in A.C between these four conditions will instantly closed our A.C. but there are some conditions at which we can allow or compromise our A.C to be "on".

Such that level of the cooling gas is low or choking is also comprisable to some extent. Then we want to continue our A.C “on” with this problem. But we can’t compromise with leakage and temperature because these conditions will lead to a big problem. Now our A.C will be “on” when input has value “1” in leakage and temperature both, either sensor for level of gas or choking has value “0”. Thus if our output is “1” then A.C will be “on” and if “0” A.C will be “off”.  
 From above discussion our new truth table is

And the corresponding circuit will be:

If all three sensors are operating properly, they should detect appropriate temperature and gas definitely with equal accuracy. Thus, sensors will either register 000 i.e. no flame or all register 111 i.e. good flame. Any other output like 001, 010, 011, 100, 101, or 110 constitutes will show a disagreement between sensors, and may therefore indicate a sensor of a potential failure. Now if with the previous circuit which has already drawn, we add a circuitry to detect any one of the six "sensor disagreement" conditions, we can use the output of that circuitry to activate an alarm. Whoever is monitoring the gasification chamber will then instantly judge that either he should continue to operate with a possible failed sensor where inputs are 011, 101, or 110, or shut the chamber down to be absolutely safe. Also, if the gasification chamber shut down, and one or more of the

sensors still indicates appropriate conditions (001, 010, 011, 100, 101, or 110) while the others indicates no, it will be known that a definite sensor problem exists.

The first step in designing this "sensor disagreement" detection circuit is to write a truth table describing its behavior. Since we already have a truth table describing the output of the "good flame", we can simply add another output column to the table to represent the second circuit and make a table representing the entire logic system

Output = 0 (close valve)      Output = 0 (sensors agree)  
 Output = 1 (open valve)      Output = 1 (sensors disagree)

sensor inputs      detect right temp&press      sensor dissagreement

X	Y	Z	Output	Output
0	0	0	0	0
0	0	1	0	1
0	1	0	0	1
0	1	1	1	1
1	0	0	0	1
1	0	1	1	1
1	1	0	1	1
1	1	1	1	0

An alternative process to generating a Sum-Of- Products expression to account for all the 1 output conditions in the truth table is to generate a *Product-Of- Sums*, or *POS*, expression, to account for all the 0 output conditions.

Output = 0 (close valve)      Output = 0 (sensors agree)  
 Output = 1 (open valve)      Output = 1 (sensors disagree)

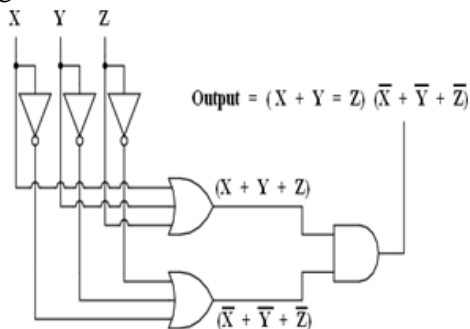

sensor inputs      detect right temp&press      sensor dissagreement

X	Y	Z	Output	Output
0	0	0	0	0
0	0	1	0	1
0	1	0	0	1
0	1	1	1	1
1	0	0	0	1
1	0	1	1	1
1	1	0	1	1
1	1	1	1	0

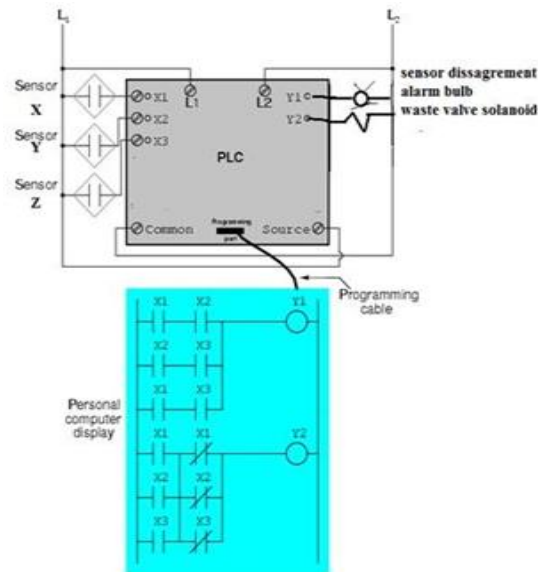

$(X + Y + Z)$   
  
 $(\bar{X} + \bar{Y} + \bar{Z})$

**Output =  $(X + Y + Z)(\bar{X} + \bar{Y} + \bar{Z})$**

Whereas a Sum-Of-Products expression could be implemented in the form of a set of AND gates with their outputs connecting to a single OR gate, a Product-Of- Sums expression can be implemented as a set of OR gates feeding into a single AND gate:

And the relay circuit:

## Conclusion

Through this research paper by using sensors and by forming their circuits and we show how they can implement in relay circuits. With use of Boolean algebra we can simplify complex circuits in a simple way. Logic has been well studied and is now well understood, but it is not well used.

Programmers learn that logic is a foundation of programming, but they don't often use it to program. Mathematicians study about logic, but they don't often use it in their proofs. Logic is a tool, like a knife. People have looked at it from every angle; they've described how it works at great length; now it's time to pick it up and use it.

## **Role Of Libraries In Higher Education In India**

**Dr.G.P.Urkunde**

(Librarian), Indira Mahavidyalaya,  
Kalamb, Dist. Yavatmal

### **Abstract**

*The role of the library is important in the field of higher education. It is imperative to serve reader and researcher from various colleges and universities in the country. Accordingly the location of the libraries is indispensable for providing important education in higher education system. It is necessary to utilize the complete tools available in the library from various institution in the country similarly the role of NAAC in the field of higher education is also important. It is important for libraries to participate in the educational institution of the country as they seek the highest level of higher education. The research paper presented discusses the libraries involvement in the higher education system in India.*

**Keywords:** Academic library, Higher education, Institution, Indian university, Inflightnet, E-Resources

### **Introduction**

Indian Higher education system got a boost in 1857 with establishment of three universities. Library education had to wait till the 20<sup>th</sup> century. The first ever library school was started by Melvil Dewey in USA in 1887. W.A. Bardon an initiated training in librarianship in India in 1911 at Baroda to create a cadre of man the newly established libraries in the state library system.

India has a large higher system. The growth rate of educational institutional. In India was very slow before independence in 1947. Today there are a total of 237 universities including 116 general universities, 12 science and technology universities, 7 open universities, 33 agriculture universities, 5 woman universities, 1 Language university and 11 Medical Universities along with 12600 colleges that provide education in all disciplines.

In today context when we look at the role of libraries we find that the libraries are confronted with the new challenges a new reality which has arises with the advent of the rapid changes in the knowledge base. The library is regarded as a place where scholars come to make use of it and get material for use in higher education information technology enables the student/scholars access to the library.

### **Academic Library**

A library that is an integral part of college, university, or other institution of post secondary education. Administered to meet the information and research needs of its students, faculty and staff. The academic library is also activities have focused on finding qualitative and quantitative measures of use of information services at academic libraries.

An academic library is a library that is attached to academic institution above the secondary level, serving the teaching and research.

Academic libraries exist to facilitate the educational goal of their parent institution to help students how to learn to make possible independent study advocated by education to help student deal with their problem and live in way that give life greater meaning, effectiveness and satisfaction.

### **Higher Education**

- Higher education also referred to us further education is cherished object to foster human intellect and is conserved an effective tool human intellect and is conserved an effective tool to develop capability of action, co-ordination of thought and creativity of mind. It is an important human resources that a modern society is encouraged to promote to meet it's objective ends. (kanunjua 2012)

- Higher education institutions are entering a period of flux, and potentially even turmoil. Trends to watch for are the rise of online instruction and degree programme, globalization and an increased skepticism of the return on investment in a college degree.
- Shift in the higher education surround will have an impact of libraries in term of expectations for development of collection, deliver of collection and services for both old and new audiences, and in term of how libraries continue to demonstrate value of parent institutions.
- According to the report, institution of higher learning have evolved into a nonsensical hodgepodge that cannot effectively and stimulanously support both teaching and learning functions alongside high quality research and that organization that focus on one and not the other gain cost and market advance. Online learning environment are identified as ‘disruptors’ and the of ‘competency certification’ support alternative to traditional education options.
- The book academically a drift: Limited learning on college composes, also questions the value of today college education. The Journals Academic questions devoted two issues to examining all sides of the ‘bubble’ issue. Further evidence that students seek value for their education dollar is reflected in the strong enrollment number in community colleges.

### Role Of Library In Higher Education

The role of the library is necessarily dependent upon the educational objective of the institutions frequently these are unstated or inadequate. Reference is made to some definition of objective for higher educations and the consequences for libraries are discussed. The view is urged that libraries and therefore librarian, should be treated as integral and active part of the educational process, and the latter be involved in course planning and development.

The role indentified for libraries in traditional higher education has not been transferred to the thinking about the external mode of study. The problem of providing any library service to external student in a country as vast and sparsely peopled as Australia is enormous. To extend services and opportunities equivalent to those available on campus may be impossible but great effort should be made.

Otherwise it may be impossible to match the educational experience of external and internal student in which case the equivalent of their qualification is in serious questions.

### Indian Universities

The Indian higher education system is one of the largest in the world comprising of around 550 universities and 31000 colleges enrollment in Higher education have been growing at a steady rate of 6.3 present over the last decade to reach estimated 14.62 million student enrollment considering the growing demand for higher education, India will need about 5000 college by 2020.

### Impact Of It On Libraries

From the above review of the article by various library and information expert, the benefit of using IT in libraries may be consolidated as:

- 1) Improved efficiency of library operation.
- 2) Introduced new services.
- 3) Improved collection management
- 4) Repaid communication
- 5) Improved uniformity and standardization
- 6) Improved user satisfaction and an affection utilization of fund.

### Inflibnet

Information and library network centre [www.inflibnet.ac.in](http://www.inflibnet.ac.in) developed by, UGC in collaboration with NISSAT. This digital library network is probably one of the most fully fledged step toward, digital libraries and

India major activities of this association include library automation, database system, software development, human resources development, information service and networking in libraries.

They have created a software SOUL that is based on a rational database management language which is used for cataloguing archiving as well as online public access of resources.

### E-Resources

Changing need of information users E-resources offer enormous benefits. They provide user faster more convenient 24 hours desktop access from anywhere. E-resources produce in various electronic formats such as E-Book, E-Journals, Bibliographic Data base, on line data base and other web based resources.

### Conclusion

The library has gained a prominent place in the field of higher education in the country. The 21<sup>st</sup> century library is also working to provide information services to student, professor and researchers in their immediate. The role of UGC in the field of higher education is also very important. The libraries are equipped with various useful tools i.e. E-resources to serve the readers in changing circumstances. The role of the university in this country is also important. The role of Inlibnet and N-list is notable in the field of higher education. In India due to the huge explosion of information the library also faces many challenges while serving the readers in the field of information technology.

## Information Use Pattern Of Undergraduate Students Of Aniket College Of Social Work Wardha, Maharashtra.

**Dr. Milind B. Ghangare**

Librarian, Aniket College of Social Work, Wardha.

### Abstract

*In this study investigates the information use pattern of undergraduate students of Aniket College of Social Work Wardha, Maharashtra, Academic Libraries must understand the information needs of students, research scholars and faculty member in order to meet those needs. This study also examines the kinds of academic information needed by undergraduate students in social work, which information resources, they require, methods for locating information and level of satisfaction of library collection, services and facilities. The descriptive survey method was used questionnaires from 120 under graduate students.*

### Introduction

The main aim of any library is to provide access to proper information explosion, due to growing demands of the user and limited financial resources; library is not able to obtain all the reading material on demand. New technologies library provides several new materials, media and mode of storing and communicating the information.

In order to improve the existing library services, plan new services, and rationalize the limited financial resources is an economic way, evaluate the performance of the library and enhance the user satisfaction, it is imperative to conduct user studies.

### Professional Social Work:

Professional social work is based on a body of knowledge and skill rooted in Democratic values and implemented through the method of social case work. The philosophy of social work is the worth and dignity of human being, equality justice and development are its focal points. Social work as a helping process is inculcated through class room teaching and field training.

### Aniket College of Social Work, Wardha, Maharashtra:

The college was established under the auspices of Aniket Education Society, Dighori (N), Bhandara. Which premier nongovernmental philanthropic organization in central India devoted and dedicated to the social work training and education especially among the people belonging to the lower strata of society so that they may have academic and other than academic interaction with the cross section contemporary society. So far, the college has trained thousands of young girls and boys in professional social work to help people to help them. The college offers two levels of course in social work i.e. Bachelor of social work and Master of Social Work.

### Aims and Objectives of the Study:

The aim of the study is to know, information seeking patterns of undergraduate students of Aniket college of Social Work, Wardha.

### Objective of study are as follows:

- 1) To know the purpose for which they seek and collect information.
- 2) To know extent satisfaction of undergraduate students which regard to library collection, services and facilities provided by the library?
- 3) To find the various information sources required by the undergraduate students.
- 4) To identify the methods that under graduate students of the library adopts to locate the required information.

### Methodology

Keeping in view the objective in mind, a questionnaire is prepared to collect data from undergraduate students. At present there are 172 undergraduate students in this college in academic year 2017-18.

A sample of 150 (77% of the total population) students has been drawn from the total population by a sample random method. The questionnaire was distributed among the different branches of selected

undergraduate student above. However, in research received questionnaire from the 120 (62% of the sample) undergraduate students. The analysis and interpretation of the data is presented in the following.

**Data Interpretation and Analysis:**

**1) Frequency of using the library:**

The distribution of undergraduate student according to the frequency of using the library is shown in table1.

Frequency	No. of Students	Percentage
Daily	92	77%
Once a week	08	6%
Twice a week	13	11%
Once fifteen days	07	6%
<b>Total</b>	<b>120</b>	<b>100%</b>

*Table – 1*

It is shown from table 1 that 77% of the undergraduate students use the library daily. 6% once in week, 11% twice a week and the remaining 6% of the students once in fifteen days in this regard.

**2) Purpose of using the Library:**

The distribution of undergraduate students according to the purpose of using the Library is shown in table – 2

Purpose	No. of Responses	Percentage
To Read/borrow books	102	85%
To read newspaper	107	89%
To consult periodicals	91	76%
To use other reading (Reference) materials	75	63%

*Table – 2*

It is evident from Table – 2 that the undergraduate students mainly use the Library for the purpose to read/borrow book 85%. The next to read newspapers 89% and third one is consult periodicals 76% and also 63% students use Library to read the reference and other related reading materials.

**3) Library facilities:**

The library has to maintain cleanliness proper ventilation, appropriate space for reading and provide drinking water and other facilities. A congenial environment in the library with encouraging facilities provides a comfortable atmosphere for reading and using library resources effectively.

The distribution of undergraduate students according to the satisfaction with different library facilities given by library to student are shown in table – 3

Library facilities	Level of satisfaction		Total
	Satisfied	Not satisfied	
Space for reading	105 (88%)	15 (12%)	120 (100%)
Cleanliness	108 (90%)	12 (10%)	120 (100%)
Lighting	115 (96%)	05 (4%)	120 (100%)
Furniture	98 (82%)	22 (18%)	120 (100%)
Ventilation	107 (89%)	13 (11%)	120 (100%)

*Table – 3*

It is evident from the table-3 that the undergraduate students 88% are satisfied and 12% are not satisfied with regards to space for reading. 90% are satisfied and 10% are not satisfied with cleanliness. It is also seen that 96% are satisfied and 04% are not satisfied with lighting facility. 82% are satisfied and 18% are not satisfied with furniture arrangement and 89% are satisfied and 11% are not satisfied with regards to ventilation.

It is also evident from it that most of the undergraduate students 91% are satisfied with regard to overall library facilities provided by the library.

**4) Satisfaction with Library Services:**

The prime objective of collection storage and organization of information in the college library is to facilitate the academic. Commonly to exploit and harness fully the resources of the library. To this end, the library invites the readers, guides them and provides them with literature in a satisfactory manner. Effective

Library Services make a library more functional to deliver the right information at the right time in the right manner to the right user.

The distribution of undergraduate students according to the satisfaction with different library services is shown in table 4.

Library Services	Level of satisfaction		Total
	Satisfied	Not satisfied	
Circulation services	115 (96%)	05 (04%)	120 (100%)
Reference services	98 (82%)	22 (18%)	120 (100%)
Readers orientation	108 (90%)	12 (10%)	120 (100%)
Inter Library loan	92 (77%)	28 (33%)	120 (100%)
Reprographic service	102 (85%)	18 (15%)	120 (100%)

**Table – 4**

It is evident that from table 4 that the undergraduate students 96% are satisfied and 4% are not satisfied with regard to circulation services. It is also evident from it that 92% are satisfied 18% are not satisfied with reference services, 108% are satisfied and 12% are not satisfied with readers orientation service also found that 77% satisfied and 28% are not satisfied with inter Library loan facility study also evident that 85% satisfied and 15% are not satisfied with reprographic service.

Overall conclusion from it that the majority of the undergraduate students 90% are satisfied and 10% are not satisfied with regard to overall library services provided by the library.

### Conclusion

In the study information use pattern of undergraduate students of Aniket College of Social Work, Wardha was carried out at ACSW Wardha libraries 120 students' users. It carried out through questionnaires and it was analyzed in tabulates.

It is concluded that 77% of the undergraduate students use that library daily. Most of the undergraduate students mainly use the library for the purpose of reading / borrowing the books and reading newspapers.

The majority of the undergraduate students were satisfied to overall library resources, facilities which provided by the college library. Also majority of students satisfied overall library services.

## **Career Adaptability In Physical Education: The Main Strength And Weakness**

**Asst. Prof. Dr. Ravijet O. Gawande,**

Babaji Datey Kala Ani Vanijya Mahavidyalaya, Yavatmal District (M.S.)

### **Abstract**

*The aim of this investigation was to find out the Career Adaptability in Physical Education and its Strength and Weakness. In the current investigation, forty male professional students of Post graduate (P.G) degree in Physical Education were selected at random by purposive sampling technique, from affiliated college of Sant Gagde Baba Amravati University, Amravati. 20 professional students who was doing his Post Graduate (P.G.) Course in Physical Education were selected and another 20 professional students who was complete their Post graduate (P.G) degree in Physical Education, should not experience of more than five years were selected. The variables selected for the research work like that Career Adaptability in Physical Education. The data of Career Adaptability in Physical Education was collected by self-designed Questionnaire. After that collected data was put into Microsoft Excel to develop Master Chart and then 'Chi-square' test was used for the statistical treatment. To test the hypothesis the level of significance was set at 0.05 level of confidence, after the statistical analysis of data related to the career adaptability in physical education: The main strength and weakness, it was found that there was significant difference in in Career Adaptability in Physical Education and its Strength and Weakness of professional student of S.G.B.A. University, Amravati. Hence the researcher's pre-assumed hypothesis is accepted.*

*Keywords: Career Adaptability, Strength, Weakness and Professional Students*

### **Introduction**

#### **Careers in Physical Education:**

An importance in athletics, exercise, or sports can lead to a variation of different careers within the sports and exercise industries. You might choose to chase a career in coaching at the high school, college, or even professional level. Other career selections involve of fitness trainers, recreation workers, physical education trainers, physical therapists, sports medicine, human kinetics, sports nutritionists, and even sport psychologists. Explore your many selections as you choose a career in the sports or exercise industry.

The foundation for many of these sports and exercise professions is the study of kinesiology. A student learning kinesiology can arrange to enter careers such as coaching, fitness training, physical education training, sports medicine, physical therapy, corporate fitness instruction, and sports management. Even without a degree in kinesiology, it's possible to pursue careers in the sports and exercise fields, however. For example, it's possible to enrol in a fitness trainer certification program to become a certified fitness trainer, working with clients privately or in fitness centres.

### **Profession**

In general, a profession is made up of a group of people who provide a unique social service to humankind. For providing this service, the members have secured specialized skills obtained in a body of knowledge of an academic discipline; the services are rendered according to the standards for moral behaviour and ethical practices. Same thing can be called as business if ethics are not followed. A teacher teaching properly in the class-room, completing the course of study, solving the difficulties of the students, helping them in appearing the various examinations is called as he is professional man. While a teacher will not paying attention in the working of the school but inviting the students for highly charged private classes may be called as a businessman. Hence the purpose, the motto, the ethics is important for the same work to be called as business or profession, though in both the case earning is a common factor.

### **Objectives**

The main purpose of this study was to find out the Career Adaptability in Physical Education and its Strength and Weakness of professional student of S.G.B.A. University, Amravati.

### **Hypothesis**

On the basis of literature searched and the researcher's own perception it was hypothesized that the career adaptability in physical education would be excellent.

**Methodology****Source of Data:**

In the present study subjects were selected from affiliated college of Sant Gadge Baba Amravati University, Amravati for the collection of data.

**Selection of Subjects:**

The researcher was select 40 male Students (Subject) in which 20 professional students was doing his Post Graduate (P.G.) Course in Physical Education and other 20 professional students was complete their Post graduate (P.G) degree in Physical Education, should not experience of more than five years.

**Sampling Method:**

The subjects were being selected by using purposive sampling method.

**Collection of Data:**

For the collection of data, the self-developed opinionnaire of main strength and weakness related to career adaptability in physical education would be administrated to the selected subjects. After that collected data was put into Microsoft Excel to develop Master Chart and then 'Chi-square' test was used for the statistical treatment.

**Criterion measures:**

Following are the criterion measures which were responsible for collection of data, to testing the hypothesis.

Career adaptability in physical education: The main strength and weakness was measured by self-developed opinionnaire.

**Level of Significance:**

To test the hypothesis the level of significance was set at 0.05 level of confidence which was considered adequate and reliable for the purpose of this study.

**Analysis of the Data:**

After the collection of data from professional students and Ex- students (teacher) of Post Graduate (P.G.) Course in Physical Education from Sant Gadge Baba Amravati University, Amravati. The raw data were converted into standard one by using a statistical technique 'Chi-square' test for testing of hypothesis.

	STRONG	NUTRAL	WEAK
<b>Fo</b>	70%	30%	0%
<b>Fe</b>	33.33	33.33	33.33
<b>Fo-fe</b>	36.67	-3.33	-33.33
<b>(Fo-fe)<sup>2</sup></b>	1344.7	11.10	1110.9
<b>(Fo-fe)<sup>2</sup>/fe</b>	40.34	0.33	33.33

**Table No. 1: Table Showing that Strength and Weakness of Student**

Level of significance = 0.05

$$\text{Chi-square} = \sum \{(fo-fe)^2/fe\}$$

$$\text{Chi-square} = 40.34 + 0.33 + 33.33$$

$$\text{Chi-square} = 74$$

**Table No. 1:** indicates that the frequency observed for strong is 70%, for Nutral it is 30%, and for Weak it is 0%. So the obtained  $\chi^2$  of given above statement is 74. The tabulated value of Chi-square ( $\chi^2$ ) is 5.991 at degree of freedom 2 and level of significance 0.05. Because the obtained  $\chi^2$  is greater than the table value of  $\chi^2$ , it is concluded that the main strength and weakness of student are significant. Hence the hypothesis which was given by the researcher is accepted.

**Graph-1 :Graphical Representation of Strength and Weakness of Student**

	STRONG	NUTRAL	WEAK
Fo	90%	10%	0%
Fe	33.33	33.33	33.33
Fo-fe	56.67	-23.33	-33.33
(Fo-fe) <sup>2</sup>	3211.5	544.3	1110.9
(Fo-fe) <sup>2</sup> /fe	96.35	16.33	33.33

**Table No. 2:Table Showing that Strength and Weakness of Ex-Student/Teacher**

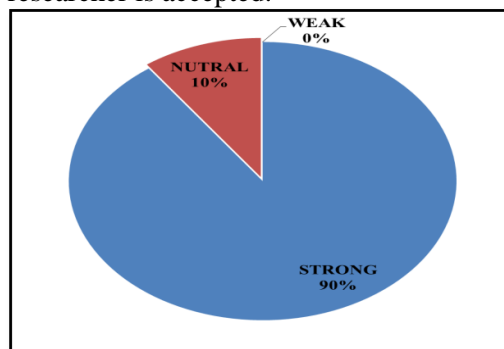

Level of significance = 0.05

$$\text{Chi-square} = \sum \{(fo-fe)^2/fe\}$$

$$\text{Chi-square} = 96.35 + 16.33 + 33.33$$

$$\text{Chi-square} = 146.01$$

**Table No. 1:** indicates that the frequency observed for strong is 90%, for Nutral it is 10%, and for Weak it is 0%. So the obtained  $\chi^2$  of given above statement is 146.01. The tabulated value of Chi-square ( $\chi^2$ ) is 5.991 at degree of freedom 2 and level of significance 0.05. Because the obtained  $\chi^2$  is greater than the table value of  $\chi^2$ , it is concluded that the main strength and weakness of Ex-Student/Teacher are significant. Hence the hypothesis which was given by the researcher is accepted.

**Graph-2 :Graphical Representation of Strength and Weakness of Ex-Student/Teacher**

### Conclusion

In the beginning of this study it was hypothesized that the career adaptability in physical education would be excellent. But after the statistical analysis of data related to the career adaptability in physical education: The main strength and weakness, it is found that there is significant difference in Career Adaptability in Physical Education and its Strength and Weakness of professional student of S.G.B.A. University, Amravati. Hence the researcher's pre-assumed hypothesis is accepted.

## Study Of Agility And Speed Of Football Players At Different Playing Position

Dr. Shashank G. Nikam

Director of Physical Education, Vidyabharti College, Seloo, Wardha

### Abstract

The Purpose of the study was to compare Agility and Speed of Football players at different playing position. For this purpose researcher had collected data from thirty (30) male football players from various football clubs of Seloo, Wardha (MS). Subjects were selected with purposive sampling methods 10 each from different playing position i.e. 10 Defender, 10 Mid Fielder, and 10 Striker. The age of the subjects were ranged between 20 to 25 years. The following tools were used to collect the data on:- Shuttle Run (4 x 10 Yard) for Agility and 50 Yard Dash for Speed. Statistical analysis was done on the basis of ANOVA comparison of Agility and Speed of Football players at different playing position at significance level 0.05. Result shows that there is difference between the mean of Agility and speed of football players at different playing position. To see this difference were significant or not One Way Analysis of Variances were implied. Researcher found that there is significant difference in Agility as well as Speed between different playing positions of football players because calculated 'f' value is 10.23 & 6.08 which is greater than tab  $F_{0.05(2,27)} = 3.354$ . Since the 'f' ratio is found to be significant. From the Table of Post-hoc test we reviled that Midfielder and Striker in reference to Agility and Defender and Striker in reference to speed shows significant differences as the Mean Difference 2.13 & 1.27 is greater than the Critical Difference 1.58 & 1.25 whereas rest comparison of Mean Difference shows insignificant. Concluding we can say attributed that Striker practice more or they give more time on ground which may develop their physical factors as compared to defender and midfielder playing position. The reason may be attributed that agility is the ability to move and change direction and position of the body quickly and effectively while under control Agility requires quick reflexes, coordination, balance, speed, and correct response to the changing direction. To be agile, you are responding to what is happening around you, taking the information and relating it to the body positioning that will maintain balance and control. Striker goes under various training program and so many different physical activity which make them over all fit as compared to defender and midfielder playing position players.

**KEYWORD:** Agility, Speed, Football Players, etc.

### Introduction

Motor fitness is a term that tends to describe an athlete's ability to perform effectively in sports or other physical activity. The term motor fitness came in to force during World War II. "Motor fitness has been defined as reading art preparedness for performance with special regard for big muscle activity without undue fatigue." It includes the capacity of the individual to move efficiently and with strength and force over a reasonable length of time.

The term motor fitness is synonymously used with the term physical fitness by the trainer or coaches but it is very important for the players to understand the basic difference between the term physical fitness and motor fitness. Physical fitness is used to denote only the five basic fitness components (muscular strength, muscular endurance, cardiovascular endurance, freedom from obesity and flexibility), whereas motor fitness is a more comprehensive term, which includes all the ten fitness components including additional five motor performance components (power, speed, agility, balance and reaction time), important mainly for success in sports. In other word we can say that motor fitness is the efficiency of basic movements or activities in additional to the physical fitness.

The motor fitness of football players is gauged by performance whereas the performance is based on many motor factor the most common motor fitness factors are agility, speed, power, strength balance flexibility and endurance some of these factors are make dominant in same games than in other games therefore it is essential to known these essential factors closely related to respective game.

Agility is the capacity to change trajectory, controlling the direction and position of your body while one's body is in momentum. Changing the direction while sprinting to take a shot in tennis is an example of agility. Agility is the ability to change the direction rapidly with control. Some viewed that, agility is dependent on strength, reaction time, speed of movement and muscular co-ordination. Agility is the ability to quickly changing body position with speed and consistency. Quick start and stop and quick change in direction are fundamental to good performance in games like football. Running is not only an athletic event itself, but it is an

important factor in almost all court and field games. It can give the outburst ability to a performer which will help to gain an advantage over his/her opponent. It is determined by the length and frequency (speed) of strides and mostly dependent upon speed of muscular and neuromuscular co-ordination.

Speed is the ability to move your body speedily. Speed is generally associated with running, yet different activities, like throwing, jumping or kicking a ball, depend upon moving your arms or legs rapidly. Some athletic coaches or trainers measure speed with a 40-yard dash.

Speed is the capacity to move the body rapidly. This is to what extent it takes for an individual or a question to travel a specific separation, and the quicker something moves, the more noteworthy its speed. Speed is estimated in meters every second (m/s).  $Speed = \frac{Distance}{Time}$ . Speed is an imperative factor in many group activities as it helps the players in beating their enemies. For instance, netballers require speed so they can get into spaces more quickly than their adversaries. Notwithstanding for rugby players speed is a need to have the capacity to vanquish their adversaries to the attempt line. Speed is frequently said to be something that one is brought into the world with, albeit a few progressions can be made by partaking in quality preparing and run preparing. Hence the researcher has taken the study "Study of Agility and Speed of Football players at different playing position"

## Materials And Methods

### Subject

For the present study researcher had collected data from thirty (30) male football players from various football clubs of Seloo, Wardha (MS). Subjects were selected with purposive sampling methods 10 each from different playing positions i.e. 10 Defender, 10 Mid Fielder, and 10 Striker. The age of the subjects ranged between 20 to 25 years.

### Administration of the test

The following tools were used to collect the data on:-

**Shuttle Run 4 x 10 Yard (Agility):** The purpose of the test is to measure the speed of body movements. Two parallel lines were marked on the floor 10 yards apart or the width of the regular volleyball courts might be used for the test. The two wooden blocks were placed one on each of the behind lines. On the order 'Go' subject had to run and take one wooden block to put behind the starting line and he had to run back and take another block and time taken to complete was the score of the subject. The total time in seconds is recorded. The score of each performer was recorded to the nearest tenth of the second.

**50 Yard Dash (Speed):** The purpose of the test is to measure speed. The players were asked to take position behind the starting line. The command 'Ready' and 'Go' were given by the starter. The command 'go' was accompanied by the down ward sweep of the starter's arms to give the timer, a visual signal, on hearing the starter's command 'go' the subjects run from the starting position and crossed the finishing line. The score is measured to the nearest tenth of the second.

### Analysis

Statistical analysis was done on the basis of ANOVA comparison of Agility and Speed of Football players at different playing positions at 0.05 level of significance.

Variables	SV	SS	df	MS	F
Agility	between	22.86	2	11.43	10.23*
	error	30.157	27	1.11	
Speed	between	8.644	2	4.322	6.08*
	error	19.165	27	0.709	

**Table – 1: Comparison of Agility and Speed of Football Players at Different Playing Positions**

\*Significant at 0.05 level

$$F_{0.05(2,27)} = 3.354$$

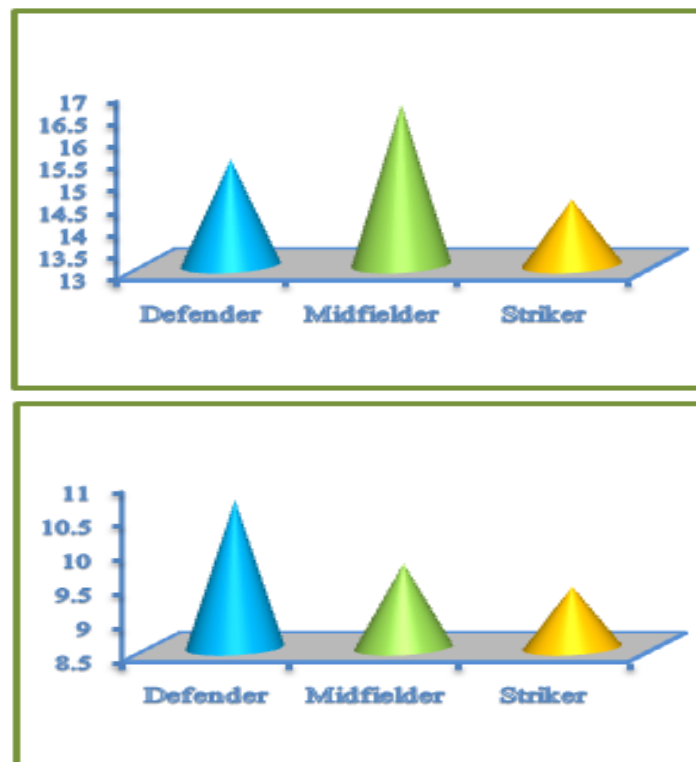

**Post Hoc Test**

Variables	Defender	Midfielder	Striker	MD	CD
Agility	15.36	16.59		1.23	1.58
	15.36		14.46	0.9	
		16.59	14.46	2.13*	
Speed	10.67	9.74		0.93	1.25
	10.67		9.4	1.27*	
		9.74	9.4	0.34	

\*Significant at 0.05 level

Above table shows that there is difference between the mean of agility and speed of football players at different playing position. To see these differences were significant or not One Way Analysis of Variances was implied. Researcher found that there is significant difference in Agility as well as Speed between different playing positions of football players because calculated ‘f’ value is 10.23 & 6.08 which is greater than tab  $F_{0.05(2,27)} = 3.354$ . Since the ‘f’ ratio is found to be significant. From the Table of Post-hoc test we reviled that Midfielder and Striker in reference to Agility and Defender and Striker in reference to speed shows significant differences as the Mean Difference 2.13 & 1.27 is greater than the Critical Difference 1.58 & 1.25 whereas rest comparison of Mean Difference shows insignificant.

**Graph**

**Conclusion**

Concluding we can say that there is difference between the mean of agility and speed of football players at different playing position. To see these differences were significant or not One Way Analysis of Variances was implied. Researcher found that there is significant difference in agility as well as speed between different

playing positions of football players. By seeing the mean we reviled that striker shows high agility and speed as compared to defender and midfielder playing position. It may be attributed that striker practice more or they give more time on ground which may develop their physical factors as compared to defender and midfielder playing position. The reason may be attributed that agility is the ability to move and change direction and position of the body quickly and effectively while under control. Agility requires quick reflexes, coordination, balance, speed, and correct response to the changing direction. To be agile, you are responding to what is happening around you, taking the information and relating it to the body positioning that will maintain balance and control. Striker goes under various training program and so many different physical activity which make them over all fit as compared to defender and midfielder playing position players.

## Do's And Don'ts Of Mobile Banking: A Review

Mr. Mahesh Mukundrao Onkar

Department of Commerce and Management,  
College Of Management and Computer Science, Yavatmal

### Abstract

*Mobile Banking refers to provision of banking and monetary services with the assistance of mobile telecommunication devices. The scope of offered services might embody facilities to conduct bank transactions, to administer accounts and to access custom data. After the launch of mobile banking in India, mobile banking transactions have seen some growth. Still mobile banking incorporates a great distance to travel as, majority of shoppers like banking in ancient ways that. The basic objective is to spot the benefits and limitations of mobile banking and therefore the issue sweet-faced by customers in mobile banking. The banking sector reforms and introduction of e-banking has created terribly structural changes in commission quality, social control selections, operational performance, gain and productivity of the banks. There square measure numerous factors that have contended very important role within the Indian banking sector for adoption of technology. So as to run the mobile banking effectively, correct care has been taken care of and take adequate steps to boost the standard services.*

**KEYWORDS:** Mobile banking, MNO, Telecom, E –banking, Internet

### Introduction

With the globalization trends worldwide, it is difficult for a nation, whether big or small, developed or developing, to remain isolated from what is happening around. Information technology has shrunken the globe, as a result of which, time and distance have become non-entities. It has enveloped every aspect of life. Today, most of the individuals adopt new generation technologies. In this dynamical situation, the banking sector is not an exception. Recent innovations in telecommunications have enabled the launch of latest access strategies for banking services through numerous e- channels like, ATMs, credit/debit cards, internet banking, mobile banking, Telebanking, EFT etc. One of these is mobile banking; whereby a client interacts with a bank via itinerant.

Mobile Banking refers to provision of banking and money services with the assistance of mobile telecommunication devices.

The scope of offered services could embrace facilities to conduct bank transactions, to administer accounts and to access customized information. After the launch of mobile banking, transactions have seen some growth. Still mobile banking encompasses ways to travel as, majority of customers prefer banking in traditional ways. Most of the customer's problem is that they are not well educated and not aware of the technological innovations. The present paper studies the advantages, limitations and problems faced by customer through mobile banking. This paper conjointly studies concerning the long run prospects of mobile banking and therefore the strategies for improvement.

### Objectives

1. To study concerning the advantages and limitation of mobile banking.

3. To see the longer term prospects of mobile banking in Bharat.
4. To give suggestions for improvement.
5. Methodology

### Nature of study

- The study is especially descriptive in nature.
- Secondary knowledge square measure used for the aim of the study.
- Secondary knowledge was collected from websites, numerous articles and journals.

### Limitations Of The Study

- It may not be hundred percent accurate.
- The study is limited to India only
- As the research mainly depends on secondary data
- Time consuming
- Limitations of the study Lack of primary data

### Literature Review

Mobile banking could be a system that enables customers of establishment to conduct variety of economic transactions through a mobile device like a mobile Phone or personal digital assistant.

Mobile banking differs from mobile payments that involve the employment of a mobile device to get hold of merchandise or services either at the purpose of sale or remotely, analogously to the use of a debit or credit card to effect an EFTPOS payment.

The earliest mobile banking services were offered over SMS, a service referred to as SMS banking. With the introduction of good phones with WAP support sanctionative the employment of the mobile internet in 1999, the primary European banks began to provide mobile banking on this platform to their customers.

In one educational model, mobile banking is defined as:

"Mobile Banking refers to provision and ailment of banking- and financial services with the help of mobile telecommunication devices. The scope of offered services might embody facilities to conduct bank and securities market transactions, to administer accounts and to access custom-made info."

In step with this model mobile banking can be said to consist of three inter-related concepts:

- Mobile accounting
- Mobile brokerage
- Mobile monetary data services

Most services within the classes selected accounting and brokerage are transaction-based. The non-transaction-based services of an informational nature but essential for conducting transactions - as an example, balance inquiries may be required before committing cash remittent. The accounting and brokerage services are so offered invariably together with data services. Information services, on the other hand, may be offered as an independent module.

Mobile banking users are specially concern with security issues like financial frauds, account misuse and user friendliness issue - difficulty in remembering the different codes for different types of transaction, application software installation & updating due to lack of standardization. Mobile banking transactions are often loosely classified into two: push kind and pull kind. Push kind could be a unidirectional dealing wherever our bank sends North American nation data concerning our account via SMS. Pull kind could be a two-way dealing, where we send a request and the bank replies.

### This can be any classified into 5 varieties. :

1. **Inter-bank:** mobile payment service (IMPS), which is a fund transfer service through National Payment Council of India (NPCI). This service enables you to transfer funds from one account to a different across banks among the country victimisation your mobile. You can use the IMPS via your banks' app, USSD'S dial-in number, encrypted SMS banking or net banking.
2. **Bank apps:** Here you need to download your bank's application or software on your mobile phone via internet. This works on both GSM and CDMA handsets for Android and iPhone platforms.
3. **USSD-based:** For this sort, all you have to do is dial the bank's service code and you can ask for information on your bank account. You don't need a Smartphone or high end phone to use the USSD platform.
4. **SMS-Based:** It is that the hottest methodology of mobile banking. You can get your account information via SMS.
5. **Internet-based mobile banking:** This manner of banking is wherever you employ your mobile screen sort of a pc monitor.

Apart from these there are additional choices just like the mobile wallets, offered by telecom service provider platforms, for instance Vodafone's m-pesa, Bharti Airtel's, Airtel Money and Aircel's Mobile Money. Bear in mind that even an un-banked client will use this service. A smart phone and an internet connection are not essential.

### Advantages Of Mobile Banking

- a. **Time saving:** Instead of allocating time to walk into a bank, you can check account balances, schedule and receive payments, transfer money and organise your accounts when you're on the go.
- b. **Convenient:** The ability to access bank accounts, make payments, and even track investments regardless of where you are can be a big advantage Do your banking at a time and place that suits you, instead of waiting in queues.

- c. **Secure:** Generally, good mobile banking apps have a security guarantee or send you a SMS verification code you need to input to authorise a payment for added security. Mobile banking is said to be even more secure than online/internet banking.
- d. **Easy access to your finances:** with the introduction of mobile banking, you are able to access your financial information even beyond the working hours. It helps to avail banking services even by making a call to the bank.
- e. **Increased efficiency:** mobile banking functions are functional, efficient and competitive. It also helps in decongesting the banking halls and reduces the amount of paperwork for both the banker and the customer
- f. **Fraud reduction:** one very real advantage to implementing mobile banking. "Customers are being deputized in real time to watch their accounts. It utilizes the mobile connectivity of telecom operators and therefore does not require an internet connection. You can check your account balance, review recent transaction, transfer funds, pay bills, locate ATMs, deposit cheques, manage investments, etc. Mobile banking is available round the clock 24/7/365, it is easy and convenient and an ideal choice for accessing financial services for most mobile phone owners in the rural areas.
- g. **Secure:** usually, sensible mobile banking apps have a security guarantee or send you a SMS verification code you would like to input to authorize a payment for value-added security .Mobile banking is claimed to be even safer than online/internet banking.
- h. **Easy access to your finances:** with the introduction of mobile banking, you're ready to access your monetary data even on the far side the operating hours. It helps to avail banking services even by creating a decision to the bank.
- i. **Increased efficiency:** mobile banking functions are useful, economical and competitive. It also helps in decongesting the banking halls and reduces the amount of paperwork for both the banker and the customer
- j. **Fraud reduction:** one very real advantage to implementing mobile banking. "Customers are being deputized in real time to watch their accounts.

It utilizes the mobile property of telecommunication operators and thus doesn't need a web association.

You can check your account balance, review recent dealings, transfer funds, pay bills, find ATMs, deposit cheques, manage investments, etc.

Mobile banking is available round the clock 24/7/365, it is easy and convenient and an ideal choice for accessing financial services for most mobile phone owners in the rural areas.

### Disadvantages Of Mobile Banking

1. Mobile banking users are in danger of receiving faux SMS messages and scams.
2. The loss of a person's mobile device typically suggests that criminal will gain access to your mobile banking PIN and alternative sensitive data.
3. Modern mobile devices like Smartphone and tablets are better suited for mobile banking than old models of mobile phones and devices.
4. Regular users of mobile banking over time can accumulate significant charges from their banks.
5. Even though there are 1.5 billion computers on the Internet and 4.5 billion people using mobile phones, there's currently no significant operating system supporting the mobile space."Hackers want to do the least amount of work for the biggest gain.
6. Most mobile banking apps need an internet connection to be able to operate, so if you live in a geographic region or expertise issues together with your net association, then you won't be able to access your account.

The same applies if your mobile phone runs out of battery.

Many phones aren't yet compatible with anti-virus software. Most cell phones don't come standard with anti-virus protection even if they have the capacity to browse the internet. Some phones aren't even compatible with the anti-virus software system on the market and there are far-famed cases during which individuals were unable to place anti-virus software system registered to them on company cell phones. Although identity thieves are still a number of steps behind once it involves learning to implement a number of their most productive laptop tricks (phishing, spamming, spreading viruses, account hacking, etc...) on a mobile phone level, experts agree that is only a matter of time and people shouldn't assume that anti-virus software isn't necessary for cell phones.

Some banks don't offer the same level of protection for cell phone banking that they do for online or in person transactions. Because the risks are still usually unknown some banks are slow to create guarantees concerning what's going to or won't be coated once you use mobile phone banking.

Problems of customers of Mobile banking

- Not sure about the safety of transactions
- Mobile security
- Network availability
- Heavy charges for transactions
- E-mail and web security
- Identity theft
- Literacy of people in rural areas
- Not aware of new innovation
- Handset operate ability
- Application distribution
- Inadequate guidance

### Future prospects of Mobile Banking in India

1. **Mobile Network Operators and enormous company homes Co-Venture:** With the popularity of collaborations between mobile network operators (MNO's) and banks live up to the promise of financial inclusion, the RBI and TRAI (Telecom Regulatory Authority of India) have announced that they'll harmonize and coordinate with one another to avoid any type of regularity conflict. Many large Indian banks have partnered/co-ventured with large mobile network operations (MNO's) and handset vendors to facilitate their association through mobile channel by providing access to money services.
2. **Under-banked and Un-Banked Population:** Almost half of the country's population is unbanked. The large section of the Indian population not simply in rural areas however additionally in several segments of urban markets, offers an oversized untapped market with an incredible business potential.
3. **Demographic Factors:** In India the population of youth (between the ages of 14-29) is that the largest youth population globally, that is around twenty seventh of the entire 1.2 billion. Furthermore, adding the age group of 30-44, the proportion is 47%. Apart from the large size of this phase, they are among those who are the early adopters of latest technology and new services, which presents a huge opportunity for e/m-banking service providers. It has been discovered that for the bulk, access to financial services is a household need, and not only an individual need, and if the account holder is illiterate, Other members of the family are a unit competent enough to execute transactions and use electronic or mobile banking services.

### Suggestions For Improvement

1. The banks should improve its service quality in terms of communication, responsiveness, dependability and understanding.
2. To provide various effective modes for promotional schemes interaction with the customer, more accuracy in billing, financial security and privacy in transactions.
3. If the banks wants to increase the service quality it should enhance level of services in punctuality, transparency and accountability, quality of customers service, safety and confidentiality of transaction, No. of queues in bank branches, 24 hours services to the customers, individualized attention to customers, necessary information to customers, learns the specific requirement of customers.
4. Set standards for on-boarding mobile banking customers.
5. Set standards for business agreements between banks and MNOs for handling client grievance.
6. Banks got to see mobile banking channel as a value saving avenue (reduction of money handling charges) instead of revenue generation vertical
7. Banks and telcos to work together for addressing customer grievance

### 3Tips to Use Mobile Banking in the Right Way:

1. Do not store necessary personal data on your Smartphone. If you visit your bank's web site victimization your phone, make certain to filter the cookies and cache frequently. Never store any usernames or passwords in your phone, regardless of how difficult they are to remember. If you were to lose the phone wherever this data is keep, someone could easily access your bank account. It is additionally necessary to alter your watchword frequently. If you employ your phone for business functions, be doubly careful on protecting confidential information.

**2. Sign up for SMS alerts**

Most banks currently provide text message alerts via SMS to alert of a coffee balance or a paid bill. Larger banks like Bank of America use SMS texts to help in fraud interference. Nine times out of 10, consumers can easily sign up for these phone alerts with online banking. Receiving alerts on your phone may be a good way to remain on prime of your account activity round the clock. It's also another convenience for times once a pc is not shut at hand.

3. **Before downloading an app, check its authenticity.** Most banks provide tailored mobile banking applications to their customers which may be downloaded to a Smartphone and wont to manage bank accounts. Unfortunately, this has additionally invited potential fraud within the kind of fastidiously duplicated applications created by scam artists. Before downloading any app to your phone, make sure that it's an authentic application released by your bank. Avoid third party software system that asks for any personal data if you cannot verify the supply. While most apps area unit legit, it ne'er hurts to be too careful.

**Conclusion**

The process of easing, privatization, globalisation and freeing has opened new manner for banks to extend their revenues by diversifying in to universal banking, investment banking, bank assurance, mortgage funding, depository services, securitization, personal banking etc. Technology is that the key to devisal towards providing integrated banking services to customers. Indian banks are late starter within the adoption of technology for automation of processes and therefore the integrated banking services. Further the banking sector reforms and introduction of e-banking has created terribly structural changes in commission quality, social control choices, operational performance, profitability and productivity of the banks. There are a unit varied factors that have vie very important role within the Indian banking sector for adoption of technology.

Further, new technology has chop-chop altered the standard ways in which of doing banking business. Customers will read the accounts, get account statements, transfer funds, purchase drafts by just making a few key punches. Availability of ATMs and plastic cards, EFT, electronic clearing services, internet banking, mobile banking and phone banking; to a large extent avoid customers going to branch premises and has

**Provided a wider vary of services to the purchasers.**

Mobile banking may be a system that permits customers of an institution to conduct variety of monetary transactions through a mobile device like a transportable or personal digital assistant. Banking apps will build bill paying and checking account management unbelievably convenient, however the danger of fraud may be a major draw back. Fortunately, it's easy to avoid most of the pitfalls with commonsense solutions like strong password protection and secure connections. By keeping these security tips in mind, you'll get pleasure from a safer mobile banking expertise

## Innovative Ideas For Organizational Development

Samruddhi S. Malani

College of Management and Computer Science, Yavatmal

### Abstract

As people nowadays do not know what is meant by organizational development. The main objective of studying this research paper is to make people aware of the importance of organizational development for the benefit of organization, increase in employee development. In order to achieve strategic goals more effectively and efficiently, the organization needs to be developed by new innovative ideas. In this paper we will study about some new innovative ideas which can be used for organizational development and helps it to stand in competition.

**Keywords:** Innovative, Organization Development, Ideas

### Introduction

Organizational development takes a look at success of organizational change and performance with creative innovative ideas and strategies for organizational development. Organizational development is defined as the use of organizational sources to enhance performance and productiveness inside the place of business. A powerful organization also can boom worker morale because employees can experience extra empowered and valued while our business enterprise is properly structured.

The reason of organizational development is to make an organization higher respond and adapt to industry / marketplace changes and technological development. Organizational development is a systematically incorporated and deliberate technique to improve the effectiveness of the business enterprise.

Organizations are challenged by change. The world is moving faster and faster. Therefore, organizational development is very important to expand the productivity of the firm. The importance of organizational development also extends to the way you solve problems within your company, as well as analyze the ways in which you can figure out more efficient ways of doing it.

### Organizational Development Characteristics

#### Objectives of Organizational Development:

- To increase the level of satisfaction and commitment of employees in the organization.
- To increase cooperation and collaboration among contributors in organization.
- To increase the level of trust and support among organizational contributors.
- To increase the level of personal enthusiasm and satisfaction within the organization.
- Improving organizational performance as measured by profitability, market share, innovation, etc.
- Make organizations better suited to their environment which are always changing.
- Prepare members to face organizational problems and contribute to creative solutions to organizational problems.

### Needs Of Organizational Development

Organizational development is a dynamic technique. It uses behavioural knowledge to help organizations easily adjust to changes. Every organization needs to be viable and survive in a world of change. To be effective, business owners need to have different approaches to innovation, learn from their past mistakes, and set appropriate goals. OD has evolved rapidly in response to this need of organizations.

- Helping to make organizational culture more responsive
- In the production process, it provides opportunities for people to work instead of human resources.
- Give each member of the organization the opportunity to develop their full potential.
- Wants to make the organization more effective to meet all its goals.
- Gives people in the organization the opportunity to influence how they relate to work, organization and work environment.
- Treats each human being as an individual with a complex set of needs, all of which are important in his or her work and life.

### Importance Of Organizational Development

- OD is very important for expanding the firm's productivity.
- It facilitates change in the organization (for the better) by analyzing various problematic situations and helping to find efficient solutions.
- It is targeted at product innovation and overall efficiency is improved, and although it requires generous investment of time and capital, it is worth it.
- It helps foster a sense of equality, trust and cooperation among members, reducing conflicts, thus aiming to create a remarkably confident and united staff division.
- It is an important tool that drives corporate development.
- Numerous new ideas have been incorporated to improve OD, some of which include development of technology, establishment of quality control, implementation of detailed plans, competitive analysis, comprehensive research of target market, etc.

### Research Methodology

A research methodology involves specific techniques that are adopted in the research process to collect, gather, and evaluate data for the purpose of making business decisions. It defines the tools used to collect relevant information in a specific research study. The methodology might include publication, analysis papers, interviews, surveys and different analysis techniques, and may include each current and historical information.

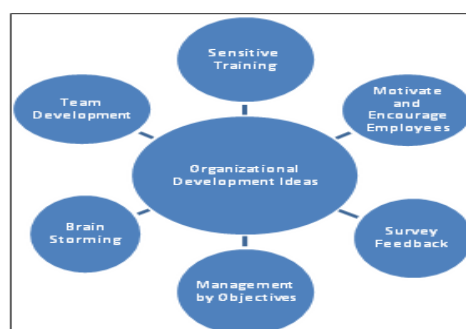

### Research Objective

- Make organizations better suited to their environment which are always changing by creating new innovative ideas.
- For increasing a business's effectiveness organizational development is necessary.
- To increase the overall problem solving ability of the organization for successful results.
- Employing new methods to improve the firm's current operations by using the new ideas.

### Innovative Ideas For Organizational Development

"Every industry is being challenged by dynamic globally and technology is undergoing change". Today's executives need to prioritize innovation and motivate their employees to think and act like entrepreneurs.

Innovation provides a culture of creative thinking that enables your workers to think beyond the regular constraints of their work and do something new and unique. It is essential for the growth of any company. To implement innovation successfully, we need to know how an innovative organization is made as well as how it contributes to its development.

Here are some innovative ideas given below:

**1. *Train Employee in Design Thinking:***

What companies can take to inspire innovation is using design thinking.

"I think design thinking is an important skill that all employees should be trained in".

Design thinking is a customer-centric approach to brainstorming new ideas and solving problems - and a key component for lean innovation.

Design thinking can spark creativity and provide group with a better understanding of their person. Senior leadership feels that rather than creating problems, employees can develop and deliver products that they know their customers want.

**2. *Re-Humanize The Work:***

Innovation stems from creativity and vulnerability. People want to feel safe to fail which will be each innovative and vulnerable. Therefore, ensure all leadership, puts humanity at the centre of the task. Deliberately build trust, prioritize learning, and create inclusive growth spaces and model behaviour that illuminates the humanity of risk and failure.

**3. *Provide Your Team With The Resources To Implement Innovative Ideas:***

Make it possible for your workers to convert their ideas into reality. Without the right resources, even the best ideas fall flat.

The world's most innovative companies invest in their R&D department to allow their creative team to execute innovative concepts for future product development.

**4. *Look To Other Areas Of The Marketplace:***

Organizations often turn to other companies within their industry to brainstorm or emulate them. Instead, look for information and ideas in places where you least expect to turn up. To conduct due diligence on companies thriving in other areas. Discover new ways they engage their employees, new apps that their customers use, and various processes that create efficiencies.

**5. *Develop An Accommodating Leadership Style:***

As the leader of a company, it is your responsibility to promote and nurture the attitudes of your individual team members. Being a leader, you cannot develop a culture of innovation if you fail to show them the path to innovation through your attitude and behaviour.

Expecting your workers to give you more in less time is one way you kill your workers' desire to do something extraordinary. When you prefer short-term results over the long-term benefits of innovative ideas, you will kill their innovative spirit.

Instead of resorting to the 'do more' approach, you need to give your employees room to experiment and learn so that they can improve.

Remember that innovation develops by trial and error and it demands an investment of time. But when you deprive your employees of time, you urge your employees to learn different perspectives about their work.

**6. *Give Your Workers A Sense Of Freedom:***

Employers enforcing the rules stifle the creativity of their employees. This limits the freedom of your most valuable assets and they will feel reluctant to ever think outside the box.

The essence of an innovative organization lies in the ability of its employees to make a contribution to the creative process of the enterprise. As a company, you need to give your workers autonomy to practise their novel ideas.

It invokes a sense of freedom that can enable your employees to separate themselves from the clutches of applying hierarchically so that they can focus on new ideas to execute their day to day tasks.

**7. *Invest Your Time In The Creative Nourishment Of Your Workers:***

The essence of innovation is achieved when you are able to show your workers a path that leads to creativity. Do not preach the importance of creativity only to your team. Rather display specific ways to find creativity so that they can implement innovation in their work.

For example, you can dedicate a day to inspire your workers to experiment with new ideas. Similarly, you can organize weekly workshops to encourage your employees to brainstorm for the upcoming project.

Google was one of the first companies to build a business model based on innovation.

**8. *Allow Your Employees A Chance To Fail:***

Failure is a part of the learning process. If you punish your employees for making mistakes, you fear them for failure. Such an approach greatly affects their ability to come up with creative ideas.

**Fear cannot cultivate creativity.**

When you give your employees room to make mistakes, you are allowing them to think independently without any fear. So they are able to think beyond the limits of their jobs.

**9. Acknowledge The Contribution Of Your Employees:**

Employees feel important when you recognize their efforts. Likewise, if you need to promote a culture of innovation in your organization, you want to implement an incentive-based policy that rewards people on the degree of innovation in their work.

This type of policy will make your employees feel appreciated for their innovative efforts and it will pave the way for a culture of innovation in your organization.

Rather than these there are some other innovative ideas for the development of organization:

- Motivate your team
- Encourage diversity
- Provide the proper tools
- Reward creative talent
- Should have a leadership team that inspires ideas
- Should have an artistic workplace
- Improving operational systems of an organization
- Pursue New Business Categories
- Don't Be Afraid to Experiment

However, innovation is not a temporary thing and is a long-term strategy that demands an investment of your time and efforts. Therefore, if you want to ensure that your organization is benefiting from the positive results of innovation, then you need to implement the above innovative ideas.

**Conclusion**

Today's organization needs to prioritize innovation for its development. But these innovations require a certain level of risk. If an organization does not take risks, it will not succeed, because in these eras, innovations are required to remain in the system. An organization must "Dare to Strive" and implement innovative ideas for its development. This paper concludes various ideas and can be applied in its process for organization development.

## Total Quality Management And Its Impact On Banking Sector

**Shubham Subhash Kane**

Department of Management, College of Management and  
Computer Science, Yavatmal.

### Abstract

*After the successful implementation of Total Quality Management (TQM) in manufacturing, the service sector has been started to adopt the process on a very large and extensive scale in order to improve business productivity. This study emphasizes and aims to uncover the impacts and characteristic of the Total Quality management in the banking sector. Highlighting the significance and major impact of quality on banking services as a tool to improvise the competitiveness of banks and also thrives to bring the attention of the significance of benefiting from the implementation of TQM in banking sector. A detailed review of literature has been carried out special reference to the banking industry.*

*Key Words: Total Quality Management (TQM), Banking.*

### Introduction

Total quality management (TQM) is a firm-wide management philosophy of continuously improving the quality of the products/services/processes by focusing on the customers' needs and expectations to enhance customer satisfaction and firm performance. There are mixed results about the relationship between total quality management practices and performance. [1]

Total Quality Management (TQM) considered as a main tool that leads to the strategy of developing work and improving performance in order to achieve profitability through good services and quality products. It can be defined as the continuous improvement of administrative and productive processes through reviewing and analyzing the results achieved, and searching for other means and methods to raise the level of performance and try to reduce the time and effort for the completion of production processes by eliminating all unnecessary functions for consumers and for the productive process to reach the required level of total quality. [2]

In order to gain competitive advantages in today's market scenario, the quality factor is the most important aspect to consider. The quality is the only factor that can differentiate a firm from another.

The concept of TQM focuses on quality as a whole. I.e. it is not sufficient to have a quality output from only one department of an organization, but the organization should collectively work on quality improvement standards.

### Tqm And Banking Industry

In today's competitive era, the Quality management has become an essential aspect. Being one of the most fast growing and important sector, banking sector cannot be kept far away from the concept of Quality Management. The idea of Total Quality Management has also been adopted by the banking sector in recent years. The huge amount of operations and vast technological development and improvements in electronic and online services has also made it necessary for the banking sector to focus on quality development. The concept of banking service quality includes many other aspects, but all of them can be divided into four conceptual categories: customer service, banking services, electronic services, and automated services. [3]

It becomes very important to examine how Customer and Employees of the bank looks after TQM in banking sector.

### Customer's Perception About Tqm:

In today's era of huge market expansion and digitization, the banking sector is one of a common sector that most of the people have access to. Due to globalization and standardization in lifestyle of customer, the common people are seemed to increasingly use the banking services. The customers being from various backgrounds, different thought process, different priorities judges the banking quality depending upon the expected and actual performance of the banking sector. Usually, customer's expectations regarding service quality are based on his personal view and his previous experience with other service providers. [4] In order to increase the customer satisfaction towards banking process, the banks should focus on identifying the exact needs of the customer and should also identify the ideas to fulfill those needs. According to the customer's view, the level of expectation may vary depending on various factors like:

- Banking Services: The expectations are: Banking Services, Ease of access, Ease of Process, Flexibility in process.
- Bank Staff: The Expectations are: Politeness, Helpfulness, Knowledge, Professionalism, Understanding and Speed of Operations.
- Bank Image: The Expectations are: Trust, Reliability, and Repute of the bank, Social Duties awareness and Participation.
- Bank Expenses: The Expectations are: Reasonable Services and interest on finance services.
- Bank Technology: The Expectations are: Availability of reasonable and soundly secured technological facilities like, credit cards, ATMs, Debit Card, Internet Banking.
- Bank other Services: Expectations are: Ease of availability of Facilities like Insurance, and Facilities like Mutual funds.

### Employees Perception About TQM In Bank.

In order to sustain in today's global competitive era, the optimum use of the resources is one of the most important aspect to take into consideration. The Human Resources in the banking sector plays a significant role in the optimum utilization of resources.

The Human resources are the key to the success of an organization. Especially in banking sector, the human resources play an important role in customer identification and retention. The employees are the people who are responsible for the relationship building with the customers. But to do so, the banks also need to provide a proper support and should take care about the employees getting a proper work environment and Quality work Life (QWL).

The work environment plays a key role in the employee satisfaction which directly affects their efficiency levels either positive or negative manner. In order to keep the efficiency of the organization high, it is the responsibility of the bank to keep the employees happy and satisfied. This healthy balance is important to reduce the employees stress and make a great motivation for them to perform in the best possible way. [5]

Every organization has its own methods to improve the quality of work life, but there are eight broad criteria of employment that considered as necessary factors for all employees from different sectors including the bank sector. [6]:

- Healthy and safe work environment.
- Appropriate Compensation.
- Assistance in enhancing skills and talents.
- Equal opportunities.
- Unbiased work culture.
- Protection of employees' rights.
- Balance between work and personal life.
- Employee safety and future certainty.
- Involvement in decision making.

For bank sector, there are additional aspects must be taken into account to improve the QWL. Effective management gives all the employees a chance to contribute in decision making process to improve the general performance and to make them feel that success is everyone's mission. Employees' appreciation is also a significant aspect and it is not only about providing good salaries to the employees but recognizing their work, giving them enough benefits and bonuses according to their productivity. It is also important for banks to ensure providing all facilities that help to do the work as required and provide suitable solutions for all kinds of problems. Banks should make a healthy competitive environment for their employees and encourage them to develop their capabilities and skills which will help them to reach the maximum success [5].

Improving QWL faces many difficulties like opposition to change, high costs, fear of less productivity, unfair competition and staff comparison, regional prejudice, and distrust of evaluation criteria and promotions. All these could hinder banks from achieving a good QWL for employees which leads to decreasing their enthusiasm to work and providing highest effort to reach the organization's goals [6].

### Implementaing TQM in Banking Sector

For achieving a competitive quality level requires using many methods, tools and skills of quality science and it may differ from bank to bank according to its internal and external condition. In order to implement quality in banks, the management must restructure its policies and procedures to attain a specific goal. The management must involve all the staffs in the planning and policy formation.

These systems must be created in particular and it needs training programs, including senior management, middle management and the rest of the employees. Once specific objectives have been reached, new improvement targets are set to keep continuously upgrading of performance level. It is worthy to mention the necessity of having a high professional management team that can successfully manage the whole process of improving the quality. [2]

TQM in banks is a wide issue that includes many dimensions that must be considered when implementing quality [7]

- Reliability  
Completing operations efficiently and effectively from the first time to win the customer trust
- Response level
- The rapid response of employees to the customers' demands and decreasing the delay as possible as it can
- Employees' qualification  
Staffs have adequate capabilities to provide a distinct service to customers.
- Accessibility  
Easy access to the service providers and contact them
- Communication  
Exchanging of service information between service providers and customers
- Priority  
Taking into consideration the interests and needs of customers.
- Safety  
Preparing for potential risks and making suitable plans to face any kinds of problems
- Caring  
Making all efforts to comfort the client  
Physical Material and human  
The outward appearance of equipment and personnel

### The Impact Of Total Quality Management In Banking Sector

The positive impact of Quality management in other organizations have attracted and encouraged banking sector for focusing in the quality of service.

The quality of services plays an important role and primary factor in ensuring the survival of the bank with the other competitors in the market. Customers have a wide range from banks and they would only choose the banks that provide best services in terms of quality, reliability, and profitability and bank which is at par with international standards. [3].

Maximizing customer satisfaction through quality customer service has been described as the ultimate weapon by Davidow and Vital (1989). [8]

The TQM is extremely important to achieve the quality, providing a best service can be considered as pre-requisite to survive and success of banking sector since the performance of banks is significantly and positively linked with the service quality. [2]

### Quality Of Service In Banking Sector

In today's era of vast and limitless markets, the service industries being intangible in nature have to focus constantly on the quality of service in order to succeed in long run. The quality of service in banking industry is not limited to customer satisfaction but it also expands to increasing the customer's expectations. Therefore, the Banks have to commit towards continuous improvement of their service that provided to customers. Following are some of the categories related to banking.

- Customer service quality
- Banking service product quality
- Grievance Handling Quality.

**1)Customer service quality:** The main factor in assessing the performance of banks is the quality of their services (quality: customer or client satisfaction). A common definition, proposed by Parasuraman, Zeithaml and Berry "is that customer service quality is the deference between the bank's performance as perceived by the customer and the level of performance that the customer expected "[9]

The current global trend is to satisfy the client's expectations in terms of quality is to achieve his satisfaction, and to ensure continuous improvement of quality to keep the outstanding performance against competitors. In the era when technology can facilitate the intense competition, it is necessary for the banks to focus on improving, controlling and measuring their service quality continuously. Therefore, any bank that seeks excellence must achieve a distinguished level of service that meets the ever-changing requirements of its

customers to satisfy them. This can only be achieved through the introducing of quality systems that initially required training program for senior management, middle management and the rest of the employees. In addition, the banks should emphasize deeper permeation of the current customers' database since the data about customers and their needs can help the industry to identify the existing key customers, future customer and building relationship with them. [3].

**2) Banking service product quality:** Banking service product quality plays an important role in determining customers' perceptions of the overall banking service quality, and it is primarily associated with product variety and diverse features. Banking service product quality must tend to provide the best services without knowing what the customers really want and expect from them. [10]

This service may vary from financial transactions, paying bills electronically and automatically, viewing their balance, monthly bank statements, purchasing shares and insurance, home loans with minimum rate of interest, purchasing cars and lands. And the bank customer wants these services at one site with ease. Differentiation and innovation in the quality of bank products can be the key of attracting new customers and enhancing customers' satisfaction. Therefore, it may contribute to the competitive advantage in the banking industry. [3]

**3) Grievance Handling Quality:** In today's competition, the level of competition is tremendously high. Reducing the errors is the key motto of every organization. Banks now days are constantly taking efforts in order to create a flawless banking process. The overall quality of banking can be directly related to the grievance handling mechanism.

In the first place the customer desires an error free service. But there are always chances of flaws in banking system due to tremendous data processing. In such instance it becomes very important to handle these errors effectively as this directly affects the customer satisfaction levels.

## Conclusion

The term quality is a crucial term in case of banking. Having a very huge number of customers and sensitive data, errors directly affects the workability, customer satisfaction and goodwill of the bank. Having such sensitive data to handle, the banks need to find out the flaws and chalk the same one by one without affecting the current system. In order to identify the flaws in the system, the banks have to continuously improve the system.

Improving the quality in banking is a multidimensional factor. Banks cannot focus only either on customer satisfaction or internal banking quality. Both the dimensions are equally important for quality management in banks. The banks must analyze these factors carefully and should improve their respective systems in a continuous manner.

One more important dimension for quality improvement in bank is the grievance handling mechanism. The banks should continuously improve the systems in order to create a flawless systems. But as being a sector with huge public access there are always chances of errors. The banks should carefully and speedily handle such errors and should build a strong mechanism for grievance handling mechanism

## Use Of Cloud Computing In Education

Prof:-Sarika R. Maskare

College of Management And Computer Science, Yavatmal

### Abstract

Cloud computing is the technology where we can use computing resources like hardware and software that are delivered as a service over the Internet as per user's requirement. It also provides computational platform, infrastructure and storage which are demanded by the user according to their requirement. The application of cloud computing is growing daily because of many advantages to the users, and is driven by the increasing use of various mobile devices (laptops, tablets and Smartphone) and mobile Internet access being more available. Now many education institutions are facing the problems with the growing need of IT and infrastructure. Cloud computing is an emerging technology and relies on existing technology such as Internet, virtualization etc. and can be a solution to such problems by providing required infrastructure, software and storage.

In this paper a basic research has been carried out to show how cloud computing helps in the field of education to improve teaching, learning and have a cost-effective infrastructure. It can bring a revolution in the field of education. It also tries to bring out its benefits and limitations.

Keywords: platform, infrastructure, Internet, cloud computing, virtualization

### Introduction

In Education LMS, E Library, universal Digital Library & other E learning Resources could be used for providing both skills based & knowledge based training for students. Similarly a large percentage of our graduate could be made employable through online training and online classes. It provides Smarter Classroom with Cloud computing facility which enhances open source learning and tries to strengthen network services. The cloud helps students, teachers, faculty, parents, and staff to have on-demand access to critical information using any device from anywhere [2]. This means that in the future the majority of educational services will be provided in the cloud, and the educational institutions do not have to have its own computer centers with expensive hardware, costs for electricity, salaries of staff and computing resources that are not always at full power. It also creates a personalized learning environment or virtual communities of teaching and learning [1]. Cloud computing provides shared resources, software and information through Internet as a PAYGO (Pay-as-you-go) basis. At present, as many universities are trying to update their IT infrastructure and data, but they are facing few challenges which can be solved by cloud computing. The challenges were: [3]

- 1) Cost: choose the subscription or PAYGO plan.
- 2) Flexibility: cloud computing allows to dynamically scale the investment in infrastructures as demand fluctuate.
- 3) Accessibility: making the data and services available publicly without losing the sensitive information

### Services Of Cloud

Services of cloud computing is divided into three separate categories [4]

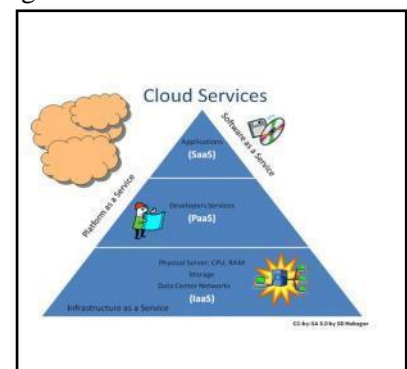

- Infrastructure as a Service (IaaS)
- Platform as a Service (PaaS)
- Software as a Service (SaaS)

The lowest level is called the Infrastructure as a Service (IaaS).

At this level, students, faculties or researchers can get the basic computing resources, such as processors and storage devices- and use them to create their own operating systems and applications.

The next level is the Platform as a Service (PaaS). Here platform is provided by the service provider so that users can install their own applications on the platform. e.g. Google Apps Engine. It allows developers to create and use applications in Python.

The next level of cloud computing is called the Software as a Service (SaaS). It is this layer that is of most interest to educational institutions. The "cloud" here means not only the data but also the associated applications, and the user requires only a Web browser. The best examples of this approach are Google Apps for Education and Microsoft Live@edu which provides support for communication software and Office applications such as e-mail and spreadsheets.

## Cloud Providers

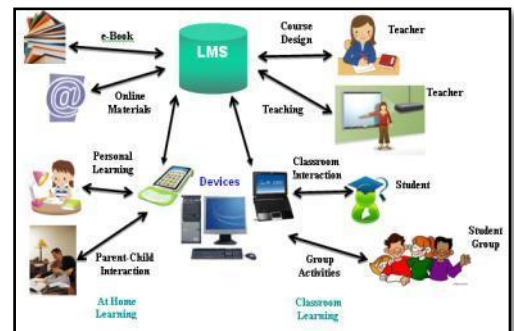

- Amazon web servers (AWS): it is most popular and it provides the most of the compute services as compare to other servers. Because of the flexible pricing and other services it is providing it becomes the global leader in cloud computing
- Microsoft Azure
- Google cloud platform (GCP): it is also very popular and cheapest cloud provider.
- IBM cloud
- Digital ocean

There are many other cloud providers today and will be tomorrow but these are some of the major and earlier cloud providers.

## LMS

A learning management system (LMS) is an application software for the administration, documentation and delivery of educational courses, training programs or learning and development programs[5]. The learning management system concept is emerged directly from e-learning. The first LMS is applied for the higher education sector. The first introduction of the LMS was in the late 1990s [6].

They help to create, administer, distribute and manage all of the activities related to e-learning. This technology makes the classroom experience much more powerful. It offer teachers and students a Virtual Campus which is personalized and unique that's why it makes LMS classrooms a success in education and learning experiences. LMS makes learning a real experience.

## Advantages of LMS

1. It's easy to implement an LMS  
LMS is a piece of software which is easy to implement in your educational institution. It brings together under one platform all academic programs, subject study guides and trainings done easily.
2. Better involvement of teachers and students  
Here teachers can upload assignments and papers or lectures in any format which student can get anywhere and can answer to those questions or chat on the topics of lectures so that both of them are involved.
3. No need for LMS training  
LMS are easy to learn because its interface is very user friendly so that all can use new tools or features which may not have used previously. It is an easy tool which doesn't require training or a manual. Students and teachers alike can take to it like a duck takes to water.
4. Portability  
It's possible to access the LMS from anywhere with an internet connection from any device, be it a computer, tablet or smartphone.
5. Improving the learning experience  
LMS is a virtual space created for learning and also makes learning a more complete experience. The results of training and education with LMS guarantee successful training as well as motivating students.

## Other advantages of LMS include:

- An LMS supports content in various formats like text, video, audio, etc.
- The evaluation of students is easier and fair, based on student attendance and online quizzes.
- Students and teachers can re-use the material every time they need.
- Students can learn collaboratively by setting up a School website with the LMS software and helps "Keeps organizations up-to-date with compliance regulations.

## Examples of Cloud Computing Educational Products

Moodle is a free and open-source learning management system (LMS) written in PHP and distributed under the GNU General Public License[7]. Moodle is used for learning, distance education, flipped classroom and other e-learning projects in universities, schools, workplaces and other sectors[8].

Microsoft Live@edu is a program that provides staff, students, faculty, and alumni long-term, primary e-mail addresses and other applications that they can use to communicate online at no cost to education institutions[2].

## Conclusion

The cloud allows us to access our work from anywhere, anytime and can share it with anyone. It gives us liberty from needing a particular machine to access a particular file or an application. In the present paper a cloud education system is introduced and how it is benefited to students, faculty and the educational institutes for providing quality education. There is no doubt that the introduction of cloud computing into education is feasible & brings us the approximately infinite computing capability, benefits to the students but a further work can be done to choose for the best solutions according to our needs among the number of choices we have available online.

## A Review On Attacks And Prevention Technique In Cyber-Physical Network Systems

Prof. Ms.Kanchan Baban Korke

College of Management and Computer Science, Yavatmal ,Maharashtra , India

### Abstract:

In Cyber Physical Networked Systems, the Foe can infuse false measurement into the controller traded off sensor hubs, which not only beacon the security of the system, but also consume network resources. To manage this issue, various in transit sifting plans have been intended for remote sensor systems. Be that as it may these plans either need versatility to the quantity of traded off hubs or rely on upon the statically designed courses and hub limitation which are not compactible for CPNS. In this inventor, we propose a system, which can channel false vaccinated information adequate & achieve high resilience to the number of compromised nodes without depending on static courses & hub limitation. A review on attacks and prevention technique have been done in this paper.

**Keywords-** Wireless Sensor network system, data injection attack, sensor networks, Routing Protocols.

### Introduction:

Wireless sensor network (WSN) is assurance of facilitating real-time data processing in complex environments. WSN is consisting of the nodes where nodes are connected to one or more several sensor nodes. These nodes are used in many applications like monitoring environment conditions, factory performance and continuous communication for military [1]. The security work till now focuses on denial of communication at the routing or medium access control levels [2]. The life of network plays a crucial role in such applications. Many researches focus on increasing the lifespan of WSN [3].

In this paper we see the various types of attack and its detection techniques. Section 2 describes various types of attacks. Prevention techniques for the attacks are described in Section 3. Section 4 gives performance evaluation and comparative analysis of the various attacks.

### Attacks:

#### A) Carousel attack:

In this attack, an foe sends a packet with a route composed as a series of loops, such that the same node appears in the route many times. This strategy in the network can be used to increase the route length beyond the number of nodes, only limited by the number of allowed entries in the source route. An example of this type of route is in Figure.

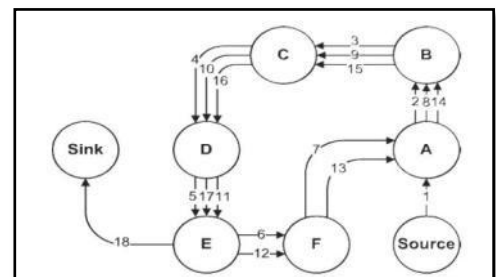

Fig.1 Carousal Attack

#### B) Stretch attack:

Another attack in the same vein is the stretch attack, where a malicious node constructs artificially long source routes, causing packets to traverse a larger than optimal number of nodes.

An example of this type of route is in Figure. The outcome becomes clearer when we examine Figure and compare to the carousel attack. While the latter uses energy at the nodes that were already in the honest path, the former extends the consumed energy "equivalence lines" to a wider section of the network. Energy usage is less localized around the original path, but more total energy is consumed.

Fig. 2Stretch Attack

#### C) False Data Injection Attack:

False data injection attack causes original data mix with irrelevant data or false data this will damage the integrity of the data and this type of attack is named as false data injection attack. Due to this addition of false data it will consume more energy of involve nodes and time comparatively original data required for transmission.

Sensors are usually deployed in unattended or even hostile environments, and an adversary may capture or compromise sensor nodes. Node compromise [5] occurs when an attacker gains control of a node in the

network after deployment. Once in control of that node, the attacker can alter the node to listen to information in the network, input malicious data, cause DOS, black hole, or any one of a number of attacks on the network. Once this happens, the compromised nodes can easily inject false data reports of nonexistent events.

**PREVENTION TECHNIQUE:**

**Data Security Management:**

The data security management of Prevention of False Data Injection Attack consists of the sensing report generation, measurement report generation and transmission, en-route filtering, and controller authentication. This will protect the system from attacks and it involve less energy and time consumption during transmission of data compared with the data transmission when attacks are implemented.

**Performance Evaluation:**

**A)Energy Consumption:**

**a)Carousal Attack:**

When carousal attack is implemented in the network, it causes the data to follow the unwanted loop of nodes of any number which was define by attacker, this leads the data to follow a number of loops of nodes instead of shortest path. It will consumes more energy and time.

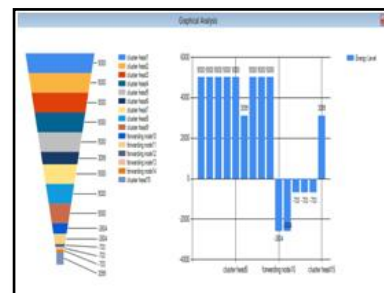

Fig.3 Energy Consumption of carousel Attack

**b)Stretch Attack:**

When the stretch attack is implemented, it causes the data to select the longest path from source to destination instead of shortest path, it also involves more consumption of energy and time .

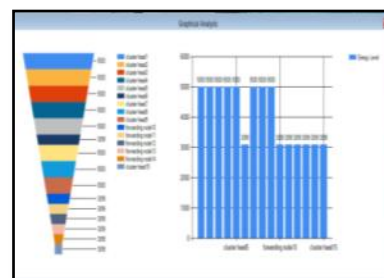

Fig.4 Energy Consumption of stretch Attack

**c)False Data Injection Attack:**

False data injection attack causes original data mix with irrelevant data or false data this will damage the integrity of the data and this type of attack is named as false data injection attack. Due to this addition of false data it will consume more energy of involve nodes and time comparatively original data required for transmission.

Fig.5 Energy Consumption of False Data Injection attack

**d) Prevention (Data Security Management):**

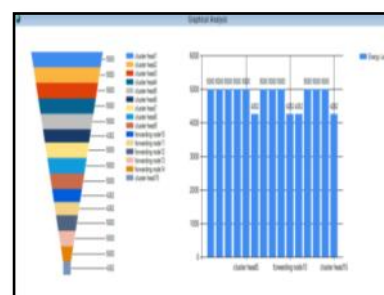

Fig.6 Energy Consumption after Prevention

**B)Time consumption:**

Here,the comparison of time consumption is shown below with the help of graph.

a) Carousel Attack

FIG.7 Carousel Attack Time Consumption

b) Stretch Attack:

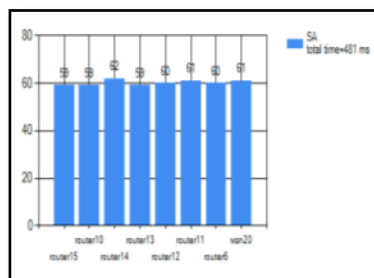

Fig.8 Stretch Attack Time Consumption

c) False Data Injection Attack:

Fig.9 FDI Time Consumption

d) Data Security Management

Fig. 10 Data Security Management Time Consumption

### Conclusion:

In this paper, I define various attacks as an resource depletion attack in which it consumes more battery of node. This attack not depends on any particular type of protocol. In this system use energy consumption and trust value of the node to mitigate attack. The simulations results show that we are able to detect the attacks on the basis of energy consumption and prevent these attacks by using trust factors for security routing. The prevention technique protects the system from attacks and it involves less energy and time consumption during transmission of data compared with the data transmission.

## A Review Of 5G Technology

**Prof. Aparna Rajiv Kapse**

Dept. of Comp. Sci., College Of Management And Computer Science,  
Yavatmal, Dist- Yavatmal, Maharashtra, India.

### Abstract:

*Wireless communication has become the need of current generation era.*

*However the next generation communication network demands for a network platform with faster data rates and higher capacity .the future of wireless technology seems to be a seamless interaction between humans and billions of intelligent devices. 5g wireless technology will definitely bring the revolution in the wireless network .It promises a rich, reliable and hyper connected network .5g communication system provides a far higher level performance than the previous generation of mobile communication systems. It is just an another level of mobile communications evolving from 1G,2G,3G,4G and now 5G. The paper throws light on the development & evolution of different generation of mobile wireless technology beside with their significance and advantages of one over other. The current focus into the mobile wireless technology concentrates on further implementation of 4G technology and 5G technology.*

**Keywords:** 1G – 5G , 5G network, 5G technology

### Introduction:

Mobile wireless industry has begins its technology creation, revolution and evolution since initial 1970s. In the earlier a small number of decades, mobile wireless technologies have experience 4 or 5 generations of technology revolution and evolution[1] .6 billion community acknowledge mobile phones hence we are going to analyze the different generations of cellular systems as studied in the evolution of mobile communications from 1st to 5th generation. We can analyze that this could be due to increase in telecom customers day by day. In present time there are four generations in the mobile industry These are 1G, 2G, 3G, 4G&5G[1]. Nowadays various wireless and mobile technologies are present as third generation Mobile networks LTE (Long Wi-Fi (IEEE 802.11 wireless networks), (UMTS- Universal Mobil Telecommunication System, cdma2000), term Evolution), as well as sensor networks, or personal area networks. The complete wireless and mobile networks implements all-IP principle that mean all data and signaling transfer by IP. Mobile terminals consist of interfaces like GSM which are based on circuit switching. Fifth generation technology give facilities camera, MP3 recording, videoplayer, audio player et that user never imagine and for children rocking fun with Bluetooth technology and Piconets. 5G Mobile multimedia internet networks will be fully wireless communication while not limitations that makes perfect wireless real world Wide wireless Web.& IPv6, LAS-CDMA (Large Area Synchronized Code-Division Multiple Access), UWB (Ultra wide band), MCCDMA (Multi-Carrier code Davison Multiple Access), Network-LMDS (Local Multipoint Distribution Services). The world of universal nonstop access to information, communication & entertainment will open new dimension to our lives and change our life style significantly. [2]

Fig1: Wireless Communication System

### Evolution Of Mobile Technologies:

In last few years Mobile communication has become more popular due to fast revolution in mobile technology. This revolution from 1G- first generation, 2G- Second generation, 3G- Third generation, 4G- fourth generation, 5G- fifth second generation.[2]

#### A) 1st generation:

1G introduced in 1980s. It contains analog system and usually known as cellphones. It introduces mobile technologies that is Advanced mobile telephone system (AMTS), mobile telephone system (MTS). It uses analog radio signals which enclose frequency 150 MHz, frequency division multiple access (FDMA) by using this technique Voice call modulation is done .[2]

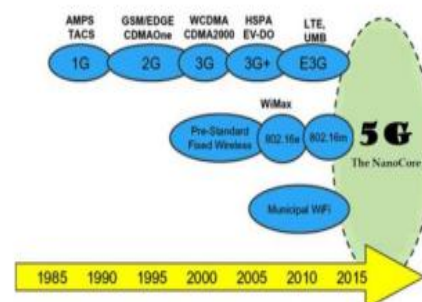

Fig 2 : Evolutional Changes in Mobile Technologies.[5]

**B) 2nd generation:**

2G is the second generation wireless mobile technology 2g commercial services were launched in Finland in year 1991. It uses digital signals for transmission of voice and its speed of 64 kbps. It provides resource of SMS (Short Message Service) and use the bandwidth of 30 to 200 KHz. [2]

**C) 3rd generation:**

The 3<sup>rd</sup> generation uses Wide Band Wireless Network with increases clarity. The records are sent through the technology called Packet Switching. By Circuit Switching Voice call are interpreted. It operates at bandwidth of 15-20MHz range and 2100MHz and used for High-speed internet service, video chatting.[2]

**D) 4th generation:**

4G offers a speed of downloading 100Mbps. 4G provides equal features of 3G and additional services like to watch T.V programs with extra clarity, MultiMedia Newspapers, and send data greatly quicker than before generations [3]. LTE (Long Term Evolution) is considered as 4th generation technology.

**E) 5th generation:**

5G is the term used to describe next generation of mobile networks beyond LTE mobile networks. At least four major phone carriers in the US — AT&T, In near future the 5G technologies include all type of advanced features which makes 5G mobile technology most powerful and in huge demand. The large phone memory camera, MP3 recording, dialing speed, audio player and video player these all things are included in 5G technology. [1]

**5g Networks:**

5G network is incredibly quick and reliable. The idea of handheld devices goes to be revolutionized with the advent of 5G. Currently all the services and applications are going to be accessed by single IP telephony, gaming & other multimedia application. There is only need to make it accessible so a common man simply afford the profitable packs offered by the companies so 5G network could hold the authentic place. There's need to win the customer trust to build fair long term relation to make a reliable position within the telecommunication field. To compete with the preceding wireless technologies within the market. All the feature like telecommunication, mp3, camera in new mobile handset models. 4G is providing of this utility in mobile phone. By seeing the features of 4G one will get a rough idea concerning what 5G Networks could offer. There is a picture gallery, messenger and multimedia application that also the part of 5G. There would be no distinction between a PC and mobile phones [3].

Fig: 5G mobile phone [3]

**5G Mobile Network Architecture:**

Architecture of 5G is highly advanced its various terminals & network elements are characteristically raised to afford a new situation. Service providers can implement the advanced technology to take the value-added services easily. [1]

However upgradeability relies upon thought of radio technology its includes numerous important options i.e. temperature, ability of devices to spot their geographical location & weather, etc. radio technology acts as a beam that perceptively will catch and respond radio signals in its operational setting. It promptly distinguishes the changes in its environment and hence respond accordingly to provide uninterrupted quality service.[3]

**Architecture of 5G**

The system of 5G model is totally based on IP, wireless and mobile networks.

Fig : 5G Mobile Network Architecture

The 5g model system comprising of a true user/real user terminal so variety of

Independent and autonomous radio access technologies.[2] Each of the radio technologies is considered as the IP link for the outside world. In order to establish sessions between client applications and servers somewhere on the Internet, IP technology is designed primarily to control data for appropriate routing of IP packets related to a certain application connections.[4] To make reachable routing of packets should be fixed in accordance with the given policies of the user .shown in following image.

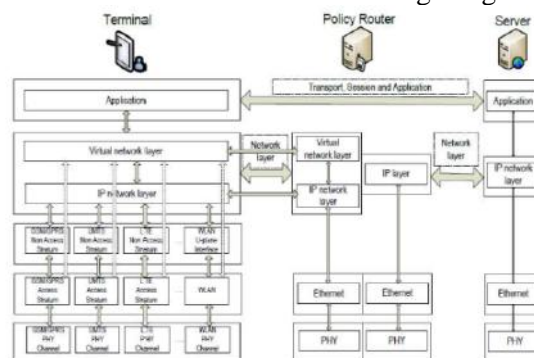

Fig : Master core technology

### Why Is 5G Required ?

The most important difference, from a client site of view, between present generations and probable 5G techniques must be impressive also than bigger most throughput other requirements include:

- Lower battery consumption.
- Multiple data transfer paths.
- Around 1Gbps facts appraise in mobility.
- More secure outshine cognitive radio/SDR Security.
- Higher system level spectral efficiency.
- World Wide wireless web (WWWW)

### Characteristics Of 5G Technology

- The technology 5G presents the high resolution for sharp, passionate faction cell phone every day and given consumer well shape and immediately Internet access.
- 1,000x bandwidth per unit area.
- To connect feasibility 10 to 100 number of devices.
- Worldwide coverage.
- About 90% reductions in network energy usage.
- Battery life will be much longer.
- Entire world will be in *wi fi* zone.
- The 5G technology for large amount of data distribution in Gigabit.
- The technology gives you 5G gateways carrier distribution to unprecedented maximum stability without delay.
- The consumer can also get a 5G comfort and relax by having a better speed and using remote control technology.
- The 5G technology besides cheer on virtual exclusive network.

### Applications Of 5G Technologies

1. Real wireless world with no limitation with access and zone issues.
2. Wearable procedure with AI capabilities.
3. Internet protocol version (IPv6) everyplace a visiting care-of mobile IP address is assigned according to associated network and location.
4. One unified global standard.
5. Network availability will be everywhere and will facilitate people to use their computer and such kind of mobile devices anywhere anytime.
6. Because of the IPv6 technology, visiting care of mobile IP address will be assigned as per the connected network and geographical position.

**Future Scope :**

5<sup>th</sup> generation technology is designed to produce incredible and remarkable data capabilities, unbroken call volumes, and large information broadcast inside the newest mobile operating system. Hence, it's a lot of intelligent technology which is able to interconnect the entire world without limits. Our world would have universal and uninterrupted access to data, communication and entertainment which will open a brand new dimension to our lives and can modify our life style meaningfully.

The upcoming enhancement of Nano-core will be incredible as it combines with AI. One can control his intelligent Robot by his mobile phone. Your Mobile type the message automatically what your brain thinks. We strongly persuade a fact everywhere we don't insist on any spectrum for communication. The Google hot trends have rated the character 6G as the 17th generally searched word in the search engines. The iPod 6G comes in seven various colors and has an aluminum body which makes the strong body with stand constant daily usage. 6G technology haven't been fully brought out yet but search phrases like what is 6G mobile technology, 6G technology, 6G mobile, 6G network, 6G wiki, are getting more familiar with new mobile technology getting growth.

**Conclusion:**

In this paper we conclude that 5G network is extraordinarily fast and reliable. The 5th wireless mobile internet networks are honestly wireless world which shall be supported by LAS-CDMA -Large Area Synchronized Code Division Multiple Access, OFDM-Orthogonal frequency-division multiplexing, MCCDMA-Multi-Carrier Code Division Multiple Access, UWB-Ultra-wideband, Network-LMDS- Local Multipoint Distribution Service, and IPv6. Fifth generation technologies offers tremendous information capabilities and limitless call volumes. Fifth generation make an essential differentiation and add more services and benefits to the world over 4G. Fifth generation more intelligent technology that interconnects the entire world without limits. This generation waited to be released around 2020. The world of universal unbroken access to information, entertainment and communication will begin new dimension to our lives and modify our living life style significantly.

## The Role Of E-Resources In Revised Naac Framework For Affiliated Colleges : With Reference To Learning Resources Center

**Dr. Ramanik S. Lengure**  
Librarian  
Renuka College, Nagpur

### Abstract:-

*As the entire process has become a ICT driven in new NAAC framework but there is a lot of use of e-resources in learning resource center. In this article the researcher has been highlighted on the revised NAAC framework and e-resources which shown the digital path for learning resources center in this ICT era in higher education. Out of 7 criteria, 4.2 is related to learning resources center which is important and based on ICT which is discussed about e-resources for users and the librarian also hence researchers want to highlight on this qualitative process and also attempt to suggest about boon for learning resource center which dwell with e-resources. The contribution in the criteria 4 as well as holistic contribution in different ways in all the seven criteria's. Library can strengthen their environment like ICT related activity like ILMS software, e-journal, e-shodhsindhu, shodhganga membership, e-book, databases, connectivity bandwidth, remote access, e-resources,*

*Keywords: - NAAC, ICT, LRC, E-RESOURCES*

### Introduction:-

It is a digital age. In this era while going to higher education electronic and digital knowledge is very important. When you think about higher education and simultaneously you think about quality services as NAAC, you should have ICT related knowledge. Everyday new technological advances affect the way information is handled in libraries in every aspect. Computing technology, communication technology and mass storage technology are some of the areas of continuous development that reshape the way that learning resource center access, retrieve, store, manipulate and disseminate information to users. The learning resource center has been from its inception an integral part of institutions of higher learning, rather than an appendix or adjunct. In this era when you want to discuss about quality that moment you look to NAAC quality. So, we should discuss about NAAC.

NAAC stands for national assessment and accreditation council launched revised process and revised process in July 2017 which is very easy and smoothly work for the field of education. Every college can apply for grading system in whole year but now window will open for two times in a year. You can apply for new process form NAAC websites and you should apply for NAAC for use by specific methodology.

NAAC is an autonomous accrediting agency established by UGC and it is a member of the International Network for Quality Assurance Agencies in Higher Education comprising of over 120 different national agencies engaged in Assessment, Accreditation and Academic Audit.

NAAC has been regularly updating and revising its assessment process to fine tune its grading pattern and assessment process in terms of the local, regional and global scenario as well as standardization of the practices which ultimately will lead to quality sustenance in the educational field. The revised process is being adopted on July 2017. NAAC infused spirit into its process of assessment and accreditation by associating its criteria wise pattern of assessment with key factors of transparency, pinpointedness, scalability, Student centric and pro-technology oriented. The onus of this technological advancement lies on the ICT enabled system adoption in the educational institutes and the major share of this will be through the work and services offered by the Libraries.

First you should know the eligible criteria for NAAC. It is very useful for every institution for NAAC. You should IIQA (institution information for quality assessment) and after pay specific fees. IIQA also shown your eligibility, which is most important for every institutions for their eligibility. When you read IIQA, it is very easy for us. After that you fill SSR Manual by complying some their instructions.

The Digital age coming with multi faces information which can changes in the learning resource field and it is reflected through the growing importance of libraries in quality assessment process of any educational institute. In this ICT age there is a great role of library services to users through information technology. Various ICT enabled facilities like internet, computer, mobile technology, Wi-Fi technology, Li-Fi technology etc. are easing out the various barrier of time, space and other physicality in establish the near to perfect rapport between the trio- Librarians, Learning Resources and Library Users. Thus information technology tools brought tremendous changes in all the fields in academic library services in enhancing academic library services effectively for users.

**Revised Accreditation Framework:**

NAAC has launched Revised Accreditation Framework since July, 2017 and hence AQAR format also modified, in cognizance with the new methodology. The tools and parameters are designed in the new AQAR format are in such a way that the preparation of AQAR would facilitate the HEI's for upcoming cycles of Accreditation. Data collected/prepared infuses quality enhancement measures undertaken during the years. Further, it also adds quality enhancement and quality sustenance measures undertaken in teaching, learning, research, extension and support activities of the Institution. It is expected that the new AQAR would facilitate Educational Institutions for creating a good database at Institutional level for enhancing the quality culture. The renaming of library as learning resource center is a part and parcel of the increasing role of ICT in libraries and the transformation of libraries from brick and mortar format to the digital datasets and virtual hub.

As per the Revised Accreditation Framework (RAF), the NAAC Accredited institutions need to submit the AQAR online. Similarly the marking pattern has become more objective by ICT integration in Assessment and Accreditation process.

New Revised format of AQAR: The new revised format has become more pinpointed and quantitative. Criteria IV of AQAR, section 4.2 covers information detailing about the library. ICT has been given importance in it and 20 marks has been allotted for section 4.2.

**Objective :-**

- To find out e-resources related in learning resource center

**Literature Review :-**

1. Dr. Kalyankar N. V. Gondwana University, Gadchiroli (2018) highlighted in Awareness workshop on assessment and accreditation by National Assessment and Accreditation Council, Bangalore (NAAC, 2005) is being organized Workshop by the Post Graduate Teaching Department of Gondwana University Gadchiroli. and published savior with ISBN-978-93-86623-34-8 of such nature provide a great opportunity to university fraternity, not only to update knowledge and keep obsessed with latest developmental scenario in the process of institutional assessment and accreditation by NAAC field, but also an occasion for the resource persons/delegates/ observers to exchange ideas and interact with each other.

2. Library and Information Services : A case Presentation -Workshop on identifying Best Practices in Library and Information Services held at NAAC 26 oct. 2005 (2 D) Pg. No. 35 The Principal Loyola College of Social Science, SreeKariyam, Thiruvannathapuram The impact of Information Technology (IT) is enormous and global in its magnitude. It has become an integral part of all aspects of the library. It has virtually unlimited potential for variety of useful applications in libraries as it significantly contributes to improved quality, increased productivity, more efficient operations, better resource sharing and more effective services to the users. Today, the success of a modern library is increasingly dependent on the most effective utilization and strategic management of new technologies in libraries. The best practice need to be constantly updated as the implementation of information technology Tools are used in libraries with the changes that are taking place in the information technology applications.

3. Accreditation Outcome – Emerging Issue for Policy Planning and Systematic Action in this book in the point iii) The state Support for Quality Assurance in Higher Education and focused on point 4 on page no. 14 – NAAC highlighted inter and intra universities communication linkage, internet connectivity, promotion ICT enabled teaching resources and administration:- University should be authorized by the government to act as the nodal agencies to engage some software company to connect all the colleges for all It functions in academics and administration. Adequate funding should be provided since the UGC allocation alone is not sufficient for the purpose.

4. Vidyawarta peer reviewed international refereed research journal special issue Jan-2019 ISSN NO.-2319-9319 Impact Factor 5.131 (NAAC sponsored IQAC national seminar on revised NAAC framework : Opportunities for Excellence in Higher Education- Renuka College, Besa, Nagpur – Internal Quality Assurance Cell) in this conference and peer reviewed journal discussed on revised NAAC framework : Opportunities for Excellence in Higher Education .

5. An international multidisciplinary quarterly research journal AJANTA peer reviewed refereed and UGC listed journal no. 40776 ISSN No. 2277-5730 Impact Factor and Indexing 2018-5.5 (NAAC sponsored IQAC national seminar on New NAAC Accreditation System for Aided and Self-financial Colleges in Rural Area: Challenges And Opportunities- Mahatma Gandhi Arts, Science and Late N.P. Commerce College, Armori, Dist, Gachchiroli ) 23 Feb. 2019. In this conference and peer reviewed journal discussed on New NAAC Accreditation System for Aided and Self-financial Colleges in Rural Area: Challenges And Opportunities.

6. International Research Fellows Association's Research Journey Multidisciplinary International E-Research Journal peer reviewed & Index Journal August-2019 Special Issue-194 Impact Factor- 6.261 ISSN No. 2348-7143 (NAAC sponsored IQAC national seminar on Understanding the Parameters of Standard Operation Procedure for Quality Improvement, Quality Assessment and Effective DVV Process – Yashoda Girls College, Nagpur- Internal Quality Assurance Cell) 24 August 2019 In this conference and peer reviewed journal discussed on New NAAC Accreditation System for Aided and Self-financial Colleges in Rural Area: Challenges And Opportunities .

Present research related paper has already been discussed in brief in the various Books and conferences, seminars, Workshop organized by various universities particularly different university, though social science faculty deep study on impact of revised NAAC process has also been carried out in the research of various faculties. But no evidences of the study of the Role of e-resources in revised NAAC framework for affiliated colleges: with reference to learning resource center

### Information And Communication Technology Tools / (Sources)

The term is something is used in preference to Information Technology, particularly in two communities, education and government. Although, in the common usage it is often assumed that ICT is synonymous with IT; ICT in fact encompasses any medium to record information.

Microform Storage Cabinet, Telnet, File Transfer Protocol, Newsgroups and message Boards, Chatting, Instant Messaging, Mailing Lists, WAIS, Gopher, ARCHIE, VERONICA, USENET, Microfilm Machine (reader com printer), Xerox Copying Machine, Film Slide Projector, Computer, Fax Machine, Printer (Black & While / Color), V.C.R., Television, Overhead Projector, PCs, Laptops, Inverter, Net book, CD-ROMs, Video-discs, Telephone, Internet, Scanner, U.P.S., Radios, Cable TV., Satellite Communication, Local and Wide area Networks, Computer Laptop, Printer, Plotter, WI-FI Connection, Digital Cameras, Web-Cameras, Video-Conferencing System, CD/DVD, Audio-Cassettes, Video-Tapes, LCD, Wireless Networks, Video Multimedia, Video Tapes, Computer, Internet, Digital Camera, Webcam, Smart Card, Scanner, E-Book, Printer, Electronic Journals, WEB-OPAC, Animation, CDROM, DVD, POP casting, Web Blogs, etc.

### ICT Environment And NAAC :-

The institute can strengthen their atmosphere and also allocate the funds appropriately for the ICT related activities like e-resources in the learning resource center, internet, number of computers available for teacher and students, resource sharing software, Language lab, Digital lab, up to date website of the institute, computer lab, Browsing centers, Computer Center, available band with, facility of e-content, link of videos and media centre and recording facility

### New Framework an opportunity for Learning Resource Center

NAAC assessment and accreditation framework in ICT application has been the prime focus in each and every activities of this ICT era. Henceforth we find all the criteria in some or other way ensures that ICT application percolates in various objectives, functioning, actions of HEI work pattern and results there off. If we look into the criteria wise detailed AQAR form then it can be found that each and every criteria is an opportunity for Libraries to make their role more essential. Given below is a brief proposition (criteria Wise) in this regard where libraries can contribute effectively:

It is observed the various learning resource center and try to explore the various activities which will really help Learning Resource Centre to carve a niche for themselves are as follows:

- Training session, Information Literacy programme
- Active feedback system
- Data building facility by way of Institutional Repository
- Regular audit practices in various ways like stock checking etc
- Online facilitation center in various ways and means
- Research ecosystem provider
- Publication hub
- Human resource training for the future
- Technical support of all sort
- Multitasking support
- Web support

**Discussions :-**On the detailed analysis of the new NAAC manual for affiliated colleges role of e- resources is very important for users through learning resource center.

**Format For Library In AQAR**

**Version 6 dated 26-09-2019**

Guidelines for the Creation of the Internal Quality Assurance Cell (IQAC) and Submission of Annual Quality Assurance Report (AQAR) by Accredited Institutions(For Affiliated/Constituent Colleges)

**(Revised on 26<sup>th</sup> September, 2019)**

AIQA report must be submitted NAAC committee every year. Then due to five-year AIQA is created college SSR. Both SSR and AQAR information should be same. Only then it will be honest work

It can be found that in the overall criteria wise AQAR marking format learning resource centre holds only 20 marks under the criteria 4. There are opportunities for new ICT developments in their working pattern and learning resources. ICT tools is important part in AQAR report some resource like e-book, e-Journal, Digital Database, CD & Video, Library Automation etc.

4.2 Library as a Learning Resource						
4.2.1 Library is automated (Integrated Library Management System -ILMS)						
Name of the ILMS software	Nature of automation (fully or partially)	Version	Year of automation			
4.2.1 Library Services:						
	Existing		Newly added		Total	
	No.	Value	No.	Value	No.	Value
Text Books						
Reference Books						
e-Books						
Journals						
e-Journals						
Digital Database						
CD & Video						
Library automation						
Weeding (Hard & Soft)						
Others (specify)						

**Key Indicator –**

**4.2 Library As A Learning Resource (20)  
ICT Waightage (13)**

Criteria	Metric No.	Key Indicator	Sub	Question	Weightage
Infrastructure and Learning Resorce	Q <sub>1</sub> M	Library as a Learning Resource	4.2.1	Library is automated using Integrated Library Management System (ILMS)	05
Infrastructure and Learning Resorce	Q <sub>n</sub> M	Library as a Learning Resource	4.2.3	1. e-journals 2. e-ShodhSindhu 3. Shodhganga membership 4. e-books 5. Databases	03
Infrastructure and Learning Resorce	Q <sub>n</sub> M	Library as a Learning Resource	4.2.5	Remote access to e-resources of the library	01
Infrastructure and Learning Resorce	Q <sub>n</sub> M	Library as a Learning Resource	4.2.6	Per day usage of library by teachers and students including e-Access(current year data)	04

**Weightage Wise Framework Of Learning Resource Centre Related E-Resources**

Learning Resource Centre holds its presence in Criteria 4 -Infrastructure and Learning Resources in section 4.2. Its weightage is 20 points and ICT waightage 13. The above table indicate e-resources wise distribution. Criteria, Metric No, Key Indicator, Subject, Question, Library Information and weightage point are the three representative columns under it. Metric 4.1.2 Q<sub>1</sub>M is focused on application of library software and details about 5 year's description about various learning resources. The Metric 4.2.2 Q<sub>n</sub>M is related to e-journals, e-shodhSindhu, Shodhganga membership, e-books and databases. As per as NAAC view it is mandatory for affiliated Colleges to have subscription of Inlibnet-National Library Infrastructure for Scholarly Content. There is 6000+ hundreds journals and 31, 35000 e-books. It is mandatory to purchase N-List programme for users as per NAAC guidelines. Through this programme e-journals and e-books also available for users for free of cost. Average Annual expenditure of last five years has been discussed in the Metric 4.2.4 Q<sub>n</sub>M. This criteria is to keep a check on qualitative and quantitative increase in the library collection every year. The Metric 4.2.5 Q<sub>n</sub>M is related to availability of remote access to e-resources of the library. Library Should have remote access for researcher. It is a good point for who already purchased N-List programme because all user have their user id and password and external users can use free e-resources from your library. This service is very important for users. They can use e-resources in library from any places though internet. The Metric 4.2.6 Q<sub>n</sub>M is related to percentage per day usage of library by teachers and students including e-Access (current year data). Its again good criteria. They want find out best possible process or strategy for those students and teacher who are regular visitors to the library in digital way.

Thus Library as a Learning Resource criteria wise holds weightage of only 13 points which reflects very good contribution of libraries and Learning Resource centers. A brief look at the gross marking pattern is as follows:

**NAAC Weightages, Criteria, Key Aspects And Grade Points**

Criteria and Key Aspects	Weightage (w)	Key Aspects Grade Points 4/3/2/1/0	Key Aspect Wise Weightage Grade Points
Criteria 4 – Infrastructure and Learning Resources (100)			
Physical Facility	30	2	60
LRC	20	4	80
IT Infrastructure	30	2	60
Maintenance of Campus Infrastructure	20	2	40
Total		100	240

The question arises whether this visible marking pattern is the only way for Learning Resource centre to score in the overall gradation system or it is beyond. The answer lies in percolating into all hooks and corners of the criteria framework and establishing the overall counterproductive efficiency and role of library as a quality enhancer element in the overall assessment and accreditation process. The above table indicate you can obtain maximum marks more than 20 marks

**New Framework An Opportunity For Libraries**

NAAC assessment and accreditation framework in ICT application has been the prime focus in each and every activities of this ICT era. Henceforth we find all the criteria in some or other way ensures that ICT application percolates in various objectives, functioning, actions of HEI work pattern and results thereof. If we look into the criteria wise detailed AQAR form then it can be found that each and every criteria is an opportunity for Libraries to make their role more essential. Given below is a brief proposition (criteria Wise) in this regard where libraries can contribute effectively:

It is observed the various learning resource center and try to explore the various activities which will really help Learning Resource Centre to carve a niche for themselves are as follows:

- Training session, Information Literacy programme
- Active feedback system
- Data building facility by way of Institutional Repository
- Regular audit practices in various ways like stock checking etc
- Online facilitation center in various ways and means
- Research ecosystem provider
- Publication hub
- Human resource training for the future
- Technical support of all sort
- Multitasking support
- Web support

**Conclusion:**

Revisions in the grading and marking pattern will be a continuous process but the role of learning resource center is undeniable. Learning resource center will be an important part of higher educational institutions. All the revisions in the NAAC framework has rather provided an opportunistic platform to learning resource center to showcase their role, importance, and continuous patronage to the academic field in wake of various changes and technological revolutions. Evolution and adapting to changes are the need of the hour and libraries have faced all the technological and other challenges and converted them into an opportunity and Libraries have sustained and remain important and its presence universalized in true sense. All the revision in the NAAC framework has rather provided an opportunistic platform and really revised NAAC assessment and accreditation system boon for learning resource center related to e-resources.

**Role Of Academic Library In Teaching-Learning Process In Higher Education****Dr. Sanjay J. Shenmare,**

Librarian

Shivshakti Arts, Commerce and Science College  
Babhulgaon, Dist. Yavatmal- 445 101**Abstract:**

*The paper tries to know the process of teaching learning, its facets, and the importance of teaching learning in the era of IT. This is a theoretical paper. Its key focus and emphasis are on how the academic libraries influence the changes to teaching-learning that will result from an e-education environment. Understanding the impact of e-classroom teaching, e-classroom learning and e-class education is seen as fundamental to moving us forward so that we can make greater use of the opportunities for teachers as well as students provided by the Internet. This paper points how the modern academic libraries provide technology-based information anywhere, anytime besides providing print & e-resources for innovative and life-long learning for the betterment of students, professionals. It also discusses the way the modern academic libraries are related to classroom teaching-learning and discuss the role of librarian as a teacher to assist the actual classroom teaching learning process.*

*Keywords: Stimulation, inspiration, subpar, splendour, Formal learning, Professional learning, proficiency,*

**Introduction:**

A college library is the heart of every academic institution and the backbone of teaching-learning process. The quality, growth, manners, etiquettes, human values, culture are greatly influenced by academic libraries through various library activities and services. The teaching learning process will certainly be lacking lustre without a good college library. An ideal college library provides stimulation and inspiration to both teachers, students as well as ex-students and parents which develops an interest in the subject and wider the thinking and living horizon of users.

**Higher Education:**

India's higher education system is the third largest in the world. Indian higher education is in need of radical reforms. It has witnessed rapid and impressive growth. The increase in the numbers is, however, disproportionate to the quality of education that is being dispersed. Unplanned over-expansion is often criticized as one of the biggest downfalls of Indian higher education in specially, rural area. A large number of institutions suffer from subpar quality in teaching-learning process in classroom education. As a result, the quality of education is not so far good. There is a need to give more emphasis on basis of higher education i.e. classroom teaching-learning which is now a days very rarely occur in any higher institution. And make the role of teacher more creative and active with the help of college library and librarian in IT and skill used area. The presentation in class is more attractive, knowledgeable, more fruitful to the students. This is done only when a teacher make friendship with an IT expert which is library person in the college.

**Role Of Academic Library:**

A modern college library must have a well-planned and functional library so that it became an intellectual hub of the institution for both the stockholders. The library provides the best company when we are free, lonely, bored and provides requisite supplementary material and extra reading to the users to understand the subject and get the required information. Academic libraries serve a practical role in sharing information resources. Academic libraries serve to allow instructors & users to share valuable reading material and expertise. Academic libraries serve an intellectual role along with cultural role in preserving and organising artefacts & ideas. A college library plays a very crucial & instrumental role in developing users, enhancing teacher's effectiveness in classroom in adopting the enormous mode of teaching which increases the classroom performance relatively. Academic libraries promote the individual as well as group learning. It also helps in developing student's vocabulary, enhance comprehensions, developing the habit of silent reading and problem-solving attitude of the users. Now a days, the role of academic libraries has increased and widened in so many ways, it functions as a Knowledge centre.

**Function Of Academic Library:**

A well-equipped academic library of a college, boasts of its utility in its splendour. Numerous books, periodicals, magazines and journals arranged in open bookshelves are a treat to eye and easy to approach. To inculcate the habit of reading, the students are advised from time to time by counselling and by various information literacy programs. The College library caters to the diverse needs of students in respect to reference material, competitive exams and intensive study of all the subjects and aims at rediscovering the love of

reading. It equips students with life-long learning skills and develops in them creative thinking and imagination & enable them to live as ideal and responsible citizen.

### Teaching Learning Process:

Academic library is fundamentally an organised set of resources, which includes human services as well as the entire spectrum of media. College libraries have physical as well as intellectual components. Academic libraries are bringing together people with informal, formal and professional learning missions.

Formal learning is a systematic and guided by instruction. Formal learning takes places in courses offered at college of various kind. Libraries serves are illustrated by their physical prominence that makes direct use of library services and materials. digital libraries open new learning opportunities for global rather than strictly local communities. Much learning in life is informal, opportunistic and strictly under the control of the learner. In the current scenario computing technology and worldwide telecommunication networks changed the individual pursue of personal learning.

Professional learning refers to the ongoing learning engage in to do their teaching work and to improve their class performance work related to knowledge and skills. It affects the job performance of a classroom teachers. The main information resources for professional learning are personal relation and human networks of colleagues nurtured through professional meetings and various communications.

Every library is different in terms of some of its internal process and policies. Therefore, an academic college library system must not poly be configurable but also customizable. The collection of the academic libraries is always dynamic in their volume, kinds, and velocity of growing. The modern academic libraries acquire numeric kind of information resources in multimedia formats and on various subjects. The digitalization of the physical resources has increased the utilization and quick admittance to information. the learners are also given access to databases of several renowned publishers, networks and subject gateways. Though it is easier to access several resources today, it is not possible for any user to identify, collect and read all full text of the related resources. Moreover, as some learners may be a novice in finding information by understanding their actual need, ambiguity can arise and as a matter of consequence wastage of a huge amount of user's time can occur. The role of librarian starts here to assist them in this regard. The current awareness service and selective dissemination of information of information service by using computer internet is helpful to users in this matter. the librarian can send these links on the email of the user.

Academic library plays an active role in providing service of document delivery for the assignment of college students on various sub-topic related to their main subject given by the teacher in print or digital form. The library staff assist or provide journal/newspaper articles reference to the students. they are expert & experienced hands in guiding to the students to complete the search of the information need regarding their day to day classroom needs. libraries also help in search on various website, databases and YouTube channels. The advance Moodle assignment needs assistance in handling and operating. The e-books/journals search with the help of N-list consortia in academic library needs assistance to college students which can also fulfil by the library.

### Importance Of Teaching-Learning Process:

Teaching is key component in educational planning, which is one of the most important factors in steering educational plans. Teaching-learning is a continuous process that promote teachers' teaching skills, master new knowledge, develop new proficiency, which in turn, help improve students' learning. When teachers are effective classroom managers, their students achieve at a higher level and display more interest in the class subject matter. Classroom management is essential to teachers, it is crucial to keep teacher's knowledge up to date, so they can deliver high quality teaching. Librarian is master in library management. Teachers are experts in teaching and learning. Classroom management influence student learning environment and student learning outcome. Teachers must undergo cognitive and metacognitive learning processes in order to achieve learning outcome in the form of changed believes about their practice or, even better, change in behaviour. Teacher outcomes in terms of improved knowledge and skills in a field of classroom management influence student learning environment and student learning outcome because of changed student learning processes. Teachers should concentrate on emotional support, classroom organization and instructional support aspects of classroom interaction among teacher and students. To be able to do that, it requires that the teacher, possesses a certain set of knowledge and skills to understand how these three domains work, what difference they can make for a teacher in the classroom and why they are so important. The classroom interaction is a tool for any teacher, which will support him/her in any classroom situation. Teachers provided with proper training on up-to-date information on classroom management, on emerging technology tools for the classroom, new curriculum resources, and more, could become a successful factor to their institution. The best professional development is ongoing, collaborative, and connected to and derived from working with students and

understanding their culture. The well trained, skilled, IT based educated and fully experienced new generation librarian now a day play an important role in motivating and sure assistance in this regard to a classroom teacher. He helps in preparing his notes and help him to establish the set up and run the system to help the student as well as teachers to search, read-write, repackaging, stylish presentation and publish it in the information cycle.

#### **Role Of Classroom Teacher:**

The classroom teacher plays a lead role in teaching learning process in class. They read to much material in print as well as digital form which have thought in the class before they enter in class. A continuous reading is the good quality of a teacher. Teacher have some limitation to search the related information on a specific topic, he doesn't know the all tools of information search. Or he has no sufficient time to search or read word to word every document in his subject. There are various forms of information maybe he is not familiar with all the forms of information. The librarian is the right choice in this regard. Because he is more familiar with these various information searching tools. He can save the time as well as he may assist him to present the subject in different manner. The teacher cannot be an effective teacher unless he draws extensively from a variety of information sources and keep himself up-to-date in his field of specialization.

#### **Expectation Of Students:**

High cost of books is the major problem for students. Now a day's there are so many open source free books are available on library portal by college librarian. Students have high, quick and quality services expectation from college libraries. In higher education, education is a process of more learning rather than classroom teaching. The college environment has to provide with the facilities necessary for mastering the subject matter, techniques, skills and habits of thinking and methods of work in their field. There is a need of supplementary reading. The classroom lectures can not sufficient to prepare the student in competitive world. Information needs of the user vary in quantity and quality. Libraries played a vital role in the development of teaching learning process in higher education. It is not merely a store house of reading material for print and online but it functions as a dynamic tool for classroom teaching-learning process, to feed the intellect of the users, to encourage the users to partake fully of its intellectual and cultural contents. It is always said that a college library is an essential pre-requisite for successful implementation of higher education programme as a result a skilled, trained and understanding well cultured human being as a resultant product .

#### **The Role Of Librarian As A Teacher:**

Library is one of the major resources for the exchange of idea. Academic and research work is very much preserved by library. The role of the library and librarian is necessarily dependent upon the educational objectives of an institute. The librarian should be treated as integral and active parts of the education process and he must be involved in course planning of an institution and overall development of the student and faculty development program policy decisions. The role of librarian in recent era has changed as a result of techno-driven world. Library is considered 'the heart' of an institute offering higher education. The availability of staff, infrastructural and IT facilities and financial support plays a vital role in effective management in library. Information and Library Network Centre (INFLIBNET), Software for University Library (SOUL), N-list Consortia, e-pathshala, Shodhganga-a database of thousands of thesis from various universities, shodhsindhu & the various open source e-resources available freely on internet are the chief source of information for academicians to seek the knowledge generated in various branches. the challenges like effective utilization of digital technologies, have not been overcome yet in every respect. Librarians are part of curriculum design committees and collaborate with teachers to strengthen their teaching and research by providing access to the world of research literature and digital resources for teaching and learning.

#### **Conclusion:**

Teaching learning process is the base of education system in higher education and teacher is the hero on front. The librarian is the stage behind artist to help, assist the teacher to perform his role a systematic manner. In the age of IT there is a need to be go together librarian and teacher friendly. There is a need of library-based classroom teaching. Every student must refer books after class room teaching and every teacher must go to library before he thought in the class. The librarian role in both the step is very important. The things which are not understood by the students in the classroom the librarian may help the student in this regard to look out the related books, e- resources, various links, apps, online lectures, videos etc

## A Review On 'Iot' And It's Smart Applications

Prof.Minal Pramodrao Shende

College Of Management And Computer Science,Yavatmal.

### Abstract:

Internet of Things is a emerging technology which is the network of interconnected things/devices which are embedded with sensors, software, network connectivity and necessary electronics that allows collection and exchange of data. . IoT is visualized as a billion of sensors connected to the internet that would be generated large amount of data which need to analyzed, interpreted and utilized in every day to day life. The transformation of the normal real world objects to the virtual world object is the main and interesting feature of the IoT. It make them intelligent and more powerful and useful. The IoT make everything and keep updated and informed about everything. It is also defined as an interaction between the physical and digital things which takes place with the help of various sensors attached to all conceivable objects. This paper introduces application of internet of things and how it is useful in various sector to make system automate, monitor and track with the social and governance issues that arise as the future vision of internet of things.

**Keywords:** Internet of Things (IoT), sensors, real world, embedded, automated, Visualised.

### Introduction

Internet of Things (IoT) is one of the most disruptive emerging IT technologies that exists today. Internet of Things (IoT) plays a major role in every day to day life. The major difference between IoT and embedded system is that a dedicated protocol/software is embedded in the chip in case of embedded system, whereas, IoT devices are smart devices, which are able to take decisions by sensing the environment around the device[1]. The development of sensors technology, availability of internet connected devices; data analysis algorithms make IoT devices to act smart in emergency situations without human interventions[3]. So, IoT devices are applied in different fields such as agriculture, medical, industrial, security and communication application. IoT systems are useful within a system to do deeper automation, analysis, and integration. IoT contributes to technology by advances in software, hardware and modern tools[2]. It even uses existing and upcoming technology in the fields of sensing, networking and robotics. IoT brings global changes by its advanced elements in the social, economic, and political impact of the use.

### Architecture Of Iot:

The IoT architecture has numerous elements such as sensors, actuators, cloud services, and protocols layer. Basically there are three layers in IoT Architecture[5].

- 1] The client side.
- 2] A medium connecting clients and operates.
- 3] Operators on the server side.

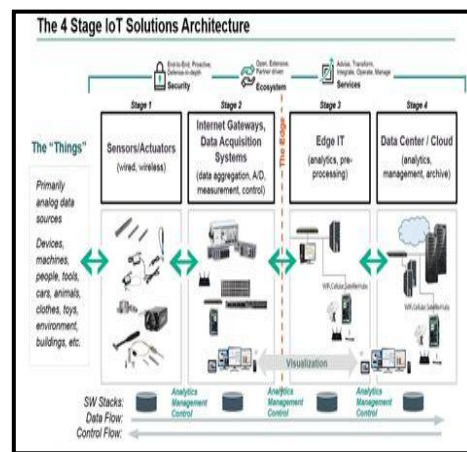

Fig:Architecture of IoT(Internet of Things)

### Stage 1. Sensors/actuators

Sensors collect raw data from the environment under measurement and turn it into meaningful data. A “thing” is an object which equipped with sensors that gather data which will be transferred over a network and actuators that allow things to act (for example, to switch on or off the light, to open or close a door, to increase or decrease engine rotation speed and more). This concept includes fridges, street lamps, buildings, vehicles, production machinery, rehabilitation equipment and everything else imaginable. Sensors are not in all cases physically attached to the things: sensors may need to monitor, for example, what happens in the closest environment to a thing.

**Stage 2. The Internet gateway**

After data processing in stage 1, the data that come from the sensors are in analog form. That data needs to be aggregated and converted into digital streams for further processing downstream. Data acquisition systems (DAS) perform these data aggregation means collection of useful data content and conversion functions[6]. The DAS connects to the sensor network, collect related items of content outputs, and performs the analog signal-to-digital conversion. The Internet gateway receives the clustered and digitized data and routes it over Wi-Fi, wired LANs, or the Internet, to Stage 3 systems for further processing.

**Stage 3. Edge IT**

Once converted IoT data has been digitized and clustered, it's ready to cross into the domain of activity of IT. However, the data may require further processing before it enters into the data centre[2]. This is where edge IT systems, which perform more analysis, are more effective and operative. Edge IT processing systems may be located in remote offices but generally these sit in the location where the sensors reside in an integrated circuits. Because IoT data can easily eat up network bandwidth and cover your all data centre resources, If you just had one large data pipe going to the data centre, you'd need very large capacity. You'd also face security issues, storage issues and delays data processing. With a staged approach, you can pre-process the data, generate meaningful results, and pass only those on in another stage.

**Stage 4. The data centre and cloud**

Data that needs more extensive and comprehensive data processing, and where feedback doesn't have to be immediate, gets forwarded to physical data centre or cloud-based systems, where more powerful and emerging IT systems can analyze, manage, and securely store the data in storage system[6]. It is a long process to get results when you wait until data reaches to Stage 4, but you can execute a more in-depth analysis, as well as combine your data that came from sensor with data from other sources for deeper insights and an accurate. In Stage 4, data processing may take place on-premises, in the cloud, or in a hybrid cloud system, but the type of processing executed in this stage remains the same, independent of the platform. The 4-stage approach to IoT infrastructure and data processing will require new levels of collaboration, particularly as the distinctions between these stages are beginning to blur[4]. IT professionals can build their IoT skills by starting with small application and working with domain experts to identify sources of potentially valuable and important data[4].

**Applications of IOT:****Smart Home:**

The most important and efficient application of IoT that stands out every time is Smart Home. Smart Home has highest ranking application of IoT on all channels. In home by using the IoT system we can remotely monitor and manage our home appliances and cut down on your monthly bills and resource usage. Switching on and off remotely appliances that are used in Smart Home to avoid accidents and save energy, Detection of windows and doors openings and violations to prevent intruders, Monitoring of conditions inside museums and art warehouses[2]. The best example of smart home here is Jarvis, the AI home automation employed by Mark Zuckerberg. There is also Allen Pan's Home Automation System where functions in the house are actuated by use of a string of musical notes.

**Wearable:**

Wearable IoT devices have experienced an explosive demand in markets all over the world. Wearable IoT devices are installed with sensors and software which collect data and information about the users and then forwarded for further processing. This data is later pre-processed to extract essential insights or accurate information about user[3]. These devices broadly cover fitness, health and entertainment requirements. The pre-

requisite from internet of things technology for wearable applications is to be highly energy efficient or ultra-low power and small sized. Companies like Google, Samsung have invested heavily in building such devices. there are plenty of other wearable IoT devices that make our life easy such as the Sony Smart B Trainer, or Look See bracelet, the Myo gesture control[7].

#### Smart City:

Smart city is another powerful application of IoT. Smart observation of all areas of city, automated transportation, smarter energy management systems, water distribution, urban security and environmental monitoring all are examples of internet of things applications for smart cities[1]. By installing sensors and using web applications, citizens can find free available parking slots across the city by using IoT devices. Also, the sensors can detect meter tampering issues, general malfunctions and any installation issues in the electricity system[2].IoTtechnology used to make the city as a smart city to engage with the data exhaust produced from your city and neighbourhood, Monitoring of parking areas availability in the city, Monitoring of vibrations and material conditions in buildings, bridges and historical monuments, Detection of Android devices, iPhone and in general any device which works with Bluetooth interfaces or WiFi by using IoT devices, Measurement of the energy radiated by cell stations and and Wi-Fi routers are monitored by smart IoT devices, Monitoring of vehicles and pedestrian levels to optimize driving and walking routes, Detection of rubbish levels in containers to optimize the trash collection routes,Intelligent Highways with warning messages and diversions according to climate conditions and unexpected events like accidents or traffic jams are observed by IoT devices. Smart IoT Products like cellular communication enabled Smart Belly trash will send alerts to municipal services when a bin needs to be emptied[5].

#### Smart Grids (Power Grids):

Smart grids is another area of application that stands out. A smart grid extract meaningful and related information on the behaviours of consumers and electricity suppliers in an automated fashion in order to improve the efficiency, economics, and reliability of electricity distribution across the city. 41,000 monthly Google searches is a testament to this concept's popularity[1].The basic idea behind the smart grids is to collect data automatically and analyze the behaviour or electricity consumers and suppliers for improving efficiency as well as economics of electricity use by using smart IoTdevices.Smart Grids will also be able to detect sources of power outages more quickly than others and at individual household levels like near by solar panel, making possible distributed energy system.

#### Industrial Internet:

Industrial Internet is and most important IoT based application. IoT devices are used for connecting machines and devices in industries such as power generation, oil, gas, and healthcare, Monitoring of oxygen levels and toxic gas inside chemical plants to ensure workers and goods safety, Monitor the temperature inside the industry, In food factories monitoring of ozone levels during the drying meat process, Information collection from Cab Bus to send real time alarms to emergencies or provide advice to drivers.

#### Connected Car:

Connected car technology which is IoT based application is a vast and an widely used network of multiple sensors, antennas, embedded software, and technologies that help in communication to navigate in our complex world[7]. It has the responsibility of making decisions with consistency, accuracy, and speed. It also has to be reliable. These requirements will become even more critical when humans give up entirely the control of the steering wheel and brakes to the autonomous or automated vehicles that are being successfully tested on our highways right now for security purpose..A connected car is a vehicle which is able to make the best effective use of it's own operation, maintenance as well as for passengers comfort using available sensors and internet connectivity by using IoT .Most large auto makers as well as some brave start-ups are working on connected car solutions. Major brands like Tesla, BMW, Apple, Google are working on bringing the next revolution in automobiles using IoT[5].

#### Healthcare:

IoTas applications in healthcare, which are from remote monitoring equipment to advance & smart sensors to equipment integration. It has the potential to improve how physicians deliver care and also keep patients safe and healthy. Healthcare IoT can allow patients to spend more time interacting with their doctors by which it can boost patient engagement and satisfaction[5]. From personal fitness sensors to surgical robots.IoT helps in revolutionizing healthcare products and provides pocket-friendly solutions for the patient and healthcare professional.

#### Smartretail:

The potential of IoT in the retail sector is extremely large. IoT provides an opportunity to retailers to interact with the customers to enhance their business through Smartphone's[1].Retailers have started adopting IoT solutions and using IoT embedded systems across a number of applications that improve store operations

such as increasing purchases, reducing theft, enabling inventory management, and enhancing the consumer's shopping experience. They can regain their lost market share by attracting consumers into the store, thus making it easier for them to buy more while saving money through transactions. Smartphone's and using Beacon technology can help retailers serve their consumers better through interaction[2]. By using IoT we can also track consumers path through a store and improve store layout and place premium products in high traffic areas.

### Smart Supply Chain:

Supply chains have already been getting smarter for a couple of years. It offers solutions to problems like tracking of goods while they are on the road or in transit, or helping suppliers to exchange inventory information about transportation are some of the popular applications. By using IoT enabled system, equipment that are used in factory contains embedded sensors that communicate with data depend on different parameters such as pressure, temperature, and utilization of the machine. The IoT system can changes equipment settings to enhance performance.

### Smart Farming:

Smart farming is one of the fastest emerging field in IoT. Demand of food supply is extremely increased because of continuous increase in world's population, Governments are helping farmers to use advanced techniques and research to increase food production because of raised population .Farmers are using IoT technology for sensing soil moisture and nutrients, controlling water usage for plant growth and determining custom fertiliser[3]. Using IoT applications we can gather data about the health and well being of the cattle's and, ranchers knowing early about the sick animal can pull out and help to prevent large number of sick cattle by using IoT[5].

### Conclusion:

In this paper, I concluded that the IoT has the potential to enable extensions and improvement in quality to fundamental services like transportation, logistics, security, utilities, education, healthcare and other working areas, while providing a new ecosystem for application development. IoT has future scope. This IoT technology may be used for future purpose. Smart IoT device may be used for child safety and tracking helping the parents to locate and monitor their children. If any abnormal values are read by the sensor then an SMS is sent to the parents mobile and an MMS indicating an image captured by the serial camera is also sent. The future scope of the work is to implement the IoT device which ensures the complete solution for child safety problems.

## Problems Of Women Entrepreneurship

Prachi P. Thakare

College of Management and Computer Science, Yavatmal

### Abstract

*Today's world is changing at a startling pace. Social and economic development of women is necessary for growth of our society. Global evidence witnessed that women are doing extremely well in various fields like sports, politics, administration, social work and similar activities. Now they have not only stepped into the corporate world but have also running their enterprises successfully. But women entrepreneurs not only have to face the problems of entrepreneurship but also of being a women entrepreneur. The Educated women have to go a long way to achieve equal rights and status as traditions are deeply rooted in our society where sociologist has been a male dominant. She has competed with man and successfully stood up with him in every walk of life and business is no exception for this. The women who start up their businesses have to face some problems. The research of this paper is to know about the problems faced by women entrepreneurs. Studies have shown that women entrepreneurs face more difficulty in marketing their products followed by financial problem etc.*

**Keyword:** Women Entrepreneurship, entrepreneurs, Problems, Economic development, Business

### Introduction

Entrepreneurship plays a crucial role in the growth of any society. Entrepreneurship emerges from the creative spirit of the individual in long-term business ownership, employment generation, capital formation and economic security. Women who innovate, emulate or acquired a business activity are called "women entrepreneurs". Women entrepreneurship can contribute really well to economic well-being of families and communities, poverty reduction and women empowerment.

A large number of women around the world have established and managed their own businesses. It was not easy for these women to succeed in business. They had to face a lot of difficulties and overcome a number of problems to become successful in their ventures. They produce new jobs for themselves and others and collectively offer society with all totally different solutions to management.

### Objectives Of Study

- To study the different problem faced by women entrepreneurs.
- To know about the socio-economic profile of women entrepreneurship development.
- To study the existing background of women Entrepreneurs.

### Research Methodology

The Collection of data is done by secondary data from magazines, journals, intellectual articles, books and several authentic websites of various sectors.

### Concept Of Women Entrepreneur

Women Entrepreneurs may be defined as the women or a group of women who initiate, organize and operate a business enterprise. Entrepreneurship has been a male dominated phenomenon from the very early age, but the time has changed the situation brought women as today's most memorable and inspirational entrepreneur. In almost all the development countries in the world women are putting their steps at par with the men in the field of business.

### Reasons: Women Become Entrepreneur

The glass ceilings are shattered and women are found to be involved in every line of business. The entry into women's business in India is traced as an extension of their kitchen activities, but with the spread of education and the passage of time, women started their own businesses. A woman entrepreneur is a person who accepts a challenging role to meet her individual needs and become financially independent. Many women start businesses due to some traumatic events, such as economic reasons such as divorce, discrimination, family member's health or layoffs. The following flow chart shows the reasons for women to become entrepreneurs.

Reasons: Women Become Entrepreneur

### Problem Faced By Women Entrepreneur

Women entrepreneurs face a series of problems right from the beginning till the enterprise functions. Being a woman itself poses various problems to a woman entrepreneur. Beside the basic problems faced by women entrepreneur are as follows.

#### Traditional Mindsets:

When a friend once announced that she wanted to quit her job and set up her own art and design business, instead of patting her on the back or offering heartfelt congratulations, she received a raised groom and a question that prompted her Broke the confidence "You are a girl, what will you be able to do? "

While many women are breaking up huts and moving out of their homes to work, establishing a business is still considered a man's domain.

#### Stiff Competition:

Women entrepreneurs do not have the organizational set-up to keep a lot of money for canvassing and advertising. Thus, they face stiff competition with the organized sector and their male counterparts for marketing their products. Such competition ultimately results in liquidation of women enterprises

#### Family Ties:

In India, it is mainly the duty of women to look after children and other family members. Man plays a secondary role. In the case of married women, they have to strike a good balance between their occupation and family. There is little or no energy to devote his total involvement in the family to the business.

Above these all obstacles' a time comes in every women's life wherein she has to take a break out of her professional life for her maternity. Even after maternity, expect metro cities, yet all the cities do not have the facilities of babysitting / day care centres.

The support and approval of husbands seems to be a necessary condition for women to enter the profession. Accordingly, the educational level and family background of husbands positively influence women's entry into business activities.

#### Male-Dominated Society:

Male chauvinism is still the order of the day in India. The Constitution of India talks of equality between the sexes. But, in practice, women are seen as abla, meaning weak in all respects. Women suffer from male reservations about women's role, ability and ability and are treated accordingly. In some cases, even after success in women's life, husband become insecure and go under complex ad that starts harming their relationship, which in turn creates stress among women. This stress surely proves to be a huge obstacle in their professional lives.

#### Finance Problems:

Finance is considered a 'lifeline' for any business - be it big or small. However, women entrepreneurs suffer from lack of finance mainly for two important reasons. First, women usually do not have an asset in their name, which they can pledge as collateral to obtain funding from external sources. Secondly, banks also

consider women to be less creditworthy and discourage women borrowers on the belief that they can leave their business at any time.

### Networking:

An important aspect of running your own business is the ability to socialize within the Entrepreneurial network to build contacts and win customers but very few Indian women step out of their comfort zones to do so.

If they do socialize, it is limited to the work they need to get done and not to build relationships. The implication of this is directly on the extent of visibility they have in the market and on the perception they build.

### Low Risk-Bearing Ability:

Women in India lead protected lives. They are less educated and are not financially self-dependent. All these reduce their ability to bear the risk involved in running an enterprise. Risk-taking is an essential requirement of a successful entrepreneur.

Apart from the above problems, inadequate infrastructural facilities, power shortage, high cost of production, societal outlook, low need for achievement and socioeconomic barriers also prevent women from entering the business.

### Safety and Security:

Today, security for women is probably the biggest obstacle in India. As social crime increases, women hesitate to take up roles that demand long-term interactions and interactions with strangers' worlds. However, a smiling face and a calm mind can quickly turn strangers into friends.

However, despite these obstacles that most women in India face, many have built successful businesses. Communicating with the family and thinking of a business idea with a long-term sustainable plan can serve as the key to success. Problems are part of the journey where you are constantly moving towards development. Therefore, it is important not to get discouraged by the number of challenges on the way, but to continue to take it one step at a time and keep moving forward.

### Conclusion

In the competitive world major changes are occurring in the way of the women entrepreneurs who ready to promote their own business. We always seen that a smart woman can pick up a job any day, but if she becomes an entrepreneur she can provide a livelihood to 10 more women at least..!! Highly educated, technically sound and professionally qualified women should be encouraged to manage their own business, not dependent on wage employment outlets.

It can be concluded that the role of women entrepreneurs in promoting industrial development is also being recognized and steps are being taken to promote women entrepreneurship. Making them realize their strength and important position in society and the construction, business and service industries as well as the entire economy may be their biggest contribution, although women entrepreneurs face many problems and challenges in their path to becoming a successful entrepreneur. Have to face. Has taken several initiatives for the development of women entrepreneurs. Successful and renowned women entrepreneurs became role models for others.

## ICT To Develop Higher Education

Nazia A Rashidi

Department of Chemistry, Shri Mungsaji Maharaj Mahavidyalaya, Darwha Dist: Yavatmal (M.S), India.

### Abstract:

*This study deals with the use and benefits of ICTs to change beliefs, feelings, thoughts and reluctance for successful integration of ICTs in higher education. The revolutionary change which is taking place in Information and Communication Technologies (ICTs) has dramatic effects on the way universities carry out their functions of teaching, learning and research, particularly on the creation, dissemination and application of knowledge. This requires a shift in the delivery and pedagogy used in the current education system. For India to emerge as knowledge super power of the world it is imperative to convert our demographic advantage into knowledge powerhouse by nurturing and honing our working population into knowledge enabled working population. Thus ICT integration is a crying need for capacity building efforts of educational institutions. Accordingly, future teachers and learner need to equip and acquaint themselves to make changes brought about by technology.*

*Keywords: ICT, Higher Education*

### Introduction

ICT stands for Information and Communication Technology and defined as a diverse set of technological tools and resources used to communicate, and to create, disseminate, store, and manage information (Gunton, 1993; Victoria, 2002). It is acknowledged that Information Communication Technologies (ICTs) are revolutionizing the teaching and learning process in universities. Museveni (2006) observed that ICT is no longer a matter of choice it is a necessity in today's world which is driven by technology and knowledge [1].

Many Universities have seen the importance of integrating Information and Communication Technologies (ICTs) in their teaching process as reported by UNDP (2001) that: Across a range of educational applications, ICT is being harnessed to improve the efficiency, accessibility and quality of the learning process in developing countries[2].

### Related Literature

It is a proven fact that ICT does improve the teaching and learning process Higgins (2004), however, there is always a problem when it comes to the acquisition of the necessary infrastructure from administrations who are the financial controllers and decision makers of any organization[3].

Emans (2002) noted that for many teachers and learning institutions, the use of computers for educational purposes might be a threatening step because there is often little expertise, and teachers and administration are reluctant to take the first step[4].

Jaway (2003) observed that many governments are now facing challenges to adopt their higher education system to the demands of a rapidly changing social, economic and technological order in line with (Maier and Waren 2000)[5].

Use of ICT in education involves the adoption of general components of information and communication technology in practical use in teaching and learning processes [6]. Across the past twenty years the use of ICT has fundamentally changed the practices and procedures of nearly all forms of endeavour within business and governance. Almost in all situations or tasks, we find the integration and the use of technology to solve problems. Today, the limitations of distance have been broken by technology. This paper looks at the Effective use of ICT for Education, along with ICT use in the teaching learning process; quality and accessibility of education; learning motivation.[7]The ICT based teaching in classroom activities produce significant changes both in the nature of the knowledge imparting and in the nature of the processes involved in acquiring it. The purpose is to give a brief idea about this new trend in higher education to boost towards utilizing information and communication technologies (ICT) completely.

Institutions of higher education have increasingly adopted online education, and the number of students enrolled in distance programs is rapidly rising in colleges and universities worldwide. Today's Higher

education has supported by dozens of e-learning technologies (for instance, electronic books, simulations, text messaging, podcasting, wikis, and blogs)[8].

### Technology Based Teaching And Learning In Higher Education:

From the origin, the implementation of ICT in education was to transform the teaching and the learning process from the traditional instructional teacher-centered endeavour to a learner-centered approach with active participation of the learner coach [2]. Conventional teaching has emphasized content. For many years course have been written around textbooks. Teachers have taught through lectures and presentations. The integration of information and communication technologies can help revitalize teachers and students. This can help to improve and develop the quality of education by providing curricular support in difficult subject areas. To achieve these objectives, teachers need to be involved in collaborative projects and development of intervention change strategies, which would include teaching partnerships with ICT as a tool.

Teachers are at the core of any living society. Technologies play an important role in training programme of teachers. Students' accesses knowledge and information through TV, digital media, cable network, internet and social media i. e. Facebook, Twitter, Whatsapp, Linkedinn, Igo, Line, Wechat etc. ICT is very important for Pre-service teacher education programme in the 21st Century. Without proper knowledge of ICT teacher and student cannot perform in his/her class room and it could not be said to be a complete one.

### ICT For Teacher

- ICT helps teachers in both pre-service and in-Service teachers training.
- ICT helps teachers to interact with students.
- It helps them in preparation their teaching, provide feedback.
- ICT also helps teachers to access with institutions and Universities, NCERT, NAAC NCTE and UGC etc.
- It also helps in effective use of ICT software and hardware for teaching –learning process.
- It helps in improve Teaching skill, helps in innovative Teaching.
- It helps in effectiveness of classroom.
- It also helps in improving professional Development and Educational management as well as enhances Active Learning of teacher Trainees.
- It is now replacing the ancient technology. As we know now-a day's students are always have competitive mind. So teacher must have the knowledge of the subject. This can be done through ICT.
- ICT prepares teacher for the use of their skills in the real classroom situation and also make students for their future occupation and social life.
- ICT used as an „assisting tool“ for example while making assignments, communicating, collecting data & documentation, and conducting research. Typically, ICT is used independently from the subject matter.
- ICT as a medium for teaching and learning. It is a tool for teaching and learning itself, the medium through which teachers can teach and learners can learn. It appears in many different forms, such as drill and practice exercises, in simulations and educational networks.
- ICT as a popular tool for organisation and management in Institutions.
- ICT is plays an important role in student evaluation.
- ICT is store house of educational institution because all educational information can safely store through ICT.
- ICT helps Teacher to communicate properly with their students. So ICT bridge the gap between teacher and students.
- ICT helps Teacher to design educational environment, to pass information to students within a very little time, to identify creative child

### ICT For Learner

- ICT is used in conjunction with student-centered pedagogy.
- Computers have a positive impact on student attitudes and the learning of new kinds of skills
- ICT can provide access to different sources of information.
- ICT provides online interaction facility.
- Students and teachers can exchange their ideas and views, and get clarification on any topic from different experts, practitioners, etc.

- It helps learners to broaden the information base.
- ICT provides variety in the presentation of content which helps learners in concentration, better understanding, and long retention of information
- The learners can get opportunity to work on any live project with learners and experts from other countries.
- ICT provides flexibility to a learner which is denied by the traditional process and method.
- Flexibility is a must for mastery learning and quality learning .
- ICT can help in preparing students for different competitive exams.
- Student outcomes such as increased knowledge of the subjects, improved attitudes about learning, and the acquisition of new skills needed for a developing economy.
- ICT enables students to have more informed and more profitable access to teachers' knowledge and skills.
- ICT may help close the gender gap, benefit girls and boys equally and can be effectively used by students with special needs.
- ICT based teaching – learning is ubiquitous learning (Anywhere, anytime, active and interactive learning).
- Beyond learning outcomes ICT fulfill 04- basic needs of students i.e Communication, Collaboration, Critical thinking, Creative problem solving.

### Conclusion

The integration of ICTs in the teaching and learning process is said to be affected by many factors which include Organizational factors, integration problems, ICT literacy and Economic factors. And its expected outcomes are the - Positive attitude towards ICT, Improved ICT facilities and Improved resource levels and ICT infrastructure. ICT helps the teacher to update the new knowledge, skills to use the new digital tools and resources. By using and acquire the knowledge of ICT, teacher will become effective teachers. ICT is one of the major factors for producing the rapid changes in our society. It can change the nature of education and roles of students and teacher in teaching learning process. Teachers in India now started using technology in the class room. Laptops, LCD projector, Desktop, EDUCOM, Smart classes, Memory sticks are becoming the common media for teacher education institutions. ICT not only make the learning student centric but also provide flexibility to learner for mastery learning and quality learning.

So we should use information & communication Technology in Teacher Education in 21st Century as because now teachers only can create a bright future for students.

**V. S. Naipaul: A Trend Setter in the Realm of Travel Writing****Dr.Satyendra B. Gadpayale**Associate Professor for English  
Smt. Radhabai Sarda College, Anjangaon Surji**Abstract:-**

*When V.S. Naipaul got Nobel Prize in 2001, exclusively for his travelogues, the literary realm started looking towards travel writing as an emerging genre in global literature. The world then started searching history and development of this genre with great curiosity and scholastic approach. Now there are number of writers who are turning towards travelogue writing as their favorite genre and career and are providing multidimensional and more realistic picture of the world in their writings which delights, informs, inspires and enlightens to the readers. This research article puts forth the contemplation and critical study of this new emerging genre of travel literature from various aspects and perspectives. It also ponders over the scope, significance and prospects of travel writing in this 21st century. In this article, I have brought few examples from the travelogues of V.S. Naipaul, the champion and touchstone in travel writing in contemporary times.*

*KeyWords: trend, travelogue, non-fictional, emerging, genre, contemporary.*

**Contemporary World: A Global Village:-**

The revolutionary development in telecommunication and transportation in 20th & 21st century have made the world very small. Today a person takes his breakfast in Mumbai, lunch in Dubai and dinner in New York within the period of one rotation of 24 hours of the earth. In other words, the world has become a global village in present time. This revolutionary progress in commutation has inspired today's man to make intensive tours and travels to various countries throughout the globe. These excursions delight him to record his experiences either in diaries or in travel writings. This encounter with varied cultures and people across the countries spurs him to share him in the form of travel literature. The instinct of wonder and curiosity in a man about the life, culture, religion, and the socio-political structure, the variety of flora and fauna and animal world in various countries drives him to express it in verbal form in writing.

These frequent tours to trans-continentals have developed the traveler's critical aptitude. It has made him keener, searching and studious in his observations. He tried to relate and compare socio-cultural and religio-political picture among the countries. He tried to study the rise and fall, wars and civil strife in the countries. This expanded his views, visions and understanding about the world by which he could find solutions to the problems in the various countries to some extent.

**Travel Writing: Its Non-Fictional Nature:-**

Travel writing is completely a non-fictional literary form. There is no scope for writer's own fancy or the yarn of imagination. Unlike other forms of the literature as drama, novel, short-story or poetry, there is no scope for the dreamy world or the poetic world of the writer whereas, he has to be a very impartial and factual like a journalist. Travel writing is a realistic and truthful account of the world around the writer. Following can be the very apt example which is an extract from 'An Area of Darkness' by V.S. Naipaul –

"In the dim, stinking corridors sat expressionless women, very old, very dirty, shriveled almost to futility; and already one had the feeling that people were negligible: these were the sweepers, the servants of the gay girls of the Bombay poor, doubtless lucky because employed: a frightening glimpse of India's ever receding degrees of degradation." 1

**Travel Writing: A Detached Observation:-**

Travel writing is the result of a detached observation of a certain place, region or country. A travel writer is neutral and a detached observer who looks impartially to the socio-cultural and religio-political structure in the country he visits. He remains unprejudiced of any previous impression. His mind is unoccupied by any previous bias. He observes life, culture, people, religion, language and so on as a catalyst and a studious critic who puts forth his observation very impartially in his travel writing. V.S. Naipaul is a very impartial and truthful in his writing. He is very much unafraid of any criticism. His travelogues on India are much harsh, bitter

and mercilessly truthful. In his first travelogue on India i.e. 'An Area of Darkness' he puts forth a harsh realistic picture of Indian villages. Following is one of such instance -

"I had seen Indian villages: the narrow, broken lanes with green slime in the gutters, the choked back-to-back mud houses, the jumble of filth and food and animals and people, the baby in the dust, swollen-bellied, black with flies, but wearing its good-luck amulet. I had seen the starved child defecating at the roadside while the mangy dog waited to eat the excrement. I had seen the physique of the people of Andhra, which had suggested the possibility of an evolution downwards, wasted body to wasted body, Nature mocking herself, incapable of remission. Compassion and pity did not answer; they were refinements of hope. Fear was what I felt. Contempt was what I had to fight against."<sup>2</sup>

### Travel Writing: An Objective Form:-

Travel writing is not subjective literary form but it is an objective type writing. The writer puts forth in his writings the scenario, activities and life in front and around him very objectively, keeping himself separate, detached and uninvolved. He describes the object which appears in front of him very truthfully and in 'as it is' manner using his critical perspective. There is no scope for his personal views. A travel writer is like a painter who paints the scenario before his eyes very objectively on the canvas. Again, V.S. Naipaul can be the most fitted example in this concern who describes the things very objectively in his travelogues. In 'An Area of Darkness' Naipaul presents the picture of complex class and caste structure in Indian society in very objective manner as follows –

"Study these four men washing down the steps of this unpalatable Bombay hotel. The first pours water from a bucket, the second scratches the tiles with a twig broom, the third uses a rag to slop the dirty water down the steps into another bucket, which is held by the fourth. After they have passed, the steps are as dirty as before; but now above the blackened skirting-tiles the walls are freshly and dirtily splashed. The bathrooms and lavatories are foul; the slimy woodwork has rotted away as a result to this daily drenching; the concrete walls are green and black with slime. You cannot complain that the hotel is dirty. No Indian will agree with you. Four sweepers are in daily attendance, and it is enough in India that the sweepers attend. They are not required to clean. That is a subsidiary part of their function, which is to be sweepers, degraded beings, to go through the motions of degradation. They must stop when they sweep; cleaning the floor of the smart Delhi café, they will squat and move like crabs between the feet of the customers, careful to touch no one, never looking up, never rising. In Jammu City you will see them collecting filth from the streets with their bare hands. This is the degradation the society requires of them, and to this they willingly submit. They are dirt; they wish to appear as dirt."<sup>3</sup>

He further describes the picture of defecation in India –

"Indians defecate everywhere. They defecate mostly, besides the railway tracks. But they also defecate on the beaches; they defecate on hills, they defecate on the river banks; they defecate on the streets; they never look for cover. Muslims, with their tradition of pardah, can at times be secretive. But this is a religious act of self-denial, for it is said that the peasant, Muslim or Hindu, suffers from claustrophobia if he has to use an enclosed latrine. A handsome young Muslim boy, a student at a laughable institute of education in an Uttar Pradesh weaving town, elegantly dressed in the style of Mr. Nehru, even down to the buttonhole, had another explanation. Indians were a poetic people he said. He himself always sought the open because he was a poet, a lover of Nature, which was the matter of his Urdu verses; and nothing was as poetic as squatting on a river bank at dawn."<sup>4</sup>

### Conclusion:-

'Curiosity' is perhaps the strongest driving force behind travel writings. The wonder, the disillusion, the excitement, the shocks, everything is shared by the travel writer in his travelogue. The multiracial, multicultural and multiethnic experience of the writer is found voice in his writings. A travel writer is a catalyst and a critic who provides a truly worth analytical picture of visited region or country to the readers. In other words, with the help of the truthful multidimensional account of any country by a travel writer, a reader is on

the tour to several countries through the pages of the travelogues. The reader looks towards the world through the sensible eye of the travel writer.

In this way travel writing is a new powerful emerging genre and trend in contemporary literature. It has compared and contrasted varied places, countries and continents and provided a new comparative study of Socio-cultural and religio-political scenario. In his Noble Lecture delivered in December 2001, V.S. Naipaul sums up about his travel writing as –

‘When I became a writer those areas of darkness around me as a child become any subjects. The land; the aborigines; the New World; the colony; the history; India; the Muslim world, to which I also felt myself related; Africa; and then England, where I was doing my writing. That was what I meant when I said that my books stand one on the other, and that I am the sum of my books.’<sup>5</sup>

महाविद्यालयीन विद्यार्थ्यांत : गृहविज्ञान  
विषयाच्या संकल्पना स्पष्टतेचा अभ्यास (विशेष संदर्भ —सिरसाळा)

प्रा.ए.बी.वाळके

श्री.पंडितगुरू पाडीकर महा., सिरसाळा, ता. परळी वै, जि.बीड

**प्रस्तावणा**

महाविद्यालयीन स्तरावर गृहविज्ञान हा विषय इतर विषयाप्रमाणे शिकवला जाणारा विषय असून यामध्ये मुख्यतः बाल/ मानवविकास शास्त्र, आहारशास्त्र, गृहव्यवस्थापन, वस्त्रशास्त्र व विस्तार शिक्षण इ. पेपरच समावेश होतो. ज्या वेळेस मुलांना कृषिविषयक ज्ञान, लोहार, सुतार, अँटो रिपेअर करणे इ. व अशा अनेक प्रकारचे शिक्षण दिले जात असे, त्यावेळेस मुलींसाठी गृहविज्ञान विषयाचे शिक्षण देणे महत्वाचे वाटले. या संकल्पनेतुन जरी या विषयाची निर्मिती झाली तरी या विषयातुन घर चालवणे, घराची काळजी घेणे, घर सांभाळणे इतकेच समजणे म्हणजे चुकीचे आहे. गृहविज्ञान विषयाचे क्षेत्र खुप व्यापक व विविधतेने भरलेले आहे. गृहविज्ञान हे घरापासुन ते खुप दुरपर्यंत पोहोचले आहे. यामध्ये केवळ भोजन बनविणे, कपडे धुणे, घर सांभाळणे, शिवणकाम करणे, घरसजावट करणे इ. साठीच मर्यादीत नसुन, या विषयातुन विद्यार्थ्यांना घर किंवा आपल्या परिवाराची काळजी घेणे व आपल्या करिअर व स्वतःच्या पायावर उभे राहण्यास मदत करणे याचा समावेश आहे. सद्यपरिस्थित महिला आणि पुरुष दोघेही आपल्या घराची समाण जबाबदारी घेत असलेले दिसतात, तसेच आपले कुटूंब सुखी व आनंदीमय रहाण्यासाठी, कुटूंबासाठी लागणारी संसाधने उपलब्ध करण्यासाठी दोघेही प्रयत्न करत असलेले दिसतात. त्यासाठी गृहविज्ञान विषय महाविद्यालयीन मुला — मुलींसाठी खुप महत्वपूर्ण आहे. परंतु सद्यपरिस्थितीत महाविद्यालयीन विद्यार्थ्यांमध्ये गृहविज्ञान विषयाकडे पाहण्याचा त्यांचा कोणता दृष्टिकोन आहे किंवा गृहविज्ञान विषयाची संकल्पना स्पष्ट आहे का हे पाहण्यासाठी या विषयाची निवड करण्यात आली आहे.

**गृहविज्ञान अर्थ**

गृहविज्ञानाचा संबंध आपल्या स्वतःशी, कुटुंबाशी, कुटुंबातील सदस्य व आपल्या संसाधनाशी संबंधीत सर्व घटकांशी आहे. याचा मुख्य उद्देश उपलब्ध संसाधनातुन व वैज्ञानिक दृष्टीकोनातुन कुटुंबातील प्रत्येक सदस्याला भरपूर आनंद प्राप्त करुन देणे हाच आहे. गृहविज्ञान एक असा विषय आहे की, घर व घरातील सर्व सदस्य सुखी व आनंदी रहाण्यास मदत करतो. गृहविज्ञान विषय आपल्याला विविध वस्तुंचा उपयोग करण्यास शिकवते, त्यामुळे कौटुंबिक वातावरण आनंदीमय रहाण्यास मदत होते. त्याचबरोबर घराशी संबंधित सर्व बाबींची वैज्ञानिक दृष्टीकोनातुन माहिती प्रदान करतो. उदा. शरीरासाठी महत्वपूर्ण असणारा आहार, याविषयी सर्व पोषक घटकांची कार्य कोणती आहेत, परिणाम याविषयीही माहिती प्राप्त होते. त्यामुळे आपले शरीर निरोगी व सुदृढ राहण्यास मदत होते. विज्ञान आणि कलेचा समन्वय आपल्याला विविध क्षेत्रात उपयुक्त ठरतो. जसे की,

१. घर — ज्यामध्ये आपण राहतो.
२. भोजन — जे आपण खातो.
३. वस्त्र — आपण परिधान करतो.
४. परिवार — ज्याची आपण काळजी घेतो.
५. संसाधन — ज्याचा आपण वापर करतो.
६. दक्षता — यशस्वी करीअर साठी आवश्यक आहे.

**गृहविज्ञानाचे महत्व :**

गृहविज्ञान विषयाचा अभ्यास केल्यावर आपण संसाधनेचे व्यवस्थित व्यवस्थापन करू शकतो. व्यवस्थापन करतांना कोणती अडचण आल्यास आपण गृहविज्ञानाच्या मदतीने सहज सोडवू शकतो. त्यामुळे आपले व्यक्तीमत्व प्रभावशील

बनण्यास मदत होते. तसेच कुटूंबातील सर्व सदस्य गृहविज्ञानाच्या मदतीने आर्थिक प्रगती साधू शकतात. त्यावेळी आपण कुटूंबाच्या जबाबदाऱ्या नटणे पार पाडतो. त्यावेळी आपण समाजातीलही जबाबदाऱ्या व्यवस्थित पार पाडू शकतो याची जाणीव आपल्याला गृहविज्ञानातून होते. तसेच वेळ आणि शक्ती खूप महत्वपूर्ण संसाधने आहे, त्यामुळे आपण आपली उद्येष्टे पूर्ण करण्यात मदत होते. आज काल महिला अधिक प्रमाणात कार्य करत असलेल्या दिसतात. काही घराच्या बाहेर जावून कार्य करतात. तर काही घरीच स्वतःचा व्यवसाय चालवतात. यामुळे पुरुषांची जबाबदारीही वाढते. परंतू आपल्या समाजात पारंपारीक काळापासून पुरुष घरातील कामात खूप क्रियाशील असलेले दिसत नाहीत. त्यामुळे स्त्रियांनाच घर सुंदर, बनवीण्यासाठी प्रयत्न करावे लागतात. त्यासाठी त्यांना गृहविज्ञान विषयाचा अभ्यास महत्वपूर्ण ठरतो. तसेच गृहविज्ञान विषयाचा अभ्यास केल्याने एक यशस्वी व्यक्ती, जिम्मेदार नागरीक आणि चांगले माता-पिता बनण्यास मदत करतो, त्यासाठी या विषयाचे अध्ययन करणे गरजेचे आहे.

### अभ्यासाचा उद्देश :

१. महाविद्यालयीन विद्यार्थ्यांत : गृहविज्ञान विषयाच्या संकल्पना स्पष्टतेच्या अभ्यास
२. महाविद्यालयीन विद्यार्थ्यांत : गृहविज्ञान विषयाविषयी गैरसमजूतीचा अभ्यास

### माहिती संकलन :

विविध पुस्तके व प्रश्नावली

### सांख्यिकी विश्लेषण :

सद्यपरिस्थिती गृहविज्ञान विषय विविध क्षेत्रांमध्ये अत्यंत उपयुक्त असा विषय आहे. परंतू समाजात या विषयाला धरून अनेक गैर समजूती आहेत. त्याचे प्रमाण महाविद्यालयीन विद्यार्थ्यांत किती आहे, हे पुढील माहितीवरून स्पष्ट होते.

- अ. गृहविज्ञान विज्ञान विषयात केवळ जेवण बनवीने, कपडे धुणे आणि शिवण काम करणे इ. शिकविले जाते का ?  
 ब. गृहविज्ञान विषय केवळ मुलींसाठीच आहे का ?  
 क. गृहविज्ञान विषय घरातील व्यक्तीकडूनही शिकला जावू शकतो का ?  
 इत्यादी प्रश्नाविषयी माहिती देणारा स्तंभालेख पुढील प्रमाणे.

अ होय : ३९ टक्के नाही : ६१ टक्के      ब होय : ५५ टक्के नाही : ४५ टक्के      क होय : ५२ टक्के नाही : ४८ टक्के

‘अ’ स्तंभालेखावरून स्पष्ट होते की, ३९ टक्के महाविद्यालयीन विद्यार्थ्यांना गृहविज्ञान विषयात केवळ जेवण बनविणे, कपडे धुणे व शिवण काम करणे इ. शिकविले जाते. या वरून स्पष्ट होते की, आजही विद्यार्थ्यांमध्ये गृहविज्ञान विषया विषयी गैर समजूती आहेत. या विषयात केवळ एवढेच शिकविले जाते असे नसून शरिराविषयी आवश्यक असणाऱ्या सर्व पोषक घटकांविषयी, त्याचे कार्य व परिणाम या विषयी शास्त्रीय दृष्टिने माहिती दिली जाते. तसेच इतर अनेक घटकांविषयी ही वैज्ञानिक पध्दतीने माहिती दिली जाते. या विषयी महाविद्यालयीन विद्यार्थी अनभिन्न असलेले दिसतात. तर केवळ ६१ टक्के विद्यार्थी या विषया बाबत सकारात्मक असलेले आढळले.

‘ब’ स्तंभालेखावरून स्पष्ट होते की, गृहविज्ञान विषय केवळ मुलींसाठीच आहे यात होय व नाही म्हणनारे विद्यार्थी अनुक्रमे ५५ टक्के व ४५ टक्के असलेले आढळी. सद्यपरिस्थितीत महिला ही बाहेरची कामे करत असलेली दिसतात त्यामुळे पुरुषांनाही घरची जिम्मेदारी पार पाडण्यास जमले पाहिजे. त्यासाठी पुरुषांनाही या विषयाचे ज्ञान असणे महत्वपूर्ण असल्याने या विषयाकडे मुलांचेही प्रमाण हळुहळू वाढत असल्याचे दिसते.

‘क’ स्तंभालेखावरून स्पष्ट होते की, गृहविज्ञान विषय घरातील व्यक्तीकडूनही शिकला जावू शकतो. या साठी होय व नाही म्हणनारे विद्यार्थी अनुक्रमे ५२ टक्के व ४८ टक्के असलेली आढळली. घरातूनही शिक्षण मिळते परंतु शास्त्रीय दृष्टिने अल्प प्रमाणात मिळते त्यामुळे वैज्ञानिक पध्दतीने माहिती करून घेण्यासाठी गृहविज्ञान विषयाचा अभ्यास करणे खूप महत्वाचे आहे.

अ. गृहविज्ञान विषयात मुख्य किती पेपरचा समावेश असतो माहिती आहे का ?

ब. गृहविज्ञान विषयाचे शिक्षण घेतल्यावर नौकरी / व्यवसाय मिळतो का ?

या विषयी माहिती देणारा स्तंभालेख पुढील प्रमाणे.

अ	ब
होय : २० टक्के	होय : २९ टक्के
नाही : ८० टक्के	नाही : ७१ टक्के

‘अ’ स्तंभालेखावरून महाविद्यालयीन विद्यार्थ्यांना गृहविज्ञान विषयात मुख्य किती पेपरचा समावेश असतो या विषयी होय व नाही म्हणनारे अनुक्रमे ८० टक्के व २० टक्के असलेली आढळली. या वरून स्पष्ट होते की, गृहविज्ञान विषया विषयी अज्ञान असल्याचे अधिक प्रमाणात आढळले तर ‘ब’ स्तंभालेखावरून गृहविज्ञान विषयात शिक्षण घेतल्यावर नौकरी / रोजगार मिळते का या विषयी होय व नाही म्हणनारे अनुक्रमे २९ टक्के व ७१ टक्के असलेली आढळली. या विषयातून अनेक प्रकारच्या नौकऱ्या व असंख्य प्रकारचे व्यवसाय करता येतात, या बाबत अज्ञान असल्याचे आढळले.

### निष्कर्ष

महाविद्यालयीन विद्यार्थ्यांत गृहविज्ञान विषयाची संकल्पना व याविषयाबाबत अनेक गैरसमजुती असलेल्या आढळल्या. याविषयाची संकल्पना माहिती करून घेणे खूप महत्वाचे आहे ज्यामुळे भविष्यात विद्यार्थ्यांना आपले जिवन सुखी, समृद्ध बनण्यास मदत होईल. याविषयाचा अभ्यास केल्याने अनेक प्रकारच्या नौकऱ्या व व्यवसायही सुरु करता येतात. जसे की, बेकरी, बुटीक, डे केअर सेंटर, नर्सरी स्कूल, बालवाडी, अंगणवाडी, अतिथी गृह, ड्रायक्लिनिंग दुकान, खाद्यपदार्थ केंद्र, जलपान गृह, कॅन्टीन, खाद्यपदार्थ सेंटर, वस्त्र उद्योग, डिझायनिंग दुकान, घरगुती हस्तकला, सजावट साहित्य, पेंटिंग, कपड्यावरील फिनिशिंग, साडी डिझायनिंग, कॅटरिंग, उपहार पैकिंग, गुलदस्ते तयार करणे. इ. व अशा अनेक प्रकारचे व्यवसाय या विषयाच्या माध्यमातून विद्यार्थ्यांना करता येतात.

## Coding Technique For DNA Based Storage

Yashesh Laxmanrao Uttarwar

Monash University, Caulfield East VIC 3145

### Abstract

*Humans always want to access the maximum information in minimum time and space. As the next generation computers and High speed internet are achieving that due to which we moved from bones, rock and paper in olden days to the punched cards, magnetic tapes, gramophone records, floppies, bulky hard drives to the latest technology optical discs including CDs, DVDs, Blu-ray discs, and flash drives. As result it made personal data storage convenient. As the time goes these storage devices will decay and they are non-biodegradable and can harm the environment. The new generations are coming with the demand for data storage is growing exponentially and there is need for storage of the data for longer time. Storage medium should have a high capacity and high storage density and it should stand extreme environment conditions. Deoxyribonucleic acid (DNA) is good for the purpose as there is diverse encoding model for reading and writing data onto DNA. DNA uses organic memory device with large data storage and can be used to solve the computational problems.*

**Keywords:** Storage Device, Biodegradable, Deoxyribonucleic acid, Encoding Model, Cryptography, Stenography, Computational problems.

### Introduction

The macromolecule DNA is unique and it is non-volatile recording media as we can still recover DNA of species extinct more than 10,000 years and has high storage capacity a human cell with mass of 3 picogram can hosts DNA encoding 6.4GB of information. The laboratories outlined architectures for archival DNA based storage density of up to 700TB/gram and 2PB/gram, used Huffman coding, differential coding and single parity check coding [1]. The “digital universe” forecast to grow over 16 zettabytes in 2017 and along with that there is greater need of storage. Worlds data is stored on magnetic and optical media, tape technology has tape cartridge of 185TB and dense form is 10GB/mm<sup>3</sup> and optical discs is capable to store 1PB and density of about 100GB/mm<sup>3</sup> to store zettabytes require millions of units and physical space and it should be durable as rotating disc are rated 3-5 years and tape rated 10-30 years. Synthetic DNA sequence considered potential medium for digital data storage [2]. DNA is similar to sequential code of 0's and 1's in a computer. From the research just four grams of DNA can store all the information that world produce in a year [3].

### Related Work

DNA is optimal medium as it consist of adenine, guanine, cytosine and thymine (A, G, C and T) already paired into nucleotide base pairs A-T and G-C which can be utilized for storing information in form of binary code. DNA is considered ideal as single nucleotide can represent 2 bits of information and 455 EB of data can be encoded in 1 gram of single stranded DNA, as DNA is 3 dimensional it offers high space storage information which can be extended to infinity by drying and protecting from oxygen and water. The work analyses writing and reading data in the DNA by using Cryptography and stenography which are DNA secret writing algorithms. Microvenus Projects and Genesis project to encode data on DNA [4]. Other works like rewriteable addressable data (RAD) module which stores digital information in chromosome, it use serine integrase and excisionase function adopted from bacteriophage to restore specific DNA sequences [5]. Other work encoded computer files totalling 739kB of hard disk storage with estimated Shannon information 1 of 5.2 \* 10<sup>6</sup> bits into DNA code, synthesised, sequenced and reconstructed original DNA file with 100% accuracy however challenged they faced was there was difficulty in synthesizing long sequence of DNA [6]. The recent work developed new architecture which overcomes drawback of read only the require decoding entire file they used the coding technique and DNA editing with data reliability, specify and sensitivity to access and provide high data storage capacity and results showed DNA is versatile media suitable to both ultrahigh density archival and rewritable storage application [7]. This work created DNA fountain which is robust and approach

information capacity per nucleotide. Stored data  $2.14 \times 10^6$  bytes in DNA and managed to retrieve 215 Petabyte/gram of DNA which was higher than previous technique [8].

### Proposed Solution

DNA based storage architecture is shown in Figure 1. The digital information and storage are the source and media other blocks represents processing method which is applied on the digital information and storage. Synthesis is biochemical process which creates double stranded DNA string which is encoded data string. Storage stores the DNA string it helps in communication from one point to other. Information source is encoded using standard and error-control coding schemes. The code words are synthesized and added in process and stored. Sequencing is performed through Sanger sequencing or through High Throughput Sequencing (HTS) technique.

### Discussion

In the overall process the DNA is universal archival medium, at present there are many challenges due to many reasons. The overall process of encoding, synthesis and reading the data takes more time. There will be more finding with more experiments and continuous encoding of the DNA the data reading process will show gradual improvements.

### Conclusion

Data storage in DNA is improving at promising rate by research teams all over the world. To come to full potential the DNA based data storage technology has to face challenges. As DNA has qualities of density, robustness, stability and energy efficiency it can be used for archival purposes. There is improvement in reading and writing of data in DNA storage. The cost to do that is also getting lower as the research across the world is taking place.

### Acknowledgments

I am grateful to Department of Electrical and Electronic Engineering, Auckland University of Technology, New Zealand. I would like to express my deep sense of gratitude to my guide Prof. Peter Chong for providing valuable guidance and support during preparation of the research paper.

## Smart City Communication Networks

Monica Laxmanrao Uttarwar

M.S. Auckland University of Technology N.Z.

### Abstract

Smart cities are a very important project which started in 90s and various view point developed to look at it. Smart cities have come into picture as 54% of our population lives in urban areas and there is enormous urbanization. Due to this urbanization it is very important to reduce the concentration and enhance the efficient distribution of traffic. With advancement in time and the Internet of Things (IoT) the smart city is equipped with various kinds of electronic devices which makes smart cities more accessible and applicable with the help of local government and private companies and make citizens life easier. The transformation of smarter cities will require lot of innovation in planning, management and operations.

**Keywords:** Smart cities, Urbanization, distribution of traffic, Internet of Things (IoT), Innovation in planning.

### Introduction

The future of smart cities is introduced with controls using the advanced technologies. It is getting implemented by designing communication networks using communication technologies and personal technologies like smart phones, use of Internet, data storage and various sensors. The future picture after implementation is still debatable and will improve the future of economy, welfare and quality life in our cities [1]. The smart cities appeared since 1998 and are still quite unclear when it comes to meaning as the concept ranges from mesh metropolitan information and communication technologies (ICT) environments. The term appeared in literature in 1998 from urban simulations and knowledge bases and is still evolving to eco-cities [2].

Information and communication Technologies (ICT) sustain development of new urban environment by gathering, analyzing and distributing information resulting improvement in the services offered to the citizens like security, reliability, reducing maintenance cost, improve energy efficiency and making better decisions [3]. Smart cities contain tens of thousands of smart devices which output the data periodically of the unusual traffic patterns which will be distinct from human generated ones.

As there is rapid rise of the population in urban areas structures are needed to supply the continuous requirements of citizens. Which increases growth in digital device, sensors, actuators, smartphones and smart appliances? Interconnection of all devices creates communication between them through internet which was difficult in past [4]. Internet of Things (IoT) is an enabler of broad range of applications as it helps very powerful devices like smart phones, tablets, laptops and lower powerful devices like sensors to join the internet and activate new type of services. [5].

### Related Work

There are many projects and models have been introduced for the smart cities like national and international investments such as The Technology Strategy Board demonstrates the project in UK and various frameworks programmed 7 EU-funded research projects which are in their early stages. Smart sensor information feeding helped in San Francisco to reduce wait for parking space. These project work according to below figure as first stage is real time data collection in the form of inputs and is considered as the raw data which consist of date, time, location, communication patterns and services accessed. Then there is a phase of Information component which includes number of mobile subscribers and their usage patterns and finally information product which helps to make improved decision and improved response rate [1].

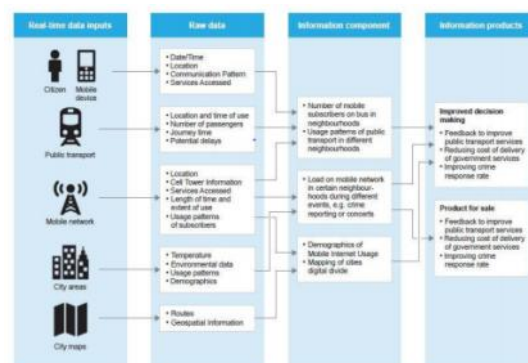

Fig. 1 Information Marketplace value Chains [1]

These technologies in Australia, Brisbane and Blacksburg helped in availability of public information and services. It created the business opportunities in network of Malta, Dubai and Kochi and integrated into everyday objects and activities and later smart city has been termed as digital cities in broader term and introduced generic multi-tier common architecture. The six-domain model came with six main challenges to manage urban community providing an economic base, building efficient urban infrastructure, improving the quality of life and place, ensuring social integration, conserving natural environmental qualities and guaranteeing good governance. Smart cities helped European Research Projects Smart Growth in Transportation, Government, Safety, Society, Health Care, Education, Buildings, Urban Planning, Environment, Energy and Water [2].

There are numerous innovators and start-up companies which are working on success stories related to smart cities of parking monitoring. Installation of sensors helps to detect presence of each parking spot, street line also reduces time looking for parking by 43% and load sensing which is a world sensing company equips urban infrastructure of small sensors, it monitors health of structures which results in safer urban environment. Research in University of Michigan focuses on entire network of clean water and sewers, it is monitored in real time to ensure optimal water quality and reduce risk of flooding [3]. Smart cities include sensor which gather and analyze data in networks it can remotely monitor power usage monitoring to improve electricity usage, light management, air conditioning management. It can be used to caution the customers in case the population is above acceptable limit other smart house and appliances includes smart TV's, home security system, lighting control, fire detection, and temperature monitoring [4].

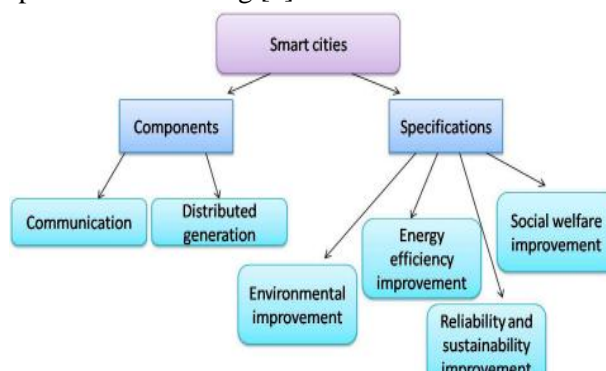

Fig. 2 The key aspects of smart cities [4]

The smart cities have lot of capabilities like in terms of transport, used for dynamic route calculation informed of accidents and congestions. Helps in reporting faults for energy and detection of accidents and crimes in emergency services. It can used to monitor detection of full bins in case of waste management, helps to report air and water pollution and produces data on large events such as concerts to inform public transport [5].

### Proposed Solution

The smart cities are very important project to keep the control over the urban areas which are increasing as 54% of population is living in the urban areas. In this project we will be using sensors and focusing on the modeling, analysis and design of communication network. We will be gathering all the information as this project will have information as the crucial part which will help in development of new smarter urban environment.

The project focuses on improving how the traffic can be circulated in the area and it is implemented and created with the help of communication network model which satisfies low latency, flexible traffic requirement which helps in creating the sensor network in that way proper monitoring can be done.

As the idea of smart cities has been with us for many decades and hence it is very important to find the solution to rapid growing urban areas and implementation of the smart cities will help towards making the daily things easy for people living in urban areas. Our modeling and analysis focus on traffic aggregation and distribution between Cloud and devices connected to the network and in that way, it can help towards social welfare of the community and help towards building energy efficient smart cities.

## Discussion

With the help of living labs city can be used as real-world testing ground for innovation, new ideas and technologies. It uses variety of technology from real time feedback sensors to latest networks and testing and in return to be able to optimize results generated. Sensors are used to gather and transmit the data and wireless networks and softwares manage the data. Principle element of system is wireless network transmit data software controls the sensors, these projects are subsidized by the government or international grants [1]. Smart cities have given solution to many of the application domains like, resources which deals with natural resources, energy, water monitoring and management, Transportation helps to manages mobility and intelligent transportation. Urban infrastructure which is building and agglomeration. Living which has education, health, safety and quality of life in urban space. Government which has public e-service delivery, e-democracy and participation, accountability and transparency and administration efficiency in the city and economy which covers areas that reflect domestic product in the city and employment and e-business [2]. The smart cities have provided lot of solutions which created success stories like parking monitoring by installing 2 sensors which detect presence of vehicle on each parking spot. Clean water and sewers are monitored in real time for quality of water and reduce risk of flooding [3]. Monitoring air and noise pollution by sensors in IoT helps to reduce concerns in environment, in return provides high quality of water and waste management which is result of monitoring water sources and water distribution systems. IoT monitors the power usage to improve electricity usage, light management and air conditioning management [4]. The smart city received significant research effort and technological development due to population growth and urbanization. In case of smart cities implementations sensors are very important component of intelligent control system, as they translate large number of opportunities in terms of sensing eg- meters to determine gas, electricity, water etc. [5].

## Conclusion

As the smart city concept was introduced decades ago, it is a booming phenomenon and is still ambiguous in the literature. The three industries ICT, construction and electronics are corresponding market which are creating and meeting domain. Many planning and experiment are taking place in the form of living labs in the small cities in UK to provide us the datasets and then it can be planned for the other subsequent places.

Information and communication technologies are important for development of new urban environment, smart cities provide the ability to gather, analyze and distribute information to improve operational efficiency and better decision making. The new concept and technologies like IoT help a lot for implementation of smart cities, moreover there are some challenges like privacy rights of the users/residents is still the area of research interest. It is important that IoT employs smart systems and sensors and ensures residents rights. Other challenges may come from cyber-crime which includes cyber terrorism and cyber-vandalism. There is lot of research going on to make the smart cities concept perfect and beneficial for the citizens.

## Biodiversity Conservation And Environmental Awareness- Role Played By Higher Education In India

**K.E.Chaudhary**

M.V.D.Mahavidyalaya,Amravati (M.S.)

### Abstract

*Biodiversity is the sum total of all species found in given place at a specific time, it includes the all life types from microbes to the plants and animals, which are part of given ecosystem. In India Environmental provisions were introduced in the constitution in 1974. and several laws pertaining to the protection of air ,water, forest .and wildlife were enacted.. Laws are apt to be broken. But if there were no laws the planet would have been in worse shape than what it is now. A careful examination of the various provisions of the act reveals that they need to be modified in light of the present environmental problems, need and experiences. Education is one of the key solution for this situation. It is very important for any individual's success in life. The quality of our environment has been constantly degrading and the stocks of nonrenewable resources are decreasing at a very fast rate which lead to destruction of Biodiversity. It would be impossible for humans to survive for very long .It is in above context that the subject of ecology and its branches are now finding place in school, college and university curricula .The knowledge lead to the awareness of environmental awareness which shows the great emphasis of scientific community of India on the conservation of natural resources .therefore the study is restricted to the role of higher education in biodiversity conservation.*

**Keywords ;**-Biodiversity, ecological awareness.

### Introduction

Biodiversity is the most important natural resource which cater the basic needs of human society. Environmental degradation due to anthropogenic activities reflected in the environmental analysis have now begun compiling natural resources accounts along natural accounts system. The results of such studies will be of great significance for developing countries which are exploiting their natural resources to the detriment of future generation which will lead to corrective methods to ensure the rich resources. It would be impossible for humans to survive for very long .It is in above context that the subject of ecology and its branches are now finding place in school, college and university curricula .The knowledge lead to generate environmental awareness which shows the great emphasis of scientific community of India on the conservation of natural resources. The study reveals the role of higher education in creation of environmental awareness among the society by introduction of Environmental studies as compulsory subject in curricula of graduation level in all the faculties of universities and in all the branches of professional education. Higher education is the aspect of education that is acquired by students after the completion of their higher secondary and with a mind set to archive further detailed study in various subjects and technologies and research .

### Discussion

The quality of our environment has been constantly degrading and the stocks of nonrenewable resources are decreasing at a very fast rate. It would be impossible for humans to survive for vary long.It is in above context that the subject of ecology its branches are now finding place in schools college and university curricula. In Universities like Sant Gadge Baba Amravati University, R.T.M. Nagpur university and other Universities in India . After graduation the students become leaders of tomorrow and get dispersed from the world of higher education into their specific career. In doing so, they take with them the green practices and approaches they were involved with at their institutions. As a researcher in the field Of biodiversity and ecology I used to encourage the students to deal with the day today aspects of environmental problems in the light of ecology and environment studies . students work with some NGO like Wild Life and Environment Conservation Society, Youth Hostels ,ROTARY Club Garden Club in the field of Water harvesting ,tree plantations ,Nature trails ,River Reading, Bird Watching and other activities which in turn create awareness in society about conservation of nature. College students also participate in programmes like NSS and NCC camps activities includes social interaction about water conservation , conroll of air pollution .noise pollution and water pollution.

Public participations on environmental issues can be on several stages, firstly when an industry comes into existence and secondly when it starts functioning. The NGOs can also involved in decision making processes . Kumar and Patil (2007) conducted a study on influence of environmental education on environmental attitude of the post graduate students. For this purpose 120 post-graduate students were selected and were administrated the environmental pollution attitude scale. It was found that students with environmental education back ground had better environments attitude. It was also found that there is no significant difference between male and female students in their attitude towards environmental pollution and

related issues While may regard the twentieth century as the period of maximum environmental degradation and fast extinction of Biodiversity. We must strive through creation of wide spread awareness and education in the coming ten years. Decade of ecological restoration and eco technological growth. The scope of this study is restricted to basic ecological considerations of environment and reciprocal impacts with living things including human beings and sources and kinds of environmental pollution and possible control methods.

In Canada birth rate fall down by 25 percent in the last decade. Experts point out to an array of factors including increasing education for women, the urbanization and breakdown in family units. One factor is higher education that has given career opportunities that caused women to rely on pension plan, rather than their children.

UNCED the "Earth Summit" held in Rio de Janeiro, Brazil in 1992 set out the agenda i.e. Action Plan for 21<sup>st</sup> century it calls for greater international scientific cooperation and efforts to transfer environmentally sound technologies from nation to nation in such areas as renewable energy materials recycling and satellite imagery for land management. The study of environmental economics should aim at defining policies that will lead to solutions of global environmental management through cooperative efforts of entire human society. Environmental analysis have now begun compiling natural resources accounts along natural accounts system. The results of such studies will be of great significance for developing countries which are exploiting their natural resources to the detriment of future generation which will lead to corrective methods to ensure the rich resources. Education is one of the key solutions for this situation. It is very important for any individual's success in life. It provides skills that prepare an individual physically, mentally and socially confident to solve many problems in the society. Education is major aspect in development of any modern society. It is generally seen as the foundation of society which brings economic wealth, social prosperity and political stability. In today's fast growing and competitive world, people mostly are not satisfied with their basic education and enter for higher education.

Ongoing research are going on bacterial and virus transport, in ground water and bioaccumulation of metals such as arsenic, mercury lead and monitoring of pathogens in air would yield fruitful results in near future for the protection of public health Kumar and Patil (2007) conducted a study on influence of environmental education on environmental attitude of the post graduate students. For this purpose 120 post-graduate students were selected and were administered the environmental pollution attitude scale. It was found that students with environmental education background had better environmental attitude. It was also found that there is no significant difference between male and female students in their attitude towards environmental pollution and related issues. Every university is unique and has its own traditions, culture and geographical area. They are familiar with their surroundings. They can use their existing knowledge and trained manpower to address problems and issues concerned at the local level, as well as related to the national and global community. Universities can exchange the information by establishing a strong regional information network. These can promote good neighborly relations and respect for human rights. Universities can lead in promoting environmental equilibrium. They have a right and a duty to indicate where problems exist. They should look for, find and create tools to solve those (Hans, 2000). Universities can help to establish the sustainable development through following aspects:

### Conclusion

The higher educational Institutions have the capacity to give quick responses to different societal problems specially related to environment. Today, the human society is facing severe environmental problems like climate change, greenhouse effect, energy crisis, depletion of natural resources, biodiversity loss, pollution of air, water, soil, etc. The scope of the problems is from local level to global level. The ever increasing population and changing life styles are increasing the severity of the environmental problems. The time has come to protect the natural environment through precise efforts. Education is one of the key solution for this situation.

## Risk Assessment And Risk Management

Ms. Tejal Shrikrushnrao Karale.

(MBA-1<sup>st</sup> Sem-I) Student of Department of Management Studies,  
Prof.Ram Meghe Institute of Technology & Research, Badnera, Amravarti, Maharashtra-India.

### Abstract

*Risk assessment and management is the process of analyzing the issue and making action on it. Principles, Strategies and methods were developed for how to analyze and manage risk. These principles and methods represent to a large extent the foundation. But many advances have been made, linked to both the theoretical platform and practical models and procedures. The fundamental ideas and thinking that form the generic risk research looked for trends in perspectives and approaches and on where further development of the risk field is needed and should be encouraged.*

**Keywords:** Risk Assessment, Risk Management, Qualitative and Quantitative Method, Financial Decision, Loss.

### 1. Introduction

There are some factors which negatively impacts assets, individual, or the environment of organization, identifying and studying those factors in concern with future of organization is “Risk Assessment”. After analysis some actions or plans are made to make judgments on how to manage that risk factors and that is called as “Risk Management”. The methods used for the management of risk can be Quantitative or Qualitative. Strategies are made to introduce controlling measures to reduce or decline risk consequences.

Risk management is about balancing different concerns, profits, safety, reputation, etc. In general one considers a set of alternatives, evaluates their pros and cons, and makes a decision that best meets the decision-makers’ values and priorities. Priority has been given to works that are judged to be of special contemporary interest and importance, recognizing the subjectivity of the selection and a deliberate bias towards rather recent papers and the areas of interest of the author of this manuscript.

### 2. Concept

Rapid changes in technology, increasing market competition, increasing system integration and industrial complexes have increased societal risk from last few years. Risk assessment gets more complex in resolving the accidents, improving safety and increase in outcomes. Risk assessments have objectives to evaluate the risk by which assumptions, pros & cons are considered. It involves identification of problem that could be happen in future, its consequences, and recurrence probability, the acceptability of the risk and ways or actions to get out or reduce probability of the risk. It also involves documentation of the risk assessment and its findings, implementation of mitigation methods, and review of the assessment, coupled with updates when necessary. Sometimes, the risk is tolerated, it deemed due to the cost of difficulty of implementing an effective course of action for curing the increasing loss.

### 3. Research Methodology

This study is to understand how the risk assessment and management takes place. Also some techniques for risk analysis and management are discussed with factors influencing it. The research work is based on secondary data collected from –

- Journals and Articles
- Newspaper
- Internet

### 4. Objectives Of Study

The research was conducted on the basis of following objectives –

- To understand the concept of “Risk”.
- To understand the techniques for risk assessment and management.

### 5. Risk Assessment Levels

#### Risk Assessment of Individual

Risk assessment is much needed in personal or individual cases. There are some factors like personal, physical, psychological, ideological, religious or some other subjective factors, which influences on the process of goal achievement. In some cases the risks can be directly controlled by voluntary actions. After knowing all consequences people can’t control themselves such as all people know smoking, drinking, tobacco chewing , taking drugs is too much dangerous for health but they don’t refuse to do it.

### Risk Assessment of System

“Systems Scale” form can be used to assess the risk. In the big plants like nuclear power plant where all type of systems are needed such as nuclear, electronic, mechanical and humans. Systems may be linear and nonlinear, Linear systems are easily understandable and predictable while changes have been done. But in case of non linear systems, these are little bit complex and unpredictable when changes are made. It is more challenging. The nuclear, oil, agriculture, railroad, military and aerospace industries have to more deal with risk assessment. Also food, medical, hospital, social service performs risk assessment on continue basis. Methods of risk assessment differs with different industries. Decisions are taken under financial, ecological, public health and environmental aspects.

### 6. RISK MANAGEMENT PRINCIPLES AND STRATEGIES

Before looking into recent developments in fundamental risk management principles and strategies, it is useful to review two well-established pillars of risk management: (a) Main risk management strategies available (b) the structure of the risk management process

Fig. 1. A model for linking the various stages in the risk informed decision-making (based on Hansson & Aven, 2014)

The development and operation of policies are often structured by the following stages inspired by decision theory (e.g. Althaus, Bridgman, & Davis, 2007):

- ✓ Problem identification—the recognition of an issue that demands further attention
- ✓ Generating alternatives, analysis
- ✓ Processing covering aspects like policy instrumentation development, consulting, deliberation and coordination
- ✓ Decision-making
- ✓ Implementation
- ✓ Evaluation (assessing the effectiveness of the policy)

### 7. Mathematical Conceptualization

Risk assessment from a financial point of view: To see the risk management process express mathematically, one can define total risk as the sum over individual risks,  $R_i$  which can be computed as the product of potential losses,  $L_i$ , and their probabilities,  $p(L_i)$  :-

$$R_i = L_i p(L_i)$$

$$R_{total} = \sum_i L_i p(L_i)$$

Even though for some risks  $R_i, R_j$ , we might have,  $R_i = R_j$  if the probability  $p(L_j)$  is small compared to  $p(L_i)$ , its estimation might be based only on a smaller number of prior events, and hence, more uncertain. On the other hand, since  $R_i = R_j$ ,  $L_j$  must be larger than  $L_i$ , so decisions based on this uncertainty would be more consequential, and hence, warrant a different approach. Financial decisions, such as insurance, express loss in terms of dollar amounts. When risk assessment is used for public health or environmental decisions, loss can be quantified in a common metric such as a country's currency or some numerical measure of a location's quality of life. For public health and environmental decisions, loss is simply a verbal description of the outcome, such as increased cancer incidence or incidence of birth defects.

In that case, the "risk" is expressed as  $R_i = p(L_i)$  If the risk estimate takes into account information on the number of individuals exposed; it is termed a "population risk" and is in units of expected increased cases per a time period. If the risk estimate does not take into account the number of individuals exposed, it is termed an "individual risk" and is in units of incidence rate per a time period. Population risks are of more use for cost/benefit analysis; individual risks are of more use for evaluating whether risks to individuals are "acceptable".

### 8. Quantitative Risk Assessment

In quantitative risk assessment an Annualized Loss Expectancy (ALE) may be used to justify the cost of implementing countermeasures to protect an asset. This may be calculated by multiplying the Single Loss Expectancy (SLE), which is the loss of value based on a single security incident, with the Annualized Rate Of Occurrence (ARO), which is an estimate of how often a threat would be successful in exploiting a vulnerability. Barry Commoner, Brian Wynne and other critics have expressed concerns that risk assessment tends to be overly quantitative and reductive. For example, they argue that risk assessments ignore qualitative differences among risks. Some charge that assessments may drop out important non-quantifiable or inaccessible information, such as variations among the classes of people exposed to hazards, or social amplification.

### 9. Assessment Of Risk

The risk assessment process may be informal at the individual level, managing household and economic risks, or it can be a complex process for strategic corporate level. But in both the cases deciding future events and effective strategies to mitigate the issues are vital. At personal or individual level, identifying objectives and risks, giving reference importance and create alternatives may be all that is necessary. But while talking about organizational level, more policies are necessary, risk levels to be specific and acceptable and process should be followed within the organization and allocation of resources should be maintained.

### 10. Resilience

Resilience types of strategies play a key role in meeting risk, uncertainties, and potential surprises. The level of resilience for a system or organization is linked to the ability to sustain or restore its basic functionality following a stressor.

- A resilient system has the ability to (Hollnagel, Woods, & Leveson, 2006):
- Respond to regular and irregular threats in a robust yet flexible(adaptive) manner,
- Monitor what is going on, including its own performance,
- Anticipate risk events and opportunities,
- Learn from experience

### 11. Large/ Deep Uncertainties

The above analysis covers in particular situations characterized by large or deep uncertainties, such as in preparing for climate change and managing emerging diseases. What policies and decision-making schemes should be implemented in such cases?

Traditional statistical methods and techniques are not suitable, as relevant supporting models cannot easily be justified and relevant data are missing. The answer is as discussed above, cautionary/precautionary, and robust and resilient approaches and methods.

### 12. Fields Of Application

Risk assessment is done in wide range of fields, with different codes of practice, legal obligations, rules and regulations. Some are discussed as follows :-

#### Risk While Auditing

Risk assessment is a crucial stage before accepting an audit appointment. Audit risk is defined as the risk that the auditor will issue a clean unmodified opinion regarding the financial statements, when in fact the financial statements are materially misstated, and therefore do not qualify for a clean unmodified opinion.

#### The Risk Field And Science

Generic risk research to a large extent defines the risk science. However, applications of type may also be scientific if the work contributes to new insights, for example a better understanding of how to conduct a specific risk assessment method in practice. Rather few publications have been presented on this topic, discussing issues linking science and scientific criteria on the one hand , and risk and the risk fields on the other.

#### Science, Knowledge And Decision Making

In Hansson and Aven (2014)a model which partly builds on ideas taken from Hertz and Thomas (1983), is presented, showing the links between facts and values in risk decision-making. Data and information, gathered through testing and analysis, about a phenomenon provides the evidence. These data and information contribute to a knowledge base which is the collection of all "truths" (legitimate truth claims) and beliefs that

the relevant group of experts and scientists take as given in further research and analysis in the field. The evidence and the knowledgebase are supposed to be free of non-epistemic values.

### Public Health

Regarding with health risk assessment is the process of characterizing the nature and likelihood of a harmful effect to individuals or populations from certain human activities. Health risk assessment can be mostly qualitative or can include statistical estimates of probabilities for specific populations. In most countries the use of specific chemicals or the operations of specific facilities (e.g. power plants, manufacturing plants) is not allowed unless it can be shown that they do not increase the risk of death or illness above a specific threshold. For example, the American Food and Drug Administration (FDA) regulates food safety through risk assessment.

### Project Management

With respect to project management, risk assessment is an internal part of the risk management plan, studying the probability, the impact, and the effect of every known risk on the project, as well as the corrective action to take should an incident implied by a risk occur. Of special consideration in this area are the relevant codes of practice that are enforced in the specific jurisdiction.

### Precautionary Principles

A principle expressing that if the consequences of an activity could be serious and subject to scientific uncertainties then precautionary measures should be taken or the activity should not be carried out; A principle expressing that regulatory actions may be taken in situations where potentially hazardous agents might in duce harm to humans or the environment, even if conclusive evidence about the potential harmful effects is not (yet) available

### The Future Of Risk Assessment And Management

Risk decisions are, to an increasing extent, about situations characterized by large uncertainties and emergencies. Such situations call for different types of techniques, approaches and methods, and it is a main challenge for the risk field to develop suitable frameworks and tools for this purpose.

## 13. Conclusion

Risk assessment and risk management provide important contributions in supporting decision-making in practice. Basic principles, theories and methods exist and are developing. Future risk are better analyzed and decisions are made promptly. The scientific foundation of risk assessment and risk management is still somewhat shaky on some issues, in the sense that both theoretical work and practice rely on perspectives and principles that could seriously misguide decision-makers. Examples include the general conception of risk as an expected value or a probability distribution. There are signs of a revitalization of the interest in foundational issues in risk assessment and management, which is well-commended necessary for meeting the challenges the risk field now faces, related to societal problems and complex technological and emerging risks.

## A Study Of New Trends In Marketing With Special Reference To Digital Marketing

Mr. Aashish Prakash Jajoo,

Assistant Professor, College of Management And Computer Science, Yavatmal

### Abstract

*In the current business environment consumers are searching more on the internet for the best deals. This paper presents ideas on some current and future trends in marketing. It is based on content what is happening in the world of business and marketing? It is based on secondary data available on Internet. Various articles, research papers, reports, newspapers, magazines, information on various websites and the Internet have studied. In this study, I have accepted that Businesses can actually benefit from digital marketing such as Search Engine Optimization, Search Engine Marketing, Content Marketing, Affected Marketing, Social Media Marketing, etc. Digital marketing is effective and has a great commercial impact on business. Under this paper I am trying to explain which mode of digital marketing is useful for company to target market.*

**Keywords-** Internet, Marketing, Social Media, Marketing Trends, Digital Marketing

### Introduction

Marketing is the process of teaching consumers why they choose their product or service from their competitors, and is a form of persuasive communication. It is made up of every process involved in carrying a product or service from your business to the consumer. Marketing involves creating a product or service concept, identifying who is likely to buy it, promoting it, and advancing it through appropriate sales channels.

Marketing is a restless, ever changing and dynamic business activity. The role of marketing Changed due to rapid technological changes in world. Such changes, including has forced today's marketing executive to use new trends in of marketing in market. A formal means of making strategic decisions, accurate and timely, is required Information about customers, products and markets and the overall environment. Internet Marketing involves the use of the Internet to market and sell goods and services. It is said that Internet marketing first began in the beginning of 1990 with just text based websites which offered product information. With growth in internet, it is not just selling products alone, but in addition to this, information about products, advertising space, software programs, auctions, stock trading and matchmaking. This new concept of marketing is known as Digital Marketing.

Digital marketing trade in India is introduced in most business areas. Increase Online marketing trend is huge Impact on marketing and advertising. Digital Marketing means Marketing products or services through online Channel. Using online channels such as websites, Apps, search engines, email and social media for attracting the customers is called digital marketing. The Main difference of Digital marketing and traditional marketing, with the use of digital channels and methods Enable organizations and businesses to monitor their marketing success Campaign, even in real time, which helps Understand what works and what does not. This paper offers views on some current and future trends in Digital Marketing.

### Objectives of Study

1. To understand the meaning of New Trends of Marketing
2. To understand meaning of Digital Marketing
3. To understand future trends of Digital Marketing

### Review Of Literature

Research methodology is partly descriptive, partly exploratory and partly casual. For this study data and information has been collected with the help of Books, Magazines, Newspapers, Research Articles, Research Journals, E-Journals, etc.

### Meaning of Digital Marketing

Digital marketing has become one of the most popular marketing over the years. Everyone is talking about digital marketing and professionals praise that this is the way to grow online business. Digital marketing

is a broad term that includes all marketing channels and methods that you can use to promote products or services on the Internet, but also on electronic devices such as TVs, mobile phones, and electronic billboards.

The main difference between digital marketing and traditional marketing is that digital marketing campaigns are executed exclusively through digital channels and this gives marketers more control, tools, and data to analyze the effectiveness of a campaign.

Digital marketing has many channels and can be separated into online marketing channels and offline marketing channels. The main difference between the two is that online marketing channels are entirely based on the Internet whereas what offline marketing channels have to do with digital devices is not necessarily connected to the Internet.

Following are the 8 different types of Digital Marketing Channels through which digital marketers operate.

- 1) Website: Website is online presence of company. Every business should have proper responsive website to take advantage of Digital Marketing. The website must satisfy the very important things like responsiveness, user friendliness, easy to navigate and consumer tracking tools so that more consumers can attract towards the products or services.
- 2) Search Engine Optimization (SEO): SEO is the process of increasing the ranking of a website or web page in unpaid "organic" search lists. It will help website pages rank higher in the SERP (search engine result page) to increase visibility, Alexa score, and visibility. The higher a page is in search engines, the greater the chances of getting clicks, and thus the more activity, traffic, and conversions are received. A digital markets can help in this.
- 3) Pay Per Click (PPC): This is one of the effective and speediest types of digital marketing. It drives targeted traffic to website and web pages. When done properly, it can bring profitable return on investment.
- 4) Email: Email is a digital marketing channel which acts as a connecting link between the businessman and probable customer. This is the old form of digital marketing channel which optimizes sales by ensuring engagements.
- 5) Video Marketing: Videos can be the digital marketing channel which makes big social impacts by making connections between business organisation and Viewers. Advertisers need to understand that a lot of training is required to produce the best video which brings in great profits on investments. A digital marketing agency can help you in this regard if you need professional help.
- 6) Blogging: A blog is a digital marketing channel with content writers and readers; recordings, news subjects, podcasts, affiliate marketing, and other content that fills affect the market. A good blogger should from the strategy to for all this.
- 7) Social Media: This is the modern and most appealing digital marketing channel. Social networking channels such as Facebook, YouTube, LinkedIn, Google+, Twitter, and Pinterest are all this attracts huge traffic. With the help of all this social media channels business man can market their products and services.
- 8) Affiliate Marketing: Affiliate marketing channel uses someone else to sell your products or services. This is also known as commissioned sales job. There are several affiliate-marketing programs, and each has its own guidelines, advantages, and disadvantages.
- 9) Mobile Marketing: The mobile users are increasing day by day. Now marketers designs content, website, apps is being customized for mobile devices. People prefer Mobiles, Tabs instead of computers, Laptops so mobile marketing is the most effective way of marketing.

### **Future Trends of Digital Marketing in India.**

India is one of the fastest growing economy in the world and digital marketing is now a very important part of the Indian Economy. Indian government has launched various digital payment promotion schemes which motivated people in India to use more online medium.

Telecom sector is also a play an important role in India's digitization. Free and unlimited Internet facilities introduced by some telecom company has played a revolutionary role roll in Digital Marketing. Now a day, Indian Banks are offering customer friendly and more secured money transaction services. People are Spend more of their time online than Last year. So exists on digital device is a necessity for businesses, which will help for more opportunities and development. Digital marketing creates lots of business opportunities in marketing and development of building long lasting relationships, Reach target customers, generate good numbers of lead and at less cost.

Now the consumer is spending more time on internet surfing and social media. Through digital marketing business can reach more consumers, they can increase their visibility in compared to traditional marketing Methods.

Number of Internet Users in India from 2015 to 2023 (in millions)

According to survey the number of internet users in India is increase day by day in very fast speed. This figure is projected to grow to 666.4 million internet users in 2023.

Number of Facebook users in India from 2015 to 2023 (in millions)

According to survey the number of Facebook users in India is increase year by year. This figure is projected to grow to 666.4 million Facebook users in 2023.

Now if any company wants to reach maximum number of people they have to choose digital marketing channel for marketing.

### Digital Marketing and Advertising

Digital Marketing and advertising is influencing peoples to buy and sell online and e-commerce is getting more and more sales. With a high growth through Digital marketing in business companies have starter spending more and more in Digital marketing as they are getting better ROI in Digital medium compare to traditional, another major benefits are all the expense and return are measurable which is not possible in Traditional Marketing.

High Demand of Managing Companies activity over Online marketing and improve company visibility has opened a new door or opportunity. Demands are higher than supply so Peoples have one new career stream as Digital Marketer which is flexible and providing high career growth. Digital Marketing is a rapid career growth not only in India but also throughout the world. Companies are getting more and more dependent over internet to generate faster revenue for their business.

### Conclusion

I conclude that the Digital marketing is growing with a rapid speed not only in India but whole the world as well. While all other Industry are growing at rate of 5-10%, Digital marketing industry is booming high and already achieved growth rate of 30% last year and estimated growth for year 2020 is 40% and the most important part is that growth rate is not going to be stagnant in coming years. As the internet users are increasing day by day digital marketing will also grow in compare to traditional marketing Companies are

shifting their advertising budget from traditional marketing to digital marketing strategies. Studies indicate that the number of consumers who shop online in India is likely to cross 250 million by the end 2020, and the e-retail market is expected to increase to 65% in the year 2020. Such figures are clear indication that the digital marketing services will continue to experience tremendous growth and changes. Businesses in India need to accept the digital changes and adopt the trending innovations to stay competitive business environment.

**Challenges Of Green Marketing In India- A Conceptual Study****Dr. Archana V Bhangdia (Bajaj)**

HOD Economics

Arts &amp; Science College, Kamargaon Dist Washim

**Abstract**

*Green marketing means marketing of the products which are environment friendly. Green marketing is a modern concept it is developed due to harmful effect on environment. Green marketing is necessary because if the increasing environment problems all over the world. India is developing country and in India too green marketing captures the attention of all. The main aim of the paper is find out the purpose and challenges of green marketing. This paper used descriptive research design and secondary method of data collection. Results shows that purpose of emergence of green marketing are government and competitive pressure, social responsibility, consumers needs, environment protection, long run survival etc. Challenges of the green marketing are high cost, less consumer awareness, price sensitive customers, less trust etc. The conclusion in the study is green marketing is a modern concept. Green marketing needs high efforts from all the side because in India green marketing is on initial phase, but green marketing is necessary for the clean environment to the future generation.*

**Introduction**

Green marketing is very popular term in the today competitive environment. Green marketing means marketing of the products which are environment friendly. Green marketing incorporates a broad range of activities including product modification, changes in production process, sustainable packaging as well as modifying advertisement

1. In the today scenario globalization green marketing is very important factor of success. Developed countries, developing countries and underdeveloped countries are using green marketing to protect them from harmful effect of chemical products. Green marketing reduces the harmful effect on environment and more safe for the human being. Green marketing comes into existence due to various reasons such as increasing acid rain, depletion in ozone layer, degradation of land, green house effect, increasing pollution etc. Green marketing also knows as environment marketing, ecological marketing, sustainable marketing etc. Terms like Phosphate Free, Recyclable, Refillable, Ozone Friendly, and Environmentally Friendly are some of the things consumers most often associate with green marketing
2. Green marketing is for “Go Green” in product and production process which is environment safe plus makes profit for the organization by satisfying consumers. Green marketing is totally a new concept with new approach. This concept developed very fast in India because of the positive response from customers, organizations, government etc. Even customers become educated in India they know the importance of environment and don't hesitate to pay some extra money for the product which is environment safe. Green marketing is also facilitating a new segment in market segmentation named green consumers who prefer green products. There is 4P of green marketing: Green Product, Green Price, Green Promotion and Green Place. Green marketing is not a simple task it requires lots of efforts from the organization, government and consumer part. Eco- labels are used by the organization to show that the product is environment safe. Famous organizations are even supporting green marketing in India like Infosys, Wipro, Maruti, Tata, Johnson and Johnson, Hero Honda, New Surf Excel, Life Boy, McDonald's, Phillips etc. In India government is putting pressure on organization and consumer to use paper bags instead of plastic bags which are harmful for the environment. Some common examples of green marketing are use of nature resources, use recycling, reduce plastic, reduce toxic etc. Green marketing is helpful in educating customers about the benefit of using natural and organic products which is good for them and environment. This paper discusses the reason for emergence of green marketing and challenges under it.

**Review Of Literature**

Nadaf & Nadaf (2014) [3] studied the challenges in green marketing in India. The main aim of the paper was to evaluate challenges and strategies for green marketing in India. This paper used secondary method of data collection. They found that government, consumer and competition were the main reason of emergence of green marketing in India. They concluded that high cost, less consumer awareness, less creditability, misleading claim were the reasons for challenges in the green marketing and better management, control, technology and good marketing plan were suggestion for the better management of green marketing.

Sen (2014) [4] studied about the green marketing impact on consumer buying behavior. The main objective of the paper was to evaluate impact of green marketing on consumer purchasing and challenges under it. Data was collected through primary and secondary source. This research was performed in Kolkata. Explanatory research design was adopted in the study. For selecting sample convenience sampling design was adopted. Total 100 respondents were selected as sample under the study. Mean, S deviation, percentile and t-

test were used to analyze the data. They found that consumer were ready to adopt green products even at high price to save the environment. Better design, better management and better adoption were the excellent concept of green marketing.

Singal, Garg & Singla (2013) [5] studied about the opportunities and challenges in the green marketing. The main aim of the paper was to find out opportunities and challenges in green marketing in the context of India. Data was collected through secondary method of data collection. They found that green marketing challenges were new concept, need for standardization and need for patience. They suggest that know your customer, be transparent, empower consumer and reassure customer were the ways of improvement in green marketing. Singh & Pandey (2012) [6] studied the topic "Green marketing policies and practices for sustainable development". The main aim of the paper was to find out the influence of green marketing on customer satisfaction. This paper was based on secondary method of data collection. Descriptive research design was used under the study. They found that consumer perception changed a lot from the past. Customer want environment safe products and even they were ready to pay premium price for the product which was less harmful to the environment. They concluded that green marketing open the door for new market segmentation called green consumer. Company started segmented the market on the basis of customer who used green products.

Cherian & Jacob (2012) [7] studied about the consumer attitude the environment friendly product. The main aim of the paper was to evaluate the consumer attitude towards green marketing. This study was based on secondary data. This study was qualitative in nature. They found that green marketing need of the hour. Companies focus on maximization of profit with environment friendly products. They concluded that Indian scenario changed a lot people pay more for safe environment and protection of the future generation. They suggest that with better product, reasonable price and proper awareness green marketing was an excellent concept. Objectives these are the objectives of the study:

- To analyze the purpose of emergence of green marketing in India.
- To find out the challenges of green marketing in India. Research methodology this paper is descriptive in nature use secondary data for data collection from journals, newspaper, internet, magazine etc. Purpose of green marketing everything which exists in the world is off course for a purpose. Green marketing emergence is some special purpose such as:
- Social responsibility: green marketing is social responsibility and it's under the concept of EPR (extended producer responsibility). It is social responsibility of every producer and even consumers also to save the environment from the harmful effect of chemical products.
- Government Pressure: Indian government is also pressurizes the companies to develop green products and make their production process environment friendly. Government is also promotes green marketing to attract consumers.
- Competitive Pressure: Globalization increase the pressure on the organization to provide competitive product. Firms have face competition not with only domestic firms but also with the global firms.
- Profit in the long run: existence and profit in the long run is possible through the green marketing.
- Environment protection: Protection of the environment is necessary for future survival. Green products are environment friendly so it reduces the harmful effect on environment.
- Better standard of living: Adoption of green marketing leads to better standard of living of the human being.
- Good health: Green products are good for health because it is produced by organic methods. People want products which are good for their health.
- Protection: There is need of protection of land, air, water, wildlife etc which is possible through green marketing.
- High initial cost with low cost in future with more profitability: Green marketing installation includes high cost because of research and development, technology adoption but the cost reduce in future and this will lead to high profit in future with long term survival.
- Opportunities: Green marketing consider as great opportunities for the future. Green marketing is a new concept and a new concept is not easily accepted.

These are the some challenges in the field of green marketing:

1. Requires huge investment: For green marketing there is need to invest a lot in research and development, product development, adoption of new technology. Material purchased for production is costly. Renewal and recycling is not easy need high technology which cost is very high.

2. Price sensitive consumers: In India consumers are price sensitive they are not able or maybe they don't want to pay high price for green products.
3. Less awareness of consumers: Green marketing is a new concept and mostly Indian people are unaware of the green marketing.
4. Initial concept: Green marketing is on initial stage and there is lot of development under it.
5. Promotion tools: Green marketing is a new concept and it is important to use various kinds of promotion tools to aware the people about the existence and importance of green products. They have to use multiple tools like advertisement, personal selling, sales promotion, social media etc.
6. Misleading and availability of imitate products in the market: There is lots of firms which are selling their products by advertising them as green product but they are not green products even consumer pay high price and after that they cheated.
7. Problem of standardization: In India products are not follow the international standard so consumer don't trust on their originality.
8. Poor marketing plan and implementation: Marketing plan and implementation is poor in India which is major cause of failure of green marketing in India. Suggestion for the improvement in green marketing Green marketing is an excellent concept. There are some challenges in the way of green marketing but with some strategies overcome from these challenges is not too hard. Some of these suggestions are:
  1. Understand customers: An organization must be aware from the needs and wants of consumers. Organizations produce the product according to the customers demand and the price they ready to pay.
  2. Need of the management support: For the success of green marketing there is high need of support from the management. Management should be capable of handling such kind of new concept.
  3. Aware the consumers: government of India and organization try to aware customers about the benefit of green marketing on their life.
  4. Adopt international standards: Indian organization must try to adopt the international standard for the green product to gain the trust of the consumers.
  5. Implement Marketing strategies: Organization develop good control system and implement strategies for the betterment.
  6. Better Marketing Plan: Everything is starts with a good plan so there is a need of the organization to develop a good marketing plan which can help them to capture the large share in the market. Conclusion Green marketing is the need of the hour because of the environmental issues. In India green marketing is on developing stage. Green marketing is a modern concept this concept is developed with a purpose to reduce environment problems but there is lot of problems coming in the way of green marketing. But all efforts are also taken to overcome from these problems. The size of the green consumers is increasing and organization also focusing on making green products which are environment friendly. There is no one strategy which start working for green marketing. An effort from all the sides is necessary for the development of this concept whatever consumers, companies, government. Green marketing should be taken as social responsibility.

## Misconceptions In Algebraic Problem Solving In Mathematicsi

**Prof. Nitin Arunrao Raut**

Lecturer at Jajoo Junior

**Prof. Amol B. Payghan**

Asst. Prof. College Of Management And Computer Science,

Yavatmal, Maharashtra, India 445001

### Abstract

*The present study examines how students' ability to solve algebraic equations properly and learn the correct procedure for problem solving are affected by having misconceptions about the math facilities problem. In algebra, students learning to solve simple equations using cognitive tutor courses (Koedinger, Anderson, Headley, & Mark, 1997) evaluate their conceptual understanding of problem features (including equal signs and negative signs). An excuse designed for and completed the posttest. As his equation solving skills. The results show that students who begin lessons with misconceptions about the meaning of the same sign or negative sign solve the equations correctly, and also have difficulty learning how to solve them. However, improving their knowledge about those characteristics during the lesson enhances learning about their correct processes.*

*Keywords: algebraic problem solving; conceptual knowledge; learning in mathematics*

### Introduction

Learners are not completely empty. Each student brings prior knowledge to a lesson, and this knowledge can affect the student's gain from experience. Possession of good content knowledge is associated with gain in memory,(Chi,1978;Tenenbaum, Tehan, Stewart, and Christensen, 1999), generation of information, (Chi, Hutchinson, & Robin, 1989) ,categorization, (Chi, Feltovich, & Glaser, 1981), use and acquisition of strategy, (Gaultney, 1995; Alexander & Schwanenflugel, 1994), and reasoning skills (Gobbo & Chi, 1986; Johnson, Scott, & Mervis, 2004). Subsequently, it is that students who do not possess this critical knowledge are at a disadvantage for successful problem solving or learning new information. In algebraic problem solving, one type of prior knowledge that is the key to learning is the conceptual understanding of features in the problem (e.g., signs, variables, such as words, positive and negative signs, etc.). We define conceptual knowledge of these features as operational because not only recognizing symbols or executing an operation, but also understanding the function of the feature in the equation and how to change the feature's location makes the overall problem Will affect In the next two sections, we describe how a lack of understanding about these characteristics can hinder student performance and learning on procedural equation-solving problems in mathematics.

### Why conceptual knowledge of problem features should affect students performance

Previous research has proposed that students in conceptual knowledge of algebra use incorrect, trivial processes to solve problems due to misconceptions or gaps (Anderson, 1989; Van Lehn and Jones, 1993). The use of incorrect procedures is common when learning algebra (Lerch, 2004; Sebrechts, Enright, Bennett, & Martin, 1996), and by nature, it prevents precise resolution of behavioral problems. One reason for continuing to use these erroneous strategies may be that there are many processes used by students that will lead to a successful solution for some problem situations. Unfortunately, without sufficient knowledge of the problem, students are unable to distinguish between situations in which the strategy will work and where it is not applicable. For example, a common strategy is for students to solve equations if they want to extract a term from the equation, they subtract it from both sides of the equation. This equation works fine to remove 3 from the equation  $x + 4 = 13$ . However, when they encounter equations such as  $x - 4 = 13$ , many students still try to subtract 4 from both sides to solve the problem. One explanation for this mistake is that those students may be lacking in their conceptual knowledge of negative cues. If they do not process the fact that the negative sign

modifies 4 and is a necessary part of the "term" that they are trying to remove, then they ignore it, their goal of solving the problem. For the wicked. Thus students need to have good conceptual knowledge to solve equations correctly, as deep strategy formation depends on incorporating sufficient information about problem features that make them appropriate or inappropriate. Unfortunately, for students with inaccurate or incomplete conceptual knowledge about problem features, shallow strategies, such as the one described above, will prevail.

### Why conceptual knowledge of problem features should affect students' learning

Instruction on procedural problems can take many forms, including demonstration by the teacher, study of examples of written work, prompting messages from a computerized tutor, or feedback from a teacher or computer program. All of these instructional techniques have in common that in all cases, students need to align the information presented with the information in the problems they are or will attempt to solve.

It is not trivial to carry this alignment. Often, people focus on literal similarity between two sources - which makes it difficult to identify important features - which have meaningful similarity - as opposed to overall structural similarity, which enables the extraction of causal theories (Gantner, 1989 )

Thus, students who do not have sufficient knowledge of the characteristics of the problem will likely be able to conform only to shallow, surface. If this activity leads to any learning, it may only be of shallow processes, which may be useful in some problem situations, but is not generally applicable.

To gain knowledge of deep processes, students need to draw a deep resemblance between two sources of information. This requires more attention and participation from the superficial characteristics of the problem. To fully understand the meaning of instructional information, students must have sufficient conceptual understanding of the salient features of the problem. Thus, without this deep, meaningful knowledge of the characteristics of the problem, students would be unlikely to show great gains in procedural knowledge.

### Which Features Matter?

Any given equation includes many features that can be more or less important that are important for its understanding. These features include, but are not limited to, equal signs ( $=$ ), operation signals ( $+$ ,  $-$ ,  $\times$ ,  $\div$ ), variables ( $x$ ,  $z$ ), and a variety of numbers ( $23$ ,  $\frac{1}{4}$ ,  $.65$ ,  $\dots$ ). That can appear as constants, coefficients (eg  $.65x$ ), exponents (eg,  $x^{23}$ ) or other roles in the equation. For this study, we used relatively simple linear equations, which can be solved in only a few steps (eg,  $3x + 5 = 9$ ,  $12 = 4 / x - 7$ ). There are, of course, many features of these problems that are critical to the correct solution, but we specifically focus on two characteristics: the equal sign and the negative sign. Understanding equalization has previously been shown to be important for algebraic problem solving (Knuth, Stephens, McNeill, & Alibali, 2006), and students' difficulty with the concept has been relatively well documented. The meaning of equality and especially the sign of equality is difficult for students who are in the process of transitioning from arithmetic to algebraic thinking (Knuth et al., 2006), likely because students often signal equality as an indicator of outcome. Think about The act of conducting or answering a problem rather than the equivalent of two phrases (Barody & Ginsburg, 1993). Such misconceptions greatly distort the notion of the equation and the intermediate goals required for its solution.

Another problem that seems to be important for solving initial algebraic equations is the negative sign. Due to their abstract nature, working with negative numbers is inherently difficult for students who are transitioning from arithmetic to algebraic thinking (Lynchowski and Williams, 1999). In algebra, students have to understand not only the magnitude, but also the number or the conditions in order to fully understand the problem (Moses, Kami, Swamp, & Howard, 1989). Failing to bind a negative sign with a word that modifies it, or understanding that changing or moving a negative sign affects the equation, therefore preventing the success of solving the equation.

Thus, we expect that an incomplete or incorrect understanding of the role of equal sign and negative signs will be detrimental to students' performance and learning of equation-solving procedures.

### Measuring procedural performance and learning

There are two ways to measure students' procedural knowledge: the number of problems they are able to solve, and the number and types of incorrect procedures they use. These two measures can be combined in some sense, as the use of incorrect procedures usually prevents the correct problem resolution. However, just because a student does not use the wrong process does not mean that they know (and use) a correct process to solve the problem. Likewise, just because students decrease the number of incorrect procedures does not mean

that they will learn to solve more problems correctly. Improving students' procedural knowledge requires both a reduction in the use of incorrect procedures and the creation and strengthening of correct procedures (Siegler, 1996). Misconceptions about the problem potentially affect the number of related errors and their ability to formulate a correct strategy that takes into account all the important features in the problem. Thus, in this study, we examine both correct solutions and errors to evaluate students' procedural performance and learning.

## Methods

### Participants

Participants in this study were 49 high school students taking Algebra I with an algebra cognitive tutor, a self-paced intelligent tutor system in which individuals use various representations (such as tables, symbols, and graphs) because they Attempts to solve algebra problems (Koedinger et al., 1997). All students in participant classes who had not yet started the unit to solve two-step linear equations, but had completed prior problem-solving units participating in the study. Two students were excluded from the analysis, as they did not complete the posttest.

### Measures

To assess students' procedural knowledge, we used 8 experiment-designed items, which measure the ability to perform procedures effectively, to solve problems. These items were representative of the types of problems taught in the Algebra I courses, but were specifically designed to be slightly more challenging than most of the problems taught in the tutor unit, including features of either interest (e.g. , Negative sign) or pairing students had not encountered before (for example, two variable terms).

To assess students' conceptual knowledge, we used 40 experiment-designed items to measure their understanding of concepts that seemed important to success in algebra. In this paper, we focus on two such concepts: the equal sign (7 items) and the negative sign (10 items). Finally, as a measure of students' general mathematics ability, we used two algebra-related continued items in mathematics and science studies (TIMSS; Mullis et al., 2003). Examples of used objects can be seen in Figure 1

### Procedural Items:

$$-4x+7=5$$

$$9 = \frac{-6}{b}$$

### Conceptual Item :

State whether each of the following is a like term for 6c:

- |           |     |    |
|-----------|-----|----|
| a. 3d     | yes | No |
| b. -4c    | yes | No |
| c. -5     | yes | No |
| d. 8c     | yes | No |
| e. 5(c-1) | yes | No |
| f. 6      | yes | No |

State whether each of the following is equal to 3-4x:

- |            |     |    |
|------------|-----|----|
| a. 3+4x    | yes | No |
| b. 3+(-4x) | yes | No |
| c. 4x-3    | yes | No |
| d. -4x+3   | yes | No |
| e. 4x+3    | yes | No |

Figure 1: Example conceptual and procedural evaluation Items.

### Procedure

The participating students underwent a paper-and-pencil test assessing their conceptual and procedural knowledge of algebra; There were two forms of testing and half the students were randomly assigned to receive each. After completion of the pretest, students started a two-step linear equation unit with a tutor. During the unit, the tutor provided guided procedural exercises to solve two-step equations; Students received immediate feedback about any errors, and may ask the tutor for hints if they were unsure what to do. When they worked

through the unit, log data of interaction with the tutor were collected for each student. After each student completed the unit, an alternative version of that or the paper-pencil test was administered as a posttest.

## Results

### Performance on Procedural Test Items

Answers to procedural items were coded as true or false, and we calculated the percentage of problems with correct answers correctly and progressively by each student. Procedural problems were also coded (if any) in terms of the error that was made (eg, combined non-identical words, used incorrect operations, removed a negative, etc.), and the overall score conceptual. Each type of errors (negative sign and equal sign) were made to indicate the number of students' problems.

On average, 32% of the students solved procedural problems correctly on the pretest and 33% on the posttest.

### Performance on Conceptual

Test items were conceptual items coded as true or false, and we calculated the percentage of questions answered best and post hoc by each student correctly. Students answered on average 59% of the conceptual items correctly on the pretest and 63% on the posttest.

In addition, we determined the percentage of correct responses to a subset of conceptual problems (eg, that target equal sign or knowledge of negative cues) to determine the quantity and quality of students' knowledge about those specific concepts. Calculated. Students on average indicated an equal of 58% that the items were correct in the pretest and 57% on the posttest; The most beautiful and postoperative scores for the negative sign items were 57% and 61%, respectively.

### Effect of Conceptual Knowledge on Procedural Performance

To understand how conceptual knowledge of equivalent signs and negative signs affects correct equation-solving performance, we corrected students with equal percent signs and negative items related to negative signs with percentages of their equations. Solved. Greater conceptual knowledge of the equal sign ( $R(47) = .52, p < .01$ ) and negative sign ( $R(47) = .48, p < .01$ ) were both positively correlated with the number of correct solutions.

To determine whether some incorrect procedures were used to solve the equations due to students' lack of conceptual knowledge, we evaluated correlated knowledge of the same sign with similarity-related errors (e.g., Performing an operation for only one side of the equation, dropping the equal sign from the equation, etc.) and negative signs with negative-related errors Rtran (for example, to delete the negative, subtract the added words, etc.). Students with lower knowledge of similar cues reported more similarity errors ( $r(47) = -.30, p < .05$ ); A similar autocratic tendency was found for negative sign knowledge ( $R(47) = -.26, p < .10$ ).

### Effect of Conceptual Knowledge on Procedural Learning

There are two ways to investigate the role of conceptual knowledge in procedural learning. The first is whether the lack of conceptual knowledge in instructional knowledge impedes learning, because instruction is difficult to understand, thus there is a weak advantage in procedural knowledge. A second possibility is that students should not have conceptual knowledge from the beginning, but will follow the same gains in procedural knowledge, if they make a profit in it during the lesson.

To test the contribution of either or both of these factors, we conducted a pair of regression analyzes to predict procedural learning, different for each concept. For each concept, we first obtained the best percentage (to control the amount of possible) of the solved equations for that concept and then in the knowledge of that concept. We then analyzed the opposite way, first entering conceptual knowledge into the most spectacular procedural performance, and then gaining the best conceptual knowledge.

As shown in Table 1, for both equal sign and negative cues, gains in conceptual knowledge predicted improvement over procedural problems predicted by conceptual knowledge at the forefront. For both concepts, however, a trend was found to show that even the most beautiful conceptual knowledge should be a useful predictor of learning: students who came with at least a small amount of conceptual knowledge learned less during the lesson .

An alternative possibility is that conceptual knowledge is not important for learning, that better students learn more than just instruction about both concepts and processes. To meet this possibility, we performed a similar pairwise regression analysis to improve procedural performance and conceptual knowledge before pretending to have the best conceptual knowledge, along with students' performance on TIMSS items. For both features, prior conceptual knowledge (equal sine  $p < .05$ , negative  $p < .10$ ) and improvement in conceptual knowledge (sine sine  $p < .01$ , negative  $p < .05$ ) were meaningful predictors of procedural learning. Predicted by more general math ability.

Unpacking a potential learning event case study illustration: When the learning opportunity is lowest, the student JU answered only 30% of the negative items related to the conceptual items correctly. Their incorrect answers on these items were supported by the fact that  $-4x + 3$  was similar to both  $4x + 3$  and  $4x - 3$ , indicating that  $-9b$  was not part of the negative sign word. These answers correspond to the misconception that phrases can enter and exit without negative consequences and that their location (and the connection to the number or variable in the problem) is not significant.

While solving 8 equations on the pretest, they made a total of 5 negative sine errors, such as moving to the next step while leaving the negative out of the equation or attempting to subtract to remove a word that is already negative; These types of errors comprised 63% of the total errors. They solved only 25% of the equations correctly on the pretest.

While working with the tutor, he was given the problem  $y / -8 + (-6) = -6$ . His first step to solve this problem was to subtract 6 from both sides. He received a bug message from the tutor stating that "Since -6 is negative, you should add it to remove it from the left side. Erase your last step and add 6 to both sides." Proceeded to solve correctly. After several problems, he faced a similar equation:  $-4 = y / 5 + (-2)$ . This time, he immediately added 2 to both sides.

At posttest, they correctly answered conceptual items related to 50% of negative cues; The main improvement was that they now included negative signs as parts of the terms that they modify. He made only 2 negative sign errors while solving the equations (33% of the total number of errors). They solved 50% of the equation.

Table 1. Prior knowledge and gains in knowledge of equal signs and negative signs as a sign of improvement in equally solved equations

Analysis	R2initial1	R2pre + Gain	Added R2	Significant equal sign 1.
----------	------------	--------------	----------	---------------------------

.05 .17 entered before .12  $p < .05$

Conceptual knowledge

2. Gain in conceptual knowledge

Recorded before the aforesaid concept. 10 .17 .07  $p < .10$

### Knowledge

Note: 1 In all cases, R2initial recorded the best performance (to control the amount of possible correction) on procedural items as well as the first factor.

Case Study Illustration: When Learning Doesn't Occur

At the youngest, student NR did not correctly answer any of the equally signature-related conceptual items. Among his incorrect answers to these items, he claimed that the sign of equality "means that the number that is being added, subtracted, multiplied, or divided is equal." This answer is consistent with this

misconception. Is that the purpose of the same sign is to show that the expressions on both sides are the same, rather than showing the answer to the problem.

When solving 8 equations on the pretest, they made a total of 8 equal sign errors, such as operating only one side of the equation and trying to make all signs equal; These types of errors comprised 44% of the total errors. They solved only 13% of the equations correctly on the pretest.

While working with the tutor, he was given the problem  $2x + (-9) = -3$ . He first tried to subtract 3 from both sides, trying (incorrectly) before all the signs were equalized. When the tutor indicated it was wrong, he tried to subtract 2 from both sides. After realizing that he can simplify the signs coming to  $2x - 9 = -3$ , he then tries to subtract 3 again from both sides. He then received a bug message asking him to focus on the side of the equation with the variable. The variable is on the left. "He again tries to subtract -3 from both sides, and on receiving the same bug message again, tries to add -3. In the end, he loses and goes to the other side of the equation to move -9.

At posttest, he still failed to correctly answer any similar sign-related conceptual objects and still indicated that the equal sign "means the answer." Some improvement was shown, in which he made 3 equal sign errors when solving equations. % Of the total number of errors). However, they still solved only 13% of the equations correctly on the posttest. Thus, he did not improve his conceptual knowledge of equalization or his ability to solve equations correctly.

### Discussion

Results suggest that incorrect or incomplete pretend conceptual knowledge of equal sign and associated algebraic equations of negative signs is associated with the use of related, incorrect strategies; These students have difficulty in solving equations correctly. In addition, students who pretend to these misconceptions learn less from instructions on solving equations; This relationship also exists when controlling for more general mathematics ability. However, having good conceptual knowledge in the pretest may not be entirely important, as improving this knowledge in the curriculum of education increases the amount of learning that students can do; Two case studies suggest that students can uncover those differences when they acquire conceptual knowledge and when they do not.

The present study focused on equal signs and negative signs of key features required for learning to solve similar algebraic equations. Previous research has also shown that misconceptions about conditions lead to similar problems when students try to solve (and learn to solve) more difficult problems (Booth, Koedinger, & Siegler, 2007). Thus, at various points in the learning process, misunderstandings or gaps in conceptual knowledge of contextual characteristics prevent students' performance and learning. But the good news is that even though they don't start a lesson with this important knowledge until they get it on the way, they can close some gaps. These results suggest that providing students with these conceptual prerequisites should be an important goal for algebra courses, and perhaps mathematics courses that advance it.

Current instructional methods used in Cognitive Tutor are generally not focused on helping students to gain conceptual understanding, although the need for greater emphasis on conceptual understanding has been acknowledged (NCTM, 2000, National Mathematics Advisory Panel, 2007). The IES Cognition Practice Guide recommends a number of instructional methods that can help enhance students' conceptual understanding, including working examples and studying self-explanatory solutions (Pashler et al., 2007). Preliminary findings in the current line of research indicate that incorporating the combination of these methods with procedural practice in tutors can improve both conceptual and procedural knowledge of students' algebra (Bothe, Siegler, and Koedinger in press) ; Further research is necessary to determine when and for whom these techniques are useful.

Conceptual knowledge is considered to enhance learning in algebra because it helps students draw deeper parallels between instruction and practice problems; However, this hypothesis was not tested in the present study. Future research will need to assess students' techniques when working with problems to determine if they are actually portraying these analogies and its quality. Another excellent question is why increased conceptual knowledge yields increased procedural learning in algebra. There are at least two possible mechanisms that may explain the finding. First, it may be that students learn the concept, which helps them understand the text better, leading to greater learning of the correct processes; This view is consistent with the

iterative model of conceptual and procedural development (Rittel-Johnson, Siegler, & Alibli, 2001). An alternative possibility is that students with more and more conceptual knowledge are able to solve more equations correctly (presumably because they notice and attend to the appropriate features in the problem and apply the correct strategy), so Perhaps gains in conceptual knowledge just help students notice and be present for the right features and implement the right strategies that they already Knew, but were not using. We hypothesize that this is the former, but more research is needed to separate these possibilities.

**Corporate Social Responsibility: An Indian Perspective****Dr V.L.Bhangdia,**

MCom,MA Eco,MEd,MPhil,PhD

Principal, Smt Kesharbai Lhoti Mv., Amravati

**Abstract**

*Corporate Social Responsibility is now accepted as a means to achieve sustainable development of an organization. Hence, it needs to be accepted as an organizational objective. According to New Company Law, 2012 corporate must contribute 2% of their net profits towards CSR which made Indian companies to consciously work towards CSR, as it required a prescribed class of companies to spend a portion of their profits on CSR activities. Any contribution towards welfare of society is called as. Corporate can no longer limit them in using resources of society and they have to be socially responsible corporate citizens and must also contribute to the social good. The main aim behind this study is to see why CSR is vital for Corporation? Why should they contribute for Country's Economic Development? And what are the important steps Government should take to improve contribution of corporate for CSR activities? As we know, today Indian corporate go beyond Philanthropy (Charity) concept and its more concentrate on all the stakeholder. The present research paper attempts to analyze several such aspects of the new CSR law in the context of modern corporate philosophy and also drawing attention of the government authorities towards practical difficulties in the implementation of the new provisions.*

**Introduction**

The evolution of CSR in India refers to changes over time in India of the cultural norms of cooperates engaged in CSR activities. Businesses are managed to bring about an overall positive impact on the communities, cultures, societies and environments in which they operate. The fundamentals of CSR rest on the fact that not only public policy but even corporate should be responsible enough to address social issues. Thus companies should deal with the challenges and issues looked after to a certain extent by the states. CSR is a management concept whereby companies integrate social and environmental concerns in their business operations and interactions with their stakeholders. CSR is generally understood as being the way through which a company achieves a balance of economic, environmental and social imperatives while at the same time addressing the expectations of shareholders and stakeholders. Anything that is beneficial for the society can be called CSR and such activity must be shown by company on their website and company should take approval from board. CSR is an important element of development because companies need to look after their communities, particularly those that are operating in rural areas. But, CSR also has an environmental aspect that the business might influence based on their operation Many companies might have motivations for doing CSR such as the genuine care of their environment and society that would eventually become their source of human capital as well as raw materials that they need to sustain. Also, some companies will see it as an important element of gaining societal acceptance for their operations. It is really true for the companies that are operating in remote areas, like mining and oil and gas companies. They are often encountered by many communities that indigenously live there, and the companies have to live with these communities. Another aspect on CSR is that companies should see it as a voluntary action rather than something that is highly regulated. Because it is something that is good for the company to do, it's not something that the company has to do because of law or anything else. On the other hand, companies should not be really forced to do CSR as mandatory action, because again, the development players are not just companies. It also includes government as well as civil society and the community itself. Data and Methodology The data of this study is secondary data which we have collected from different sources such as official websites of department Corporate Affair minister, Newspaper Articles, Research Papers and Magazine Articles. As we know the traditional perspective stressed on Corporate Philanthropy which means charity for Social, Cultural and Religious purposes and Modern Perspective stressed on long term interest of stakeholders and sustainable development. The main aim behind this study is to see why is vital for Corporation? Why should they contribute for Country's Economic Development? and What are the Important steps Government should take to improve contribution of corporate for CSR activities? We have examined the data from various sources and analyzed the same. We have not used any statistical tools and techniques because we are not trying to establish any relationship between different variables rather through discussion sand analytical thinking we tried to see how our country has changed its policy over the period of time and what are the result of these policies are. Policy in India Under the Companies Act, 2013, that replaces the nearly six-decade old legislation governing the way corporate function and are regulated in India, profitable companies with a sizeable business would have to spend every year at least 2 per cent of three-year average profit on CSR works. This would apply to the companies with a turnover of Rs 1,000

crore and or more or net worth of Rs 500 crore and more, or net profit of Rs 5 crore and more. As per new proposals, from the beginning of 2013-14, Top earning PSUs like ONGC, BHEL and NTPC may have to double their expenditure on CSR as per the new draft guidelines being finalized by the Department of Public Enterprises (DPE). PSUs with net profit between Rs 100-500 crore are required to earmark 2-3% of their income. They have to ensure that they spend full amount earmarked for, otherwise, they have to disclose why they have not spent these fund. Public sector companies with a profit of less than Rs 100 crore are required to contribute 3% of their income for undertaking such activities. The proposed guidelines stated that if Public Sector Units (PSU's) are unable to spend the earmarked amount for CSR in a particular year, it has to be spent in the next two years. The guidelines continue to exempt sick and loss-making PSUs from allocation of budget for undertaking CSR activities. Stipulation of the Company Bill, 2012 Every company with net worth of Rs 500 crore or more, or turnover of Rs 1,000 crore or more or a net profit of Rs 5 crore or more during any financial year to constitute a CSR Committee of the Board consisting of three or more directors, of which at least one director shall be an independent director. The Board's report to disclose the composition of the CSR Committee.

### The main functions of the CSR Committee are:

- Formulate and recommend to the board, a CSR policy indicating the activity or activities to be undertaken by the company as specified in Schedule VII of the Act.
- Recommend the amount to be spent on these activities.
- Monitor the company's CSR policy periodically. After the CSR Committee makes its recommendations, Board of the company shall approve the CSR Policy and disclose contents of such policy in its report and also place it on the company's website. Further, details about the policy developed and implemented by the company on CSR initiatives during the year to be included in the Board's report every year. Board to ensure that the activities listed in the CSR Policy are undertaken by the company. Board to ensure that at least 2% of average net profits of the company in the three immediately preceding financial years are spent in every financial year on such activity. Preference to be given to the local area and areas around the company operates for CSR spending. If a company fails to provide or spend such amount, Board to specify reasons in its report for that failure. Companies required to comply with CSR shall give additional Information by way of notes to the Statement of Profit and Loss about the aggregate expenditure on CSR activities. Schedule VII of the Companies Bill 2012 prescribes activities that may be included by companies in their CSR policies:
- Eradicating extreme hunger and poverty;
- Promotion of education;
- Promoting gender equality and empowering women
- Reducing child mortality and improving maternal health;
- Combating human immunodeficiency virus, acquired immune deficiency syndrome, malaria and other diseases;
- Ensuring environmental sustainability;
- Employment enhancing vocational skills;
- Social business projects;
- Contribution to the Prime Minister's National Relief Fund or any other fund set up by the Central Government or the State Governments for socioeconomic development and relief and funds for the welfare of the Scheduled Castes, the Scheduled Tribes, other backward classes, minorities and women; and;
- Other matters as may be prescribed. Sachin pilot, Corporate Affairs Minister has said there would also be a national level CSR body to monitor the activities. So that Central Govt is planning to have a Special Purpose Vehicle to monitor spending of CSR Fund and Projects. Govt want that there should be full utilization of CSR fund.

### Effects of CSR

- The contribution of CSR is not to contribute in one sector of society only rather to help businesses and to nurture the society over a period of time. Company can contribute under CSR in any of the sector (Education, Health, Environment, Upliftment for the society etc.) which they like most and which is beneficial for the organization point of view.
- Corporations should participate effectively and efficiently for CSR contribution as corporations are involved with numbers' of stakeholders like customers, employees, suppliers, government, creditor, financial institutions, etc. so they have the responsibility to take care of the interest of all the stakeholders for their own sustainable growth.
- Every Corporation must take initiatives for CSR practices to make this planet a better place to live and not just this, it will also help corporations to build their goodwill.
- Corporations can differentiate themselves from their rivals by taking CSR initiatives.
- Company can take CSR as an opportunity and a platform for growth and survive.
- A properly implemented CSR concept can bring along a variety of competitive advantages, such as enhanced access to capital and markets, increased sales and profits, operational cost savings, improved productivity and

quality, efficient human resource base, improved brand image and reputation, enhanced customer loyalty, better decision making and risk management processes. •Neither central government nor state government can tell corporate how to spend money towards welfare for society. The decision rest on board how money spend in various CSR activity.

### Limitation of CSR Policy

- No incentive if company pays more than 2% of net profit.
- Carry forward of such a contribution not being mentioned under the provision of CSR. It means if any of the company not able to spend 2% of average profit in any financial year so that expenditure not being carry forward for next year.
- Company does not have adequate profits or is not in a position to spend prescribed amount on CSR activities, the directors would be required to give suitable disclosure/reasons in their report to the members.
- It is not clear whether the Section 25 companies or charitable organizations set up by them would be included towards CSR.
- According to the proposed rules, activities relating to eradicating extreme hunger and poverty; promotion of education, gender equality and empowerment of women; reducing child mortality and improving maternal health; combating HIV-AIDS, malaria and other diseases; ensuring environmental sustainability, employment enhancing vocational skills; and contribution to the Prime Minister's National Relief Fund or any other Central or state fund would be considered as CSR activity under the Act. Review of Literature
- According to Geoffrey heal suggested that CSR is an important part of corporate strategy in sectors where inconsistencies arise between corporate profit and social goals, or discord can arise over fairness issues. There are number of social sectors where corporate can play a valuable role under CSR and can produce social goods for its society. According to him CSR program can be profitable element for company strategy, reducing risk management, Generating brand equity, improving relations with regulators, lower cost of capital, improved human relation and employee productivity and to the maintenance of relationship that are important to long term profitability.
- According to Anupam Sharma and Ravi Kiran, them CSR is emerging as a new field in the management research. In India, many firms have taken the initiatives of CSR practices which have met with varying needs of society. According to him number of IT and Auto industry is more going for taking up CSR initiatives while FMCG sector. Authors said that India has entered or taken a transformational change by involving into new CSR initiatives.
- According to Kishor Neelakantan, the enactment of the company act 2013 will create a big regulatory push for CSR activities and this is mandatory for all company operating in India. so it is good for economic development but how Shareholder think about it while evaluating company? So according to author suggests that framework for investors to evaluate companies' CSR efforts which is based on four key parameters- Integrity, strategic orientation, efficiency and transparency.
- According to Rahul Hakhu Company should be forward looking to adopt in their corporate policy and take initiative for applying this in the business so that they can achieve competitive advantage, profitability in the light of liberalized world. His emphasis that government wants that corporation should be more responsible for the economic development of country and growth of CSR lead to transformation of agrarian economy to the path of industrialization. He suggested that CSR provides valuable information to companies of India and other stakeholders about the prospect of development, reputation. Existing CSR Activities of some companies
- ONGC CSR projects focus on higher education, grant of scholarship and aid to deserving young pupils of less privileged sections of society, facilities for constructing schools etc.
- SAIL has taken successful actions in environment conservation, health and medical care, education, self employment programmers, sports and games etc.
- BHEL has developed a CSR scheme and its mission statement on CSR is "Be a committed Corporate Citizen, alive towards its CSR". BHEL undertakes socio economic and community development programmers to promote education, improvement of living conditions and hygiene in villages.
- Reliance Industries initiated a project named as "Project-Drishti" to bring back the eyesight of visually challenged Indians from the economically weaker sections of the society. This project has brightened up the lives of over 5000 people so far. this project has also creating awareness about the compelling need for eye donation
- Mahindra & Mahindra launched a unique kind of ESOPs-Employee Social Option in order to enable Mahindra employees to involve themselves in socially responsible activities of their choice. It also contributes under Mahindra Hariyali, Mahindra pride school, Mahindra Education Trust. Under Mahindra Hariyali, over one million trees have been planted across the country, to increase the country green cover.

- Tata consultancy services is India's largest software service company and has won the Asian CSR award for initiating community development work and implementing various programs and devoting leadership and sincerity as ongoing commitment in incorporating ethical values. Major focus of the company is on education sector. Company is working upon literacy program that cares TCS designed computer based literacy model to teach adults and this program is known as an adult literacy program. Company also working upon environment policy and has been developing environment friendly products and services.
- Infosys: As a leading software company Infosys is into the providing language and computer education. Company has special program for unprivileged children by whom company teaches them various skills and change their outlook too. Company also donates carom, chess board, chocolates etc. to the needy ones. CSR activity includes Blood donation camp and Infosys foundation has been working in the sectors of health care, education, environment preservation and social rehabilitation.
- Wipro: Company has taken various initiatives to women empowerment. Three main CSR activities include environment sector, education sector and energy conservation.
- ITC: ITC Limited (ITC) is among one of India's leading private sector companies having a assorted portfolio of businesses. ITC is working with the concept of 'Triple bottom line' that will contribute to the growth of economy, environment and social development. Major focus area of the company is on raising agricultural productivity and helping the rural economy to be more socially inclusive.
- Maruti Suzuki a automobile industry works upon global warming and global issues like climate change Company has been strongly investing on environmental friendly products and manufacturing best products for the society. Maruti Suzuki is working upon conserving environment and preserving natural environment. Concept of reduce, reuse and recycle has been promoted by company in all the manufacturing units.
- GAIL Ltd is largest state owned natural gas processing and Distribution Company. It contributes towards corpus of GAIL charitable and education trust, natural calamities or disaster, SC/ST minorities population. Its objective to satisfy all of its stakeholder. It participate in an activity which is directly or indirectly benefit the communities. it enhance the quality of life and economic well being of local population.
- IBM is a software company. Company is committed towards the implementation of its environment policy, health services, provide hygiene and safety work place to its employee.

### Conclusion

From the limited experience over the last few years, some lessons nonetheless emerge. Government introduces CSR because they wants corporation to become more responsible for the society or for its stakeholders itself. As we know, CSR offer real opportunities for the corporations to contribute in various activities which directly or indirectly help welfare of the society. Corporations are social entity so they must take care of all stakeholders, it is vital for them to take charge of this responsibility in efficient way so that all participant of corporation feel satisfied. As we know corporate can't stand alone they also needs the support of their society at large which is important for their development and goodwill. Many large corporations now taking steps to improve their environmental and social performance through the use of voluntary initiatives such as codes of conduct, environmental certification and reporting, social audits, fair trading schemes and social investment programmers. Corporate and government must work together and through this, they can bring dramatically changes in the welfare schemes of society.

## Importance Of Education And Teachers To Build Up Ethical Values Among Students

Ms. Sonal K. Sharma

Vice Principal Of Jajoo English Medium School, Yavatmal (M.S.)

### Abstract

*In day to day life, people face so many unethical obsessions in their surroundings. The reasons are multiple; some are usual and some are unusual. Ethics are nothing but the behaviour of one human being to the other which is the factor of trust-building with each other. Ethics teaches us to organize different standards like reliability, obedience and sincerity amongst others; it also helps to build up a great personality of an individual which is helpful as a factor in the nation-building. Person having good ethical values always makes good relation with others, makes other people happy and always stand for help to each other. Unfortunately, nowadays the values of ethics are destroying due to so many factors like modernization, busy day to day life, no time for family members, more exposure to social media and electronic gazettes etc., and therefore, it is more difficult to raise a good human for parents as well as teachers. Though this is the present day's critical scenario which is not more positive towards future prospective, we must concentrate and focus on incorporating good ethical values in our children. Certainly, the parents and their surrounding play a crucial role to build up their children's life however the teacher's role in the life of every person is very much imperative since a good teacher is always being the role model for every successful student. Therefore, the educational system including teachers is the most valuable assets of the student's life. Present paper deals with the observations, discussion and suggestions on imparting ethical values among students.*

*Key words: educational system, ethics, moral values, tradition*

### Introduction

Indian system of education is very vast and versatile; in an ancient period, 'Gurukul' (ashram) system was there which nothing but the residential teaching pattern of the country where every student was bound to certain rules of gurukulam in which they used to participate in the day to day activities like maintenance of campus, cleanliness and hygiene etc. These activities help to build up self-dependent personalities of the students to smooth running of future life. The teachers (guru) who gave the Shiksha (education) to their Shishyas (students) were great Rishis and Maharishis, they taught about Vedas, Purans etc., along with the vocational education like management, business, agriculture, arts and crafts, music, dance and military education etc. The main purpose of conventional education was to teach ethics, manners, social work, self-control, development of character and compassion to the students which were necessary for their survival. The students learnt about the customs and tradition of the society. Deep knowledge was rooted among students about their, ethics, morals, limitations, honesty etc.

This ancient period of education was around 5000 B.C. ago which is considered as the prosperous period of an Indian education system. That period was continued till the time of old Indian kingdoms where great centres of education were activated like Nalanda (Bihar) and Takshshila (Now in Pakistan). These universities are known as first residential educational places in the history of mankind where the teachers and the students lived together and research many important innovations for human civilization. After the invasion of Mughals, these centres were shredded brutally; the great libraries were destroyed and universities fired. These invaders destroyed the Indian system of education and started their system of education. With the British rule in the country, the education system of Mughals was also demised. Britishers deployed the new system of education in the country which is called the Montessori system of education these days. During the British rule of Lord Macaulay enforced this new system of education keeping in the mind to develop brilliant clerks in India. These changes in Indian system of education harm the Indian society badly in terms of loss of moral values, ethics, humanity, lack of cultural knowledge etc. which throw this country behind the other countries in research, innovations and modernization. Therefore, there is an urgent need of the hour to rethink and revise our education system after proper identification of lacunas in the development of good human beings helpful in nation's development. The present paper is confined with the broader objective to identify the problems of the present educational system and to find their effective solutions. Finding ways to develop good relationship between teachers and students is also another core objective of the study.

### Observations

At the present time in the modern educational system, teachers teach skills which full-fill only today's requirement like science and technology, future prospects etc. Somewhere in the modern education system, we are living behind our ethical values.

1. Factors responsible for students unethical behaviour

There are so many factors affecting student's behaviour. The positive social environment has been linked to enhancing students' behaviour, educational achievement, inspiration and enthusiasm<sup>2</sup>. It changes students' attitudes and behaviours in many ways like decision making, justice and equality, caring and discipline etc. Most of the times of students spend in schools and colleges so the environment of school and college premises affects more on students' intellect.

In the same way, the remaining time of the student's brain use to play with social media like the internet, mobile phones, T.V. etc. It not only squanders the time of an individual but also badly affects on health and mind as well. Crimes are increasing day by day only due to the more wasting of time in an outing, playing with internet, mobiles etc. Their mind becomes stuck with non-useful things and they promote themselves to do illicit work<sup>1</sup>. In addition to this, the surrounding atmosphere of the community is the major factor to student behaviour<sup>4</sup>.

The stage between childhood and adulthood is very critical and important for everybody's life. Surrounding environment can easily change their mind in both positive or in a negative way. It totally depends on either their exposure to the good and positive environment or bad and negative environment which includes their family, friends, neighbours, teachers etc.

## 2. Need to teach the ethical values to the students

- i. Only parents are not able to teach ethical values to their children. Most of the parents are busy in pursuing their carrier and children are taken care of by care centres. For very fewer hours parents spend their time with the children and they don't even bother about teaching moral values.
- ii. There are very much dishonesty and violence in society. Students are also facing these problems in day to day life e.g. at the time of exam leakage of paper is a common thing nowadays, to pass the exams some parents offers a bribe to teachers etc.
- iii. As the students are future of the nation whatever moral or ethical values they will learn only makes the nation honest, violence-free, healthy and strong.
- iv. Growing crimes in India is a very serious matter and most of the criminals, rapist etc. belong to the age group of 16- 20; consequently, there is a very strong need to take some constructive action against it.

## 3. Suggestions

Teachers are the backbone of the educational system; therefore, they play a fundamental role in a student's life. For the development of ethical values amongst the students, the teachers should maintain the ethical integrity with self first and follow with students. Teacher and student connection is very essential for pleasant learning. Students develop a very strong bond with the teachers. Mutual respect, admiration, affection, availability are the key factors. Other than parents only the teachers are the guardians of students who shape out not only their carrier but whole life also<sup>3</sup>.

## 4. Qualities and values of a good teacher

A good teacher should be wise, honest, and thoughtful to talk with their students, maintain clean and good habits, emotional, having a pleasant personality, should control on anger, forgiveness, quite smart in handling any bad situation.

## 5. Ethics of students

Students must have obedient, honest and maintain transparency with teachers, give respect to the teachers and develop the ability to learn everything from teachers' academic as well as ethical knowledge.

Strategies of implementing ethical principles among students through educational system

- i. Incorporate the subjects of human behaviour, equality, ethical and moral values in the curriculum of school and colleges.
- ii. Regular classes on spirituality and meditation should conduct in premises of school and colleges so that students can learn how to keep proper control over the brain and have noble thoughts in their mind.
- iii. Organize the various workshops and seminars on integrity and ethics in schools, colleges and universities.
- iv. Provide the information related to benefits and harms of social media, electronic gazettes to the students, so that they can use these platforms and gazettes in the improvement of their life.
- v. Update the knowledge of students about changes in society, corruption and current affairs. This will help them to create their views towards the nation.
- vi. Elegant teaching including organization of guest lectures of renowned personalities, students and living legends interactions, group discussion about ethics and morality, social equality, humanism can also help a lot to the student for their development of overall individuality. Universities with the help of government should arrange to give the training of some social activities to the students to develop a sense of compassion towards adults, children and women etc.

- vii. Excursion study tours to heritage places, natural habitats and renowned museums can update the knowledge level of these students and they will be well acquainted with the glorious past of the country, its rich heritage and history. This type of activity can help students to understand the ethics and morality of Indian traditions.
- viii. Field trips of youth in the area affected in natural calamities where they can volunteer their services to the affected people of these calamities. In those areas, they can also help the disaster relief forces to control the situations. This type of activity will develop sensitive humanity and better understanding about high values of humanism, morality and ethics among the students.
- ix. Colleges can organize camps in the hospitals, old age homes and orphanage etc., to teach social services to the students. This kind of activity will help the students to understand the problems prevalent in society and ill people.

### Conclusion

Parents at home are also a key factor in the development of a good human being. They can play an important role to teach their kids ethical values; sincerity; accountability and responsibility by involving them in households, rituals and cultural activities which enable them to make him a self dependent, successful personality. A good teacher can change the entire life of their students and can shape their future in a positive direction. There are so many examples where teachers play a role model in a student's life. However, without enthusiastic students we cannot imagine education system, so students must have learnt the ethical as well as moral values and apply in their day to day life.

Hence, all the three factors including smart parenting, knowledge full teaching and creative learning can change the entire scenario of the present education system. The teaching of ethical values and culture along with vocational training can revive the ancient pattern of the Indian educational system. The power of knowledge sources and electronic platforms are also can play an important role to develop good human being full of morality and ethics.

## Natural Language Processing: A Review

Mr. Amol Sheshrao Kalekar<sup>1</sup>

College of Management and Computer Science Yavatmal

Mr. Nilesh Sureshrao Bhojar<sup>2</sup>

### Abstract

*Natural Language Processing is an aspect of Artificial Intelligence that helps computers understand, interpret, and utilize human languages. NLP allows computers to communicate with people, using a human language. Computer System can analyze the texts with the help of Natural Languages Processing. Natural Languages Processing includes analysis of knowledge on how human beings use and understand language. All this is done to develop tools and techniques which could make computer systems understand and manipulate natural languages to perform various desired tasks. This paper reviews the literature on Natural Languages Processing. It also covers information about different tools used for Natural Languages Processing, history, future, advantages and disadvantages of Natural Languages Processing. It is based on document and tools analysis. This research paper could be beneficial to those who wish to study and learn about Natural Languages Processing.*

*Keywords: Machine translation, Machine learning, Computational techniques, Processing Tools, linguistic, Natural Language Processing, Artificial Intelligence.*

### Introduction

Natural Language Processing is an aspect of Artificial Intelligence that helps computers understand, interpret, and utilize human languages. NLP allows computers to communicate with people, using a human language. Natural Language Processing also provides computers with the ability to read text, hear speech, and interpret it. NLP draws from several disciplines, including computational linguistics and computer science, as it attempts to close the gap between human and computer communications. Natural language processing is a technology that powers voice assistants, predictive text, and other speech / text applications that spread through, causing a gradual change in our lives, has evolved significantly in the last few years. Most of the researches have explained Natural Language Processing as an area of research and application which explores how computers can be used to understand and manipulate natural language text or speech to do desired things. ([1],[2], [3],[4], [5]). The term Natural language processing is used to describe the function of hardware or software components in a computer system which analyze or synthesize speech or text [6]. Liddy [7] defines Natural language processing as a theoretically motivated range of computational techniques for analyzing and representing naturally occurring texts, at one or more levels of linguistic analysis for the purpose of achieving human-like language processing for a range of tasks or applications. Natural Language Processing tools help process a flow of unstructured data from disparate sources. We know that the language is more than transfer of information. It is a set of resources to enable us to share meanings, but is not best thought of as a means for “encoding” meanings [8]. Following are the features of Natural Language Processing

- Content Categorization: A linguistic document summary that includes content alerts, duplication detection, search, and indexing.
- Document Summarization: Automatically creates a synopsis, condensing large amounts of text.
- Machine Translation: Automatically translates the text or speech of one language into another.
- Sentiment Analysis: Identifies the general mood, or subjective opinions, stored in large amounts of text. Useful for opinion mining.
- Text-to-Speech and Speech-to-Text Conversion: Transforms voice commands into text, and vice versa.
- Contextual Extraction: Automatically pulls structured data from text-based sources.

The increase demands for software’s that process text of all kinds have tremendously been influenced by the appearance of the Internet.

### Scope and objective

Based on document analysis and study of various tools, this paper summarizes the information on Natural Language Processing, history of Natural Language Processing, previous works on Natural Language Processing and tools. This review paper then considers components of Natural Language Processing, the challenges and failures of Natural Language Processing, and the current and future research of Natural Language Processing are also discussed in this paper. This review paper is intended to give an understating to researchers / scholars who wish to learn about the Natural Language Processing technologies and applications from the past, present and future.

### History of Natural Language Processing

In 1950, [9] Alan Turing wrote a paper describing a test for a “thinking” machine. He stated that if a machine could be part of a conversation through the use of a teleprinter, and it imitated a human so completely there were no noticeable differences, then the machine could be considered capable of thinking. In 1952, the Hodgkin-Huxley model showed how the brain uses neurons in forming an electrical network. These events helped inspire the idea of Artificial Intelligence (AI), Natural Language Processing, and the evolution of computers. In 1957 Noam Chomsky published his book, in it, he mentioned previous linguistic concepts, concluding that for a computer to understand a language, the sentence structure would have to be changed. In 1958, the programming language LISP (Locator/Identifier Separation Protocol), a computer language was released by John McCarthy. In 1964, ELIZA, a “typewritten” comment and response process, designed to imitate a psychiatrist using reflection techniques, was developed. In 1964, the U.S. National Research Council (NRC) created the Automatic Language Processing Advisory Committee, that was tasked with evaluating the progress of Natural Language Processing research. In 1997, LSTM recurrent neural net (RNN) models were introduced, and found their niche in 2007 for voice and text processing. Currently, neural net models are considered the cutting edge of research and development in the NLP’s understanding of text and speech generation. In 2001, Yoshio Bengio and his team proposed the first neural “language” model, using a feed-forward neural network. The feed-forward neural network describes an artificial neural network that does not use connections to form a cycle. In the year 2011, Apple’s Siri became known as one of the world’s first successful NLP/AI assistants to be used by general consumers. Within Siri, the Automated Speech Recognition module translates the owner’s words into digitally interpreted concepts. Syntactic Structures

### Components of NLP

Following are the main Component of Natural Language processing are[10]:

- Morphological and Lexical Analysis:- Lexical analysis is a vocabulary that includes its words and expressions.
- Syntactic Analysis:- Syntax focus about the proper ordering of words which can affect its meaning.
- Semantic Analysis:- Semantic Analysis is a structure created by the syntactic analyzer which assigns meanings.
- Discourse Integration:- The meaning of any single sentence which depends upon that sentences.
- Pragmatic Analysis:- Pragmatic Analysis deals with the overall communicative and social content and its effect on interpretation.

### NLP Tools

- We have discussed some of the tools used for Natural Language Processing.
- Natural Language Toolkit (NLTK):- is the most full-featured tool. It implements pretty much any component of NLP you would need, like classification, tokenization, stemming, tagging, parsing, and semantic reasoning.
- SpaCy:- it represents everything as an object rather than a string, which simplifies the interface for building applications.
- OpenNLP:- is hosted by the Apache Foundation It is a general NLP tool that covers all the common processing components of NLP, and it can be used from the command line or within an application as a library. It also has wide support for multiple languages.

- StanfordNLP:- is a set of tools that provides statistical NLP, deep learning NLP, and rule-based NLP functionality. Many other programming language bindings have been created so this tool can be used outside of Java.

### Future of NLP

Human readable natural language processing is the biggest AI- problem. It is all most same as solving the central artificial intelligence problem and making computers as intelligent as people. Future computers or machines with the help of NLP will able to learn from the information online and apply that in the real world, however, lots of work need to on this regard. Natural language toolkit becomes more effective. Combined with natural language generation, computers will become more capable of receiving and giving useful and resourceful information or data.

### Advantages and Disadvantages of NLP

Users can ask questions about any subject and get a direct response within seconds. NLP system provides answers to the questions in natural language. NLP system offers exact answers to the questions, no unnecessary or unwanted information. The accuracy of the answers increases with the amount of relevant information provided in the question. NLP process helps computers communicate with humans in their language and scales other language-related tasks. The system may not be able to provide the correct answer if the question is poorly worded or ambiguous. The system is built for a single and specific task only; it is unable to adapt to new domains and problems because of limited functions. NLP system doesn't have a user interface which lacks features that allow users to further interact with the system.

### Conclusion

Natural Language Processing is a branch of AI which helps computers to understand, interpret and manipulate human language. Future computers or machines with the help of NLP and Data Science will able to learn from the information online and apply that in the real world, however, lots of work need to on this regard. The advantage of the NLP system is that it offers exact answers to the questions, no unnecessary or unwanted information. The biggest drawback of the NLP system is that it is built for a single and specific task only so it is unable to adapt to new domains and problems because of limited functions

## Education For Wisdom

**Mrs. Shilpa Jajoo**

Headmistress and Directress

Jajoo English Medium School & Wonder Kids Montessori House of Children

### Abstract

*Academics: Most of our current school system revolves around it, and yet, I think it falls miserably short of what our kids need. To be honest, I think our academic system of education is highly overrated, at best. At worst, it destroys a number of our kids.*

*Hear me out. I'm not saying that our kids shouldn't learn to read, or do math, or develop other valuable skills. But too often, the focus of our kids' school day is Content with a capital C, with little connection to why it matters. Instead of learning together, many of our students spend hours lling in worksheets or copying down lecture notes that they could google in 30 seconds.*

*Too often the lectures they listen to are boring and irrelevant to their lives. And from my experience, most of this content is simply memorized, spewed out for an exam and then quickly forgotten. But beyond this, there's often only one right answer, which frequently cultivates in our students a fear of failure.*

*They are seldom truly engaged. Rarely are they transformed by their learning. They are going through the motions. Research shows that some of the least engaged students are the highest achievers. Think about that. They do well because they know how to "do school." Is this really the best we have to offer them? I think our students should be able to argue gracefully and persuade powerfully. They also need to know what they believe and why.*

*School should be a place where kids can discover what they love. They should be able to ask the questions that matter to them and pursue the answers. They should discover what they are passionate about, what truly sets their hearts and souls on fire. They should discover they can make a difference now. Above all, they should leave school knowing what they are good at.*

*As educationists our motto should be " Helping students make wiser choices", and teaching them Wisdom.*

### Introduction

#### Our students lose their curiosity

We are born curious. Babies explore their environments to learn; they do it naturally without being told. Three-year-olds constantly, at times annoyingly, ask, "why?" And yet, by the time my students arrive in Grade 10, they have all but lost their curiosity. Consequently, when I get a new class of students, we start by unlearning.

#### Amanda Lang's The Power of Why. In it she states:

Curious kids learn how to learn, and how to enjoy it – and that, more than any specific body of knowledge, is what they will need to have in the future. The world is changing so rapidly that by the time a student graduates from university, everything he or she learned may already be headed toward obsolescence. The main thing that students need to know is not what to think but how to think in order to face new challenges and solve new problems.

Instead, we need to create an environment that engages learners, fosters creativity, and puts responsibility for learning where it belongs – with our students. Instead of rote learning, teachers need to use content to teach skills. We need to build environments that allow our students to get messy and build things. Places where students learn how to learn, and know how they learn best.

Furthermore, our students need to be able to problem-solve, innovate and fail over and over again. Throughout all of this, our kids should be collaborating with each other, as well as virtually with students across the globe. They need to be able to communicate powerfully using the mediums of print, photography and video.

#### Three questions to guide student-driven learning

As I've worked with my students, we've come to realize they need to be able to answer three questions, regardless of what we're researching:

- What are you going to learn?
- How are you going to learn it?
- How are you going to show me you're learning.

#### What is Wisdom?

Wisdom can be defined as the 'power of judging rightly and following the soundest course of action, based on knowledge, experience, understanding, etc.

Wisdom can be defined as the application of intelligence, creativity, and knowledge as mediated by values toward the achievement of a common good through a balance among (a) intrapersonal, (b) interpersonal, and (c) extra personal interests, over the (a) short- and (b) long-terms, in order to achieve a balance among (a)

adaptation to existing environments, (b) shaping of existing environments, and (c) selection of new environments.

### **Wisdom as Gifted Moral Character**

“You give but little when you give of your possessions. It is when you give of yourself that you truly give”.

These words are from famous Lebanese poet Kahlil Gibran where Gibran isn't telling us to stop donating our old clothes to charity, or canned goods to a food drive. These things are important. He's saying that the highest form of giving is when we give our time, talent, and energy to those in need. And we are all capable of giving something. We can tutor a younger student, help an elderly neighbour, or do an extra chore at home. We can give time to someone who is lonely, or a smile to someone who is sad. According to Gibran, this is the highest form of giving. Today, be generous and share yourself with others.

### **Challenges from within; A serious decline in culture**

Research shows that many youth of the East and West are increasingly manifesting high rates of depression, eating disorders and other forms of mental illness. In all the schools and educational institutes these days there is a compulsory need of a counsellor. Why are the parents not being able to handle their wards concerns. In Australia, there have been increase in youth homelessness, and school truancy which have created an underclass of 'street kids', disenfranchised by society, yet often by choice.

Increasing numbers are committing suicide and other violent crimes at an alarming rate, and are expressing a general malaise, loss of meaning and hopelessness about the future.

There are several major factors inherent in our cultural paradigm, which have contributed to a failure of healthy enculturation of young people. These include the triumph of egoism over community, the manipulation of imagination, the secularisation of culture and the degradation of environment.

### **Individualism versus Community**

The current age of the 'I' which celebrates self-centred egoism, began in the 60s and 70s with the recognition of (and rebellion against) the injustices involved in the long-term cultural dominance. While not wanting to undermine the gains that have been made in terms of equity and human rights, I feel that, in the process of unmediated individualism, the needs of family and community have often been compromised. As a result of the ensuing breakdown of families and other social structures (linked also to the shift in male-female power relationships), we are seeing an unprecedented fragmentation of the social glue, without which young people are rudderless in their social orientation.

### **The Colonization of Imagination**

Over roughly the same period of time, the imaginations of children and youth have changed; once nourished by oral folk and fairy tales, today they are poisoned by electronic nightmares. Since the advent of TV and video game parlours, followed by the use of computer games (originally designed to train and desensitize soldiers before sending them off to the killing fields), children and youth have been consistently and exponentially exposed to violent images. Globalization has made this 'entertainment' ubiquitous, thus allowing for the subsequent colonization of youth culture and imagination, globally.

### **The Secularization of Culture**

The triumph of secular over spiritual values, coinciding with the widespread crisis of values reflected in postmodernism as a 'belief' system, has resulted in a dominant world culture. Egoism that brings greed in its wake; economic rationalism stripped of principles of social justice; the secularisation of education, cultural fascism and religious fundamentalism that lead to ethnic cleansing, are all symptoms of societies that have lost connections with moral, ethical and spiritual values.

### **The Degradation of the Environment**

Finally, the culture dominating the global environmental agenda, which values private and corporate profit over community and planet, has been responsible for the systematic and pervasive pollution of our earth, air and water. What message, we might wonder, has this given to our youth?

### **Reclaiming Wisdom as the goal of Education**

Over the past decade, much of the youth futures research has demonstrated that many young people in the industrialised world have become fearful of the future, disempowered and disenchanted by the education system. These futures researchers recommend more holistic, integrated teaching methods, using imagination, pro-active social skills (such as conflict resolution, cooperative learning methods) and specific futures methodologies (such as creating scenarios, visualising preferred futures, action plans).

What is needed is integrated education systems, at both the school and tertiary levels, which are underpinned by higher order knowledge systems and inclusive cosmologies. These include the traditional, indigenous knowledge systems of many cultures, as well as such spiritually based cosmologies, or 'perennial philosophies'.

**Education for Wisdom****•Involve the child in teaching learning process**

Having been involved for 15 years in teaching in a Montessori school, I have guided numerous children from age three to puberty. As a responsible participant in their (and my) joyous learning of every imaginable subject through stories, drawing, painting, singing, movement, drama, music, poetry, mythology and play, I knew learning could be otherwise. And surprise, surprise! The children also became literate in the process, but not just literate in the narrow sense mentioned in the introduction. They developed what I would call broad literacies: to 'read' for meaning, to write creatively, to share, to respect nature, to imagine world's beyond their immediate one, to have social confidence and to love learning. The conceptual approach of Montessori education is an integrated approach to the development of the child as a whole.

**•Construct meaningful connections between the Web and the classroom**

The design of courses and academic programs should be determined by the nature of the subject matter, the needs of the student population, and the instructional goals. Even those classes that depend mainly on face-to-face interaction can make use of online tools. Learning a new language can be substantially assisted by Web courses, but students should also have opportunities to communicate in the new language in person with others, preferably with native speakers. In addition, the Web can connect students, not only in foreign language, but in the full variety of disciplines to classrooms across the globe. Such interactions will work best when facilitated by an enlightened teacher. Many instructors are "flipping" their courses, with lecture material available on the web, leaving classroom time for discussion and other interactions.

**•Replace the sage on the stage with the guide on the side**

Close to a century ago, the American philosopher John Dewey (1859-1952) argued for the effectiveness of learning by doing. Yet, throughout the twentieth century, education continued to emphasize the sage on the stage. In fact, what we are doing now is an example of the sage on the stage. It's indisputable that learning can take place in a setting like this one. At least I hope so. But even assisted by PowerPoint technology, this keynote involves a relatively passive audience and an active lecturer. By the way, I hope that we can have a much more interactive question/answer/discussion period. But even then, we will for the most part be exchanging information. In truth, I would wager that the most intensive learning—integration, application, constructing knowledge, and acquiring wisdom--will take place in informal, engaged conversations irrelevant of the place. The participation of the keynote speakers in the full conference and our availability for follow-up conversation will enable the sage on the stage to function as a guide on the side.

**•As the guide on the side, encourage writing across the curriculum When students write, they learn.** In her classic 1977 article, "Writing as a Mode of Learning," Janet Emig argues that writing is more than a way of demonstrating what has been learned. Writing itself is a mode of learning, promoting integration and application, the construction of knowledge and wisdom.

**•Infuse civic learning, ethical reasoning, visual literacy, problem-solving, critical thinking, and numeracy across the curriculum**

When we function as guides on the side, we see that it makes more sense to integrate learning goals rather than to create discrete courses for everything that we want to achieve. We can more effectively motivate students to make connections if we structure connectivity into our courses. We do not need a separate course in civics, for example, to teach citizenship. We can instead integrate civic learning into every course we teach. In biology, we can pose questions about public policy, climate change, for example. In physical therapy, students can study statutes that pertain to the disabled. The same holds true for ethics, visual literacy, problemsolving, critical thinking, and numeracy. Integrating these perspectives into courses works better than separate courses. Compartmentalized thinking is not effective.

**•Create a balanced curriculum for Wisdom**

A wise person is someone whose successful intelligence leads them to seek a common good that balances intrapersonal, interpersonal, and extrapersonal interests (over both the short and the long-term) to adapt to, shape, and select environments through the infusion of values (Sternberg, 1998, 2003). Sternberg's curriculum is certainly the most theoretically articulated contemporary effort to teach for wisdom in schools based on an explicit theory. Sternberg has developed an elaborate empirical test of his balance theory through an infused curriculum. The teaching focus is "student-centered" in that students are encouraged to develop their own strategies and form their own interpretations of the materials.

"Wisdom primarily involves the capacity to judge, along with the constraint that this judgment be right, sound, or just. It is measured both by the means involved in reaching the judgment and also by its end. Wisdom represents an avenue to creating a better, more harmonious world."

"The function of wisdom is to discriminate between good and evil." Wise thinking, students learn from a transparency, requires that decisions take into account not only the present but also the past and future, and that they should involve solutions that promote the common good, not just one's own interests. In order to make wise decisions, we must also be able to think critically, using reasoning, logic, inquiry, and reflection to judge and

analyze historical problems and situations; but wise decisions also consider the moral and ethical dimensions of those historical problems.

### The Balanced Curriculum involves activities that foster:

#### 1. Dialogical thinking

An ability to consider a situation from the point of view of different people within a dialogue (e.g., those on both sides of a conflict)

#### 2. Dialectical thinking

Thinking that resolves competing points of view from a more integrative perspective

#### 3. Critical discussion of actions

As to whether they are wise or foolish (both historically, and in student's own lives)

#### 4. Role modelling of wise judgment and action on the part of students and teachers.

Teachers are given curriculum materials that include grouping suggestions for students, presentation materials, student materials (such as worksheets), and both content and wise-thinking objectives. Students are encouraged to work in groups and to work with primary sources (for those with reading difficulties, vocabulary lists, and simplified versions of the source material are provided)

### Employ high impact educational practices

Teaching must change fundamentally from the delivery of information to the development of critical thinking. We must transform our classroom practices accordingly. As teachers, we must move away from the limelight of expertise to the more challenging role of guiding students to think, assess, integrate, and apply. As John Dewey says, "If we teach today's students as we taught yesterday's, we rob them of tomorrow."

### Conclusion

The road to this new approach to education, via the balance theory of wisdom, is bound to be a rocky one. First, entrenched structures, whatever they may be, are difficult to change, and wisdom is neither taught in schools nor, in general, is it even discussed. Second, many people will not see the value of teaching something that shows no promise of raising conventional test scores. These scores, which formerly were predictors of more interesting criteria, have now become criteria, or ends, in themselves. Society has lost track of why they ever mattered in the first place and they have engendered the same kind of mindless competition we see in people who relentlessly compare their economic achievements with those of others. Third, wisdom is much more difficult to develop than is the kind of achievement that can be developed and then readily tested via multiple-choice tests.

There is no easy road to wisdom. There never was, and probably never will be. As an educational system, we have turned on the easy road, but the wrong road. It is not too late to turn back. By ratcheting up our emphasis on a narrow conception of what it means to be a 'good student', we are ignoring the broader conception that will make a difference to individuals and society. It is not merely what we know, but how we use it, that will determine the fate of our society and of other.

## A Study Of Causes Of Accidents And Various Welfare Measures For Employees With Special Reference To C.S.T.P.S Chandrapur

**Miss. Manasi M Mahurpawar**

**Miss Sakshi P Dahikar**

Prof. Ram Meghe Institute of Management And Research, Badnera

### Abstract

*The main objective of the study is about the employee welfare measures of C.S.T.P.S and various welfare measures applicable to employees. There are mainly two basic factors characterized for welfare measures. First is, the conditions under which work is carried on are not congenial for health, and second is when a labourer joins an industry, he has to work in an entirely strange atmosphere which creates problems of judgement.*

*The working environment in a industry badly affects the workers health because of the excessive heat or cold, dust, lack of pure air and sanitation.*

*The researcher has taken the simple random sampling technique to analyse the probability of accidents at workplace. The data are collected from both primary and secondary sources respectively like questionnaire and journals.*

*In this research we have found the importance of the study. The main importance of this study is that it saves the life of worker. There are some limitations also like this study is only limited to C.S.T.P.S chandrapur. Only 100 employees are selected for this study. This study is only limited for the causes of accidents and safety measures implemented in company.*

**KEYWORDS:** Employees, Welfare, Measures, Industry

### Introduction:

Chandrapur thermal power station (C.S.T.P.S) is situated near Durgapur village at 6km from chandrapur city. The power station site is located at the centre of coal-fields of this region. Water requirement is met from Erai Dam con. water is supplied by 5 numbers of pipelines by gravity flow and distributed to 2 numbers of reservoirs in C.S.T.P.S. area. Diameter of pipes is 4 lines of 1200 mm dia .PSC pipe. 1 line of 1600 mm. dia.M.S pipe.

### Further Water Is Used For Different Purposes As

- Cooling water system for condenser and plant auxiliaries
- Air conditioning and ventilation system
- Ash handling system
- Power cycle make up
- Equipment cooling system
- CPU regeneration
- Coal dust suppression system
- Potable water system
- Gardening

As per revised notification of Ministry Of Environment And Forest (MoEF), the limit of specific water consumption is 3.5 lit/kwh. Maharashtra State Power Generation Company Limited ( MSPGCL) is committed to achieve this norm. same is being done by strict monitoring of water consumption of each TPS by corporate office.

Chandrapur super thermal power station comprises of 4 x 210 MW units and 2 x 500 MWW units. Another 1x500 MW unit is approved and erection work is in progress. Present generating capacity is 1840 MWW and can meet about 25% of state demand. Considering extension by 1x500 MW, total capacity of this power station will be 2340 MW, highest capacity in Asia.

Mahagenco is Maharashtra start run power utility company. Highest overall generation capacity and the highest thermal installed capacity amongst all the state power generation utility is in india. In terms of installed capacity mahaganco is second highest generation company after NTPC. Only state utility having balance

generation portfolio involving thermal, hydro, gas and solar station .C.S.T.P.S.got **National Productivity Award** for better performance -13 times. INCENTIVE AWARD for reduction in sp.fuel oil consumption-7 times. INCENTIVE AWARD for reduction in aux.power consumption- 2 times. GRREN TECH AWARD for environment – 2 times.

Quality circle movement is well established and QC from C.S.T.P.S. achieved excellent and par excellent award in national and international conventions.

Employee / labour has an important role in the industrial production. For this purpose the employees has to be properly managed. Whole hearty cooperation of the labour force is needed in order to increase the production & to earn higher profits. Cooperation of the employee is possible only when they are fully satisfied with their employer & the working conditions on the job. Employee or labour welfare is a comprehensive term including varwus services, benefits and facilities offered to employees by the employer. Through such generous fringe benefits the employer makes life worth living for employees. The welfare amenities are extended in addition to normal wages and other economic rewards available to employees as per the legal provisions. According to Dr.Parandikar, "Labour welfare work is work for improving the health, safety and general wellbeing and the industrial efficiency of the workers beyond the minimum standard laid down by labour legislation" . Welfare measures are also provided by the government, trade unions and non-government agencies in addition to the employer. i.e. we can say that labour welfare is also a voluntary efforts on the part of the employer or any other agency to provide employees the best working conditions. The basic purpose of labour welfare is to enrich the life of employees and keep them happy and contented.

#### **Causes Of Accidents At C.S.T.P.S:**

- Avoiding uses of safety helmets and shoes.
- Using mobile phones during the work.
- Avoiding safety instructions before starting work.
- Ignoring health issues like heart related problems.
- Avoiding the proper use of necessary protective equipment, safety appliances and clothing.
- Ignoring regular safety inspection by a competent person at suitable intervals of time.

#### **Scheme For Employees In C.S.T.P.S**

##### **Many Non-Statutory Welfare Schemes May Include The Following Schemes:**

Personal Health Care (Regular medical check-ups): Some of the companies provide the facility for extensive health check-up

##### **Flexi-Time**

The main objective of the flexitime policy is to provide opportunity to employees to work with flexible working schedules. Flexible work schedules are initiated byemployees and approved by management to meet business commitments while supporting employee personal life needs

##### **Employee Assistance Programs**

Various assistant programs are arranged like external counselling service so that employees or members of their immediate family can get counselling on various matters

##### **Harassment Policy**

To protect an employee from harassments of any kind, guidelines are provided for proper action and also for protecting the aggrieved employee.

##### **Maternity & Adoption Leave**

Employees can avail maternity or adoption leaves. Paternity leave policies have also been introduced by various companies. 144

##### **Medi-Claim Insurance Scheme**

This insurance scheme provides adequate insurance coverage of employees for expenses related to hospitalization due to illness, disease or injury or pregnancy.

Employee Referral Scheme: In several companies employee referral scheme is implemented to encourage employees to refer friends and relatives for employment in the organization.

Subsidized food, Cooperative stores

**Transportation**

The Committee on Labour Welfare, 1969, recommended the provision of transport facilities to workers so that they can reach the workplace punctually and comfortably. Most employers have, however, recognized the workers' need for transport services and therefore responded. MAHAGENCO also had provided the facility to its employee at Parli TPS (New) for the hassle free to & fro transport.

**Research Methodology**

The research methodology used for studying "A Study Of Causes Of Accidents and Various Welfare Measures For Employees With Special Reference To C.S.T.P.S Chandrapur" is exploratory research design and hypothesis testing research design. Analysis and interpretation has been done by using the statistical tools and data presented through tables and charts.

**Data Collection:**

The data collected for the study consists of primary data and secondary data.

**PRIMARY DATA**

In this study, primary data is collected through personnel interview and questionnaires.

**SECONDARY DATA**

This data is to collected from various books, reports, journals, periodical, magazines, web pages, etc.

**SAMPLE DESIGN**

A sample design is definite plan for obtaining a sample from a given population. Sample has been collected by using systematic sampling method and stratified sampling method.

**SAMPLE UNIVERSE**

A sample universe for this study was 100 employees of C.S.T.P.S chandrapur.

**SAMPLE SIZE**

The sample size of this study is 100 employees of C.S.T.P.S chandrapur.

**Objectives Of Study**

- To find out the causes of accidents in C.S.T.P.S, chandrapur.
- To find out the safety measures used by C.S.T.P.S, chandrapur.
- To suggest effective safety measures.

**Method Of Data Collection**

Research is a search for facts. It answers the questions and gives solutions to the problems. Research is an organized inquiry. It seeks to find explanations to unexplained phenomenon to classify doubtful facts and to current the misconceive facts.

**Scope Of The Study**

- To suggest effective safety measures.
- To save lives.

**Various Precautions Taken By C.S.T.P.S To Save Lot Of Lives At The Time At The Time Of Crisis.****Limitations Of The Study**

- This study is only limited to C.S.T.P.S chandrapur.
- The study is only limited for the causes of accidents and safety measures implemented in company.
- Only 100 employees are selected for this study.
- The study is only for the academic purpose

**Data Analysis And Interpretation:****About The Age Of Employees:**

Sr.no	Options	Percentage
1	21-25 yrs	5 %
2	26-30 yrs	20%
3	31-35 yrs	30%
4	36-40 yrs	25%

From the above table it is found that, 5% employees are of 21 to 25 years of age, 20% are 26 to 30 years of age, 30% of employees are of 31 to 35 years of age, and 25% employees are of 36 to 40 years of age.

### Conclusions And Suggestions

- STPS CHANDRAPUR maximum employees are of 31 to 35 yrs of age.
- Maximum employees of CSTPS, CHANDRAPUR are from workers class.
- Maximum employees have monthly income 16,000 to 25,000.
- Maximum employees are aware of safety department.
- Maximum employees said that fire extinguishers are available in their organization.
- Maximum employees say that ventilation system is very good.
- Maximum employees say that accidents never occurs in CSTPS, CHANDRAPUR.
- Maximum employees of CSTPS CHANDRAPUR are satisfied about safety administration.

## Indian Sports Policies And Olympic Performance

Dr. Jayawant Mane

K.M.C.College, Khopoli (University of Mumbai)

### Abstract

Indian government has given thought to give wide publicity and participation opportunity to Indian youth because, the population of India majorly comprises of youths. Therefore, it is necessary not only to address problems faced by the youths but also provide them opportunities to grow. Through the sports councils, organizations, youth services and various other measures of the government.

The National Sports Policy was established by the government of India for the first time in 1984. An objective of this policy was raising the standard of Sports in the country. In this National Sports Policy firmly mention that the improvement happened because of National Sports Policy would be reviewed every five years. As well decide future plan of action for more progress in sports and take necessary steps. In spite of various encouraging measures, the implementation of the goals and objectives of the National Sports Policy, 1984 could not be substantially realized. Because of this reason the National Sports Policy was reconstructed when its required with the specific measures to be taken by the different organisations, which included promotion of sports in the India.

In 2001 The National Sports Policy, the Central Government included many other objectives of "Broad-basing" of Sports and "Achieving Excellence in Sports at the National and International levels" and integrated effort with the State Government, the Olympic Association and the National Sports Federation. In view of the potential strength and competitive advantage of Sports in India, the Sports Policy mandates the State to promote Sports activities in the country and integrate Sports and Physical Education more effectively with the Education Curriculum. The Government of India and the Sports Authority of India, in association with the Indian Olympic Association and the National Sports Federations, are expected to focus specific attention on the objective of achieving excellence at the National and International levels. The National Sports Policy aims to pursue inclusion of "Sports" in the Concurrent List of the Constitution of India and introduction of appropriate legislation for guiding all matters involving national and inter-state jurisdiction. In specific terms, the objectives of National Sports Policy includes Broad basing of Sports, Integration with education, development of infrastructure, excellence in Sports, Development of National Sports Federations, Scientific back up to Sports Persons, ensure access to high quality of Sports equipments, training and development of Coaches, Sports Scientists, Judges, Referees and Umpires, Incentives to Sports Persons, Integrated development of the Sports and Tourism sectors and Resource mobilization for Sports.

**KEYWORDS:** National Sports Policy, Broad-basing, Excellence in Sports, Olympic Association, National Sports Federation

### Introduction

The Sports Authority of India (SAI) was established by the Govt. in 1984 as a Society under the Societies Registration Act, 1860, with the twin objective of broad-basing of sports and to achieve excellence at the national and international level. Over the years, SAI has emerged as a field arm of sports of the Ministry of Youth Affairs & Sports (MYAS).

### Aims & Objectives Of Sai:

- To promote and broad-base sports in the country.
- To implement schemes/programmes for achieving excellence in sports in different disciplines at international level in order to establish India as a major sporting power.
- To maintain and utilize on behalf of the Govt., stadia which were constructed/renovated for the IXth Asian Games held in 1982.
- To act as an interface between the Ministry of Youth Affairs & Sports and other agencies concerned with the promotion/ development of sports in the country on the other hand, i.e., State Govt., U.T. Administration, IOA, National Sports Federations, Sports Control Boards, Industrial Houses, etc.
- To establish, run, manage and administer the institutions to produce high caliber coaches, sports scientists and physical education teachers.
- To plan, construct, acquire, develop, take over, manage, maintain and utilize sports infrastructure and facilities in the country.
- To initiate, undertake, sponsor, stimulate and encourage research projects related to various sports sciences for upgradation of sports, sportspersons and coaches.
- Other incidental issues concerning promotion, development and excellence in sports.

### Maintenance And Utilisation Of Stadia

SAI is maintaining and utilizing the following stadia on behalf of Govt. of India which were created/renovated for the IXth Asian Games held in 1982.

- Jawaharlal Nehru Sports Complex
- Indira Gandhi Sports Complex
- Major Dhyan Chand National Stadium
- Dr. Syama Prasad Mukherjee Swimming Pool Complex
- Dr. Karni Singh Shooting Ranges.

### Sports Promotional Schemes Of Sai

Apart from the above, the following sports promotional schemes are also being implemented by SAI through its Regional Centres for spotting and nurturing talented children by providing them requisite facilities in terms of sports infrastructure, sports equipment, competition exposure and scientific coaching etc.

- Centers of Excellence Scheme
- SAI Training Centers (STC) Scheme
- Special Area Games (SAG) Scheme
- National Sports Talent Contest (NSTC) Scheme
- Army Boys Sports Companies (ABSC) Scheme
- Come and Play Scheme
- National Sports Academy [NSA] Scheme

### Academic Programmes Of Sai

SAI has got two Academic Wings, namely, Netaji Subhas National Institute of Sports (NSNIS), Patiala for coaches and the Lakshmbai National College of Physical Education (LNCPE) at Thiruvananthapuram.

### National Sports Policy 2001

The Union Cabinet approved the National Sports Policy 2001 to encourage "broad-basing" of sports and achieving excellence in performance. National Sports Policy had been adopted in 1984, followed by a National Education Policy, two years later. But many of the objectives of these previous policies remained unrealised, which is why the government decided to formulate the National Sports Policy 2001.

This policy was formulated after extensive consultations with the states and Union territories, the Indian Olympic Association, national sports federations, the Sports Authority of India, agencies handling sports and eminent persons in the field.

The following points as the highlights of the policy:

- Upgradation and development of infrastructure,
- Support to the national sports federations and appropriate bodies,
- Strengthening of scientific and coaching support to sports,
- Incentives to sportspersons,
- Enhanced participation of women, tribals and rural youth,
- Involvement of the corporate sector in sports promotion,
- Creation of greater awareness among the public.

### Comprehensive National Sports Policy 2007

The Comprehensive National Sports Policy 2007 aims at building on previous sports policies with a view to accomplishing the unfinished agenda and addressing the emerging challenges of India in the 21st century, most particularly the national goal of emerging as a global. It aims at making the framework for sports in India more effective and inclusive with the full ownership and involvement of all stakeholders. The participant/athlete shall occupy centre-stage in the Comprehensive National Sports Policy, with all other stakeholders playing a promotional, supportive and convergent role. The policy has three broad objectives:

- 1) Sports for all
- 2) Excellence in sports and Contingent Constitutional
- 3) Legal and Institutional measures to operationalize the Policy.

### Sports For All

- To provide universal access to sports and physical education for all classes of citizen, in all segments of society and across all age groups.
- To provide for sports facilities in rural areas and urban areas through local institutions. Provide for substantially enhanced public investments as a fundamental requirement for the time-bound establishment of basic but extensive sports infrastructure, trained supervisors, organized sports management arrangements.
- Universalize sports facilities in educational institutions, get physical education and sports made an integral part of the curriculum up to the higher secondary level.
- Mass participation for sports culture and competitions by fostering a sports club culture, promoting sports competitions, linking youth development and sports, by advocating the benefits of sports.
- Promotion of sport among young girls and women, Sports for persons with disability, Sports and Physical Exercise for Senior Citizens, National Physical Fitness Programme.

### Excellence In Sports

- To achieve the highest levels of performance at the highest levels of international competition, a well-formulated, target-oriented and need-based approach will be adopted.

- Ensuring fair and reasonable opportunities to all talented young sportspersons, irrespective of economic background, social origin, gender or regional location, to fully realize their potential.
- Promoting a competitive sports culture by harnessing sports development to youth development and youth development to national development so that the culture of sports acts as a critical engine of accelerated and inclusive economic growth.
- Providing for a sufficient number of sports competitions at all levels, from the village/urban neighborhood level through the block/district level to the state level, to create a culture of mass participation in competitive sports, including indigenous games and sports, and extending to both genders as well as paralympic events.
- Strengthening scientific and technical support systems for high performance athletes.
- Making available sufficient high-end facilities, including appropriate nutrition, and trained sports instructors and sports scientists/doctors.
- Hand-picking the most promising international medal prospects for complete and continuous support in terms of state-of-the-art training facilities, the best coaches and trainers.
- Preparing and supporting a large pool of talented sportspersons for gainful employment opportunities within the sports sector after their active sports careers are over.
- Devising a scheme of sports pensions that rewards a wide spectrum of not only those who have secured international or national-level awards but also those who have represented the nation.

### Keeping Doping Out Of Sports

- High priority must be accorded to capping, reversing and eventually ending the scourge of doping in Indian athletics and other sports.
- Leveraging sports for national economic development by encouraging sports tourism, including adventure sports in the country.
- Pursuing a well-calibrated policy for holding major sporting events.

### Contingent Constitutional, Legal And Institutional Measures To Operationalize The Comprehensive Sports Policy. Constitutional Requirements:

There has been under consideration in Parliament since the Twelfth Lok Sabha a Bill aimed at transferring the subject of “sports” from the State List to the Concurrent List in the Seventh Schedule. It is, therefore, proposed to pursue in Parliament the need to shift the emphasis on sports from its present Constitutional position where it is clubbed with “entertainments” and “amusements” to treating sports as a key instrument of youth development for accelerated and inclusive national development, the overarching goal of the Approach to Eleventh Five-Year Plan endorsed by the National Development Council, a goal that clearly requires a concurrent effort by the Centre and the States.

### Legal Requirements

Meanwhile, as advised by the Ministry of Law and Justice, legislation under the residuary powers vested in the Union Government under Entry 97 of the Concurrent List may be considered for providing a legal framework for the Long-Term Development Plans that are the basis for cooperation between the National Sports Federations and the India Olympic Association, on the one hand, and Government/SAI, on the other, to achieve the goals of the Comprehensive Sports Policy.

### Institutional Measures

- 1) SPORTS REGULATORY AUTHORITY: When disputes arise within NSFs or when complaints are received about inefficient or inappropriate deployment of funds, mistakes in management, non-accountability for results achieved or not achieved, prejudice or bias in the selection of national teams/athletes, undemocratic or unethical electoral practices, and lack of openness and transparency in functioning. To resolve such disputes legislation is proposed to be introduced for establishing a Sports Regulatory Authority.
- 2) SPECIAL INTEREST GROUPS: repeatedly seek recognition [outside the existing NSFs] for autonomously managing sports it is proposed that either autonomous wings may be created within each Federation for recognized special interest groups, subject to approval of such arrangements by the proposed Sports Regulatory Authority.
- 3) SPORTS AUTHORITY OF INDIA AND NYKS: Thorough revamping of the Sports Authority of India and the Nehru Yuva Kendra Sangathan to match up to the additional responsibilities.
- 4) NATIONAL SPORTS FEDERATIONS/IOA: Redefining their relationship with Government through the modalities, principles and criteria for negotiating and enforcing the conditionality's agreed upon in Long-Term Development Plans.
- 5) MONITORING AND EVALUATION: Appropriate steps will be taken to monitor the progress of Policy at the levels of the Gram Sabha and the three-tier Panchayati Raj system as well as at the State and Centre, in association with all stakeholders concerned. Besides, the Union Government will have the policy implementation be evaluated by independent agencies to evaluate the implementation of the Policy and place such evaluations periodically before Parliament.

### Come And Play Scheme

#### Objective:

The Come & Play Scheme was initiated for optimum utilization of SAI sports facilities in Delhi and across the country, and primarily focused on encouraging local sports persons in areas where SAI sports facilities/Centers are operational. While providing youth from local communities and sports enthusiasts with an opportunity to train under SAI coaches, the scheme provides yet another avenue for those not covered under regular residential/ non-residential schemes. The scheme creates yet another pool of talented sportspersons from where meritorious sportspersons can be scouted and inducted into regular residential sports promotional schemes of STC and SAG.

The Scheme was initiated at various SAI Stadium Complexes in Delhi, in phases, in May, 2011. The enthusiasm and overwhelming response for the scheme encouraged SAI to launch this Scheme at its various Regional Centers/Sub Centers/Academic Institutions/STC and SAG Centers from 1st October 2011. The scheme is given wide publicity through press release in local media, including newspapers, TV spots and Radio jingles etc. The trainees are provided playing arenas/non-consumable equipment's like field, track, tables, mats, etc. Minimum and inescapable consumables like balls, shuttle-cocks, etc. are also provided by SAI.

Table 2: Olympic Games Medal by Sports

### Conclusion

The Target Olympic Podium Scheme is a flagship program of the Ministry of Youth Affairs and Sports which is an attempt to provide assistance to India's top athletes. The Scheme looks to add a premium to the preparations of these athletes so that they can win Olympic medals in 2020 and 2024 Olympics. Under the Scheme, the Department of Sports shall identify athletes who are potential medal winners in 2020 / 2024 Olympics. The idea of the Scheme is to also keep an eye in the future and fund a Developmental Group of Athletes who are medal prospects for the Olympic Games in Paris in 2024 and Los Angeles Games in 2028.

## Benefits Of E-Business And E-Commerce In The Field Of Marketing.

**Prof. Vivek Arun Joshi**

Assistant Professor,

Shree Sant Gadge Baba Hindi Mahavidyalay, Bhusawal.

### Abstract

*Digital world has changed the way of doing business in the global competitive era. Numbers of multinational companies have opened their businesses in India and doing aggressive marketing with the help of recent tools of e-commerce. The penetration of smart phone in India is the major reason for effective and aggressive marketing. The tools like Artificial intelligence and many others have dramatically changed the way of advertising from mass to personal. Hence, it is necessary for every business to adopt the changes going the market to upgrade the business and compete the e-market globally. Therefore it is necessary to study the benefits of E-business and E-Commerce in the field of marketing at the same time it is expected to understand the threats associated with it.*

**Keywords** – E-business, E-commerce, Artificial intelligence, Smart phones,

### Introduction

Today's world is known as digital world. Internet, Computers and smart phones have revolutionary changed the scenario of the online business. In the age of busy and hectic schedule of individuals, it is not possible for them to go to market and do the shopping. There are many advantages of e-business to customers and as well as to business.

Marketing plays a vital role in every organization to reach to customers and influence and attract them to buy a product. In the era of computers and smart phones, the numbers of smart phone users have been increased dramatically. India's total internet users are expected to increase up to 829 million by 2021 from 604.21 million as of December 2018. Hundreds of mobile applications have been introduced for smart phone and numbers of web-sites are developed E-business and E-commerce. The e-business has simplified the way of doing business and shopping also.

The Indian e-commerce market is expected to grow to US\$200 billion by 2026 from US\$38.5 billion as on 2017. Looking at this scenario, every business will have to adopt the changes in the marketing strategies and way of doing the business. Rigid and old way of doing marketing is not at all suitable in the era of digital marketing. Therefore it is necessary to study the benefits of e-business and e-commerce in the field of marketing.

### Objectives Of Research

- To study the Benefits of E-business and E-commerce in the field of marketing.
- To study the Challenges associated with the e-business and e-commerce marketing.
- To study the future of e-business and e-commerce in the field of marketing.

### Hypotheses

Technology has dramatically changed the way of marketing in the recent era. Increasing number of smart phone users are the base for digital marketing. Considering the increasing number of smart phone and internet users, the businesses have tremendous future opportunities to expand their business globally.

### Benefits Of E-Business And E-Commerce In The Field Of Marketing

**Marketing At Lower Cost** – Instead of spending crores of rupees on banners and print media, the marketing through web-sites and smart phone application and advertising there on are quiet easy and at very low cost. A business can make the advertisement though advertisement on different web-sites, YouTube, what Sapp, Facebook, pop-up advertisement on smart phone, mobile application, messages etc. Today's generation uses smart phones and internet more as compared to print media. It is the most effective and affordable tool of marketing the business.

**Accessibility To Attract Customers** – Some of the customers are busy during the whole day. They can check the social media accounts and other application at night time. In marketing through e-commerce there is no limitation of time whether to show ads or not. Hence, e-commerce can attract the customer at 24x7. By using the platforms like Face-book and other social media, the business can easily be reached to the doorstep of the customers at any time.

**Availability Of International Market** – Internet has no boundaries. It has spread all over the world. The worlds market is directly connected with the help of internet. A business can expand its boundaries across the globe without establishing the office in overseas. Indian unique products can be advertised on internet globally and the doors of global partnership and business get opened with the help of e-commerce.

**Easy And Attractive Presentation** – With the help of photographs and videos, the products can be marketed effectively. The description of products can easily be shown with specification with the help of effective informative videos and photographs. The direct presentation attracts the customers easily and felt them to buy a product.

**Designing Personalized Products** – Technology has progressed a lot and sometimes it is beyond the imagination of common man. Artificial Intelligence is a tool used to collect the personalized data of an individual including his hobby, interest, choice and necessities which enhances the shopping experience of customers. By using this tool, a businessman can prepare a personalized advertisement of a product and attract an individual customer, which was not at all possible in traditional marketing.

**Human Resource At Low Cost** – Online business and marketing needs very few staff to run the business. Only the condition is that the staff should be well expert. Even a business can sell the products globally with having no office in overseas and no staff.

**Easy To Encourage Impulse Buy** – The attractive video and photography motivates the buyer to purchase the products quickly, such buying is called impulse buying. Moreover a businessman can also execute a range of scarcity tactics such as countdown timers or showcasing limited quantities. Such strategies also felt the customers to buy the products quickly.

**Retargeting Or Remarket To Customers** – E-commerce helps to retarget the customers who visited the web-page or application of the business but not yet purchased the products. Sometimes some customers add some products in their cart but don't buy it, in such situation a reminder message or call can be initiated by a businessman to attract the customer to shop more.

**Less Invasive Experience To Customers** – Sometimes when a customer goes to retail shop, he has to answer the unnecessary questions from salesman and may not like a product but due to forceful marketing, a customer has to buy a product. To avoid such things, shopping online has no force of any salesman and a customer can see the hundreds of products and many times and can take the decision as per his interest and choice, there is neither force of anyone nor the matter of personal relations.

**Easy Accessibility To Customer Data** – In case of physical retail purchase the customers are unwilling to give the personal data like e-mail, contact number, mailing address etc. But in online shopping, such information is easily accessible for business. While shopping, a businessman may ask such information or even more for creating user account on their website. Such personal information is useful for personalized marketing.

**Ability To Process High Number Of Orders** – In online shopping, the web-sites and mobile he products. In physical retail store, there is limitation of taking the orders. The size and location of shop, salesman, products etc. are the factors which may limit the number of customers and orders. But in online shopping, a businessman can have huge orders from anywhere in the world.

**Quick Scaling Of Business** – A businessman can change the volume of budget at any time as per the sale of the product. If any ads are performing well, then a businessman can change the budget of on such advertisement. After all hammering the product on customer will felt him to buy the product.

**Huge Discounts And Offers** – A businessman can give a huge discounts and offers to customers instead of spending heavy amount of advertisement. After all the customers are keenly looking for offers and discounts. The aggressive marketing through online channels helps the businessman to reach to larger base of customers.

The research paper mainly focuses on the benefits of e-business and e-commerce in the field of marketing. But looking at just benefits may lead to incomplete research. Hence, it is necessary to study the challenges posed by E-business and E-commerce in the field of Marketing. But due to time and length limit, the challenges are summarized shortly.

### **Challenges Of E-Business And E-Commerce In The Field Of Marketing.**

- Dependency upon Internet
- Online Frauds and malpractices
- Technology Crash
- Customers can't try before buy
- Highly Competitive Market
- Expectation of Quick Service by Customers.
- Physical retail is more popular

**Government Initiative** – Looking at the growth of e-business in India and its contribution to GDP and revenue, the government decided to announce various initiatives from 2014 such as Digital India, Make in India, Start-up India, Skill India and Innovation Fund. The timely and effective implementation of such programs will support the e-commerce growth of the country.

In order to increase the foreign participation, the Indian government has opened up the door of economy and allowed 100% FDI in e-commerce industry. Heavy investment is made in rolling out 5G Fiber network. To provide broadband services to 150000 grampanchayat, the government allocated 8000 crore rupees.

In short, government is also interest in boost of e-commerce industry because the revenue generated through e-commerce business is expected to jump from US\$39 billion in 2017 to US\$120 billion in 2020. At the same time, India internet economy is expected to double from US\$125 billion as of April 2017 to US\$250 billion by 2020.

**Future Of E-Business And E-Commerce In India** – With the increasing number of smart phone users and internet users in India, no doubt that the online business are going to change the scenario of Indian market. A Survey says that the Indian e-commerce market is expected to grow to US\$200 billion by 2026 from US\$38.5 billion as of 2017. Moreover the government has taken the initiative to boost the e-commerce industry. The expansion of e-commerce will make available the opportunities for business at the same to pose the challenges of global competitiveness. Therefore it is necessary to upgrade the business and face the market competition by using the perfect internet tool, recent technology and aggressive marketing.

**Hypotheses Testing** – After studying the objectives of the research, it has been concluded that all the three hypotheses considered are proved positive. There is no need to any alternate hypothesis.

### **Conclusion**

In the era of digital world, the way of doing the business and marketing the same has been changed dramatically. It has opened up the new sky for expansion of business. Technology has changed the scenario of business and marketing. Smart Phones and Internet made the life and business simpler. Day by day the number of internet and smart phone user are increasing which creates the new market for e-businesses. The websites like Amazon, Flipkart, Snapdeal and many more has done substantial business in India in the field of e-business. They are doing aggressive marketing using different tools of recent technology. If the technology and internet users increase with such speed, the Indian businesses have huge opportunities for expanding their business.

**A Review On: CSR Practices By Indian Companies****Prof. Mohsin I. Sheikh1**

College of Management and Computer Science, Yavatmal, Dist.-Yavatmal

**Prof. Nikhil B. Bagde2**

College of Management and Computer Science, Yavatmal, Dist.-Yavatmal

**Abstract**

*The world view towards Corporate Social Responsibility is divided. Some believe in 'agency theory' (Friedman 1970) and some others believe in "Stakeholder Theory" (Cannon 1999). In the last half of the decade, practitioners 'and academics' awareness of understanding Corporate Social Responsibility (CSR)'s ability to address many issues has increased significantly. Although considerable progress has been made, the assessment of the forms, types and effects on the objectives sought is hampered by the merging of various phenomena, leading to misunderstandings about why companies support CSR and what effect that support or their lack of potential has on effectiveness innovative political options. Despite a dramatic increase in CSR research in recent years, little is known about how and why companies invest in particular CSR practices, but not in others, or how such decisions affect the cultural, socio-economic and competitive contexts in which Companies are active. Business activities affect the wellbeing of people and the environment around the world. Therefore, it is important to understand how companies manage their CSR practices and communicate to stakeholders.*

**Keywords:** CSR Practices, Wellbeing of people, Socioeconomic, Effectiveness, Stakeholders.

**I. Introduction**

The year 2013 is historical in India because of the amendments brought by the Government in Companies Act and whereby made CSR spending by Company mandatory. The Companies Act, 2013, was declared a corporate social responsibility obligation in India. India's central public sector companies played a key role in corporate social responsibility for the country's development. They published a series of separate Guidelines for Central Public Sector Companies on 12 April 2013. The results have been categorized into three groups worldwide, i.e. corporate social responsibility has either positive or negative impacts or no impact on companies' financial performance. Researchers surveyed a variety of research and literature conducted on corporate social responsibility and impact on financial performance. There are some of the reviews of studies that were previously conducted in CSR. The aim of the present study is to examine the extent of applicability of CSR practices by Indian companies on the basis of previous studies and to suggest new directions of research.

**Csr Defined**

Most definitions describe CSR as a concept whereby companies integrate social and environmental concerns in their business operations and in their interaction with their stakeholders on a voluntary basis. (CEC: Green Paper for Promoting a European Framework for Corporate Social Responsibility)

The World Business Council for Sustainable Development (WBCSD) defines CSR as "The continuing commitment by business to behave ethically and contribute to economic development while improving the quality of life of the work force and their families as well as of the local community and society at large".

Kotler and Lee define CSR as "Corporate social responsibility is a commitment to improve community well-being through discretionary, business practices and contribution of corporate resources. Corporate social initiatives are major activities undertaken by a corporation to support social causes and to fulfil commitments to corporate social responsibility"

**Objectives Of The Study**

This review is performed to achieve the following goals:

1. Investigation of the current status of corporate social responsibility practices by Indian companies.
2. Review the concerned literature to understand the status of CSR in India
3. Suggest some less focused areas of corporate social responsibility for further research

**II. Research Methodology**

The present study is descriptive and examines the work of various researchers in the context of corporate social responsibility by reference to Indian companies. This article uses secondary data. The investigation period is eight years, i.e. from 2010 to 2018. To select companies and related literatures, i.e. Five years after and two years before the entry into force of the Companies Act 2013, earmarked sampling was used.

**Importance Of The Study**

This study analyses the views of various researchers on CSR practices by Indian companies. This study will help find new areas and aspects of CSR where less or no work has been done so far. In addition to that it also highlights new aspects for further research.

### III. Literature Review

Yadav and Gupta (2015) thought to examine the impact of CSR activities on the financial performance of 5 private companies in India, including Tata Steel, RIL, Mahindra and Mahindra, Infosys and Larsen and Toubro for the year 2010-14 Net return, earnings before taxes and earnings per share have been reported as financial performance indicators. CSR has a negligible relationship to ROI, but it has been a positive relationship with EPS of these companies using regression analysis and ANOVA.

Bhunia and Das (2015) studied the CSR activities of seven Maharatna companies to examine the impact of CSR on the financial performance of these Maharatna companies in India for the period 2004-2013. They used correlation, simple regression, and multiple regressions to test the causality of CSR for the company's profitability. The researcher found that only the Gas Authority of India Limited had a positive impact on the profitability of CSR, while other companies had a negative impact on profitability.

Vijay and Divya (2014) analysed the various corporate social responsibility activities of Indian commercial banks and wanted to get to know customer satisfaction as part of CSR. They also examined the impact of corporate social responsibility on Indian commercial banks before and after banking in terms of implementing corporate social responsibility for the period 2000-01 to 2012-13. They performed a descriptive statistical analysis, a trend coefficient, and a chow test to conduct the study. They concluded that commercial banks offer a high level of customer satisfaction in terms of corporate social responsibility, and that the performance levels of these banks are increasing due to the implementation of corporate social responsibility. They proposed disclosing the level of corporate social responsibility expenditure in their annual reports.

Sankar (2014) noted that the various research activities relate to the relationship between corporate social responsibility initiatives of different organizations and their financial performance. The result showed a mixed relationship between corporate social responsibility and financial performance. Based on previous studies, the author concluded that corporate social responsibility has a positive correlation with the financial performance of companies.

Kumar and Reddy (2014) examined the CSR practices in SAIL and concluded that SAIL did not have the CSR policy to properly carry out CSR activities and the unspent amount of the CSR budget to various plants and units distributed by SAIL Continue this remaining amount of the CSR budget until next year.

Moharna (2013) examined the CSR activities of public sector banks, namely Allahabad Bank, Andhra Bank, Bank of Baroda, State Bank of India and UCO Bank. The study found that most banks carry out CSR activities in the areas of rural development, education, welfare, women and children. The author concluded that these banks did not practice CSR practices satisfactorily.

Singh et al. (2013) dealt with CSR activities and CSR reporting practices, as well as with the state of CSR practices in public sector banks and private sector banks. In selecting SBI, PNB from public sector banks and HDFC Bank, ICICI Bank from private sector banks, the researcher noted that most banks, whether public or private, carried out CSR activities, but did not allocate the amount for CSR activities. To disclose activities on its website. They suggested that RBI should differentiate between banks in terms of corporate social responsibility practices and set a certain percentage of bank spending. In addition, a committee should be set up to monitor banks' activities with regard to CSR.

Bhupender & Vikas Kumar Joshiya (2012) examined the status of corporate social responsibility, the challenges of CSR and the guidelines for CSR in India. The CSR concept is now being expanded to include both economic and social interests. Companies have become more transparent in accounting and are reporting in public due to pressure from various stakeholders. Many positive outcomes can arise when companies adopt a social responsibility policy.

Saxena & Kohli (2012) examined the relationship between CSR rating and corporate sustainability in the Indian banking sector from the annual reports from 2006 to 2011 on the basis of secondary data. The researcher used statistical tools such as correlation and regression analysis to analyze the result. Data analysis revealed that there is no significant correlation between CSR and financial performance as defined by earnings after tax (PAT) and earnings per share (EPS). Therefore, this study has helped to sensitize banking sector managers to penetrate deeper levels in order to understand them before initiating and investing in CSR initiatives.

Bansal, Parida, Kumar (2012), paper entitled "Emerging trends of Corporate Social Responsibility in India" in KAIM of Management and Research, analyze 30 companies of 11 sectors listed in the Bombay Stock Exchange with the help of their annual reports. Some of these sectors were Transport Equipment sector, Finance and Metal Mining sector, IT & Power, Capital goods, Telecom, Housing, FMCG, Oil & Gas and Cipla. The paper considered the nature and areas of society in which the companies are investing. By considering all those areas it was concluded in the paper that today companies are not working only to earn profit but also have

realized the importance of being social friendly. So, on the basis of the paper it can be said that social responsibility has now started taking a turn in the new direction.

Das and Halder (2011) examined the CSR activities of the Oil and Natural Gas Corporation (ONGC) and its impact on the socio-economic development of the rural population in Assam. You have seen that ONGC has great value and a great deal of trust among the rural population in which all ONGC projects have been carried out. ONGC has carried out its social activities in all areas, such as building infrastructures, creating jobs through education and training, taking into account market access needs, improving health and empowering the weaker sections of the population.

Shah, Bhaskar (2010), in his study of public sector undertaking Bharat Petroleum Corporation Ltd. in their research work. The research has discussed that there is a broad relationship between the organization and society. Organization has its existence only with the society. Organization used the resources/inputs of the society like material and human etc. In reverse, the organization provides services to the society. From the case study of the BPCL, it was found that company has taken a lot of initiatives in order to serve the society.

#### **Iv. Research Gap**

The above study examines the diverse related literature in India as well as the findings and suggestions of various researchers on how financial performance is affected by corporate social responsibility. The main findings were that most of these studies had a positive impact of CSR on financial performance. Some studies showed a negative relationship between them and some showed mixed results. The study also showed that some studies pointed to a positive impact of CSR on financial performance, but their relationships had proved insignificant. The results of these studies varied for various reasons, eg. Currently, it is striking that there is no study on the impact of corporate social responsibility on the financial performance of Indian Steel by companies industries.

#### **V. Conclusion**

This paper is a collection of research on corporate social responsibility with reference to Indian companies. It is observed that CSR is very important to a company, but it is very important for Indian companies because they are the backbone of our economy. Most studies reviewed in this article focus on the conceptual framework. However, it was noted that none of the studies considered all aspects of corporate social responsibility to examine their impact on financial performance and on stakeholders. More research can be done taking into account all aspects of corporate social responsibility practices.

### Abstract

*In the future, intelligent machines can replace or enhance human capabilities in several areas. Artificial intelligence may be a study of a way to create pc to try and do things that at the instant individuals do higher. Because of AI; it migrates to the real world we do not seem to satisfy with just a computer doing their formal task. Instead we wish a robot would sit opposite to use as an opponent. Generally AI is based on Knowledge base of facts & rules that characterize the system domain of proficiency. Study within the space of AI has given rise to the growing technology referred to as professional system. Application areas of AI has an enormous impact on numerous fields of life as professional system is wide used of late to resolve the complicated issues in various areas as science, engineering, business, medicine, meteorology. This paper provides an summary of AI technology and also the application areas of this technology.*

**Keywords:** Artificial Intelligence, AI, technology.

### I. Introduction:

According to father of artificial intelligence John McCarthy, who coined the term "Artificial intelligence" in 1956, aforesaid that "It is that the combination of science and engineering to make intelligent devices for human welfare." "Artificial intelligence is an intellect that is much smarter than the most effective human brain in much each field, including computer science and linguistic logic." [1] It is a modern methodology of machines which can do muscle work and illustrate complex questions in a "intellectual" manner. It is concerned with the basic and most important aspects in our life i.e. philosophy, computer science, mathematics, linguistics, biology, neuron science, sociology etc. AI plays a very important role to exhibit intelligent behavior, to learn, demonstrate and give advice to the user. Artificial General Intelligence or AGI may be a system that defines that the machine will do intellectual behavior the reason because the humans will do several processes at a time. A broadly we can define it is that, AI can be a mix of learning, perception, drawback resolution and adapting new solutions to the system. It also involves linguistic logic and reasoning.

**Artificial intelligence has 2 types:**

1. Weak AI.
2. Strong AI.

#### 1. WEAK AI.

The principle of Weak AI is that the machines behave as if they're intelligent. Weak AI proves that virtual skills like thinking, talking, moving may be done by machine they're programmed therein manner. E.g. In the chess game, the computer can play and move players automatically. The computer does not have thinking ability but in actual it is programmed so that the computer always takes right step. [9]

#### 2. STRONG AI

The principle of sturdy AI is that the machines can do calculations and suppose it and can predict the solution in future. E.g. the artificial intellectual supercomputer "WATSON" invented by IBM. Thus in future, there will be definitely such machines or may be humanoids which will do its own work and think more powerful than human beings.

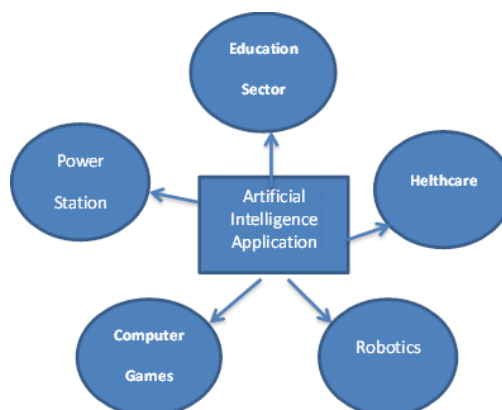

Fig: Application of AI in different sector.

**II. Artificial Intelligence In Different Field.****Education Sector:**

Every human is surrounded by different AI technologies, from automatic parking system, smart sensor for taking spectacular photos, and personal assistance. Similarly, Artificial Intelligence in education is changing traditional methods drastically. "Smart content" creation, from digitized guides of textbooks to customizable learning digital interfaces, are being introduced at all levels, from elementary to post-secondary to corporate environments. AI permits educators to style digital program and content across devices, integrating rich media like video and audio, as well as self- or online-instructor assessment. Virtual courses, self assessments; video conferencing; and different tools. Learning platforms for the modern workplace are designed to allow employees to master additional skills and receive continuous and automated feedback, and when used strategically have the potential to help improve performance and increase production.

**Healthcare**

This study gathers representative works that exhibit how AI is applied to the solution of very different problems related to different diagnostic science analysis. It also detects the methods of artificial intelligence that are used frequently together to solve the special problems of medicine.[4]

Artificial intelligence techniques are used for diagnostic sciences in biomedical image classification. Model-based intelligent analysis and decision-support tools are important in medical imaging for computer-assisted diagnosis and evaluation. CAD (computer Aided Diagnosis) helps radiologist who uses the output from a computerized analysis of medical images as a second opinion in detecting lesions, assessing extent of disease, and improving the accuracy and consistency of radiological diagnosis to reduce the rate of false negative cases. For the MRI brain tumor images a general regression neural network (GRNN) based automatic three-dimensional classification method was proposed. This method had good time consuming rate and classification accuracy. Another intelligent classification technique proposed was Least Squares Support Vector Machines (LS-SVM). It identifies normal and abnormal slices of brain MRI data. This technique had a higher accuracy of classification over other classifiers as the false negative in LS-SVM was very low compared. Due to automatic defects detection in MR images of brain, extensive research is being performed.

**Robotics**

Robots are advanced automation technologies used for production and non-production activities to make life easier and to improve productivity at the work place. Many manufacturers have turned robotics and automation for more reliable manufacturing system solutions. Examples of robots are in the construction industry, car parks, nuclear installations, airports and mines, hospitals, welding shipyards, space stations, and automotive applications. Robots are found in unusual places where the environmental and working conditions presents hazards and places where dangerous tasks are performed. Studies on robots have been viewed from three dimensions - its navigation, robot's localization and robot's participation in agent teams.[5]

**Artificial Intelligence In Power Station:**

There are three types of major power plants for the generation of massive electricity :

- i. Thermal power plants,
- ii. Hydal power plants,
- iii. Nuclear power plants.

Mobile sensing plays a vital role in monitoring this system. POWER SYSTEM, an electric power system is a network of electrical components used to supply, transmit and use electric power. It is a subdivision of electrical engineering that comes with the generation, transmission, distribution and utilization of electric power and the electrical devices which is connected to such systems like generators, motors and transformers.

**Artificial Intelligence Techniques:**

Three major area of AI techniques are considered to be applied in modern power system protection

- Expert System Techniques (XPSs),
- Artificial Neural Networks (ANNs),
- Fuzzy Logic Systems (FLS).

**Expert Systems:**

Expert systems are Machine programs which have proficiency and competence in a particular field. They are called as knowledge based or rule based systems. Expert systems use the interface mechanism and knowledge to solve problems which is difficult to be solved by human skill. How expert systems used in power systems:

According to the definition of expert systems are b computer programs, the process of writing codes for these programs is simpler than actually calculating and estimating the value of parameters used in generation, transmission and distribution. Any modifications even after design can be easily done because they

are machine programs. Virtually, estimation of values can be done and further research for increasing the efficiency of the process can be performed.

#### Artificial Neural Networks (ANN):

- It is a biologically inspired system which converts a set of inputs into a set of outputs by a network of neurons, where each neuron produces one output as a function of inputs. Fundamentally a neuron can be considered as a processor which makes a simple non linear operation of its inputs which produce a single output.
- The understanding of the working of neurons and the pattern interconnection can be used to construct computer for solving real world problems of classification of patterns and pattern recognition.

#### ANNS: How It Works In Power Systems:

For obtaining the suitable solution, ANNs works on biological instincts performing biological evaluation of real time problems, problems in generation, transmission and distribution of electricity. With the constraints of practical transmission and distribution system, the exact values of parameters can be determined. i.e., the values of inductance, capacitance and resistance in a transmission line can be calculated numerically by ANNs taking in to account factors like environmental factors, unbalancing conditions, and other possible problems.

#### Fuzzy Logic

Fuzzy systems are logical systems for standardization and formalization of approximate reasoning.

- It is like an ability of human of decision making to produce exact and accurate solutions from certain or even approximate information and data.
- Fuzzy logic is similar to human brains working, and this technology can be used in machines so that they can perform somewhat like humans.[6]

#### Working Of Fuzzy Logic In Power Systems

For designing the physical components of power systems, Fuzzy logic can be used .It can be used from small circuits to large mainframes. For increasing, the efficiency of the components in power systems, fuzzy logic is used. Data used in power system analysis are the approximate values and assumptions; it can be of great use to draw a stable, exact and reliable output.

#### Current Applications Of Ai Systems In Power System

- Power system operation like unit commitment, hydro- thermal coordination, economic dispatch, congestion management, maintenance scheduling, state estimation, and load and power flow.
- Planning power system like generation expansion, transmission expansion, reactive power and power system reliability.
- Control of power system like voltage, stability, power flow, load frequency control.
- Power plants Control like fuel cell power plant control, thermal power plant control.[10]
- Network Controls like location, sizing and control of FACTS devices.
- Electricity markets strategies for bidding, analysis of electricity markets.
- Automation of power system i.e. restoration, management, fault diagnosis, network security.

#### Computer Games

Artificial Intelligence (AI) is used in computer games to provide game features and solve common problems. Specially, non-playing character (NPC), decision making, path finding and learning are checked.

What does artificial intelligence provide to a computer game? Some users only want cool graphics look. If AI was deleted from computer games, the games would be so easy that nobody would like to play computer games anymore! Without the game with AI, the aliens would no longer move smoothly through space or the simulated city painstakingly built would never have any problems and winning would be as easy as beginning the game.

#### Computer Game Problems Solved With AI

For three common problems computer games must provide a solution to non-playing character (NPC) movements, and NPC learning, NPC decision making, . Solving these problems is the game AI's responsibility. There are many ways that AI is implemented to solve problems and provide features in computer games as mentioned above but these three have been selected because they are typical problems in most of the computer games and provides an interesting AI discussion.

I) NPC Movement Using Path-Finding Artificial intelligence computer game must provide a way for a non-playing character to move throughout the game world. For example, When then player is on one side of the building and the monster is on the other, through which path through the building the monster will reach the player? This is the NPC movement problem. AI Search Methods are used to find the path in computer games. A\* algorithm is the most widely used for path negotiation because of its flexibility and also because it

determine the shortest path between two points. Typical A\* algorithms are having three main attributes: fitness, goal, and heuristic or f, g, and h respectively. g stands for cost to travel from the start node to some node between the goal. h is the heuristic or estimated cost to get from this node to the goal. f means the sum of g and h, or the total estimated cost of a path going through this node. The A\* algorithm maintains an Open list of the nodes which have not been explored yet and a Closed list of nodes which have been explored.

The following is pseudo code for the A\* algorithm.

1. Assume P = the starting point.
2. Assign the values of f, g, and h to P.
3. Add P to the Open list. At this instance P is the only node on the Open list.
4. Set B = the best node from the Open list (best node has the lowest f-value).
  - a. Quit, If B is the goal node. A path has been found.
  - b. Quit, If the Open list is empty, A path has been found.
5. Set C = a valid node connected to B.
  - a. Assign values of f, g, and h to C.
  - b. Check if, C is on the Open and Closed list.
    - i. If yes, check whether the new path is more efficient (lower f-value).
      1. If so, update path.
      - ii. Else, add C to the open list.
  - c. Repeat step 5 for all the valid children's of B.
6. Move B from the Open to the closed list .Repeat from step 4.

II) NPC Decision Making Using Bayesian Networks In the previous example of the monster negotiating a path to the player, a different problem needs to be solved first before negotiating the path. The problem is does the monster even know the player is present in the building or not. If the game designers give the full information about game world to the non-playing character then there would be no any fun in playing the game. This is an example of NPC Decision making. In this AI must need to make the non-playing character to act same as human. When the player enters the building from the other side, the monster will not be aware of the presence of the player because of the wall between them. If the player enters causing a noise disturbance, then the monster will sense the player and will start negotiating the shortest path as discussed in the NPC movement using path finding with AI. One AI technique which is used to implement this is a Bayesian Network technique. It helps NPC to perform complex reasoning in a human like fashion. In this the computer calculates the probability of the monster sensing the player if the player has entered the building. This expression can be written as;

$$P(B|A) = P(B|A) P(A) / P(B) [2]$$

Where, the probability that the monster would sense the player if the player had actually tripped is P(B|A) and the probability of the monster sensing the player is P(A) and P(B) is the probability of the player tripping [2].

III) NPC Learning Computer games use the Artificial Intelligence Genetic Algorithms to try and implement learning in NPC's. A genetic algorithm works as follows.

1. Create a first generation population of the random organisms.
2. Test them on the problem which is being solved and rank them according to its fitness. If the best organisms have reached our performance goals then stop.[7]
3. Take the best performers and mate them by implementing genetic operators such as mutation and crossover. Add some brand-new random organisms to the population to introduce new variety and help ensure against convergence on a local maximum.
4. Loop to step 2.

Genetic Algorithms try and build the perfect specimen and are very complicated. This AI technique has not found itself into many modern computer games because it takes a lot of computer resources and time.

### III. Conclusion

The entire world is on the way of Digitalization and for that purpose the artificial intelligence and machinelearning concepts plays an important role. This paper is totally based upon, how the intelligence and new technologies get invented in our day to day life. Tremendous contribution to the various areas has been made by the Artificial Intelligence techniques from the last 2 decades. Artificial Intelligence will continue to play an increasingly important role in the various fields. This paper is based on the concept of artificial intelligence, areas of artificial intelligence and the artificial intelligence techniques used in the field of education, healthcare, PowerSystem to maintain system stability and damping of oscillation and provide high-

quality performance, in the computer games to provide game features and solve common problems so as to have fun. Robotics for activities to make life easier and to improve productivity at the work place. there is also definite future in the area of Power System Stabilizers. We conclude that further research in this area can be done as there are very promising and profitable results that are obtainable from such techniques. While scientists have not still realized the full ability of artificial intelligence. AI technology and its applications will likely have many more effects on human life in the years to come.

## A Distinctive Attribute Of Reference Managing Tool: Zotero

**Dr. Rajesh G. Bobade,**

Librarian, Dr. Shyamaprasad Mukherjee Arts College,  
Shendurjanaghat, Tq, Warud, Dist. Amravati.

### Abstract

Recent research showed that references are collected, organized, and analyzed, and research is shared in a variety of ways. These systems are designed to help people to manage, store, organize all your PDFs, able to share and collaborate among references. Present study of Reference Managing Tool Zotero, was evaluated in terms of their features (e.g., Supporting files, operating Systems, Extension Files, Citation Styles, Import file formats, Reference list file formats, using sample way). The purpose of this paper is to discuss information search strategies, techniques and principles which today have increasing importance particularly in the context of e-managing references.

**Keywords:** Reference, Zotero, Citation, Bibliography, Connector

### Introduction

Zotero is a freely available reference manager available as both an extension for the Firefox web browser and as a desktop program, called Zotero Standalone. Zotero allows saving connectors with Google Chrome, Safari and Firefox. Zotero interacts seamlessly with online resources, it senses you are viewing a book, article, or other object on the web; it can automatically extract and save complete bibliographic references. It is a project of the Corporation for Digital Scholarship, a nonprofit organization dedicated to the development of software and services for researchers and cultural heritage institutions. It was created at the Roy Rosenzweig Center for History and New Media at George Mason University with initial funding from the Andrew W. Mellon Foundation, the United States Institute of Museum and Library Services, and the Alfred P. Sloan Foundation. It is capable of storing web links of any webpage, full text articles, creating a snapshot images.

### Zotero

Zotero is a popular open source reference manager, originally developed as a plugin for the Firefox browser. The newer Zotero Standalone offers the same functionality but runs as a separate program and works with Firefox, Chrome and Safari. Zotero also includes a hosted version in order to synchronize references across devices and share them in private or public groups. Zotero allows users to collect and to organize a variety of web sources such as citations, full-texts, web pages, images and audio files directly in the browser. Citations from Zotero can be integrated into Microsoft Word and OpenOffice.

### Steps To Installation Of Zotero

- Create an account with Zotero.
- Download the Firefox extension or the standalone desktop application
- Install a Word Processor plugin
- Start adding PDFs and references from your computer,

If you are already using a different reference manager you can also import these into your library.

This table lists the General, Operating system support, Export file formats, Import file formats, Citation styles machine-readable file formats.

Technical Support of Zotero		
Zotero Reference Management Software	General	Roy Rosenzweig Center for History and New Media ,2006, Free Software Version : 5.0.67,License : A GPL
	Operating system support	Windows,macOS,Linux, ChromeOS,BSD,Unix
	Export file formats	Endnote/Refer/BibIX,Medline, MODS XML (V4.0),RIS
	Import file formats	Endnote/Refer/BibIX, BibTeX,Copac,CSA, ISI,Medline,MODS XML, Ovid,PubMed,RIS,SciFinder
	Citation styles	APA,Chicago/Turabian, Harvard,MLA, Others
	Reference list file formats	HTML,LaTeX[25], RTF,Plain text,RSS
	Database connectivity	ArXiv,CiteSeer, IEEE Xplore,PubMed

### Zotero supports:

#### Getting Stuff Into Your Library.

- Organizing Your Library and Taking Notes.
- Generating Bibliographies, Citations, and Reports.
- Synchronizing, Collaboration, and Backup.Zotero Preferences

### Conclusion

As we talking about effective use of reference management system with special reference to Zotero. Zotero has no dedicated customer support service, but the Zotero website provides extensive information, including instructional screencasts, troubleshooting tips, a list of known issues, and user forums. Questions and

issues raised in the forums are answered quickly, with users and developers suggesting solutions. Many academic institutions provide Zotero tutorials to their members.

## Pattern Recognition: An Overview

**Kiran H. Varma<sup>1</sup>**

M. Sc.-I (Computer Science) College of management and computer Science,  
Yavatmal.(M.S.) ,India.

**Prof. L. R. Muley<sup>2</sup>**

Department of computer Science, JMV College, Achalpur, Dist. Amravati (M.S.)India.

### Abstract

*Pattern recognition is most popular and important to our life since 1960's .In last few years , in almost every field pattern recognition is used so it attract the attention of researcher due to its rapidly spread application areas. On the basis of survey, pattern recognition methods can be categorized into six types they include Template matching, Statistical method, Structural method, Neural network, fuzzy sets and hybrid method. This paper present brief survey of pattern recognition methods and at the same time definitions classification of pattern recognition and real world applications.*

**KEYWORDS:-**Pattern recognition method, classification, definition, application.

### Introduction

Pattern recognition is familiar with everyone, it has long history, In last few years, the application of pattern recognition are rapidly increase in lots of area. The application of Pattern Recognition can be found everywhere. Examples include bioinformatics, document classification, image analysis, data mining, industrial automation, biometric recognition, remote sensing, handwritten text analysis, medical diagnosis, speech recognition, disease categorization, prediction of survival rates for patients for particular disease, fingerprint verification, face recognition, iris discrimination, chromosome shape discrimination, optical character recognition, texture discrimination etc.

### Definitions Of Pattern Recognition

It is a methodology that takes raw data and classify according to the pattern [1].Duda and Hart in 1973 defined the pattern recognition “ is a field concerned with machine recognition of meaning regularities in noisy of complex environments”. [2] Pavlidis in 1977defined pattern recognition in his book: “the word pattern is derived from the same root as the word patron and, in his original use, means something which is set up as a perfect example to be imitated. Thus pattern recognition means the identification of the ideal which a given object was made after.” [3]. Gonzalez, Thomas in 1978 defined pattern recognition as a classification of input data via extraction important features from a lot of noisy data. [4]. Watanabe in 1985 said that pattern recognition can be looked as categorization problem, as inductive process, as structure analysis, as discrimination method and so on. [5]. Fukunaga in 1990 defined pattern recognition as” A problem of estimating density functions in a high-dimensional space and dividing the space into the regions of categories of classes.”[6]. Schalkoff in 1992 defined PR as “The science that concerns the description or classification (recognition) of measurements” [7]. Srihari,Govindaraju in 1993 defined pattern recognition “is a discipline which learn some theories and methods to design machines that can recognize patterns in noisy data or complex environment”. [8]. Ripley in 1996 outlined pattern recognition in his book: “Given some examples of complex signals and the correct decisions for them, make decisions automatically for a stream of future examples” [9]. Robert P. W. Duin in 2002 described the nature of pattern recognition is engineering; the final aim of Pattern recognition is to design machines to solve the gap between application and theory. [10]. SergiosTheodoridis in 2003 Pattern recognition “ is a scientific discipline whose aim is the classification of the objects into a lot of categories or classes. Pattern recognition is also an integral part in most machine intelligence system built for decision making”. [11].

### Methods Used In Pattern Recognition

Depending upon the method used for data analysis and classification, pattern recognition methods are categorized into following six types. Methods can be dependently or independently used to perform pattern recognition.

#### 1.Template Matching Method

Template matching is the simplest and the most primitive method among other all recognition methods. In this method matching is key stone operation which is used to determine the similarity between two entities like point, shape or curves .[12] In this method a template or prototype of pattern to be recognized is already available. Style and size are ignored at the time of matching the pattern [13]. Efficiency of this model depends on stored templates [14]. Template matching is extensively used in image processing domain [1] [15].

#### 2. Statistical Method

The statistical method of pattern recognition uses theoretic concepts [16] , a set of characteristic measurements called features which are extracted from the pattern. Each pattern is represented by a feature vector [17]. Recognition of each pattern is usually made by partitioning the feature space. Only those features are selected which allow pattern vectors of

different category [18] i.e. more compactness and disjoint regions in a dimensional feature space. The recognition operates in two modes: training (learning) and classification (testing) [19].

### 3. Structural And Syntactical Method

When the pattern is strong inherent structured, statistical methods give ambiguous result as feature extraction destroys vital information related to the basic structure of pattern. In this method, patterns are considered as composition of sub patterns [20]. The simplest pattern is called as primitives and complex patterns are considered as inter related with these primitives. The patterns are the sentences belonging to a language, primitives are alphabet of the language and using these primitives sentences are generated according to the grammar [12][21] and the grammar is mostly generated from the available training samples, which are provided in data Acquisition and Sensing phase.

### 4. Neural Network Method

The first neural network model MP was proposed in 1943 [17] [22]. Neural network is developing very fast. Neural network is the large parallel structures composed of inter connected elements called “neurons” [14][18]. Neural approach applies biological concept to machine recognize patterns. The design and function of neural networks simulate some functionality of biological brains and neural systems. Self-origination, adaptive learning and fault tolerance capabilities are the benefits of using neural network, because of these outstanding capabilities; neural networks are used for pattern recognition applications. Back propagation [23], high-order nets, time-delay neural network and recurrent nets are some of the best neural models [20]. The most commonly used family of neural network for pattern classification is the feed forward network like Multi-layer Perception (MLP) [25] and Radial-Basis Function (RBF) network [14]. Another popular network is the Self-Organizing Map (SOM) or Kohonen-Network [22][23].

### 5. Fuzzy Based Method

The application of fuzzy sets in Pattern Recognition started in 1966 [17] [23]. We can't give complete answers or classification in reality, so theory of fuzzy sets comes into being. Fuzzy sets can describe the intention and extension of any concept more effectively [18]. Abstraction and generalization are two principals proposed by Marr (1982) & Keller (1995) think as the general role of fuzzy sets in Pattern Recognition. The Fuzzy C-Means (FCM) clustering algorithm has been used in edge detection for image segmentation [22][25][27].

### 6. Hybrid Method

It is clear that most of the emerging applications of pattern recognition are not efficiently behaved if a single method is used. So it is good idea to combine multiple methods together by considering their advantages result to hybrid method. Primitive approach to design a Pattern Recognition system to select best classifier method has some drawback and it required deep prior knowledge. Statistical and structural can be combined together to solve this problem [18]. Statistical approach is utilized to recognize pattern primitive and syntactic approach is utilized to recognition of sub-pattern and pattern itself. Statistical methods give the recognition rate between 85% to 90% and this rate is also increased with using some hybrid methods like structural and statistical method [12]. Multiple classifiers are used to improve the system performance at various stages of recognition. Multiple methods such as artificial neural networks and statistical methods and fuzzy sets have been used in grain classification process in the field of agriculture [24].

### Classification Of Pattern Recognition System

Jie Liu et al [17] and Vinita Dutt et al. [25] describe pattern recognition system, Which can be developed through five process (steps) and the classification of this system in to following:

- Rule based system
- Classical fuzzy system
- Bayesian system
- Neural networks system
- Fuzzy neural networks systems

### Application Of Pattern Recognition

In nowadays Pattern recognition is used in almost every field .Following table

[Table 1] shows the application of pattern recognition.

### Conclusions

Among the various methods used in pattern recognition, the statistical method has been most intensively studied and used in practice. Statistical method is good in case of noisy patterns. Practical importance of structural model depends on recognition of simple pattern primitive. To recognize unknown shapes, fuzzy method is good. If Neural network is constructed with the proper architecture and trained correctly with good data, it will give amazing results. The artificial neural network approach has more advantages as compared to statistical methods. As each method has its own advantages and disadvantages, to enhance system

Field	Application	Input Pattern	Pattern Class
Data Mining	Searching for meaningful pattern	Point in multi dimension space	Compact and well separated clusters
Bioinformatics	Sequence Analysis	DNA/Protein sequence	Known type of genes/patterns
Document classification	Internet search	Text document	Semantic categories
Document image analysis	Reading machine for blind/Optical Character Recognition	Document image	Alphanumeric characters/ words
Industrial automation	Printed circuit board inspection	Intensity or range image	Defective / non defective nature of product
Biometric recognition	Personal identification	Face, iris & finger print	Authorized user for access control
Multimedia database retrieval	Internet search	Video clip, video games	Video genres e.g. action, dialogue etc.
Speech recognition	Telephone directory enquiry with operator	Speech wave form	Spoken words
Remote Sensing	Forecasting crop yield	Multispectral image	Land use categories, growth pattern of crops

performance for complex application. It is very good and beneficial to append two or more recognition methods at various stages of recognition process. In Nowadays developing of pattern recognition is increasing very fast, the related fields and the application of pattern recognition became wider and wider.

**A Case Study Report On Cyber Security In India****Mr. Sunil Panjabrao Chinte1**

College of Management and Computer Science, Yavatmal

**Mr. ShreyashDigambar Singrupkar2**

Student: Jawaharlal Darda Institute of Engineering &amp; Technology, Yavatmal

**Abstract**

India is moving towards a digitization, and to be a part of Digital India, internet is needed. An interconnected network which allows sharing any kind of information to anyone using any network connected device is called Internet. In India, since last few years, usage of internet has been increased at very high rate. In Global ranking for internet users, India stands at second position worldwide. Every single person in India is having internet connected device. At present, there has been rise in problem of security in cyber domain mainly in digital privacy, and e-governance structure. Cyber-attacks continue to appear as global threat; hence, there need to establish innovative methods to avoid cyber-attacks.

**Keyword:**cyber security, cyber-attacks, digital India, cyber challenges.

**Introduction**

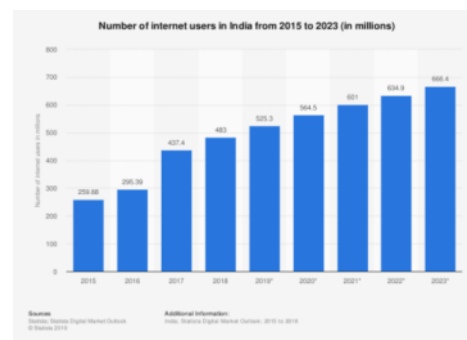

Nowadays booking of tickets, shopping, paying of bills, paying of tax, transfer of money, communicating to a person globally, sharing of information, performing business and so on, are dependent on internet. As internet usage increasing day by day, the vulnerabilities of their users are also increasing. Cyber attackers are well-funded, highly motivated, and technically advanced. Their attack makes threat to national initiatives such as Smart Cities, E-Governance and digital public identity management. Private companies, Government offices, military organizations and other businesses store, process significant volumes important data, regularly transmitted across networks, thereby increasing their exposure to cyber threats. The potential damages can't only lead to monetary losses, but also put national security at risk if critical information infrastructure is targeted. Global brands such as Apple, Sapiant, Citi Bank, HSBC, Bank of America, DSM etc., have set their global delivery centers, shared services & support services in India. India has started world's largest ICT programme called 'Digital India', which is focused on efficient service delivery, governance, improving access from education to health, as well as India is moving toward cashless services. In India there is unbelievable amount of transformation of IT sector in a short duration of time, having grown substantially over a relatively shorter period.

**Need Of Cyber Security**

Cyberspace is now considered an important part of individuals and families as well as organizations, governments, educational institutions and our businesses. It is essential for families and parents to protect children and family members from online fraud. In the context of financial security, it is important to secure our financial information which can affect our personal financial condition. The Internet is very important and beneficial for faculty, students, staff and educational institutions, it has provided lots of learning opportunities with number of risks online. There is a significant need for Internet users to understand how to protect themselves from online fraud and identity theft. Appropriate learning about online behavior and system security reduces vulnerabilities and makes the online environment safer. Small and medium-sized organizations also experience various security-related challenges due to limited resources and appropriate cyber security skills. The rapid expansion of technologies is also making cyber security more challenging as we do not present permanent solutions to the related problem. Although, we are actively fighting and presenting various frameworks or techniques to protect our networks and information, all of these are providing security only for the short term. However, better security understanding and appropriate strategy can help us save intellectual property and trade secrets and reduce financial and reputation losses. Central, state and local governments keep large amounts of data and confidential records online in digital form which becomes the primary target of cyber-attack. Most of the time governments face difficulties due to improper infrastructure, lack of awareness and sufficient funds. It is important for government bodies to provide reliable services to society, to maintain healthy citizens - protection of government communications and confidential information.

## Internet Users In India

According to a report by the Internet and Mobile Association of India (IAMAI), with 451 million monthly active Internet users as of the end of financial year 2019, India is now second only to China in terms of Internet users. However, with only 36 percent Internet access, there is still much to develop. The report stated that out of 451 million monthly active users, 385 million are over the age of 12 and 66 million are in the age group of 5 to 11, who use the Internet. The report said that in terms of absolute numbers, urban India had nearly the same number of users in rural India, with 192 million users. However, in terms of percentage or penetration, the penetration level in urban India was quite low, given the inequality of population distribution in urban and rural India. In rural India, a large part does not have access to the Internet, and provides a huge opportunity for development that will contribute to growth in the overall Internet. According to the report, there were about 2 / 3rd daily users of internet population in India. 9 out of 10 users in urban use the Internet at least once a week with younger users, with the most users between the ages of 16–29. However, there is still a class of users who use the Internet less than once a week. About 1 to 5 rural internet users belonged to this category. In India, approximately 1 / 3rd of users used the Internet for more than an hour in urban India, where in rural India, the same proportion of users used the Internet for 15–30 minutes. The report states that with improved connectivity, quality of service and mobile Internet capability, rural consumers who spend more time on the Internet may grow in the future.

## Common Types Of Cyber Attacks

### Phishing

Phishing is the technique through which a hacker can disguise himself as a trustworthy organization in a communication to obtain sensitive information such as usernames, passwords and credit card details. Typically done by email spoofing or instant messaging, it often directs users to enter personal information on a fake website that matches the look and feel of a legitimate site. Phishing is an example of social engineering techniques that are being used to deceive users. Users are lured by communication to be from trusted parties such as social web sites, auction sites, banks, online payment processors or IT administration

### Malware

Malware is malicious software that is harmful to a computer. Malware can have different types such as computer viruses, worms, Trojan horses and spyware. Stealing information, encrypting or deleting data, altering or hijacking core computing functions and monitoring users' computer activity without their permission can be performed by malicious programs

### Man In The Middle Attack

A man-in-the-middle attack (MITM) is an attack in which the attacker secretly trusts and possibly changes communication between two parties who believe they are communicating directly with each other. An example of a MITM attack is active eavesdropping, in which the attacker builds an independent relationship with the victim and sends a message between them to assure that they are talking to each other in a direct personal relationship, when in fact the entire conversation is controlled. Attacker. The attacker must be able to intercept all relevant messages passing between the two victims and inject new ones. It is straightforward in many circumstances; For example, an attacker within the reception range of an unencrypted wireless access point may insert itself as a man-in-between.

### Dos And Ddos

A denial of service (DoS) attack is an attempt to make computer, server, or network resources unavailable to its authorized users, who typically use a temporary interruption or suspension of services. Distributed Denial of Service (DDoS) attack refers to a DoS attack that spreads to more than one infected system with malicious software at the same time. These infected systems are collectively called "botnets" that remotely control the target system.

## SQL Injection

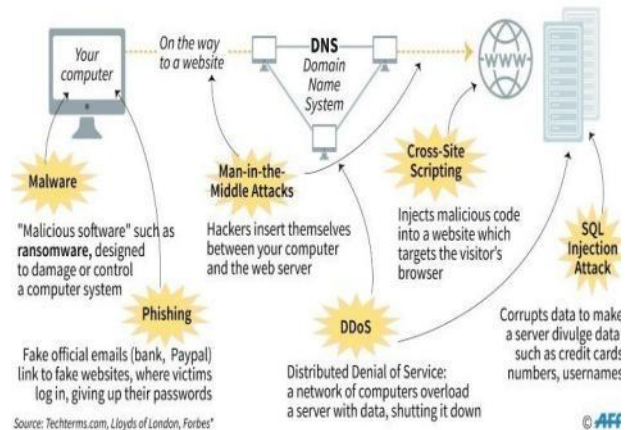

The SQL injection attack consists of the insertion or "injection" of a SQL query through input data from the client to the application. A successful SQL injection exploit can read sensitive data from the database, modify database data (insert / update / delete), perform administration operations on the database (such as shutdown DBMS), on a DBMS file Retrieve the contents of a given file that exists. Issues commands to the system and in some cases to the operating system. SQL injection attack is a type of injection attack, in which SQL commands are injected into the data-plane input to affect the execution of predefined SQL commands.

## Spoofing

It refers to a technique in which there is unauthorized access to a computer, whereby the perpetrator sends messages to a networked computer with an IP address. At the recipient's end it appears that the messages are being transmitted from a trusted source. To conduct IP spoofing, a hacker first attempts to find a trusted host IP address and then modifications and changes to the packets are made to show that the packets are being made the original host.

## The different types of cyber attacks

Cyber crime worldwide cost \$400 billion in 2015 and is forecast to reach \$2 trillion in 2019\*

## Major Cyber Security Initiatives Launched By The Government Of India

India has taken some initiative to secure its cyberspace. These include awareness programs; Efforts to create a strong policy environment and Strengthen security monitoring capabilities and international help; and to promote research and development cyber security. Some of the major initiatives are mentioned under below:

### 1. National Cyber Security Policy:

Provides policy Vision and strategic direction for national defense Cyberspace. The policy was released in 2013.

### 2. National Cyber Security Coordination Center (NCCC):

NCCC will conduct real-time threat assessment and creating situational awareness for potential cyber-attack Country. It was commissioned in August 2017.

### 3. National Critical Information Infrastructure Protection Center (NCIIPC):

Organization was created under Section 70A of the IT Act. It is designated as a National nodal agency regarding important information Infrastructure Security. Its purpose is to protect and Protecting against critical information Infrastructure (CII) Cyber terrorism, cyber security and other threats.

### 4. Cyber Swachhta Kendra:

Launched in early 2017 Cyber Clean Center provides a Platform for users Analyze and cleans your system of various Viruses, bots /Malware, Trojans, etc.

### 5. International Cooperation:

Seeking to secure cyberspace, India has entered into nine new bilateral agreements with developed nations such as the US, Singapore and Japan to promote research and information sharing on cyber security. These collaborative efforts will enable India to combat advanced threats.

### 6. Promoting Research And Development:

Promoting cyber Security across the nation, the government has started programme of worth 5 core INR, for companies responsible for innovation and research in Cyber security.

### 7. Sectoral And State Cert:

Government has launched Sectoral CERT starts with important sectors like electricity and finance.

### 8. Security Testing:

Plan to install 10 additional Standardization, Testing and Quality Certification (STQC) Testing facilities across the country for evaluation and Authentication of IT products.

## Main Cyber Security Challenges In India

### 1. Lack Of National Level Architecture For Cyber Security

In India, critical infrastructure is owned by both the public sector and the private sector, both operating with their own norms and protocols to protect their infrastructure from cyber-attack. To be protected. The

armed forces also have their own fire agencies. However, there is no national security architecture that integrates efforts, both in the public sector and in the private sector, to assess the nature of any threat and be able to deal with them effectively.

## 2. Shortage Of Trained Workforce –

Although India has a young workforce with considerable IT skills, they lack talent when it comes to specific targets like cyber security. Demand for talented and skilled labor increases far-reaching supply, and with the potential for substantial growth in the market, this gap is likely to be widened further.

## 3. Lack Of Cooperation –

Unlike countries or states in cyberspace, there are no borders, thus armed forces, important national infrastructure, banking functions, etc. are vulnerable to cyber-attacks from anywhere. This can occur as a result of security breaches at the national level or state level, which can lead to loss of money, property or life. To respond to potential threats over the nation's most precious resources, a technically equipped multi-agency organization is needed that can base its decisions on policy input and sound strategy.

## 4. Lack Of Awareness –

There is no national regulatory policy in India for cyber security. There is also a lack of awareness of cyber laws and regulations at both corporate levels as well as individual levels. Home Internet users can stay safe and secure from cyber-attacks only when there is a guided and supervised legal framework.

## 5. Lack Of Uniformity In Devices Used For Internet Access –

With different income groups in India, not everyone can buy sophisticated phones. In India, less than 1% of mobile phone users have access to mobile phones with high security norms. The wide gap between the protection offered by high-end mobile phones and low-priced mobile phones in the market is almost impossible for legal and technical standards to be determined by regulators for data protection.

## Conclusion

As there is a drastic growth in the internet user, the cyber security is a major issue in the growing countries like India. A NASSCOM report shows that India alone would need 1 million cyber security professionals by 2020 to support its fast growing internet economy as per an estimate. Based on academic background and work experience, ethical hackers can do the roles of network security administrators, network defense analysts, web security administrators, application security testers, security analysts, forensic analysts, penetration testers and security auditors. The job role would be to develop and test IT products and services of organizations and ensure that they are as secure as possible. Secure programming, authorized hacking and network security surveillance are specializations in this domain.

**Keyword:** Physical Activity, Nutrition, Strength, Muscle, Thermoregulation

### Introduction

Although it is not possible to deal with every aspect of physiology pertinent to women's sporting performance, this section will present and discuss several topics to dispel some myths and provide practical assistance. This information should ensure that women are given an equal opportunity to improve their performance capabilities.

### Physical Activity and General Health

Most of the health benefits of regular physical activity are common to both males and females: maintenance of optimal body weight and composition, prevention of coronary heart disease (CHD) and improved fat and carbohydrate metabolism. In fact, CHD, obesity, anxiety, low back pain and other conditions have been called the diseases of hypo-kinesis (inactivity). Since there is evidence that women lead more sedentary lives than men, there are special implications for women's health. Although the incidence of CHD is higher for men than women, rates among women are rising, with high blood cholesterol levels, high blood pressure and cigarette smoking, particularly in combination with the use of oral contraceptives, constituting major risk factors. But, it should be noted that there is evidence of an association between improved physical fitness and a lowering of CHD risk factors in women. As well as having lower blood cholesterol levels, it has been shown that physically active women, specifically distance runners, tennis players and rowers, develop higher levels of high density lipoprotein, a major factor in protecting against CHD. Other health benefits of exercise include lowered blood pressure and improved fat and carbohydrate metabolism.

### Physical Activity over the Adult Life Cycle

While it is commonly assumed that physical performance declines with age, it is possible that the decrease in regular physical activity found in both sexes over the life cycle is a more important factor than actual physical degeneration. There is ample evidence that women who engage in lifelong sufficiently intense levels of physical activity experience significant physiological benefits, including increased aerobic capacity, greater flexibility, reduced blood pressure and recovery time and lowered incidence of osteoporosis. Further, although it is difficult to separate physiological from psychosocial effects, there are numerous psychological studies which report enhanced self-worth and self-image associated with women's physical activity.

### Physical Activity and Age-Related Osteoporosis

Genetic, mechanical, hormonal and dietary factors have been found to act together on the skeleton in retarding or accelerating osteoporosis (bone porosity characterized by reduced bone mineral content). While genetic factors may account in part for this pattern, it is also possible that variations are due to cultural differences in physical activity levels or to quantitative differences in muscle mass. Physical activity stimulates bone growth and bone remodeling: increased bone density has been found in athletes, specifically in those bones subjected to stress in a specific sport. It is necessary to distinguish between cortical bone (as found in the tibia, for example) and trabecular bone (found in the spine also called cancellous bone, is porous bone composed of trabeculated bone tissue. It can be found at the ends of long bones like the femur, where the bone is actually not solid but is full of holes connected by thin rods and plates of bone tissue.). It is only cortical bone growth that is stimulated by physical activity. In non-athletes, the first signs of porosity are

found in cortical bone which is not regularly subjected to mechanical stress during movement. There is evidence that exercise is effective in the prevention and treatment of osteoporosis, by contributing to the building of maximum bone mass before age 35 and to its maintenance during the rest of the life cycle. Estrogen loss which occurs at menopause was thought to be a primary factor in age-related osteoporosis, but this does not explain the onset of bone loss before age 40 found in both sexes. Thus while estrogen deficiency is a factor in the increased rate of bone loss after menopause, it is not the basic cause. Further, it has been reported that a conditioning program can control the menopausal symptoms of vasomotor instability and depression for most women and that dietary calcium in conjunction with regular exercise has been recommended for prevention and treatment of bone loss, especially after menopause when estrogen loss may produce an imbalance in calcium absorption and excretion.

### **Physical Activity and Nutrition**

General nutritional principles regarding energy, protein, vitamins, minerals and water apply to physically active individuals of both sexes. Other nutritional requirements specific to women are generally associated with the reproductive function, specifically, menstruation, pregnancy and lactation. As well, nutritional forms of prevention and treatment have been recommended for the pre-menstrual syndrome, osteoporosis and secondary amenorrhea. Blood loss through menstruation is a factor in the high incidence of iron deficiency found in the female population. Other factors include low dietary iron intake and reduced absorption of iron caused by dietary inhibitors (coffee, eggs, bran and other foods). There are three stages of iron deficiency, all of which can affect physical performance: iron depletion, iron deficiency without anemia, and iron deficiency anemia. At stage one, low serum ferritin concentration indicates depleted iron stores. Stage two is indicated by low levels of serum iron concentration and transferring saturation and by increased levels of iron-binding capacity. Stage three, iron deficiency anemia, is indicated by low hemoglobin concentration and other hematologic data. There is some evidence that female athletes are more susceptible to stage one deficiency than sedentary women, and pre-season testing of iron status through a battery of tests is recommended, since stages one and two cannot be detected through hematologic data alone. Iron supplements are recommended for pregnant women and for those in whom iron deficiency or anemia has been confirmed. The pregnant or lactating woman who maintains a regular program of physical activity has nutritional needs above those of a non-pregnant athlete, in regard to her intake of calories, protein, iron, calcium and certain other minerals and vitamins.

### **Physical Activity and Weight Control**

There is evidence that regular physical activity, in combination with caloric restriction, will bring about weight loss. However, even in the absence of changes in body weight, there are other important beneficial results of exercise for overweight individuals: increased lean body mass (fat-free tissue), decreased plasma insulin, improved glucose tolerance, reduction in blood lipids, decreased blood pressure and improved cardiovascular efficiency. It should be noted that improvements in fat/lean ratio are not necessarily accompanied by weight loss, since increases in muscle mass may offset decreases in body fat. Further, and perhaps more importantly, in the case of overweight women, regular exercise promotes physical fitness and psychological well being.

### **Body Composition and Skeletal System**

Females as a group have a higher percent body fat than males. The two major classifications of fat are essential fat and storage fat. Essential fat is required for normal physiologic functioning and is stored in bone marrow, muscles and organs. Storage fat includes the fatty tissue that protects internal organs and subcutaneous fat. Sex-specific fat, thought to be associated with female hormone synthesis, is classified as an essential fat. The sex difference in body fat of approximately 9% is also found between male and female athletes within a particular sport. In addition to sex and sport, ethnicity and age have been identified as key variables in fatness and fat patterning among athletes. There is, however, a wide variation for both sexes across all sports. For example, female and male field event athletes have 23.9% and 15.6% respectively - levels that are close to the average non-athlete - while the figures for distance runners are 15.7% and 5%. The high body fat levels in female swimmers is an aid in buoyancy and thermoregulation (regulation of body temperature), especially in open-water distance swimming. At the other extreme, the low body fat level of female distance runners is an important factor in any sport which requires moving the body through space. Thus, body composition may play a part in determining suitability for particular sports, and conversely, participation in these sports may contribute to developing and maintaining a certain body fat level. The same relationship applies to somatotype. A particular type of physique may be a factor in the selection of a sport, and participation in that sport may influence body type, for example, by increasing muscularity or by retarding menarche so that the limbs grow

longer during the extended growth period. In females, ossification - the hardening of the bones - begins and ends from one to three years earlier than in males. Since this process ends at puberty, late-maturing girls achieve greater height and longer limbs than those who mature early, while females, on average, tend to have smaller, shorter skeletal systems than males. Research on body composition has tended to focus on high performance athletes. Even in this elite group, there are many exceptions to the general trend; thus, there are often highly successful individuals whose physiques and fat levels differ from what is considered ideal for their sport. Therefore, the general relationship between body composition and suitability for particular sports need not be interpreted as a deterrent to participation for women with different physiques: body composition is only one of many factors contributing to athletic competence.

### **Performance Capacity (Anaerobic/Aerobic Energy Systems)**

Three interrelated systems provide energy to muscles: two are anaerobic (oxygen-free) and one is aerobic (oxygen-utilizing). Short term energy requirements (up to about 10 seconds), as in explosive events such as sprints and jumps, are provided for by the breakdown of phosphates stored in the muscles. Stair-running tests, which measure the ability to use phosphate stores in the leg muscles, show little difference between males and females when values are expressed relative to body weight. There are the expected differences based on intensity of training and type of sport: the most highly trained female athletes, and those in sports which require optimal leg power, produce the best performances on stair-running tests. Medium term energy requirements (approximately 30 seconds to two minutes) are met by the lactic acid system. Glycogen stored in the muscles is partially broken down, producing lactic acid and adenosine triphosphate (ATP). Lower levels of lactic acid have been found after prolonged exercise in women than in men, indicating that less energy was available to them, but some past studies may have given female subjects lower workloads than males. Both sedentary women and trained female athletes respond to high intensity training regimens, showing improved anaerobic threshold as well as gain in anaerobic power. The third system, the aerobic or oxygen system, uses glycogen and fat as energy sources and is important for activities performed at a sub maximal rate over a lengthy period. Major factors involved in oxygen uptake include the oxygen carrying capacity of the blood (dependent primarily on hemoglobin concentration), cardiac output (related to heart volume and heart rate) and cellular utilization of oxygen (arterial-venous oxygen difference). Up to puberty, sex differences in these areas are minimal. After puberty, sex differences in lean body mass and percent body fat are, to a certain extent, reflected in differences in the efficiency of the aerobic system, although environmental as well as physiological factors contribute to these differences. Maximum oxygen uptake, or  $V_{O2}$  max, is the usual measure of cardiovascular fitness and maximal aerobic power. It can be expressed in absolute terms or relative to body weight or to lean body mass. For athletes competing in the same sport, the differences between males and females average 51.5%, 18.6% and 9% respectively. Differences in body size and composition have been found to account for most of the sex difference between male and female athletes in the same sport. Although some basic biological differences in cardiac output, oxygen-carrying capacity of blood and muscle mass in males and females might be expected to produce about 10% difference, Nordic skiers have shown a sex difference of only 4% to 5%. Thus, it cannot be said with certainty that any sex difference in  $V_{O2}$  max is biologically determined. The physical demands of a specific sport, and not the sex of participants, constitute the major determinant of  $V_{O2}$  max in athletes. Males and females in the same sport are closer in  $V_{O2}$  max than females in different sports.

### **Muscular Strength and Endurance**

Muscle fibers are designated as slow-twitch (ST) or fast-twitch (FT) depending on their composition and metabolic potential: ST fiber is suited to prolonged aerobic exercise and FT fiber to explosive power. Thus, individuals (of either sex) with a higher percentage of ST fibers are predisposed to greater success in endurance activities. Since ST/FT ratio is determined by heredity, it does not change with training although training increases the size of fiber area. There are no significant sex differences in the ST/FT ratio for athletes in the same sport. There are sex differences in the size of fiber area and these are reflected in differences in the strength of males and females. However, if values for specific areas of the body are expressed relative to body size or lean body mass, sex differences are greatly reduced, especially in terms of leg strength. Overall, muscles form a lower proportion of a female's body weight than a male's. Muscular flexibility is greater in females, compensating in part for their overall lower levels of muscular strength. The relation of muscle strength to muscle cross-sectional area is the same for both sexes. Strength training programs have been shown to produce higher rates of strength improvement (up to 50%) in females than males, probably because females were initially further from their strength potential. Strength increases in women are accompanied by slight increases in muscle girth, especially in the arms and shoulders. With the lower levels of the growth-promoting hormone

testosterone in females than in males, women will probably not experience the marked increase in muscle girth seen in men who engage in strength training programs.

### **Flexibility**

Flexibility of muscles, tendons and ligaments is related to more efficient sporting performance: for example, longer running strides, better hurdling techniques and better kick and arm movements in swimming. Females of every age group are more flexible than males. Greater flexibility of the joints and cartilage of the vertebral column, pelvic girdle and foot make women better adapted to springing, landing and extensions. The smaller tendons and ligaments, on average, in females may account for the greater mobility of some joints. The most common flexibility test is the sit and reach, which measures trunk flexion and hamstring flexibility. Girls show continuous improvement from ages 10 to 18, with a gradual decline throughout the adult years. Although flexibility is increasingly recognised as both an integral component of physical fitness and an important factor in injury prevention, it is perhaps significant that some fitness surveys fail to include it. The emphasis on the "swifter, higher, stronger" ethos in male competitive sport is reflected in the attention paid to those measures of physical fitness which have clear and direct links to sporting performance, that is, measures of speed, strength and endurance.

### **Environmental Heat and Hot Effect (Thermoregulation)**

Temperature regulation in females during exercise in hot environments is related to such factors as sweating rate, ratio of skin surface area to weight, body water content and metabolic rate. A review of studies investigating thermoregulation in males and females found more similarities than differences between the sexes and reported that some of the earlier research did not take into account the athletes' fitness levels, degrees of heat acclimatisation and exercise intensity. Overall, response to heat stress was found to depend more on the state of the cardiovascular system than on sex: training lowers the thresholds for sweating and vasodilation. When men and women exercised at the same relative intensity, in hot, dry environments, there were few differences, while in hot, humid conditions, women's higher skin surface area/weight ratio facilitated heat loss and gave them greater heat tolerance. Menstrual cycle phase has little effect on thermoregulation, nor has aging been found to decrease sweating capacity. Injuries. When comparisons are made for the same sporting activity, there are conflicting results: some studies of injury patterns in track athletes and basketball players show minimal sex differences; some report a greater incidence of knee, ankle and foot injuries among females; others report a higher overall injury rate for males. On the issue of childhood injury, recent studies have shown that both sexes sustain serious injuries in school athletic programs and in school playgrounds, again pointing to the importance of proper coaching, training and supervision for school-age children, male and female. Virtually every discussion of women's sport-related injuries mentions the breasts. However, there is no evidence that female breasts are more susceptible to injury than any other part of the human body. Furthermore, the alleged causal relationship between trauma and breast cancer is not supported in the literature. Blows, punches or kicks to the breast sustained in contact/combat sports may produce bruises and, in extreme cases, a hard and sometimes painful lump may form in the fatty tissue (fat necrosis). Therefore, the wearing of chest protection is probably advisable, especially in martial arts. Depending on individual preference and physique, extra breast support may be helpful in increasing comfort during physical activity.

### **Troubles of Female Athletes**

Although male and female athletes from the same sporting discipline are prone to develop many similar types of evils, this article explores the problems that are associated with female athletes. Many common injuries from sport are just as likely to occur in men as in women. For example, all athletes are just as susceptible to dehydration (the loss of body fluids) which increases the risk of hyperthermia (very high body temperature) and hypothermia (very low body temperature). Broad participation by females in athletics is not a new phenomenon; however, detailed research into the medical difficulties faced by women athletes is not widely available. Typically, coaching education programs ignore the medical aspects of coaching and, in particular, aspects related to coaching women. Many injuries are the result of anatomical abnormalities. These abnormalities should be identified by coaches during the early phases of the athletes' athletic careers. However, in many instances, early identification does not occur and the risk of later, more serious injury is heightened. Coaches should be aware of the anatomical requirements of their sports and use common sense. It is important, even at the elite level, to emphasize the correct stretching technique and the correct exercises. Injuries to the ligaments of the ankle and knee joints are the most common training related injuries in female athletes. Pain due to a problem in the pelvis may present as pain in the knee or the back as they have the same nerve supply; the breast is rarely injured (White, 1980; Garrick and Shiveley, 1981). The most frequent injury today in high performance athletics is an overuse injury, i.e., doing too much too quickly. Musculoskeletal (muscles, bones

and joints) injuries are more common in female athletes who are amenorrheic (no menstrual periods for at least six months). Female athletes who develop recurrent shin splints (pain along the shin bone) or stress fractures should have a biomechanical assessment performed and should consider a full hormone profile, a dietary analysis, and a bone mineral density assessment (calcium content in bone). Athletes whose training is physiologically monitored, and who are regularly seen by a physician, are less likely to become over trained.

### **Societal hurdles**

Family commitments frequently put a great strain on women because, in many societies, cultural norms or religious teachings continue reinforcing the belief that a woman's place is in the home. This obviously makes it more difficult for those women who wish to participate in high level sport. This attitude adds to their stress and may be reflected in changes in their menstrual cycle. There are still many myths circulating about the effects of exercise on women (e.g., that it makes woman less feminine, and that they will tend to bulk up (develop marked hypertrophy, increase in size, of their muscles). This is due to the action of testosterone (a male hormone) and only occurs in the low percentage of women who have naturally high levels of testosterone or those who are taking steroids.

### **Nutritional Obstacles**

Nutritional obstacles take place very frequently in female athletics, particularly in women's sports requiring low body fat (e.g., women's gymnastics or synchronized swimming). Eating disorders occur in 6% of non-athletes, 20% in sports where low fat content is emphasized, and a further 10% in athletes who are exceptionally preoccupied or have tendencies toward eating problems. In a recent British survey, 40% of synchronized swimmers were found to be below the recommended levels in 10 out of 12 nutrients and one athlete was low in all. A correct diet plays a chemical role in the health and performance of all athletes. Research shows that inadequate caloric intake is more likely to occur in female athletes, and this will affect the hormones associated with the menstrual cycle. Fasting or reduced calorie intake increases the serum hormone binding globulin (SHBG) or the substance that combines with the male and female hormones and transports them in the blood. This then reduces the level of the biologically active oestrogen and testosterone. In young athletes, this may delay menarche (their first period) and in older athletes may result in long periods without menstruation. An increase in SHBG also occurs in athletes on a high fiber diet and a low meat protein diet (i.e., vegetarians) with the same result. Female athletes are more likely to be iron deficient. Iron deficiency also affects vegetarians who, if they are on the contraceptive pill, may develop problems with the metabolism of their folate and vitamin B12 which are essential for the maturation of the red cells that transport oxygen in the blood. Vitamin C helps to absorb non-haeme iron (iron found in cereals but not in meats) while tea prevents 60% of the absorption of non-haeme iron.

### **Menstrual troubles**

There is a great variation in the effects of the menstrual cycle on performance, and this may vary from one cycle to the next in the same individual. In a recent survey, about one third of female athletes believed that menstruation affects performance. Nevertheless, medals have been won by female athletes during all phases of the menstrual cycle (Delaney, Upton et al., 1976). Athletes who have menstrual problems often had them prior to training. Excessive bleeding often is due to wearing an intrauterine device. The effects of menstruation on performance in sports may be sports-related as well. Dysmenorrhea (severe period pain) is rare in athletes and, if reported, should be investigated. It only occurs in ovulatory cycles (when an ovum or egg is released). It is the only menstrual symptom to which a specific biological cause has been attributed, namely the release of prostaglandins (pain producing substances) from the lining of the uterus or womb. Two out of 57 Irish athletes developed dysmenorrhea and, on investigation, one proved to have fibroids which had to be removed, the other an ovarian cyst. The treatment for dysmenorrhea is an anti-prostaglandin (i.e., Ponstan or the oral contraceptive pill). Some athletes take medication for pain that contains codeine which is on the IOC list of banned substances. Athletes should read the contents of any medication carefully or consult with their National Olympic Committee's Banned Substances office. Athletes with pre-menstrual tension (fluid retention and irritability) are at a disadvantage in sports where fine judgement is required and they are often more accident-prone. Diuretics should never be given as they are also banned by the IOC. If an athlete has pre-menstrual tension or dysmenorrhea, treatment should be started several cycles before a major competition. All athletes should keep detailed records of their menstrual cycle. Hormones which control the menstrual cycle are also affected by exercise, circadian rhythms and seasonal variations.

### **Factors which predispose athletes to menstrual irregularities are:**

- Late commencement of menstruation (menarche).
- Irregular menses prior to sports participation.

1. Null parity (never had a pregnancy).
2. Intensity of training prior to menarche.
3. Immature reproductive axis (hormonal control).
4. Psychological stress of training or competition.
5. Low weight or loss of weight.
6. Low body fat or loss of body fat.
7. Poor nutritional status.
8. Irregular menstruation prior to pregnancy.

The progressions of changes in the menstrual cycle with increasing exercise are:

1. Normal follicular (menstruation to ovulation, 14 days) and luteal phases (ovulation to menstruation, 14 days).
2. Prolonged follicular and short luteal phases (less than 10 days).
3. Euoestrogenic anovulatory oligomenorrhea (normal levels of oestrogen, not ovulating and reduced numbers of periods).
4. Hypo-estrogenic amenorrhea

### Emotional Issues

Emotional stress may be another factor involved in exercise-induced menstrual cycle changes, possibly acting above the hypothalamic-pituitary system. Frisch et al., (1974) found that emotional stress was more frequent in women with secondary amenorrhoea (have menstruated, but now no periods) than in age-matched controls. Emotional stress is well-documented in nurses when they first attend hospitals. Anderson (1979) found that three-quarters of female West Point cadets were amenorrheic after two months of summer training camp, but after 18 months, only eight were still amenorrheic.

Menstrual disturbance is not consistent across the sports. Feicht (1978) found that 7% occurred in recreational runners, 10-12% in swimmers and 25% in competitive runners. The American College of Sports Medicine found that one third of competitive long-distance female runners experienced periods of amenorrhoea or oligomenorrhea (Baker, 1981). Many so-called normal cycles are abnormal when hormonal studies are carried out. Hormonal assessment increased the incidence of abnormal cycles from 60% to 89% in 32 women undergoing an intensive training program (Bullen et al., 1955). Amenorrhoea may cause problems if an x-ray or a bone scan is required because of the 10-day rule; they can only have x-rays done ten days from first day of menstruation.

### Osteoporosis

The mean bone density in amenorrheic runners age 25 was comparable to that of women age 50. If not treated, they are guaranteed stress fractures at the menopause. Osteoporosis is associated with the age of onset of training, intensity and volume of training, duration of participation in training, the sport involved, diet and stress (Riggs, 1981). Osteoporosis must be investigated and treated. Moderate exercise protects against osteoporosis but excessive exercise may be causative. Many further investigations must be carried out to enable us to understand why some athletes are more at risk than others. Amenorrheic athletes may have increased levels of prolactin (hormone that increases in times of stress and plays a role in the control of the reproductive hormones), and this may be due to a prolactin tumor. It cannot be assumed that an amenorrheic athlete is infertile; she may be pregnant. Pregnancy or the inability to become pregnant can be problematic in female athletes. Much more information is required to help the female athlete to reach and maintain her peak level of performance. This involves close teamwork with all concerned: the athlete, coach, physiotherapist, dietician and physician.

### Conclusion

The intent of both parts of this section was to provide a broad overview of issues related specifically to women and their participation in sport. It is hoped that the information will be more fruitful and practical assistance to both the coaches and athletes.

## Linux Security Modules: General Security Support for the Linux Kernel

**Prof. Vinit A. Sinha**

(Assistant Professor) PGDCA  
PRMIT&R, Bandera (M.S.) India

### Abstract

*The access control mechanisms of existing mainstream operating systems are inadequate to provide strong system security. Enhanced access control mechanisms have failed to win acceptance into mainstream operating systems due in part to a lack of consensus within the security community on the right solution. Since generalpurpose operating systems must satisfy a wide range of user requirements, any access control mechanism integrated into such a system must be capable of supporting many different access control models. The Linux Security Modules (LSM) project has developed a lightweight, general purpose, access control framework for the mainstream Linux kernel that enables many different access control models to be implemented as loadable kernel modules. A number of existing enhanced access control implementations, including Linux capabilities, SecurityEnhanced Linux (SELinux), and Domain and Type Enforcement (DTE), have already been adapted to use the LSM framework. This paper presents the design and implementation of LSM and discusses the challenges in providing a truly general solution that minimally impacts the Linux kernel.*

### Introduction

The critical role of operating system protection mechanisms in providing system security has been wellunderstood for over thirty years, yet the access control mechanisms of existing mainstream operating systems are still inadequate to provide strong security [2, 37, 27, 16, 25, 6, 29]. Although many enhanced access control models and frameworks have been proposed and implemented [9, 1, 4, 39, 22, 10, 28, 35], mainstream operating systems typically still lack support for these enhancements. In part, the absence of such enhancements is due to a lack of agreement within the security community on the right general solution.

Like many other general-purpose operating systems, the Linux kernel only provides discretionary access controls and lacks any direct support for enhanced access control mechanisms. However, Linux has long supported dynamically loadable kernel modules, primarily for device drivers, but also for other components such as filesystems. In principle, enhanced access controls could be implemented as Linux kernel modules, permitting many different security models to be supported.

In practice, creating effective security modules is problematic since the kernel does not provide any infrastructure to allow kernel modules to mediate access to kernel objects. As a result, kernel modules typically resort to system call interposition to control kernel operations [17, 19], which has serious limitations as a method for providing access control [39]. Furthermore, these kernel modules often require re-implementing selected kernel functionality [17, 19] or require a patch to the kernel to support the module [10, 3, 14], reducing much of the value of modular composition. Hence, many projects have implemented enhanced access control frameworks or models for the Linux kernel as kernel patches [28, 35, 22, 31, 26].

### The Problem: Constrained Design Space

The design of LSM was constrained by the practical and technical concerns of both the Linux kernel developers and the various Linux security projects. In email on the topic, Linus Torvalds specified that the security framework must be:

- truly generic, where using a different security model is merely a matter of loading a different kernel module;
- conceptually simple, minimally invasive, and efficient; and
- able to support the existing POSIX.1e capabilities logic as an optional security module.

The various Linux security projects were primarily interested in ensuring that the security framework would be adequate to permit them to re-implement their existing security functionality as a loadable kernel module. The new modular implementation must not cause any significant loss in the security being provided and should have little additional performance overhead.

The core functionality for most of these security projects was access control. However, a few security projects also desired other kinds of security functionality, such as security auditing or virtualized environments. Furthermore, there were significant differences over the range of flexibility for the access controls. Most of the security projects were only interested in further restricting access, i.e. being able to deny accesses that would ordinarily be granted by the existing Linux discretionary access control (DAC) logic. However, a few projects

wanted the ability to grant accesses that would ordinarily be denied by the existing DAC logic; some degree of this permissive behavior was needed to support the capabilities logic as a module. Some security projects wanted to migrate the DAC logic into a security module so that they could replace it.

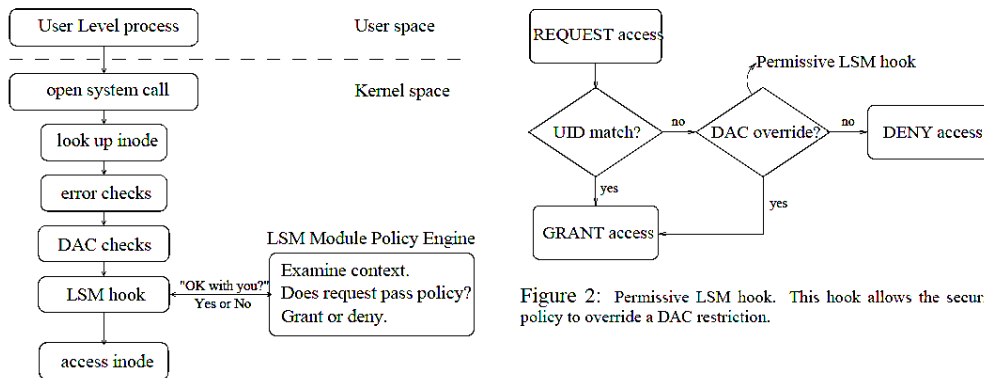

Figure 1: LSM Hook Architecture

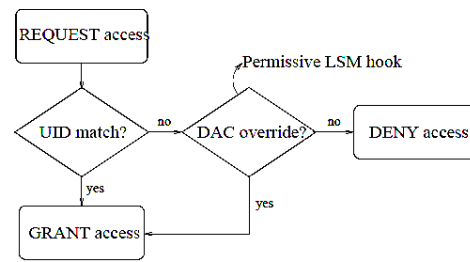

Figure 2: Permissive LSM hook. This hook allows the security policy to override a DAC restriction.

Figure 1: LSM Hook Architecture

### LSM Design: Mediate Access to Kernel Objects

The system call interface provides an abstraction for userspace to interact with the kernel, and is a tempting location to mediate access. In fact, no kernel modifications are required to overwrite entries in the system call lookup table, making it trivial to mediate this interface using kernel modules [17, 18]. While this is an attractive feature, mediating the system call interface provides limited value for a general-purpose security framework such as LSM [39]. This level of mediation is not racefree, may require code duplication, and may not adequately express the full context needed to make security policy decisions.

The basic abstraction of the LSM interface is to mediate access to *internal* kernel objects. LSM seeks to allow modules to answer the question “May a subject S perform a kernel operation OP on an internal kernel object OBJ?”

### Implementation

This section describes the implementation of the LSM kernel patch. It begins with an overview of the implementation that describes the types of changes made to the kernel in Section 4.1. Sections 4.2 through 4.7 discuss the specific hooks for the various kernel objects or subsystems.

STRUCTURE	OBJECT
task struct	Task ( Process )
linux binprm	Program
super block	Filesystem
inode	Pipe, File, or Socket
file	Open File
sk buff	Network Buffer ( Packet )
net device	Network Device
kern ipc perm	Semaphore, Shared Memory Segment, or Message Queue
msg msg	Individual Message

Table 1: Kernel data structures modified by the LSM kernel patch and the corresponding abstract objects.

### Testing and Functionality

Section 5.1 surveys modules that have been created for LSM so far. Section 5.2 describes our performance testing of LSM. While we have tested LSM kernels by booting and running them, we have not

engaged in systematic testing. However, other members of the LSM community [43] have developed systematic LSM correctness testing procedures [13].

test type	2.5.2	2.5.2-lsm	%overhead with LSM
null call	0.50	0.49	-2.0%
null I/O	0.82	0.84	2.4%
stat	5.95	6.34	6.2%
open/close	7.59	8.13	6.6%
sig inst	1.26	1.25	-0.8%

mem write	153.2	153.6	-0.2%

Table 3: LMBench Microbenchmarks, 1 processor machine

Table 4: Linux Kernel Build Macrobenchmarks, time in seconds

Many security models require some way to associate security attributes to system objects. Thus LSM attaches security fields to many internal kernel objects so that modules may attach and later reference the security attributes associated with those objects.

It is also desirable to *persistently* bind security attributes to files. To do so seamlessly requires *extended attribute* file system support, which enables security attributes to be bound to files on disk. However, supporting extended attributes is a complex issue, requiring both support for extended attributes in the filesystem [21], and support for extended attributes in the Linux kernel's VFS layer. Rather than make LSM dependent on non-existent kernel features, we plan to add full extended attribute support to LSM when extended attributes are added to the Linux kernel. Until then, modules that need persistent extended attributes can resort to meta-files [42, 28].

In attempting to provide a pluggable interface for security enhancements, it is tempting to consider *completely* modularizing all security policy decisions, i.e. move *all* kernel logic concerning access control out of the kernel and into a default module. This approach

## Related Work

Section 7.1 describes the general area of extensible kernels in the LSM context, and Section 7.2 describes work specifically related to generic access control frameworks.

## Conclusions

The Linux kernel supports the classical UNIX security policies of mode bits, and a partial implementation of the draft POSIX.1e "capabilities" standard, which in many cases is not adequate. The combination of open source code and broad popularity has made Linux a popular target for enhanced security projects. While this *works*, in that many powerful security enhancements are available, it presents a significant barrier to entry for users who are unable or unwilling to deploy custom kernels.

## New Trends in Teaching and Learning of English

**Pradeep Ingole,**

Assist. Prof. in English,

Bahirji Smarak Mahavidyalaya, Basmath, Hingoli.

### Abstract:

*English language is widely used not only in India but all over the world. Today it works as a connecting language across all barriers. In this era of globalization, English is the best medium to communicate with people across the globe. The accents may be different, the pronunciation may be different but it definitely helps in conveying the feelings, emotions and sentiments of one person to another. In this context today English should be taught to learners so that they are able to interact in this language with a fair amount of fluency in speaking, reading and writing. Hence, to achieve this, there needs to be a change in the teaching and learning pattern of this language.*

English language teaching is a continuous process which needs many changes from time to time. Earlier this language was taught with the objective that the Indians could speak, read and write the language for the benefit of the rulers of the raj. But today the focus has changed and it is now a means of communication. It is now taught as a development of language skill. This transition is a need of the hour for two reasons.

1. To produce fully competent English knowing bilinguals to focus on English as a means of communication.
2. English as a means to learn content i.e subjects like Science, Mathematics, Social Science etc. English should be made very simple.

Hence, to achieve these objectives the change in teaching and learning methods should be made from the conventional GTM – Grammar Translation Method, where formal grammar of the language was the base and a mandatory requirement to learn English language. The GTM was derived as a method of teaching Greek and Latin. Here learners learn grammatical rules then apply these rules by translating sentences between the target language and the native language.

### **This method had two goals:**

1. To develop students, reading ability to a level where they can read literature in target language.
2. To develop students, general mental discipline.

### **There were some demerits of this method, which are as follows:**

1. Students learn the rules by rote memory/learning.
2. The focus was more on form of sentences rather than the content.
3. No listening or speaking practice or any communicative aspects of the language were taken care of.

The Functional approach taught the elements of this language through various functions rather than the topics of grammar. But then there was less reinforcement to the teaching and learning process. As a result experts see Constructivism as a better option to teach English as foreign language or second language. In Constructivist approach apart from the Functional approach there are assignments at the end of the lesson to consolidate the teaching and learning of the learners.

Earlier this was achieved through black board, projectors /OHP, audio tapes, authentic and meaningful contextualised discourse, teacher centered activities and many more. Now the new methods insist that the learner is at the centre while the teacher is in the background. The teacher's role is that of a helper or a facilitator. The learner who is in the lead should show curiosity for creative thinking, be self confident and enthusiastic about going ahead of the conventional ways of learning. The teacher should motivate the learners to think out of the box and instill self confidence in them.

In order to achieve this paradigm shift, teachers should also believe in reflective practice. Teachers should introspect and improve wherever necessary keeping in mind the limitations of the institution, students, society and other factors. If the teacher has the urge to improve, only then can he think of new methods, trends and applications to be implemented in the teaching and learning of English language.

## Sports in India: Problems and Reform Measures

**Dr. Minanath Shivajirao Gomchale,**

Assist. Prof. in Phy. Education

Narayanrao Waghmare Mahavidyalaya,  
Akhada Balapur Tq. Kalamnuri Dist Hingoli.

Recently, in a series of tweets, the Union Sports Minister Rajyavardhan Singh Rathore mooted an idea that seeks to drop the word 'Authority' from the Sports Authority of India (SAI) as the word lost relevance in the modern sporting scenario. Further, the minister expressed concern over the dire situation of sporting icons who are struggling to meet basic needs. The minister's comment on the present situation of sports led to a debate on the ways to improve the sports ecosystem in the country. It is against this backdrop, it is pertinent to understand the factors adversely affecting the sports in India and the steps taken by the government to rectify the situation.

**Reasons behind underdevelopment of sports in India are –**

- 1. Corruption & Mismanagement of sports authorities:** Corruption has become synonymous with sports administration in India. Whether it is the most popular cricket or hockey or weightlifting, most of the sports authorities in India have come under attack due to corruption charges. Besides, the involvement of politicians in the administration of sports bodies for a very long period and controversies surrounding 2010 Commonwealth Games dented the image of sports administrators in India.
- 2. Social and economic inequalities:** Social and economic inequalities have a negative impact on the Indian sport. Denial of access to sports infrastructure due to poverty, concentration of stadiums and other sports avenues only in cities, lack of encouragement to girls to participate in sports, etc, have impaired the development of a positive sports culture in the country.
- 3. Lack of infrastructure:** This is one of the most important factors for the apathy of the sport in India. Since infrastructure is necessary for training and organizing games, its non-availability and its access to only a few sections of the society have adversely impacted the sport participation and the quality of sports persons.
- 4. Policy lacunae:** For the development of any sector, formulation and execution of an effective policy is a sine qua non. This is true for sports also. Till date, the sports policy planning and implementation is centralized in the country due to the paucity of resources and the expertise by the State and local governments. Moreover, the absence of a separate ministry of sports at the union level reflects the apathy towards sports.
- 5. Meagre allocation of resources:** Compared to other developed and developing countries, allocation of financial resources is meager in India. In the Union Budget 2017-18, Rs 1943 crore allocated for sports. While it is Rs 450 crore higher than the previous year, it is much below than the around Rs 9000 crore spent annually by the UK for the sports sector.

**Impact of festivals on pollution: Analysis**

**To remedy the situation, the union government has taken a number of initiatives in recent years. Some of them are -**

- In September 2017, the Union Cabinet approved the revamped Khelo India programme at a cost of Rs.1,756 crore for the period 2017-18 to 2019-20. The programme aims at mainstreaming sport as a tool for individual development, community development, economic development and national development. The revamped Khelo India Programme would impact the entire sports ecosystem, including infrastructure, community sports, talent identification, coaching for excellence, competition structure and sports economy.
- In March 2017, 12 Indian players of international eminence were appointed by the government as National Observers for the first time for the development of various sports in the country. Among other responsibilities, they assess the existing sports infrastructure/ equipment, quality of scientific backup and medical facilities at the venues of the national coaching camps and report the critical gaps.
- Under the scheme of "Assistance to National Sports Federations", the government has been providing financial assistance to the recognized National Sports Federations (NSFs) for supporting girls/women's exposure, training and participation at national/ international level.

- In order to provide best possible help and support to athletes in their training for the upcoming 2020 Olympics, the government approved the appointment of foreign coaches and supporting staff.
- In April 2016, the Central Sector Scheme, Khelo India – National Programme for Development of Sports was approved by the government. It subsumes the erstwhile Rajiv Gandhi Khel Abhiyan, Urban Sports Infrastructure Scheme and National Sports Talent Search System Programme.

**Conclusion**

Despite the above mentioned measures taken by the government, the sports ecosystem is of poor quality in the country. For a country of over 1.25 billion, the existing sports infrastructure is not satisfactory. The lack of world-class infrastructure and the inadequate support of the government is reflected in poor performance of Indian athletes in major international events like the Olympics. Tiny countries like Cuba, Croatia and Lithuania performed better in the 2016 Olympics compared to India. It is high time, the public and private sector should come together to lift the Indian sport sector from the present deplorable situation. Extension of Justice Lodha Committee recommendations on BCCI to all other sports bodies will be a right step in this direction.

## Use of New Technology World of Sports

**Dr.Nagnath Gajmal,**

Assist.Prof.in Physical Education,  
Bahirji Smarak Mahavidyalaya,  
Basmath,Hingoli.

The 2011 film *Moneyball* has a simple premise: The general manager of the Oakland A's, Billy Beane (played by Brad Pitt), must assemble a winning baseball team using the franchise's limited budget. He meets Peter Brand (played by Jonah Hill), a young Yale economics graduate with radical ideas about baseball. He loves player data and wants to use it to help Beane assemble a team.

That season, as portrayed in the film, the A's did not win the World Series, but the data-driven method Beane and Brand developed was sound, and would be used by the Red Sox to win the 2004 World Series a few years later. Today, sabermetrics is a standard in baseball, used consistently to pick players and win games.

It's just one aspect of how technology is now being embraced by professional organizations across a number of different sports. Some are using tech to improve the fan experience, and others for player safety. No matter the use, technology is taking sports to new heights.

### **It's a Numbers Game, More Than Anything**

When you think about sports, you think about athletes competing and having fun; they're playing a game after all.

But really, the game they are playing is a *numbers* game. Sports are dominated by data and data analytics.

Combine that with IoT (Internet of Things) and you've got the tech trend that will dominate sports for the next 10 to 20 years.

On-field cameras and tracking devices embedded into players shoes, helmets, and other gear track players and their statistics in real-time. This allows team coaches and managers to quickly assess undervalued players and dial-in team dynamics that need to be improved.

For instance, Major League Baseball introduced StatCast by rolling out cameras and radar equipment to every team's ballpark for the "gathering and displaying previously immeasurable aspects of the game."

The analysis helps team management pinpoint areas of improvement, award outstanding players, tweak lineups, and more. Once instituted, staff can eventually use the data to create trend-lines and get better at gaming their own success.

### **Technology Has Made the Best Teams Even Better**

The Golden State Warriors are the NBA team to beat. They've been to the finals for four consecutive years and have won the championship twice, with the outcome of their most recent showing still yet to be determined. After years of being among the association's worst, almost overnight the Warriors have created a legendary organization, and a force of talent that rivals the all-time greats of the sport.

They've done it by building great teams, of course. But they've been able to build great teams - and get the most out of them - using data.

How? When the Golden State Warriors owner's son, Kirk Lacob, a Stanford graduate, was made assistant GM of the Warriors' G-league farm team, the Santa Cruz Warriors, he started using data and statistics to track players. It was a test program for the Golden State Warriors, who were looking to use analytics to improve team performance.

Lacob's program was quickly a success, propelling the Santa Cruz team to the finals in his first two seasons. His methods were later adopted by the Golden State Warriors, with Lacob joining their front office full-time.

Today, the Warriors still crunch data to dissect their strengths and weaknesses, using a metric called EPV, or Estimated Possession Value. This data point is created by an array of high-tech cameras that track every player, every shot, and every inch of the court. The statistical model captures the action and translates it into formulas that the front office then uses to create plays. In the most simple terms, the

model determines where (the specific location on the court, and specific defender guarding against) a player is shooting best to score points.

These high-tech cameras (which were originally designed and used by the military to track missiles) capture 25 frames per second, with six in total usually positioned to cover all the action at any given NBA game. The cameras and analytics system have given NBA teams new and unique insight into a treasure trove of data that has helped them supercharge performance.

### **You're in The Show with Virtual Reality**

Virtual Reality is being used both on and off the field to help improve player performance and give fans a better viewing experience. From a player perspective, imagine a quarterback that practices his passing in a virtual space that looks and feels like a holodeck version of *Madden Football*. Coaches (and quarterbacks) don't have to worry about injuries and they can review the data captured to refine the players training.

From a fan perspective, VR will get you closer to the game, and even on the field. FOX Sports partnered with NextVR to broadcast live sporting events using VR technology, and with ticket prices still headed toward the stratosphere, VR might be the best (and most affordable) way to enjoy a game in the future.

For example, don't like your seat? With VR, you can move your view closer to the field or even take in the national anthem while standing right next to a player on field. Imagine being able to take that home run lap with your favorite pro courtesy of the VR cam mounted into his batting helmet.

### **Smart Helmets & Equipment**

Much in the way that the movie *Moneyball* exposed audiences to the fact that sabermetrics was a thing, Will Smith's *Concussion* opened audiences eyes to the long-term effects of head injuries on pro athletes, particularly NFL and NHL players.

The NFL has mobilized to address the issue, improving and upgrading equipment using technology. Research found that traditional NFL helmets, for example, were actually not as helpful as once thought to protect players from brain injuries. To that end, Riddell introduced SpeedFlex helmet technology to offer players a customizable smart helmet. Sensors and magnets help detect the collision, and disperse/absorb the impact.

The helmet tech doesn't end there, as the hit is tracked wirelessly to the sidelines where player staff evaluate concussion data in real-time. The same tech could be applied to helmets for snowboarders, lacrosse players, and more. Mouthguards and other type of equipment is also becoming IoT enabled. Importantly, while technology is changing sports for us as fans and viewers, it's doing wonders in the way of increasing player safety.

### **Using Tech to Call The Shots**

You don't have to watch too many games to know that referees are human—and make mistakes. Technology is looking to change that. While instant replay technology has been around for a while, VR and 360 degree cameras are now giving refs (and sporting commentators) an unprecedented view of the action.

And if you're wondering if such changes are actually needed or are simply for show, imagine how hard it is for a ref trying to keep an eye on ten different players at a time, all while being heckled from the stands. It's difficult enough to follow the action from your couch.

Still, though, It's a sensitive topic, as purists believe the introduction of such tech completely removes the human element; which is something that makes sports entertaining in the first place. Even so, the major sports associations are working to continue to find ways for technology to support human game callers. For example, FIFA implemented goal-line technology which works with live refs to make them aware if a goal was or wasn't scored.

### **Innovations for The Home Team**

Fancy player-tracking tech isn't just for major leaguers—it's also available for local high school baseball/soccer/football teams. Platforms and wearables like FieldWiz and PlayerTek help coaches and players capture data, analyze it and use it to improve performance. DribbleUp does the same thing for soccer.

In the future, as player metrics and goals become more refined, more apps and platforms will appear that do a whole host of things, from tracking what a player needs to eat to stay in top shape to gamifying a pick up-game of soccer.

## **eSports**

eSports' continue to rock traditional sports associations and their franchises to the core as viewership continues to drop on major sporting events. But major sports franchises (and their owners) aren't turning a blind eye, and in fact, they're looking to partner with eSports leagues, teams, and players. There's even a fantasy league for eSports...

Is eSports the future of sports? It's hard to tell, but it definitely is going to play more of a role in the future as younger audiences grow up on the platforms.

## **Wrapping Up**

In the world of sports, tech is building better athletes, and keeping them safer on the field. As fans, it's helping us follow the action, and in the case of social media technology, helping directly connect us with our sports heroes.

Tech is going to play an even bigger part in sports in the future. And it's why if you're an athlete, having an interest in STEM is going to help you in the long run. As these technologies become integrated into play, a solid understanding of STEM can help you make the most of them.

## Ways Social Media can Benefit Professors and Students in Teaching and Learning

**Dr.P.W. Patil,**

Assist. Prof. Political science,  
Bahirji Smarak Mahavidyalaya,  
Basmath, Hingoli.

Revolutionary changes in technology have open various opportunities to enhance teaching as well as learning experiences of students. The world of education has completely transformed ever since the internet and smart phone technologies came to existence.

Rising popularity and usefulness of social networking websites has led educators to explore their potential use in education. Educational institutions have realized the capability of social media to improve collaboration and active learning.

Social media is paving way for a new age learning which is personalized and customized to suit the need of every learner. In an increasingly interconnected world, professional networks and connections have become key to one's success and future growth.

In this context social media has a lot to offer to the educational community. Here are some of the direct benefits of social media usage for the academic world:

### 1. Collaborative Learning

On social media, students exchange lot of information. So, why not use this platform to encourage collaborative learning. In fact, several institutions globally are encouraging students to forge international partnerships using social media for taking up some project assignments.

By doing this, they get engaged with each other and learn how to manage projects and coordinate with teams sitting globally along with cross cultural sensitivities. Similarly, the use of social media has made it easier and faster to interact with peers or teachers about class-related topics.

Use of social media also familiarizes students with a new work culture of managing work through online engagements which is very important in today's business environment. It teaches them how to develop a strong online presence by improving their communication skills.

### 2. Information Sharing by Students

Students are continuously hooked on to the internet through their smart phones and hence rapidly transmit information to their connections. Apart from just sharing views and opinions they also exchange lot of valuable information. This information is a lot more than just interesting videos or snapshots and cover useful stuff related to their studies. They exchange helpful information for classes and examinations.

### 3. Social Media Marketing for Educators

For educational institutions, social media is a great marketing tool to reach out to the prospective students. This new media has led education professionals to build a strong marketing strategy to increase brand awareness. Colleges all over the world are extensively carrying out social media strategies to tap students. They are connecting with experts on topics via social media.

Through blogging and SlideShare, teachers are soon establishing themselves as experts in particular fields and subjects. Students gain useful content by following these experts online. This empowers institutions and establishes its brand equity in the academic world.

Academic Institutions are communicating with students via YouTube and Facebook. These channels can be used to communicate campus news, make announcements and provide students with useful information. This builds engagement between the College and students which helps in building trust by addressing many student related issues through community interactions.

As part of their marketing strategy, Institutions can share supportive and useful posts that can connect their audience in a positive way. You can initiate hashtags on social media to engage students in online discussions that are helpful. Video is a prominent tool in social media trends and is very effective in communicating your messages. You can use it to share useful and interesting stories that can inspire students and help them prepare for the challenges ahead.

### 4. Helps to Foster Research

Social media offers collaborative opportunities to foster research initiatives. It is one of the best platforms to extract secondary data. You can conduct survey pools to gather sampling and find out opinions of general people and other experts on a particular subject.

Social media can help academic researchers compile and produce useful content by working on collaborative assignments and projects.

### 5. Continue Teaching from Anywhere and Everywhere

Sometimes, it is difficult to address queries of students during classroom sessions. This makes it further difficult for students to clear their doubts. However, professors can take advantage of social media technology to extend teaching hours beyond classroom. They can set up Facebook Live sessions or Twitter discussions to cover unlearned doubts of their

students. As a matter of fact, professors can allocate dedicated time slots for online discussions to answer any question or to work with a student. Through Facebook sessions, Faculty can connect with large audiences at one go which otherwise is not possible in one class.

Professors may like to continue engagement with their students even when they are travelling and not taking sessions. They can even stream lectures to avoid any cancellation of classes while travelling. If the professor is unavailable during the actual class time, he can use Youtube to record a lecture beforehand.

#### **6. Take Advantage of Blogs to create Virtual Library**

Setting up a personal blog or website gives professors a lot of freedom to build intellectual credibility. They can upload their academic work and other important lectures and videos that will allow students to take relevant inputs as reference material for their studies.

#### **7. Let Students Learn from Social Networking**

Social media offers great learning opportunities through social networking. Students can be encouraged to build networks to support professional help in career.

Similarly, Professors can also connect with the students and help them identify suitable job openings and find relevant connections for their future profession.

#### **Conclusion**

As social media networks advance in education systems, many helpful and beneficial tools will emerge that can make learning a more enriching experience.

Students today are intimately involved with social media at every stage. If you're missing onto the usage of social media you are pushing away a lot of potential audience. Using it in educational institutions can prove to be a very effective measure.

The benefits of social media for academic entities are many. The above are just a few, to begin with. Social media sites offer great opportunities for communication between peers and teachers.

Using social media, teachers can improve the involvement of their students in studies and education, improve technological ability, provide a great sense of collaboration in the classroom and build good communication skills of students.

**Action Sports, Social Media, and New Technologies****Ulhas Vijay Bramhe**Director Of Physical Education  
S.P.M.College, Chikhli Dist.Buldana**Abstract**

*Action sport participants have always been actively involved in the consumption and production of niche cultural media. However, the proliferation of new media technologies is playing an evermore important role in the ongoing progression of skills among athletes and committed recreational participants, and building a sense of community among enthusiasts and audiences across local, national, and global contexts. More than repeating previous patterns, such media technologies are contributing to new relationships between corporations, action sporting bodies, and communities. This article sets out a research agenda for understanding new media developments in action sports. In the first part of this article, I detail how new digital media are being used by corporations, athletes, and everyday participants, and in so doing, are transforming the networks and connections within and across action sport communities. In the second, I describe how new media technologies such as GoPros™, camera drones, and GPS tracking devices are changing action sport experiences and the relationship between “human” and “nonhuman” sporting bodies. As well as revealing emerging issues, this article also poses a series of critical questions and challenges to researchers interested in contributing to new understandings of the latest media technologies in action sport cultures.*

*Keywords : action sports, social media, new technologies, drones, corporation, media spectacles, digital embodiment*

Action sport cultural industries have long been at the forefront of new media technological developments aimed at capturing the moving body in ways that are not only able to vividly capture the “thrills and spills” but also to evoke deeply affective responses among viewers (Booth, 2008; Borden, 2001; Wheaton & Beal, 2003). The emergence of new social and digital media technologies is playing an evermore important role in the ongoing progression of skills among action sports participants and building a sense of community among enthusiasts and audiences across local, national, and global contexts (Gilchrist & Wheaton, 2013; Thorpe, 2014). More than repeating previous patterns, however, such media technologies are contributing to new relationships between corporations, action sport bodies, and communities. In identifying emerging issues and new questions, this article sets out a research agenda for understanding new media developments in action sports. More than describing such developments, we need to consider what makes the usage of new media technologies in action sports unique, as well as their (perhaps unintended) implications on action sporting bodies and experiences.

**The Role of Social Media in Action Sport Communities**

Cultural sociologist John Tomlinson (2007) uses the term telematization to describe the “proliferation of communication technologies and media systems within the quotidian rhythms of social life,” a phenomenon that he believes has “altered the ‘everyday flow of experience’” (p. 94). Drawing upon Tomlinson’s (2007) work, Paul Hutchins (2011) proclaims that tele-, meaning “at a distance,” is the “pivotal prefix here.” Indeed, these types of virtual interaction “weave relations between people known to each other through online interaction, offline contact, and more traditional forms of media representation and celebrity” (p. 241). While new media and technologies have supplemented rather than replaced “old” media forms, they are radically impacting on modes of communication and embodied experience in physical and digital spaces.

Here my focus is less on the new communities enabled by online technologies, and more on how action sport participants who already identify with their sporting community via active participation (and consumption) in local and/or international contexts are using social and digital media to further “establish, cultivate, and maintain their social relationships” (Osgerby, 2004, p. 208) within local communities and across the global action sport culture.

**Corporations, Social Media, and Action Sporting Spectacles**

As with many traditional sports (see Hutchins & Rowe, 2009, 2012), action sport– related events are increasingly being designed and choreographed for online audiences.<sup>1</sup> The 2011 Vans Triple Crown surfing contest series, for example, set a new record for the action sports industry with more than 10.4 million online viewers during the event. 25–30% of whom watched the event online via competition applications (apps) designed specifically for iPhone, iPad, and iPod Touch (Lewis, 2011). Nearly 10% (1.1 million) of these viewers streamed the event via their iPhones. Some action sport events have specifically designed Apps for iPhone, iPad, android mobile, and android tablet. For example, the latest X Games app features instant results, news, schedules, athlete bios, and live music from the summer and winter events, and guest information (e.g.,

venues, parking). The app touted the “Hypemeter” as its newest feature, a “built-in game that lets you contribute to the overall excitement around X Games via tweets, Facebook posts or device interaction (shaking your phone or tapping your tablet)” (Foss, 2014, para. 1). As a result of such new technologies, the 2012 Winter X Games were the most watched yet, with an estimated 35.4 million viewers in the United States tuning into Entertainment and Sports Programming Network (ESPN), and a digital media audience that was up 147% from the previous year’s X Games (Hargrove, 2012).

The RBMH are also experts at producing “media events”—“live broadcasts of historic occasions that engage a committed or worldwide audience, which does not merely watch the event, but celebrates it” (Dayan & Katz, 1992, cited in Giulianotti & Brownell, 2012, p. 204). One such example of a successful Red Bull “media event” was Austrian BASE jumper Felix Baumgartner’s “space dive” of 120,000 feet from a helium-filled balloon on October 14, 2012. A carefully choreographed media event, the jump was 7 years in the making, with Red Bull’s investment ultimately costing more than £9 million. Although a highly risky marketing initiative, Baumgartner’s successful jump ultimately became an incredibly valuable media asset for Red Bull. The event broke the record of the most watched live streaming event on YouTube with more than 8 million people around the world watching the live footage. It is reported that 7.6 million viewers also tuned in for Discovery Channel’s live coverage of the jump, and another 40 television stations showed the jump across 50 countries. Red Bull’s Facebook postjump photo of Baumgartner gained almost 216,000 likes, 10,000 comments, and over 29,000 shares within 40 min. Further revealing the digital significance of this event, more than 3 million tweets were sent about the jump (Clancy, 2012), and half the worldwide trending topics on Twitter were related to the “Red Bull Stratos” event. The night of the jump, Baumgartner himself tweeted “One small step for man, one giant step for energy drink marketing” (cited in McGiugan, 2012, para. 9).

#### **Action Sport Athletes Use of Social Media**

Much like their peers in more traditional sports, professional surfers, skateboarders, snowboarders, BMX-riders, climbers, mountain bikers, and other action sport athletes are embracing new media to connect with fans around the world. For example, more than 40 professional skateboarders have Twitter accounts, with global skateboarding icons Tony Hawk and Ryan Sheckler having more than 4.12 million and 2.7 million followers, respectively. As other scholars have revealed, many action sport athletes are also using YouTube and other video-hosting platforms (i.e., Vimeo) to post short videos of their sporting achievements (Gilchrist & Wheaton, 2013; Ojala, 2014). In so doing, some of the more skillful and creative athletes are able to forge careers away from competition and almost solely through short films that are then shared widely by their peers across the action sport culture via an array of social media platforms (i.e., Facebook, Instagram, Twitter, Snapchat). Such social media capital can be converted into economic capital when the athlete garners the financial support of action sport companies who may opt to sponsor their digital media-based careers (Ojala, 2014). Most action sport athletes also have their own websites, Facebook pages, and Instagram accounts, some of which they manage themselves and others by their agents.

Instagram is a particularly popular platform among action sport athletes, many of whom use it to share photos and short videos of their sporting pursuits and lifestyles with their friends, family, and fans. According to one action sports journalist, the action sports industry “has thrived through Instagram”: “First there were magazines. Then there were videos. Now there is a whole new medium for you to see how much cooler someone’s life is than your own” (Andrews, n. d., para. 1). Continuing, he connects the hero culture within action sports to the immediacy and intimacy that Instagram offers action sport enthusiasts who are interested in the lifestyles and sporting pursuits of their heroes.

#### **Everyday Usage of Mobile Media**

With many (though certainly not all) action sport participants coming from privileged backgrounds, iPhones and other smartphones are common accessories. The European snowboarding magazine, *Onboard*, found that 95% of its readers owns a mobile phone (“OnBoard Media,” 2012). Such technologies have allowed participants to keep up to date with latest news from their sporting heroes, communicate with their peers—organizing times to gather for a skate, surf, or climbing session—and access relevant information about conditions, products, and events, often while on the move. Each action sport has its own preferred iPhone apps, including games, news, forecasting, and event coverage. For example, surfers can access more than 150 apps via iTunes designed specifically for their needs. According to *Surfers Village*, however, “99% are rubbish” (“Best of,” n. d.). Snowboarders can also download a plethora of apps that calculate their on-snow statistics during a day of riding, and provide detailed, up-to-date information on resort facilities. With such access to mobile devices and computers, everyday action sport enthusiasts are heavy consumers of the social and virtual media of the companies, events, and athletes. According to one skateboarding journalist.

As well as passively consuming online videos and event coverage, action sport participants are also actively employing an array of new social media, such as Twitter, Facebook, YouTube, and Instagram, to share information and images, “like” and comment on their peers’ action sport representations and performances, check forecasts, organize local events, and discuss and debate issues ranging from the quality of the waves at a local beach to the effects of global warming on the snow sport industry.

### **Camera Drones: Action Sport Media Progressions**

Camera drones are increasingly being used in sporting events for surveillance as well as offering new perspectives on spectators, sporting facilities, and athletic performances. However, action sports have been leading the way in the use of such technologies. In fact, action sport athletes, videographers, and companies have been using drones to produce video content since the early 2010s. For example, in 2012, the producers of a skateboarding film, *Firefly*, used a camera mounted to a hexacopter for “sweeping overhead vistas” of a lone skateboarder riding the empty streets of a city at night, his board lit from beneath with a glowing blue ring, such that it effectively evokes a science fiction imaginary. The company that produced the film, Samadhi Production, also posted a video of the making of *Firefly* that reveals the behind-the-scenes efforts to use a drone for filming a skateboarding/art film. Today, the use of camera drones has become common practice in the filming of high-quality action sport videos and action sport-related advertising. For example, a 2015 advertisement for Lexus featuring a group of skateboarders experimenting with a Lexus designed hoverboard at a skatepark used drones to get close-up shots of the hoverboard in action from ground level as well as aerial shots of the skater trying an array of maneuvers as well as the social activities in the skatepark (Kiefaber, 2015). The advertisement also included shots of the drones buzzing around the skateboarders, further reinforcing the intended connection between Lexus and technological innovation. Further revealing the growing popularity of the use of drones among action sport enthusiasts, the 2015 “Rise of the Drones Film Festival” proclaimed to “cater to those who like to live life on the edge,” and featured videos submitted by surfers, motocross riders, snowboarders, wingsuit flyers, climbers, and mountain bikers, from around the world. According to one technologies journalist, “the high-flying exploits of camera drones and extreme sportspeople seem to dovetail ever so nicely” (Lavers, 2015, para. 4).

### **The Emergence of the “Throw and Shoot” Camera**

Another particularly noteworthy media innovation that sits at the intersection of GPS and drone technologies is the Lily, the “world’s first throw-and-shoot camera” (Lily, 2015). In my efforts to offer a simple description, a GPS tracker is worn by the participant that allows the Lily camera drone to follow the wearer and to respond to changes in elevation (i.e., when the wearer is going over jumps or down hills or waterfalls). Initially conceived by two University of California Berkeley students in September 2013, and with major private investors coming onboard in 2014, the company is due to release the product to the market in August 2016. While some are sceptical that the company will realize their original promises, Lily continues to strive towards its mission “to release human creativity by inventing tools that allow for effortless expression” (“Our Story,” 2015). In contrast to camera drones that require a somewhat skilled human to fly the drone above or near an athlete as he or she travels over particular terrain, the Lily drone is launched in the air by the wearer of the GPS tracking device and then proceeds with their activity while the camera flies nearby recording the individual in action based on their preprogrammed specifications, only returning to the wearer when a button is pushed. According to the company marketing materials, the Lily drone will be capable of flying between 2 and 50 feet off the ground, able to take cinematic tracking shots, perform slow zooms, make a slow circle around the subject, or simply hover over a set area for up to 20 minutes (Byrne, 2015).

### **GPS Tracking Devices and the Digitizing of the Action Sporting Body**

A growing number of scholars are critically examining how new digital devices are changing the ways we can “know” our bodies. A leading figure in this field, Deborah Lupton (in press) is examining “the ways in which human bodies interact with and are configured by digital technologies and how these technologies generate new knowledges and practices about bodies” (n.p.; also see Lupton, 2015, 2016a, 2016b). According to Lupton (in press), the growing popularity of medical, health, and exercise “apps” are generating detailed data on the “geolocation, movements, appearance, behaviours and functions of bodies and the uses to which these data are put as part of the digital data knowledge economy” (n.p.). In so doing, the “cyborg body has transformed into the digital body, whose data outputs possess commercial, managerial and research as well as personal value and status to a range of actors and agencies beyond the individual” (n.p.). Arguably, there is much potential in digital sociology for action sport scholars interested in studying how the growth of digital devices and wearable apps are contributing to new forms of “digitized embodiment” in action sport cultures.

Indeed, GPS tracking devices have been steadily gaining popularity among action sport athletes and participants over the past 5 years. Here I offer a recent example to illustrate such trends. In 2015, Rip Curl released “the world’s first GPS surf watch.” For US\$400, the watch allows surfers to “Track your surf, register your top speed and distance and rack up your wave count in each session.” According to the company website, data from the watch can be synchronized with the Rip Curl Search App or website to “re-live your surf with location maps, image sharing and graphic charts which showcase your session.” The notion of individually and collectively “re-living” ones surf session is an interesting suggestion, as the data produced encourages the participant to focus on the quantitative dimensions of their experiences (Figures 3). In so doing, it is worth considering how such technologies might be promoting more calculating approaches that may (positively or negatively) motivate a surfer and their interactions in the ocean, and how analyzing such data may influence how/what one remembers (or forgets) of their surfing experience. The individual and collective digital mapping of surfing bodies over time and across locations may also contribute to new understandings of surfing mobilities and geographies.

### **Towards a Research Agenda: New Media Technologies and Action Sports**

In sum, action sport cultures have been an important space where new media technologies have been, and continue to be, developed, marketed, and consumed in similar and different ways to more traditional sports. In this article, I have provided a broad sketch of some of the many different ways social and digital media technologies are transforming the action sports experience for athletes, recreational participants, and audiences alike. As well as identifying emerging issues, I have also highlighted key questions deserving of further consideration, particularly surrounding the usage of new media technologies in the everyday lives of action sport participants, the role of such technologies in subcultural relations, and how such technologies may be influencing action sport participants’ affective relations with the environment, their own bodies, and their peers and broader communities. Scholarship in the emerging and related fields of digital sociology, digital and social media studies, cyber cultural studies, and digital ethnography, as well as research in sport and new media studies, will offer much inspiration as we continue to ask and attempt to answer such questions, and consider what (if anything) makes the relationship between action sports and social and mobile media unique. While I expect those working in action sport studies will be the most likely to take up these challenges, I also hope those researching sports media in more traditional sporting contexts may also pay attention to recent developments in the action sport– media–industry complex, and consider how the media techniques and technologies being adopted and developed by action sport corporations, athletes, and participants may be informing or challenging what we know about sport media and communication in the 21st century.

## New Technologies and Sports Skills

**Dr. Sangita A. Deshmukh**  
Bhartiya Mahavidhyalaya, Amravati

### Abstract

*Technology is revolutionizing sports training by live-tracking performances, perfecting athletic movements enhancing communication and virtually eliminating injuries. Advance technology has become smaller, more resilient and less burdensome over recent years. Technology has increased an athlete's prowess simply because it magnifies performance-related actions and events that have been previously unseen. Game analysis generates statistical descriptions of game play. Reports allow coaches and players to identify strength and weaknesses in their own game. Strategies and tactical execution, as well as to examine the strategies and tactics by their opponents. Hence various sports technology is beneficial in sports performance.*

### Introduction :-

**What is mean by sports Technology.** Sporting technologies are man-made means, developed to reach human interests or goals in or relating to a particular sports. Technology in sports is a technical means by which athletes attempt to improve their training and competitive surroundings in order to enhance their overall athletic performance.

In the past, sports training required extensive paperwork and post-practice effort from both the trainer and the athlete. While the athlete practiced, notes and video were diligently taken and then collated into charts and graphs representing that athlete's performance. After practice, trainer and athlete would work together discussing aches pains and thoughts about physical movements that happened much earlier. The system was grueling, but worked as for as athletes and trainers knew. That is until recent technology transformed the field of sports training.

### Technological Advancements that Have Changed Sports :

1. **Hawk-Eye Technology** :- This technology uses 6-7 high end cameras situated above the field of play (e.g. a birds-eye view) to analyze the flight and trajectory of an object being used in sports competition. Most commonly used in tennis, cricket, rugby and volley-ball, Hawk-Eye technology has been use since 2006 in tennis and is more accurate than a judge eye.
2. **Benefits of this technology :-**
  - Hawk-Eye technology helps to take an error-free decision in cricket, lawn tennis, rugby league, football and base ball.
  - This technology has reduced the criticism of the players and spectators about the decision of the match referee.
  - By analyzing the movement of the balls through this technology, the umpire can take an error-free decision quickly when the game is going on.
3. **HANS Device** :- A vast majority of technological advancements in sports revolve around safety, and the HANS (Hand and Neck Support) device used in motorsports is one of the most famous. Motor sports drivers adopted this technology geared towards saving their lives in the event of a tragic crash.
4. **Details of HANS Device :-**
  - U-shaped device which is place behind the neck and its two arms are placed over the pectoral muscles of the chest.
  - It is only connected to the helmet by two anchors on each side and supports by the shoulders.
  - A HANS device keeps the head from whipping forwards and backward in a crash, while also preventing excessive twisting movements.
5. **Video Technology** :- Everything is live and not just on your home TV, but on your Smartphone, tablet and the overhead screen in your local church. In today's sports world you are never far from live access. But it isn't just access that has adapted to the times it is features. Instant replay 1<sup>st</sup> and ten lines pitch trackers, HDTV sets, DVR's the experience of watching sports has changed dramatically for the better.
6. **Wearable Computers** :- Another advancement in the world of safety and monitoring, wearable computers allow for realtime tracking of an athlete's health. Since their creation, the incidents of dehydration, heart attacks and worse, have dramatically decreased.

When Minnesota vikings offensive lineman orey Stringer died of heat stroke during training camp in 2001, companies began to investigate ways to monitor health in real time and stave off tragedies like this. Wearable tech has made a difference in the lives of many athletes, by supervising pulse rate, hydration, and temperature through its wireless and microscopic health monitoring system.

**7. Prosthetic Devices for Disable Athletes :-** People with disabilities, or lost limbs, never had a chance to compete but with the advancement of prosthetic technology more and more physically disabled are competing like before. Dr. Rory A. Cooper is a leader in developing cutting-edge prosthetics. Dr. Cooper places athletes in body suits embedded with motion sensors. The athletes then go through a series of drills based around athletic movement, the cameras and the wearable tech report back on their movement.

**8. Ingestible Thermometer Pills :-** If you are an athlete, it is important to supervise visceral organs temperature and heart rate. But it is not always possible to check it manually. To observe the body temperature accurately, some trainers are using indigestible pills.

When you swallow a pill, it moves around the gastrointestinal tract and transmits vital information of the body to medical personnel. So if there is any problem in your body, it can be solved before any accident. It will help to minimize death from heat exhaustion which is the second most common reason for athlete fatalities.

**9. Game performance Analysis :-** Game analysis generates statistical descriptions of game play. Reports allow coaches and players to identify strengths and weaknesses in their own game strategies and tactical execution as well as to examine the strategies and tactics used by their opponents.

Global positioning system (GPS) can analyse player location, speed, acceleration, distance, relative leg forces and heart rate while playing or training.

**10. Sport speed Measurement and Analysis :-** The unit has cutting edge field-based assessment and analysis instrumentation to help athletes from all sports to achieve their individual potential for optimal sport speed. This includes the laser-based FAST technology, a highly accurate speed and acceleration testing and training system provided by Time Tronics. FAST calculates a runner's Force, Acceleration-speed and time.

#### Areas of technology that can be used to improve Performance :-

1. Equipment, e.g. Tennis rackets / Cricket helmets
2. Clothing, e.g. lycra shorts/lightweight protection
3. Footwear, e.g. running shoes/football boots
4. Surfaces, e.g. all weather/artificial pitches
5. Facilities, e.g. Sport-specific venues/climate control
6. Cameras e.g. Photo-finish/action replay
7. Computers e.g. Storage of information/match analysis
8. Software e.g. Technique analysis/dartfish

#### Advantages of Technology on Performers

1. Increased knowledge of diet, e.g. carbo-loading
2. Supplementation e.g. creatine
3. Faster rehabilitation e.g. O<sub>2</sub> tents, hypobaric chambers, ice baths
4. Improved testing to provide feedback on effectiveness of training programmes.
5. Improved analysis of performance, e.g. match analysis, GPS data
6. Advances in stress management techniques
7. Equipment designed for individual needs
8. Facilities to recreate environment, e.g. Humidity chamber
9. Instant Feedback on performance, e.g. heart rate monitors
10. Advanced clothing/equipment design, e.g. lycrasuits/prosthetics

#### Benefit of technology for coaches

1. Video analysis of matches to highlight strength/weakness and tactics/strategies
2. Video analysis of technique-dartfish
3. Detail analysis of success of nutrition training programmes
4. New training techniques/equipment to improve performance
5. Specific/detailed recording of performances/split time

#### Benefit of technology for officials

1. Ensure correct decisions are made/fair competition less controversy players more confident in decisions.
2. Help officials communicate with each other
3. Less pressure on official to make the final judgement/less post-match criticism.

4. Timing/measurement accurate
5. Creates excitement in crowd waiting for decision/allows players to officially challenge decisions.

#### Disadvantage of technology

1. Could lead to increased injury or violence/shorter careers
2. e.g. from bladed boots/use of rugby shoulder pads/players bigger/fitter/more powerful
3. May lead to cheating /Violence
4. e.g. drags
5. Can disrupt or slow down 'game'
6. e.g. time taken for playback
7. Could be an unfair advantage/be expensive/be dependent on sponsor
8. e.g. technology not equally available to all such as high tech bikes
9. Reduces traditional ethic or nature of sport/can lead to 'win at all costs' ethic
10. e.g. use of high tech equipment at junior or local level/TV or internet or modern media that has made sport a global 'product'

#### Conclusion

Advance technology has become smaller more resilient, and less burdensome over recent years, paving the way for new opportunities, especially in athletics. New athletes wear sensors that convey real time information to a trainer's tablet, GPS accurately pinpoints motion, Smartphone keep everyone current and wearable tech can prevent injuries. Compared to whiteboards and post practice reviews, technology has substantially increased athletic potential.

Technology is revolutionizing sports training by live tracking performances, perfecting athletic movements enhancing communication and virtually eliminating injuries. Hence various sports technology is used in increasing sports performance.

## Effectiveness Of Digital Advertising On Instagram Followers

**Trusha Chopade**  
(MBA) Specialization-Marketing  
Amravati

**Dr. Mahek Iram Qureshi**  
(Assistant Professor)  
School of Commerce and Management,  
G. H. Rasoni University, Amravati

With the world continuously revolving on the axis of technological advancement man has got many things to add to his comfort list. With the rising interest in the internet and its beneficial usage the man has evolved many options to make his life simpler. rather than going to your local shop for groceries you opt for buying all your errands with a few simple clicks.

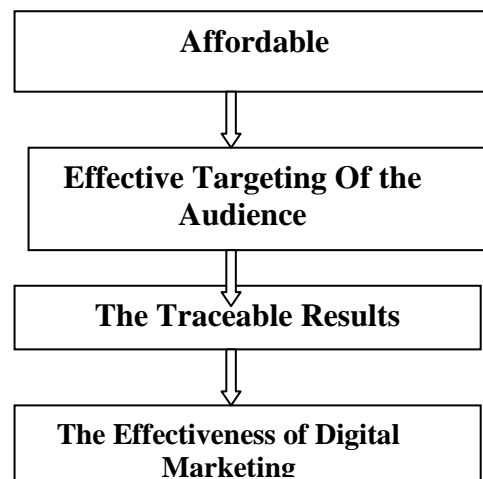

Considering the higher interest of customers in online buying and exploring, the companies have now taken the route of e-marketing. As per the studies 89% of the customers choose e-buying over physical buying. 7

### The Importance of Digital Marketing:

While the older generation is still not much able to come out of the web of paper based information stuff the younger generation has evolved themselves to be the most tech savvy and based on e-marketing. It's not only a boon to the consumers, but a very effective tool for the marketers to reach their target audience. Here are some key points that explain its importance:

#### (FIG: 1: Model Of Importance of Digital Advertising)

(Developed By Researcher)

#### Affordable

The first to be considered point is that digital marketing is very cheaper when compared to the other modes and means of marketing. Information going online regarding your company or product may not cost the company more than a fractional cost of sending the same information via newspaper or a digital advertisement.

#### Effective targeting of the audience

When compared the digital marketing again stands out to the print marketing as there is always the chance of people being attracted to the digital media more. As the technology probe more and more into our daily life, it has made a significant effect on our sense that can be convinced. Moreover, there are always higher chances of more people watching an online ad than a print media advertisement.

#### The traceable results

Thanks to the technology it has made it very easy for the marketers to track and monitor their results online. The data can always be collected and the analyst may help in data assessing and provide the valuable data for various decision making.

#### The effectiveness of digital marketing

Digital marketing is the most widely used marketing aid in the current era as it is considered to be more effective than any other tool. This is true to the core as there is a considerable shift in the preferences of the common man. Here are a few facts that clearly state the effectiveness of digital marketing.

#### Digital Advertising on Instagram:

- The comparative analysis: customers want to have a comparative analysis of the prices and benefits of all the products available in the market. The digital market offers them a platform to review all the aspects associated with a product.
- The acceptability: In this tech savvy era the information available on Instagram is widely accepted by the customers in comparison to the physically available information.
- Wider audience: The coverage of digital marketing is much more than that of the physical media as the internet is now the new tool of every type of communication. It is a lot much easier to sit back and communicate over a technology driven device.
- Impact: how many times did you let your favorite show forget to watch an advertisement of a company selling some random product? But while surfing on Instagram it is always very easy to restart what you left from the same point. Any advertisement pop up window attracts you as soon as it flashes on the screen.

Digital marketing has made our lives simpler and offered us everything right in front of us virtually. Companies have got a very effective tool to market their product and services directly to the customers and track the change in the consumer behavior. Digital marketing holds a significant role for both customers as well as for the companies selling their products and services.

#### Various Social Medias:

- Social media are promoting to the digital advertising which are cost-efficient.
- Social media websites are also promoting free of charge.
- A number of spend on paid ads online, the cost is still cheaper measure up to traditional marketing.
- Statistical data and outcome are effortlessly recorded.

With Google Analytics, specialists can without difficulty confirm if the strategies are operational. Condition without difficulty create better satisfied for improved marketing.

#### Importance of Social Media in Digital Advertising:

One huge thing that early-adopting entrepreneurs loved about social media marketing was, for the most part, it was free. While that's still technically true some of the top networks — including Facebook, Twitter, and Instagram — have switched to what are known as algorithmic feeds. Instead of displaying posts in reverse chronological order, algorithmic feeds attempt to show users the “best” posts first, often leading to marketing posts to going unseen.

#### Instagram – An Effective Social Media App:

Perhaps the best part of using these social advertising tools is that they allow you to easily set a budget for your campaign and preview what results you can expect to see for that amount of money. There are also very low minimums to get started with most of these ads — often \$5 will actually go pretty far. This is important because experimentation is key for success with these ads. If you're new to social media advertising you may want to try a few different strategies with small budgets to see which works best before investing more in any one campaign.

#### Photo ads

Tell your story through a clean, simple and beautiful creative canvas. Photos can be in square or landscape format.

#### Video ads

Get the same visually immersive quality as photo ads, with the added power of sight, sound and motion. And now, you can share videos that are up to 60 seconds long in landscape or square format.

#### Carousel ads

Add another layer of depth to campaigns, where people can swipe to view additional photos or videos in a single ad.

#### Stories ads

Complement your feed content with ads on Instagram Stories. Connect with over 300 million accounts using stories daily. Learn more about stories ads and specs.

#### Influences of Advertisement on Instagram Users:

Allows Meeting Your Business Goals

From sparking inspiration to driving action, get the business results and customers you care about.

Awareness

**Drive awareness of your business, product, app or service.**

Reach

Reach and frequency

Brand awareness

Local awareness

**Consideration**

Make potential customers more aware of your products or services.

Website clicks

Video views

Reach and frequency

**Conversion**

Increase product sales, mobile app download and even visitors to your shop.

Website conversions

Dynamic ads on Instagram

Mobile app installs

Mobile app engagement

**Research Methodology**

The use of social media sites as part of a company's marketing strategy has increased significantly in the past years. Regardless its popularity, there is still very limited information to answer some of the key issues concerning the effectiveness of social media marketing.

We researched not only the causes of the inefficiencies that Digital Advertising encounter but also how they limit effective use of Social Media- Instagram. The impact is extensive. 40 Instagram followers were asked to fill the structured questionnaire and 35 judiciously filled questionnaires were further statistically analyzed.

This study is an attempt to understand the Effectiveness of digital advertising on social media. The intent was to scrutinize revitalization on social media.

**Objectives of the Study:**

- To know Digital and Social Media Strategic Imperatives.
- To study Strategic Insights of Social Media Imperatives.
- To know the effectiveness of digital Advertising.

**Hypothesizes:**

H1: Digital Advertising has a strategic imperative in converting consumer's responses.

H2: Digital Advertising is an effective form to motivate consumers.

**Major contributions:**

Instagram advertising related activities were analyzed to identify the correlation between the effectiveness of digital advertising on social media sites. The theoretical part is framed through the books, journals, previous research papers and articles. Researcher attempted to study and investigate effectiveness of digital advertising on social media sites specifically Instagram. Also total of 35 follower's surveys were collected in Amravati and these were analyzed using statistical tools.

**Analysis of Effectiveness of Digital Advertising on Instagram:**

In this researched 35 instagram followers were interviewed with a structured Questionnaire and were judiciously distributed to get the feedback. The new generations are on social media and have the great liking towards instagram. In the table no 1 representing the accurate response which is divided into three parts Gender, Age, Education, with the help of this data we can easily knowing the gender ratio of the active user's. As well as the maximum use of instagram in particular age group i.e. in 21-30 age group is highly active. And lastly according to Education profile graduates and post graduates shows interest in getting involved and acquire knowledge of media surfing.

**Cross tabulation analysis:**

Various aspects of the questionnaire have been cross tabulated by the researcher so as to know the impact of variables on each other.

**Gender wise Influence of advertisement of instagram on users**

Influence of the advertisement on Instagram				
RESPONSES	GENDER			
	Cross Table - 1	FEMALE	MALE	Grand Total
	AGREE	11	14	25
	STRONGLY AGREE	3	3	6
	NIETHER AGREE NOR DISAGREE	3	1	4
	DISAGREE	0	0	0
	STRONGLY DISAGREE	0	0	0
	Grand Total	17	18	35

It can be clearly seen in the cross table above that maximum number of male respondents i.e. to the fact that they get influenced by the advertisements on Instagram.

**Age wise Influence of advertisement of Instagram on users**

Influence of the advertisement on Instagram					
RESPONSES	AGE				
	Cross Table - 2	LESS THEN 20	21-30	30 AND ABOVE	Grand Total
	AGREE	10	11	4	25
	STRONGLY AGREE	3	2	1	6
	NIETHER AGREE NOR DISAGREE	2	1	1	4
	DISAGREE	0	0	0	0
	STRONGLY DISAGREE	0	0	0	0
	Grand Total	15	14	6	35

It can be clearly seen in the cross table above that maximum number of respondents in the age group of 21-30 show influence of the advertisements on instagram.

**Gender wise influence of advertisement on Instagram for products**

Products influenced by the advertisement on instagram				
PRODUCT	GENDER			
	Cross Table - 3	FEMALE	MALE	Grand Total
	CLOTHS	9	5	14
	FOOD ITEMS		1	1
	ELECTRONICS	2	7	9
	FOOTWEAR	0	6	6
	BOOKS/MAGZINES	2	0	2
	ACCESSORIES	3	0	3
	Grand Total	16	19	35

From the above table it can be observed that the advertisements on instagram motivate the respondents belonging to both the genders for buying products of different categories. It also shows maximum motivation of female segment in cloths and male segment in footwear's.

**Impact of advertisement on respondents**

Advertisement on Instagram							
Impact of advertisement	Cross Table - 5	AGREE	STRONGLY AGREE	NIETHER AGREE NOR DISAGREE	DISAGREE	STRONGLY DISAGREE	Grand Total
	AGREE	11	13	1	0	0	25
	STRONGLY AGREE	5	1		0	0	6
	NIETHER	3		1	0	0	4

AGREE NOR DISAGREE							
DISAGREE				0	0		
STRONGLY DISAGREE				0	0		
Grand Total	19	14	2	0	0		35

From the above table it can be observed that the advertisements on Instagram have a great impact on the respondents, since maximum respondents strongly agree to the fact.

### Hypothesis testing:

H<sub>1</sub>: Digital Advertising has a strategic imperative in converting consumer's responses.

H<sub>0</sub>: there is significant strategic imperative seen by the Digital Advertising on the Instagram users for purchasing various products.

H<sub>1</sub>: there is no significant strategic imperative seen by the Digital Advertising on the Instagram users for purchasing various products.

Researcher with this cross tabulation tries to understand relationship between these two variables, if any. Here we accept H<sub>0</sub> because p value is less than 0.05 i.e. p-value-0.48. Hence it can be said that respondents show a significant strategic imperative by the Digital Advertising on the Instagram for purchasing various products.

H<sub>2</sub>: Digital Advertising is an effective form to motivate consumers.

H<sub>0</sub>: there is significant motivation seen by the Digital Advertising on the Instagram users

H<sub>1</sub>: there is no significant motivation seen by the Digital Advertising on the Instagram users.

Researcher with this cross tabulation tries to understand relationship between these two variables, if any. Here we accept H<sub>0</sub> because p value is less than 0.05 i.e. p-value-0.039. Hence it can be said that respondents show significant motivation from the advertisements seen on Instagram.

### Conclusions:

- The power of digital advertising platform is seen in using Instagram as a, creative approach by using all the resources to get more from your digital activities to manage.
- In current era Digital advertising is becoming enormously fruitful for businesses, it offers a great prospect to target audience and advance trends by sharing content and suggest our business in a low cost budgets the public need to know about the upcoming advertising potential on the fastest growing social network of Instagram.
- Its success because of young generation is likely to grow reputation and value on digital advertising platform.
- Consumers get influenced and it is also helpful in developing the awareness amongst the people.
- Audience gets used to look for the upcoming brands in background and continue with the interactions.
- Brand engagement of the users and more time spent on online influences users to buy products on impulse.
- Instagram Increases the Brand value in the market and upcoming trends.
- Brand equity recognition is gained in the consumer's perception and product and services.

### Research Implications:

Findings show that promotional advertising on Instagram motivates the users to know the upcoming brands and their existence with the help Quotes, Campaigns, Videos and Images on it. The study finds that social media advertisement effectiveness is highly influenced by its messages/contents quality. The study also finds that the youth generation is the main user of Instagram

### Suggestions:

**Creativity + Targeting Audience** Creative ads have their position on Instagram according to requirement. Life style explore the correct and sensible images recognize on Instagram specially accurate the level of Instagram content continuously increase. Anyone can try one of these alternatives because a sober awareness can be seen through Instagram advertising.

- There is free advertising on Instagram, hence a huge platform of advertisers everywhere can be gathered.
- By using life style lots of targeted hash tags to description can be mentioned
- Advertisers should stick towards the brand.
- Over post should be avoided, So that the users not get irritated and avoid the posts.

### Further Scope:

Digital channel in marketing has become essential part of strategy of many companies. Nowadays, even for small business owner there is a very cheap and efficient way to market products or services. Digital marketing has no boundaries. Company can use any devices such as smart phones, tablets, laptops, televisions, game consoles, digital billboards, and media such as social media, SEO (search engine optimization), videos, content, e-mail and lot more to promote company itself and its products and services. Hence future researches in strategically using these advertisements on selective social Medias bifurcating them according to the audience targeted can be of a great use. Digital advertising may succeed more if it considers user needs as a top priority. Mass awareness among the audience can be created with the good impression at top position Instagram feed.

## Computer Science In The Compulsory Education Curriculum

**Prof. Dr. Sangita M. Khadse**

Director of physical Education

Smt. Sindhutai Jadhao Arts & Science Mahavidhyalay Mehkar Dist Buldhana

### Abstract :

The word science comes from the Latin "scientia," meaning "knowledge". Webster's new collegiate dictionary, define science as "knowledge attained through study or practice", or "knowledge covering general truths of the operation of general laws, esp. as obtained and tested through scientific method [and] concerned with the physical world.

Science is powerful. it has generated the knowledge that allows us to call a friend halfway around the world with a cell phone, vaccinate a baby against polio, build a skyscraper, and drive a car. And science helps us answer important questions like which areas might be hit by a tsunami after an earthquake, how did the hole in the ozone layer form, how can we protect our crop from pests, and who were our evolutionary ancestry? With such breadth, the reach of science might seem to be endless, but it is not. Science has definite limits.

### Introduction :

#### Exercise And Sport Science :

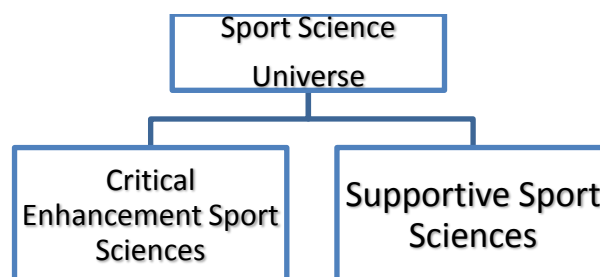

until recently the two greatest assets for the disciplined athlete have been genetic potential and a comprehensive training programme to maximize their potential, but now the athletes and their trainers have begun to maximize and developed a new resource –the sport science – one that promises to revolutionize sport" (kamlesh, 2008). In the hierarchy of sciences (charted out above), sport science occupies no place because sports sciences are no "true" sciences like physics, chemistry biology; they hybrid science disciplines that derive their substance from the mainstream biological and social sciences, and apply them to the sport and/or exercise environment, their major objective is to facilitate performance improvement, reduce, injure or increase motivation. This means that any branch of science, harnessed to the service of sport in some way may legitimately qualify to be a sport and/or exercise science. Obviously, some branches of science e.g. human physiology, mechanics, psychology, nutrition, etc. have a closer connection with performance in exercise and sport than others. The distinction between exercise sciences and sport sciences and sport than others. The distinction between exercise sciences and sport sciences is in no way generic but based on the objective, purpose and areas of application.

#### Exercise science is a theory :

based, research – led discipline that has a central role in physical activity programmes and is aimed at improving general health, wellbeing and happiness. The exercise scientist can be involved in the assessment, treatment and rehabilitation of individuals with diseases such as cardiac or pulmonary diseases. They work within frameworks set by the health care administration, physical education institutions, and fitness & exercise gym governing bodies.

Sport science is the application of scientific principles to all areas of sport with a view to improve performance. It has grown dramatically in the last three decades and has resulted in a greater understanding of the demands of elite sport and superior athlete's performance. The study of sport science traditionally incorporates areas of physiology, psychology, motor control, and biomechanics; it also includes other topics such as nutrition and diet, sports medicine, anthropometry, kinanthropometry, performance analysis, and sport technology. Through the study of science and sport, researchers have developed a greater understanding of how the human body react to exercise, training, different environment and many other stimuli.

Sports and exercise science is an envelope terms, embracing a cluster of disciplines, their derivatives and sub-disciplines, many of which have great practical importance. Over the decades, the universe of sport science has expanded fast as more performance-related variables have been brought under science observation. With this has also become clear that *not* all sciences are directly involved in the performance-enhancement process; some play more significant role than others. On the basis of their proximity to performance-enhancement objective, sports science are *dichotomized into critical enhancement sport science and supportive sport science*, as Rushall (1989) put it.

Under the first category come sport and exercise physiology, biomechanics and sports psychology, without whose strong support no performance-improvement can occur in a sport. *Supportive science* derive their substance from main science stream sciences. These include *medicine* (asthma; diabetes; chronic fatigue syndrome; surgical repairs of joint injuries and rehabilitation ; exercise and hypertension, sports anaemia, *health*(disease-free existence, hygiene, wellbeing), *anthropometry*(measurement of body parts and effect on movement), nutrition( proper hydration for sport, use of vitamins and supplements; anorexia, establishing appropriate feeding pattern for maximum benefit; use of special nutrition for carbohydrate, fats or protein supplementation) *physiotherapy*(rehabilitation following injury or surgery), *adaptive physical education* (working with athletes with various disabilities such as spinal injuries, amputations, mental retardation, blindness), *biochemistry*, etc. They are not directly involved in the sport training process but address athlete's problems of health, injury, recovery, well-being, etc.

#### **Impress of Science on Physical Education and Sport**

With the induction of science, exercise and sport scenario has undergone tremendous transformation, for science, at the outset, has assisted in determining how athletes should train in sport-specific ways and what they need to eat and drink so as to enhance their capacity to perform beyond their known ability. Without science there would be no sports-themed beverage and food products for athletes to drink/eat. Science has assisted greatly in making stronger, more durable and lighter sports equipment e.g. vaulting poles, bars, javelins, bows & arrow sets, shooting guns, etc. Science has enabled sports to be safer by the process which helmets and pads are made. Without science people playing American football would still be wearing leather helmets instead of study plastic based ones. Additionally there are locations such as gyms, training halls, simulation rooms, etc. you can go to and get private training. At some of these locations they can have you run on a treadmill with cameras looking at you from the sides, the front and back, and from the top to determine if you are using your energy efficiently. Science has made more supportive, better fitting, lighter shoes. Science has enabled the creation of very lightweight breathable clothes such as swimsuits, cyclists' attire, etc. On academic and research front in exercise and sporting activity and, the import of science has been phenomenal. Very precisely, science has:

- enabled the physical educator, sports academics and athletic trainers to explode the myths and misconception about the values, procedures and processes of sports and physical activity.
- supplied irrefutable facts and principles on the foundation of which stands the superstructure of physical activity and sport.
- helped physical educator, coaches and trainers to update and innovate teaching and training techniques and moves with the spirit of changing times.
- created vastscope for research in every conceivable area of knowledge in health physical activity, recreation and sportdomains.
- provided credibility to physical education and sports as potential areas of academic excellence.

## व्यवसायामध्ये ई कॉमर्सचे महत्त्व

डॉ. अनिल गंगाधर पितळे

सहा. प्राध्यापक (वाणिज्य विभाग)

श्रीमती आर.एस.महाविद्यालय

अंजनगांव सुर्जी

माहिती तंत्रज्ञानामुळे पारंपारिक व्यापार पध्दतीच्या मुलूत स्वरूपात क्रांतीकारक बदल घडून आला आहे. सर्व जगभर ई-कॉमर्सचा वापर प्रचंड प्रमाणात सुरू झाला आहे. त्यामुळे अर्थव्यवस्था व जीवन पध्दतीवर प्रभाव टाकणारा ई-कॉमर्स हा महत्वाचा घटक आहे. ई-कॉमर्स म्हणजे वस्तु सेवा व माहितीची इंटरनेटच्या साहाय्याने होणारी देवाण-घेवाण होय. सर्वांथाने ई-कॉमर्स म्हणजे इलेक्ट्रॉनिक माध्यमाने होणारी माहितीची देवाण-घेवाण ई-कॉमर्सच्या संकल्पनेत उत्पादन, पुरवठा व्यापार वस्तु व सेवांची खरेदी, विक्री दुरुस्ती व देखभाल या सर्व क्रिया इलेक्ट्रॉनिक माध्यमाने केल्या जातात.

व्यापार म्हणजे नफा कमाविण्यासाठी करण्यात येणारी वस्तुंची खरेदी विक्री यासाठी देता आणि विक्रेता एकत्रित येवून वस्तुची देवाण घेवाण करतात तर वाणिज्यात वस्तुची खरेदीविक्री व त्याला साहाय्यक सेवांचा समावेश होतो. आज ही पध्दती कालबाह्य ठरत आहे. आज ह्या सर्व क्रिया इंटरनेटवरून केल्या जातात. आज विक्रेता आणि ग्राहक यांना एकत्रित येण्याची गरज नाही. इंटरनेटच्या माध्यमातून अशाप्रकारे होणा-या वस्तुंना किंवा सेवांना देवाणघेवाणीला ई-कॉमर्स (इलेक्ट्रॉनिक कॉमर्स) असे म्हणतात.

इलेक्ट्रॉनिक कॉमर्सची संकल्पना ४० व पासून बदलत आहे. आरंभीच्या काळात ई-कॉमर्स म्हणजे इलेक्ट्रॉनिक डेटा इंटरनेटचे आणि इलेक्ट्रॉनिक फंड्स ट्रान्सफर ह्यासारख्या तंत्रज्ञानाचा उपयोग करून आदेश देणे. बिजक प्राप्त करण्या ऐवढ्यासाठी होत होता. आज ई-कॉमर्सचा अर्थ बदलत गेला. सध्या ई-कॉमर्स म्हणजे इलेक्ट्रॉनिक व्यापार होय जो संगणकाच्या माध्यमातून इंटरनेटवरून होत असतो. आज डेटा पॅकची कमी किंमत, स्मार्ट फोनची स्वस्त किंमत, इंटरनेटसंबंधी लोकांमध्ये निर्माण झालेली जागरूकता आणि डिजिटल इंडिया ह्या धोरणामुळे व या सर्व प्रभावी कार्यक्रमांमुळे आज इंटरनेटचा वापर ाहरापुरता मर्यादित राहिलेला नसून तो ग्रामीण भागातही मोठ्या प्रमाणावर केल्या जात आहे. भारतातील ऑनलाईन खरेदीची परिस्थिती पूर्वीपेक्षा आता खुपच बदललेली आहे. १९९१ मध्ये ऑनलाईन खरेदीच्या संदर्भात जगाच्या इतिहासात एक नविन अध्याय नोंदविला गेला. आज अधिकाधिक ऑनलाईन ऑपिंग कंपन्या त्यांच्या सेवा ग्राहकांना भारतात देत आहेत. भारतातील ऑनलाईन बाजारपेठ चिन्हाच्या ऑनलाईन बाजारपेठेपेक्षा बरीच मोठी आहे. तीवेगाने वाढत आहे. ई-वाणिज्य म्हणजे इंटरनेटवर वस्तु किंवा सेवांची खरेदीविक्री करणे किंवा निधी किंवा डेटा सीनांतरीत करणे होय. ई-वाणिज्य व्यवहार हे एकतर ठरठए ठरठए बरठ किंवा बरठ अशा चार प्रकारचे असू शकतात. भारतात ई-वाणिज्याची सीपना १९९० च्या दशकात रेडिफने केली. फ्लॅज ने २००२ मध्ये यशस्वी असे ऑनलाईन ई-वाणिज्य पोर्टल तयार करून ते इंटरनेटवर उपयोगकर्त्यांच्या उपयोगाकरीता सादर केले. त्यास यशस्वी पोर्टल म्हणून मान्यता मिळाली. स्मार्ट फोनची क्रांती आणि स्वस्त डेटाची सुलभ उपलब्धता यामुळे वर्तमान भारतीय ई-वाणिज्याचे महत्त्व वाढले आहे. फोरेस्टर रिसर्चच्या अभ्यासानुसार २०२२ पर्यंत भारताचा ऑनलाईन बाजार १५० बिलियन डॉलर्सपोहचण्याची अपेक्षा आहे तर हाच बाजार २०२६ पर्यंत २०० ट्रिलियन डॉलर्स पोहचेल अशी अपेक्षा आहे. आज इंटरनेटशी संबंधीत असणारी तरूण पिढी ही भारतातील ई-वाणिज्य उद्योगाच्या विकासाची महत्वाची शक्ती आहे. जवळपास १०: ऑनलाईन खरेदीदार हे १८ ते २५ वयोगटातील आहे. अधिक ग्राहक वर्ग ऑनलाईन खरेदी अधिक पसंत करतो.

आजच्या काळात खालील कारणामुळे ई-वाणिज्यात सर्व क्षेत्रातून वाढ होत आहे.

- ◆ मोबाईलचा उपयोग
- ◆ स्पर्धाधारित अनुभव
- ◆ त्याच दिवशी प्रदान
- ◆ ड्रोन व्दारे वितरण
- ◆ सरकारी हाताळणी

### ई-कॉमर्सचे व्यवसायामध्ये महत्त्व :-

- ◆ खरेदीविक्रीत वाढ :-  
ई-कॉमर्समुळे खरेदी विक्री मोठ्या प्रमाणावर करता येते. त्यामुळे वस्तुला मोठी बाजारपेठ प्राप्त होते.
- ◆ उत्पादनात वाढ :-  
ई-कॉमर्समुळे उत्पादीत वस्तु जगातील सर्व देशांची बाजारपेठ काबीज करू शकते त्यामुळे जास्तीत जास्त नफा प्राप्त करता येतो.
- ◆ श्रम व वेळेची बचत :-  
घर बसल्या व र्शित ३६५ दिवस आणि २४तास इंटरनेटच्या माध्यमाने वस्तुची खरेदी करण्यात येते त्यामुळे श्रम व वेळेची बचत होते.

- ◆ मध्यस्थाचे उच्चाटन :-  
ई-कॉमर्समुळे ग्राहकाचा संबंध उत्पादकाशी येतो त्यामुळे वस्तु स्वतः व लवकर प्राप्त होते.
- ◆ ग्राहकाला कमी किंमतीत वस्तु मिळते :-  
ई-कॉमर्स व्यापारी ते ग्राहक असा सरळ संबंध येत असल्यामुळे नोकरवर्ग व इतर होणारे खर्च कमी होतात त्यामुळे ग्राहकाला चांगल्या व कमी किंमतीत वस्तु प्राप्त होतात.
- ◆ ग्राहकाचा फिडबॅक जाणून घेता येतो :-  
ई-कॉमर्सच्या माध्यमाने उत्पादक वितरणाचे प्रक्रीया पार पाडत असतांना वेब साईट निर्माण केल्यानंतर त्यावरून ग्राहक आपली मते उत्पादनासंबंधी आवडी निवडी फॅशन ह्याचा फिडबॅक देते. त्यामुळे उत्पादकाला आपल्या उतपादनात योग्य बदल करता येतो.
- ◆ वस्तुचे सुलभ वितरण :-  
ऑनलाईन वस्तुची खरेदी विक्री होत असल्यामुळे विक्री परीव्यय कमी होतो व वितरणासंबंधी माहिती नेटवर उपलब्ध असते.
- ◆ मानवी चुकांचे प्रमाण कमी होते :-  
सर्व व्यवहार हा इंटरनेटवर होत असल्यामुळे खरेदीदार, उत्पादक व ग्राहक यांचा प्रत्यक्ष संबंध येत असतो म्हणून चुका कमी होतात.

### ई-कॉमर्सचे फायदे :-

अ)व्यवसायाला होणारे फायदे :-

- १) जागतीक बाजारपेठ प्राप्त होते.
- २) व्यापारी खर्चात बचत.
- ३) ग्राहकांच्या आवडीनुसार उत्पादन.
- ४) जाहिरात खर्च कमी
- ५) मालाची साठवणूक रावी लागत नाही.

ब)ग्राहकाला होणारे फायदे :-

- १) ग्राहक घर बसल्या वस्तु खरेदी करू शकतो.
- २) रोख पैसे जवळ असण्याची गरज नसते.
- ३) माफक किंमतीत वस्तु मिळतात.
- ४) ई-लॉजीस्टीक सेवा
- ५) रेल्वे तिकीटाचे आरक्षण घरबसल्या करता येते.
- ६) वस्तु व सेवा विषयी सर्व माहिती प्राप्त होते.

क)सामाजिक फायदे :-

- १) ग्राहकांच्या राहणीमानात वाढ
- २) ग्राहकाची क्रयशक्ती वाढते.
- ३) उत्पादकाकडून समाजाला जास्तीत जास्त सोयी व सेवा प्रदान केल्या जातात.
- ४) रोजगार उपलब्ध होतो.

### ई-कॉमर्स व्यापाराचे तोटे व मर्यादा :-

- १) व्यापारी वातावरण व तंत्रज्ञान यातील बदल.
- २) प्रायव्हसी व सुरक्षा प्रश्न.
- ३) कायदेविषयक प्रश्न.
- ४) व्यापारात गुप्तता राहात नाही. वैयक्तिक माहितीचा दुरुपयोग को जाईल काय याची भीती.
- ५) वस्तु निरीक्षणाची गैरसोय.
- ६) सामाजिक बांधिलकीपासून दुर.

### निष्कर्ष :-

आजच्या जागतिकीकरणाच्या काळामध्ये ई-कॉमर्स ही सेवा अत्यंत उपयोगी आहे. या सेवेमुळे ग्राहकाला आपल्याला व लोकांना ह्याचा खूप फायदा झाला आहे. ग्राहकाला कमी किंमतीत उच्च दर्जाच्या वस्तु मिळतात. आपल्याला पूर्ण जगातील व्यापारी ग्राहकांशी संपर्क करून आपल्या वस्तु व सेवा देता येतात. ग्राहकापर्यंत लोकांपर्यंत आपल्या विविध वस्तुंची व सेवांची माहिती पुरविता येते. तसेच या सर्व सेवा ३६५ दिवस पूर्ण आठवडाभर व दिवसाचे २४ तासामध्ये केव्हांही पुरवता येतात. तसे कमी तुलनात कमी

वेळामध्ये हया सर्व सेवा जगातील व्यापारी व ग्राहकांना पुरविल्या जातात. माहिती व तंत्रज्ञानाच्या व जागतिकीकरणाच्या या काळामध्ये ई-कॉमर्स ही इंटरनेटची सेवा अत्यंत महत्त्वाची आहे.

## Technology in Physical Education and Sports

**Dr.Suhas Raghunath Tiwalkar**

Assistant Professor,  
HVSKM, College of Physical Education  
P-10, MIDC, Lohara, Yavatmal. (MS)

### Introduction:-

Technology is all around us, it involves every aspect of Physical Education, from the shoes the students wear to the sports equipment used during the game. The introduction or emerging of digital technologies in Physical Education does not seek to replace physical activity rather it aims to help explore physical activity. Technology is like any other tool in the Physical Education which is a teacher's toolkit which is useful whenever the situation demands it and not just for the sake of it. This is the same thing which is tried to achieve in Physical Education, albeit with students rather than sports stars.

### Technology & Physical Education:-

Physical education should avail themselves of these technological opportunities given below to make their lessons more real and dynamic.

1) **Video Camera:-** The first and most essential tool for a Physical Education teacher. No other camera is as simple to record video footage, making it a snap to film and analyse sporting techniques and game play.

2) **MP3 Player/Recorder:-** With the abundance of MP3 players today one can be sure to be able to buy an excellent player full of features for a small price .One can purchase a player with the ability to play and record mp3 files and connect to the radio. One of the ways it can be utilised is within classroom to create podcasts or recordings of own teaching that can be loaded onto the MP3 player for review at a later stage. This also allowed us to complete theoretical course content during a casual walk or ride around the lake. This really assisted the kinaesthetic learners who enjoyed the ability to move while they learned.

3) **Mobile Phones:-** Regardless of people's personal perceptions of mobile phones being timewasters, they are without a doubt the single most must-have item of today. It is now impossible to find a phone that is simply just a phone as it helps you to do every task at a touch in less time. This includes many more features like:-

a) **Calendar:-** Students can use the phone's personal calendar as a diary for recording important dates and information. It will help the students to realise whether any assessment is due.

b) **Clock/Stopwatch:-** The inbuilt stopwatch and alarm can be used to help organise and conduct time training sessions. In this application, students move from passive participants within a session to the role of trainers, as they are forced to organise the session.

c) **SMS:-** This feature can be used as a service to send bulk messages to more than one phone from one's laptop. It easily allows for instant communication with a large group or class. It makes last minute changes to the sports and makes outdoor education camp easy to communicate. It can be used as an alternative to paper and pen during a sports session or camp and have students answer questions based on their participation.

d) **Camera/Video Camera:-** It can be used within all practical sessions as a way to film and analyse performance instantly. Most phones even come with video editing software that allows students to edit their own footage.

4) **TubeChop.com:-** With the absolute plethora of videos on YouTube, it is a must for Physical Education teachers. The great thing about TubeChop is that it allows teachers to select a certain section from a YouTube video and share only that section.

5) **YouTube.com or Vimeo.com:-** Students can be told to teach a sport or physical skill and film it with a Flip Video camera for uploading to YouTube. One can see how people from around the world watch and comment on the video.

6) **Google Docs:-** A Google Docs spreadsheet contains simple formulas to work out and graph averages. For example students can be given to record heart rates pre, post and every minute after, for 5 minutes. After this, results are collated instantly from all computers within the room and displayed in one graph. This gives students a way to visualise their changes in heart rate activity in comparison with their peers in the form of graphs and formulas.

**Applications and other uses:-**

Many pieces of technology, such as heart rate monitors, pedometers and active games, have the ability to track performance, allowing students to document and monitor their progress. However, physical educators must consider the reliability and validity of such devices when selecting the technologies to use. Students also should be well versed in using the devices, to prevent an increase in management time and a reduction in student activity levels.

Implementing technology appropriately into physical education can enhance teaching and learning and contribute to providing a quality physical education program. Technology can aid in content presentation and can help students becoming physically educated individuals who have the knowledge, skills and confidence to enjoy a lifetime of physical activity. Practical use of technology in the teaching and learning of physical education opines that the use of technology in the learning process of physical education may not be a goal of its own but it is a tool with which to reach objectives. The following are the uses of technology in learning physical education.

**1) Computer:-**

Computer is an electronic device that has the capacity to store, retrieve and process both qualitative and quantitative information fast and accurately. Computers are used to produce documents, lesson plans, to convert scores management. It also involves video units PC heart rate monitor, remedy heart rate monitor and educational software. Computer also aid learning experiences when they are used for motion analysis. This involves using computer to examine the way learner moves and then determine ways in which this movement can be improved in a practical physical education class. This device stresses how human motor abilities can be perfected and controlled. For example if you ask a softball pitcher how he/she throws a fastball, they may not be able to tell you. Motion analysis visually shows the rudiments and sequence of actions involved in arm, leg movements to enhance performance of skills. Video tape images are also transferred into computers. Special application software analyzes the images. It measures the exact angle at which the player is holding his or her arms and legs. The speed and efficiency of each movement is measured. When using images, the teachers' advantage consist in his possibility of making corrections as soon as pupils exercise is completed, which him to quickly progress and improves his learning. Other computer software such as the programmes Professional Evolution Soccer (PES) is used to play games. Learners play, identify appreciate the skills, rules and evaluate officiating of the game.

**2) Internet:-**

Internet is a global system of interconnected computer networks that promotes free flow of information by packet switching using the standardized internet protocol suit. It is a network that consist of millions of private and public academic business and government network of local global scope that are linked by copper wires, fiber-optic cables and wireless connections technologies. The internet provides various information resources and services which can be used by physical educators for teaching and learning. They include electronic mail, online chat, electronic transactions, and bulletin board, file transfer and file sharing, online newspapers, arid journals, online gaming and inter linked hyper text documents and other resources of the worldwide web. Physical education teachers share experiences with other professionals via the internet which are integrated into teaching lessons. Students explore new knowledge as they surf the web for assignments, chat with fellow students and play games online. The internet can be used to maximize the effectiveness their learning process of physical education. Students have the possibility to email their questions or comments concerning their questions concerning issues in health and audition fitness, physical education programmes, courses to their physical education teachers and academic staff. Internet is used access a machining list of professionals in the same area of study. A user sends an email message to like mailing list which is broadcast to other users for accessing current information. Examples are the sports philosophy and Questa lists.

**3) Internet Chat:-**

Interactive chat improves communication with experts and colleagues and community members. Chat allows fellow physical educators to simultaneously communicate publicly on website, internet and extranet. Team members, class and course mates from different locations can easily conduct on line meetings. Colleagues gather together to intimate groups and discuss issues related to physical educations. They could gather in large online events to interact with expert's celebrities, instructors, coaches and teachers can assess chat groups on particular academic issues in physical education and sports.

**4) Video Conferencing:-**

It allows two or more people at different locations to see and hear each other at the sometime. The communication technology offers new possibilities for sport colleges, libraries including formal instruction to share strategies for coaching sport skills. A very attractive multimedia tool determining students' enthusiastic participation in physical education lessons is represented by the audio aids. Direct or indirect aids such as

drums, piano respectively. Radio cassette recorder equipped with CD/DVD can be used to relive the movement pace and get students familiarized, with some sonorous competitive conditions. The digital camera use in the instructive educative process allows a quick verification of students' placement and posture, being at the same time a very good mean to stress body segment positions when performing sonic motor elements. These are the potentials used to enhance teaching and learning of physical education.

### Challenges of technology in Physical Education:-

Although technology has attractive potentials for improving teaching of physical education, it also has challenges especially in developing nations of the world. Physical educations are not technology compliant. The reports indicate that many do not still appreciate the use of technology in teaching and learning and complaint. Nowadays, it is uncommon to see physical education computers in classroom and on sport playground. These could be either ignorance of technology use or affordability of technology devices. Similarly most educational institutions do not provide enough funds for equipping schools with technological devices. Technological devices are becoming more and more mobile and affordable and this could eventually turn into a reality making the study of human movement in physical education a reality. Other challenges include the availability of regular power supply, staff training and development on technology software; assessing software and packages for teachers. Other challenges include crashing of computers and corruption of files.

### Conclusion:-

Physical education essentially requires the performing physical activity. This is associated with the development of motor skill. Physical education within the school system requires time, facility space and interactive lesson plans. Technology provides access to information, compresses information, motivate learners, and connect learners to teachers and teacher to the colleagues. There are nowadays many available technological innovations that could be inserted into the physical education lesson. The visual physical education lesson is essentially based on the connected learning environment which uses technology that is networked in structure. Physical education should avail themselves of these technology opportunities to make their lesson more real and dynamic.

## Celebrity Endorsement : A Review of its Effectiveness in Advertisements

**Mr. Shrikant B. Diwan**  
Ph.D. Student

**Dr. Suresh S. Kawitkar**  
Associate Professor  
Department of Management Studies,  
Vidya Bharti Mahavidyalaya, Amravati

### Abstract:

*Celebrities are a hot property today. Everyone wants to be associated with a celebrity. The ad world, not being an exception, is also cashing on the star value of celebrities. 'Celebrity Endorsements' has become a visible trend in advertising where stars are trying to lure viewers into buying product and services, from cigarettes to life insurance. Over the years advertising has come up with many strategies to market their goods to the consumers. Companies want their brands to be on the top of all shopping lists. One of the most effective methods of doing so has been celebrity endorsements. This paper tries delves in his area through literature review and a qualitative research undertaken in the Indian context.*

*Keywords: Celebrity Endorsement, Advertisement*

### Introduction

Celebrities have certain qualities which consumers feel a need to connect to and this is why the attractiveness is built. It helps to generate interest in their brands in all demographics Celebrities can sell almost anything. They have been and will be used to sell all kinds of products over the years. Big movie stars and sports stars have specially been advertisers favourite when it comes to endorsements. It is remarkable to know, how much analysis is required before a celebrity is chosen and used to sell a brand. The journey through the world of celebrity endorsements is enlightening. It helps to see the ads beyond the star value of the celebrity used. The visible and not so visible demerits of celebrity endorsements are all up to how the endorsement is handled. Sometimes, a good brand uses a celebrity ineffectively, and there are times when a smaller brand does extremely well with good use of a celebrity endorser. It is not fair to blame the celebrities for the failure of endorsement deals. It all boils down to the strength of the idea which constitutes the ad and how well has the celebrity been used to add spice to those ideas.

Whatever the reasons, the reality is that celebrities can - and do - play a role in building brands. A good celebrity coupled with a great idea can never go wrong. Making the right choices in terms of personality, values, associated emotions and code of conduct is critical.

Celebrities come into view in open in unusual ways. Primarily, they emerge in open while gratifying their profession. Besides, celebrities emerge in open in order to attend special celebrity events such award ceremonies or premieres of movies. Apart from these, celebrities are in attendance in news, fashion magazines, and tabloids, which make available second source information on events and the private life of celebrities by the means of mass-media channels. Finally, celebrities act as spokesperson in advertising to endorse products /services of companies.

The main purpose for selecting this topic for research was to understand how the celebrity endorsement has changed over the years and how it has gained so much importance in modern age. To understand, why various businesses have chosen celebrities as to convey their product to the consumers and to make a right decision to buy a product. Today from cars to cycles, soft drinks to liquors, chyawanprash to chocolates everything is being sold by a celebrity. It seems the corporate world cannot sell anything without them.

### Research Methodology

This study is to understand and evaluate the effectiveness of celebrity endorsement as branding strategy in the current world advertising. The research was conducted in relation to companies in India that use celebrity endorsement frequently as a key advertising tool. The research work is mostly based on the information collected through -

- Journals, books and articles assessed through the British Council library
- Newspapers
- Hoardings and Billboards.
- Internet

**Objectives of Study**

The research was conducted based on following objectives:

- To identify and evaluate the strategies of companies using celebrity endorsement as advertising strategy
- To evaluate the positive effects of celebrity endorsement as advertising strategy
- To evaluate the negative effects of celebrity endorsement as advertising strategy

**Literature Review****Advertising: The concept and Evolution**

“Advertising is a key institution of socialization in modern/postmodern society, fueled by the perennial struggle to market goods and services and by the development of a multimedia environment. Advertising images increasingly pervade our everyday lives, bombarding us with snapshots of what we supposedly lack and what we need to fill the void. What we supposedly lack typically has more to do with the life styles, looks and aspirations. Advertisers seek to associate with the products they are trying to sell, than with the inherent qualities and attributes of the products themselves”. This signifies that advertising is a medium of socializations that took air in a modern or better to say post-modern multimedia environment for marketing goods and services.

**Advertising Influences on Audience**

Every year marketers spend billions of dollars on advertising, targeting people in their home country and potential customers abroad. While there is clearly a need to design or adapt advertisements to suit the needs of diverse national markets, there is also an urge to standardise advertisements, not only to reduce costs but also to facilitate global product positioning.

**Advertising Effectiveness**

The research literature releasing advertising effect manifest that finding new ways to translate a product's tangible features into customers' key benefits, or to translate benefits into personally relevant feelings and values, is vital to creating advertising which is exciting and cohesive with a brand's chosen positioning. The focus of anycommunication with customers must be on the lasting product/brand related meanings formed in the customer's memory. This focus will not only help to build messages that contribute to a stronger brand image and positioning but will also help to pre-empt the creation of messages which, in isolation, may be "good ads" but in a holistic perspective dilute the positioning of the brand and confuse the brand image. The researches have come from the experiences of the individual, in their everyday behavioural activity. In excess of 50% of all individuals are engaged in various combinations of media through the day, whether it is being online and watching TV, listening to the radio and being online, reading a magazine and watching TV, reading the newspaper and watching TV, or reading a magazine and being online, etc.

**Celebrity Endorsement**

Two dissimilar definitions of celebrity endorser are cited in research literature. Friedman and Friedman and McCracken provides these definitions.

Defining celebrity endorser, they put that a “celebrity endorser is an individual who is known by the public for his or her achievements in areas other than that of the product class endorsed.

Further, defining celebrity endorser, “celebrity endorser is any individual who enjoys public recognition and who uses this recognition on behalf of a consumer good by appearing with it in an advertisement”.

But, the most useful definition of endorsement has provided by Erdogan, who defines endorsement or celebrity marketing as “a phenomenon where celebrities lend their image to brands”. Endorsements typically involve three part takers; sellers, endorsers and target consumers, where the seller requests the endorser to use or assess the product, the endorser undertake the product, the endorser pushes for the activity that utilizes a celebrity to endorse a product in advertising. Therefore, celebrity endorsement turns out to be an advertising strategy among many others such as sales promotion, public relations, direct marketing etc.

Celebrities are a group who benefit from people acknowledgment by a big share of a definite crowd of people. Some of the common features of celebrity are identified as charisma, astonishing lifestyle or particular skills, however, these are just instances of some specific features and there is no guarantee that people who possess are celebrities. In this context it requires to be cleared that within a parallel social group celebrities usually vary from the social rule and take pleasure in a high degree of people responsiveness.

Celebrities come into view in open in unusual ways. Primarily, they emerge in open while gratifying their profession. Besides, celebrities emerge in open in order to attend special celebrity events such award ceremony or premieres of movies. Apart from these, celebrities are in attendance in news, fashion magazines, and tabloids, which make available second source information on events and the private life of

celebrities by the means of mass-media channels. Finally, celebrities act as spokesperson in advertising to endorse products /services of companies. Celebrities come from different walks of life.

In India the celebrities from different walks of life can be identified as following:

### Advantages of Celebrity Endorsement

Companies or brands have been taking advantage of celebrity appeal for a long time and noticeably in whatever categories, whether it is product or services, more and more companies or brands are relying on the heap appeal of celebrities. Therefore, no wonder as Katyal puts as soon as a new face goes up the popularity charts, advertisers line up to have it streaked all over. In Indian perspective Katyal mentions stunning rise of Sania Mirza and Irfan Pathan in endorsements in a few months as such stances. Katyal argues that the accrument of celebrity endorsements can be said acceptable considering the following advantages that are conferred to the brand in general:

**Establishment of Credibility:** It is argued that endorsement of a brand by a star promotes a sense of trust for that brand amongst the target audience and this is particularly accurate in case of new products. As mentioned in the case of the Shahrukh -Santro campaign. At launch, Shahrukh Khan endorsed Santro and this certified that brand awareness was created in a market, which did not even know the brand.

**Ensured Attention:** It is argued that that celebrity certifies awareness of the target group by defiance, the clutter of advertisements and making the advertisement and the brand more perceptible.

**PR coverage:** It is argued that managers recognize celebrities as contemporary, which create high PR coverage.

**Higher degree of recall:** It is argued that people be inclined to proportionate the behaviours of the celebrity with the brand thus increasing the recall value.

**Associative Benefit:** It is argued that a celebrity's penchant for a brand gives out a convincing message since the celebrity is benefiting from the brand, the consumer will also benefit.

*Mitigating a tarnished image:* It is argued that celebrities have guts to reinvent the consumers' confidence in a lost brand. For example, Cadbury India sought to reinstate the consumer's confidence in its chocolate brands following the high-pitch worms' controversy; thus the company appointed Amitabh Bacchan for the job.

**Psychographic Connect:** It is argued that celebrities are respected and treasured by their fans and advertisers use stars to take advantage of these feelings to bend the fans towards their brand.

**Demographic Connect:** It is argued that diverse stars appeal in a different way to various demographic segments such as age, gender, class, geography etc.

**Mass Appeal:** It is argued that some stars have a widespread appeal and consequently bear out to be a good bet to produce curiosity among the masses.

**Rejuvenating a stagnant brand:** It is argued that with the objective of infusing new life into the sluggish products celebrity endorsement proves resulting. For example, chyawanprash category and staving off competition from various brands, Dabur India roped in Bacchan for an approximate Rs 8 crore market.

### Disadvantages of Celebrity Endorsement

A number of advantages have been discussed above of using celebrity endorsement and it appears that celebrity endorsement is all about leveraging, but like other aspects it also engrosses disadvantages with it. Katyal highlights some serious and relevantly cited advantages of celebrity endorsement as following:

**The reputation of the celebrity may derogate after he/she has endorsed the product:** It is found that as the behaviour of the celebrities reflects on the brand, celebrity endorsers may at times become liabilities to the brands they endorse.

**The vampire effect:** It is argued that if there is no congruency between the celebrity and the brand, then the audience will memorize the celebrity and not the brand.

**Inconsistency in the professional popularity of the celebrity:** It is argued that the celebrity possibly will mislay his or her popularity due to some lapse in professional performances.

**Multi brand endorsements by the same celebrity would lead to overexposure:** It is found that the originality of a celebrity endorsement gets watered down if he/she does too many advertisements, which can be worded as *commoditisation of celebrities*, who are eager to endorse anything for big bucks.

**Celebrities endorsing one brand and using another (competitor):** It is argued that celebrities dubiousness regarding endorsing one brand and using another brand hurts the endorsement expectations.

**Mismatch between the celebrity and the image of the brand:** It is argued that as celebrities manifest a definite character for the audience, it becomes of vital importance that there is an unrestricted congruency between the persona of the celebrity and the image of the brand, as every celebrity portrays a broad range of meanings, consisting a specific personality and lifestyle.

## Findings & Conclusions

The findings of the previous researches manifest that advertising is effective in finding new ways to transfer a product's/service's tangible features into consumers key benefits. It also substantiate this fact concluding that advertising is effective in finding new ways to transfer a product's/service's tangible features into consumers key benefits, as respondents in greater majority observe that advertising is effective in finding new ways to transfer a product's/service's tangible features into consumers key benefits. The collected data clearly suggest that respondents in greater majority observe that advertising is effective in finding new ways to transfer a product's/service's tangible features into consumers key benefits. It can be concluded that celebrity endorsement has emerged as a key advertising strategy for companies. Today as more and more companies are opting to advertise their products through celebrity endorsement strategy and therefore this form of advertising strategy is winning over time –honored advertising strategy. As is evident, celebrity endorsement is effective (sometimes greatly and sometimes moderately) comparing to other old-established advertising strategy. Further, it can be surmised that advertising agencies or companies can take advantage of celebrity endorsement in their advertising effectiveness focusing on the particular characteristic of celebrities. The characteristics are highlighted as charisma, astonishing lifestyle or particular skills. The findings of the previous literature in this context manifest that principally charisma and particular skills as characteristics of celebrities are most effective while using them in advertising.

The advantages of celebrity endorsement as advertising strategy are found in the forms of establishment of credibility, higher degree of recall, mass appeal, psychographic connect, mitigating a tarnished image and others. The qualitative data collected summarizes that mass appeal and establishment of credibility are the most advantageous aspect of celebrity endorsement as advertising strategy. Further, the disadvantages of celebrity endorsement as advertising strategy are found in the forms of **inconsistency in the professional popularity of the celebrity, multi brand endorsements by the same celebrity would lead to overexposure, mismatch between the celebrity and the image of the brand, the vampire effect, and** others. In these contexts, the findings of the present research manifest that mismatch between the celebrity and image and multi-brand endorsement by the same celebrity are the most disadvantageous aspects of celebrity endorsement.

## सबाल्टन इतिहास लिहण्यासाठी सोशल मिडीयाचा उपयोग

डॉ. प्रमोद रामेश्वर चव्हाण

सहकार महर्षी स्व. भास्करराव शिंगणे,  
कला महाविद्यालय, खामगांव जि. बुलढाणा

### प्रस्तावना :-

इतिहास लेखनातील नविन विचार प्रवाह जेव्हा फक्त राजे, सम्राट, महाराजे, सरदार, जमीनदार याबाबतच लिखाण होत असे तेव्हा समाजातील उत्पिडीत सामान्य नाकारल्या गेलेल्या व स्त्रिसमस्येविषयी व अधिकाराविषयी लेखनाची आवश्यकता इतिहासकारांमध्ये निर्माण झाली. हा शब्द तसा सैन्यातील कनिष्ठ अधिकाऱ्यासाठी वापरल्या जात असे इटालियन विद्वान अंतोनियो ग्राम्शी आपल्या प्रिजन नोटबुक्स सबाल्टन ची व्याख्या स्पष्ट केली त्यांनी सबाल्टन पदाचा उल्लेख समाजातील गौण, पददलीत, उत्पिडित लोकांसाठी वापरला भारतातील प्रसिध्द इतिहासकार रणजीत गुहा, पार्थ चॅटर्जी यांनी सबाल्टन इतिहास लेखनाला चालना दिली. या सबाल्टन इतिहास लिहण्यासाठी आजच्या २१ व्या शतकात सोशल मिडीया प्रभावी साधन आहे.

### शोध निबंधाची उदीष्ट्ये

- १) सबाल्टन इतिहासाची आवश्यकता स्पष्ट करणे.
- २) सबाल्टन इतिहास लेखनातील सोशल मिडीयांचा उपयोग स्पष्ट करणे
- ३) इतिहासाचे साधन म्हणून सोशल मिडीयाचा प्रभाव स्पष्ट करणे.

### शोधन निबंधाची उद्दिष्ट्ये :-

- १) सबाल्टन इतिहासाची आवश्यकता स्पष्ट करणे
- २) सबाल्टन इतिहास लेखनातील सोशल मिडीयाचा उपयोग स्पष्ट करणे.
- ३) इतिहासाचे साधन म्हणून सोशल मिडीयाचा प्रभाव स्पष्ट करणे.

भारतीय इतिहासकार रंजीत गुहा व पार्थ चॅटर्जी यांनी राष्ट्रवादी इतिहास लेखनावर आक्षेप घेतला. भारतात काही बाबी स्वलंब आहे. व राष्ट्रात प्रभावी आहेत केवळ राष्ट्रवादी इतिहास लिहून अशा प्रभावी पणे उपेक्षित वर्गाच्या इतिहासाकडे दुर्लक्ष करणे इष्ट ठरणार नाही. म्हणूनच पार्थ चॅटर्जी सारख्या इतिहासकाराने भारताचा अखंड इतिहास लिहण्यापेक्षा खंड प्रदेशाचा इतिहास लिहला पाहिजे हे स्पष्ट केले.<sup>१</sup> आज शेतकरी कामगार समस्या ह्या महाराष्ट्रातील देशातील मुलभूत समस्य आहेत म्हणूनच रंजीत गुहा स्पष्ट करतात की, शेतकऱ्यांचा इतिहास केवळ विषयवस्तु नाही तर स्वतःच एक इतिहास आहे.<sup>२</sup> आजच्या युगात फेसबुक , ट्विटर, व्हॉट्सअप इत्यादी सोशल मिडीयाचा वापर करून सबाल्टन इतिहास उजेडात आणता येतो. शेतकरी आत्महत्या व त्यातून निर्माण झालेल्या सामाजिक, राजकीय चळवळी इतिहासाचा एक भाग आहे. आज ही चळवळ लिखित करण्यासाठी सोशल मिडीयाचा वापर होवू शकतो तसेच सबाल्टन इतिहास लिहीतांना सोशल मिडीयाचा वापर आपण करू शकतो BBC NEWS च्या FACEBOOK LOGIN वर बी. बी. सी. ग्रुप च्या फेसबुक पेजवर एकाच दिवशी मराठवाड्यातील आज शेतकऱ्यांनी आत्महत्या केल्याचे स्पष्ट होते.<sup>३</sup> शेतकरी आत्महत्या व त्यातून निर्माण झालेल्या चळवळी इतिहास लेखनाचे साधन आहेत. वृत्तपत्र, फेसबुक Whatsapp यावर शेतकरी नेते सक्रीय आहेत जनसामान्य घरातून आलेल्या जनसामान्य माणूस चळवळीच्या माध्यमातून राष्ट्रीय राजकारणापर्यंत पोहचतो जेव्हा जेव्हा शेतकरी चळवळीचा इतिहास लिहल्या जाईल तेव्हा सोशल मिडीयाचा उपयोग होतो.

मंदिर चळवळी, स्त्रीयांच्या प्रवेशाचा मुद्दा होवून अनेक सामाजिक कार्यकर्ते आज आंदोलन करत आहेत यु ट्युबच्या माध्यमातून शबरीमाला मंदिर प्रवेशाची संपुर्ण माहिती मिळते.<sup>४</sup> २ जानेवारी २०१९ ला दोन महिलांनी मंदिरावर प्रवेश करून या आंदोलनाची सुरुवात केली.<sup>५</sup> कोर्टाने प्रवेशाला मान्यता दिली. बिंदु आणि कनगादुर्गा या चळवळीच्या प्रवर्तक आहेत. २ जानेवारी २०१९ रोजी यांनी सकाळी ३.४५ ला मंदिरात प्रवेश केला.<sup>६</sup>

संपुर्ण सोशल मिडीया, फेसबुक , ट्विटर यावर याचे पडसाद उमटले स्त्री चळवळीचा इतिहास लिहीतांना, त्यांचे सामाजिक चळवळीतील योगदान अभ्यासतांना निश्चितच सोशल मिडीया प्रभावी साधन असेल. दिल्लीतील निर्भया सामुहीक बलत्कार प्रकरण संपुर्ण भारतातील निंदनिय घटना होती. या प्रकरणात हजारो सामाजिक कार्यकर्ते, सामाजिक संघटना, स्त्रीयांचा संस्था व संघटना, शाळा महाविद्यालयातील मुले मुली प्रचंड मोठ्या संख्येने या बलात्काराविरोधात उभे राहिले.

स्त्रियांवरील अत्याचार कदापी सहन केला जाणार नाही या अन्यायाविरूद्ध संपूर्ण देश पेटून उठल्यामुळे पिडीतांचा आवाज फेसबुक, यु ट्युब, व्हॉट्स अॅप ट्विटर इत्यादीवर दिसला. सामाजिक इतिहास लेखनात उत्पीडीतांचा, शोषितांचा व यांच्या न्याय हक्कासाठी लढणाऱ्या संस्थांचा, सामाजिक कार्यकर्त्यांच्या कार्याचा इतिहास लिहीतांना सोशल मिडीयाचा उपयोग होतो अन्यथा अशी अनेक प्रकरणांवर लिखित न झाल्यामुळे वंचितांचा आवाज बाहेर येवू शकला नाही. पण सोशल मिडीयामुळे तो बाहेर प्रभावीपणे पोहचला.

बदलत्या आर्थिक राजकीय व्यवस्थेमुळे शेतकरी आत्महत्या ही भारतातील खुप मोठी समस्या व्यथा आहे. शेतकरी संघटना, सामाजिक संस्था यांनी शेतकऱ्यांच्या प्रश्नासाठी प्रचंड आंदोलन भारतात घडून आले फेसबुक, युट्युब, ट्विटर, व्हॉट्स अॅप इत्यादीच्या माध्यमातून शेतकरी प्रश्नावर प्रचंड जागृती जनमानसात निर्माण झाली आजही या वंचित शेतकऱ्यांचा आवाज इतिहासाच्या पानावर लिहिण्यासाठी सोशल मिडीया प्रमुख साधन आहे. सबाल्टन इतिहासासाठी इतिहासाचे साधन म्हणून सोशल मिडीया इतिहासकाराला सहाय्य व प्रेरणा देईल. शेतकरी कर्जमाफी, सिंचनासाठी कर्ज उपलब्ध करणे, केंद्र व राज्य सरकारी अंदाजपत्रकात कृषीविषयक सुचना धोरणाचा अंतर्भाव करणे हे सोशल मिडीयाचे यश म्हणावे लागेल.

### सारांश :-

सोशल मिडीया हे इतिहास लेखनातील साधन होवू शकते. इतिहास लपवून ठेवण्याचा दुर्बल, शोषित, पिडीत, शेतकरी, शेतमजूर, महिला, कामगार या समाजातील उपेक्षित परंतु इतिहास घडवणाऱ्या, बदलणाऱ्या घटकांचा इतिहासातून बाद करण्याचा प्रकाराला सोशल मिडीयामुळे आळा बसू शकतो. पुराव्यांचे अन्वेषण आधारे सबाल्टन इतिहास लेखनाची एक नवी परंपरा इतिहास लेखनात आणल्याची जबाबदारी इतिहासकारात आहे. त्याचे पालन करून निश्चितच सबाल्टन इतिहास सोशल मिडीयाचा माध्यमातून लिहीला जाईल.

## भारतातील बेकारी, बेरोजगार, समस्या व उपाय

प्रा.डॉ. ज्योत्सना संभाजी पुसाटे,  
गृहअर्थशास्त्र विभाग प्रमुख,  
जे.डी. पाटील सांगळूदकर महाविद्यालय, दर्यापूर

## संक्षिप्त

डॉ. बाबासाहेब आंबेडकर यांच्या मते, “राजकीय लोकशाहीला सामाजिक लोकशाहीचा आधार असल्यावाचून ती कधीही टिकू शकणार नाही” भारतीय समाज व्यवस्था अभ्यासता डॉ. बाबासाहेब आंबेडकर यांचे वरील मत तंतोतंत खरे आहे. सर्वांना समान न्याय हा त्या पाठीमागील उद्देश होय. सर्व नागरिकांना काम मिळणे, रोजगार मिळणे, रोजरोटी मिळणे या मूलभूत हक्कांमध्ये माणसांच्या अपव्यापार आणि वेठबिगारी यांना मनाई तसेच बालकांकडून काम करून घेण्यास सुध्दा मनाई करण्यात आलेली असून, सामाजिक स्वास्थ्यासाठी बेरोजगारांना रोजगार प्राप्त करून देणे, उपलब्ध करून देणे हे शासनाचे कर्तव्य भारतीय राज्यघटनेने सांगितलेले आहे. बेरोजगारी हा कलंक आहे. तो देशाचा आर्थिक, सामाजिक, सांस्कृतिक, शैक्षणिक व मानसिक विकासानेच मिटविता येऊ शकतो.

## प्रास्ताविक

मानवी जीवनावर सर्वाधिक परिणाम हा पर्यावरणाचा होत असतो. सामाजिक स्थिती, जीवन पध्दतीवर सुध्दा पर्यावरणाचा परिणाम होत राहत असतो. सामाजिक स्वास्थ, चांगले राहावे, त्याची सुदृढता टिकून राहावी म्हणून सर्वांना समान न्याय मिळणे आवश्यक आहे. काम मिळणे, रोजगार मिळणे हा नागरिकांचा हक्क बनतो म्हणून रोजगार किंवा काम मिळवून देणे शासनाचे कर्तव्य आहे. बेरोजगारांच्या अधिकतम संख्येमुळे विविध समस्या समाज, राष्ट्रात निर्माण होऊ शकतात. कारण रोजगार हातात नसलेले लोक यांना बेरोजगार असे संबोधले जाते. भारतात लोकसंख्येचे प्रमाण वेगाने वाढत राहते. त्या प्रमाणात कामे रोजगार उपलब्ध होत नाही, म्हणून बेरोजगारांची समस्या वाढते. बेकारी म्हणजे अशी स्थिती की, जिथे व्यक्ती प्रचलित दराप्रमाणे मजुरी किंवा काम करण्यास तयार होतो, परंतु त्यांना काम उपलब्ध होत नाही. अशा बेकारीमुळे देशाच्या अर्थव्यवस्थेला, सुरक्षिततेला धोका निर्माण होतो व विविध समस्या त्यात बेरोजगारीची समस्या, गरिबी, दारिद्र्य, निर्माण होत राहते म्हणून बेरोजगारांना रोजगार उपलब्ध झाला पाहिजे.

## १) बेरोजगारा (बेकारी) ची व्याख्या

बेकारीची व्याख्या करतांना कार्यकारी लोकसंख्या लक्षात घ्यावी लागते. लोकसंख्येतील ० ते १४ वयोगट व ज्येष्ठ नागरिक इ.घटक वजा केल्यावर जी लोकसंख्या शिल्लक राहते. अशा वय १५ ते ६५ वर्षांपर्यंतच्या कार्यकारी लोकसंख्या होय. अशा कार्यकारी लोकसंख्येला काम उपलब्ध न होणे म्हणजे बेरोजगार होय. थोडक्यात “प्रचलित मजुरीच्या दरावर काम करायला तयार असणारी लोकसंख्या म्हणजे बेरोजगार होय.”

मनुश्यास मानव साधन संपत्ती मानले गेलेले आहे. बेरोजगारीमुळे देशातील मानव साधनसंपत्ती मानले गेलेले आहे. बेरोजगारीमुळे देशातील मानव साधन संपत्तीचा अपव्यय होतो. साधन संपत्तीचा अपव्यय होऊ नये म्हणून, बेरोजगारांना काम मिळून देणे हे राष्ट्राचे कर्तव्य आहे.

## २) बेकारीचे प्रकार

अ) अनैच्छिक बेकारी ब) ऐच्छिक बेकारी क) न्यून किंवा अर्ध बेकारी ड) पूर्ण बेरोजगारी

## अ) अनैच्छिक बेकारी

अनैच्छिक बेकारीला दृश्य किंवा उघड बेकारी असेही म्हणतात. याचा अर्थ लोकांची काम करण्याची पात्रता असते, सोबत काम करण्याची इच्छा सुध्दा असते. परंतु काम, रोजगार प्राप्त होत नाही, म्हणून अशा बेकारीला, ‘अनैच्छिक बेकारी— असे म्हणतात.

काम करणाऱ्यांचा, श्रमांचा अतिरिक्त पुरवठा व त्या तुलनेत श्रमिकांची, उपलब्ध कामाची कमतरता यातून बेरोजगारांची समस्या निर्माण होत राहत असते. यामध्ये एक बाब लक्षात येते की, माणसांची योग्यते प्रमाणे काम तर मिळत नाही, त्याच बरोबर तशी मानसिकता नसतांनाही, असेल ते काम, कमी दरात किंवा

कमीत कमी मोबदल्यात काम करणे, त्यामुळे नागरिकांचे रोजगाराच्या हक्कांचे उच्चाटन होत राहते. आर्थिक अडचणी निर्माण होतात व अडचणी व बेकारीचे, बेरोजगारांचे प्रमाण वाढत जाते.

ब) ऐच्छिक बेकारी (निष्क्रीयता)

जेथे नागरिक काम करण्यासाठी पात्र असते, परंतु तिची काम करण्याची इच्छा नसते, म्हणजे आपल्या मनाप्रमाणे, इच्छेप्रमाणे काम मिळाले नाही, तर असे लोक बेरोजगार राहणे पसंत करतात, अशा बेकारीला ऐच्छिक बेकारी असे म्हणतात. खऱ्या अर्थाने, अशी बेकारी, बेरोजगार म्हणजे निष्क्रीयता होय. निष्क्रीयता किंवा आळस हा माणसाचा, समाजाचा, राष्ट्राचा शत्रु असतो.

क) अर्धबेकारी किंवा न्यून बेकारी :-

अर्ध बेकारी किंवा न्यून बेकारी म्हणजे व्यक्तीची काम करण्याची क्षमता पूर्णपणे न वापरता, तिची कनिष्ठ पातळीवर काम करावे लागते उदा. पदव्युत्तर सुशिक्षितांना चपराशी किंवा पहारेकऱ्याची नोकरी करणे. सुशिक्षित लोकांचे वेगाने प्रमाण वाढल्याने व त्या प्रमाणात तशा प्रकारचा रोजगार उपलब्ध न झाल्याने अशी परिस्थिती निर्माण होते.

ड) पूर्ण बेरोजगारी

व्यक्तीकडे पात्रता, कौशल्य, इच्छाशक्ती असताना, कोणत्याच ठिकाणी, कोणत्याच प्रकारचे काम त्यास प्राप्त न होणे म्हणजे पूर्ण बेरोजगारी होय.

सर्वसाधारणतः अधिकतम लोकसंख्या वाढीचा वेग देशात, प्रांतात, प्रदेशात, देशात निर्माण होतो अशा देशात, पूर्ण बेरोजगारी निर्माण होते. उदा. भारतात लोकसंख्या वाढीचा वेग सर्वाधिक असल्यामुळे पूर्ण बेरोजगारी वाढत आहे.

३) भारतातील बेकारीची परिस्थिती

भारतीय समाजाचे स्वरूप अभ्यासता असे दिसते की, भारतातील लोक शहरात व ग्रामीण भागात वसाहत करून राहतात. भारतात ७० टक्के पेक्षा अधिक जनसमुह ग्रामीण भागात राहतो तर ३० टक्के पेक्षा कमी शहरी भागात राहतो. खेडे भागात शेती व गृहउद्योगावर आधारित आर्थिक जीवन पध्दती आहे, तर शहरात उद्योगधंदे व प्रशासनावर आधारित जीवन पध्दती आहे. भारतात ग्रामीण व शहरी भागात आज मोठ्या प्रमाणावर कामगारांना इच्छेविरुद्ध बेकारी आहे. बेकार राहवे लागते. हे निर्विवाद सत्य आहे. तसेच नेमके कोणत्या प्रकारचे किती लोक बेकार, बेरोजगार आहेत याचा अचूक अंदाज घेणे कठीण आहे. कारण नियोजन मंडळ व जनगणना अहवाल स्पष्ट नाही. तरीही शहरी व ग्रामीण भागातील बेरोजगारी, श्रमशक्तीच्या टक्केवारीत १९८३ साली ग्रामीण भागात ७.९ टक्के तर १९७७-७८ मध्ये शहरी भागात १०.३ टक्के बेरोजगारांचे प्रमाण होते. आज निश्चितच बेरोजगारांचे प्रमाण ग्रामीण व शहरी भागात १५ टक्के पेक्षा अधिक असावे, असा प्राथमिक अंदाज बांधता येतो. अर्थात, १० ते १५ कोटी किंवा त्यापेक्षा अधिक बेरोजगार देशात आहेत.

४) बेकारीची कारणे व समस्या

अ) लोकसंख्या वाढीचा अती वेग :- वाढती लोकसंख्या भारताला शाप आहे. विविध धर्म, विविध जाती, विविध परंपरा, विविध भाशा, विविध सामाजिक स्थिती यामुळे लोकसंख्या वाढीवर शासनाचे नियंत्रण नाही. देशात अंधश्रद्धा, व्यसनाधिनता, वेश्या व्यवसाय, बेकारी, दारिद्र्य, या सारख्या सामाजिक समस्या देशभर आहे. त्यामुळे लोकसंख्येचा वेग वाढत राहतो. मुले ही देवाची देण मानल्यामुळे लोकसंख्या वाढीचा वेग, गती जास्त आहे. नियोजन लोकसंख्या नियंत्रण, नित्यनियमित नाही, वातावरण लोकसंख्या वाढीला अनुकूल आहे. स्वातंत्र्यानंतर भारताची लोकसंख्या याच कारणामुळे वेगाने वाढत आहे. त्यामुळे श्रमशक्ती व शिक्षणामुळे बौद्धिक शक्ती वाढत आहे. त्याप्रमाणात देशाचा आर्थिक विकास मंद आहे. गती कमी आहे, त्यामुळे बेकारी वेगाने वाढत आहे. बेकारीचा विस्फोट होण्याच्या मार्गावर आहे.

ब) मागासलेली शेती :- आज २१ व्या शतकात जगाचा वेगाने विकास होत असताना, आपल्या देशातील शेती मशागत पध्दती, उत्पादन क्षमता इत्यादी स्वरूप मागास प्रकारचे आहे. अज्ञान व निरक्षरतामुळे आधुनिक पध्दतीने शेती केली जात नाही. बहुतांश पारंपरिक पध्दतीचा वापर केला जातो. त्यामुळे भुमिची उत्पादन क्षमता

कमी राहते. उत्पन्न कधी कधी खर्चापेक्षा कमी होते. त्यामुळे ग्रामीण भागात रोजगार वाढत नाही व पर्यायी रोजगार उपलब्ध नसतो. परिणामतः बेकारी व बेरोजगार वाढत राहते.

क) योजनाची कमतरता :- तुमचा जीवन जगण्याचा उद्देश जर 'उन्नतीचा मार्ग' असेल तरच विकास साध्य होतो आणि विकासाचा वेग वाढताच, बेकारी, बेरोजगारी, संपुष्टात येते. तुमच्या आर्थिक विकास योजना, पंचवार्षिक योजना भरभक्कम असेल, आणि त्या योजनेप्रमाणे कार्यशिलता असेल तर आर्थिक विकास साध्य होताच, विविध रोजगार उपलब्ध होतो व बेकारी, बेरोजगारी संपते योजने बरोबर नीतीची आवश्यकता असते. नीती आयोग स्थापन झाला असला तरी त्यांच्या ध्येय उद्दीष्टाप्रमाणे कार्यक्षमतेच्या कमतरतेमुळे आर्थिक मंदी येऊन बेरोजगाराचे प्रमाण वाढत राहते.

ड) नीतमत्तेची कमतरता :- भारतात कशाची कमतरता असेल तर ती आहे प्रज्ञा व नीतमत्तेची कमतरता, राष्ट्रीयत्व भावनेचा अभाव याच कारणामुळे देशात लोकसंख्या वेगाने वाढत राहून, बेकारी वाढत राहते.

### उपाय

- लोकसंख्या वाढीचा वेग कमी करण्यासाठी कसोटीने प्रयत्न करणे.
- परंपरा, श्रद्धा, दैववाद, अंधश्रद्धा समुळ नष्ट करण्यासाठी झटणे व झगडणे.
- सामाजिक, सांस्कृतिक, शैक्षणिक विकास साध्य करणे व भारतीय संविधानाप्रमाणे कार्यकुशल राहणे.
- आर्थिक नियोजन व त्याचा वेग वाढविणे.
- आधुनिक पध्दतीने शेती करणे, शेतीचा जी.डी.पी. वाढविणे.
- उद्योगधंदे व कारखाने, कुटीर उद्योगाचे प्रमाण वाढविणे.
- भ्रष्टाचार नीती संपुष्टात आणणे अधिक साधनसंपत्ती संग्रहास कायदेशीर मनाई करणे
- रोजगार नीती आयोगाची स्थापना करणे व बेरोजगाराची नोंद करणे.
- बेरोजगारांना बेरोजगार भत्ता देण्यात यावा.
- पंचवार्षिक योजना राबवून शेतीसाठी आवश्यक त्या पध्दती, घटक उपलब्ध करून देणे.

### निष्कर्ष

बेरोजगारी, बेकारी म्हणजे दुसरे-तिसरे काहीही नसून वाढत्या लोकसंख्येच्या प्रमाणात शेती विकास, आर्थिक विकासाचा वेग कमी असणे असे होय. पंचवार्षिक योजना नितीमत्ता, शैक्षणिक विकासाची कास धरून, देशाचा आर्थिक, सामाजिक, सांस्कृतिक मानसिक विकास होऊन, परंपरा, दैववाद, अंधश्रद्धा समुळ नष्ट झाल्या तर, लोकसंख्या कमी होऊन, आर्थिक विकास (जी.डी.पी.) वेग वाढून, देशाची परिस्थिती उत्तम, उन्नत बनू शकते. तरच बेकारी, बेरोजगाराची समस्या संपुष्टात येऊ शकते. सर्वोत्तम उपाय म्हणजे, साधन संपत्ती संग्रह, मर्यादित करणे होय.

मानवाने उपलब्ध नैसर्गिक साधन संपत्तीचा काटकसरीने व पर्याप्त वापर करण्याची गरज आर्थिक नियोजनात महत्वाची मानली गेली आहे. कारण नैसर्गिक संपत्ती मर्यादित असून ती वापराअभावी वाया जाण्याचा धोका असतो. जलसंपत्ती याच प्रकारात मोडत असून भारतासारख्या खंडप्राय व मोठ्या लोकसंख्येच्या देशात पाण्याचा वापर सुयोग्य पद्धतीने करणे आवश्यक आहे. भारतातील नदी जोड प्रकल्पाचा ताकिक पाया हा उत्तर भारतातील सतत येणाऱ्या पुरग्रस्त परिस्थितीतून सोडवणूक करणे आणि भारतातील विविध प्रवेशात कमी अधिक पडणाऱ्या पावसामुळे निर्माण होणाऱ्या समस्यांची सोडवणूक करणे हा आहे. भविष्यातील महायुद्ध हे जमीन व संपत्ती यासाठी होणार नाहीत तर मानवी कल्याणासाठी आवश्यक असणारे युद्ध व पाणी मिळविणे यासाठी होतील हे वास्तविक तथ्य आहे. भारतातील पाणी प्रश्न काही प्रमाणात शिथिल करावयाचा असेल तर नदीजोड प्रकल्पावर गांभीर्याने विचार व धोरणात्मक कृती करणे आवश्यक आहे.

उत्तर व उत्तर पूर्व भारतात वाहणाऱ्या नद्या दक्षिण भारतातील वाहणाऱ्या नद्यांशी जोडणे ही संकल्पना सुप्रसिद्ध अभियंता विश्वेश्वरय्या यांची होती. १९७५ मध्य कॅबिनेट मंत्री के. एल. राव यांनी नदीजोड प्रकल्पाबाबत गांभीर्याने विचार मांडला. १९७७ मध्ये भारतीय हवाई दलातील वैमानिक दस्तुर यांनी हवाई सर्वेक्षण करून गंगा व कावेरी या दोन नद्या जोडण्याबाबतचा नकाशा तयार केला. १९८२ मध्ये केंद्र सरकारने राष्ट्रीय जलविकास परिषदेची (NWDA) स्थापना करून नदीजोड प्रकल्पाचे प्रस्ताव तयार करण्याचे काम सोपविले. मात्र इ.स. २००२ पर्यंत यावर प्रस्तावाशिवाय उल्लेखनीय प्रगती झालेली दिसत नाही. नदीजोड प्रकल्पाबाबत एक जनहित याचिका सर्वोच्च न्यायालयापुढे विचारार्थ आलेली असतांना केंद्र सरकारला एक आदेश जारी करण्यात आला. त्यात भारतातील प्रमुख नद्यांची खोरी एकमेकांस जोडण्याविषयीचा कार्यक्रम तयार करण्याचा आदेश होता. याच काळात प्रसिद्ध शास्त्रज्ञ डॉ. ए. पी. जे. अब्दुल कलाम हे देशाचे राष्ट्रपती म्हणून निवडून आले. त्यांनी पुढाकार घेऊन श्री. सुरेश प्रभु यांच्या अध्यक्षतेखाली नदीजोड प्रकल्पाविषयक समिती गठीत केली. वर्तमान काळात भारतात पेरियार प्रकल्प, पेरंबिकुलम अरियार प्रकल्प, तेलगु गंगा प्रकल्प, इंदिरा गांधी नहर परियोजना, सरदार प्रकल्प यांचे प्रत्यक्ष उदाहरण असून दक्षिण विभागात १६ व हिमालय विभागात १३ प्रकल्प प्रस्ताव स्वरूपात व विकसित होत आहे.

### नद्यांची आंतरजोडणी प्रस्तावाचे उद्देश -

- १) नदीजोड प्रकल्पाचा उद्देश हा अतिरिक्त पाण्याचे साठे असणारे भौगोलिक प्रदेश आणि पाण्याचे दुर्भिक्ष असणाऱ्या प्रदेशामध्ये समन्वय निर्माण करणे हा आहे जेणे करून सिंचनाखालील जमिनीत वाढ होईल. त्यामुळे भारताची अन्न सुरक्षितता साध्य होईल. राष्ट्रीय संपत्तीचे जतन होईल आणि दुष्काळ व पुरसंशय परिस्थितीवर नियंत्रण मिळविता येईल.
- २) भौगोलिक दृष्ट्या भारत हा सर्वाधिक नैसर्गिक पाणी संपत्तीची प्राप्ती असणारा देश आहे. भारतात पावसाळा कालखंडात ४००० अब्ज क्युबिक मीटर पाण्याचे स्रोत उपलब्ध असले तरी त्यापैकी १८६० अब्ज क्युबिक मीटर पाणी नदी खोऱ्यातून समुद्रात वाहून जाते. त्यामुळे भविष्यात भारत हा पाण्याचे दुर्भिक्ष असणारे देश ठरेल. वाढती लोकसंख्या हा त्या प्रमाणात लोकसंख्येची पाणी विषयक वाढती मागणी, शेतीसाठी सुयोग्य सिंचनाचा प्रश्न यावर सकारात्मक भूमिका घेण्यासाठी योजनापूर्वक प्रयत्न करणे आवश्यक असून त्यासाठी नदीजोड प्रकल्पाची गरज आहे.
- ३) भारतातील उपलब्ध शेती व त्याच्या सिंचनासाठी लागणारे पाणी तसेच एकूण लोकसंख्या व त्यांच्या पिण्याच्या पाण्याची गरज यांचा विचार केला असता नैसर्गिक पाणी स्रोतासाठी अनुकूल असणाऱ्या भारतासाठी पाणी ही एक जटील समस्या असेल त्यासाठी नद्यांची आंतरजोडणी उपयुक्त ठरेल. जागतिक स्तरावर चीन, अमेरिका, श्रीलंका, सोविएत रशियानेही या दृष्टीने उल्लेखनीय प्रकल्प राबविलेले आहेत. एकाच वेळी पुरामुळे होणारी मानवी व वित्तहानी व त्याचवेळी अन्य प्रदेशात पाण्याअभावी दुष्काळामुळे होणारी वित्तहानी या परस्परविरोधी संकटाचे निर्मूलन करणाऱ्या चीन पासून प्रेरणा घेऊन भारतही आफल्या देशात नदीजोड प्रकल्प राबवू शकतो.

- ४) भारतात सिंधु नदी (१११४ कि.मी), गंगा नदी (२५२५ कि.मी.), गोदावरी (१४६५ कि.मी.), कृष्णा नदी (१४०१ कि.मी.), ब्रम्हपूत्रा (९१६ कि.मी.) लांबीच्या असून साबरमती, मही, तापी, महानदी, पेन्नार, कावेरी या नद्या ३०० कि.मी. लांबीच्या असून नदीजोड प्रकल्पाच्या योजनेत उत्तर व दक्षिण भारतातील नद्यांना धरणे बांधून कालव्याच्या साह्याने जोडण्याचा प्रस्ताव आर्थिक विकासाच्या प्रक्रियेत अपेक्षित आहे.

### तत्का भारतातील प्रमुख नद्या व त्यावरील प्रकल्प

अ.क्र.	नदीचे नाव	लांबी किं.मी.	वहन क्षेत्र किं.मी.	प्रकल्प
१.	सिंधु	१११४	३२१२८०	मोचीघागरा
२.	गंगा	२५२५	८६१४५२	सुवर्णरेखा
३.	ब्रम्हपूत्रा	९१६	१९४४१३	मनसासंकोश तिस्ताजोगीगोपा
४.	साबरमती	३७१	२१६७४	राजस्थान कालवा
५.	मही	५८३	३४३५०	कामलीशारदा
६.	तापी	७२४	६५१४५	नर्मदा पार
७.	नर्मदा	७९९	३९०३३	सरदार प्रकल्प
८.	महानदी	८५१	१४१५८९	दवाईस्वर्ण
९.	गोदावरी	१४६५	३१२८९२	इचमपल्ली लोडॅम
१०.	कृष्णा	१४०१	२५८९४८	नागार्जुनसागर विजयवाडापेन्नार
११.	पेन्नार	५९७	९५५२१३	प्रोदत्तुर जोड
१२.	कावेरी	८००	८११५५	ग्रॅण्ड अनिकुट/वैगईगुंटुर

साधारणतः भारतात १२ नद्या मोठ्या आकारमानाच्या आहेत तर ४००० नद्या मध्यम व लहान आकाराच्या आहेत. अनेक नद्या एकापेक्षा अनेक राज्यातून वाहतात तसेच अनेक देशांच्या सीमा ओलांडून येतात. यामध्ये नेपाळ, भूतान, चीन, तिबेट, बांग्लादेश व पाकिस्तान यांचा समावेश होतो नदीजोड प्रकल्पासाठी धरणे महत्वाची असून वर्तमानकाळात महाराष्ट्र, मध्यप्रदेश, गुजरात, कर्नाटक या राज्यात सर्वाधिक धरणेबांधली गेली आहेत. आजमितीला जवळपास ४५०० पेक्षा अधिक धरणे तयार झाली असून नदीजोड प्रकल्पासाठी ती वरदान ठरणार आहे. भारतातील पाणी प्रश्न शिथिल करावयाचा असेल तर नदीजोड प्रकल्पावर गांभीर्याने विचार व धोरणात्मक वृत्ती करणे आवश्यक आहे.

### नदीजोड प्रकल्पाचे समर्थन

- १) नदीजोड प्रकल्पामुळे पुरपरिस्थिती व दुष्काळ स्थिती या दुहेरी प्रश्नांची एकाच वेळी सोडवणूक हाणार आहे. भारतात प्रतिवर्षी १८६९ बी.एम.सी. पाणी नदीपात्रातून वाहून समुद्रात मिळते. असे वाया जाणारे पाणी वापरात आणणे या प्रकल्पामुळे साध्य होणार आहे. यामध्ये उत्तरपूर्व क्षेत्रामध्ये प्रतिवर्षी पुरपरिस्थितीमुळे होणारे नुकसान टाळणे तर पश्चिम दक्षिण क्षेत्रात दुष्काळ व पाणी टंचाईवर मात करता येणे शक्य आहे.
- २) भारतात लोकसंख्या वाढीचा दर सरासरी प्रतिवर्षी २ टक्के आहे. प्रतिवर्षी भारतात नव्याने १.२५ कोटी लोकसंख्येची भर पडते. वाढत्या लोकसंख्येमुळे पाण्याचा प्रश्न गंभीर स्वरूप धारण करित आहे. भारतात २००१ मध्ये दरडोई डसरासरी पाणी पुरवठ्याची उपलब्धता ५१७७ क्युबिक मीटर होती हेच प्रमाण २०२५ साली १००० क्यु. मी पेक्षा कमी होण्याचा अंदाज आहे. यावर उपाय योजना म्हणून नदीजोड प्रकल्प उत्तम पर्याय आहे.
- ३) भारतातील पर्जन्यमान विषम आहे. भारताच्या उत्तर-पूर्वेला जेव्हा वार्षिक ११०० क्यु मी पाऊस पडतो तेव्हा उत्तर पश्चिमेला हेच प्रमाण २०० क्यु.मी इतके कमी असते. अशी विषमता देशाच्या आर्थिक उन्नतीस मारक आहे. नैसर्गिक विषमतेवर मात करण्यासाठी कृत्रिम उपायाने पाण्याचे हस्तांतरण आवश्यक ठरते. सद्यस्थितीत पाण्याची मागणी वेगाने वाढत जाणारी असून नदीजोड प्रकल्पामुळे भारतातील ३५ कोटी हेक्टर जमीन नव्याने ओलिताखाली आणणे साध्य आहे.
- ४) नदी जोडप्रकल्पामुळे भारतात जलविद्युत निर्मितीत वाढ होऊन वीज निर्मितीतून देशाचा आर्थिक विकास घडून येऊ शकतो. हे प्रकल्प अंतर्गत जलवाहतुकीच्या सुविधा वाढविणारा असेल, अशी सुविधा कमी खर्चाची व प्रदुषणविरहित

असेल त्यामुळे देशांतर्गत राष्ट्रीय उत्पादनात ६ टक्के नी वाढ घडून येईल. देशात राष्ट्रीय सुरक्षितता व एक्याची भावना वाढीला लागेल. नदी जोड प्रकल्पामुळे रोजगार संधीत वाढ होईल आणि सामाजिक विषमता कमी होईल.

- ५) आर्थिक परिवर्तनाची शेती सुधारणा, औद्योगिकरण, रस्ते रेल्वे व हवाई वाहतुक, शिक्षणसेवा, धरणे कालवे ही साधने आहेत. नदीजोडप्रकल्प हे विकासाचे प्रमुख साधन ठरणार आहे. नदीजोड प्रकल्पाची उपयुक्तता ही सर्वच राजकीय पक्षांच्या नेतृत्वाने मान्य केली असून मागील ५० वर्षात भारतात ४२६ मोठी व मध्यम धरणे बांधण्यात आली आहे. शेतीतील हरितक्रांती बरोबर या प्रकल्पामुळे नवनवीन उद्योग वाढीस लागतील. यामध्ये देशभर मत्स्य शेती वाढीला लागेल. एकूण आर्थिक महासत्ता होण्याच्या ष्टीने नद्यांची आंतरजोडणी प्रकल्प महत्वपूर्ण ठरणार आहे.

### नदीजोड प्रकल्पाच्या मर्यादा

भारतात १९७२ पासून चर्चेला जाणारा नदीजोड प्रकल्प आजही केवळ चर्चेच्या माध्यमातून आपले अस्तित्व टिकवून आहे. या प्रकल्पनिर्मितला मर्यादांचाही अभ्यास करणे महत्वाचे ठरते.

- १) भारतीय संघराज्याची सामान्य ओळख ही पाणी समस्या व पाणी वाटप विषयक वाद यातून होत असते. यामध्ये उत्तरेतील हरियाणा -पंजाब किंवा दक्षिणेतील कर्नाटक तामळनाडू यांचा उल्लेख करता येईल. नदीजोड प्रकल्पाच्या कार्यवाहीनंतर राज्यातील पाणीवाटप संदर्भातील संघर्ष अधिक उग्र होतील.
- २) नदीजोड प्रकल्पांतर्गत लोकांचे सक्तीने स्थलांतर करावे लागेल. या लोकांना पुनर्वसनाच्या सोयी पुर्णपणे प्राप्त होतील का ? हा प्रश्न मोठा आहे. कारण मागील ५० वर्षात ५० दशलक्ष लोकसंख्या स्थलांतरीत झाली असून बहुसंख्य लोक व त्यांचे कुटुंब रस्त्यावर येऊन संघर्ष करीत आहेत. नदीजोड प्रकल्पामुळे किती लोकसंख्या स्थलांतरीत होईल याची कोणतीही अधिकृत माहिती उपलब्ध नाही. विशेषतः आदिवासी व शेतकरी कुटुंबातील स्थलांतर झाल्याने ग्रामीण जीवन विस्कळीत होईल.
- ३) वन आणि पर्यावरण मंत्रालयाने पर्यावरणाला बाधा पोहोचवणारी २३ कलमे नमुद केलेली आहे. पर्यावरणाची होणारी हानी लक्षात हा प्रकल्प धोकादायक ठरण्याची शक्यता आहे. यावर होणारा आर्थिक खर्च विचारात घेतल्या गेला असला तरी या प्रकल्पाने सामाजिक, पर्यावरणीय, सांस्कृतिक घडामोडीची हानी व त्यामुळे खर्चात होणारी वाढ विचारात घेतलेली नाही. वास्तव खर्चाचा विचार केल्यास हा प्रकल्प न परवडणारा आहे.
- ४) भारतातील नदीजोड प्रकल्प हा आंतरराष्ट्रीय हितसंबंधावर परिणाम करणारा आहे. भारतातून वाहणाऱ्या नद्या सहा देशांच्या सीमेतून वाहत येतात किंवा वाहत जातात. त्यामुळे प्रकल्पासाठी या सर्व देशांची संमती आवश्यक ठरते. या विविध देशांशी भारताचे असले संबंध पाहता यासाठी बराच वेळ खर्च होण्याची शक्यता आहे. भारतात नदीजोड प्रकल्पासाठी राज्यांची बैठक बोलाविली असता गुजरात, कर्नाटक, आंध्रप्रदेश, ओरिसा, महाराष्ट्र या राज्यांनी सशर्त अनुमती दिली. नदीजोड प्रकल्पाचा अंदाजित खर्च अब्जांच्या घरात आहे. असा खर्च केवळ बांधामाच्या ष्टीने अपेक्षित आहे. परंतु पुनर्वसन धरणांची डागडुजी व व्यवस्थापन या खर्चाचा विचार या प्रस्तावात केलेला नाही. त्यामुळे आर्थिक ष्टीने हे प्रकल्प कितपत फायदेशीर ठरतील ? यावरचर्चा होणे गरजेचे आहे.
- ५) भारतीय घटनेनुसार 'जलसंपदा' हा विषय राज्यसूचीमध्ये समाविष्ट आहे. राज्यांमध्ये मत्स्य झाल्याशिवाय जलव्यवस्थापन व पाणी समस्या सोडविणे साध्य होणार नाही. कोणतेही राज्य आपल्याकडे जादा पाणी आहे हे मान्य करण्यास तयार नाही. त्यामुळे नदीजोड प्रकल्प प्रत्यक्षात आणणे कठीण ठरत आहे. या प्रकल्पातून पाण्याचे हस्तांतरण होत असतांना एका अभ्यासानुसार २५ टक्के ते ४० टक्के पाण्याचा अपव्यय होणार आहे. हा अपव्यय पाहता नदीजोडणी प्रकल्पाच मुळ उद्देशाच बाजूला पडतो. या प्रकल्पांन विरोध करणारे आक्षेप घेतात की प्रकल्पाचा मोठा खर्च भारताला परवडणारा नाही व प्रकल्पामुळे पर्यावरणावर प्रतिकूल परिणाम होईल.. भारताला एकूण जगातील भूक्षेत्रापैकी २.४५ टक्के भूक्षेत्र लाभलेले आहे तर जगातील एकूण लोकसंख्येपैकी १६ टक्के लोकसंख्या भारतात राहने सध्या व पुढील काळात पाणी प्रश्न अधिक उग्र रूप धारण करेल. भविष्यकाळातील युद्धे प्रदेश जिंकण्यासाठीची नसतील तर ती शुद्ध पिण्याच्या पाण्यावर हुकुमत मिळविण्यासाठी होतील. यासाठी भारताने काळाची पावले ओळखून धाडसी निर्णय घेण्याची आवश्यकता आहे.

## The Present Recession In India

**Dr.Prashant Katole**

Associate Professor &H.O.D,Dept. of Economics,  
Smt. Kesharbai Lahoti College,Amravati.(M.S)

### What is recession?

For the uninitiated, an economic recession signifies a shrinkage in the GDP for two or more consecutive quarters, while an economic slowdown is when the GDP continues to grow but in a slower rate than the previous period in question. A slowdown is a pointer towards recession and usually precedes one but does not necessarily lead to recession.

Recession means that the country is producing and earning less than what it did before. Consumers tend to spend less as people lose confidence in the growth of the economy. Less spending means that there's decrease in demand, which, in turn leads to a dip in production. Such events also lead to lay-offs and job loss and mark a spike in unemployment.

Slowdown, on the other hand, means that production and earnings of the economy is not growing in the same pace as before.

With recession, job loss and companies winding up operations, 2019 has proved to be a bad year for India's economy. The GDP growth rate for the second quarter dropped to its lowest in six years. Gross Domestic Product figures released by the Central Statistics Office (CSO) showed that India's GDP for the second quarter of the financial year 2019 (Jul-Sep 19) was 4.5 - lowest since 2012-13. With consecutive declines for six quarters, the expectations of almost all major financial institutions and rating agencies for India's GDP growth have also come down.

Data Intelligence Unit compared the GDP forecast figures announced by rating agencies at the beginning of the year with the current statistics and found that in less than a year, they have cut down GDP predictions for FY 2019-20 by 1.5 per cent on an average. Data Intelligence Unit analysed eight financial institutions/rating agencies - Reserve Bank of India, State Bank of India, World Bank, Asian Development Bank, International Monetary Fund, and credit rating agencies CRISIL, Moody's and CARE RATINGS.

At the beginning of the year, almost all these financial institutions had hoped that India's GDP growth will be better than 2018. However, that did not happen. Between January and April this year, on an average, rating agencies had predicted a 7.3 per cent GDP growth for India. By the end of the year, between October and December, the average GDP growth prediction for FY 2019-20 by all the eight agencies has come down to 5.8 per cent - a 1.5 per cent cut in a year.

Data Intelligence Unit had done a detailed study on how these institutions narrowed down their prospects from India, majorly due to slow domestic demand. Of all the agencies, the State Bank of India's outlook for the economy was the worst. In November this year, the SBI had reduced the GDP forecast from 6.1 per cent to 5 per cent for the current financial year.

The crisis brewing within the Indian economy has gained unanimous acceptance by now. Even the latest annual report of the RBI for the fiscal year 2018-19 (or FY19) confirmed that the Indian economy has indeed hit a rough patch. The GDP growth rate of the economy has slipped to 5 per cent in the first quarter of FY20, the lowest in over six years. This is an indication of tougher times ahead. Be it the recent collapse of the automobile sector or the rising number of non-performing assets (NPAs), sluggish consumer demand or failing manufacturing sector; all have a hand in this deceleration of growth rate.

The spurt in instances of job losses from automobile manufacturers to biscuit makers has led to the general acceptance of the downturn. This is the third instance of an economic slowdown for India in the past decade after the ones that began in June 2008 and March 2011. The technical term for the same is growth recession. A recession is defined in economics as three consecutive quarters of contraction in GDP. But since India is a large developing economy, contraction is a rarity. The last instance of negative growth for India was in 1979. A growth recession is more commonplace where the economy continues to grow but at a slower pace than usual for a sustained period, what India has been facing nowadays.

The growth of the Indian economy had been predominated by consumption inclusive of both -- Private Final Consumption Expenditure (PFCE) as well as the Government Final Consumption Expenditure (GFCE). Over the last five years, the total consumption expenditure by Indian households had accelerated with an average growth rate of 7.8 per cent compared to an average of 6.1 per cent in 2011-14. But the recent sharp fall in PFCE in the June quarter to 3.1 per cent compared to 7.2 per cent in the March quarter has significantly contributed to the recent slowdown.

That being said, any fall in consumption expenditure, as and when it would happen, would escalate the crisis even more. If consumption spending falls, then output and employment levels also fall since consumption expenditure directly impacts the other two. As a consequence, the economy would stagnate, and prices deflate. Lower prices, if unable to recover the costs, would halt the operations of any firm and would initiate the layoff process. This, in turn, reduces earnings further. Hence this vicious cycle keeps on repeating itself until the economy slips into a deeper state of shock.

In addition, another major component of India's GDP is investment, induced by both -- private and government sectors. It has been a key driver of growth since the liberalisation of 1991. Though gross fixed capital formation (GFCF), the main constituent of investment in the economy, increased, yet its contribution to growth fell by 6.2 percentage points in 2014-19 than in 2011-14. The slackening of investment lowers the level of infrastructure development, causes hesitation in creating small businesses, stop entrepreneurs from investing in research and development, and thus stagnates technological development. Capital Investments are long-term gains that generate profitability for many years by improving operational efficiency and boosting innovation. It goes without saying that for holistic growth of the economy and to gain competitive edge over others, the economy must innovate.

In addition to these factors, the slump in the economy is also affected by the various exogenous factors. A leading dampener is the US-China trade war, which has intensified over time and has contracted world trade and, in turn, Indian exports. Also, high rates of GST, liquidity crisis in NBFCs, and shift in the behavioural pattern of the workforce due to the entry of young people has discouraged savings. When people save less in the economy, it leaves less money for investments.

Recession can be short-lived if corrective actions are taken immediately, failure of which can have a prolonged effect on the health of an economy. Amidst the news of slowdown, rise in FDI inflows from \$12.7bn (FY19) to \$16.3 bn (Q1 FY20) brought respite for the government. In a welcoming move, government revised GST for the automobile sector, opened up FDI in contract manufacturing sector and even announced the recapitalization of the banking sector. Together with these, it should also focus on optimum utilization of funds granted by RBI and direct them to boost investment in the economy both infrastructural and research investment. Further, structural shifts over the long run can be achieved through tapping into the health and education sectors that long for quality improvements. Only such long-lasting structural changes can improve the growth potential of the Indian economy and deter the possibility of three slowdowns within the short span of a decade.

## Role of Information and Communication Technologies (ICT) in Physical Educational Sports

**Prof. Sunil B. Chordiya**

Director of Physical Education,  
L.R.B. Arts, Comm. & S.S.R. Bharti Science College,  
Arni, Yavatmal, India

### Abstract

*In a modern and technical era in the field of physical education and sports, it is most to utilize incipient techniques, novel equipment and new tools to improve the standards and performance. Information and Communication Technologies (ICT) is the most consequential factor and methodology in the field of physical education and sports around the world. It has changed the development, planning and management of coaching in physical education and sports. The utilization of ICT is the most facile method and gets an efficacy result. The aforesaid system available for all, anytime and anywhere. Implementation of ICT in physical inculcation and sports have enhanced the performance of the player and achieving the best level, for this purpose paper focused on the use of ICT in physical education and sports with few novel concepts and its applications. The role of physical education teacher and coaches, suggestions for physical education teacher and coaches etc.*

### Introduction

Relentless innovation in computer and information science and the products that emerge from this innovation present educationalists with incipient and virtually revolutionary conceptions for engendering edifying and learning environments. Such concepts as 'Virtual learning', even 'Virtual Universities', and e-learning radically challenge the notion of how edifying can be carried out and where learning is achieved (McElhone, 2000). Teachers should be conscious of the quality of their teaching. Information and communication technology (ICT) is becoming increasingly pervasive in our modern society and a requirement for ideal means of teaching especially in the field of physical education (Zhang and Martinovic, 2008). Information and communication technology (ICT) has a significant role in teaching and learning process as a tool. The use of ICT by learners offers a potential to enhance learning as all subjects as well as physical education. Teaching will get new dimensions, as lessons will be greatly enhanced by the technology tools. The uses of multimedia instructional tools will significantly enrich the teaching content that will become more dynamic and captivating (Gerad and Mathiot, 2000). Sansauwal defined information technology as the use of hardware and software for efficient management of information i.e storage, retrieval, processing, communication, diffusion and sharing of information for social, economic and cultural upliftment (Sansauwal, 2000). This includes the ability to use technology as a tool for research, organize, evaluate and communicate information and the possession of a fundamental understanding of the ethical issues surrounding the access and use of information (Zhang and Martinovic 2008). Physical education benefits from the integration of ICT in making lessons more natural and real. The utilization of ICT in physical education is becoming very important as it can make a significant contribution to primary, secondary and tertiary institutions. This starts with knowledge and understanding of principles applicable when considering using and implementing ICT software and programs in teaching physical education. The aim of this paper is to present a sketch of ICT usage in physical education and to explore its usefulness for the evaluation of computer-based learning.

### New Concept of ICT

Some company making a software and taking a course of ICT one of the example is as Digital classes. Pearson world largest education company brings to you Digital class an ICT based solution that combines state of the art, hardware with syllabus, Compliant multimedia based interaction content this solution drawn upon Persons global expertise in digital content and its vast experience in education over hundred million people worldwide. They suggest that ICT tools make learning real-life experiences so that players understand and never forget therefore it is needful to use ICT tools in the field of sports and physical education for the purpose of development of skills, match practice, match the behaviour and advanced technique. Examples of ICT application that can be used in physical education and sports.

### Definition of ICT

Information technology is an application and commodity support through which or by means of which information is transferred, recorded, Edited, stored, manipulated or disseminated. According to UNESCO information technology as "scientific, technological and engineering disciplines and the management techniques used in information handling and processing information and their application, computers and their interaction with man and machine and associated social, economic and cultural matters." According to ILA

Glossary, "Information technology is an application of the computers and other technologies to the acquisition, organization, storage, retrieval and dissemination of information."

➤ **Motive analysis software**

There are many software packages available in market useful for highlighting techniques are some of the athletic field events.

➤ **Camera**

The video camera can provide footage of the experienced performance in action can be used to inspire, to demonstrate correct techniques and to develop players. The camera can also use in assessment for learning tools. The camera is immediately simple to use and it has a reasonable battery life.

➤ **Film editing in PE**

To identify a common fault of players and after that give the suggestion to players.

➤ **Mobile camera phone**

We can take a photo, shooting of any technique and it can be observed through PC it is helpful to the sportsman.

➤ **Interactive whiteboard**

It is a surface onto which computer screen can display through a data projector. As it is a touch sensitive it allows the teacher to use a pen or finger-likemouse to control computer from the board and save any changes for future internet and website to support teaching and learning. Belowenlisted tools are also applicable to get more information:

### Suggestions

Tim Kelly survey on ICT education and give four main suggestions they are as

- The importance of ICTs for training teachers. Much of this takes the form of basic computer literacy instead of how to integrate computers into teaching methods, but the emphasis on building capacity is important.
- Secondly, providing and sustaining ICT infrastructure in schools, especially through public-private partnerships, is essential.
- Thirdly, while ICT is an important part of formal educational institutions, it can be just as powerful in non-formal education settings, creating the opportunity for life-long learning.
- Finally, several countries have very strong Open and Distance Learning initiatives that seek to provide mass education and overcome geographic or financial barriers.

### Role of physical education teacher and Coaches in the field of ICT

Physical education teachers and coaches are the interfaces between players and ICT tools. Physical education teachers and coaches have a need to focus and seize new opportunities and demonstrate how the ICT tools help and improve the performance of the player. And they can apply a greater role to change the development, planning and management of sports. This was they can take a right full place as human agent side the search engine in searching the internet.

### Conclusion

In modern and technical era it is must to know the cognizance of ICT for every physical teacher, coaches and players. The aim of this manuscript is to the improvement of player performance by using advanced technology. The development of ICT in the field of physical education and sports has a significant impact on society and has benefited in developing countries.

## सामाजिक व शैक्षणिक स्तरावर जलसाक्षरतेचे महत्व जल संरक्षण व संवर्धन

शैलजा कृष्णराव माथने

सारांश :-

आज जगात जल नियोजन हे मोठे आव्हान आहे. मानवानी जलाचा उपयोग घेतला पण प्रबंधन (व्यवस्थापन) व पाण्याचा अपव्यय याकडे लक्ष दिले नाही. आज जगात सकारात्मक दृष्टीकोन घेवून, आधारभूत संरचना विकसित करण्याचे प्रयत्न सुरू आहे. प्रबंधनात्मक प्रयत्नां मुळे विहिरी, तलाव, नदी, नाले यातून पर्याप्त शुध्द जल प्राप्त होईल पिण्याच्या पाण्याची पुर्तता व स्वच्छता संविधानाच्या आठव्या अनुसूचित मांडला आहे.

भारतात जलसंसाधन मंत्रालय हे देशातील जलसंसाधनाचा विकास, व्यवस्थापन योजना निर्धारित करतात, त्या अंतर्गत क्षेत्रीय योजना तयार करणे, तांत्रिक बाबी तपासणे, त्यांचे आर्थिक मुल्यांकन करणे, केंद्राकडून मदत उपलब्ध करणे, विदेशातील अर्थसाहाय मिळविणे, आंतरराज्यातील जल विवादाचे समाधान करण्यास सहायता तसेच नितीनिर्धारण, लघुसिंचन मार्गदर्शन योजना तयार करणे. समाज क्षेत्र विकास, भूमीगत जल संसाधनाचा विकास इत्यादी दायित्व जलसंसाधन मंत्रालयाकडे आहे. राष्ट्रीय जलसंसाधन परिषद १ एप्रिल २००२ मध्ये झाली व २००२ मध्ये राष्ट्रीय जल नीतीला स्विकारले.

जलसंसाधनाचा एकत्रित विकास करणे उपलब्ध जमीन आणि भूजलाचा सर्वोत्तम व निरंतर योग्य उपयोग करण्यासाठी योजना व सुरक्षा सुची जलसंरक्षणाचे परंपरागत पध्दती एक तंत्र पाणी वापरण्याच्या चुकीच्या पध्दती व मागणीचे नियोजन करणे तसेच उपलब्ध जल मात्रा व गुणवत्ता टिकविणे यावर जोर दिला गेला. प्रत्येक राज्य आपली जल योजना तयार करून दोन वर्षात ती कार्यान्वित करण्याचे निर्देश दिले आहे.

राष्ट्रीय जल गुणवत्ता देखरेख कार्यक्रम (झॅण्डण्च) केंद्रिय प्रदुषण नियंत्रण बोर्ड अंतर्गत राज्यातील बोर्ड मार्फत जलाच्या गुणवत्ता संदर्भात देखरेख करण्यासाठी १,०१९ केंद्र स्थापन करून सहामाही परिक्षण करून भूजलाची गुणवत्तेची देखरेख करतात. यांनी केलेल्या संरक्षणासाठी जलसाठे शुध्दी क्षेत्रात टाकावू कार्बनिक पदार्थ, जीवाणू मुळे प्रदुषणाचा धोका निर्माण झाला. कारण घरगुती उपयोगातून सांडपाणी व टाकावू पदार्थ पाण्यात विसर्जित केले जातात.

प्रस्तावना

लोकसंख्या वाढ जलमागणी पूर्ण करण्यासाठी भूपृष्ठावरील नदी, तलाव, झरे, भूमीगत जल, दोन्ही स्रोतांचे जलाचे पाणी वापरले गेले अंदाधुंद वापरामुळे व भूजलाचे उपसामुळे जलस्तर खाली जात आहे ज्या क्षेत्रात पूनर्भरणाची योग्य व्यवस्था केली गेली नाही तेथे विहिरी सुकल्या, हातपंप, कुपनलिका पाण्याच्या कमतरतेमुळे बंद कराव्या लागतात. सिंचनासाठी ही कुपनलिका पंपाद्वारे भूजलाचा उपसा वाढत आहे, त्यामुळे जलस्तर खाली जातो.

भूमीजल स्रोताची कमी ही समस्या अती उपसामुळे नाही तर पर्जन्याचे पडणारे पाण्याचे संचयन करून त्याचा उपयोग करण्यात समस्येचे निराकरण आहे. प्राचीन काळी राजा महाराजांनी छोटे छोटे तलाव व बांध घालून पाणी एकत्र केले, त्यामुळे भूमीगत जलाची पातळी वाढली.

जलसंवर्धन ही सामाजिक जबाबदारी आहे. नवीन तंत्रज्ञान जसे वॉटरहार्वेस्टिंग सारख्या विविध पध्दतीद्वारे आम्ही जलसंवर्धन करू शकतो व इतरही तांत्रिक पध्दतीचा प्रयोग करता येईल.

आज भारतातच नव्हे तर संपूर्ण विश्वात पाणी संकट उत्पन्न झाले आहे. जागतिक तापमान वृध्दी मुळे पाण्याचा हाहाकार माजलाय. जलसंकटाचा सामना करण्यासाठी विविध योजना राबविल्या जात आहे सर्व विश्वात २२ मार्च हा जलदिन म्हणून ओळखला जातो.

जल संकट

१९४० मध्ये आमच्या देशात १० लाख विहिरी होत्या. आज ती संख्या २ करोड ६० लाख ते ३ करोडच्या आसपास आहे. ५० ते ६० टक्के लोकांची जलपूर्ती भूजलाद्वारे होते. भारतातील विविध माध्यमांचा उपयोग पिण्याच्या पाण्यासाठी करतात. ३५.५ टक्के लोकसंख्या हातपंप, ३६.७ टक्के लोक नळ, तलाव, झरे, पारंपारिक साधनांचा उपयोग करतात. २.६ टक्के अन्य माध्यमांद्वारे पाणी उपयोगात आणतात. आम्ही आमची आम्ही आपल्या जलस्रोतांचे संरक्षण करावयास हवे तसेच पर्जन्याद्वारे मिळणाऱ्या पाण्याचे साठवण व जतन करावे.

भूमीगत जलपातळी दरवर्षी १ से. मी ने कमी होत आहे. आशियाई गोड पाण्याचे सर्वात मोठे सरोवर गोठवून सुकत आहे.

विकसनशिल देशात स्थिती भयावह आहे येथे भूजल पातळी ३ मीटर प्रति वर्ष कमी होते.

भारतात दर वर्षी २० सें.मी. प्रतिवर्षी या दराने जलपातळी कमी होत आहे. वाळवंट विस्तारत आहे. हिमपर्वत वितळत आहे. नद्या, नाले, कोरडे पडत आहे. भारतात जलसंसाधन समृद्ध आहे, तरी ६ व्यक्तीत एक व्यक्ती पाण्यासाठी झुंजत आहे. उपलब्ध पाण्यापैकी ७० टक्के पाणी सिंचनासाठी उपयोगात येते.

लोकसंख्या वाढ आणि औद्योगिकरणामुळे प्रदेशात जलसंकट निरंतर वाढतच चालले आहे. जलनियोजन व्यवस्थापनाबाबत सरकारी प्रयत्न पण निधीच्या कमी उपलब्धतेमुळे ही निराशाजनक आहे. प्रत्येक व्यक्ती स्वतःमध्ये परिवर्तन करून पाणी वापराच्या योग्य सवयी अंमलात आणल्यास मोठे परिवर्तन होईल, आपण हे लक्षात ठेवले पाहिजे. "जल है तो, कल है, जल जीवन का अमृत है."

#### अभ्यास विषयाचे महत्व

- पावसाचे पाणी खोल खड्डयामध्ये साठवून वापर करणे, जमिनीत झिरपून जलपातळीत वाढ होणे.
- विहिरीत पाणी पुरवठा/ट्युबवेल भूभागावरील पाणी उतारावरून वाहते, ते पाणी नाल्याद्वारे काढूनविहिरीत सोडणे व छतावरील पाणी पाईपद्वारे विहिरीत सोडणे.
- प्रदेशात काही अंतरावर खोल नाल्या खोदणे किंवा पाणी पाईपद्वारे जमिनीत जिरविणे.
- टाकीत पाणी जमा करणे.
- १००० फिट छतावर १ से.मी. पर्जन्य झाला तर जवळजवळ १००० लि. पाणी एकत्र करता येते.
- वॉटर हार्वेस्टिंग प्रणालीत पाण्याचे संचयन करता येते व पाण्याच्या बाष्पीभवनाचा दर कमी करता येतो.

#### जलसंरक्षणाचे उपाय

घरी विनाकारण नळातून पाणी वाहत नाही ना याची काळजी घेणे, गळणारे नळ दुरूस्त करणे आवश्यकतेनुसार जलाचा वापर करणे. घरगुती काम करीत असतांना पाणी संचय करून कामे करणे, नळाला सुरू ठेवून काम केल्यास जास्त पाण्याचा वापर होतो. नळाला सुरू ठेवू नका बंद करा. फ्लश मध्ये अतिरिक्त पाणी सोडू नका. तलाव विहिरी यात कचरा टाकू नका. आंधोळीला शाँवर खुप वेळ सुरू ठेवू नका. पाण्याची कमतरता समजून त्याचा व्यर्थ उपयोग टाळणे व अपव्यय टाळण्याचे प्रयत्न करणे तसेच जनसामान्यांना जागरूकता निर्माण करणे जलनियोजन अभियानात सहभागी होवून वैश्विक चिंतलेला ही व्यक्तीगत चिंता समजून जल संवर्धनात सहभाग देणे.

#### पाण्याचे पुनर्चक्रिकरण

अमेरिका, ऑस्ट्रेलिया, युरोप देशांप्रमाणे भारतातही पाण्याचे पुनर्चक्रिकरण करणे, अनिवार्य केले पाहिजे. टॉयलेट मध्ये ऑस्ट्रेलिया, अमेरिका, युरोप या देशात रिसायकलींग पाण्याचा उपयोग होतो भारतात या कार्यासाठी शुध्दपाणी वापरल्या जातो.

चंदीगडमध्ये गोल्फ कोर्स व पार्क मध्ये सांडपाणी वर प्रक्रिया करून वापरतात, संपूर्ण देशात ही व्यवस्था लागू केली पाहिजे. दिल्ली मध्ये हैदरपूर व गोकुळपुरी या ठिकाणी रिसायकलींगचे प्लांट आहेत. अशा प्लांटची संख्या निश्चितपणे वाढली पाहिजे. बंगलूरू येथील कल्बन पार्कमध्ये हार्ड वॉटरचा उपयोग केला जातो. अन्य शहरांमध्ये ही असे उपक्रम राबविल्या गेले पाहिजे. खारे पाणी गोड करून त्याचा उपयोग करायला पाहिजे, खारे पाणी गोड बनवायला प्रतिलीटर १३ पैसे खर्च येतो. विश्व बँक अनुमानानुसार २०२०मध्ये भारतात पाण्याची उपलब्धता ३८० क्युबिक कि.मी. वार्षिक राहिल मागणी मात्र ८१० क्युबिक कि.मी. होईल. २०२५ मध्ये जगातील १८० करोड लोक अशा देशात राहतील जीचे पाणी पूर्ण संपलेले असेल, पर्जन्य प्रमाण व पर्जन्य दिवस हे जागतिक उष्मांमुळे कमी होईल.

भारतातील जल संसाधनाची स्थिती ही दिवसेंदिवस गंभीर रूपधारण करीत आहे. पावसाळ्यातही पाणी टंचाईच्या सामना करावा लागत आहे. लोकसंख्या व जलाची उपलब्धता यातील देशाची स्थिती व देशामध्ये विभिन्न क्षेत्रामध्ये लागणारे पाण्याची गरज दिवसेंदिवस वाढत आहे.

#### जल संकट या समस्येतून बाहेर पडण्यासाठी व्यक्तीगत उपाय

- जूने पाईप फुटतात, नळातून पाणी टपकने, यामुळे ५० टक्केपाणी वाया जाते.
- सकाळी दाढी, ब्रश करतांना नळ सुरू ठेवतात, यामुळे २५ ते ३०लि. पाणी वाया जाते. ३०० ते ५०० लिटर पाणी बाथटब शाँवर मध्ये नाहतांना खर्च होते. सामान्यपणे नाहतांना १०० ते १५० लिटर पाणी लागते.
- बाथटब व शाँवरचा वापर न करणे.

- शहरात ५० लाख लिटर पाणी वाहने धुण्यासाठी खर्च होतात पाईप पेक्षा बकेटीचा वापर केल्यास पाण्याचा अपव्यय टाळता येईल.
- भूजल पातळी वाढविण्यास रेन वॉटर हार्वेस्टिंग सिस्टिम करा तसेच घराच्या आसपास किंवा अन्य ठिकाणी लावा की पाणी जलधारण क्षमता जमीनीची वाढेल.

#### जल संकट निवारणाकरीता सरकारी स्तरावरील प्रयत्न

- ठोस उपाययोजना अंतर्गत पर्जन्य पाणी संचय व्यवस्था प्रत्येक शहर गावामध्ये करणे.
- भूजलाच्या अत्याधिक उपसा करण्यासंदर्भात नियम तयार करणे, त्या अंतर्गत शिक्षेचा अंतर्भाव होईल.
- नदीचे गोड पाणी शुध्द करून उपयोगात आणता येईल. आंतरराष्ट्रीय नदी संदर्भात वादावर लवकर निर्णय तसेच लोकसंख्येवर नियंत्रण ठेवण्यास उपाय करणे.
- जलाशयांना प्रदुषित होण्यापासून वाचविणे, जलाशयाचा पूर्णरूद्धार करणे.
- निती, योजना, व्यवस्थापन क्रियान्वित करून राबविणे
- प्राथमिक, महाविद्यालयीन पुस्तकात पाठयक्रम अनिवार्य करणे ज्यामुळे जलसंकट व संरक्षणाबाबत जागृकता निर्माण होईल.
- भूजल स्तर व गुणवत्ता वाढविण्यासाठी जलसंवर्धनाचे प्रयोग व प्रोत्साहन देणे.
- सामुदायिक योजना डॅम, बंधारा, नहर, तलाव खोदणे इत्यादी योजना ग्रामिण भागात राबविणे.
- शहरात खूले जमीन क्षेत्र कमी झाले असून रस्ते, फुटपाथ, सिमेंटनी बांधल्यामुळे पर्जन्याचे पाणी जमिनीत न मुरता वाहून जाते. हे पाणी जलाशयाला प्रदुषित करते. पक्क्या फरशीपेक्षा छिद्रयुक्त फरशीचा वापर करणे.
- चर्चा, संमेलन, प्रतियोगीता इत्यादींचा माध्यमातून जलमुल्य उपयोग व पर्यावरणीय समस्या अवगत करता येईल.
- मिडीया, न्युजपेपर, प्रोत्साहनपर कार्यक्रम दाखविता येईल.
- बॉटल संस्कृती विरूध्द आवाज उठवावा लागेल रोक लावावी लागेल.

#### भूजलाच्या संदर्भातील योजनांची अंमलबजावणी व कार्यपध्दती

प्रत्येक गावशिवारात पडणारा पाऊस मग तो अगदी ६०० मि. मी. पेक्षा कमी का असेना विकासाच्या दृष्टीने अत्यंत महत्वाचा असतो. त्या गावाचे नैसर्गीक गुणधर्मच त्या पावसाशी निगडीत असतात. हा पाऊसच खऱ्या अर्थाने त्या गावाचा नैसर्गीक आणि निर्वीवाद असा जलस्त्रोत असतो. पण हा जलस्त्रोत आकाशातून कोसळत असतो तेव्हा त्याकडे बघण्याच्या भूमिकेतून पाहण्या पलिकडे आपण काही करत नाही पाऊस पडतो, वाहून जातो, मग त्याच पाण्यासाठी आपण दाही दिशांना धावतो.

जमिनीत मुरणाऱ्या एकंदर पावसाच्या पाण्याच्या ८५ टक्के पाण्याचा उपसा झाला तर त्या भागाला अती उपशाचे काळे क्षेत्र म्हटले जाते. उपशाचे प्रमाण ६५ ते ८५ टक्के असल्यास कठीण स्थितीतील क्षेत्र ठरविले जाते देशातील भूजल साठे वेगाने काळ्या क्षेत्राकडे जात असल्याचे वैज्ञानिकांना आढळून आले आहे. अति उपशाच्या क्षेत्रात नवीन विंधन विहरीवर कायदानुसार बंदी घालता येते, पण त्याची प्रत्यक्ष अंमलबजावणी होत नाही.

आपण निसर्गाचे अमर्याद शोषण केलेले आहे जास्तीत जास्त पाणी शेती उद्योगधंद्यांना, जास्तीत जास्त खते वापरणे, जास्तीत जास्त बोअर खोल करायची, या जास्तीज जास्त घेण्याच्या भावनेमुळे जास्तीत जास्त आपले नुकसान होणार आहे. आधुनिक शेतीमुळे अनेक पर्यावरणीय समस्या उभ्या राहू लागल्या आहेत. पिकांवरील पडणाऱ्या रोगांना मारण्यासाठी किटकनाशकांचा वापर केला गेला, आज किटकनाशक निर्मित उद्योगात २०,००० च्यावर वेगवेगळा प्रकारची घातक रसायने वापरली जावू लागली. काही किटक आजच्या रासायनिक किटकनाशकांना दाद देत नाहीत, अशा किटकात किटकनाशके पचविण्याची क्षमता निर्माण झाली आहे. त्यामुळे जास्तीत जास्त घातक किटकनाशके बनविली जाऊ लागली परंतु आज तीच किटकनाशके मानवी शरीरात संक्रमित होत आहेत. वक्ज हे किटकनाशक हरितकांतीच्या सुरवातीच्या काळात मोठ्या प्रमाणात वापरले गेले, हे किटकनाशक पर्यावरणात ९०-१०० वर्षांपर्यंत राहू शकते.

सततच्या भूजल उपशामुळे जमीन क्षारपड बनते महाराष्ट्रामध्ये अशा क्षारपड जमीनीचे क्षेत्र वाढत आहे अतिसिंचनातून व रासायनिक खतांमुळे हजारो हेक्टर जमीन क्षारपड झाल्या आहेत. विकासाच्या नावावर आपण विनाश सहन करीत आहोत, पारंपारिक जल संधारण परंपरेबद्दल सन्मान आस्था निर्माण करणे, त्या कार्याचे ज्ञान संपादन करणे महत्वाचे आहे. आपण प्रगतीशीलतेच्या नावाखाली पाण्याच्या परंपरेला नुकसान पोहचविले आहे.

मोठी धरणे, जलाशयाचे तळे, कालवे निर्माण करावी लागणार आहे. त्यामुळे प्रचंड प्रमाणात पाणी जमिनीत मुरल्याने पाणथळीचा प्रदेश निर्माण होण्याचा धोका उत्पन्न होतो पाण्याचा निचरा न झाल्याने कसदार जमिनीचा कस

कमी होवून जमिन टाकावू नापीक म्हणून परावर्तीत होण्याची शक्यता होवून वातावरणातील दमटपणामुळे मलेरीया सारखे रोग वाढीस लागतात. ज्यावेळेस आपण ही जलाशये बांधतो त्यावेळेस तेथील मृदा, खडक रचना इत्यादींचा विचार होत नाही, म्हणून जमिनीत पाण्याचा निचरा व पाणी साठविण्याची क्षमता आहे की नाही, याचा विचार केला जात नाही.

आजपर्यंत विकासाच्या अनेक योजनांवर प्रचंड निधी, श्रम, आणि वेळ घालवूनही आपले शासन आणि प्रशासन गेली, अनेक वर्षे तेच ते कार्यक्रम, उपाय, बैठका यात अडकून बसला आहे, मुळातून समस्यांचे निराकरण केले जात नाही. रासायनिक खतांचा कमीत कमी वापर हे शेतकऱ्यांना समजून सांगणे, तसेच शालेय शिक्षणात या विषयी धडा शिकविणे जेणे करून पुढील पिढीला या गंभीर प्रश्नाचे गांभीर्य समजणार नाही

सर्वांनी मनापासून पाणी अडविणे, जिरविणे व काटकसरीने वापरने हा मंत्र अमलात आणला पाहिजे. पाण्याचे नियोजन खोरेनिहाय आवश्यक असून तुटीच्या खोऱ्याचा विकास आणि नियमनाची कार्यपध्दती त्याच बरोबर नागरी पाण्याचे नियमनही वेगवेगळे असावे अशी अपेक्षा आहे. केंद्र सरकारने राष्ट्रीय जलनीती ठरवितांना तसेच ही जलनीती अवलंबवितांना स्थायी स्वरूपाची यंत्रणा तयार केली तशीच राज्यानेही करणे आवश्यक आहे. पाण्याचे शुध्दतेचे लघु प्रकल्पापासून ते मध्यम प्रकल्पापर्यंतचे पाणीसाठे दिवसेंदिवस घाण आणि दुर्गंधाने भरून जात आहेत. परिस्थिती अशीच राहिली तर पाणी आहे पण वापरता येणार नाही.

२१ व्या शतकातील पाणी प्रश्न सोडवायचा असल्याने, प्रत्येकाने आपले व्यक्तीगत योगदान-भूजल-संवर्धन कार्यक्रमांमध्ये देणे गरजेचे आहे. पाणी पुर्न:भरण ही एक लोक चळवळ होणे ही काळाची गरज आहे. व्यक्ति कितीही सुशिक्षित असली तरी ती जलसाक्षर असेलच असे नाही. आपण पाणी पट्टी भरतो म्हणजे आपण कितीही पाणी वापरायला मोकळे आहोत असे नाही त्यासाठी जलसाक्षर अभियानाची गरज आहे.

या कार्यक्रमांतर्गत गाव, जिल्हा तसेच राज्याचे जल सुरक्षा आराखडे व वार्षिक कृती आराखडे तयार करणे, बंधनकारक करण्यात आले आहे. तसेच भूजल व भूपृष्ठावरील पाण्याचा संयुक्त व शाश्वत वापर, भूजल संवर्धन, पाण्याची गुणवत्ता या बाबींवर भर देण्यात आला आहे. तसेच पाणीपुरवठा योजनांचे व्यवस्थापन स्थानिक संस्थेकडे असण्यावर भर देण्यात आला आहे. प्रकल्पांतर्गत लोकांचा सक्रिय सहभाग असल्याने अशा योजनांची गुणवत्ता निश्चितच चांगली असते. म्हणून या प्रक्रियेत सार्वत्रिकरण करणे कमप्राप्त झाले आहे. ग्रामिण पातळीवर योजनांची मागणी, आखणी व अमलबजावणी करित असतांना निर्देशनास आलेल्या काही तांत्रिक व प्रशासकीय अडचणींच्या अनुभवांवर काही धोरणात्मक सुधारणा करणेही गरजेचे झाले आहे.

#### निष्कर्ष

- स्रोतांचे संवर्धन व बळकटीकरण करणे.
- गुणवत्ता बाधित गावांमध्ये सुरक्षित स्रोत विकसित करण्याकरीता उपाययोजना घेणे.
- भूजल पुनर्भरणाच्या पारंपारिक व अपारंपारिक उपाययोजना शिवकालीन पाणी साठवण योजनांच्या तत्वानुसार प्राधान्य देण्यात येईल.
- योजनांचा एकूण देखभाल दुरूस्ती खर्च विचारात घेवून, पाणीपट्टीमध्ये किमान ५ टक्के पाणी पट्टीच्या दरामध्ये वाढ करण्यात यावी
- भूजलाच्या व्यवस्थापनेकरीता ग्रामपंचायतीने नागरीकांच्या सहभागातून पाण्याचा ताळेबंद तयार करून, पाण्याच्या स्रोतांच्या व्यवस्थापनेचा आराखडा तयार करावा.
- भूजलपुर्न:भरणाशी संबंधीत आवश्यक उपाययोजना उदा. छतावरील पाऊस पाणी संकलन, विहिरी पुनर्भरण इत्यादी शिवकालीन पाणी साठवण उपाययोजनांचा समावेश करणे बंधनकारक राहिल.

**Run a Three to Measure Speed and Agility of Amravati District Amateur Cricketers**

**Dr. Dinanath Nawathe**, DCPE HVPM Amravati  
**Dr. Pravin C. Dabre** SKK Mahavidyalaya, Jalgaon Jamod

**Abstract**

It is knowledgeable that, due to off season training Programs a Scored by cricketers upgraded their performances at National Level. Therefore researcher was interested in investigating the study entitled as "Off Season Fitness Training Programs and its effect on Speed and Agility of Cricketers." Total 75 male Cricketers of Amravati District Amateur Cricket Association, who represented interschool or intercollegiate tournaments, were selected as subjects. The age of the selected subjects ranged between 17-25 years. Hence all those subjects selected were the source of data. For the purpose of this study, total 75 Cricketers were selected by adopting Simple Random Sampling Method from the available Cricketers of Amravati District Amateur Cricket Association, Amravati. All the selected subjects were randomly distributed into three groups in equal numbers. It may be concluded that both sixty and ninety days systematic training Program significantly improve The for Speed and Agility performance by the selected subjects. Ninety days systematic training Program is more effective than the sixty days training Program. The post test mean difference of Speed and Agility performance between the groups.

**Description:**

It was measured by using Run-a-three – 17.7 mts X 3 Test. The Run-a-three test places the subject in a cricket specific setting to assess their agility in relation to performance in cricket. **Scoring:** The average time from the two stopwatches was recorded to the nearest 1/100<sup>th</sup> of second

**Run a Three Test Programme of Test Administration**

The tests were administered just before the beginning of experiment for all the three groups. The tests were administered again immediately after the end of 60 days experimental treatment for experimental group-A, and control group-C. Similarly, the tests were further administered after the end of 90 days for experimental group-B and control group-C. The training was conducted from 6:30 a.m. to 8:30 a.m. every day, except Sunday.

**Administration of Fitness Training programme**

The total period of fitness training programme for each experimental group i.e., Experimental group A and B was divided into two different durations. The duration of these periods varied with each Experimental group. The Control group did not undergo any specific training programme. The following tables describe the Weekly Fitness Training Programme. The contents of these weekly fitness training programmes varied according to each Training period that underwent by the subjects i.e. Training load and Training intensity varied according to each training period. The data pertaining to the present study were collected by administering therefore stated tests for the chosen variables i.e. Anthropometric Measurements and Specific Fitness. The subjects were given a chance to practice the prescribed test so that they become familiar with tests and knew exactly what was to be done. The tests were conducted at the beginning of Experiment. For Experimental group A and control group - C tests were again administered at the end of 60 days. For experimental group B and control group C tests were further administered at the end of 90 days.

**Table - Summary of One Way Analysis of Variance for the Data on Run A-3 Test Performance of Pre-Tests of Experimental A, Experimental B and Control C Groups**

Source of Variance	Degree of Freedom	Sum of Square	Mean Sum of Square	F-ratio
Between the Groups	K-1 3 - 1 = 2	0.006	0.003	0.011 <sup>@</sup>
Within Group	N - K 75 - 3 = 72	19.47	0.27	

@ Not Significant at 0.05

Tabulated  $F_{0.05(2, 72)} = 3.11$

It is observed from the above table that there are no significant mean differences among the means of Pre-Test on Run-A3 test performance of Experimental A, Experimental B and Control C groups. The analysis of table reveals that the calculated F-value of 0.011 is less than the tabulated F-value of 3.11; hence the observed differences are not statistically significant.

Since the F-ratio is not found to be significant therefore Least Significant Difference (LSD) Post Hoc Test is not applied.

**Table -Mean, Standard Deviation and t-Ratio for the Pre and Post Test of Experimental A, Experimental B and Control C Groups in Run A-3 Test Performance**

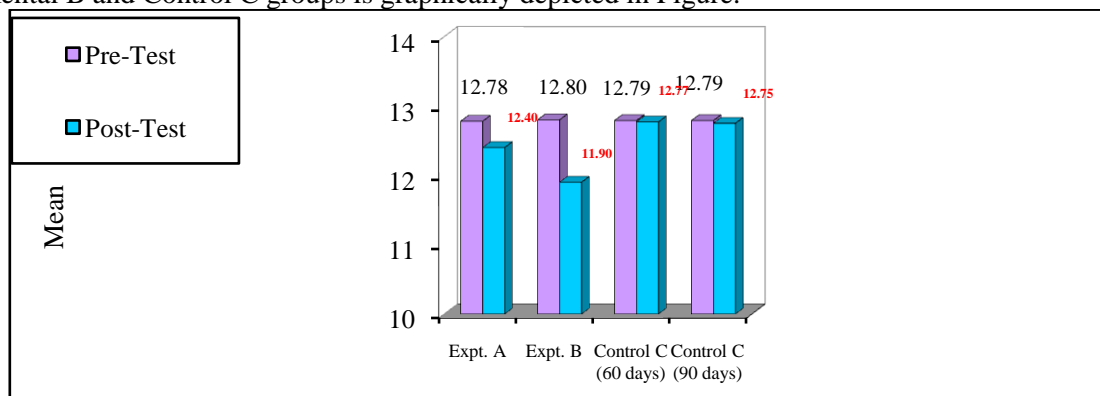

Group	Test	Mean	Standard Deviation	Mean Difference	Standard Error	t-ratio
Expt. A	Pre	12.78	0.5022	0.38	0.14096	2.704*
	Post After 60 days	12.40	0.4945			
Expt. B	Pre	12.80	0.5203	0.90	0.14886	6.027*
	Post After 90 days	11.90	0.5323			
Control C	Pre	12.79	0.5370	0.02	0.15154	0.121 <sup>@</sup>
	Post After 60 days	12.77	0.5345			
Control C	Pre	12.79	0.5370	0.05	0.15129	0.315 <sup>@</sup>
	Post After 90 days	12.75	0.5328			

\* Significant at 0.05 level Tabulated  $t_{0.05(24)} = 2.064$  @ Not significant at 0.05 level

Above table indicates that there is significant difference in between the Pre and Post test means of Experimental A and Experimental B groups in run A-3 test performance, as the calculated t-values of 2.704 and 6.027 respectively are greater than the tabulated t-value of 2.064 at 0.05 level of confidence for the 24 degrees of freedom. The Control C group shows insignificant difference with calculated t-values 0.121 and 0.315.

From the above findings it is quite clear that Experimental A and B groups show significant improvement in run A-3 test performance due to 60 and 90 days of systematic training programme, whereas Control group's subjects does not show any significant improvement in the run A-3 test performance.

The mean difference of run A-3 test performance between the pre and post test of Experimental A, Experimental B and Control C groups is graphically depicted in Figure.

**Figure - Mean Difference of Run A-3 Test Performance between the Pre and Post Test of Experimental A, Experimental B and Control C Groups**

**Table - Mean, Standard Deviation and t-Ratio for the Post Tests of Experimental A, Experimental B and Control C Groups in Run A-3 Test Performance**

Group	Mean	Standard Deviation	Mean Difference	Standard Error	t-ratio
Experimental A	12.40	0.4945	0.38	0.14564	2.604*
Control C (After 60 days)	12.77	0.5345			
Experimental B	11.90	0.5323	0.84	0.15062	5.609*
Control C (After 90 days)	12.75	0.5328			
Experimental A	12.40	0.4945	0.49	0.14530	3.405*
Experimental B	11.90	0.5323			

\* Significant at 0.05 level Tabulated  $t_{0.05(48)} = 2.00$

The findings of the above table show that there is significant difference in between Post test means of Experimental A & Control C (After 60 days), Experimental B & Control C (After 90 days) and Experimental A

& Experimental B groups in run A-3 test performance, as the calculated t-values of 2.604, 5.609 and 3.405 respectively are greater than the tabulated t-value of 2.000 at 0.05 level of confidence for the 48 degrees of freedom.

From the above findings it is inferred that in post test, there is significant improvement in run A-3 test performance of the subjects of Experimental A and Experimental B groups with their respective control groups. Moreover Experimental B group shows more significant improvement in run A-3 test performance compared to Experimental A group. It clearly indicates that both the sixty and ninety days systematic training programme significantly improve the run A-3 test performance. It is also inferred that the Ninety days systematic training programme is more effective than the sixty days programme.

The post test mean difference of run A-3 test performance between the groups is graphically represented on Figure.

Figure - Post Test Mean Difference of Run A-3 Test Performance between the Groups

### Discussion:

The purpose of the discussion is to state the interpretations and opinions, explain the implications of our findings, and make suggestions for future research. Its main function is to answer the questions posed in the introduction, explain how the results support the answers and, how the answers fit in with existing knowledge on the topic. The discussion is considered as the heart of the research and usually requires several writing attempts.

It was most important to note that the present research about the parameter for speed and agility both sixty and ninety days of systematic training is advisable but for the optimum development of the aforesaid fitness variables ninety days off season systematic fitness training programme is strongly recommended. These results also matches with the results of Miss (1988) compared two type of post season training programme, land and water, the effects of each had on and components of fitness. The principle outcomes of this study indicate that there was little difference between the effect of land and water training on the component of fitness. The result for water training indicates that the muscle power was the only fitness component of the 6 (six) that did not show a significant difference. Muscle strength was the only component to show a significant difference between land and water training programme.

### Conclusion

Both sixty and ninety day's systematic training program significantly improve the performance i.e. Speed and agility of the Amravati District Amateur Cricketers. It is further observed that ninety days program is more effective than the sixty days training program.

## निष्पाप वय आणि रहदारी नियमांचे उल्लंघन

डॉ. महेश प्रल्हादराव गोमासे  
नेहरू महाविद्यालय, नेरपरसोपंत

सध्या धकाधकीच्या आयुष्यात स्वतःची गाडी असणे वाहतुकीच्या दृष्टीने सोयीस्कर ठरते. काही वेळा गरज म्हणून नव्हे तर छंद म्हणून गाडी चालविली जाते. पण गाडी चालवितांना वाहतुकीचे नियम लक्षात ठेवणे गरजेचे असते. पण आज कमी वयातील मुलं मोठ्या प्रमाणात वाहन चालविताना दिसतात. मोटार वाहन कायद्यानुसार १८ वर्षावरील मुलांना गिअर असलेली दुचाकी चालविण्याची परवानगी आहे. मात्र आज सर्वत्र परिसरात सर्रास अल्पवयीन मुले दुचाकी चालवितानांचे चित्र पहावयाला मिळते आहे. अनेकदा कारवाया करूनही अल्पवयीन मुलांच्या हातात गाड्या येत आहेत. पालक आपली जबाबदारी पार पाडत नाहीत. त्यामुळे त्यांना दंड करण्याची कारवाई करण्यासाठी वाहतूक पोलिसांनी अधिक लक्ष देण्याची गरज आहे.

वाहन चालविण्याचा परवाना उपप्रादेशिक परिवहन विभागातून दिला जातो. असा परवाना मिळाल्यानंतरच मुलांनी गाडी चालविणे अपेक्षित आहे. मात्र, मुलांची हौस भागविण्यासाठी अनेक जण मोटार वाहन कायद्यातील वयाच्या नियमापूर्वी मुलांना गाडी चालवायला शिकवतात. पाल्याच्या या हट्टापायी रस्त्यावरून चालणाऱ्या इतरांच्या जीवाला धोका निर्माण होऊ शकतो, याचा मात्र पालकांना विसर पडताना दिसत आहे. त्यामुळे सर्वत्र रस्त्यांवर अनेक अल्पवयीन महाविद्यालयीन व शाळकरी मुले सर्रास गाड्या चालविताना दिसतात. त्यामध्ये भरधाव वेगाने गाडी चालविण्याचे व ट्रिपल सीटचे प्रमाणही अधिक आहे.

## रहदारी (ट्रॉफीक) चे नियम

- १) गाडीचा परवाना मिळविण्यासाठी योग्य प्रशिक्षकाकडून गाडी चालविणे शिकले पाहिजे. दुचाकीसाठी हा नियम लागू होत नाही, पण चारचाकीसाठी हे अनिवार्य आहे, तसा कायदाच आहे,
- २) गाडी चालविताना रस्त्याच्या डाव्या बाजूने अशा प्रकारे चालवावी की, आपल्यापेक्षा वेगाने जाणाऱ्या इतर गाड्यांना अडचण होणार नाही.
- ३) चार रस्त्यांवर वळणावर किंवा साधारण अरूंद पुलावर चढण असलेल्या ठिकाणी ओव्हरटेक करू नये. जर एखादे वाहन आपणास ओव्हरटेक करण्याचा प्रयत्न करित असेल तर आपण आपल्या गाडीचा वेग कमी करून त्या गाडीस ओव्हरटेक करू द्यावे.
- ४) आपण छोट्या रस्त्यावरून मोठ्या रस्त्यावर येत असाल तर मुख्य रस्त्यावरील डाव्या व उजव्या बाजूंनी येणाऱ्या वाहनांना प्रथम जाऊ द्यावे.
- ५) उजवीकडे वळण घेत असताना मुख्य रस्त्याच्या मध्यभागापर्यंत सरळ येऊन उजवीकडे वळण घ्यावे, जेणे करून इतर वाहनांना अडथळा येणार नाही.
- ६) डावीकडे वळण घेत असताना डावीकडील रस्त्याच्या किंवा फुटपाथच्या शक्य तितक्या जवळून वळण घ्यावे.
- ७) अपंग किंवा अंध व्यक्ती रस्त्यावरून जात असल्यास वाहनांचा वेग कमी ठेवावा. तसेच त्यांच्यापासून जास्त अंतरावर वाहन न्यावे.
- ८) रस्त्यावर एखादी वरात, मिरवणूक अथवा मोर्चा निघत असल्यास वेगाने जाऊ नये. तसेच हॉर्न वाजवून ध्वनी प्रदूषण करू नये.

## वाहन नियम मोडल्यास दंड

आता नवीन नियम वाहन चालविणाऱ्यांसाठी लागू झाले आहेत. तुम्ही गाडी चालविताना सीटबेल्ट लावला नसाल, तर आता १०० रुपयांऐवजी १००० रुपये दंड भरावा लागतो आणि दुचाकी चालविताना हेल्मेट घातले नसेल तर १०० ऐवजी १००० रुपये दंड भरावा लागेल. शिवाय, वाहन परवाना ही तीन महिन्यांसाठी रद्द केला जाईल. केंद्र सरकारने मोटार वाहन कायद्यात सुधारणा केल्या. नव्या सुधारणासह मोटार वाहन (सुधारणा) कायदा १ सप्टेंबर २०१९ पासून लागू करण्यात आल्या आहे. या कायद्यातील नव्या तरतुदीमुळे वाहन नियम मोडल्यास होणाऱ्या शिक्षा आणि दंडाच्या रकमेत मोठी वाढ करण्यात आली आहे.

## मोटर वाहन कायद्यातील नव्या शिक्षा

- १) रुग्णवाहिके सारख्या आपतकालिन वाहनांचा रस्ता अडविल्यास १० हजार रुपये किंवा त्याहूनही अधिक दंड किंवा तीन महिन्यांच्या तुरुंगवासाची शिक्षा होईल किंवा या दोन्ही शिक्षा ही ठोठावल्या जातील. या आधी या गुन्ह्यासाठी कोणतीही शिक्षा नव्हती.
- २) वाहन चालविताना परवाना नसेल तर ५ हजार रुपये किंवा त्याहूनही अधिक दंड किंवा ३ महिन्यांचा तुरुंगवास किंवा दोन्ही शिक्षा होतील. हाच गुन्हा पुन्हा केल्यास १० हजार रुपये किंवा त्याहूनही अधिक दंड किंवा १ वर्षाची शिक्षा किंवा दोन्ही शिक्षा होतील.

- ३) परवाना रद्द झाला असतानाही वाहन चालविल्यास १० हजार रुपये किंवा त्याहूनही अधिक किंवा ३ महिन्यांचा तुरुंगवास किंवा दोन्ही शिक्षा होतील.
- ४) भरधाव गाडी चालविल्यास ५ हजार रुपये दंड किंवा तीन महिन्यांचा तुरुंगवास किंवा दोन्ही शिक्षा होतील.
- ५) अल्पवयीन व्यक्तीने गुन्हा केल्यास वाहनाच्या मालकाला दोषी ठरविले जाईल आणि २५ हजार रुपये दंडासोबत ३ वर्षांचा तुरुंगवास होईल. शिवाय गाडीची नोंदणी ही १ वर्षासाठी रद्द केल्या जाईल. तसेच अल्पवयीन आरोपी २५ वर्षांचा होईपर्यंत त्याला वाहन परवाना दिल्या जाणार नाही.
- ६) मद्यधुंद अवस्थेत वाहन चालविल्यास १० हजार रुपये किंवा ६ महिन्यांचा तुरुंगवास किंवा दोन्ही शिक्षा होतील. मात्र, हाच गुन्हा पुन्हा केल्यास १५ हजार रुपये किंवा २ वर्षांचा तुरुंगवास किंवा दोन्ही शिक्षा होतील.
- ७) वाहन चालविताना सिग्नल तोडल्यास १००० ते ५००० दंड किंवा सहा ते बारा महिने तुरुंगवास किंवा दोन्ही शिक्षा होते. मात्र हाच गुन्हा पुन्हा केल्यास १०००० दंड किंवा दोन वर्षांचा तुरुंगवास किंवा दोन्ही शिक्षा होतील.
- ८) मोठमोठ्याने हॉर्न वाजविल्यास पहिल्यांदा १००० रु. दंड आणि पुन्हा हाच गुन्हा केल्यास २००० रु. चा दंड आकारल्या जाईल. या आधी यासाठी शिक्षेची कोणतीही तरतूद नव्हती.
- ९) वाहनाला विमा संरक्षण नसल्यास २००० पर्यंत दंड किंवा तीन महिन्यांचा तुरुंगवास किंवा दोन्ही शिक्षा होतील. मात्र हाच गुन्हा पुन्हा केल्यास ४००० पर्यंत दंड किंवा तीन महिन्यांचा तुरुंगवास किंवा दोन्ही शिक्षा होतील.
- १०) वाहन चालविताना मोबाईलवर बोलल्यास, चुकीच्या पध्दतीने ओव्हरटेक केल्यास किंवा रस्त्याच्या विरुद्ध दिशेने वाहन चालविल्यास १००० ते ५००० रुपये पर्यंत दंड किंवा ६ ते १२ महिने तुरुंगवास किंवा दोन्ही शिक्षा होतील. हाच गुन्हा पुन्हा केल्यास १०,००० दंड किंवा २ वर्षांचा तुरुंगवास किंवा दोन्ही शिक्षा होतील.

मोटर वाहन कायद्यातील नव्या सुधारणांमुळे नियम कडक झाले असले तरी, त्याच सोबत वाहन चालकांसाठी या कायद्यात काही समाधानकारक तरतुदी करण्यात आल्या आहेत. वाहन परवान्यासाठी अर्ज किंवा वाहन नोंदणी आता राज्यातील कुठल्याही आर.टी.ओ. मध्ये करता येईल. तसेच वाहन परवान्याचे नूतनीकरण करायचे असल्यास वर्षभरात कधीही करू शकता. या आधी एक महिन्याच्या आतच वाहन नूतनीकरण बंधनकारक होते.

#### वाहतूक पोलिसांचे अधिकार

नवा मोटर वाहन कायदा लागू केल्यानंतर वाहतूकीच्या नियमांचे उल्लंघन करणे महागात पडू शकते. नव्या कायदानुसार वाहतूकीचे नियम मोडल्यास दंड म्हणून मोठी रक्कम भरावी लागते. नव्या कायदानुसार पोलीस याची अंमलबजावणी करत आहेत. नियम मोडणाऱ्याकडून मोठी पावती फाडली जात आहे. वाहतूकीच्या नियमांचे पालन करणे आपली जबाबदारी आहे. मात्र नियमांचा वापर करून पोलीस तुम्हाला त्रास देऊ शकत नाही. त्यांना कोणत्याही प्रकारे तुमच्याशी गैरवर्तन करता येणार नाही. शिवाय तुम्हाला वाहनधारक म्हणून असलेल्या अधिकाराची माहिती असायला हवी. वाहतूक निरीक्षक तुम्हाला थांबवू शकतात, जसे तुमच्यासाठी काही नियम आहेत तसेच त्यांच्यासाठी ही काही नियम आहेत. ते नियम वाहतूक निरीक्षकांनी पाळणे गरजेचे आहे. वाहतूक पोलीस त्यांच्या गणवेशात असणे बंधनकारक आहे. त्यावर त्यांचा बक्कल नंबर आणि नाव असायला हवे. या गोष्टी नसतील तर तुम्ही त्यांच्या ओळखपत्राची मागणी करू शकता आणि ओळखपत्र दाखविण्यास नकार दिल्यास तुमच्या गाडीची कागदपत्रे देण्यास तुम्ही नकार देऊ शकता. या सर्व गोष्टींचा अभ्यास आज नागरिकांना करण्याची गरज आहे. पण नागरिक स्वतः कायद्याचे पालन करीत नाही.

#### कमी वयातील व्यक्तीकडून नियमांचे उल्लंघन

आज तसे पाहता घरातील वरिष्ठ मंडळी आपल्या मुलांना गाडी घेऊन देतात व ते भरधाव वेगाने गाड्या चालवितात. वाहतूकीचे कोणतेही नियम ते पाळीत नाही. गाडी चालविताना मोबाईलवर बोलणे अशा लोकांची संख्या सध्या ६५ टक्के वर पोहचली आहे. यातून मोठ-मोठे अपघात घडून येतात. म्हणून यासाठी काही नवीन वाहतूक कायदे तयार करण्यात आले आहे. मोटर वाहन कायदानुसार १६ वर्षांवरील मुलांना गिअर नसलेली आणि १८ वर्षांवरील मुलांना गिअर असलेली दुचाकी चालविण्याची परवानगी आहे. मात्र आज परिसरात सर्रास अल्पवयीन मुले दुचाकी चालविण्याचे चित्र पहायला मिळत आहे. अनेकदा कारवाया करूनही अल्पवयीन मुलांच्या हातात गाड्या येत आहे. पालक आपली जबाबदारी पार पाडीत नाहीत. त्यामुळे त्यांच्यावर कारवाई करण्यासाठी वाहतूक पोलिसांनी अधिक लक्ष देण्याची गरज आहे. तसेच मोबाईलचा वापर जास्त प्रमाणात होत आहे. गाडी चालविताना ४२ टक्के लोक फोन हातात ठेवतात. १५ टक्के लोक खांदा आणि कानामध्ये फोन ठेवतात. १५ टक्के हॅण्डसफ्रीचा वापर करतात. १४ टक्के लोक हेल्मेट आणि कानामध्ये फोन ठेवतात.

गाडी चालविताना ८५ टक्के चालक डायलपॅड वापरतात. २१ टक्के ट्रक चालक कॉल सुरू असताना ट्रक चालवितात. १० टक्के लोक गाडी चालविताना लघुसंदेश अथवा इ-मेलचा वापर करतात.

### सारांश

पालकांनी आपली जबाबदारी ओळखून आपल्या अल्पवयीन पाल्याच्या हातात दुचाकी दिली नाही तर अनेक अपघात टाळण्यास मदत होईल. त्याच प्रमाणे सर्वांनी रहदारीच्या नियमांचे काटेकोरपणे पालन करण्याचा प्रयत्न करावयास हवा. रहदारीचे नियम पाळल्यास स्वतःच्या सुरक्षेसह इतरांचीही सुरक्षा धोक्यात येणार नाही.

**RECESSION: ITS IMPACT ON E-COMMERCE IN INDIA****Prof. Shrikant Ramesh Deshmukh**

Department of Management Studies

**Prof. Ram Meghe**

Institute of Technology &amp; Research, Anjangaon Bari Road, Badnera-Amravati

**Abstract:**

Globalization leads to a change in virtually everything related to politics, culture and economy. As globalization changed the world, the structure of the globalization concept itself evolved too. Globalization of demographic and socio-economic factors and increasing level of consciousness of consumers led to a structural change in the economy towards industry based old economy to a new economy. The new economy is a knowledge based economy in which e-commerce plays a vital role.

The Global Financial Crisis, influencing India since 2007, had negative effects on global trade by causing contradiction in demand of almost all countries, particularly INDIA, USA and some part of European countries like Germany, The Netherlands, etc. Being a key driver for productivity, competitiveness and thus economic recovery from the crises, e-commerce is thought to help to the enterprises in their efforts to reduce the negative effects of the crisis by increasing their market share, providing price advantages and improving their competitiveness.

The study investigates the impact of recession on E-Commerce in India. The results of the study show that trade volumes and turnover values of the India members shrank in 2014-2019, while turnover values of e-commerce has been increasing. Also it has been found that e-commerce is more suitable to young Indian consumer than traditional one.

**1. Introduction:**

Technological, political and economic factors led the concept of globalization in an evolution process. In this process of evolution, globalization has led to the changes in society over time by having influence on social, political, cultural and economic fields. The Industrial Revolution gave rise to shift production structure to industry which in return accelerated globalization and increased technological developments.

Technological advances in computers, communications and energy systems after World War II gave rise to changes in demographic and socio-economic factors. In particular, technological developments, the neo-liberal policies to come into prominence due to the collapse of the Breton Woods System, the structural reforms implemented by the IMF and the World Bank and the liberal policies of World Trade Organization towards the liberalization of foreign trade contributed to the intensity of globalization phenomenon. This led industrial society to evolve towards the information society. One of the best parameters expressing transition to information society is the developments in technology and electronic commerce as a derivative of it.

The Global Financial Crisis, which began to influence the world in 2007, had negative effects on global trade by causing contradiction in demand. However national and enterprise level investigation show that the effect of crisis varied across each nation and each enterprise due to the policies and strategies used in the crisis period. The enterprises turning to e-commerce practices in the crisis period got competitive advantages by the acceleration in doing business, efficiency and saving, obtaining more convenient supply of production factors, providing better information and communication management, efficiency in customer services and activities related to customers, access to world markets and expanding areas of competition.

The study investigates the relation between the weight the enterprises in INDIA gave to e-commerce and its economic performance during the recovery period. The statistics covering 2014-2019 have been evaluated and changes in e-commerce, retail and wholesale trade and GDP in pre and post-crisis periods in INDIA, USA, UK and European Union members have been taken into account. The countries with incomplete data sets have been excluded. The changes in e-commerce coefficients have been compared with wholesale and retail trade, and GDP changes to interpret the performance of e-commerce in times of crises.

**2. Globalization:**

Globalization term is used to describe the change in virtually every field in the world from economy to politics; social politics to culture has been described in different ways by different institutions and people, since 1980. According to World Trade Organization the concept of globalization as the international integration of good, capital and labour markets in other words, integration of the economy

with world markets. International Monetary Fund argues that this integration leads to increasing economic dependence of the countries worldwide caused by rapid and broad expansion of technology and increases in international capital flows and, variety and volume of trade of goods and services.

History of globalization process is quite old but the concept started to be used frequently especially since the 1980s and became one of the most discussed concepts. There is a consensus that technological, political and economic factors have been influential in emergence and development of the globalization however the date of emergence of it is controversial.

This first phase was followed by a second phase of globalization which started with the World War I, continued with the Great Depression and ended with the end of the World War II. The dynamics of globalization and global integration trends were severely hampered in this period. Ultra-nationalism in the political sense, protectionism in economic sense and trends towards self-sufficiency were the most typical features of this era (Çelikkol et.al, 2011: 200).

The third phase of globalization began after 1945-1950s, continued constantly until the early 1970s and accelerated from 1970s to the present with the developments of the period (Yeldan, 2006: 14-17). The reasons that accelerate the globalization in 1970s were the Oil Crisis of 1973 and increase in the liquidity shortage as a result of it, increase in the circulation of financial capital between countries, rise of the neo-liberal policies as a result of the collapse of the Bretton Woods system. Policies or objectives performed by the International Monetary Fund and the World Bank under the name of structural reforms, and World Trade Organization in the direction of liberalization of foreign trade such as removal of price interventions in goods and factor markets, liberalization of external trade and financial markets, privatization of state-owned organizations, liberalization of direct investment and external financial flows, spread the privatization trends in areas of social services particularly in education and health, and increase flexibility of labour markets contributed the process after the 1970s (Üenses, 2004: 2). Thanks to more liberal policies introduced in the third stage of globalization, this stage experienced a more intense and rapid development compared to both the first and second phases, and resulted in money markets and trade relations to have a more complex structure.

### 3. Structural Transformation In Globalization Process: From The Old Economy To The New Economy

By the changes in the economic and social life after the Agricultural Revolution, agriculture has turned into the dominant economic activity because it supplied the food needed for people's lives, provided raw materials to other sectors and due to lack of environment for the development of industry and services sector. The importance of agriculture went on until the 18th century when the Industrial Revolution emerged then the relative importance of agriculture economic activities began to decline. Unlike the Agricultural Revolution, the Industrial Revolution spread all over the world in a very short period of time since the first phase of globalization also began to take place during this period. This short-term spread gave rise to shift production from agriculture to industry in countries like India, England, Germany and the United States. The process started mass production in factories thanks to technological innovations. The change in mode of production caused reduction in the weight of agriculture in economy while increasing the one of industry. Consequently industry became the dominant economic activity until the World War II.

Dominance of industry continued until the beginning of the last phase of the globalization namely after the World War II. In the last phase of globalization, technological developments such as technological advances in computers, micro-electronics, robotics and control systems, communications and energy; increasing prosperity, peoples demand on a better life quality and more leisure time, the need for new services brought by urbanization, changes in demographic and socio-economic factors and increasing level of consciousness of consumers led to a structural change in the economy towards industry based old economy to a new one. This change accelerated in the 1980s, when the globalization has accelerated and reached to peak in the 1990s, when the globalization has reached to the highest levels.

The new economy concept, emerged in the last phase of globalization and rapidly developed in the 1980s and 1990s, is defined as a process in which consumption patterns, production styles, competitive structure and economic policies have changed which has been revealed by the increase in productivity provided by particularly accelerating technological advances in recent years and increases in production posed by it. The new economy covers acquisition, processing, conversion and distribution of knowledge processes. The new economy concept also represents the new social and economic order where information is the main source, knowledge production and widespread communication extend,

information workers intensify and continuous learning and modernizing become inevitable. In this respect, the literature gained new concepts such as knowledge economy, digital economy, virtual capitalism, knowledge-based economy and internet economy.

The new economy differs from the old economy in respects of several factors such as production, consumption, employment, competition and sectoral structure. The new economy is thus;

- Deals With An Educated And Awared Buyer
- Knowledge-Based Economy
- Digital Economy
- A Network Economy
- Gives Great Importance On Virtuality
- Pays Less Attention To Scarcity-Based Economy
- Emphasizes Knowledge-Based Goods
- Reduces Intermediation
- Regards The Dominant Sector As The Media Sector Which Integration Of Computer, Communications And Entertainment Industries Formed,
- Is An Innovation-Based Economy,
- Is A Speed Economy,

**1. E-commerce:**

Thus e-commerce has become a vibrant factor in the new economy. In the course of transition from the old economy to the new one, e-commerce has eliminated the problem of time and space which in return has lowered costs in production process. Although electronic communication technologies has been being used since the beginning of 1980s, use of those technologies for trade has become widespread since the second half of the 1990s. Because it's rather new, it has been perceived in several ways by different institutions, organizations and individuals.

E-commerce can be defined in two scopes sorted as broad and narrow ones.

According to the broad definition, e-commerce is the purchase or sale of goods between the businesses, households, individuals, governments and other public and private organizations over computer networks. Narrow one is almost same as the broad definition of the exception that the instrument of trade is limited with the internet.

Thus e-commerce is the trade of physical goods over open and closed networks. On the other hand trade of services such as information services, consulting, finance, law, health, education, transportation etc. written text, audio, transmission of video, production monitoring, ordering, banking and funds transfers, government procurement and electronic stock exchange are also considered in the context of e-commerce.

E-commerce has four parties as follows who have new revenue channels, reduce costs, shorten the time period used for product and service, be accessible, facilitate communication, provide customer continuity, increase market share, provide price advantages and improve competitiveness;

- ENTERPRISES
- CONSUMERS
- CITIZENS

**Government**

Despite the advantages of e-commerce, in international framework, there are some obstacles limiting the performance of e-commerce which can be identified include national differences regarding data protection rules, e-commerce rules and other legislation pertaining to information flows.. As a solution to the deficiencies in e-commerce practices, a project on Digital Single Market (DSM) in the EU has been started. The model is also accepted and implemented in India. According to them DSM has the potential to benefit consumers and businesses and to contribute significantly to economic growth. It addresses many of the key challenges and should become a driver of the future economy, enabling country like INDIA to keep pace with the rest of the world. In particular, the benefits of DSM are as follows:

- A key driver for innovation, productivity and competitiveness, and thus economic recovery from the crises;
- A mechanism to improve labour markets, making them more efficient and social;
- A tool to help improve the efficiency and quality of public services; and
- A facilitator on the path to a greener economy.

#### 5.E-Commerce As An Strategy in Recovery from the Recession:

The Financial Crisis of 2008 has been a turning point for the world trade and economy. The world economy slowed severely by the last quarter of 2019 and rate of the Indian GDP which was around 8.5% in 2014 and 3.5% between 1994-2008 on the average slowed down to 4.5% in 2019. In spite of the recovery, Indian consumption accounted for more than a third of the growth in global consumption between 2011 and 2019. Also, economy of many countries, being trade partner with India, has been easily affected by the deterioration in the economy of other developed countries and by **Demonitisation**.

Just as in the other macro-economic variables, shrinkage is also experienced in e-commerce in times of crisis. However, the shrinkage in e-commerce is relatively smaller. Therefore direct negative effects of e-commerce on economy is much smaller than most of the other types of trade in times of crisis. Beside the direct effects of e-commerce, it also has some indirect effects that contribute to elimination of the negative effects of the crisis.

Ansoff (1957) attribute economic growth to revision of product and market regarding growth strategy matrix. Watson et.al. (2008) investigated how internet can be used in the process of adaptation of these strategies to actual economy. Their investigation in UK market revealed that internet can be used as a market penetration mechanism. In the mechanism neither the product nor the market changes but the market share is increased due to the usage. Same mechanism is executed in INDIA. OECD (1999) argued that e-commerce leads to production of new productions besides creating increase in production and economic growth. This reflects to the enterprises as increases in competitiveness by decreasing production costs which is defined as an element which encourage e-commerce within and across the enterprises. The presence of e-commerce create reverse product cycle in which process efficiency gains are followed by quality improvements to existing products and then the creation of new products. The natural result of this is the economic growth which is needed in economic recession.

The DMS can be regarded as one of the numerous measures countries like INDIA, US, UK and EU has taken against the recession. The EU commissioned several background studies and held numerous discussions with members of EU institutions and Ministry of Trade, Government of India for the DSM project. The results of these studies show that there are clear economic, social, political and environmental reasons to establish a DSM. The returns of the DMS are presented as follows;

- Adds at least 4% to GDP by 2024.
- Solution for key challenges: economic recovery, better labour markets and public services and a smarter, greener economy.
- Key driver for productivity and competitiveness, promoting growth and innovation.
- Benefits consumers through low prices, better quality and more choices.
- Action is needed in establishing political leadership, better online business environment, consumer trust, foundations and infrastructure and the legal framework for knowledge assets.

Policy makers argue that one of the easiest ways to exit from the crisis can be provided by using resources effectively. In this respect indirect effect of e-commerce comes forward. In information society, e-commerce helps the best use of resources in times of crisis by reducing costs, providing significant advantages in price enhancing competition and efficiency. The process is summarized in Figure 1.

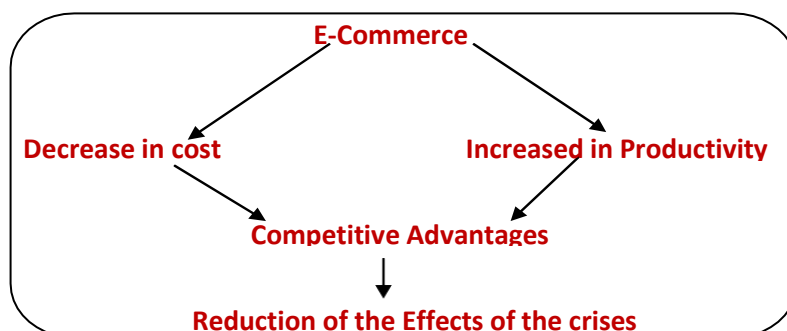

Fig. 1. Performance of E-commerce in Economic Crises

As e-commerce decreases costs and increase efficiency, it may be used as a strategy especially in times of crises. E-commerce increase the competitiveness of the enterprises which are selling and buying online and as are result in times of crisis these firms may become more resistant to the negative effects of the crisis.

Beside cost reduction and productivity increases, e-commerce also provides the enterprises with reaching new markets. In this respect e-commerce has significant advantages over traditional commerce especially in crisis periods. Alongside with elimination of protectionist policies, e-commerce allows the customers and the enterprises to reach the most remote markets easily, which in result provide the trade volume and profit of both demand and supply side. In macro-economic point of view, this increased trade volume contributes the countries to ease the effects of the crisis.

Due to the contradiction in demand, many enterprises went bankruptcy and turnover volumes of many have sharply decreased in and after the 2008 Financial Crisis. However it can be seen that turnover values of traditional trade and e-commerce differentiate.

**Table 2:** Wholesale and Retail Trade Turnover (% Change, 2014-2019)

GEO/TIME	2014	2015	2016	2017	2018	2019
<b>INDIA</b>	5,12	3,56	5,47	4,11	-4,91	<b>-10,74</b>
<b>USA</b>	7,30	0,13	7,63	5,77	2,61	-
<b>UK</b>	33,43	31,85	38,32	42,56	16,49	<b>-40,37</b>
<b>GERMANY</b>	<b>5,27</b>	<b>4,76</b>	<b>3,15</b>	<b>5,49</b>	<b>-0,18</b>	<b>-4,48</b>

Eurostat, Short-Term Business Statistics, 2018.

As seen in Table 2 the turnover value of the enterprises in the INDIA dealing with trade used to have a turnover growth rate of about 5%. However By the intermediate effects of the crisis the rate began to fall in 2019 and got negative values. In earlier period the enterprises in the INDIA have lost about 20% of their turnovers. Country specific rates aren't any better. The enterprises in USA, UK and European countries had negative turnover values .The change in the share of e- commerce can be seen in Table 3.

**Table 3:** Value of Purchases and Sales by Internet / Networks Other than Internet (% of Turnover, 2014-2019)

GEO/TIME	2014	2015	2016	2017	2018	2019
<b>INDIA</b>	9	10	11	11	12	<b>13</b>
<b>USA</b>	7	7	10	11	13	<b>12</b>
<b>UK</b>	6	9	8	11	-	<b>21</b>
<b>Germ</b>	<b>4</b>	-	<b>0</b>	<b>1</b>	<b>1</b>	<b>1</b>
<b>any</b>						

Eurostat, Short-Term Business Statistics, 2018.

Value of e-commerce in the India seems to be in a rising trend since 2014. By the year 2019, the share of turnovers from e-commerce reached to 13% in India.

#### 4. Conclusion:

- The 2019 Crisis led to a serious slow down in the Indian economy. The growth rate of GDP was 8.5% on the average from 2000 to 2014, However it slowed down to 4.8% in 2019. Although the India left the immediate effects of the Crisis behind, most of the advanced economies of India, still suffers from the shrinkage of global demand. Shrinkage was also experienced in e-commerce volume in the Crisis period just as the other macro-economic variables; however, the shrinkage in e-commerce was relatively slighter.
- The direct negative effects of e-commerce on the economy is much smaller than most of the other types of trade in times of crises. Beside the direct effects of e-commerce, it also has some indirect effects that can contribute to elimination of the negative effects of the crisis. Because e-commerce decreases costs and increase efficiency, it may be used as a strategy especially in times of crises. E-commerce increase the competitiveness of the enterprises which are selling and buying online and as are result in times of crises these firms may become more resistant to the negative effects of the crisis. Beside cost reduction

and productivity increases, e-commerce also provides the enterprises with reaching to the new markets. In this respect e-commerce has significant advantages over traditional commerce especially in crisis periods. Alongside with elimination of protectionist policies, e-commerce allows the customers and the enterprises to reach the most remote markets easily, which in result provide the trade volume and profit of both demand and supply side. In macro-economic point of view, this increased trade volume contributes the countries to ease the effects of the crisis.

- There is quiet a degree of optimism from E-Commerce companies based on combination of factors such as: accessing overseas markets, improving the way they do things, better customer relations, product innovation, etc. Business recognizes the importance of having a robust business strategy and E-Commerce is the best alternative.
- Although there have clearly been in-depth discussions and analysis about how existing digital business strategies might change, the changes made were largely amendments to existing strategies, with changes of emphasis, focus, timing, etc.
- Most E-Commerce companies seem to be applying many aspects of e retrenchment approach to business strategy (e.g. reduced fixed costs, more product offerings and reduced staffing) but there are also some aspects of an investment approach which can be observed. However, the potential for these investment approaches is conditioned by concerns about getting access to capital finance.
- Both in terms of liquidity support and access to capital finance, there are concerns about the attitude of Indian Banks in relation to small to medium digital business. Companies have identified several managerial areas where they felt the robustness and quality of the approaches being applied had been allowed to decline in recent years. As a consequence of the challenges of a recession, urgent improvements need to be made.

## Impact of Recession on E-Commerce

**Dr. Pravin M. Chandragiriwar**

Assistant Professor (Department of Commerce)  
RTM Nagpur, University Nagpur,  
Bhawabhuti Mahavidyalay, Amgaon, Gondia

### Abstract

*E-commerce is anything that involves an online transaction. This paper is outcome of a review of various research studies carried out on E-commerce. This paper examines different opportunities of e-commerce viz., E-business, E-learning, E-commerce education integration, E-insurance, E-commerce for the WTO and developing countries and future media of e-commerce. It raises key challenges that are being faced by consumers relating to e-commerce viz., Ethical issues, Perceptions of risk in e-service encounters, challenges for e-commerce education, It act 2000 and legal system. Finally many companies, organizations, and communities in India are beginning to take advantage of the potential of e-commerce; critical challenges remain to be overcome before e-commerce would become an asset for common people.*

*The e-commerce market is blooming and balanced for strong growth in Asia. There are players who made a good beginning. Their success depends on their understanding of the market and offering various types of features. This paper gives an overview of Importance of the E-commerce in India and discusses the future growth segments in India's E-Commerce. Also find out various factors that would essential for future growth of Indian E-commerce. And represent the various opportunities for retailers, wholesalers, producers and for people. This paper will also introduce the Overall E-Commerce will increase exponentially in coming years in the emerging market of India.*

**Keywords-** E-Commerce, segments, retailers, wholesalers, producers.

### Introduction:-

There are Hundreds of thousands of companies and projects that have websites on the internet. E-commerce imposes itself on the companies projects and institutions And became significantly contribute to the economics of the countries. Economic Unity Council of Arab League of Arab States Estimates growth rate of E-commerce about 15% in Arab countries compared to 30% globally. The importance of e-commerce that it aims to achieve many advantages for companies, traders and business owners or consumers.

A simple definition E-commerce is a system that allows online movements buying, selling goods, services, and information it also allows electronic movements that support revenue generation, such as promoting the demand for those goods and services and information. As the e-commerce allows online sales support operations and customer service. E-commerce can be described as an electronic market where sellers (suppliers, or companies, or stores) and intermediaries (brokers) and buyers can communicate and offers its products and services in the form of virtual or digital, also paid for with E-credit.

### The activities of E-commerce can be divided in its current form into two main sections:

1. E-commerce from companies to individual consumers (Business-to-Consumer) and can be shortened to (B2C). It represents trade between companies on the one hand and individual customers on the other.
2. E-commerce from companies to companies (Business to Business) and can be shortened to (B2B). It represents electronic trade between the company and the other.

Save time and effort Today's clients appreciate the value of time and put it at the forefront of anything else and want to be able to follow up business in the best time of their convenience, it is through Web sites that customers can place orders in any time they want the customer can shopping 24 hours a day and throughout the year, and any place where there is no need for an effort to go to a specific place to buy he needs.

Freedom of choice E-Trade offers multiple options for the consumer because the Internet contain endless number of different topics and locations, services and users can access throughout the world it thus allows rationalization of the decisions take by consumers due to its large number of sites of the flow of information in a timely and coordinated manner and accurate, allowing easy comparison between products and services Both in terms of price or quality or method of payment, and the time required to receive the required item or service and electronic commerce is particularly important for consumers in developing countries, where it can overcome the traditional barriers of distance and lack of information.

People in these countries can own products and goods that are not available in their countries. So through the freedom of choice that available to customers via the Internet they can fulfill all their business through a network of investment services and stock trading, finance and consulting and reservations tickets and Hotel reservations....etc.

**Concepts and Definitions:**

Electronic commerce or e-commerce refers to a wide range of online business activities for products and services. It also pertains to "any form of business transaction in which the parties interact electronically rather than by physical exchanges or direct physical contact." A more complete definition is: E-commerce is the use of electronic communications and digital information processing technology in business transactions to create, transform, and redefine relationships for value creation between or among organizations, and between organizations and individuals.

**Indian E-Commerce:**

For developing countries like India, e-commerce offers considerable opportunity. E-commerce in India is still in growing stage, but even the most-pessimistic projections indicate a boom. It is believed that low cost of personal computers, a growing installed base for Internet use, and an increasingly competitive Internet Service Provider (ISP) market will help fuel e-commerce growth in Asia's second most populous nation. The first e-commerce site in India was rediff.com. It was one of the most trafficked portals for both Indian and non-residents Indians. It provided a wealth of Indian-related business news a reach engine, e-commerce and web solution services. The past 2 years have seen a rise in the number of companies enabling e-commerce technologies and the internet in India. Major India portal sites have also shifted towards e-commerce instead of depending on advertising revenues.

The web communities built around these portal sites with content have been effectively targeted to sell everything from event and mouse tickets the grocery and computers. The major in this services being rediff.com and the net and India plaza with started a shopping section after In spite of RBI regulation low internet usage e-commerce sites have popped up everywhere hawking things like groceries, bakery items, gifts, books, audio and video cassettes, computer etc. non of the major players have been deterred by the low PC penetration and credit card.

**Types of E-Commerce:**

Waghmare G.T. (2012) has defined the following types of e-commerce:

1. **B2B E-Commerce:** Companies doing business with each other such as manufactures selling to distributors and wholesalers selling to retailers. Pricing is based on quantity of order and is often negotiable.
2. **B2C E-commerce:** Business selling to the general public typically through catalogues utilizing shopping cart software. By dollar volume, B2B takes the prize, however B2C is really what the average Joe has in mind with regards to e-commerce as a whole for example indiaindian.com.
3. **C2C E-Commerce:** There are many sites offering free classifieds, auctions, and forums where individuals can buy and sell thanks to online payment systems like PayPal where people can send and receive money online with ease. eBay's auction service is a great example of where customer-to customer transactions take place every day.
4. **Others:** G2G (Government-to-Government), G2E (Government-to-Employees), G2B (Government-to-Business), B2G(Business-to-Government)

**Growth of E-Commerce :**

Today, the market place is flooded with several e-commerce options for shoppers to choose from. A variety of innovative products and services are being offered spoiling customers for choice. Online shopping is no more a privilege enjoyed by your friends and family living in the US or UK. Today, it is a reality in India. In the last couple of years, the growth of e-commerce industry in India has been phenomenal as more shoppers have started discovering the benefits of using this platform. There is enough scope for online business in the future if they understand the Indian shoppers s psyche and cater to their needs.

**Importance and uses of E-Commerce:**

1. **Improvement of Business Transaction** Electronic Commerce endeavours to improve the execution of business transaction over various networks.
2. **Effective Performance** It leads to more effective performance i.e. better quality, greater customer satisfaction and better corporate decision making.
3. **Greater Economic efficiency** We may achieve greater economic efficiency (lower cost) and more rapid exchange (high speed, accelerated, or real-time interaction) with the help of electronic commerce.
4. **Execution of Information** It enables the execution of information-laden transactions between two or more parties using inter connected networks. These networks can be a combination of, plain old telephone system (POTS), Cable TV, leased lines and wireless. Information based transactions are creating new ways of doing business and even new types of business.
5. **Incorporating Transaction** Electronic Commerce also incorll'orates transaction management, which organizes, routs, processes and tracks transactions. It also includes consumers making electronic payments and funds transfers.

6. **Increasing of Revenue** Firm use technology to either lower operating costs or increase revenue. Electronic commerce has the Potential to increase revenue by creating new markets for old products, creating new information-based products, and establishing new service delivery.

### Challenges for E-Commerce:

Internet based e-commerce has besides, great advantage, posed many threats because of its being what is popularly called faceless and borderless. Best examples of ethical issues that have emerged as a result of electronic commerce. All of the following examples are both ethical issues and issues that are uniquely related to electronic commerce. 1:4.1 Ethical issues: Jackie Gilbert Bette Ann Stead (2001) reported the following ethical issues related to e-commerce.

- 1) **Privacy:** Privacy has been and continues to be a significant issue of concern for both current and prospective electronic commerce customers. With regard to web interactions and e-commerce the following dimensions are most salient:
  - \* Privacy consists of not being interfered with, having the power to exclude; individual Privacy is a moral right.
  - \* Privacy is "a desirable condition with respect to possession of information by other persons about him/herself on the observation/perceiving of him/herself by other persons".
- 2) **Security concerns:** In addition to privacy concerns, other ethical issues are involved with electronic commerce. The Internet offers unprecedented ease of access to a vast array of goods and services. The rapidly expanding arena of "click and mortar" and the largely unregulated cyberspace medium have however prompted c.
- 3) **Other ethical issues:** Manufacturers Competing with Intermediaries Online "Disintermediation," a means eliminating the intermediary such as retailers, wholesalers, outside sales reps by setting up a Website to sell directly to customers. Disintermediation includes.
  - \* Music being downloaded directly from producers.
  - \* Authors distributing their work from their own Web sites or through writer co-operatives. Dinosaurs - "Dinosaurs" is a term that refers to executives and college professors who refuse to recognize that technology has changed our lives. When an executive speaks in terms of the Internet being the "wave of the future," it is a sure sign of "dinosaur."

### A Brief Review Of Literature On E-Commerce Problem And Prospects

An attempt has been made to put forward a brief review of literature based on few of the related studies undertaken worldwide in the area of e-commerce as follows. Please Refer.

No.	Title	Author	Area of research	Findings
1	Towards capability: The future of e-commerce within the global trading system	(Andrew D. Mitchell, 2001)	Important function played by GATS, WTO in e-commerce	1) At the level of global trading system, exploring how recognition of electronic commerce as a global public good may help reduce the digital divide between developed and developing countries.
2	E-commerce, WTO and developing countries	(Arvind panagariya, 2000)	Economic issues raised by e-commerce for the WTO and developing countries. Access to e-commerce	1) E-commerce offers unprecedented opportunities to both developing and developed countries.
3	Ethical Issues in e-commerce	(Bette Ann Stead and Jackie Gilbert, 2001)	Ethical issues in e-commerce	1)The ethical issues presented in this article are all very real. 2) Rapidly changing technology is continually bringing new products/ services to the market accompanied by new strategies to sell them. Therefore, it may also conclude that new ethical issues will emerge.
4	Will E-business shape the future of open and distance learning ?	(Diana Oblinger, 2001)	Impact of e-business on open and distance learning	1) Open and distance learning institutions are finding that the need and demand for their services are increasing. 2) E-business can provide education with insight new ways to create greater efficiencies and economies of scale as well as practices that ensure learners stay with the institution for their lifetime.

**Conclusion:**

The rapidly growing information and communication technology is knocking the front-door of every country in the world, where Ethiopia would never be exceptional. Globalization of Information technology has made the world smaller and opaque through digital and virtual reality of cyberspace. It is this technology that is revolting the verge of this millennium. Entrepreneurs can break encrustation in the economy through innovation from information and communication technology and through new form of competition.

Electronic commerce has become a business strategy. Those who have the power to control information technology are those who are winning the race. The paperless trade has become inevitable. Electronic commerce has empowered, specially tourism and travel, by virtue of providing information on a finger tip and settling payments the same way.

With all inhibiting factors, Ethiopian tourism industry finds its way out to enter the world market solely with the application of Internet. As a matter of fact, current experience shows green light to more investment on Information. Electronic commerce, if we like it or not, would be the rule of the 21st century commerce.

## Potential Use Of Embroidered Godhadi An Indigenous Craft For Creating Entrepreneurship Among Women

Mrs. Archana Prakash Harne

Matoshree Vimlabai Deshmukh Mahavidyalaya, Amravati

### Abstract:

*Kantha embroidery is an indigenous household craft, made by the rural women in west Bengal. In the past they were made for family use or as gifts, out of waste sarees or dhotis. Vidarbha Cotton is known for its finess and quality in the National market. From a long time Nagpuri saree was an item of export. These beautiful sarees are preserved by making quilts with enhanced quality using simple running stitches for embroidery. The art of making Godhadi is a simple recycling method of imparts skill as well as improves economic condition of the family by earning.*

**Keywords-** Indigenous craft, textile, quilts, enterprenership

### Introduction :

The art of Kantha or embroidequilts has been flourishing in rural Bengal for centuries, Bengal Kantha and our Vidarbha Godhadi are two textile designing that appears to have been used throughout history. Both arts are extremely practical as well as decorative nature. Inner qualities of rural women also provoke them towards this art, gradually this art become their leisure time activity or hobby.

In the present work , an attempt has been made to impart skill of stitching among women. This art recycled the old sarees and dhotis by creating beautiful Godhadi.

### Objectives of the Study

The present study was undertaken with the following objectives.

- To impart the skill of stitching and embroidery among women
- To develop entrepreneurial qualities among women.

### Materials and methods:

An exploratory work was undertaken to gather information regarding Godhadi. A research work adopted unstructured interview and personal observation methods to find out traditional knowledge of stitching Godhadi.

Embroidery designs such as allover motifs and centralize motifs were selected. Godhadi malking is the skill to sewing piece of old sarees with colourfull threads. Three or four sections of saree or dhoti were layered on top of each other and then quilted. The simple running stitch was used for embroidery. New fabric was also used for Godhadi threads of Anchor brand were used and threads from the coloured borders of the saree or dhoti were used for embroirdary purpose.

Developed Godhadi designs were assessed on the basis of acceptability using mental readiness of the experts. Experts were selected taking into consideration their knowledge, keenness and interest.

### Results and Discussion.

The art of quilting has been extensively used for household purposes such as making Godhadi, bags as well as decorative articles. This art creating skill among women and develop entrepreneurship qualities. The main objective of the study was to explore indigenous technique and to develop stitching and extraordinary skill among women.

### Satanically Analysis of Evaluation Scores on Godhadi

Table No. 1

Sample No.	Placement of design No			Threads used			Fabric		
	Allover Mofis	Centerlize Motif		Saree Border	Anchor Brand		Old Fabric	New Fabric	
1	5	2	3.40	2	4	3.70	1	5	3.16
2	4	1	s	2	5	S	2	4	s
3	4	2	At	2	5	At	3	5	at
4	4	2	5%	1	5	5%	2	4	5%
5	5	3	level	3	4	level	2	5	level
Mean	4.4	2		2	4.6		2	4.6	

Table value at t at 5% level of significance 2.306

On the basis of data related to the evaluative scores of Godhadi, the results are cleared. The samples with all over motifs received good score. Centralize motifs also get some average score Anchor Brand threads which are used for embroidery also got good result. This might be due to shining and brightness. Godhadi which are created by new fabric also got equally commendable score because of freshness of new fabric.

**Conclusion:**

The conclusion of this study would be guideline for the textile designers and promoters . This activity might prove a income generating activity for women to improve their economic status.

## Benefit Of E- Business And E-Commerce In The Field Of Marketing

<sup>1)</sup> Miss Shital S. Bhargav  
Research Scholar

<sup>2)</sup> Dr. R. N. Sontakke  
Associate Professor Narayanrao Kale Smruti Model  
College, Karanja (Ghadge)

### Abstract

*E-commerce is enabling or achieving business objectives by using information technology to enhance or transform business processes. E-commerce provides multiple benefits to the consumers in form of availability of goods at lower cost, wider choice and saves time. The general category of e-commerce can be broken down into two parts: E-merchandise: E-finance. E commerce involves conducting business using modern communication instruments: telephone, fax, e-payment, money transfer systems, e-data interchange and the Internet.*

*A consumer is someone who can make the decision whether or not to purchase an item at the store, and someone who can be influenced by marketing and advertisements. A customer is an individual or business that purchases the goods or services produced by a business. Customer satisfaction is a term frequently used in marketing.*

*The study reveals that the majority of the youth and well educated people which makes them attracted towards online marketing. The majority of the e-retailers provide different types of services like door step delivery, quality & reasonable price and also large variety is available at one single place.*

### Introduction

E-commerce as anything that involves an online transaction. E-commerce provides multiple benefits to the consumers in form of availability of goods at lower cost, wider choice and saves time. The general category of e-commerce can be broken down into two parts: E-merchandise: E-finance. E commerce involves conducting business using modern communication instruments: telephone, fax, e-payment, money transfer systems, e-data interchange and the Internet. Online businesses like financial services, travel, entertainment, and groceries are all likely to grow. Forces influencing the distribution of global e-commerce and its forms include economic factors, political factors, cultural factors and supranational institutions.

### Definition

E-commerce is enabling or achieving business objectives by using information technology to enhance or transform business processes.

Ecommerce includes business to business (B2B); cutting costs in transactions between businesses and, business to consumer (B2C); sales of goods and services. Ecommerce is carried out on the Internet and has become the vehicle driving the phenomenal growth of the Internet industry.

It is important to keep in mind that the Internet is a medium for communications with customer. It does NOT exempt or exclude the need for good business strategy. A good business medium whether it be the Internet, television or printed media must communicate value to customer.

This is not an attempt to cover all areas of ecommerce but to provide a generic guide for Pacific SMEs towards establishing an effective ecommerce online presence.

### Importance of E-commerce

E-commerce have shown enormous growth in the last few years. Sources say that the retail e-commerce sales around world will reach 12.8% in the year 2019 from 7.4% in 2015 (source 1). Get store online, expand boundaries and do not limit customer reach, if not left behind in the market share.

E-commerce is popular because of its vast advantages. It is very convenient for everyone to shop anytime, anywhere and in any device instead of visiting the shops in person. Researching the products online is much simpler and more efficient than in stores with features like product comparisons which are offered by most e-commerce portals.

#### • E-Commerce Influences Purchase Decisions

When customers are deciding on a purchase, they start by looking online. website showroom, where customers can research product and see all the reasons it is right for them. Now imagine that same product was just a couple of clicks away from being theirs. A well-designed E-Commerce site can influence purchase decisions by showcasing product at its best, and making it as easy as pie to take action and make a purchase. eXtra's customer-friendly online shop has been such a success that they have tripled their revenues in 2014. Their secret? A searchable and convenient catalog that makes purchasing easy, with plenty of product reviews to encourage that sale.

- **E-Commerce Taps into Social Media**

It's a social world out there, with customers turning to social media such as Facebook and Twitter to research potential purchases. For a smart business, an engaging social media presence can raise their company profile and encourage traffic and sales. A well thought out social media strategy marries well with a good eCommerce site, forging connections with buyers. Offers, competitions and other shareable content can be used to grab attention and encourage visits to E-Commerce store. Axiom Telecom takes its social media presence seriously, with a YouTube channel filled with useful videos, and a Facebook page that's regularly updated with shareable feel-good pictures of their food. It's a seemingly simple strategy but it connects emotionally, garnering them a lot of likes - and custom.

- **E-Commerce Is Convenient**

Whether they're just getting through the door after a 10-hour work day, or getting the shopping done at the crack of dawn before the kids get up, customers appreciate the convenience of online shopping. People's lives are hectic; getting to a bricks and mortar store means taking a sizeable chunk out of their day for a detour. E-Commerce means fit into customer's busy lives, offering the products they want, when they want them. Souq.com is a prime example of the convenience of online shopping, with a vast online store of products available anytime, day or night. This convenience combined with a quick checkout process, order tracking and quick shipping is a winning combination.

- **E-Commerce Can Broaden Brand**

E-Commerce can be used in ways a traditional bricks and mortar store couldn't, whether that is by offering intangible products, providing some kind of web search, or giving customers the ability to order a product to their exact specifications. E-Commerce can be used to broaden range of products for sale, bringing more custom and diversifying sales. When Apple first started iTunes, it was viewed as an iPod marketing tactic rather than a serious online store. With billions of sales, iTunes is now a vital part of the global Apple brand, demonstrating how e-Commerce can be used to broaden what a brand offers, diversifying and increasing sales.

- **E-Commerce Offers a Personalized Experience**

There are many ways in which E-Commerce can be used to forge a more personal connection with customers. For example, an eCommerce site could include personal recommendations, order tracking, quick customer service, or personalized rewards, allowing business to offer the same kind of personal service online that offer face to face. Namshi has built an entire business, and reputation, around offering shoppers a personalized experience. Busy browsers can enter their brand preferences and size, and receive regular personalized newsletters full of bargains to suit them. E-Commerce offers businesses a vital opportunity to offer their customers round-the-clock convenience. A good eCommerce strategy that adds excellent customer service and a dynamic social media presence into the mix can spell higher traffic and better sales for business.

### **E-commerce and Today's Generation**

In the E-Commerce world, things like product selection, pricing, shipping, and customer service all play an important role in the customer experience. We see a company like Amazon really trying to stay ahead of the curve on shipping by their proposed use of drones to deliver small packages. So we see how companies like Amazon are continuing to innovate in E-Commerce. The space will continue to evolve in the direction of providing customers with more selection at better prices and faster shipping. But these are all logistics. There are other elements that play an important role in delighting users. Going forward they'll continue to be important and companies certainly don't want to be left behind. Let's run through some of these important areas.

#### **Normal market / online market**

Online shopping becomes relevant in the last decade. The kind of business online retailer are doing is proof enough that they are providing some benefits to customer which offline shopping does not give to the customer.

#### **Factors Affecting window Shopping:**

Offline shopping has existence since the existence of mankind. Offline shopping gives different types of benefits to the customer.

#### **Advantages of E-commerce shopping:**

- Accessibility and convenience
- Global choice
- Test and trial online

- The real time nature of the medium
- Time savings
- Possibilities for comparison shopping
- Privacy
- Availability of personalized offers
- The social nature of purchasing process

#### Advantages of Offline shopping:

- Quality evaluation
- Security risks
- Trust in sellers
- Delivery times
- Personal Service
- Enjoyment in shopping

#### Objectives

1. To study the perception of towards e-commerce online buying.
2. To study impact of e-commerce online shopping on Amravati city.
3. To find the various products/services offered in e-commerce online shopping in Amravati city
4. To study the risk involve in e-commerce online buying.
5. The major causes which affect the youth buying decision

#### Hypothesis

H<sub>0</sub> : - Consumer opinion and preference will purchasing product at E-commerce website

#### Conclusion

Youth, in today's world need quick results, that too in no / less time. For them online shopping is an appropriate option.

The study reveals that the majority of the youth and well educated people which makes them attracted towards online marketing. Hence, maximum respondents are aware about online shopping. It is identified that majority of the e-retailers provide different types of services like door step delivery, quality & reasonable price and also large variety is available at one single place.

From this study it is identified that the impact of online shopping services are more on all types of respondents. It is mainly because of:

- Easy payments through cash on delivery, credit/debit card payment & online payment that's results is time saving.
- Proper service they provide and also easy to availability of product
- Highest majority of the respondents are satisfied by online marketing.

This study also reveals that majority of people are aware of norms, charges & policies of online marketing. It has been observed from the study that majority of respondents get more awareness through friends and various social networking sites.

From this study is observed that some respondents believe that risk is associated with online shopping. Some people did faced problem during delivery of products it is observed that. From this study it is clear that online retailing in India will grow at a faster rate in future.

#### Recommendation

- Online marketing should focus to cover the time period for delivery of the product and should provide as fast service as possible.
- Highest priority should be given to confidentiality of the client like credit card / debit card details, personal information, etc.
- Reduces confusion how to purchase a product on online shopping.
- Online shopping improves their response because they give late response.
- Online shopping be honest about the product because some time, shown products differs with the actual product.

- Online marketing should try to provide their services not only in urban area but should try to rural area market.
- More variety of offers should be given to attract new customers.
- Online shopping must focus on unique items to purchase which is hard to find.
- In most of the times in 2 cities, option of “cash on delivery” is not available, which affects the buying of consumer. E-retailers should work out on this.

## Benefit Of E- Business And E-Commerce In The Field Of Marketing

Swati A. Saurangpate

Research Scholar

Smt. Kesharbai Lahoti Mahavidyalaya, Amravati

### Abstract

Consumers are playing an important role in e-commerce business. The increasing use of Internet by the younger generation in India provides an emerging prospect for online retailers. If online retailers know the factors affecting Indian consumers' buying behaviour, and the associations between these factors and type of online buyers, then they can further develop their marketing strategies to convert potential customers into active ones.

Customers believe that e-commerce marketing is a good thing because it helps to define who they are as a consumer. On that note, it has been proven that requests by youth for advertised products decrease as they mature. Youth-oriented audiences tend to become more critical about their purchases and less susceptible to media advertising as they grow up.

After doing this research, it comes to know that maximum number of people aware about those services and think that those services are important for new generation, majority of the people enjoyed those services of online marketing that is time saving, quality of products & large variety at one single place, The research shows that the majority of the customers of online marketing are mostly satisfied with its services.

In online marketing involve number of e-retailers like Ebay, flipkart, Myntra, snap deal & yebhi etc., so there are so many options to buyer use online shopping. In current scenario firms are putting their best efforts in marketing in order to get customer attention and positive impression on customer's mind, consumer perception is also identified by the colour, shape, and taste of the product. The topic for my research study is youth perception and buying decision. This classification is been done on the basis of various social, psychological, economical, and life style basis and there are many variables directly or indirectly effecting youth perception and traditional style of living.

### Introduction

E-commerce Marketing is the art and science of selling products and/or services over digital networks, such as the Internet and cellular phone networks. The art of e-commerce marketing involves finding the right e-commerce marketing mix of strategies that appeals to your target market and will actually translate into sales. The science of e-commerce marketing is the research and analysis that goes into both choosing the e-commerce marketing strategies to use and measuring the success of those e-commerce marketing strategies.

### Concept

E-commerce is the condition of being connected to a network of computers or other devices. The term is frequently used to describe someone who is currently connected to the Internet.

### Definitions

The Internet is not a monolithic, uniform network; rather, it is a network of networks, owned and operated by different companies, including Internet backbone providers. Internet backbones deliver data traffic to and from their customers; often, this traffic comes from, or travels to, customers of another backbone. End users communicate with each other using the Internet, and also access information or purchase products or services from content providers.

The Internet is a global system of interconnected computer networks that use the standard Internet protocol suite (TCP/IP) to serve several billion users worldwide. It is a network of networks that consists of millions of private, public, academic, business, and government networks, of local to global scope, that are linked by a broad array of electronic, wireless, and optical networking technologies. The Internet carries an extensive range of information resources and services, such as the inter-linked hypertext documents of the World Wide Web (WWW), the infrastructure to support email, and peer-to-peer networks.

### Marketing:

One of the first steps in developing an overall marketing strategy is to perform a market segmentation analysis, as a way to manage the strategy development process and ensure its effectiveness and success. The concept behind market segmentation is intuitive and relatively simple. Market segmentation is simply taking a look at the overall market for your product and service and thinking of it in terms of smaller, more manageable pieces.

Think of market segmentation as what Bert and Ernie from *Sesame Street* sing about when they suggest "One of these things is not like the other . . . one of these things doesn't belong." In a sense, that's what we are doing when we segment a market—we are looking at the whole and trying to determine how we can group the mass market into smaller groups that, while different from each other, within the groups are more alike.

Good marketing has become an increasingly vital ingredient for business success. It is embedded in everything we do- from the clothes we wear, to the web sites we click on, to the ads we see. Marketing deals with identifying & meeting human & social needs or it can be defined as —meeting needs profitably.

### Concept Of E-commerce Marketing

- Customer-centered, sense and response philosophy.
- The job is to find right products for your customers.
- The key to achieve organizational goals consist of the company being more effective than competitors in creating, delivering and communication superior customer value to its chosen target markets.
- Marketing management is the art and science of choosing target markets and getting, keeping, and growing customers through creating, delivering, and communicating superior customer value.

### E-commerce Marketing

E-commerce Marketing is the art and science of selling products and/or services over digital networks, such as the Internet and cellular phone networks. The art of e-commerce marketing involves finding the right e-commerce marketing mix of strategies that appeals to your target market and will actually translate into sales. The science of e-commerce marketing is the research and analysis that goes into both choosing the e-commerce marketing strategies to use and measuring the success of those e-commerce marketing strategies.

### E-commerce Marketing Has Several Advantages:

- Low costs:
- Flexibility and convenience:
- Analytics:
- Multiple options:
- Demographic targeting:
- Availability of the information:
- Expansion of the company:

### E-commerce Marketing Has Several Disadvantages:

- Slow internet connections can cause difficulties. If the companies build too complex or too large websites, it will take too long for users to check them or download them and they will get bored eventually.
- The e-commerce doesn't allow the user "to touch" the merchandise before purchasing it. Because of this, some salesmen are starting to guarantee the possibility of returning the product. In Germany, where a law that regulates e-commerce and guarantees the customers the total refund of the money exists since 2000, the electronic commerce is very popular.
- Other factor is the payment: many users still don't trust in the electronic methods of paying and give up buying e-commerce because of this.
- One of the major disadvantages may be the lack of trust of the users because of the constant virtual promotions that appear to be frauds. This is an aspect that deteriorates the image and reputation of quality and honest companies.
- Other disadvantage is the cash on delivery system, since it doesn't guarantee the 100% purchase of the product. This is also the case of thousands of users that dedicate themselves to daily mock big companies by ordering on the internet using false identities.

### Benefits of online shopping to the consumer

Listed below are several online shopping advantages and these are the following.

1. Good discounts / lower prices / online deals / great bargains and promotions
2. Variety
3. Save Time + energy
4. Save Fuel
5. Comparison of Prices
6. No pressure shopping
7. 24/7 Availability
8. Hate Waiting in Lines
9. Shopping online allows you privacy
10. Easy to Search Merchandise You Want to Buy
11. You can support e-businesses

## Conclusions

The e-commerce is one of the biggest things that have taken the business by a storm. It is creating an entire new economy, which has a huge potential and is fundamentally changing the way businesses are done. It is believed that electronic commerce will become a huge industry in the coming years and online shopping is now becoming a significant part of the consumer's daily life to meet their never ending requirements in a convenient way.

1. Online shopping is picking up and is becoming a trend. More consumers are indulging into internet shopping as seen by the research because of the value proposition it offers to a customer such as convenience, 24x7 shopping, doorstep delivery, a broad product selection and the ever-expanding range of unique and unusual gift ideas as well as increased consumer confidence in shopping on the internet is increasing.
2. The research suggest that increase in usage of internet increases the online shopping so there is a need to increase in broadband penetration as it accelerates the growth of online trade.
3. A huge buyers and sellers across demographics are shopping online because of the changing lifestyles and shopping habits.
4. It is seen that despite the immense possibilities available on the internet it is mainly used for mailing, chatting and surfing. E-mail applications still constitute the bulk of net traffic in the country.

## Recommendation

Online shopping is becoming one of the top Internet activities and there is a huge growth in this business as more manufacturers and providers are integrating the Internet into their sales model. But there are many things that need to occur in online shopping to generate higher revenues and the key to it lies in the hands of the marketers. To make online shopping a boom following methods can be followed.

1. India has a strong research and development (R&D) capability so companies should innovate rapidly to take care of the security issues. Technology like text to speech software's should be innovated to take care of the security concern.
2. In India the total ownership of credit cards is small as compared to its population and there are also hesitant in using it as a mode of online payment therefore alternative methods of payment like cash on delivery (COD) where the end user pays cash after the product is delivered and debit cards where the bank accounts are directly debited should be used. Other technologies like encryption technologies trusted third-party certifications; digital ID systems and prepaid cards should be used.
3. Merchants should provide goods and services that offer the right value for money. There should be transparency in policies (returns, privacy, shipping, etc.), insurance against fraud and a good after sales services should be provided to consumers making it an enjoyable experience.
4. Consumers today demand a better, more efficient and less cumbersome way to compare and buy products online. Innovative service should be provided to the consumers so that they can compare products, which are available online using their mobile phones.
5. Online shopping today is an incomplete, fragmented, and sometimes frustrating process. Therefore merchants should set themselves apart from their competitors by factors other than price, constantly innovate and move towards creating customer confidence to trade online. They should provide massive selection at lower prices, offer a personalized customer experience and their web sites should deliver a shopping experience that addresses all of the consumer needs like recommendation about the products, feedback from other customers, etc.
6. Vendors should educate the customers about e-commerce like educating them on safety tips like reading the item description, looking for a seller's feedback score and asking questions, detecting spoof mails and informing them about the new online crimes which happen regularly.

**Language Terminology And Roots of Marathi Language in Pali****Prof. Jaydeo M. Wankhede**

M.A.( Marathi,English,Economics) L.L.B,S.E.T

Smt.Nankibai Wadhvani Arts College Yavatmal.Maharashtra

**Preface**

In the history of human being language remained an important force and means of communication,civilization in the world. Without language no culture of human being could develop, because this was not only by the language theory or by phonological contagion but by the natural law of land which could prevail the people for their articulation. History of Indian Language though differed in various group ,yet we can reach to the conclusion that the roots of Marathi language are found in Pali language. This derivational relation are found in Pali language because of more word have the historical relation in regard to pronunciation,meaning, and symantic field. When we study the grammar based theory also we find similarity in Marathi, Gujarathi and Hindi words . All they have akin and family inflection with the Pali language. According to linguistics theory and formation of words and phonem systems we find more similarity in the two famil-group means ancient Pali and Marathi, Hindi. The study of the language in way of the scientific term is now essential to understand by twentieth century language lovers.Otherwise we will be only refilling the present needs and shall be forgetting the original roots which shall be very dangerous to our ancient culture and language history.

**History of languages**

According to language history Proto – Indo – European languages are differed into main two kinds. First Indo-Iranian group and second Indo-Aryan group. According to the Cambridge fact finder ,The top twenty languages of the world are given here for study of Marathi language . These are – 1.Chinese 2.English 3.Spanish 4.Hindi 5.Arabic 6.Bengali 7.Russia 8.Portuguese 9.Japanese 10.German 11.French 12.Panjabi 13. Javanese 14.Bihari 15. Italian 16. Korean. 17. Telugu 18. Tamil. 19. Marathi 20. Vietnamese. Mother tongue speakers are given in millions. ( Ref-- The Cambridge fact Finder by David Crystal .Published in India.by Foundation Books. Daryaganj NewDelhi. 1994 .)

By that above figure it seems that the Marathi language stands at 19 th number as on based mother-tongue speakers. But when we see the world language families maps , the Indo-European families are scattered in the world in all countries. According to above reference language families are devided into twenty group in which the INDO-EUROPEAN families is on the first number in respect of more numbers of speakers.

**History of Pali and Sanskrit Language**

According to world Chronology world events are recorded and this has been detailed in the history and in the book of David Crstal. The beginning of Indus Valley civilization was recorded in B.C 2500 . The composition of Vedas begun in India were recorded in B.C 1500 . But the compilation of Mahabharata was recorded in A.D 200 . That means that Sanskrit language was also flowrishing in that time when the Pali language was common to Bahujan masses. Sanskrit language was derived through the Pali language as this Pali language seems to be protected by linguistic pronunciation.

**Pali language : The first language of natives**

Prof.Mahapandit Rahul Sanskrutyayan was the great studied man in Pali language. He was one devotee of Lord Buddha. Once he could receive the letter in German language which was written by a learned Garman man.He could not understand that german language but soon he could obtain the German- English dictionary and then could understand its meaning. Prof.Dharmanand Kosambi was the Professor in Calcutta University in Pali Department,then he could raise the question whether there is available any apparatus means Pali dictionary into other language ? Buddha's period was B.C 563 to 483 . In this period Buddha had wanted to reach his message of salvation from dukkha to home to home in Pali- Prakrut language and not in vaidik language , i.e. Sanskrit language. Because Pali –Prakrut language was the language of common people in their practice. Pali-Prakrit language was the language of north India's Magadh Janapada .Monarchical states were known as Janapada and the non-monarchical as Sangh or Gana.Ancient Northern India's language was Pali-Prakrit language. There were many ruling families as called Sakya and king of Kosala. They were called as Raja.

Prof.Dr.Bhadant Anand Kausalyayan was the head of Hindi department of study in Vidyalkar University in Srilanka. He composed Pali- Hindi Kosh means dictionary by Samyak prakashan NewDelhi in the year 1975. Before this period Prof.Rhys David in England published the Pali—English dictionary .Also Prof.W.T. Steed composed the Pali dictionary . Panini was the ancient grammarian in Sanskrit language where

he formulated four thousand formulae, where at Moggalayan the ancient grammarian in Pali language formulated eight hundred formulae. Buddhadatta also composed the Pali- English dictionary . Now in India in all universities have opened the Pali –language department where at the study of Buddhism and Pali-language in term of the scientific derivation and key words are being studied. Dr.Babasaheb Ambedkar has also composed the Pali – Marathi- Hindi- Gujarathi – English dictionary for understanding the ancient roots means words cannottation and contextt. Therefore the foreign learened philosophers and studied men say “ Those who have knowledge of Pali language needs no other light from other side” ( Ref—Pali- Hindi Kosh by Dr.Bhadant Kausalyayan. Published by Samyak Prakashan Delhi.1975. Preface page No-2 )

### Pali language And Semantic Similarity

Some semantic similarity in linguistics pronunciation have been asserted for example ---

Pali Words	Sanskrit	Hindi	Marathi	English
Pitu	Pita	Pita	Pita	Father
Matu	Mata	Mata -Ma	Mata	Mother
Bhata	Bhratru	Bhai -Bhaiya	Bhau	Brother
Mas	Mas	Mahina	Mahina	Month
Sanivaro	Shaniwar	Shanichar	Shaniwar	Saturday
Sasan	Shasan	Sasan	Shasan	
Mahavijjalaya	Mahavidyalaya	Mahavidyalaya	Mahavidyalaya	

### In Pali language Sha is not consonant. Insted of Sha there is sa .

Semantic Changes caused due the following Reasons or after Pali –Prakrit old age changes in meaning and phonetic forms in words had caused due to the civilized Sanskrit language and attitudes of soft accentuation by organ of speech. Though this was reason yet asper the linguistic theory forms and meaning are changed into the following kinds ,there are –

1. Abstraction
2. concretization
3. Contraction of meaning
4. Deterioration
5. Expantion
6. Extention
7. Generalization
8. Melioration
9. Pejoration
10. Restriction
11. Shift-
12. Specialization
13. Transference

Suppose for example the word “ Das or Slave” how was interpreted in the ancient age In “ The Buddha And His Dhamma ” ( Published by Edn department M.S.1992 English Edition page No- 303 ) discourse between Buddha and Assalayan it referes “ Assalayan ! have you ever heard , asked the Buddha, “ that in the Yona and Kamboja countries and in other adjacent countries, there are only two classes, namely, master and slaves, and that a master can become a slave and vice versa ?

“ Yes ,I have heard so, ” replied Assalayana.

By seeing this quotation as above word Prof Dr.Bhadant Anand kausalyan and Prof.Dharmanand Kosambi the word “ Slave” in Marathi “ Das” also meant “ Doner” in ancient India. By this example it seems in terminology of language in various ages how these words are semantically formed for the purpose of object.

### Some Pali words translated in Marathi – Hindi – Gujarathi ---English

पलि	मराठी	हिंदी	गुजराथी	English
अकालिको	विलंब लावणे	समय बिताना	ढील करवी	Without delay
अधम्मो	असत्य धर्म	अधर्म	बनावटी	irreligion
टनागारिको	घराबाहेर राणारा बौध्द भिक्खु	संन्यास	वानप्रस्थ	An ascetic or Buddhist priest
आचरियो	गुरु	अद्यापक	आचार्य	Teacher, professor Scholar

While studying the Marathi and Pali language we find many other references which show the similarity in pronunciation and words. In fact the grammar of Pali and Marathi language though is different but more part of the grammar has been derived from the Pali –Prakrit language.

### Pali Grammar and Marathi Grammar

Pali literature is divided into three categories

1. Tripitak literature : means Suttapitak – Vinaya Pitak – Abhidhamma Pitak
2. Athakatha literature : means the literature written on Buddha's sermons or on his preaching
3. Literature outside the Tripitak : means the literature after the Mahaparinirvan of Buddha as it seems written at various ages in Ardhamagadhi and Sanskrit language

In Pali language there are 43 Consonants and 10 Vowels . As we find parts of speech in Marathi language , the same kinds of words or parts of speech are found in Pali language. Case ,prefixes, suffixes , affixes, tenses are given in Pali language in which we find similarity. For example—Following conversation has been given –

Pali	Marathi	English
सुप्रभातं !	सुप्रभात !	Good morning
तुम्हें नामं कि ?	तुझे नाव काय आहे ?	What is your name ?
अहं विजयबाहू नामो म्हि	माझे नाव विजयबाहू आहे	My name is Vijaybahu
त्वं कथं वससि ?	तु कोठे राहतो ?	Where do you live ?
अहं नारिंगे नगरे वसामि	मी नारिंगे नगर येथे राहतो	I live in Naringe Nagar
को तुम्हें पिता ?	तुझे वडील काय आहेत ?	What is your father ?
मं पिता महानाम वाणिजो	माझे वडील महानाम व्यापारी आहेत	My father is the merchant Mahanama

In this way conversation is possible in Pali and Marathi language which shows similarity in phonetic pronunciation.

### Conclusion :

The Asiatic Society had formed in 1784 . The first writing- inscription on stone pillar of Samrat Ashok was discovered by Prof. James Prinsep in 1837 . This writing was in Brahmi script. The period of Samrat Ashok was B.C.304 to 232. At the third Dhammasangiti in the presidency of Moggaliputta Tissa all tripitak literature was translated in Deonagari Script. Therefore Samrat Ashok had more credit and contribution to Deonagari script. Thereafter through Pali –Prakrit language in changing ages and in behavioural attitudes pronunciation took place in the form of Marathi language.

## Various Technologies And Skill Development In Sports

Prof. Sanjay K. Kale

Shri Shiwaji College Of Arts Commerce And Science Akola Dist.Akola

### Abstract

*Sport is generally recognised as system of activities which are based in physical athleticism or physical dexterity, with the largest major competitions such as the Olympic Games admitting only sports meeting this definition, and other organisations such as the Council of Europe using definitions precluding activities without a physical element from classification as sports.<sup>[2]</sup> However, a number of competitive, but non-physical, activities claim recognition as mind sports. The International Olympic Committee (through ARISF) recognises both chess and bridge as bona fide sports, and SportAccord, the international sports federation association, recognises five non-physical sports: bridge, chess, draughts (checkers), Go and limits the number of mind games which can be admitted as sports.*

*Sport is usually governed by a set of rules or customs, which serve to ensure fair competition, and allow consistent adjudication of the winner. Winning can be determined by physical events such as scoring goals or crossing a line first. It can also be determined by judges who are scoring elements of the sporting performance, including objective or subjective measures such as technical performance or artistic impression.*

### Introduction

Technology plays an important part in modern sport. With it being a necessary part of some sports (such as motorsport), it is used in others to improve performance. Some sports also use it to allow off-field decision making.

[Sports science](#) is a widespread academic discipline, and can be applied to areas including athlete performance, such as the use of video analysis to fine-tune technique, or to equipment, such as improved [running shoes](#) or [competitive swimwear](#). [Sports engineering](#) emerged as a discipline in 1998 with an increasing focus not just on materials design but also the use of technology in sport, from analytics and big data to [wearable technology](#).<sup>[39]</sup> In order to control the impact of technology on fair play, governing bodies frequently have specific rules that are set to control the impact of technical advantage between participants. For example, in 2010, full-body, non-textile swimsuits were banned by [FINA](#), as they were enhancing swimmers' performances.

### Technologies in sports

Technology has been intrinsic in the development and advancement of Sports, much like it has in other aspects of life. From changing the shape and material used in tennis rackets to make them more effective or developing lighter, more accurate football boots to implementing video referees in various disciplines, technology has changed the dimensions of sport. Sport engineering is a term that is frequently used to describe the technological advances that have helped facilitate a sport and challenge the limits of human performance. Technology, therefore, certainly seems to have a cherished place in sports.

However, there is also a darker side to the use of technology in sport. With significant advances in technology, players now receive competitive advantages from the use of certain sporting equipment, and many view this as anathema to the spirit of sport. This is especially so when you consider that sport has historically been a pantheon for human endeavor and testing the limits of human potential. The use of the term "Technology doping" to refer to this practice, indicates the seriousness and severity of this practice. To put it in context, doping, or the act of enhancing one's performances through the use of drugs is considered one of the gravest crimes one can commit in sport. It is seen as being contrary to the very spirit of sport and has a separate international governing body, the World Anti-Doping Agency, governing the administration and penalizing the use of performance enhancing drugs. To equate technology that might affect performance to the level of doping, indicates the seriousness with which this issue is considered.

A common solution to this problem that's been put forth is that teams can be allowed equal access to sporting equipment, thus levelling the playing field. There are two major problems with this argument. The first is that, in a world obsessed with 'world records', this solution does not help. A prime example of this is seen in the discipline of pole vaulting. The first Olympics saw the use of wooden poles, with a winning height of 3.3m. Subsequently athletes achieved higher heights with steel poles and then with a switch to glass and carbon fibre poles, athletes managed a height of 5.96m. While some of this can be attributed to player skill and technique, it is inevitable, that the equipment has played a part in achieving the record.

The second and more concerning problem is the access to technology and the affordability. Many nations and teams invest a lot of money into research and development and they may not particularly be open to sharing the equipment they have resulted in. At the same time, the high cost of such equipment could also deter a lot of athletes who are simply not in a place to afford them due to a lack of resources. Research carried out by the United States' teams in two disciplines is a principal example of this. American speed skaters wore uniforms manufactured by Under Armour, an American sports apparel company. The unique thing about these uniforms however, was that Under Armour teamed up with Lockheed Martin, one of the foremost aerospace and advanced technologies companies in the world, to develop the suit. As a result, the suit now includes methods of dealing with win resistance to help reduce time and give the athletes an advantage.

### **Self -Technologies**

This represents the most obvious and distributing for many people form of technology due to the potential of fundamentally and often permanently alter an athlete's physical or psychological being/make-up. Banned performance-enhancing drugs are the most recognizes of these technologies. Self-technologies encompass other kinds of athletic innovations, of which are also controversial. Others include surgical procedures, prosthetic/bionic limbs, sport psychological interventions and genetic engineering are all classified as self-technologies. The presence of certain self-technologies in sport may be seen as future such as bionic prostheses (as used by Oscar Pistorius). Scientists working on a muscle-building vaccine derived from engineering genes already recognised the implications of their work for sport. Thus, the generic alteration of athletes or gene doping is a human genome projects to map all the genes in the human body, which can increases the muscle mass.

### **Movement Technologies**

It refers to those devices and procedures that are designed to assess the form and efficiency of an athlete's body. The most common of such include videotape analysis, although there are much more sophisticated instruments that provide detailed computerized information on an athlete's biomechanics. On like the other form of technology movement technologies are often not visible within the competitive arenas. Besides helping to improve an athlete's existing technique, the data yielded by movement techniques may also facilitate conceptual or stylistic shifts that allow the athlete to compete in a mechanically, aesthetically and kinesthetically novel manner.

### **Sports skills**

#### **Planning the Movement**

- Timing the movement
- Think/predict what to do
- React to a situation if different from what you predicted

#### **Bilateral coordination**

- To use both sides of the body together
- Can be a symmetrical movement (star jumps)
- Can be an alternating movement (walking)

#### **Hand Eye coordination**

- Eyes guide the hands to complete movement (catching, striking)  
Coordinated movements start in your large muscles groups and move into your smaller muscle groups working together for a fluid motion.

### **Recapping**

Just learning and mastering sports skills is not enough: it is no longer "Practice Makes Perfect" or "Perfect Practice Makes Perfect". Coaches and athletes must spend as much time, energy and effort learning to perform the fundamental skills of their sport in competition conditions as they do to learning and mastering the basic skill. Coaches should progress athletes systematically through the 7 skills steps to ensure they can perform fundamental sports skills in competition conditions: to do less is to rely on luck, the bounce of the ball and some good fortune - none of which are strategies for consistent success.

### **Conclusion**

Sports as a special social phenomenon, has become a modern technology accessories. The word of sport is changing because of technology, as technology plays large roles in daily lives, it also play a large role in changing the body. Thus, technology continues to change the way sports are played, how injuries are treated, what kinds of sports are played and enhances performance outcomes. Sporting technologies are man-made means developed to reach human interests or goals in or relating to a particular sport.

## Technological Devices And Tools In Sports

Principal Dr. Vivek Gulhane

P.D. Jain Arts College Ansingh Dist. Washim

### Abstract

*Sport includes all forms of competitive physical activity or games which, through casual or organised participation, at least in part aim to use, maintain or improve physical ability and skills while providing enjoyment to participants, and in some cases, entertainment for spectators. Hundreds of sports exist, from those between single contestants, through to those with hundreds of simultaneous participants, either in teams or competing as individuals. In certain sports such as racing, many contestants may compete, simultaneously or consecutively, with one winner; in others, the contest is between two sides, each attempting to exceed the other. Some sports allow a "tie" or "draw", in which there is no single winner; others provide tie-breaking methods to ensure one winner and one loser. A number of contests may be arranged in a tournament producing a champion. Many sports leagues make an annual champion by arranging games in a regular sports season, followed in some cases by playoffs.*

### Introduction

Technology plays an important part in modern sport. With it being a necessary part of some sports (such as motorsport), it is used in others to improve performance. Some sports also use it to allow off-field decision making.

Sports science is a widespread academic discipline, and can be applied to areas including athlete performance, such as the use of video analysis to fine-tune technique, or to equipment, such as improved running shoes or competitive swimwear. Sports engineering emerged as a discipline in 1998 with an increasing focus not just on materials design but also the use of technology in sport, from analytics and big data to wearable technology. In order to control the impact of technology on fair play, governing bodies frequently have specific rules that are set to control the impact of technical advantage between participants. For example, in 2010, full-body, non-textile swimsuits were banned by FINA, as they were enhancing swimmers' performances.

One of the most definitive tests for human athleticism is sports, but this does not mean that technology cannot facilitate it. When administering and officiating sports, technology can succeed where humans may not. This guarantees fair judgment of the performance and ensures that athletes win fairly. Here are five exciting new technologies being used in the sports industry today.

### Sports technoggies

#### Instant Replay

Instant replay is an example of the remarkable technology being used in sports today. With this technology, officials are able to see exactly what happened, providing a second perspective on sports events. Instant replay is used in games like cricket, American football, rugby, soccer, and even in combat sports. However, FIFA banned instant replays on screens in sports arenas during the 2010 World Cup for fear that it might incite fans to behave untowardly.

#### Sensor Tools

Sensor tools are often used to analyze whether a goal is valid or not. It is often used in cases where the naked eye cannot truly tell if a ball went past the goal line. Different sports use varying sensor tools. For example, cricket's Hawk-Eye technology analyzes sound to determine if the ball smashed into the bat before it was caught. Hawk-Eye is also used to determine where the ball would have landed if it had not hit a player's foot. This establishes whether the ball was unfairly blocked from striking the wicket. On the other hand, tennis sensor tools use laser beams to determine whether the tennis ball went out of bounds or not. Sensor technologies help to accurately determine the position of the ball at a given time.

#### Timing Systems

Nobody uses a stopwatch when timing a race anymore. This means that differences in reaction time no longer affect the precision and consistency of a racing event. In many races today, the starter pistol is linked to a clock. Once the pistol goes off, the clock immediately starts timing the race. On the other hand, swimming uses a touch pad placed at the finish lanes as well as wearable inertial sensors to determine performance. Many racing events also use laser beams and photographs to determine winners.

The results of timing systems are often provided to the nearest thousand of a second. However, world and Olympic records are only recorded to the nearest hundredth of a second. This technique was established to eliminate insignificant errors.

### **RFID Chips**

RFID chips are often used to time individual contestants in an event. The devices use antennas that relay wireless signals. RFID chips are often used in long distance races to help broadcasters and viewers track the exact locations of contestants during a race. There are two types of chips used in races: active and passive chips. Active chips have an in-built battery or power source and can determine the exact time a participant crosses a specific line. Passive chips can only be used with sensors placed in a mat because they do not have an in-built power source.

### **Equipment Development**

In sports, safety is a key factor. Equipment manufacturers have developed devices to reduce injuries on athletes. In the 2010 season, special helmets were used in the National Football League after several players experienced concussion injuries. The helmets were designed to absorb shock caused by collisions and protect athletes from suffering head and neck injuries. Similar technology is being used for games like auto racing and hockey to enhance the safety of participants.

Technology has taken over today's modern world. Many professional and amateur sports bodies have embraced new technologies featuring certain gears and gadgets to protect athletes and make it easier to officiate the games.

The increase in technology has also allowed many decisions in sports matches to be taken, or reviewed, off-field, with another official using instant replays to make decisions. In some sports, players can now challenge decisions made by officials. In Association football, goal-line technology makes decisions on whether a ball has crossed the goal line or not. The technology is not compulsory, but was used in the 2014 FIFA World Cup in Brazil, and the 2015 FIFA Women's World Cup in Canada, as well as in the Premier League from 2013–14, and the Bundesliga from 2015–16. In the NFL, a referee can ask for a review from the replay booth, or a head coach can issue a challenge to review the play using replays. The final decision rests with the referee. A video referee (commonly known as a Television Match Official or TMO) can also use replays to help decision-making in rugby (both league and union). In international cricket, an umpire can ask the Third umpire for a decision, and the third umpire makes the final decision. Since 2008, a decision review system for players to review decisions has been introduced and used in ICC-run tournaments, and optionally in other matches. Depending on the host broadcaster, a number of different technologies are used during an umpire or player review, including instant replays, Hawk-Eye, Hot Spot and Real Time Snickometer. Hawk-Eye is also used in tennis to challenge umpiring decisions.

### **Technology in sports**

The world of sport is continually changing over the years, and the use of technology is just one of those areas that has made an impact on many sports in the modern day. See the annual sports technology awards for the latest technology ideas in the world of sport.

Making changes to a sport, with the inclusion of new technologies, has often caused controversy. One criticism of the use of technology is that it can slow down the speed of the game, but on the other hand for many people it makes watching it more enjoyable to see the correct decisions being made. If a new technology is available, and shown to be accurate, then it should be used so that the correct decisions can be made. It is only fair to the players and teams that the right decisions are made.

### **Sports skills**

If they are introduced to sport skills before movement skills, they often struggle to learn the sport skills and can risk injury. Sometimes they get discouraged and quit.

Fundamental movement skills are basic movements such as throwing, kicking, running, jumping, hopping and catching. Fundamental sport skills are these movement skills applied to a sport situation: for example, kicking a soccer ball, running a sprint, jumping up for a basketball rebound, catching a baseball.

By mastering fundamental movement skills, children will find it easier to learn fundamental sport skills. The combination of these two types of skills forms the basis of physical literacy and opens the door to new sports and physical activities and helps build a better, more confident athlete and person.

To learn about each basic skill, please select from the list on the left.

**Planning the Movement**

- Timing the movement
- Think/predict what to do
- React to a situation if different from what you predicted

**Bilateral coordination**

- To use both sides of the body together
- Can be a symmetrical movement (star jumps)
- Can be an alternating movement (walking)

**Hand Eye coordination**

- Eyes guide the hands to complete movement (catching, striking)  
Coordinated movements start in your large muscles groups and move into your smaller muscle groups working together for a fluid motion.

**Conclusion**

Sports as a special social phenomenon, has become a modern technology accessories. The word of sport is changing because of technology, as technology plays large roles in daily lives, it also play a large role in changing the body. Thus, technology continues to change the way sports are played, how injuries are treated, what kinds of sports are played and enhances performance outcomes. Sporting technologies are man-made means developed to reach human interests or goals in or relating to a particular sport. It is a technical means by which athletes attempt to improve their training and competitive surroundings in order to enhance their overall athletic performance. It is the knowledge and application of using specialised equipment and the latest modern technologies to perform tasks more efficiently. Therefore, coaches and athletes must be aware of sport technologies, and make wise choices about how it affects their performances.

## Implimentation Of Skills And Technologies In Sports

Prof. Dr. Kalyan D. Maldure

Arts Commerce College, Yeoda Dist. Amravati

### Abstract

*Technology plays an important part in modern sport. With it being a necessary part of some sports (such as motorsport), it is used in others to improve performance. Some sports also use it to allow off-field decision making. Sports science is a widespread academic discipline, and can be applied to areas including athlete performance, such as the use of video analysis to fine-tune technique, or to equipment, such as improved running shoes or competitive swimwear. Sports engineering emerged as a discipline in 1998 with an increasing focus not just on materials design but also the use of technology in sport, from analytics and big data to wearable technology. In order to control the impact of technology on fair play, governing bodies frequently have specific rules that are set to control the impact of technical advantage between participants. For example, in 2010, full-body, non-textile swimsuits were banned by FINA, as they were enhancing swimmers' performances.*

### Introduction

Sport and exercise science like most areas of life have been affected greatly by technological advancements. It is difficult to imagine modern sports and various sub-disciplines of exercise science without technologies. The use of technologies is, without exception, tainted with frustration and ambivalence. Paradoxically, it is the omnipresence of technology that has contributed most to people's inability to fully grasp the scope and depth of its influence and also uncertainty as to what role various technological advancements play in sports. Indeed, the influx of sport technologies has profoundly changed the landscape of sport and exercise science. Importantly, technology has in many ways changed what we think of as the athletic body. Therefore, this paper examines the impact of technology on sport performance, considering the theories of technology and quest for improved performance, types of sport technologies, the advantages and disadvantages of sport technologies in modern day sports. It is recommended that those managing, handling and using sport must be equipped to make wise choices on the type and use of sport technologies that would assist in the right performance.

### Technology in sports

Technology is not just out there in the world, on the contrary, it is inside us as well. Indeed, on any given day our bloodstreams carry the remnants of ibuprofen and multivitamins, that many individuals have been technologized, or made more technologized, through artificial hearts, contact lenses, and other medical procedures. Technology is describe as any tangible, conceptual, or procedural element of modern sport and exercise science aimed at progress. The flexible definition allows everything from advancements in running shoes and eyewear to different ways of thinking about the body as technological. In the pre-digital age, the application of technologies in sport was heavily concentrated on athlete testing (diagnostics); improved sports equipment through better engineering and design, and utilized more at competitions.

Technology is changing the face of modern sports, sports psychology and coaching. State-of-the-art technologies are used to optimize performance in sports as diverse as cycling, speed-skating, swimming, golf, skiing, surfing, football/soccer ball, tennis racket and ball, running, facilities and many more. Technology in sport today is found in countless forms with each innovation has potentially positive and beneficial outcomes. Understanding the implications of sport technologies involve basic typology used in classifying, these are done in six types of sport technologies though not mutually exclusive, in some cases same technologies could fit into multiple categories. The categories include: self-technologies, rehabilitative technologies, landscape technologies, movement technologies, implement technologies and database technologies. While some of the technologies are yet to make an impact on sport, understanding of many types of sport technologies help to obtain a better perspective on which technological options athletes eventually have access to and impact on sport performance.

### Implement Technologies

It includes equipment that athletes use or that they kick, hurl or otherwise propel. Other examples include football/soccer helmets equipped with warning devices and radios; shark suits that allow swimmers to move efficiently slice through the water and high-tech running shoes, golf clubs and tennis rackets. The interesting controversy involving these kinds of technologies is the use of fish-finding computers in sport fishing. This technology uses tools (pedometer or balance board), media (video, audio, or both),

and social interaction (playing with another person) to persuade individuals to adopt the behaviour without their actually knowing it.

### Rehabilitative Technologies

These are substances and procedures used to treat moderate to severe injuries make up rehabilitative technologies. They also include medicine used by healthy athletes who just want to counter the otherwise debilitating effects of their training regimens. Typically, these technologies are located in sports clinics and training facilities and are administered by specialists in athletic training or sports medicine.

### Sports skills

#### Team Work

'There's no I in team'. It's the most used term in the sporting skills index, and yet the reasons for this are well earned. A boat will only race at its fastest when all rowers move in one rhythm, whilst a goal scored in football is thanks to the varying skillset of the team.

Learning to work with others and appreciating how different talents can contribute to one goal is essential in every workplace and industry.

#### 2. Leadership

From captain of your team to a captain of industry, developing leadership skills in sport is crucial to any future employment, whether you're in charge or not.

Making tough decisions about the team list or the workforce; developing the ability to inspire, motivate and lead your colleagues; these are skills that are always in demand.

#### 3. Time Management

Any university athlete who still wanted to achieve their desired academic grade will know the importance of this.

Juggling daily training sessions with the demands of lectures, seminars and course work act as essential practice for maintaining a work- life balance in the 'real world'.

#### 4. Competition & Sportsmanship

Wanting to win goes hand in hand with accepting defeat and there is no better teacher. A drive for success is sought by every employer, and found in all athletes. However, learning to accept loss is a much tougher lesson, but can be much more valuable.

Whether that teaches you to brush off rejection or learn from your mistakes is your call, but sooner or later most of us will face that in the workplace.

#### 5. Handling Pressure

It's all about adrenalin! From preparing for the big game to standing on the start line of the final race, coping with high-pressure situations is a natural occurrence in sport.

Whilst not all careers are high stress, companies always value an individual capable of coping when times get tough; whether that be staying calm in an interview or meeting a short deadline.

#### 6. Management & Responsibility

Sports clubs don't run themselves. Securing new equipment, raising funds and maintaining club numbers are just some of the tasks required of committee members; providing a brilliant environment to develop and practise managerial skills before leaving university.

#### 7. Commitment

Last but not least, no medal is won without dedication, early starts and personal sacrifice. It's that grit, determination and focus given by all university athletes to their sport that is valued so highly by employers.

### Conclusion

Sports as a special social phenomenon, has become a modern technology accessories. The word of sport is changing because of technology, as technology plays large roles in daily lives, it also play a large role in changing the body. Thus, technology continues to change the way sports are played, how injuries are treated, what kinds of sports are played and enhances performance outcomes. Sporting technologies are man-made means developed to reach human interests or goals in or relating to a particular sport.

## बालगृहातील एक पालक, द्विपालक, अनाथ आणि अन्य किशोरवीन मुलींच्या संवेगात्मक परागमनाचे तुलनात्मक अध्ययन

डॉ. अनुरागीणी रमेशराव बोके,  
मातोश्री विमलाबाई देशमुख महाविद्यालय, अमरावती

### सारांश

या संशोधनाचा मुख्य उद्देश्य बालगृहातील एक पालक, द्विपालक, अनाथ आणि अन्य किशोरवीन मुलींच्या संवेगात्मक परागमनाचे तुलनात्मक अध्ययन करणे हा होता. या संशोधनामध्ये १०० मुलींची निवड करण्यात आली होती. निवड करण्यात आलेल्या समूहांचे वय १२ ते १६ वर्ष या वयोगटातील होते. या संशोधनात नमुन्याची निवड उपलब्ध नमुना पध्दती द्वारे करण्यात आली होती. एक पालक, द्विपालक, अनाथ आणि अन्य अशा विषयांची निवड करण्यात आलेली होती, प्रत्येक समूहा मध्ये २५ मुलींचा समावेश होता. आंकड्यांच्या एकत्रिकरणासाठी संशोधकाने डॉ. रोमा पाल द्वारा निर्मित संवेगात्मक परिपक्वता या प्रश्नावलीचा वापर करून त्यामधील संवेगात्मक परागमनाचे विश्लेषण करण्यात आले होते. सांख्यिकीय विश्लेषणासाठी 'एक मार्गी चरिता विश्लेषण' ; व्दमॅल ल्छव्दद्द चा वापर करण्यात आला होता. सांख्यिकीय विश्लेषणावरून असा निष्कर्ष प्राप्त झाला की, द्विपालक असलेल्या मुलींच्या संवेगात्मक परागमनाची सरासरी सर्वाधिक आहे. परंतु एक पालक, द्विपालक, अनाथ आणि अन्य मुलींच्या संवेगात्मक परागमनामध्ये महत्वपूर्ण अंतर नाही. संशोधनातील महत्वाचे शब्द: संवेगात्मक परागमन, किशोरावस्था

### प्रस्तावना:

किशोरवय हे आयुष्यातील एक महत्वाचा काळ आहे आणि लहानपणापासूनच किशोरवयात परिवर्तनामुळे मोठे बदल घडतात. मोठे बदल जैविक, संज्ञानात्मक, सामाजिक आणि भावनिक, नैतिक. इत्यादी आहेत. भावनिक परिपक्वता ही किशोरवीन मुलांची भावना स्थिर करण्याची क्षमता असते. ज्यात भावनिक प्रगती, स्वातंत्र्य, सामाजिक समायोजन, भावनिक स्थिरता, व्यक्तिमत्त्व एकीकरण इत्यादीची क्षमता असते. किशोर वय म्हणजे बालपण आणि तारुण्यातील स्थित्यंतराचा कालावधी ज्यात जैविक, संज्ञानात्मक आणि सामाजिक-भावनिक बदलांचा समावेश असतो. किशोरवयात सांस्कृतिक आणि ऐतिहासिक परिस्थितीनुसार बदल होतात. जागतिक आरोग्य संघटनेच्या म्हणण्यानुसार तारुण्यावस्थेचा कालावधी शारीरिकदृष्ट्या सामान्य यौवन सुरू होण्यापासून सुरू होतो आणि जेव्हा वयस्कांची ओळख आणि वर्तन स्वीकारले जाते तेव्हा संपते. विकासाचा हा कालावधी साधारणपणे १० ते १९ वर्षे वयोगटातील आहे आणि या श्रेणीतील व्यक्तींना पौगंडावस्था म्हणतात. भावनिक परिपक्वता वयस्क पातळीपर्यंत पोहोचण्याची स्थिती असते. भावनिक विकास जे सामाजिक परिस्थितीवर भावनिक नियंत्रण दर्शवते. एखाद्या व्यक्तीचे व्यक्तिमत्त्व, वागणूक आणि दृष्टिकोन घडविण्यामध्ये भावनिक परिपक्वता एक प्रमुख निर्धारक मानली जाते आणि यामुळे इतरांशी संबंध वाढवण्यास आणि वाढविण्यात मदत होते. कुटुंबातील सदस्यांसह, त्याचे समवयस्क, समाज आणि संस्कृती आणि स्वतःचे वातावरण किंवा तिचे वातावरण यांच्याशी प्रभावी समायोजन. त्याच्या समायोजनाचा पूर्ण आनंद घेण्याची क्षमता त्याच्यात आहे.

### कार्यपध्दती:

या संशोधनामध्ये १०० मुलींची निवड करण्यात आली होती. निवड करण्यात आलेल्या समूहांचे वय १२ ते १६ वर्ष या वयोगटातील होते. या संशोधनात नमुन्याची निवड उपलब्ध नमुना पध्दती द्वारे करण्यात आली होती. एक पालक, द्विपालक, अनाथ आणि अन्य अशा विषयांची निवड करण्यात आलेली होती, प्रत्येक समूहा मध्ये २५ मुलींचा समावेश होता. आंकड्यांच्या एकत्रिकरणासाठी संशोधकाने डॉ. रोमा पाल द्वारा निर्मित संवेगात्मक परिपक्वता या प्रश्नावलीचा वापर करून त्यामधील संवेगात्मक परागमनाचे विश्लेषण करण्यात आले होते. सांख्यिकीय विश्लेषणासाठी 'एक मार्गी चरिता विश्लेषण' ; व्दमॅल ल्छव्दद्द चा वापर करण्यात आला होता.

### अंकांचे विश्लेषण:

या संशोधनामध्ये बालगृहातील एक पालक, द्विपालक, अनाथ आणि अन्य किशोरवीन मुलींच्या संवेगात्मक परागमनाचे तुलनात्मक अध्ययन करण्यासाठी 'एक मार्गी चरिता विश्लेषण' ; व्दमॅल ल्छव्दद्द चा उपयोग करण्यात आले. ०.०५ या सार्थकता स्तरावर पडताळणी करण्यात आली.

सारणी क्र.१: बालगृहातील मुलींच्या संवेगात्मक परागमनाची वर्णनात्मक विश्लेषण दर्शविणारी सारणी

Groups	Count	Sum	Average	Variance
एक पालक	२५	६५४	२६.१६	१०.९७
द्विपालक	२५	७०८	२८.३२	२५.३९

अनाथ	२५	६७८	२७.१२	३०.०३
अन्य	२५	६८७	२७.४८	१९.५९

सारणी क.१ बालगृहातील एक पालक, द्विपालक, अनाथ आणि अन्य किशोरवयीन मुलींच्या संवेगात्मक परागमनाचे वर्णनात्मक विश्लेषण दर्शविण्यात आले आहे. सारणी वरून असे दिसून येते की, एक पालक मुलींची सरासरी २६.१६ आणि तफावत १०.९७ एवढे आहे, द्विपालक मुलींची सरासरी २८.३२ आणि तफावत २५.३९ एवढे आहे, अनाथ मुलींची सरासरी २७.१२ आणि तफावत ३०.०३ एवढे आहे, अन्य मुलींची सरासरी २७.४८ आणि तफावत १९.५९ एवढे आहे. प्राप्त मध्यमानावरून असे दिसून येते की, द्विपालक असलेल्या मुलींच्या संवेगात्मक परागमनाची सरासरी सर्वाधिक आहे.

आलेख क.१:

बालगृहातील मुलींच्या संवेगात्मक परागमनाच्या मध्यमानाची तुलना दर्शविणारा आलेख

सारणी क.२: बालगृहातील मुलींच्या संवेगात्मक परागमनाची तुलना दर्शविणारी सारणी

Variable	Source of Variation	SS	df	MS	F
संवेगात्मक परागमन	Between Groups	६०.०३	३	२०.०१	०.९३१
	Within Groups	२०६३.६८	९६	२१.४९६६७	

(स्वाधिनता मात्रा ३, ९६ व ०.०५ सार्थकता स्तरावरील सारणी एफ. मूल्य २.६९९)

बालगृहातील एक पालक, द्विपालक, अनाथ आणि अन्य किशोरवयीन मुलींच्या संवेगात्मक परागमना संबंधित विश्लेषण सारणी क. १ मध्ये दर्शविण्यात आले आहे. सारणी वरून असे दिसून येते की, संवेगात्मक परागमनामध्ये चारही प्रकाराच्या मुलींमध्ये संवेगात्मक परागमनाची तुलना केली असता असे निदर्शनास येते की, प्राप्त श्च मूल्य (०.९३१) हे (३, ९६) स्वाधिनता मात्रा ०.०५ महत्वपूर्ण स्तरावर सारणी श्च मूल्य (२.६९९) पेक्षा कमी असल्यामुळे त्यामध्ये महत्वपूर्ण फरक नाही, याचाच अर्थ असा की, एक पालक, द्विपालक, अनाथ आणि अन्य मुलींच्या संवेगात्मक परागमनामध्ये महत्वपूर्ण भिन्नता नाही आहे. प्राप्त विश्लेषणाने असा निष्कर्ष निघतो की, एक पालक, द्विपालक, अनाथ आणि अन्य मुलींच्या संवेगात्मक परागमनामध्ये महत्वपूर्ण अन्तर नाही. म्हणजेच या संवेगात्मक परागमनामध्ये पालकांचा विशेष फरक पडत नसल्याचे दिसून येते.

निष्कर्ष

सांख्यिकीय विश्लेषणावरून असा निष्कर्ष प्राप्त झाला की, द्विपालक असलेल्या मुलींच्या संवेगात्मक परागमनाची सरासरी सर्वाधिक आहे. परंतु एक पालक, द्विपालक, अनाथ आणि अन्य मुलींच्या संवेगात्मक परागमनामध्ये महत्वपूर्ण अन्तर नाही. म्हणजेच या संवेगात्मक परागमनामध्ये पालकांचा विशेष फरक पडत नसल्याचे दिसून येते.

**Sports Skills For Better Development Of Sports And Technologies****Prof. Dr. Madhuri Y. Kopulwar**

Adarsh mahavidyalay Dhamangaon Railway Dist.Amravati

**Abstract**

*The use of technology in sports is growing rapidly. In football, for instance, new devices are used for different reasons such as to help referees in decision-making and to quantify the athletes' performance during a game, thus helping the coach to set the training program and the game strategy. The video camera became commonplace in the 1980's and provided sports coaches with a way to capture and analyse sport performance like never before. The video camera is perhaps the single most important development in coaching in the modern era of sport.*

**Introduction**

One of the most famous and recent technologies introduced in football, is called 'goal line technology'. It is used to determine if a ball has crossed the goal line, in order to support the referee. Instead, as regards the quantification of the athletes' performance during a football match, different kind of devices have been produced in the last few years.

Electronic timing controlled by computers is employed to measure performance times of athletes in a great many sports including Athletics, Cycling, Skiing, Bobsled, Triathlon and many more. In the case of Athletics, the electronic timing also measures the athlete's reaction time to the start gun in case the athlete moves too early in the blocks.

**Technology in sports**

The world of sport is continually changing over the years, and the use of technology is just one of those areas that has made an impact on many sports in the modern day. See the annual sports technology awards for the latest technology ideas in the world of sport.

Making changes to a sport, with the inclusion of new technologies, has often caused controversy. One criticism of the use of technology is that it can slow down the speed of the game, but on the other hand for many people it makes watching it more enjoyable to see the correct decisions being made. If a new technology is available, and shown to be accurate, then it should be used so that the correct decisions can be made. It is only fair to the players and teams that the right decisions are made. The video camera became commonplace in the 1980's and provided sports coaches with a way to capture and analyse sport performance like never before. The video camera is perhaps the single most important development in coaching in the modern era of sport.

Electronic timing controlled by computers is employed to measure performance times of athletes in a great many sports including Athletics, Cycling, Skiing, Bobsled, Triathlon and many more. In the case of Athletics, the electronic timing also measures the athlete's reaction time to the start gun in case the athlete moves too early in the blocks.

The Force Platform is an apparatus placed under the feet of the athlete and measures their 'ground reaction force'. This is useful in sports such as Weightlifting and enables measurement of force and acceleration throughout the athlete's performance of a lift. Curiously, the measurement of force is due to the miniscule change in properties of crystals upon which the platform rests.

**Sports skills**

Fundamental movement skills are basic movements such as throwing, kicking, running, jumping, hopping and catching. Fundamental sport skills are these movement skills applied to a sport situation: for example, kicking a soccer ball, running a sprint, jumping up for a basketball rebound, catching a baseball.

By mastering fundamental movement skills, children will find it easier to learn fundamental sport skills. The combination of these two types of skills forms the basis of physical literacy and opens the door to new sports and physical activities and helps build a better, more confident athlete and person.

- Planning the Movement
- Timing the movement
- Think/predict what to do
- React to a situation if different from what you predicted
- Bilateral coordination
- To use both sides of the body together
- Can be a symmetrical movement (star jumps)
- Can be an alternating movement (walking)

**Hand Eye coordination**

- Eyes guide the hands to complete movement (catching, striking)  
Coordinated movements start in your large muscles groups and move into your smaller muscle groups working together for a fluid motion.

Invasion	<ul style="list-style-type: none"> <li>▪ Teamwork</li> <li>▪ decision making</li> <li>▪ spacial awareness</li> <li>▪ tactics</li> </ul> links to sport like rugby, football & hockey
striking and fielding	<ul style="list-style-type: none"> <li>▪ communication</li> <li>▪ travelling</li> <li>▪ striking sending</li> <li>▪ receiving</li> </ul> links to sports like cricket, baseball & rounders
net-wall	<ul style="list-style-type: none"> <li>▪ volley</li> <li>▪ bounce</li> <li>▪ over a barrier</li> <li>▪ spins</li> <li>▪ tactics</li> <li>▪ recovery</li> </ul> links to sports like squash. tennis. volleyball & table tennis
athletics	<ul style="list-style-type: none"> <li>▪ starting</li> <li>▪ jumping</li> <li>▪ running</li> <li>▪ power</li> <li>▪ strength</li> <li>▪ flexibilty</li> </ul> links to sports like track and field

**Conclusion**

Technology play vital role in the human being in particularly in field of sports and games. It helps to avoid mistake in organization and administration of various sports and games at world level. Information Technology in Sports has established scientific discipline, Research activities, improve Learning and coaching, Bio-mechanical analysis and field research have evolved. In future very soon the way computer with be applicable in sports with good quality and best results.

## Role Of ICT In Sports And Their Implimentation

**Prof.Dr. Sima V.Deshmukh**

Smt.S.R. Mohata Mahila Mahavidyalay,  
Khamgaon Dist Buldhana

### Abstract

*The use of technological applications is now widespread across many major sports science disciplines and the adoption of these tools to gain a 'competitive advantage' is an increasingly important feature of elite sports. These innovations have shaped the way data is collected and processed, how information is relayed between coaches and staff or to athletes, and has had a big impact on the way in which athletes are monitored in the daily training and competition environments. This review highlights and provides examples of some of the latest technologies for data collection and processing, feedback methods and training tools. We finish by discussing some considerations for sports scientists and coaches before implementing new technologies.*

### Introduction

The field of sport and exercise science has become highly technical, challenging applied scientists and coaches to match his or her practical application of knowledge with the constant arrival of new technologies. The heavy reliance on technology may be attributed to the inherent desire to gain an advantage over the opposition in elite and competitive sports, in order to provide additional information that can be fed back to coaches and/or athletes. The field of sport and exercise science has become highly technical, challenging applied scientists and coaches to match his or her practical application of knowledge with the constant arrival of new technologies. The heavy reliance on technology may be attributed to the inherent desire to gain an advantage over the opposition in elite and competitive sports, in order to provide additional information that can be fed back to coaches and/or athletes. The field of sport and exercise science has become highly technical, challenging applied scientists and coaches to match his or her practical application of knowledge with the constant arrival of new technologies. The heavy reliance on technology may be attributed to the inherent desire to gain an advantage over the opposition in elite and competitive sports, in order to provide additional information that can be fed back to coaches and/or athletes.

### Sports and technologies

In the past, sports training required extensive paperwork and post-practice effort from both the trainer and the athlete. While the athlete practiced, notes and video were diligently taken and then collated into charts and graphs representing that athlete's performance. After practice, trainer and athlete would work together discussing aches, pains, and thoughts about physical movements that happened much earlier. The system was grueling, but worked as far as athletes and trainers knew. That is until recent technology transformed the field of sports training.

Advanced technology has become smaller, more resilient, and less burdensome over recent years, paving the way for new opportunities, especially in athletics. Now athletes wear sensors that convey real-time information to a trainer's tablet, GPS accurately pinpoints motion, smartphones keep everyone current and wearable tech can prevent injuries. Compared to whiteboards and post-practice reviews, technology has substantially increased athletic potential.

Technology is revolutionizing sports training by live-tracking performances, perfecting athletic movements, enhancing communication and virtually eliminating injuries.

Sport is generally recognised as system of activities which are based in physical athleticism or physical dexterity, with the largest major competitions such as the Olympic Games admitting only sports meeting this definition, and other organisations such as the Council of Europe using definitions precluding activities without a physical element from classification as sports. However, a number of competitive, but non-physical, activities claim recognition as mind sports. The International Olympic Committee (through ARISF) recognises both chess and bridge as bona fide sports, and SportAccord, the international sports federation association, recognises five non-physical sports: bridge, chess, draughts (checkers), Go and xiangqi, and limits the number of mind games which can be admitted as sports.

Sport is usually governed by a set of rules or customs, which serve to ensure fair competition, and allow consistent adjudication of the winner. Winning can be determined by physical events such as scoring goals or crossing a line first. It can also be determined by judges who are scoring elements of the

sporting performance, including objective or subjective measures such as technical performance or artistic impression.

### Information Technology in Sports

The information age was 1970's. The change was brought to the society with the creation of world web (the web). As change in technology, changes channels of communication and message content. The early 1960's, the computer technology establish protocols which become as the internet in 1969. And later development of Hypertext Mark-up Language (HTML) in 1989 that became the basic for the development of web in 1993. The web was introduced to the public at large. During the formative days of the web lot of things was include such as email, blog, face book, twitter, lot of website, journals, you tube etc.,. Another important fact of information technologies being used in sports is seen in the trend analysis done by administrators in sports, franchises and leagues while the most basic functions are storing data used to determine statistics, disclosing the score of a game or uploading pictures for fans to view thorough out a game. In the past, task such as developing rosters (name list) of athletes, managers, officials, timekeepers, drivers and medical staff was took much time to done the work with hand.

The value of sports is very high and it is having very much influence worldwide to bring peace and friendship with each country. Because of the value of sports publicity has increased more it has spread very much fast to all over the world. Information Technology has become an important inter-disciplinary partner for sports, this way physical education has its branches of Sports psychology, Sports Statistics, Biochemistry, Sports Medicine, Kinesiology and Bio-mechanics etc. Taking into consideration its association with other disciplines and its various aspects, computer can be used and are being sued in physical education and sports. Human play, as embodied in sports, is one of most important in expressions of human culture. The games in which people in the society it's reflects their society and culture as a whole. It is said that communication is one dominant contribution to the human being on the planets. The Olympic movement is one of the social movements on human society. The countries from all over the world gathering in one place during summer Olympic games for peaceful is the epitome of intersection of sports and communication. This fact underscores the importance of the media and the Olympics. The presentation will briefly explain the relationship between information technology and sports

### Benefits of Information Technology

Here are some of the ways technology can provide or facilitate most of the types of support that someone trying to become or stay physically active needs. Now a day's computer is widely used as a teaching aid. In this era of globalization black board is quit away. Power point presentations, Video clips, Animation, Graphics, and Sound have become much more effective and needful, CD, DVD, MP3, are more useful in teaching. IN some way computer is applied in sports sciences, scoring systems, computerized test all evaluation can be largely followed. A coach keeps monitoring on the players. A computers helps us if any deficiency is found. Records of the player can be maintained for future plan Selection of players for various game and sports is an important for this multiple regression helps in many ways. Hence computer plays a significant role in storing research data and its analysis. Treatments in sports medicine involve Cardio-Vascular, Flexibility and strength building programme. Sports Medicine is the study, prevention and treatments of sports and fitness related injuries.

### Fundamental Sports Skills

There are four building blocks which are fundamentally essential for all sports. By introducing and developing these components participants will have the skills and understanding which will kick start their life long sporting journey.

#### Throw and Catch

This module develops a wide variety of throwing, rolling & bouncing activities using a variety of developmentally appropriate balls and equipment designed to challenge and stimulate the children's coordination. Activities and session plans are designed to improve confidence in all areas of children's throwing and catching abilities.

#### Balance and Control

Here children focus on activities to build balance and control in a number of uniquely designed activities designed to stimulate the vestibular system.

They will practice skills such as balancing on beams, manipulating their way through tunnels & using numerous different obstacles to improve spatial awareness, depth perception, awareness of others, their environment, balance and coordination.

Our aim is to build confidence and develop skills that will form the foundation for future success.

**Movement and Coordination**

Learning correct movement patterns and techniques are vitally important for future success. In this unit children will combine aspects from the other three units to build and develop fundamental movement patterns and suitable actions for performing sports related tasks.

Children will build confidence in areas such as running, walking, skipping, jumping, bouncing, crawling and even dancing.

**Using External Objects**

Children explore different activities using objects that are external from the body. We incorporate a number of common sporting apparatus such as tennis racquets, hockey sticks, T-ball and large balls.

This module aims to build confidence in using this equipment by developing perception skills such as tracking, speed/timing, depth and hand-eye coordination. The understanding and ability to perform these skills and techniques are required in all sports where striking is required (tennis, golf, cricket, football etc).

**Personal Growth**

The FUNdamental Sport Skills program is holistic in nature and designed to enhance children's personal growth and development.

Physical learning outcomes from participating in the programme include:

- Improved fitness
- Strength
- Balance
- Endurance
- Speed
- Spatial & Sensory awareness
- Gross & Fine Motor Skills

Social and emotional, mental and cognitive learning outcomes are:

- Increased confidence and self believe
  - Cooperative skills
  - Develop problem solving skills
  - Develop life-long habits and a love of sport
- There are four building blocks which are fundamentally essential for all sports. By introducing and developing these components participants will have the skills and understanding which will kick start their life long sporting journey.

**Conclusion**

Technology play vital role in the human being in particularly in field of sports and games. It helps to avoid mistake in organization and administration of various sports and games at world level. Information Technology in Sports has established scientific discipline, Research activities, improve Learning and coaching, Bio-mechanical analysis and field research have evolved. In future very soon the way computer with be applicable in sports with good quality and best results.

## New Technologies And Sports Skills

Dr. Sunil Prabhakar Washimkar  
B.N. College Of Engineering,Pusad

### Abstract

*Sport and exercise science like most areas of life have been affected greatly by technological advancements. It is difficult to imagine modern sports and various sub-disciplines of exercise science without technologies. The use of technologies is, without exception, tainted with frustration and ambivalence. Paradoxically, it is the omnipresence of technology that has contributed most to people's inability to fully grasp the scope and depth of its influence and also uncertainty as to what role various technological advancements play in sports. Indeed, the influx of sport technologies has profoundly changed the landscape of sport and exercise science. Importantly, technology has in many ways changed what we think of as the athletic body. Therefore, this paper examines the impact of technology on sport performance, considering the theories of technology and quest for improved performance, types of sport technologies, the advantages and disadvantages of sport technologies in modern day sports. It is recommended that those managing, handling and using sport must be equipped to make wise choices on the type and use of sport technologies that would assist in the right performance.*

### Introduction

Sport world today is getting technological by combining natural athletic talent with advanced analytics and artificial intelligent to produce the best possible outcomes on the playing field of sports. Sport excite people as a triumph of human effort, behind the scenes are a number of things that go into that triumph and at the top is technology. Technology has been utilized in sport for many years in various forms and play particularly vital role especially for the elite sport. Numerous attempts to define technology have yielded such an array of descriptions that one may resigned to the idea that technology is simply not definable. On the one hand, it is synonymous with science and rational thought, encompassing every little gadget ever held in hands.

Sports require physical exercise, which results in better blood circulation and an overall improved physical stamina. It opens up one's nerves and makes the body more flexible, agile and responsive. Despite all the physical advantages, participating in a sport also works wonders to your brain and overall personality. Sport is a competition where you compete with the opponents. You need to judge their moves and make instant decisions, consequently improving your mental ability. Thinking quickly and responding accordingly has positive impact on a sportsman's brain.

Sports also develop your social skills as you interact with your opponents as well as the teammates. It improves one's ability to work in a team giving him/her an exposure to the team culture, which is beneficial in professional life as well. Even the mere spectators of a sport interact with each other and support their respective teams by shouting and cheering; resulting in overall happiness and a good social behavior.

### Advantages of Sports and Games

Sports and games are very beneficial to us as they teach us punctuality, patient, discipline, teamwork and dedication. Playing sports help us in building and improving confidence level. If we practice sports on regular basis, we can be more active and healthy. Being involved in the sports activities help us in getting protected with numerous diseases such as arthritis, obesity, obese, heart problems, diabetes, etc. It makes us more disciplined, patient, punctual, and courteous in life. It teaches us to go ahead in life by removing all the weaknesses. It makes us bold and gives the feeling of happiness by reducing the occurrence of anxiety and angry. It makes us physically fit and mentally comfort using which we can easily deal with all the problems.

### Types of Sport Technologies

Technology is changing the face of modern sports, sports psychology and coaching. State-of-the-art technologies are used to optimize performance in sports as diverse as cycling, speed-skating, swimming, golf, skiing, surfing, football/soccer ball, tennis racket and ball, running, facilities and many more. Technology in sport today is found in countless forms with each innovation has potentially positive and beneficial outcomes. Understanding the implications of sport technologies involve basic typology used in classifying, these are done in six types of sport technologies though not mutually exclusive, in some cases same technologies could fit into multiple categories. The categories include: self-technologies, rehabilitative technologies, landscape technologies, movement technologies, implement technologies and database technologies. While some of the technologies are yet to make an impact on sport, understanding of many types of sport technologies help to obtain a better perspective on which technological options athletes eventually have access to and impact on sport performance.

**Self -Technologies**

This represents the most obvious and distributing for many people form of technology due to the potential of fundamentally and often permanently alter an athlete's physical or psychological being/make-up. Banned performance-enhancing drugs are the most recognizes of these technologies. Self-technologies encompass other kinds of athletic innovations, of which are also controversial. Others include surgical procedures, prosthetic/bionic limbs, sport psychological interventions and genetic engineering are all classified as self-technologies.

The presence of certain self-technologies in sport may be seen as future such as bionic prostheses (as used by Oscar Pistorius). Scientists working on a muscle-building vaccine derived from engineering genes already recognised the implications of their work for sport. Thus, the generic alteration of athletes or gene doping is a human genome projects to map all the genes in the human body, which can increases the muscle mass. Although it is unclear whether the long-term effects are safe or not.

**Landscape Technologies**

This form of technology involves the sporting environment which include the way spectators watch sport events. Prominent landscape technology is the increase of modern multipurpose sport complexes, complete with JumboTron screens retractable domes, soaring cameras, mondo tracks and artificial grass. The modern athletes have an intimate relationship with the technological sporting landscapes. Track and field athletes use new tactics because they can monitor their competitors on the JumboTrons coming down the home stretch.

**Implement Technologies**

It includes equipment that athletes use or that they kick, hurl or otherwise propel. Other examples include football/soccer helmets equipped with warning devices and radios; shark suits that allow swimmers to move efficiently slice through the water and high-tech running shoes, golf clubs and tennis rackets. The interesting controversy involving these kinds of technologies is the use of fish-finding computers in sport fishing. This technology uses tools (pedometer or balance board), media (video, audio, or both), and social interaction (playing with another person) to persuade individuals to adopt the behaviour without their actually knowing it.

**Rehabilitative Technologies**

These are substances and procedures used to treat moderate to severe injuries make up rehabilitative technologies. They also include medicine used by healthy athletes who just want to counter the otherwise debilitating effects of their training regimens. Typically, these technologies are located in sports clinics and training facilities and are administered by specialists in athletic training or sports medicine.

**Movement Technologies**

It refers to those devices and procedures that are designed to assess the form and efficiency of an athlete's body. The most common of such include videotape analysis, although there are much more sophisticated instruments that provide detailed computerized information on an athlete's biomechanics. On like the other form of technology movement technologies are often not visible within the competitive arenas. Besides helping to improve an athlete's existing technique, the data yielded by movement techniques may also facilitate conceptual or stylistic shifts that allow the athlete to compete in a mechanically, aesthetically and kinesthetically novel manner.

**Database Technologies**

It involves computer innovations that allows athletes and coaches to know everything they need to know about their opponents and themselves. Database programmes have greatly affected the way that many and most professional coaches and players do their business.

Informational feedback technologies (a Nike GPS sports watch; a Polar heart rate monitor) allow individual athletes to continuously track their progress on important physiological and performance parameters. Even when not training for an Olympic gold medal, technology can play a positive and supporting role, helping people to get motivated in adhering to a healthy exercise routine, or in rehabilitating after injury.

Sport skills are voluntary, coordinated tasks with sport-specific goals. Learning basic movement skills is the first step toward learning sport-specific skills for athletic performance. Understanding these basic movements helps coaches make good training decisions for proficiency as well as for fitness and strength and conditioning.

**Conclusion**

Sports as a special social phenomenon, has become a modern technology accessories. The word of sport is changing because of technology, as technology plays large roles in daily lives, it also play a large role in

changing the body. Thus, technology continues to change the way sports are played, how injuries are treated, what kinds of sports are played and enhances performance outcomes. Sporting technologies are man-made means developed to reach human interests or goals in or relating to a particular sport. It is a technical means by which athletes attempt to improve their training and competitive surroundings in order to enhance their overall athletic performance. It is the knowledge and application of using specialised equipment and the latest modern technologies to perform tasks more efficiently. Therefore, coaches and athletes must be aware of sport technologies, and make wise choices about how it affects their performances.

## Misuse Of Mobile Phones In Childhood

**Prof.Santosh Gohokar**

Chintamani Mahaviyalay Ghuggus Dist.Chnandrapur

### Abstract

*The smartphones, being a very new invention of humanity, became an inherent part of human's life. The smartphone combines different sophisticated features. It allows users to keep pictures, memories, personal info, correspondence, health and financial data in one place. Smartphones also became an integral part of modern telecommunications facilities. In some regions of the world, they are the most reliable or only of available phones. The phones allow people to maintain continuous communication without interruption of their movements and distances.*

### Introduction

A world-wide popularization of smartphones and a little knowledge about their side effects triggered the author to start research on effects of smartphones on human health and life. Merriam-Webster dictionary defines the smartphone as "a cell phone that includes additional software functions (as e-mail or an Internet browser)". In this research, the author implies the handheld devices that have cellphone futures. The highlights of this research include recent scientific facts and research analysis of the smartphones on human health and life. The author also discusses advantages and disadvantages of smartphones' usage by people and brings examples of those who refuse to use smartphones. The main key points discussed in the research paper are the effect of electromagnetic waves on human brains; effect of handheld device usage on human's upper extremities, back, and neck; "These days we have Smartphones, Smartcars, Smartboards, Smarteverything, but consider this: if technology is getting smarter, does that mean humans are getting dumber?" Rebecca McNutt 3 effect of the smartphone on drivers; advantages and disadvantages of using smartphones; solutions how to mitigate effect of mobile devices on human health and life.

### Misuse of mobile phones by students

In the modern world even the school students have their own mobile. People are addicted to the mobile phones very much. At the small age the people are started using the mobile phones. The signal from the mobile phones will affect the small children and bring them the brain diseases very soon when they are young. The students are using the phones with all the facilities especially the camera of video recording and video play back. With the camera they are started doing the illegal activities. According to the survey nearly 70 to 80 percentages of the students mobile is having the porn videos and the porn photos. And 10 to 20% of the videos are captured by the mobiles phones by them or by their friends. Most of the students are falling in love in nowadays. The guys are taking their girl friend videos and spreading it through the MMS and uploading it in the web. The boys won't feel for this kind of activity. For the girls it is big thing. At the small age they are not matured and these things will look funny for them. But these things get to know their known one they will commit suicide. The same thing was happened to my friend nearby house. The girl showed her whole body to her boy friend and had sex with him. He took the video and published to everyone. When the girl came to know about that she committed suicide. Her parents were helpless now. Make sure your kids are using their mobile phones in a proper way. Get them a basic mobile until they get the maturity. When the maturity comes they will know about the life and they will get to know what is good and what is bad. The above said things are happening due to the non maturity. Guide them before they get spoiled by looking the outside world. Get them the mobile phone what features they need at their age.

With the advent of advanced technology, growing use of mobile phones and other gadgets are considerably harming the younger generation. Students are developing a strong connection with their mobile phones, which is leading to a massive loss in their concentration and time spent in studies. Parents and teachers usually face problem in combating the distraction of students.

"Anything which is available, accessible, new, fast and related to information and technology tends to attract a lot of people. When children see their parents, family members and everybody in their surroundings using cell phones, they adapt this as a natural phenomenon. Basically, it is the sheer presence which leads to immediate inclination towards technology.

### Here's a list of negative effects caused to a student with excessive use of mobile phones:

**1. Lack of concentration:** According to report published in the Daily Mail, a new study claims that Heavy internet and mobile phone users are prone to lack of concentration and forget things easily This also affects their awareness and eventually lead to passive mind Moreover, this also leads to weak focus and attention

## 2. Stress

Parents want to give all the facilities to their children at a tender age so as to help them carve a perfect career path. They purchase the most expensive and latest smartphone for their children for this, which in itself is the origin of all the problems apparently.

Students generally have peer pressure to maintain their image. Even if they do not want to buy an expensive mobile phone, they will do it for their friend circle.

Children get stressed trying to maintain a proper communication level with parents, teachers and friends on phone

## 3. Low grades

Of course, use of technology has direct implication on education, be it positive or negative. If a teacher is using technology in the classroom, it will benefit a student. However, if a student chatting for long hours on phone, it will definitely leave a negative impact on him/her.

According to a report published in the Guardian, a research done by Louis-Philippe Beland and Richard Murphy, published by the Centre for Economic Performance at the London School of Economics, says: "Ill Communication: The Impact of Mobile Phones on Student Performance" found that after schools banned mobile phones, the test scores of students aged 16 improved by 6.4%.

## Effect of electromagnetic waves on human brains

The smartphone is a source of the eminence of electromagnetic waves. Numerous studies have been conducted in the past years to identify the effect of electromagnetic waves emitted from the cell phones on human health. The topic has been studied for a long time, but in past, it touched on a rather narrow circle of people, mostly staff of broadcast and specialized radio stations. Even at that time, measures taken to protect people from radiation apply only on those who work near powerful sources of radiation. And, despite the revolutionary changes in the field of telecommunications, as well as many discoveries and emissions, the impact of electromagnetic waves of different frequencies hotly debated ever since. As soon as mobile phones more and more part of our lives, the world is continuing research to proof whether cell phones are harmful to human health? Today there is no official statement announced by laboratory or medical center to answer this question. The complexity of the analysis of the statistical data makes the task more difficult for researchers. The impact of harmful radiation emitted from cell phones waves is still being studied.

## Effect on human's upper extremities, back and neck caused by handheld devices

A smartphone or handheld device (HHD) combines advanced computing capability, such as internet communication, information retrieval, video, e-commerce and other features, that make device highly popular among people. According to Pew research center, the number of smartphone owners comprises 56 % of American adults in 2013 and their average daily use of the device is about 195 minutes. The number of cellphone users increases every year. Various studies show the connection between cell phone usage and physical state of the users' health. Some studies report that users complain about a headache, hand tremor and finger discomfort. In his research, Berolo noted that mobile hand-held device users complain of discomfort at least on one area of upper extremities, back or neck. Long-term usage of the device leads to additional tension on tendons, muscles, and perimetric tissue, which could result in visual display terminal (VDT) syndrome. In the similar studies on working with desktop, the scientists recommend regular rest periods, stretching, and exercises.

## Solutions to mitigate impact of cell phones and mobile devices on human health and life

The cell phones and handheld mobile devices have diverse capabilities. The more diverse the functions of the cell phone the stronger are attachment of the user to the device. The extensive cell phone usage leads to various health dysfunctions, including pain in the neck, fingers, fatigue and emotional misbalance. To contrast the massive "cellphonization" some celebrities promote "free cell phone" life. They show that the world is full of attractions, and they can enjoy the life without checking messages every 10 minutes. However, proponents of the "cellphonization" say that cell phone is useful in their daily life and help to keep up with a vigorous rhythm of the modern life. People admit that overuse of cell phone may not be healthy for them; however such technological benefits like immediate access to the Internet, free and fast communication, information storage disregard risks of health dysfunctions. To mitigate the dependency from the cell phones and HHDs, without device denial, some diverse and alternative solutions can be considered. The solutions are not so dramatic to deny any form of cell phones, however at the same time such measures allow the users mitigate dependency and relocate attraction to other activities:

### Solutions

1. Cut off the Internet once the usage reaches the maximum data allotment. The ideal solution is to limit access to the Internet for teenagers. Parents can adjust settings and apply limitation when the data reached the maximum.
2. Socialize without cell phones. Encourage your friends to pile the phones in the middle of the table during the meal and whoever touches or grabs their phone has to pay for the table.
3. A pledge to take a 'tech time-out' There is an excellent opportunity for the device owner to test how strong his/her willpower. The person may pledge to spend some time (at least two hours) without any form of disruption from technology, and once time passed, he/she are allowed to check their phones or other devices.
4. Order to ““Be Present” boxes“ This “innovation” may alert a cell phone owner about his/her addiction to the device. The simple box is intended to store the device from the owner and limit visual attraction to check the cell phone.
5. Interest group A fraternity benefits society providing a support base for its members. This idea can be successfully employed by the people who would like to cut device addition, but needs some support to start and continue the challenge. It is noted that person who pledges to him/herself could easier renege on the commitment, while promises made to the group encourage the person to complete/or at least try the challenge.
6. “Break free” App Surprisingly, but device offers some treatment from addiction to itself. The new Android offers their users a new app for monitoring and taking control of your smartphone usage habits and your digital life. The application called “BreakFree” helps to check owners’ addiction levels, and it also can unplug and disconnect the owner from smartphone. If the device owner spends unhealthy amount of time on smartphone and feels addicted, the BreakFree can help to take control of the life, focus and spend time with the people to care about. In my opinion, the description sounds too good to be true, considering that it comes from the device software developer, and dependency on the new app may strength the addiction.

### Conclusion

Technology can be our best friend, and technology can also be the biggest party pooper of our lives. It interrupts our story, interrupts our ability to have a thought or a daydream, to imagine something wonderful, because we're too busy bridging the walk from the cafeteria back to the office on the cell phone. Smartphones and mobile devices became an integral part of the most people live. The influence of cell phones and their effects on human health are still being tested and studied. There is no one single opinion if cellphones bring harm to human’s health. However, addiction and huge reliance on cell phones carry some risks on human development and health.

## Effects Of Online Games And Impact On Students

Asst. Prof. Mahindra Kumbhare

Chintamani Mahavidyalay Ghuggus, Dist.Chandrapur

### Abstract

Science and technology development causes a lot of changes in any fields including the form of popular games among the Junior and Senior High School students. The traditional games that are famous formerly have been replaced by the modern games like online video game. This article discusses the cause and effect of the online video game playing on the Junior and Senior High Schools students in Malang. This study reveals that students play video games online due to peers pressure; and online video games are liked because they are considered more modern, practical, realistic and varied. Initially, students play online video games to relieve the fatigue due to studying at school, but subsequently, they are becoming addicted, and reach a condition that they find it difficult to stop playing games. This condition will directly affect their achievement in school.

### Introduction

Online gaming is one of the widely used leisure activities by many people. For some people it is said that playing video games has a number of reasons to be played, for it can be a stress reliever, challenge and competition, relaxation, enjoyment, social interaction, and even mentally escaping from the real world.

For most people, on-line gaming is one of the best past time that they acquire specially for teenagers, youngsters and students. According to Kuss & Griffiths, teens who play online games are just having fun. They do not just actually play because of some sort of seriousness, but also because they just want to feel relief. During school hours, students tend to feel stressed due to loads of school works and through playing it will relieve their stress.

It is undeniably questionable that playing online games provide them something that no one can give. According to some researches it is beneficial. It enables the mind of the players to be more active, especially those puzzle-based games. Furthermore, it helps the player to come up with decisions in tight situations, especially those adventure games that keep the players to be alert, active and strategic.

### The Negative Effects of Mobile Games

As hardware power increases, and prices decrease, the smartphone has quietly made quite a foothold as a platform in the [video game industry](#). Many companies are using smartphones to target previously unreachable market segments in video gaming, such as casual gamers and women. As this platform becomes more popular, researchers are beginning to notice potential problems and dangerous behaviors associated with this type of video gaming that has never been observed with any other type of gaming.

### Dangerous Distractions

The first negative effect of mobile gaming is the potential for distraction when performing another more important activity, such as driving. [Video games](#) should never be played while driving. Some mobile games use the internet and have the ability to push information and notifications to a player even when the player is not actively playing. The game may send these alerts while a player is driving, and the player may not identify the alert's origin as being from a game, or be tempted to check it anyways, creating a potentially dangerous situation.

### Loss of Productivity Distractions

Many mobile games have a social aspect, or rely on other players taking turns or participating in the game. In games like this, it's common to have alerts and updates throughout the day about various things happening in different games. It's also very tempting to take several minutes and quickly check on a game, or make a quick move. These micro-transactions can quickly add up over the course of a day or week, resulting in many wasted hours of productivity.

### Sleep Problems

Mobile phones and video games have both been independently linked to disruption in the sleep patterns of children in studies. Jan Van den Bulck, a senior lecturer in psychology at the Catholic University of Leuven in Belgium, found through surveys that one in five teenagers reported being awakened regularly by their mobile devices. Playing [video games](#) on mobile phones will no doubt continue to prevent children from getting the rest they need. Disruption in sleep patterns, like the ones caused by mobile games, have been linked to behavior issues, and sleepiness during the day.

### Out of Control Spending

Many mobile games operate on a "free to premium" business model, where the basic game is free, but extras within the game cost money. Some players have found themselves spending large sums of money while

playing games, in an out of control fashion. These types of games are potentially very dangerous to gamers with any type of addictive personalities. There have also been reports of parents allowing their children to use their devices to play their free games, and their children have somehow managed to purchase items accidentally, with no way for the parent to receive a refund.

Of course, many people do not desire to admit that playing online games may bring about some positive effect as negative consequences seem to them more apparent and serious. It goes without saying that spending [too much time playing online](#) will make a negative impact on a student and usually it can result in:

Lack of time for more important activities like studying or outdoor games. When students dedicate much time to games they so ply do not have time for other activities. Even college assignments lose priority if an important battle is planned in the evening. That results in poor grades and academic problems. Moreover, such students do not go for a walk and exhaust their organisms sitting in front of the screen.

### Causes of Continuous Online Gaming

[The use of computer](#) in almost every bit of life has been the major cause of the spread of online games. Computer applications in various fields including learning centers equipped with internet are things that have been the root of online games. Students of late use computers and laptops for learning. Since continuous reading of the school work has been tiresome to some of them, they have ended up spending time behind the screen just playing games. The young generation of today view gaming as fun and a good way of spending leisure time( Zamani, 2009). Computer games help one to relax his or her mind after long working hours. The use of computer is one of the causes of continuous gaming and later on forms an addictive behavior. The second cause of online games is desire to finish a given level. Online games were created in a way that each and every level has its own challenges to it is hard to proceed to the next level until one fully clinches to the top. Teenagers always desire to disapprove most things in life, and that is why they will play different games in order to finish the given levels. All this creates a sense of satisfaction and at the end one can spend a lot of time behind the computer just trying to finish a certain level. However, these causes of online gaming have led to positive and negative effects.

### Positive Effects

The fact is online gaming is on an increasing note across nations in the world. One of the advantages of online gaming is that, one can access any online game when one's computer is internet connected. The variety of games available enables one to choose what he or she is able to play. In nations where internet is broadband, online gaming has become the predominant entertainment. Also in some online games one can win instant cash when he wins a in a certain field of game. All this are positive achievements that the online platform has provided. Online gaming is significant to youths because, it occupies youth's mind during leisure and helps them avoid getting into bad behaviors that might lead to their death. For instance drug usage. Youths have been subjected to misuse of drugs and engaging in bad behaviors when they are stressed up. Spending time playing games is worth it than spending time misusing oneself in drugs and alcohol. Online games can also expand one's knowledge and experience in the gaming field. When one becomes more knowledgeable on games, he may later on be creative and with capital, he can create games software of which it may bring cash. Lastly online games create competition and hence it boosts the memory and sharpness since online games are made of tricks which are hard to discover. Generally online games have positive effects to one's mind and behavior but one should know that it has the side effects.

### Conclusion

Online games have widely spread over the years. It one of the best entertainments that majority of youths and teens as well as middle aged people consider. Spending time to play a given game is not bad idea, but we should make priorities in our life first. When one has priorities in life gaming will be just a part time activity. Spending time gaming is better off than spending time misusing your body by using drugs. However one should take precautions before engaging in a gaming activity.

## Role Of Library In Teaching And Learning

**Prof.Mangesh Jamdade**

Chintamani Mahaviyalay Ghuggus

Dist.Chnandrapur

### Abstract

*Libraries have been identified as one of the key elements for open access to information, which is crucial to educational development. Public and institutional collections and services may be intended for use by people who choose not to or cannot afford to purchase an extensive collection themselves, who need material no individual can reasonably be expected to have, or who require professional assistance with their research. In addition to providing materials, libraries also provide the services of librarians who are experts at finding and organizing information and at interpreting information needs. Libraries often provide a place of silence for studying.*

### Introduction

Over the years, many libraries have supported education efforts by providing teaching resources, information and referral services. A more active approach has been taken by libraries offering educational classes or one-to-one tutoring programs. Many libraries have outreach programs designed to meet the needs of specific groups of people with limited educational skills. Library resource materials are distributed to the institutionalized, including those in prisons, hospitals, rehabilitation centers, and group homes for the elderly and disabled.

In addition, some libraries offer programs for groups at risk for education-related problems. Adolescents have been targeted because lack of education has been associated with other problems including crime, pregnancy, unemployment, drug and alcohol abuse, and school failure. After-school and summer educational programs have sought to encourage young people to become employable, contributing members of the community and generally to raise their self-esteem. Strategies have included homework help sessions, peer tutoring, and peer-group reading sessions.

Families have been targeted because lack of education seems to be passed from one generation to the next: children whose parents are functionally uneducated are twice as likely as their peers to be functionally uneducated. In family educational programs, emphasis is on the parent's role as the child's first teacher. Parents, who may have been inspired to seek education training by concern for their children, are taught interactive language activities for use with infants and young children. Some libraries invite entire families to share in reading activities and book talks, with each member borrowing a book to take home.

### Library Importance

A library is a collection of sources, resources, and services, and the structure in which it is housed; it is organized for use and maintained by a public body, an institution, or a private individual. It can mean the collection itself, the building or room that houses such a collection, or both. The term 'library' has itself acquired a secondary meaning: "a collection of useful material for common use." This sense is used in fields such as computer science, mathematics, statistics, electronics and biology. It can also be used by publishers in naming series of related books,

Libraries are defined as organized collection of published and unpublished books and audiovisual materials with the aid of services of staff who are able to provide and interpret such material as required, to meet the informative research, educational and recreational needs of its users. Libraries are regarded as agencies through which sources of information of accumulated knowledge and experiences are selected, acquired, organized, preserved and disseminated to those who need them. Libraries are essential tools in learning at any level. It is the intellectual centre of the society containing records not only the intellectual but also of cultural, economic and social inclination. With the provision of wide variety of information sources, users of libraries are exposed to different information with their respective values. They also give users the opportunity to learn and continue learning throughout their lives

Libraries are established for the systematic collection, organization, preservation and dissemination of knowledge and information. It is very important for man to preserve and maintain the valuable knowledge and information contained in the books and documents because we want to preserve our knowledge and wisdom for the coming generations. By preserving the documents in a library this knowledge can be made available to others so that they can benefit from it.

The central mission of a library is to collect, organize, preserve, and provide access to knowledge and information. In fulfilling this mission, libraries preserve a valuable record of culture that can be passed down to succeeding generations. Libraries are an essential link in this communication between the past, present, and

future. Whether the cultural record is contained in books or in electronic formats, libraries ensure that the record is preserved and made available for later use. Libraries provide people with access to the information they need to work, play, learn, and govern.

People in many professions use library resources to assist them in their work. People also use library resources to gain information about personal interests or to obtain recreational materials such as films and novels. Students use libraries to supplement and enhance their classroom experiences, to learn skills in locating sources of information, and to develop good reading and study habits. Public officials use libraries to research legislation and public policy issues.

### **Role of library in teaching and learning**

Education' and 'library' are two inseparable—indivisible concepts, both being fundamentally and synchronically related to and co-existent with each other. One cannot be separated from the other, and the existence of one is impossibility without the other. None of them is an end in itself; rather both of them together are a means to an ultimate end. One dies as soon as the other perishes. One survives as long as the other exists. This inter-relation, this co-existence, this dependence of one upon the other have been coming down from the birth of human civilization to the posterity through a process of evolution in accord with varied needs, changes, and circumstances of various stages of human life.

Education is an 'aggregate of all the processes by means of which a person develops abilities, altitudes, and other forms of behaviour positive value in the society in which he lives. It is a 'social process by which people are subjected to the influence of a selected and controlled environment (especially that of the school) so that they may attain social competence and optimum individual development. Education is thus the result of acquired knowledge and the cumulation of observations and experiences, while a library is both the fountain and source, and the protector and storehouse of that knowledge and experience. Education cannot exist alone in the absence of library, and library has no meaning if it cannot impart education. Education is an eye-opener to a human being ;it gives him perfect, adequate knowledge, creates civic and rational sense, withdraws him from the subjection of low habits, selfish passions, and ignoble pursuits, and thus educes him from abysmal darkness to limpid and perspicuous enlightenment, while library is an instrument of self-education, a means of knowledge and factual information, a centre of intellectual recreation, and a beacon of enlightenment that provide accumulated—preserved knowledge of civilization which consequently enrich ones mental vision, and dignify his habit, behaviour, character, taste, attitude, conduct, and outlook on life. Library makes available all the records of knowledge of the past and 'present, whereas a man acquires that conserved knowledge to choose as between good and bad, the right or wrong, which distinguish him from the other animals who have no rational power or thinking .

Education has been defined as a complex of social processes of acquiring knowledge and experience, formally or otherwise. Education involves the total apparatus used for the development of the individual .

The library enables the individual to obtain spiritual, inspirational, and recreational activity through reading, and therefore the opportunity of interacting with the society's wealth and accumulated knowledge. The library can be seen as an extension of education. Library are needed to keep the skills that have been acquired through literacy classes alive by the provision of good literature. .

Education and Library are two inseparable indivisible concepts, both being fundamentally and synchronically related to and co-existent with each other. One cannot be separated from the other. None of them is an end in itself; rather both of them together are a means to an ultimate end. One dies as soon as the other perishes. One survives as long as the other exists . This inter-relation, co-existence, this dependence of one upon the other have been coming down from the birth of human civilization to the posterity through a process of evolution in accord with varied needs, changes, and circumstances of various stages of human life.

Education cannot exist alone in the absence of library and library has no meaning if it cannot impart education. A Good well equipped library is a sine qua non for the intellectual, moral, and spiritual advancement and elevation of the people of a community. It is an indispensable element of the absolute well being of the citizens and that of the nation at large. People acquire education through certain institutions, schools, agencies, welfare bodies, museums and organizations, and the library is the most outstanding of such institutions. A school, a club, and enterprise of society can never alone impart education, each of them is dependent upon a library –a centre of wholesome education, and the quencher of thirst for concrete, fathomless, ultimate knowledge.

### **Libraries inspires education**

When individuals of all ages have the opportunity to explore information that matters to them, various forms of education can emerge. Libraries have tools to inspire education of all ages.

- They teach skills and strategies individuals need to learn and achieve They are partners in education, developing curricula, and integrating resourced into teaching and learning.
- They teach the skills individuals need to become effective users of ideas and information.
- They seek, select, evaluate, and utilize electronic resources and tools and instruct individuals and educators in how to use them.
- Library is the ideal neutral and non threatening environment for learning, formal and informal, to occur
- Libraries have a record of personal service and impartiality.
- They readily partner with other learning providers and with other libraries.
- They provide public ICT facilities and support.

### The role of the library resources in education is to:

Facilitate the planning and implementation of learning programs that will equip students with the skills necessary to succeed in a constantly changing social and economic environment. Through resource-based programs, students acquire skills to collect, critically analyze and organize information, problem-solve and communicate their understandings.

Provide and promotes quality fiction to develop and sustain in students the habit and enjoyment of reading for pleasure and to enrich students' intellectual, aesthetic, cultural and emotional growth.

Cater for differences in learning and teaching styles through the provision of and equality of access to, a wide range of materials, fiction and non-fiction, print, audio, video and digital.

Provide educators with access to relevant curriculum information and professional development materials within and outside the educational system; and opportunities to cooperatively plan implement and evaluate learning programs which integrate information resources and technologies.

### Conclusion

Libraries are vital institutions, which cannot be separated from education. The provision of libraries is crucial and indispensable to education in a nation. Therefore, whatever is done to improve the quality of education is done to improve the nation. The absence of libraries will have negative effects on education. Therefore, individual learners should be encouraged to use them.

## Education And Communication Problems In Rural Area

Dr. Sonali D. Vagare

Dr. Babasaheb Ambedkar Vidyalaya Amravati.

### Abstract

With 65% of India's population residing in rural areas, we need to look at and deal with the problems stopping us from achieving universal education. The overall literacy rate in Rural India is 64.7%. In Rural India, the literacy rate among females is 58.8% and among males is 72.3%.

Rural area is the backbone of India. "The real India lives in the villages", this saying is as true as it was when the country got independence 65 years back. As more than half of population of the country lives in villages.

Education is the crucial motivating factor of the development of economy. Like in the body of the human being liver is responsible for the proper functioning of the body, in the same way education acts as a backbone for the economy. Education has a desirable controlling influence over development of the rural individual, family, community and society that leads to reduced poverty and controlled unemployment. Functions of education include imparting social change, making rural people aware about their rights, improving individual standard of living, providing employment and income opportunities to rural people and so on. The present system of education in India was introduced by the British in the 20th century. The system so given has a western style and content, ignoring traditional structures and so has declined. After independence, the Central Government has taken the responsibility of technical and higher education. The central government through the Ministry of Human Resource Development's Department of Education and the governments at the states formulated the education policy and planning.

### Introduction

The World Bank has defined Rural Development "as a strategy designed to improve the economic and social life of a specific group of people- the rural poor." Half of the population lives in the villages. The contribution of rural India towards the economic development is not hidden from any of us. Earlier the people used to correlate rural development with agricultural development and thus focus was only on the increased agricultural production. But with the changing time, this misbelief has also changed. Today the concept of rural development is fundamentally different that it was used to be 2 or 3 decades ago. Now rural development includes development improving the quality of life of rural people. It constitutes improvement in their health and nutrition, education, safe and healthy environment, fairness in income distribution and no discrimination in gender.

To explore this significant role of education in India especially in rural India, this paper tries to explain the present condition of the rural education failure and problems being faced by rural education.

### Objectives

- To make people in the rural area aware about the importance of education in day to day life.
- To improve education and teaching quality in rural area.
- To improve resources required in schools of rural area.
- To make government aware about education resources lacking in rural area.

### Rural education scenario in India

Majority of India still lives in villages and so the topic of rural education in India is of utmost importance. A survey named called the Annual Status of Education Report (ASER), shows that even though the number of rural students attending schools is rising, but more than half of the students in fifth grade are unable to read text book and are not able to solve simple mathematical problems. Not only this, the level of math's and

reading is further declining. Though efforts are being made, they are not in the right direction. The reason cited for this problem in surveys is the increasing number of single classroom to educate students from more than one grade. In some states attendance of teachers and students is also declining. These are a few reasons why schools have failed to educate rural India.

Quality and access to education is the major concern in rural schools as there are fewer committed teachers, lack of proper text books and learning material in the schools. Though Government schools exist, but when compared to private schools then quality is a major issue. Majority of people living in villages have understood the importance of education and know that it is the only way to get rid of poverty. But due to lack of money they are not able to send their children to private schools and hence depend upon government schools for education. Above that, in some of the government schools there is only one teacher for the entire school and if they don't show up at work, then it is a holiday. If the quality along with number of teachers and, that too committed teacher can be improved in these schools, then aspiring rural children and India can fulfill their dreams of doing something great

Right to education is the primary right of every citizen of India, but condition of rural education is still improving; the condition of rural school is still very poor. There are very few schools in the rural areas and children's have to travel far away distances to avail these facilities and most schools in these locations do not provide drinking water.

The quality of the education is also poor. The teachers get very less income so, most of the time teachers are either absent or they do not teach properly. Every village is not provided with school which means that students have to go to another village to get education. Owing to this parents usually do not send their daughters to school, leading to a failure in achieving rural education in India.

Poverty is another setback. Government schools are not as good and private schools are expensive. This results in a very low number of students actually clearing their secondary education and taking admission in colleges for further studies. So the drop-out-rate at the secondary level is extremely high in villages. Only parents who can afford college education send their kids to secondary schools. If parents are not able to send their wards for higher education then all their previous efforts get wasted as completing just secondary education means a low paying job and the person is again struck in the same never ending cycle of money, life and poverty.

Problems faced in rural education in India

India is developing rapidly and many initiatives had been taken for the development of rural area. These are several problems being faced by the schools running in rural India.

#### Some of these problems are below

- Lack of infrastructure.
- Low income of teachers.
- Lack of transportation facility.
- Less number of schools in rural area.
- Lack of basic amenities.
- Lack of extra-curricular activities.
- Deficiency of funds to school in rural area.

Above are the basic problems because of that rural education is still developing and more attention is required by the government. Some of the initiatives has been taken by the government through schemes. Educational programmers taken by Indian government in rural areas are as below ...

- The right of children to free and compulsory education act 2009.
- Non formal education scheme – introduced in 1979-80.
- Operation black board-launched in 1987.
- Mahila samakya –launched in 1989 aims at education for women's equality.
- District primary education programme –launched in Nov 1994.
- National programme of national support to primary education (school meal programme) - launch on 15 august 1995.
- Sarva Shiksha Abhiyan- launch in March2002.
- Community Mobilization and participation scheme.
- Reasons for the failure of rural education

The teachers do not get any support from the parents in villages on the part of curriculum. Parents in villages want that their children should be provided with education related to agriculture so that they can help them. This thinking act as an obstacle in bringing the children to schools.

In several schools of villages, the premise of school is also not sufficient to accompany all the students.

Lack of illiteracy on the part of the parents also acts as an obstacle in attracting the students in rural areas.

- As teachers in rural areas get very less salary in comparison to the teachers teaching in schools located in towns or cities, they do not give their 100%.
- Students in the rural areas are also not interested in education because it is not appealing as any computers, laptops, internet facility made available for them.

### Suggestions for improving rural education in India

Some of the suggestions that can be adopted for improving the education system in rural area .

- The curriculum of rural education can be updated and should accompany education related to farming, gardening etc.
- To attract more number of students and creating enthusiasm in them for learning, visual aids like projectors, television etc. can be used to show some educational movies.
- To motivate the teachers they should be made to feel proud that by teaching in the rural or remote area they are acting as a helping hand in the development of economy.
- Some special sessions or classes can be conducted for the parents to make them realize the significance of education for their children.
- Increase the number of teachers in the school and motivate them by recognizing and rewarding on timely basis for the work they are doing in rural area.
- To appreciate the efforts of students, some type of scholarships either in the form of gifts or books can be given to them who perform well in the class.

### Conclusion

Suggestions are easy way to conclude any problems. The reality is different than the emaginated picture of ideal economy of developing country. The ground level problems are might be different. So, for the healthy economy, rural condition must be changed with more than the committed hard work on ground level. Government must understand the difficulties faced by the people from the downward.

The development of any country depends fully on the education of its people. Basic education is viewed worldwide as human right. For this reason 'The Right of Children to Free and Compulsory Education Act, 2009 came into picture. All educational innovations require strong community support and participation. 'People's acceptance and participation' can be used as an indicator for measuring the progress of the various programmes. Therefore to spread awareness among the rural people about the need and significance of education more efforts have to be taken by the government, educated youth of urban towns and cities, teachers, young scholars etc.

## New Technology And Sports Skills

**Dr. Santoshi R .Saulkar**

Hanuman Vyayam Shala Krida Mandal's  
Physical Education College, Yavatmal.[M.S.]

### Introduction

Discover the key advancements in technology past and present that have contributed to making sport better for everyone. The worlds of sports and technology are colliding like never before, with administrators recognizing the possibilities of being smarter both on and off the field of play.

Innovations are being used at a boardroom level to make organizations more efficient and to generate more income, while technology is changing how sport is being played at an elite level. Fans too are benefiting from new services, applications and ways they can interact with sport. Every coach, every athlete, every media commentator and every fan will tell you that the fundamental element of all sports is skill.

Technology Has Improved The Accuracy, Enjoyment And Experiences Of Both Athletes And Spectators At Sporting Events.

### Kicking and passing in football.

- Throwing and catching in cricket and baseball.
- Diving, turning and finishing in swimming.
- Tackling and passing in rugby and rugby league.
- Passing and shooting in basketball and netball.

Learning, practicing and mastering the basic skills of sport is one of the foundations of coaching, sports performance and athletic training. However, just learning a sports skill is only the first step in the process. Only fools believe that "Practice Makes Perfect" if the goal is to win in competition. Athletes do not fail because their skill level is poor: they fail because their ability to perform the skill in competition conditions is poor and that's a coaching issue.

### What is the purpose of technology in sport?

In other words technology is used by performers, coaches and officials to try to improve performance; it is used to enhance the experience of spectators; it can be used to improve a sport.

### Five Exciting New Technologies Being Used in the Sports Industry

One of the most definitive tests for human athleticism is sports, but this does not mean that technology cannot facilitate it. When administering and officiating sports, technology can succeed where humans may not. This guarantees fair judgment of the performance and ensures that athletes win fairly. Here are five exciting new technologies being used in the sports industry today.

#### Instant Replay

Instant replay is an example of the remarkable technology being used in sports today. With this technology, officials are able to see exactly what happened, providing a second perspective on sports events. Instant replay is used in games like cricket, American football, rugby, soccer, and even in combat sports. However, FIFA banned instant replays on screens in sports arenas during the 2010 World Cup for fear that it might incite fans to behave untowardly.

#### Sensor Tools

Sensor tools are often used to analyze whether a goal is valid or not. It is often used in cases where the naked eye cannot truly tell if a ball went past the goal line. Different sports use varying sensor tools. For example, cricket's Hawk-Eye technology analyzes sound to determine if the ball smashed into the bat before it was caught. Hawk-Eye is also used to determine where the ball would have landed if it had not hit a player's foot. This establishes whether the ball was unfairly blocked from striking the wicket. On the other hand, tennis sensor tools use laser beams to determine whether the tennis ball went out of bounds or not. Sensor technologies help to accurately determine the position of the ball at a given time.

**Timing Systems**

Nobody uses a stopwatch when timing a race anymore. This means that differences in reaction time no longer affect the precision and consistency of a racing event. In many races today, the starter pistol is linked to a clock. Once the pistol goes off, the clock immediately starts timing the race. On the other hand, swimming uses a touch pad placed at the finish lanes as well as [wearable inertial sensors](#) to determine performance. Many racing events also use laser beams and photographs to determine winners. The results of timing systems are often provided to the nearest thousandth of a second. However, world and Olympic records are only recorded to the nearest hundredth of a second. This technique was established to eliminate insignificant errors.

**RFID Chips**

RFID chips are often used to time individual contestants in an event. The devices use antennas that relay wireless signals. RFID chips are often used in long distance races to help broadcasters and viewers track the exact locations of contestants during a race. There are two types of chips used in races: active and passive chips. Active chips have an in-built battery or power source and can determine the exact time a participant crosses a specific line. Passive chips can only be used with sensors placed in a mat because they do not have an in-built power source.

**Equipment Development**

In sports, safety is a key factor. Equipment manufacturers have developed devices to reduce injuries on athletes. In the 2010 season, special helmets were used in the National Football League after several players experienced concussion injuries. The helmets were designed to absorb shock caused by collisions and protect athletes from suffering head and neck injuries. Similar technology is being used for games like auto racing and hockey to enhance the safety of participants.

Technology has taken over today's modern world. Many professional and amateur sports bodies have embraced new technologies featuring certain gears and gadgets to protect athletes and make it easier to officiate the games.

Six Technological Advancements That Have Changed Sports Alas, technology never rests, there are always new ideas, tests, and problems to solve. But in this moment of time, here are six technologies which have changed the sports world:

**Hawk-Eye Technology**

Just as it sounds, this technology uses 6-7 high-end cameras situated above the field of play (e.g. a birds-eye view) to analyze the flight and trajectory of an object being used in sports competition. Most commonly used in tennis, cricket, rugby and volleyball, Hawk-Eye Technology has been in use since 2006 in tennis and is more accurate than a judge's eye.

**Benefits of this technology:**

Hawk-Eye technology helps to take an error-free decision in cricket, lawn tennis, rugby league, football, and baseball.

This technology has reduced the criticism of the players and spectators about the decision of the match referee.

By analyzing the movement of the balls through this technology, the umpire can take an error-free decision quickly when the game is going on.

The only downside of Hawk-Eye technology is that we haven't been introduced to the next John McEnroe. Without terrible calls by chair umpires, there are no more wildly entertaining tantrums and racket throwing.

**With Hawk-Eye Technology, you just don't see this anymore:****HANS device**

A vast majority of technological advancements in sports revolve around safety, and the HANS (Head and Neck Support) device used in motorsports is one of the most famous. At the time of Dale Earnhardt's death on the track at the Daytona 500 due to head and neck trauma, Thomas Gideon, senior director of Safety, Research & Development of NASCAR, claims that only about six drivers were wearing a HANS device. That

moment changed the sports as more drivers adopted this technology geared towards saving their lives in the event of a tragic crash.

Details of a HANS device:

U-shaped device which is placed behind the neck and its two arms are placed over the pectoral muscles of the chest

It is only connected to the helmet by two anchors on each side and supported by the shoulders

A HANS device keeps the head from whipping forwards and backward in a crash, while also preventing excessive twisting movements

### Video Technology

There is no way that would happen in today's sports era. Everything is live, and not just on your home TV, but on your smartphone, tablet, and the overhead screen in your local church. In today's sports world you are never far from live access. But it isn't just access that has adapted to the times, it is features. Instant replay, 1st and ten lines, pitch trackers, HD TV sets, DVR's – the experience of watching sports has changed dramatically for the better.

### Wearable Computers

Advancement in the world of safety and monitoring, wearable computers allow for real-time tracking of an athlete's health. Since their creation, the incidents of dehydration, heart attacks and worse, have dramatically decreased.

When Minnesota Vikings offensive lineman Korey Stringer died of heat stroke during training camp in 2001, companies began to investigate ways to monitor health in real-time and stave off tragedies like this. Wearable tech has made a difference in the lives of many athletes, by supervising pulse rate, hydration, and temperature through its wireless and microscopic health monitoring system.

### Prosthetic Devices for Disabled Athletes

What used to be the end of the story is now just a beginning of a new one. People with disabilities, or lost limbs, never had a chance to compete, but with the advancement of prosthetic technology more and more physically disabled are competing like before. Dr. Rory A. Cooper is a leader in developing cutting-edge prosthetics. As the Director of Human Engineering Resources Laboratories at the University of Pittsburgh, Dr. Cooper places athletes in body suits embedded with motion sensors. The athletes then go through a series of drills based around athletic movement, the cameras and the wearable tech report back on their movements. The prosthetic design process begins after this motion study, which in the end creates a custom prosthetic that moves with their body. Nothing off the shelf here.

### Ingestible Thermometer Pills

If you are an athlete, it is important to supervise visceral organs, temperature and heart rate. But it is not always possible to check it manually. To observe the body temperature accurately, some trainers are using indigestible pills. When you swallow a pill, it moves around the gastrointestinal tract and transmits vital information of the body to medical personnel. So if there is any problem in your body, it can be solved before any accident. It will help to minimize death from heat exhaustion which is the second most common reason for athlete fatalities.

**Beneficial Skills And Technologies And Development In Sports****Dr.Sudhir W.Khade**

Late Pundlikrao Gawali Arts And Science Mahavidyalay Shirpur(Jain)Dist.Washim

**Abstract**

*The world of sport is continually changing over the years, and the use of technology is just one of those areas that has made an impact on many sports in the modern day. See the annual sports technology awards for the latest technology ideas in the world of sport. Making changes to a sport, with the inclusion of new technologies, has often caused controversy. One criticism of the use of technology is that it can slow down the speed of the game, but on the other hand for many people it makes watching it more enjoyable to see the correct decisions being made. If a new technology is available, and shown to be accurate, then it should be used so that the correct decisions can be made. It is only fair to the players and teams that the right decisions are made.*

**Introduction**

Technology is not just out there in the world, on the contrary, it is inside us as well. Indeed, on any given day our bloodstreams carry the remnants of ibuprofen and multivitamins, that many individuals have been technologized, or made more technologized, through artificial hearts, contact lenses, and other medical procedures. Technology is describe as any tangible, conceptual, or procedural element of modern sport and exercise science aimed at progress The flexible definition allows everything from advancements in running shoes and eyewear to different ways of thinking about the body as technological. In the pre-digital age, the application of technologies in sport was heavily concentrated on athlete testing (diagnostics); improved sports equipment through better engineering and design, and utilized more at competitions.

Technology increasingly is playing a leading role in the development of sport and enhances performance in all faces. Thus, applications of technology allow for more effective training, stimulations, management and tracking of athletes, accuracy of results, enhanced spectator viewing, developing performance and preventing injuries, amongst many more functions (Busch, 1998). Technology in sports is a technical means by which athletes attempt to improve their training and competitive surroundings in order to enhance their overall athletic performance. It is thought of as a technical means or instrument utilized to pursue chosen ends. Hence, the paper investigates the impact of technology on sport performance.

**Technologies used in sports****Instant Replay**

Instant replay is an example of the remarkable technology being used in sports today. With this technology, officials are able to see exactly what happened, providing a second perspective on sports events. Instant replay is used in games like cricket, American football, rugby, soccer, and even in combat sports. However, FIFA banned instant replays on screens in sports arenas during the 2010 World Cup for fear that it might incite fans to behave untowardly.

**Sensor Tools**

Sensor tools are often used to analyze whether a goal is valid or not. It is often used in cases where the naked eye cannot truly tell if a ball went past the goal line. Different sports use varying sensor tools. For example, cricket's Hawk-Eye technology analyzes sound to determine if the ball smashed into the bat before it was caught. Hawk-Eye is also used to determine where the ball would have landed if it had not hit a player's foot. This establishes whether the ball was unfairly blocked from striking the wicket. On the other hand, tennis sensor tools use laser beams to determine whether the tennis ball went out of bounds or not. Sensor technologies help to accurately determine the position of the ball at a given time.

**Timing Systems**

Nobody uses a stopwatch when timing a race anymore. This means that differences in reaction time no longer affect the precision and consistency of a racing event. In many races today, the starter pistol is linked to a clock. Once the pistol goes off, the clock immediately starts timing the race. On the other hand, swimming uses a touch pad placed at the finish lanes as well as wearable inertial sensors to determine performance. Many racing events also use laser beams and photographs to determine winners.

The results of timing systems are often provided to the nearest thousand of a second. However, world and Olympic records are only recorded to the nearest hundredth of a second. This technique was established to eliminate insignificant errors.

**RFID Chips**

RFID chips are often used to time individual contestants in an event. The devices use antennas that relay wireless signals. RFID chips are often used in long distance races to help broadcasters and viewers track the exact locations of contestants during a race. There are two types of chips used in races: active and passive chips. Active chips have an in-built battery or power source and can determine the exact time a participant crosses a specific line. Passive chips can only be used with sensors placed in a mat because they do not have an in-built power source.

**Equipment Development**

In sports, safety is a key factor. Equipment manufacturers have developed devices to reduce injuries on athletes. In the 2010 season, special helmets were used in the National Football League after several players experienced concussion injuries. The helmets were designed to absorb shock caused by collisions and protect athletes from suffering head and neck injuries. Similar technology is being used for games like auto racing and hockey to enhance the safety of participants.

Technology has taken over today's modern world. Many professional and amateur sports bodies have embraced new technologies featuring certain gears and gadgets to protect athletes and make it easier to officiate the games.

**The 7 Skills Steps of Performance Practice:****Sports Skills Step 1:**

Perform the **Skill**. This is the first, and unfortunately for most athletes, the last step in their skills learning program. Coaches come up with a drill, athletes copy it, try it, learn it.

**Sports Skills Step 2:**

Perform the **Skill very well**. Skills mastery comes from regular practice combined with quality feedback from coaches and may incorporate the use of video and other performance analysis technologies – including the best one of all...the coach's eye!

It is about here that most coaches stop coaching the skill, believing that if the athlete can perform the skill really well, and it looks like it does in the coaching textbooks then they have done their job.

**Sports Skills Step 3:**

Perform the **Skill very well and at speed**. Name one sport where the ability to perform sports skills really slow is a winning strategy! Technical perfection at slow speed may look great for the text books, but unless the skill can withstand competition level speed (and included in that is competition accelerations, competition agility requirements and competition explosiveness) then it is not competition ready.

Looking technically perfect at slow speed is great for the cameras but it is even better for your opposition who will have run around you and scored while you are receiving accolades for winning the "best-skills execution" competition.

**Sports Skills Step 4:**

Perform the **Skill very well, at speed and under fatigue**. Think of the "danger zones" in all competition sport. The last 20 metres of a 100 metres freestyle. The last 5 minutes before half time in football. The last play in the game. Many, many competitions come down to the quality of skills execution during the last 5% of time and being able to perform fundamental skills when tired, dehydrated, glycogen depleted and suffering from neuro-muscular fatigue is a winning edge in all sports.

**Sports Skills Step 5:**

Perform the **Skill very well, at speed, under fatigue and under pressure**. How many times do you see athletes miss simple targets or drop balls or make errors at critical moments – "danger-zones" in competitions, There is no doubt that emotional stress and mental pressure impact on the ability of athletes to perform skills with quality and for better performance.

**Sports Skills Step 6:**

Perform the **Skill very well, at speed, under fatigue and under pressure consistently**. Being able to perform the skill under competition conditions *once* could be luck, but being able to do it consistently under competition conditions is the sign of a real champion. Consistency in skills execution in competition comes from consistency of training standards. Adopting a "no-compromise" approach to the quality of skills execution at training is a sure way to develop a consistent quality of skills execution in competition conditions. Unfortunately many athletes have two brains:

- **Training brain**– the "brain" they use in training and preparation. This "brain" accepts laziness, inaccuracy, sloppiness and poor skills execution believing that "*it will be OK on the day*" and everything will somehow magically be right at the competition;
- **Competition brain** – the "brain" they use in competition.

**Sports Skills Step 7:**

Perform the Skill very well, at speed, under fatigue and under pressure consistently in competition conditions. This is what it is all about. The real factor in what makes a champion athlete is their capacity to perform consistently in competition conditions.

Performing a basic skill well is not difficult. But add the fatigue of 75 minutes of competition, the pressure of knowing the whole season is on the line with one kick, the expectations of the Board, the coach, the management, team-mates and tens of thousands of fans and all of sudden that basic skill is not so basic: it becomes the equivalent of juggling six sticks of dynamite.

**Types of Sport Technologies**

Technology is changing the face of modern sports, sports psychology and coaching. State-of-the-art technologies are used to optimize performance in sports as diverse as cycling, speed-skating, swimming, golf, skiing, surfing, football/soccer ball, tennis racket and ball, running, facilities and many more. Technology in sport today is found in countless forms with each innovation has potentially positive and beneficial outcomes. Understanding the implications of sport technologies involve basic typology used in classifying, these are done in six types of sport technologies though not mutually exclusive, in some cases same technologies could fit into multiple categories. The categories include: self-technologies, rehabilitative technologies, landscape technologies, movement technologies, implement technologies and database technologies. While some of the technologies are yet to make an impact on sport, understanding of many types of sport technologies help to obtain a better perspective on which technological options athletes eventually have access to and impact on sport performance.

**Self -Technologies**

This represents the most obvious and distributing for many people form of technology due to the potential of fundamentally and often permanently alter an athlete's physical or psychological being/make-up. Banned performance-enhancing drugs are the most recognizes of these technologies. Self-technologies encompass other kinds of athletic innovations, of which are also controversial. Others include surgical procedures, prosthetic/bionic limbs, sport psychological interventions and genetic engineering are all classified as self-technologies. The presence of certain self-technologies in sport may be seen as future such as bionic prostheses (as used by Oscar Pistorius). Scientists working on a muscle-building vaccine derived from engineering genes already recognised the implications of their work for sport. Thus, the generic alteration of athletes or gene doping is a human genome projects to map all the genes in the human body, which can increases the muscle mass.

**Movement Technologies**

It refers to those devices and procedures that are designed to assess the form and efficiency of an athlete's body. The most common of such include videotape analysis, although there are much more sophisticated instruments that provide detailed computerized information on an athlete's biomechanics. On like the other form of technology movement technologies are often not visible within the competitive arenas. Besides helping to improve an athlete's existing technique, the data yielded by movement techniques may also facilitate conceptual or stylistic shifts that allow the athlete to compete in a mechanically, aesthetically and kinesthetically novel manner.

**Conclusion**

Sports as a special social phenomenon, has become a modern technology accessories. The word of sport is changing because of technology, as technology plays large roles in daily lives, it also play a large role in changing the body. Thus, technology continues to change the way sports are played, how injuries are treated, what kinds of sports are played and enhances performance outcomes. Sporting technologies are man-made means developed to reach human interests or goals in or relating to a particular sport. It is a technical means by which athletes attempt to improve their training and competitive surroundings in order to enhance their overall athletic performance. It is the knowledge and application of using specialised equipment and the latest modern technologies to perform tasks more efficiently. Therefore, coaches and athletes must be aware of sport technologies, and make wise choices about how it affects their performances.

## Innovative And Creativity In History Learning

**Prof. Amita Manoj Choudhari**

M.ed.,M.A.(His),Net

Shri College Of Education Sawli

Th- Sausar Dist- Chhindwara (M.P.)

### Abstract :-

प्रगती म्हणजे केवळ भविष्याकडे पाहणेच नाही तर भूतकाळापासून शिकणे हे देखील महत्वाचे असते प्राप्त अनुभवातून माणूस जे ज्ञान व कौशल्य प्राप्त करतो त्यातून नाविन्य आणि सर्जनशिलतेची निर्मिती होते आणि यातून जे निर्णय घेतले जातात ते योग्य आणि सर्वसमावेशक असतात हा पेपर एक युक्तिवाद सादर करतो. इतिहास शिक्षणातर्गत सर्जनशिलता आणि नाविण्याचे अध्ययन प्रक्रियेतील स्थान व हेतू स्पष्ट करतो ही क्रिया परिवर्तनशिल शिक्षणाच्या माध्यमातून प्रभाविपणे घडून येते. सर्जनशिल व्यक्ति मध्ये असणारा सर्वात महत्वाचा गुण म्हणजे दृढता दृढनिश्चय , आणि दृढ निश्चय ही इतिहास शिक्षणातर्गत संसोधनाची मुलभूत गरज आहे दृढ निश्चया प्रमाणेच चिंतनही गरजेचे आहे अपसारी चिंतन म्हणजे सर्जनशिलता आणि अपसारी चिंतन ही शोधाची जननी आहे.

ज्ञानाचा सर्व शाखांची उत्पत्ती ही सर्जनशिलतेच्या माध्यमातून झाली आहे आजची अध्ययन पद्धति परिवर्तनशिल अध्ययनाला प्राधान्य देते. त्यातून अंतज्ञानी ,सर्जनशिल,भावनिक प्रक्रियेचा उदय होतो.

**Keywords :-** Creativity , Innovation, परिवर्तनशिल शिक्षण, कला, इतिहास अध्ययन.

हा पेपर एक युक्तिवाद आहे ज्या आधारे इतिहास अध्ययनातील गरजांचा विचार करून सर्जनशिल शिक्षणाच्या माध्यमातून कला आधारित अध्यापनशास्त्रीय प्रक्रियेचा इतिहासातील कल स्पष्ट होतो.

अनुभवाद्वारा परिवर्तनशिल अध्ययन सुलभ होण्याकरीता कौशल्यांचे प्रशिक्षण गरजेचे आहे ज्या द्वारा संभाव्य आणि सुलभ कलात्मक प्रक्रिया घडून येते.

सर्जनशिलता आणि नाविण्य ह्या एकाच नाण्यांच्या दोन बाजू आहे.

विकास हा बाल वयापासून सुरू होतो आणि वयाच्या ३० वर्षांनंतर स्थिरावतो.सर्जनशिलता व्यक्तिमधे निपुणता,खुले विचार , मानसिक स्वातंत्र्य ,आंतरिक अभिप्रेरणा,दृढता हे गुण असतात.इतिहासाच्या अभ्यासाच्या दृष्टिने दृढता अत्यंत महत्वाची आहे.

सर्जनशिलता म्हणजे अपसारी चिंतन होय.

अभ्यासाच्या दृष्टिने इतिहासांचे विभाजन वेगवेगळ्या कालखंडात करण्यात आले आहे.प्रत्येक कालखंडातील इतिहासाची मुल्ये आणि दृष्टिकोण वेगवेगळे आहे. ह्या सर्वांचा संदर्भ समजण्याकरिता विषयांतर्गत नाविण्याची गरज असते त्यासाठी परिवर्तनशील अध्ययन महत्वाचे ठरते.

ऐतिहासिक दृष्टिकोण विकसित करण्यासाठी कलात्मक शिक्षणाची गरज असते.

काही संशोधना मधुन निर्देशित झाले आहे की कलाशिक्षण हे परिवर्तनशिल शिक्षणा संबंधी असणारे समज आणि वैयक्तिक सर्जनशिलते संबंधी असणारी जागृतता यामधील सकारात्मक सहसंबंधाचा नाविण्यपूर्ण दुवा आहे.

आधुनिक काळामध्ये Creativity आणि Innovation चे एक प्रमुख माध्यम म्हणजे परिवर्तनशिल शिक्षण होय. परिवर्तनशिल शिक्षण म्हणजे अंतज्ञानी, सर्जनशिल, भावात्मक प्रक्रियेचा उदय होय. Mezirow यांनी हा संदर्भ दिला आहे.

### The Borader Context-

इतिहासाच्या बदललेल्या दृष्टिकोणाचा आणि अभ्यापद्धतिचा संदर्भ पाहता इतिहास अध्ययनातील उच्चदर्जाची सर्जनशिलता दिसून येते. आज इतिहास हा केवळ राजाराणी ,युद्ध, महान व्यक्तीची चरित्र यांची मक्तेदारी न राहता ,इतिहास हा सामान्यमाणसाचा देखील आहे, त्याच्या जीवनातील बदलांचा आहे, बदल घडवून आणना—या घटकांचा आणि घटनांचा आहे,तळागाळातील लोकांचा आहे, त्यांच्या जीवन संघर्षाचा आहे असा भाव निर्माण झाला आहे आज इतिहासाचे उपयोगनात्मक रूप पुढे आले आहे. म्हणून इतिहासाला कले मधुन शास्त्राचा दर्जा प्राप्त झाला आहे कारण इतिहास हे सामान्य माणसाच्या जिजनाचे शास्त्र आहे.

### Creativity and Innovation –

ऐतिहासिक दृष्टिकोण विकसित करण्यासाठी कलात्मक शिक्षणाची अत्यंत आवश्यकता आहे.

कलात्मक शिक्षणाच्या संधी सर्जनशिलता जागरूकतेची क्षमता वाढवू शकतात हे कला आधारित शिक्षणाचें एक उदयोन्मुख आणि नाविण्यपूर्ण मॉडल आहे.

काही संशोधनामधून निर्देशित झालेले आहे की कलात्मक शिक्षण हे परिवर्तनशिल शिक्षणा संबंधी असणारे वैयक्तिक समज आणि वैयक्तिक सर्जनशिलते संबंधी असणारी जागृतता या मधील सकारात्मक सहसंबंधांचा नाविण्यपूर्ण दुवा आहे

सर्जनशिलता म्हणजे कल्पना,शोध,दृष्टिकोण, अंतर्दृष्टि, अंतज्ञान आणि कुतुहल ह्या मानवी गुणांचा समूच्चय होय.किंबहुना सर्जनशिलता म्हणजे चांगल्या कल्पना असेही म्हणता येईल.

**सर्जनशिलता आणि नाविण्य ह्या एकाच नाण्याच्या दोन बाजू आहेत.**

परिभाषा

जेव्हा कोणत्याही कार्याचा परिणाम नवीन असतो व तो केव्हातरी एखादया समुहाने उपयोगी मान्य केलेला असतो त्या कार्याला सृजनात्मकता असे म्हणतात.

— स्टेन

सृजनात्मकता मौलिक परिणामों को अभिव्यक्त करने की मानसिक क्रिया है। — क्रो एण्ड क्रो

Drevidohl –

सर्जनात्मक किंवा सर्जनात्मक चिंतन व्यक्तिकी ती क्षमता आहे जी अशा काही वस्तु , रचना किंवा विचार निर्माण करते. जे नविन असतात, जे पुर्वी ज्ञात झालेले नसतात, ते वैज्ञानिक , साहित्यिक , कलात्मक या स्वरूपामध्ये असू शकतात.

**सृजनात्मकतेचा विकास**

सर्जनशिलतेचा विकास बाल्यावस्थेमध्ये होतो, सर्व प्रथम खेळाच्या माध्यमातून सर्जनशिलता अभिव्यक्त होते आणि वयानुसार इतर क्षेत्रामध्ये परावर्तीत होते. सर्जनशिलता वयाच्या ३० वर्षा पर्यंत आपल्या चरमसीमें पर्यंत वाढते आणि नंतर स्थिर होते— डेनिम व हैलमैन

सर्जनशिल व्यक्ति मध्ये असणारा सर्वात महत्वाच गुण म्हणजे दृढता होय, आपन जे कार्य करणार आहो ते कार्य करण्यासाठी दृढ निश्चय असणे गरजेचे आहे, जर निश्चय नसेल तर कार्यामध्ये अपयशाची शक्यता असते.

इतिहास विषयामध्ये संशोधन करतांना दृढ निश्चय महत्वाचा असतो कारण इतिहास संशोधन करतांना भुतकाळातील ज्ञानाची सत्यासत्यता तपासून निष्कर्ष काढायचे असतात.

सर्जनशिलता म्हणजे अपसारी चिंतन होय. (Guliford1967)

**सर्जनशिलतेची प्रक्रिया —**

**Wallas (1926)**

- |   |              |                |    |                      |                        |
|---|--------------|----------------|----|----------------------|------------------------|
| १ | Preparation  | आयोजन          | :- | समस्या निराकरणासाठी  | आणि समस्या समजण्यासाठी |
|   |              | माहिती जमविणे. |    |                      |                        |
| २ | Incubation   | उदभवण          | :- | समस्येवर विचार करणे. |                        |
| ३ | Illumination | प्रबोधन        | :- | समस्या समाधान        |                        |
| ४ | Verification | प्रमाणिकरण     | :- | ज्ञानप्राप्ती        |                        |

सर्जनशिलता ही ज्ञान निर्मितिकी ,ज्ञानाच्या स्थिरतेच्या, सर्वमान्यतेची आणि ज्ञानाच्या उपयोजनाची जननी आहे.

शाब्दिक आणि अशाब्दिक साधनामधून सर्जनशिलता दिसून येते काही माध्यम भाषेद्वारा विकसीत होतात, तर काहीमध्ये कृतीचा समावेश होतो ज्ञानाच्या सर्व शाखांचा प्रवास या माध्यमांमधून होतो म्हणून सुयोग्य वातावरण निर्माण झाल्यास बालकामध्ये सर्जनशिलता विकसीत करता येते.

इतिहास अध्ययनांतर्गत अभिसारी आणि अपसारी या दोन्ही चिंतनांचा समावेश होतो अभिसारी चिंतन सर्वमान्य ज्ञानाशी आणि अपसारी चिंतन नविन ,संसोधित ज्ञानाशी संबंधित आहे इतिहासा मध्ये सर्वमाण्य वाडमयीन साधनांना अतिशय उच्च दर्जाचे स्थान आहे पण घटनांचा अर्थ लावणे,कार्यकारण संबंध शोधने ,कालखंड निर्धारित करणे ,प्राप्त ज्ञानाची सत्यासत्यता पडताळणे यासाठी अपसारी चिंतन महत्वाचे ठरते आणि अपसारी चिंतन म्हणजेच सर्जनशिलता होय.

**Creativity and Innovation in History**

कलात्मक शिक्षणामुळे सर्जनशिलता वाढते आणि सर्जनशिलता व नाविण्य ह्या इतिहास शिक्षणाच्या पायाभुत गरजा आहे. या शिवाय इतिहास समजला जाणार नाही.

अभ्यासाच्या दृष्टिने इतिहासाचे विभाजन वेगवेगळ्या कालखंडात करण्यात आले आहे.प्रत्येक कालखंडातील इतिहासाची मुल्ये आणि दृष्टिकोण वेगवेगळे आहेत तसेच इतिहासाचे विभाजन अनेक ज्ञान शाखांमध्ये झालेले आहे जसे पुरातत्वशास्त्र,मानववंश शास्त्र , भाषा शास्त्र या सर्व शाखांची निर्मिती आणि विकास हा सर्जनशिलता आणि नाविण्ययामधुनच झालेला आहे.

इतिहासाची एक शाखा मानववंश शास्त्र ही आहे या मध्ये मानववंशाचा विकास हा मानवी जीवनातील शोध आणि सर्जनशिलतेमुळे घडून आलेला आहे असे आपल्याला दिसून येते म्हणून इतिहासा मध्ये संशोधनाला अतिशय महत्व आहे.संशोधक आपल्या Creative दृष्टिकोणातून घटनांचा अर्थ लावण्याचे कार्य करतो आणि या मधुनच इतिहासाचे लेखन घडून येते.

राष्ट्रभक्ती ,देशप्रेम ,स्वाभिमान, मानवता, धर्मनिरपेक्षता, सत्य ,अहिंसा ,विश्वास या मुल्यांचा विकास हा सामाजिक विज्ञानाच्या माध्यमातून घडवून आणला जातो या मुल्यांच्या योग्य प्रसारा मधुन चांगले नागरिक घडून येतात. त्यामुळे इतिहासकार आणि इतिहास शिक्षक हे Creative आणि Innovative असणे आवश्यक आहे. आजची अध्ययन पध्दति परिवर्तनशील अध्ययनाला प्राधान्य देणे परिवर्तनशिल अध्ययना मुळे अंतज्ञानी, सर्जनशिल, भावनीक, प्रक्रियेचा उदय होतो.

ज्यातून भावना आणि कल्पनाशक्तिवर आधारित महत्वपूर्ण तर्कसंगत दृष्टिकोणाचे प्रतिबिंब निर्माण होते ,ज्या आधारे मानवतावाद ,मुक्ती ,स्वायत्तता ,महत्वपूर्ण तार्किक विश्लेषण ,एकात्मता, स्वतःचे ज्ञान, (varKku) सहभाग, संप्रेषण आणि प्रवचन व चिंतन यांचे सामाण्याकरण घडून येण्यास मदत होते.या प्रक्रियेमध्ये सर्जनशिल दृष्टिकोण ,अतिशय महत्वाची भूमिका निभवतो,ऐतिहासिक दृष्टिकोणांतर्गत येणा-या ह्या सर्व प्रक्रियेचे महत्व लक्षात घेवून इतिहास अध्ययनातील नाविण्य व सर्जनशिलतेचा शोध घेण्याकरिता ऑक्सफोर्ड विद्यापीठाने इतिहास अभियोग्यता चाचनी हॅट विकसीत केली आहे आणि आधुनिक काळामध्ये इतिहास शिक्षणामध्ये C2 learning उमजीवक चा मोठया प्रमाणात उपयोग केला जात आहे.

वैयक्तिक मूल्य आणि शिकण्याची गरज यावर लक्ष केंद्रित करून कला आधारित सर्जनशिलता चिरकाळ टिकणारे परिवर्तन घडवून आणण्यासाठी मदत करते. ही शैक्षणिक गरज शिकणारे आणि शिकविणारे कर्मचारी आणि नियोक्ता या दोघांमध्ये पिढीजात विचारांवर आधारित संस्कृति ,लिंग, विश्वास प्रणाली आणि मूल्य परिभाषित करते.

कलात्मक आणि सर्जनशिल अभिक्षमता ह्या इतिहासाच्या सर्व शाखांमधील ज्ञान ग्रहणाकरिता आणि प्राप्त ज्ञानाचा अर्थ लावण्याकरिता अतिशय उपयुक्त ठरतात , कलाकाराकडून प्रस्तुतीकरण, संप्रेषण , आकलनक्षमता, निरिक्षणक्षमता ही कौशल्ये शिकायला मिळतात या सर्व कौशल्यांचा उपयोग इतिहासातील घटनांचा अर्थ लावण्याकरिता आणि ऐतिहासिक दृष्टिकोणांचे वर्तमानकाळातील स्थान आणि महत्व निश्चित करण्याकरिता होतो.

अशाच प्रकारे कलवंतामध्ये किंवा संगीतज्ञामध्ये असणारी संगठन,सहयोग, नैतृत्व या सारखी कौशल्ये मानववंशशास्त्र , पुरातत्वशास्त्र या इतिहासाच्या शाखांच्या उदय आणि विकासामध्ये महत्वपूर्ण भूमिका निभवतात.

सर्जनशिलता आणि नाविण्य ह्या अतिशय व्यापक संकल्पना आहेत आणि बृध्दमत्तेच्या हजारो पैलूंनी व्याप्त आहेत. त्यामुळे ज्ञानामार्गाची प्रत्येक वाट ही या पैलूंच्या चौकटीमधुन प्रवास करते .या चौकटीपासुन कुठलाही ज्ञानशाखा विरक्त राहु शकत नाही.

आधुनिक काळामध्ये सर्जनशिलता व नाविण्याचे महत्वाचे माध्यम म्हणजे परिवर्तनशिल शिक्षण होय या शिक्षणाच्या विचाराधारे मध्ये नविन ज्ञानावर आधारित मुल्ये आणि श्रध्दा यांचे समालोचन केले जाते, शिकणारा नविन मुल्य व श्रध्देच्या आधारे अधिक चिंतनशिल व गंभीर बनतो व विचारांमध्ये मोकळेपणा येवून नविन कल्पनांचा स्विकार करतो.

Mezirow यांनी परिवर्तनशिल शिक्षण म्हणजे अंतज्ञानी,सर्जनशिल, भावनात्मक प्रक्रियेचा उदय असा संदर्भ दिला आहे.  
; Grebovha 1997)

परिवर्तनशिल शिक्षणाचे दोन दृष्टिकोण आहेत एक गंभीर तर्कसंगत दृष्टिकोण आणि एक भावनिक व काल्पनिक दृष्टिकोण दोन्ही दृष्टिकोण सर्जनशिलतेचा एक भाग म्हणून कल्पनाशक्ति वाढवितात.

भविष्यामध्ये ऐतिहासिक दृष्टिकोण वृध्दीगत होण्याकरिता शिक्षणाच्या सर्जनशिल क्षेत्रामध्ये वृध्दी होणे गरजेचे आहे.

नविण्य एक कला आहे जी संज्ञानात्मक आणि भावनिक आहे सर्जनशिलतेचा संज्ञानात्मक दृष्टिने विचार केल्यास त्याचे मुल्य लक्षात येते आणि त्यातून विकसित होणारी भावनिक कार्यक्षमता उदा:- आत्मविश्वास ,पुढाकार,चिकाटी दिसून येते.

## Role of Rashtriya Uchchar Shiksha Abhiyan (RUSA) to England Quality in Higher Education

Balkrishana Adhau

### Abstract

The central government has come up with a new revolutionary scheme “*Rashtriya Uchchar Shiksha Abhiyan*” (RUSA) to improve quality in higher education and enhance Gross Enrolment Ratio. The scheme emphasizes the promote reforms in the State Higher Education System by creating a facilitating institutional structure for planning and monitoring at the state level. It will help to promote autonomy in state universities and include governance in the institutions. One of the goals of RUSA will be to ensure academic examination reforms in the higher education institutions and enable conversion of some of the universities into research universities at par with the best in the world. The scheme is designed where the central government offers financial support to state governments to augment capacity on a revenue sharing basis formula of 65:35 between Central and state government. This is an excellent idea to take forward. Gross Enrolment Ratio in higher education is the indicator which measures the percentages of eligible population which has access to higher education in age group between 18:23 years. Rashtriya Uchchar Shiksha Abhiyan scheme warrants state government to set up State council for higher education and supporting agencies such as accrediting agency to access and monitor the quality of higher education in state in line with National Assessment and Accreditation council (NAAC).

**Key Words-** Gross Enrolment Ratio, National Assessment and Accreditation council, Financial support.

### Introduction

India has the largest number of higher education institutions in the world. At present the enrolment ratio in higher education in India is 12.4%. Keeping in view the recommendations of the planning commission, the need for reforms in state higher education sector, using central funds in a strategic manner to ensure holistic planning at the state level and enhancement of allocations for the state institutions, a new centrally sponsored scheme is proposed. The scheme would be spread over the two plan periods (XII and XIII), and would be an over arching scheme for funding the state universities and colleges to achieve the aims of equity, access and excellence. The scheme is called Rashtriya Uchchar Shiksha Abhiyan (RUSA).

“Our university system is, in many parts, in a state of disrepair... in almost half the districts in the country, higher education enrollments are abysmally low, almost two- third of our universities and 90 % of our colleges are rates as below average on quality parameters... I am concerned that in many states university appointments, including that of vice- chancellors, have been politicized and have become subject to caste and communal considerations and there are complaints of favoritism and corruption.”

### Prime Minister Manmohan Singh in 2007

The UGC plan document enumerates several strategic “to bring about changes in the systems, processes, culture and structure of the university Act/Statutes.” However, it is not clear how these systemic, cultural and structural changes will materialize on the ground. In a system where supply of quality institutions and teachers is already for less than demand and the student to teachers ratio is very high in most higher educational institutions, the plan document does not provide any clear direction about teacher recruitment reform and a formal process for quality teachers. The Union government of India on 8 June 2013 decided to launch National Higher Education Campaign, Rashtriya Uchchar Shiksha Abhiyan, to focus on equity based development, improvement in teaching learning quality and teachers. Under it, funds will be provided to public Universities and Colleges so that higher educational institutes do not rely heavily on the affiliation fees. With the implementation of the scheme, the Universities can give more emphasis on life skill development activities which would ultimately help in employment generation raining of existing teachers.

### What Rashtriya Uchchar Shiksha Abhiyan (RUSA)?

It is a proposed Central Scheme which concerns primarily with the low Enrolment Ratio (LER) in Higher Education in India.

RUSA aims to incentivize the Indian States to improve Higher Education in India

RUSA aims to increase enrolment ratio in Higher Education institution in India to 30% by 2020.

### How RUSA aims to increase the enrolment ratio in Higher Education in India?

By expanding the institutional base of education via creating extra capacity in existing institutions. Establishing new institution and incentivizing State Government.

Focusing on furnishing higher education opportunities to society deprived communities, address inequalities by encouraging inclusion of woman, minorities, SCs/STs and differently abled persons.

Removing regional imbalances in access to higher education via setting up institution in un- served and under- served areas.

Ensuring a strategy that there is a Degree Collage in every district and also new universities are opened and existing ones are expanded / upgraded.

To make all institutions to prescribed norms Improve pupil – teacher ratio in institutions.

Addressing reforms in examination, governance, accreditation issues and overhaul of the affiliation system of institutions.

The government aims to subsume the current scheme of setting up model degree collages in 374 educationally backward district of India. Till date, only 142 proposal for the 374 model collages have been received from the State of which only 78 have been approved and another 31 are under consideration.

#### **Objectives of Rashtriya Uchcharat Shiksha Abhiyan (RUSA)-**

The objective of RUSA would be to achieve the target of GER of 30% , which the central Government has set for itself, by the year 2020. Indian government aims to improved the quality of state universities and collages and enhance existing capacities of the institutions to become dynamic, demand – driven, quality conscious, efficient and forward looking, responsive to rapid economic and technological developments occurring at the local, state, national and international levels. The salient objectives of the scheme can be enumerated as follows.

Improve the overall quality of existing state institutions by ensuring that all institutions conform to prescribed norms and standards and adopt accreditation as a mandatory quality assurance framework.

Usher transformative reforms in the state higher education system by creating a facilitating institutional structure for planning and monitoring at state level, promoting autonomy in state universities and improving governance in institutions.

Ensure academic and examination reforms in the higher educational institutions.

Enable conversion of some of the universities into institutions of excellence at par with the best in the world.

Create opportunities for states to undertake reforms in the affiliating system in order to ensure that the reforms and resource requirements of affiliated collages are adequately met.

Ensure adequate availability of quality faculty in all higher educational institutions and ensure capacity building at all levels of employment.

Create an enabling atmosphere in the higher educational institutions to devote themselves to research and innovations.

#### **RUSA: Overview-**

“Bottom up” approach.

A new centrally sponsored scheme for funding the state universities to achieve the aim of equity, access and excellence.

An umbrella scheme that would flow from MHRD through state councils of higher Education to institutions.

Funding on the basis of state plans of higher education-states strategy to address equity, access and excellence.

Norm based and outcome and depended funding.

Precondition of certain academic, administrative and governance reform for receiving funding under RUSA.

Centre - state funding to be in the ratio of 90:10, 75:25 and 65:35.

Funding to private aided collage – 50:50.

#### **Scope of Rashtriya Uchcharat Shiksha Abhiyan (RUSA)-**

Project will support all state universities and collages (Both 12B and 2f and non – 12B and non 2f) from all states and Union Territories (UTs) across the country. Subject to eligibility, an estimated 316 state universities and 13024 collages will be covered under this initiative to improve the learning outcomes and employability of the Graduates and scaling– up research, development and innovations. The project will also support these institutions to improve their policy, academic and management practices. While public funded collages and universities would be eligible for all the components, the private aided colleges would be entitled to some components (including infrastructure support)but the funding ratio would be 50:50 . Funding to such colleges would be decided based on their antiquity and relevance. Funds would be provided both for infrastructure as well as for quality improvement. Each institution will have to prepare a perspective plan for all the components, which will be then aggregated at the state level, after imposing a super layer of state relevant components.

All state universities and colleges (both 12B and 2f and non 12B and non 2f) from all states and union Territories.

Cover about 316 state universities and 13024 colleges.

### Principles of Rashtriya Uchcharat Shiksha Abhiyan (RUSA)-

- Incentivizing and dis-Incentivizing
- Apolitical decision making
- Disclosure based governance
- Autonomy
- Equity based development
- Quality and research focus

### Funding Structure of Rastriya Uchcharat Shiksha Abhiyan (RUSA)-

The central funding would flow from MHRD/UGC to institutions, through State Councils OF higher Education.

The funding to states would be made on the basis of critical appraisal of state plans of higher education. The plans would address such state's strategy to address issues of equity, access and excellence in higher education.

All funding under the RUSA would norm based and future grants would be outcome depended. Certain academic, administrative and governance reforms will be a precondition for receiving funding under RUSA.

RUSA programme to be funded in ratio 75:25 (Central Govt : State Govt))

For special category states, the ratio will be 90:10 (Central Govt : Special Category State Govt) in order to raise the fund availableness, 50% of a State's share can be mobilized via PPP(Public Privet Partnership) and the rest of the funding has to be met by state Govt. The land needed for Institution will be provided free of cost respective state Govt.

Centre-State funding to will be in the ratio of 90:10 for North-Eastern States & J&K, 75:25 for Other special Category states (Sikkim, Himachal Pradesh and Uttarakhand) and 65:35 for other states and UTs. Funding will be available to even privet – aided institutions, subject to their antiquity, for permitted activities(not all) based on certain norms and paamaters, in aratio of 50:50.

### Key Components of RUSA-

- Creation of new Universities and collages.
- Conversions/upgradation of HESs
- Expansion of course and disciplines
- Research and innovation grants/funds
- Creation of research universities
- Accreditation agencies
- Infrastructural up-gradation of existing institution
- Addressing quality and availability of faculty

### Strategic Focus of RUSA-

The need for strategic funding of state institutions must ensure that the issues of quality and access are addressed in an equitable manner. This would entail encouraging the states to prepare perspective plans duly keeping the following aspects in mind:

- Spatial and regional planning after due mapping
- Programme and discipline planning
- Mandatory accreditation and quality improvement
- Reforms- governance and academic
- Infrastructure saturation
- Review f the affiliation system
- Transparent and norm-based funding

### Conclusion

The scheme emphasizes to promote reforms in the state Higher Education System by creating a facilitating institutional structure for planning and monitoring at the state level. It will help to promote autonomy in state universities and include governance in the institutions. One of the goals of RUSA will be to

ensure academic examination reforms in the higher education institutions and enable conversion of some of the universities into research universities at par with the best in the world. The project will be implemented through HRD Ministry as a centrally sponsored scheme with matching contribution from the state government and Union Territories. It is proposed to set eligibility criteria for states to achieve a high and sustained impact of the project through monitoring and evaluation. The primary responsibility of the monitoring will lie with the institution themselves. The state Government and the Centre through the project Appraisal Board will monitor the project annually. The main component of the programme is to set up New Universities and Upgrade the existing autonomous collages to universities. The other attempt will be to convert colleges to Cluster Universities and set up new model collages. The strategy will also include converting existing Degree colleges to Model Colleges. Higher education is a crucial input for access to better opportunities in life. Indian Higher Education system suffers from a yawning gap in funds, as well as from archaic regulatory mechanisms, poor quality, and low efficiency. Liberalization of the sector to attract privet domestic and overseas investment on a large scale is the key to access, affordability, and equity. The government also expects RUSA to help the country achieve the target gross enrollment ratio, the same way Sarva Shiksha Abhiyan ad Rashtriya Madhyamik Shiksha Abhiyan have helped increase school enrollment.

## इतिहासलेखन की सामाजिक उपयोगिता

प्रा. डॉ. कविता राजेंद्र तातेड

इतिहास विभागाध्यक्ष

लोकनायक बापुजी अणे महिला महा.यवतमाल

## प्रस्तावना

इतिहास क्या है ? अभी भी एक विचारनीय प्रश्न है ? इतिहास को अतीत और वर्तमान के बीच का अनवरत परिसंवाद अथवा सेतु कहा जाता है। महान युनानी इतिहासकार हेरोडोटसने इतिहास चिंतन की आधारशिला का निर्माण किया तथा थ्यूसिडिडीज ने उसे विकसित किया। प्रत्येक युग की परिवर्ती परिस्थितियों के अनुसार इतिहास चिंतन का स्वरूप परिवर्तनशील रहा है। **कॉलिंगवूड तथा कोचे** के अनुसार ऐतिहासिक ज्ञान मानव संबंधी ज्ञान का स्रोत है। **टायन्बी तथा एच. जी. वेल्स** के अनुसार इतिहास चिंतन का स्वरूप सार्वभौमिक होना चाहिए **रेनियर** का अभिमत है कि इतिहास सभ्य समाज में रहनेवाले मनुष्यों के कार्यों का उल्लेख होता है। **हेनरी पिरेन** के अनुसार इतिहास अतीत में स्थित मानवीय समाज के विकास का व्याख्यात्मक विवरण है। **कालिंगवूड** के अनुसार संपूर्ण इतिहास विचारधारा का इतिहास होता है। **क्रोचे** का इस संदर्भ में वक्तव्य है कि – संपूर्ण इतिहास समसामयिक इतिहास होता है। मानव जीवन के विकास के अध्ययन का नाम इतिहास है और इसी कारण इसकी उपयोगिता भी असंदिग्ध है। इतिहास में मानव जीवन से संबंधित सभी घटनाएँ आती हैं अतः इतिहास को समाज का सर्वांगीण दर्पण कहा जाता है।

## इतिहासलेखन की आवश्यकता –

इतिहास सामाजिक विज्ञान का उद्गम स्थल है। आक्सफोर्ड इंग्लिश शब्दकोश के अनुसार इतिहास में किसी देश, समाज तथा मनुष्य से संबंधित सभी घटनाओं का उल्लेख होता है।<sup>1</sup> **चार्ल्सफर्थ** के अनुसार इतिहास एक विशेष प्रकार का ज्ञान है जो मनुष्य के दैनिक जीवन में उपयोगी है।<sup>2</sup> **कार्ल पामर** के अनुसार इतिहास का अपना अर्थ नहीं होता है। इतिहास का अर्थ इतिहासकार द्वारा प्रदत्त, होता है। इतिहासकार तथ्यों में अर्थ प्रदान करता है। अतः यह स्वयंसिद्ध है कि इतिहास में कोई अर्थ नहीं होता है। पामर के विधान की आलोचना में **काल्हर** लिखते हैं कि इतिहास में एक व्यवस्था का दर्शन होता है। जहाँ व्यवस्था है, वही अर्थ का होना अवश्यभावी है।<sup>3</sup> अतः कहना उचित होगा कि सम सामायिक रूचि के अनुसार इतिहासकार अतीत में अर्थ की खोज करता है। वर्तमान हमारी अतीत विषयक अवधारणा को प्रभावित करता है तथा हमारी अतीत विषयक अवधारणा वर्तमान को प्रभावित करती है। अतीत पर निष्ठा सुरक्षित एवं सूक्ष्म वर्तमान के लिए इस उद्देश से की जाती है कि वह सुखद एवं सुंदर भविष्य का निर्माण करेगा। **मारकेल ओकशाट** ने ठीक ही कहा है कि इतिहासकार का कार्य केवल अतीत की घटना संबंधी तथ्यों का संकलन ही नहीं अपितु एक अर्थपूर्ण निष्कर्ष प्रदान करना भी होता है।<sup>4</sup> इसका अभिप्राय यह है कि इतिहासकार अनेक अतीत कालिक तथ्यों के आधार पर घटना का एक परिकल्पनात्मक चित्र प्रस्तुत करता है। इस चित्र में वर्णित घटनाएँ उद्देशपूर्ण तथ्यों को सामने रखकर लिखी जाती हैं। अतः ऐतिहासिक तथ्यों के लेखन को मान्यता प्राप्त हो सकती है।

विश्व तथा भारत के सभी विश्वाविद्यालयों में इतिहास के अध्ययन की व्यवस्था है पर फिर भी इतिहास के अध्ययन की उपयोगिता के विषय में मतभेद है। वस्तुतः अतीत का वर्तमान से इतना घनिष्ठ संबंध होता है कि उसकी उपेक्षा वे ही कर सकते हैं, जिनका कोई अतीत नहीं होता। मानव जीवन के विकास के अध्ययन का नाम इतिहास है और इसी कारण इसकी उपयोगिता भी असंदिग्ध है। घटनाओं के वर्णन और विवेचन में इतिहासकार अपने समक्ष वस्तुनिष्ठता का आदर्श रखता है। लेकिन देश, काल और समसामयिक परिस्थितियाँ उसकी रचना को प्रभावित किये बिना नहीं रह सकती। किसी विषय पर कोई ग्रंथ इतिहास का अंतिम निष्कर्ष नहीं हो सकता है। नये स्रोतों की प्राप्ति से इतिहासकार नये तथ्यों से नयी व्याख्याएँ भी प्रस्तुत करता है। यदि मानवीय अध्ययन के लिए मनुष्य उपयुक्त है तो अतीत के संदर्भ में वर्तमान को समझने की आधारभूत क्षमता इतिहासकार में होती है, इस परिप्रेक्ष्य में इतिहास में तथ्योंका महत्त्व प्रासंगिक होता है। इतिहासवाद तथा इतिहास दर्शन का उद्देश ऐतिहासिक ज्ञान से है। यदि इतिहास दर्शन का लक्ष्य किसी विशेष कार्य की खोज है तो इतिहासवाद का अभिप्राय इतिहासमें विकासशील प्रवृत्तियों की प्रगती होती है। इतिहासवाद ऐतिहासिक ज्ञान की विश्लेषणात्मक और परिकल्पनात्मक व्याख्या है। एक भविष्य निधी के रूपमें इतिहास की सुरक्षा आवश्यक है। इतिहास की विषय वस्तु का स्वरूप सामाजिक आवश्यकताओं के अनुरूप निरंतर विस्तृत होता जा रहा है। इसका स्वरूप रूचि तथा समसामयिक सामाजिक आवश्यकता के अनुसार परिवर्तित होता रहेगा। यही इतिहास चिंतन की मुख्य धारा कही जा सकती है।

**ऐतिहासिक तथ्यों का लेखन –**

**कार्ल बेकर** कहते हैं ऐतिहासिक तथ्य एक प्रतीक अथवा सामान्यीकरण है जो वर्तमान में इतिहासकार के मस्तिष्क में रहता है। समाज में प्रत्येक दिन अनेक घटनाएँ होती हैं परंतु सभी घटनाएँ ऐतिहासिक तथ्य नहीं होती हैं। प्रायः महान व्यक्तियों के साधारण कार्यभी ऐतिहासिक तथ्य बन जाते हैं पर अतीत के सभी तथ्य ऐतिहासिक नहीं हो सकते हैं। इतिहासकार जिन तथ्यों को स्वीकार करता है उसे ही ऐतिहासिक तथ्य कहा जाता है। इतिहास में परिवर्तनीय और अपरिवर्तनीय (कठोर तथा कोमल) इस प्रकार के दो तथ्य दिखाई देते हैं। जैसे इ. स. १५२६ में बाबर और इब्राहीम लोदी के बीच पानिपत का प्रथम युद्ध हुआ। इसमें पानिपत, बाबर, इब्राहीम लोदी और इ.स.१५२६ अपरिवर्तनीय तथ्य है। इसके चयन अथवा परिवर्तन में इतिहासकार की इच्छा को कोई स्थान नहीं है। पर बाबर की विजय अथवा इब्राहीम लोदी की पराजय को व्याख्यात्मक वर्णन को वह अपनी रूचि के अनुसार तथ्यों में परिवर्तन कर बदल सकता है। अतः रेनियर के इस तथ्य को उचित कहा जा सकता है कि अतीत में सुनिश्चित तथ्य को हम अपनी इच्छानुसार न घटा सकते हैं और न बढ़ा सकते हैं।<sup>५</sup>

इतिहास मात्र तथ्यों का संकलन नहीं अपितु इतिहासकार द्वारा अतीत का विश्लेषणात्मक पुनर्निर्माण होता है। तथ्य स्वयं नहीं बोलते बल्कि इतिहासकार उन्हें बुलावाता है। इतिहासकार पहले तथ्यों का संकलन करता है फिर उनके कारण और परिणामों की व्याख्या करता है। अतः अतीत के परिकल्पनात्मक पुनर्निर्माण का एकमात्र साधन – इतिहास लेखन है।<sup>६</sup> इतिहास का अर्थ ही व्याख्या से जुड़ा है इसलिए इतिहासकार समसामयिक सामाजिक रूचि के अनुरूप तथ्यों का संकलन तथा उनकी व्याख्या करता है।<sup>७</sup> तथ्यों तथा इतिहासकार का संबंध आदानप्रदानात्मक होता है। तथ्य का संबंध अतीत से और इतिहासकार का संबंध वर्तमान से होता है। अतीतकालिक तथ्यों की व्याख्या इतिहासकार वर्तमान दृष्टिकोण से करता है।<sup>८</sup> इसलिए रॉके का यह कथन उचित प्रतीत होता है कि इतिहास वास्तव में इतिहासकार का अतीत के संबंध में निर्णय होता है, जिसका उद्देश्य वर्तमान को प्रशिक्षित करना तथा भावी पीढ़ी के कल्याण के लिए मार्गदर्शन होता है। १९ वीं सदीके इतिहासकारों की यह धारणा रही है कि इतिहास से अधिकाधिक तथ्यों का समावेश होना चाहिए। रॉके के अनुसार ऐतिहासिक तथ्य इतिहास की रीढ़ होता है अतः इतिहासकार को तथ्यों का यथावत वर्णन करना चाहिए।<sup>९</sup> परंतु इतिहास में तथ्य होना एक दायित्व है कोई गुण नहीं है। कार्ल बेकर के अनुसार ऐतिहासिक तथ्यों का इतिहास के लिए कोई अस्तित्व नहीं रहता, जबतक वह उसकी पूर्णरचना न करे। अतीत के परिकल्पनात्मक पुनर्निर्माण का एकमात्र साधन इतिहास लेखन है।

**इतिहास लेखन के प्रकार –**

अतीतकालीन समाज का पूर्ण चित्रण ही इतिहास होता है। इतिहासकार से यह अपेक्षा की जाती है कि वह समाज से संबंधित सभी विषयों का उचित विवरण समाज के सन्मुख प्रस्तुत करे। बीसवीं सदीमें इतिहास चिंतन का स्वरूप वैज्ञानिक होने लगा। अतः आधुनिक इतिहासकारों ने इतिहास क्षेत्र का वर्गीकरण किया है, जिसका एकमात्र उद्देश्य विशेष तथा परिवर्तित घटनाओं का ज्ञान प्राप्त करना है। इसी आधार पर इतिहास को राजनीतिक इतिहास<sup>१०</sup>, संवैधानिक इतिहास<sup>११</sup>, आर्थिक इतिहास<sup>१२</sup>, सामाजिक इतिहास<sup>१३</sup>, राजनयिक इतिहास<sup>१४</sup>, सांस्कृतिक इतिहास<sup>१५</sup>, धार्मिक इतिहास<sup>१६</sup>, सैनिक इतिहास, विचारों का इतिहास आदि में वर्गीकृत किया गया है। इन विभागों का कोई अंतिम स्वरूप नहीं है क्योंकि इतिहासकारों को अपनी विशिष्ट दक्षता के परिवेश में अपने को बंदी नहीं बनाना चाहिए। यदि पेशेवर इतिहासकार सामान्य तथा सार्वकालिक इतिहास नहीं लिखेंगे तो इतिहासलेखन इतिहासकारों के हाथों से निकल जायेगा। इतिहासकारों को इतिहास की विशिष्ट दक्षता के साथ साथ सामान्य इतिहास का अध्ययन तथा लेखन करना चाहिए। वर्तमान समाज इतिहासकारों से यही अपेक्षा करता है। किसी भी समाज से संबंधित भौगोलिक दशा, आर्थिक व्यवस्था, राजनैतिक, सामाजिक, धार्मिक, सांस्कृतिक, प्रशासनिक, न्याय, सैनिक आदि विषयों पर इतिहासकार से यह अपेक्षा की जाती है कि वह इन विषयों का उचित तथ्यात्मक विवरण समाज के समक्ष प्रस्तुत करे। पर यदि समाज का क्षेत्र विस्तृत है तो एक इतिहासकार के लिए इन सभी प्रश्नों का उत्तर देना संभव नहीं है। इसीलिए तत्कालीन घटनाओं के आधारपर सामाजिक प्रश्नों का उत्तर देने के लिए इतिहास क्षेत्र का वर्गीकरण किया जाता है। इतिहास दर्शन के संदर्भ में व्हाल्टेयर, फ्रोचे, कोमते, टीगेल, लार्ड एक्टन, तुर्गो आदि के विचारों से वर्गीकरण की उपयोगिता सिद्ध होती है।

**इतिहास लेखन का महत्त्व –**

प्रत्येक युग में इतिहास अवधारणा का स्वरूप उद्देश्यपूरक रहा है। निरंतर परिवर्तित समाज की आवश्यकता के अनुरूप इतिहास अवधारणा में परिवर्तन होता रहा है। प्राचीनकाल से बीसवीं सदी तक परिवर्तन ही इतिहास की अवधारणा का स्वरूप है। इतिहास दर्शन के जन्मदाता **व्हाल्टेयर** ने वैज्ञानिक तथा आलोचनात्मक पद्धतीका प्रयोग इतिहास के अध्ययन में अनिवार्य बताया। व्हाल्टेयर ने उच्च आदर्शों को अतीत की समाधि से निकालकर उसे भविष्य के गर्भ में आरोपित किया। उनके अनुसार मानवसमृद्धि विकास में प्रत्येक पीढ़ी तथा गुण का योगदान होता है। काल की गति को साथसाथ मानव प्रगतिपथ पर अग्रसर होता है। प्रगति इतिहास की निश्चित प्रकृति है। इस विकासशील इतिहास की कल्पना व्हाल्टेयर द्वारा

रखी गयी। लैसन के अनुसार इतिहास की वैज्ञानिक अवधारणा का एकमात्र श्रेय व्हाल्टेअर को है। उन्ही के समकालीन फ्रांसीसी विचारक रूसो ने भी सामाजिक समानता का सिद्धान्त प्रस्थापित कर क्रांति का मार्ग प्रशस्त किया। फ्रांसीसी राजनैतिक क्रांती के उगम में इतिहास की अवधारणा को विशिष्ट स्थान प्राप्त हुआ। विको के अनुसार इतिहास मानव की चेष्टा और चिंतन का फल है। इसका स्वरूप समाज और संस्थाओं के निर्माण से परिपूर्ण है।<sup>१७</sup> अतः उन्नीसवी तथा बीसवी सदीमें इतिहास की अवधारणा उपदेशात्मक तथा दार्शनिक विचारों से पूर्ण दिखाई देती है।

आधुनिक इतिहास के जनक रॉके ने इतिहास अवधारणा को नवीन वैज्ञानिक विधाओं से<sup>१८</sup> अलंकृत किया है। उनको वस्तुनिष्ठ ऐतिहासिक शोधका उद्देश घटनाओं का यथार्थ प्रस्तुतीकरण था। वस्तुनिष्ठता के आधारपर उन्होने इतिहास को पूर्णरूपसे विज्ञान स्वीकार किया। बीसवी सदी में एच. जी. वेल्स ने सार्वभौतिक इतिहास की अवधारणा को लोकप्रिय बनाया। विश्व इतिहास के रचयिता टॉयन्बी ने इतिहास अध्ययन का बोधगम्य क्षेत्र समाज को मानकर, समाज के इतिहास का अनुत्पत्त कहा है।<sup>१९</sup> विश्व की छब्बीस सभ्यताओं के विश्लेषणात्मक प्रस्तुतीकरण के माध्यम से उन्होने नयी इतिहास अवधारणा का प्रतिपादन किया। समस्त विश्व का एकीकरण, धर्मों का समन्वय, आर्थिक, विषमताओं का निराकरण उनकी इतिहास अवधारणा की प्रमुख कृतियाँ हैं। इतिहास लेखन की प्रगति का यह उत्कृष्टतम प्रतीक है।

इसी आधार पर बीसवी सदी में इतिहास को एक प्रकार का आंदोलन कहा गया है जिसका उद्देश विश्व बंधुत्ववाद को इतिहास में सार्वभौमिक स्वरूप प्रदान करना है। इतिहास का संबंध मात्र अतीत से ही नहीं है बल्कि समाजके वर्तमान व्यवस्था से है इसमें समानता तथा निरंतरता की प्रकृति होती है।<sup>२०</sup> लाईपनिट्स के अनुसार सत्यरहित इतिहास जीवनरहित शरीर है। इतिहास के आख्यानों को निकालकर उसे सत्य की आधारशिला पर प्रतिष्ठीत करना चाहिए।<sup>२१</sup> कांट के अनुसार प्रकृतिक मनुष्यको नियंत्रित करती है पर मनुष्यद्वारा नियंत्रित नहीं होती है ऐतिहासिक परिवर्तनों का अन्वेषण ही वास्तविक इतिहास की अवधारणा है। इतिहास तथ्यों का संकलन या घटनाओं की तालिका मात्र नहीं, बल्कि आंतरिक विकास की एक प्रक्रिया है। इतिहास प्रत्यक्ष जगतसे अंतर्जगत की ओर अग्रेसरित होने की प्रक्रिया है। इतिहास की मौलिक प्रवृत्ति बौद्धिकता तथा नैतिकता का विकास है।<sup>२२</sup> कलिंगवूड के अनुसार इतिहास को दार्शनिक स्वरूप प्रदान करने का एकमात्र श्रेय हेगेल को है। हेगेल का मत है कि इतिहास घटनों का संकलन तथा अन्वेषण नहीं, उनमें निहित कार्य कारण प्रक्रिया की गवेषणा है।<sup>२३</sup> बुद्धिवादी युग के इतिहासकारोंने मानववाद तथा सामाजिक स्वतंत्रता को इतिहास का प्रधान लक्ष्य स्वीकार किया। इतिहासकारों ने इतिहास के वैज्ञानिक अध्ययन की उपदेयता को स्वीकार किया। इस प्रकार इतिहास अवधारणा विभिन्न युगों एवं परिस्थितियों का परिणाम रही है।

### विज्ञानवादी दृष्टिकोण से इतिहासलेखन –

इंग्लैण्ड में सर्वप्रथम प्रो. जे. बी. ब्युरी ने १९०३ में केंब्रीज विश्वविद्यालय के समारंभ के अवसरपर अपने भाषण में कहा था, 'इतिहास विज्ञान है न कम और अधिक' इसमें स्पष्टीकरण के संदर्भ में कहा गया कि जबतक इतिहास को कला मात्र स्वीकार किया जायेगा तब तक उसमें यथार्थताका तथा सुक्ष्मता का समावेश गंभीरतापूर्वक नहीं हो सकेगा।<sup>२४</sup> बाल्सके अनुसार इतिहास एक वैज्ञानिक अध्ययन है। इतिहासकार प्रस्तावित विषयों का निष्कर्ष सामान्य नियम एवं साक्ष्य पर आधारित तथ्यों के आधारपर निकालता है। विज्ञान की भाँति इतिहास में भी वस्तुनिष्ठ यथार्थता का अन्वेषण क्रमबद्ध विधियों एवं नियमों के माध्यमसे किया जाता है। अतः इतिहास भी क्रमबद्ध विज्ञान की श्रेणी में आता है। डिल्थे के अनुसार विज्ञान प्रकृति का तथा इतिहास मनुष्य का अध्ययन है। बाल्श के अनुसार इतिहास एक बौद्धिक प्रक्रिया है तथा चयनशीलता इसकी विशेषता है। उसके अनुसार अ) ऐतिहासिक ज्ञान सुव्यवस्थित तथा क्रमबद्ध है। ब) सामान्यतथ्यों में युक्त है। क) इतिहास अध्ययन भविष्यवाणी के लिए प्रेरणा प्रदान करता है। ड) इतिहास वस्तुनिष्ठ है। इस प्रकार यथार्थ तथ्यों के प्रस्तुतीकरण से सभी लोग इतिहास कारके निष्कर्ष को स्वीकार कर सकते हैं।

कार्ल पियर्सन का अभिमत है कि तथ्यों का वर्गीकरण उनके क्रमों की स्वीकारोक्ति तथा सापेक्षिक महत्ता की जानना ही विज्ञान है। अनेक विद्वानों का मत है कि इतिहास को विज्ञान के समकक्ष रखना कठिन है। जेम्स कोनेट के अनुसार इतिहास को विज्ञान इसलिये स्वीकार नहीं किया जा सकता क्योंकि इसमें तथ्यों के अन्वेषण के लिए क्रमबद्ध तथा निश्चित नियमों का अभाव है। कैवेलियन के अनुसार इतिहास को विज्ञान स्वीकार करना कठिन है क्योंकि मानव जीवन का अध्ययन भौतिक तत्वों के समान नहीं किया जा सकता है। क्रोचे का अभिमत है कि इतिहास में स्पष्ट अवधारणा का अभाव होने से इतिहास को विज्ञान स्वीकार नहीं किया जा सकता है। एडवर्ड मेयर के अनुसार इतिहास ज्ञान की क्रमबद्ध शाखा नहीं है। प्रो. वॉल्श इतिहास को विज्ञान स्वीकार करने में निम्न कठनाईयों पर विचार करने की बात कहते हैं अ) विज्ञान में सामान्यीकरण होता है, इतिहास में इसका अभाव होता है। ब) वैज्ञानिक भविष्यवाणी करने में सक्षम होता है, इतिहासकार भविष्यवक्ता नहीं हो सकता क) विज्ञान में किसी भी वस्तु का क्रमबद्ध ज्ञान होता है। पर इतिहास में इसका अभाव दिखाई देता है। ड) विज्ञान

तथ्योंपर आधारित वस्तुनिष्ठ होता है। जबकि इतिहास का स्वरूप विषयनिष्ठ होता है। ई) इतिहास में विशेष तथ्यों का प्रस्तुतीकरण होता है जबकि विज्ञान में विशेष तथ्यों का समावेश होता है।

अतः यदि इतिहास मानवीय उपलब्धियों की कहानी है तो इसके अध्ययन में वैज्ञानिक विधियों का प्रयोग आवश्यक हो जाता है। डिल्थे ने स्पष्ट कहा है कि विज्ञान प्रकृति का तथा इतिहास मनुष्य का अध्ययन है।<sup>२५</sup> प्रो.होजेस के अनुसार इतिहास विज्ञान है क्योंकि यह मानसिक प्रक्रियाओंका अध्ययन है। रेनियर की दृष्टिसे इतिहास विज्ञान है जिसका एकमात्र उद्देश ज्ञानार्जन है तथा ज्ञान की उपयोगिता को सिद्ध करना है। विज्ञान की भाँति इतिहास की कसौटी भी यथार्थता है। मनुष्य तथा उसके वातावरण का अध्ययन ही इतिहास का वैज्ञानिक अध्ययन है।

### इतिहास लेखन का कलात्मक पक्ष –

वैज्ञानिक विधियों से परिष्कृत होने के बावजूद अधिकांश इतिहासकारों की अवधारणा है कि इतिहास कला की शाखा है। कार्ल पियर्सन, जी आर. एल्टन का अभिमत है कि इतिहास कला है। क्योंकि इसके प्रस्तुतीकरण, व्याख्या में कलात्मक शैली की निर्माण आवश्यकता होती है।<sup>२६</sup> जिस प्रकार प्रत्येक युग में इतिहास लेखन समसामयिक दृष्टिकोण से किया जाता है, उसी प्रकार इतिहासकार के लेखन में उसका व्यक्तिगत दृष्टिकोण निर्णायक तत्व सिद्ध होता है। इसमें यथार्थता के साथ विवरण संबंधी कुशलता, रोचकता आदिपर विशेष ध्यान दिया जाता है। इस अर्थ में इतिहास निश्चित रूप से कला है।<sup>२७</sup> यह इतिहासकार की कुशलता पर निर्भर करता है कि वह पाठक को अतित कालीन समाज का परिभ्रमण करवाकर उसको कितना प्रभावित करवाता है। कलात्मक प्रतिभा के चलते इतिहास का अध्ययन रोचकपूर्ण हो सकेगा पर कलात्मक प्रतिभा के अभाव में इतिहासकार पाठक को सभी तथ्यों से अवगतकराने में असफल होगा। डिल्थे के अनुसार इतिहासकार की सफलता उसकी बैद्धिक तथा विश्लेषणात्मक शैली पर निर्भर करती है। प्रत्येक इतिहासकार ऐतिहासिक सामग्री को कलात्मक ढंगसे अपनी रचना में प्रदर्शित करता है। अतः राऊज का यह कथन यथार्थ प्रतीत होता है कि इतिहास सदैव कला रहेगा।

तुर्गो तथा कोंदरसे ने इतिहास का संबंध मानव प्रगति से संलग्नित किया है। इतिहास मानवीय प्रगति को मापने का एक यंत्र है। अतः समस्त मानवीय इतिहास प्रगति का इतिहास का आलेख मात्र नहीं अपितु एक प्रगति विज्ञान है। इतिहासकार वर्तमानकालिक मूल्यों के आधारपर ऐतिहासिक घटनाओं की व्याख्या करके उसे प्रगतिसूचक अथवा विरोधी स्वीकार करता है।<sup>२८</sup> वस्तुतः इतिहास परिवर्तन, गति और प्रगति में निहित है। ऐतिहासिक तथ्य प्रायः निरस तथा निर्जीव होते हैं। प्राचीन स्मारक पुरातात्विक उत्खनन से प्राप्त अवशेषों को निर्जीव तथ्यों के समान यथावत रख देने का तात्पर्यही इतिहास को निर्जीव बनाना होगा। परंतु इतिहासकार अपनी कलात्मक लेखन शैली से इन निर्जीव ऐतिहासिक तथ्यों के आधारपर अपने पाठकों को सजीव इतिहास प्रस्तुत करता है।<sup>२९</sup> कॉलिंगवूड के अनुसार इतिहास की घटनाओं को न तो इतिहासकार देख सकता है और न अन्य कोई व्यक्ति। परंतु इतिहासकार सभी घटनाओं, मानवीय उपलब्धियों का एक परिकल्पनात्मक चित्र प्रस्तुत करता है जिसे ऐतिहासिक कल्पना कहा जाता है। प्रो. जे. बी. ब्युरो ने यह स्वीकार किया है कि इतिहास, विज्ञान तथा कला का सुंदर समिश्रण है।<sup>३०</sup> इतिहास की नीरसता को कम करने के लिए यह आवश्यक है। इसे रोचक शैली में परिष्कृत किया जाये जिससे इतिहास समझने में सहायता मिल सकती है तथा राष्ट्र विकास में अमूल्य योगदान मिल सकता है।

## A Comparative Study Of Anxiety Among Junior And Senior Players

**Dr.Ulhas V Deshmukh**

Principal

Shri Shivaji College of Physical Education Amravati

### Abstract

*The purpose of this study was to compare the anxiety between junior and senior players. The study was conducted on hundred samples, consisting of fifty junior school state level players and fifty senior inter university players. Only Basketball, Cricket, Handball, Hockey, Kabaddi, Kho-Kho and Volleyball women players were selected. The sample consists of fifty junior state players of Santa gadge baba amravati university districts & fifty senior inter university players of Santa gadge baba amravati university districts. Random Sampling Technique was employed to select the subjects. Anxiety was obtained by administrating Sinha's Comprehensive Anxiety Test. The data collected through aforesaid tests were analyzed with respect to anxiety. T test was applied to compute the significances among two groups. The significance of data was judged at 0.05 levels. The result of the study indicates that anxiety of junior and senior players were different*

### Introduction

Anxiety is a complex emotional phenomenon. It is reflected in the negative state of disturbed feeling which warns the athlete to find some ways to meet a situation. It is found in his unusual responses to situations. In an anxiety ridden state of mind, he is now incapable of doing things which earlier were fully under his control. It has startlingly been found influencing future events. An overanxious person is not restless over the things in hand (here and how), but he is more concerned about the future happenings which bother him. This condition then becomes operative in him. It changes his state of mind.

Anxiety describes the individual's level of emotionality. Anxiety and arousal are related because at the higher levels of arousal we considerably have more emotionality than at the lower levels. Since anxiety is an inferred emotional state of the organism and cannot be directly observed, investigations of anxiety rely heavily on having the individual report her own emotional states under various stress conditions. It has been observed that anxiety is a physiological response to a real imagined threat. It is a complex emotional state characterized by a general fear. Feelings of rejection and insecurity are usually a part of anxiety. A certain amount of anxiety is needed for peak performance.

### Methodology

#### Objectives of the study:

The objectives of the study are stated as follows:

- To study the anxiety among junior and senior women players.
- To compare the anxiety among junior and senior women players.

#### Hypothesis :

There would be no significant difference between junior and senior players on anxiety.

#### Selection of Sample:

The sample consists of fifty junior state players of Santa gadge baba amravati university districts & fifty senior inter university players of Santa gadge baba amravati university districts. The subjects were drawn from the colleges affiliated to Santa gadge baba amravati university. Random Sampling Technique was employed to select the subjects. The data was collected from senior players during inter university coaching camp and junior players during school state level sports tournaments. The present study is based on survey method.

#### Tools Used

Sinha's Comprehensive Anxiety Test has been taken to assess the anxiety. This questionnaire consisted of ninety statements.

#### Statistics Used

Student's t test has been applied to find out the significant differences among two groups at 0.05 levels of significance. The collected data were tabulated to find out the difference of anxiety among two groups.

**Results And Discussion:****Table - 1 Means, SDs and T-ratio of anxiety between Junior and Senior women players.**

Variables	Group	N	Mean	SD	T-ratio
Comprehensive Anxiety	Junior	100	13.8	2.22	4.31*
	Senior	100	12.4	2.30	

\* Significant at 0.05 levels.

The means of anxiety for junior was 13.8 and senior was 12.4. The calculation of mean, standard deviation and T ratio of junior and senior on anxiety are presented in table 1. Table 1 reveals that there is significance between junior and senior women players on anxiety. Thus it may be concluded that anxiety of both junior and senior women players are different.

**Fig.1: The mean of the anxiety of junior and senior players**

The means of anxiety of junior and senior players was 13.8 and 12.4 respectively. The T ratio obtained is significant at 0.05 level of confidence. Hence the hypothesis that senior and junior women players have not differ on anxiety was rejected. Senior women players have low anxiety than junior women players.

**Conclusions :**

On the basis of the study the following conclusions were drawn:

1. Senior women players were less anxiety than junior women players.
2. There was significant difference between junior and senior women players on anxiety.

**Recommendations**

1. While giving psychological training along with yoga and meditation, special attention must be given on anxiety
2. Sports Competition Anxiety help in improving performance.
3. During competition players are mentally anxious and this affects them in handling performance. To avoid such effects players prepared psychologically.

## Sport Management And Role Of Higher Education In India

Prof Dr.P.M.Deshumkh

Shri Shivaji college of physical education Amravati

### Abstract

*Universities deliver a multifaceted focus of teaching, research and industry service and leadership for the sport industry. Educating future sport managers in areas across governance, facility management, social or legal issues and marketing plays a key role. Also, conceptualising key questions, undertaking research and interacting with and leading discussions are all key functions of sport management programmes across the world. What are the specific skills that a specialized sports management programme offer? Certainly at the professional level, there are aspects of the sport industry that have reached professional status and act very much like 'generic' corporate businesses or organisations. However, there are unique aspects of the industry such as a greater need for co-operation between organisations, the highly emotional nature of sport consumption, and the public nature of sport that leads to the need to balance outcomes for multiple and complex sets of stakeholders*

### Introduction

With the evolution of education, one aspect which is very much visible is the emergence of newer academic areas and study programmes. The role of education today is not confined to gaining knowledge only. It has today become a path leading to a successful career and a better future. As a result we see more specialized academic programmes catering to dedicated fields. One such growing programme is Sports Management. As Dr Adam Karg says, "Considering its full impact, the sport industry employs thousands, delivers services to millions and generates billions of dollars in both established and emerging economies."

### Scope and Opportunities of sports marketing and management as an academic area

Considering its full impact, the sport industry employs thousands, delivers services to millions and generates billions of dollars in both established and emerging economies. The increasing emergence of professional organisations in India is reflective of more established sport markets worldwide, where many countries support a range of sport-related industries. In line with this, there are a range of academic bodies who work with sport management institutions, associations and groups to connect and move the industry forward.

### Role of universities and business schools in the area of Sports Management

Universities deliver a multifaceted focus of teaching, research and industry service and leadership for the sport industry. Educating future sport managers in areas across governance, facility management, social or legal issues and marketing plays a key role. Also, conceptualising key questions, undertaking research and interacting with and leading discussions are all key functions of sport management programmes across the world. What are the specific skills that a specialized sports management programme offer? Certainly at the professional level, there are aspects of the sport industry that have reached professional status and act very much like 'generic' corporate businesses or organisations. However, there are unique aspects of the industry such as a greater need for co-operation between organisations, the highly emotional nature of sport consumption, and the public nature of sport that leads to the need to balance outcomes for multiple and complex sets of stakeholders. As such, what has emerged is a specific sport management discipline, with specific structures, theories and frameworks relevant to the industry. Some examples include sport development frameworks, governance system and specific marketing theories developed for the sport context. In short, the role of the sport manager necessitates both a business background and knowledge and understanding of the sport industry as a unique and distinct one.

### Impact of new forms of marketing on consumers and organizations.

Sport organisations, particularly those with a marketing orientation are increasingly adopting a consumer centric focus and realisation that the building of communities and movements is central to the engagement and identification so vital to successful and sustainable sport brands. As such some of the key impacts and requirements of sport marketing (and the focus of our recent Deakin workshops in India) include: Understanding the emerging need for greater consumer and relationship marketing focuses in sport marketing Understanding the need and opportunities for organisations and consumers to work together to create value Developing strategic approaches to fan development and fan engagement Understanding that sport consumption includes a mix of functional and emotional aspects Accepting the role of data as a core dimension in strategy, with marketing and engagement in sport a balance of 'art' and 'science' Understanding that a myriad of new media tools and opportunities provide new ways to communicate, share, educate and engage

consumers of high involvement products like sport Understanding that one size does not fit all, and that the brand in question, the sport and any geographic context plays an important role in marketing strategy  
Key challenges that a budding sports manager faces in the industry

Primarily in India, it is clear the discipline of sport management is still being established, and as such, the option for students to consider sport management as a viable career path is likewise in development. Generally, then, the visibility of Sport Management as a career, educating managers and encouraging and implementing strong governance as well as ushering in professionalization and commercialization processes present as industry challenges. The signs are good in India, with passionate sporty public, new successful leagues and teams, and a range of new organisations being established to service the industry. Among the current and emergent generation of managers in India, we can see the first round of specially trained and educated sport managers, many of whom have studied (in part or in full) with programmes overseas. Importantly, the need and demand for qualified and capable sport managers is already apparent, but the industry lacks development and visibility – both key issues. In Australia, strong systems and an understanding of the role of sport has been apparent for 30 years or more and remains highly reliant on government support through policy, direction and funding. Other systems around the world are likewise successful but may rely more on private or commercial funding models. Generally though, there are a number of building blocks of successful sport systems including funding, strong levels of participation, talent identification and pathways for coaching and development, events, facilities, strong governance and a culture of performance.

### Conclusion

Firstly, it is important to realise that not all sport management programmes around the world are delivered from business schools, despite the clear emergence of sport as a viable and sustainable business stream and industry. Sport Business International (an industry magazine) releases a list each year of the top ranked postgraduate programs. Deakin University (Australia) leads the rankings for Asia Pacific institution, with Ohio University (North America) and the FIFA master (delivered in Europe) the leading programmes in other regions.

## A Comparative Study On Socio Economic Differences Between Team And Individual Game Players

**Dr.Chetak R Shende.**

Shri Shivaji College Of Physical Education Amravati.

### Abstract

*The purpose of the study was to find out the socio economic differences between team and individual game players. To achieve the purpose fifty men team game players and 50 men Athletics, gymnastics, swimming, judo players of year 2016-2017 studying in the H.V.P.M, College Amravati Maharashtra, India were selected as subjects at random. The age of the subjects were ranged from 18 to 28 years. Socio economic status was selected as criterion variable. All the subjects of two groups were tested on selected criterion variable by using Socio-economic status scale of Kapoor and Kocher (1984). The independent's' ratio was used to analyses the significant difference, if any between the groups. The level of significance to test the 't' ratio was tested at .05 level of confidence, which was considered as appropriate. The results of the study revealed that there was a significant difference between team game players and individual game players on selected criterion variable such as socio economic status.*

*KeyWords: Socio Economic Status, Team Game Players, Individual Game Players, Independent 'T' Ratio*

### Introduction

Primary education is the most basic formal education and is valued very highly for preparing learners for secondary education, world of work, Scientific and technical application of knowledge and Life skills. Socioeconomic status depends on a combination of variables, such as occupation, education, income, wealth, and place of residence. Sociologists often use socioeconomic status as a means of predicting behavior. It has been recognized that socio-economic factors play a vital role in an individual's performance in sports. The Socio-economic status make-up of an individual plays an important role in their achievements in every field of life. Considerable research have been conducted on the socioeconomic status of sports persons, team sport versus individual sport, Men players versus Women players. But very few research studies are available in published from a socio-economic status of games like team and individual game players. There are many psychological factors like socioeconomic status attitudes, motives, spectators, self-concept, motivation, adjustment etc., which influence the participation and performance of sportsmen in games and sports. The socio-economic status of the group and the status of an individual in his group influence competitive and co-operative behavior for different reasons and the different factors that those motivating people in the middle and upper economic group influencing the wellbeing of the players

### Methodology

The purpose of the study was to find out the socio economic differences between team and individual game players. To achieve the purpose of the study, 50 men team game players and fifty men individual game players studying in the H.V.P.M, College Amravati Maharashtra, India were selected as subjects at random. The age of the subjects ranged from 18 to 28 years. The socio economic status was selected as criterion variable. All the subjects of two groups were tested on selected criterion variable using Socio-economic status scale by Kapoor and Kocher (1984). The independent's' ratio was used to analysis the significant difference, if any between the groups. The level of significance to test the 't' ratio was tested at .05 level of confidence, which was considered as an appropriate

### Analysis of the Data

The differences between team game players and individual game players on socio economic status were analyzed separately and presented below.

#### Socio Economic Status

The mean, standard deviation and's' ratio values on socio economic status between team game players and individual game players was analyzed and presented in Table I.

Table I the Mean, Standard Deviation And 'T' Ratio Values On Socio Economic Status Of Team Game  
And Individual Game Players

Groups	Mean	Standard Deviation	The Obtained 'T' Ratio
Team Game Players	11.64	0.98	14.486*
Individual Game Players	14.69	0.87	

(The Table Value Required For Significance At .05 Level Of Confidence With Df 98 Was 1.99).

Table I showed that the mean values of team game and individual game players were 11.64 and 14.69 respectively. The obtained' ratio value of 14.486 was more than the required table value 1.99 for significance at .05 level of confidence with df 98.

The results of study showed that a significant difference exists between team game players and individual game players on socio economic status.

### Conclusions

Based on the results of the study, the following conclusion was drawn.

1. There was a significant difference between team game players and individual game players on socio economic status.
2. Among the groups, the individual game players were better in socio economic status than team game players

## Technological A Boon To The Sports Society

**Dr. Bhaskar Mahadeorao Sawarkar**

Director of Physical Education & Sports  
G. S. Gawande College, Umarched, Dist- Yavatmal

### Abstract

*Sports have always been demanding for the technological development. It really is difficult to play and monitor the sports played without the technological usage in modern days. And obviously the inclusion of sports technology has been a remarkable change in the world of sports. Basically, it is the technology which has a great impact on the performance of the player and the fare plays in the sports. And hence the paper explains how the inclusion of the technology has changed the world of sports and how it has an impact on the players too as how their performance is boosted and improved, advancements to be done in the technology used in the sports and types of technology used, its advantages and disadvantages.*

**Key Words:** Sports Tech, Enhancement of Performances, Types of Technology used.

### Introduction

These days as everything is getting technologically sound and hence it was the need of the emerging and evolving needs of the sports to combine sports with technology to improve the performances and the to check whether the decision taken is fair or not. It is often said that the technology is not only outside in the world but also it is inside us. Technology is described as any tangible, conceptual, or procedural element of modern sport that usually is aimed at progress. Well the statement can be explained as that the advancement is done in everything such as the running shoes worn by the player and the eye wear used or simply the advancement made in the track and field events to monitor the progress and the players performance in the training as well.

Advancement simply means synching the player and the technological stuffs for the enhancement of the player and the sport played as well i.e. the combining the player's ability and new technology to improve the results and boost the performance to get the best possible outcome on the field. The technological stuffs like wearable gadgets, lenses and cameras, electronic sensors on the finish lines, DRS, VAR, etc. to get the accurate results and is very helpful to record the data obtained and then to study the data and make the changes required, which then can surely improve the performance of the player and the sports too can be improved. Thanks to the use of these technologies in training players have the opportunity to evaluate them and find out how to correct their errors in a question of minutes.

### New Technological usage in different sports:

**Football:** As mentioned above that the advanced technology is very wide spread concept and when it is associated with the game like football which is like a king of all games this is what many people believe in the world but if we limit ourselves in India then we Cricket is all we praise and follow. But talking about football it is a very challenging sport and for the fare play technological use is must. And for monitoring the players and then acquiring the data to study and then to improve their performance. Video analysis is what we can consider as the basic and the primary thing from the technology we use.

### Some of the technological stuffs used in football are:

Virtual Offside Lines, Goal Line Technology, VAR

**Cricket:** Cricket is a sport where there are so many rules and hence there are so many things to monitor therefore, technological need is huge in a sport like Cricket. Unlike other sports there are so many rules and technological usage in Cricket with Third Umpire, Decision Review System (DRS), and TV Technology such as,

- Helmet cameras
- Use of lasers technology to make the run out decisions even more accurate.
- Sensors in the equipment such as boundary rope and in the ball to ensure that the batsman is out or have secured a boundary.
- The field is then painted with a special type of biodegradable paints.
- Use of cameras and AI technology to measure the distance when a 6 is hit.
- The stump cameras are used to clarify the minute doubts when the final decisions are taken such as run out.

Such as Football and Cricket the technology is used in every sport so as to monitor everything and as these sports are very popular and actually contain all the technologies those can and are being used in other sports is explained. There is this sport swimming in which the electronic touch pads are used for obtaining the accurate timing, likewise every sport need technological support to grow.

#### **Improvements can be done:**

It's been so long now that the technology is transforming the world of sports and it will be transforming for the betterment of the sports and the players. As of now the development is done taking the sports personals and professionals into consideration but here on the developments to be done to make increase the viewer's experience and technology can be developed to help the fans to interact with their idols very easily. With the help of Artificial Intelligence new bots to be invented who can act even smart and there will be even fare plays as of now there are some mistakes happening from the referees. Technologies should be built to improve the medical facilities and by which the injury recovery time will be minimized and the player can get back to work as soon as possible or one can say very swiftly. The wearable gadgets should evolve even more so that the person using it can get even more real time data and then it will help one to work on something where he/she lacks. For example, the distance covered compared to time and with comparison with the previous data to know it better and technology should be developed to measure the fatigue levels and then one can work on it so that it can be improved. Plus the improvements can be done in the prosthetics which is used by the disabled players so that it lasts longer and adding numerous sensors to it so that the pressure points can be obtained and then the changes can be done for ever more comfortable experience.

#### **Importance of Technology in Sports:**

Athletes Can Be More Accurate in their Game, Technology helps athletes, both amateur and professional, find out what is wrong with a particular part of their game, and helps them fix it. It is a revolutionary part of the game that has become a key ingredient for success. Technology can indirectly increase the revenue generated from the sports. Technology can be used to make the sports even safe to play. If the technology is introduced it attracts many people and hence the participation increases in sports. But at the same time it also increases the money requirements so as to buy it and then maintain and upgrade the technology.

#### **Conclusion**

Therefore, the introduction of modern technology in sports is very important, and by time the technology will evolve and it surely will give sports even better days than now and help to establish even more powerful players and fare plays will be seen.

In modern times, home economics teaches people of all genders important life skills, such as cooking, sewing, and finances. With the stigma the term “home economics” has earned over the years, the course is now often referred to by different terms, such as “family and consumer science.”*

*Home Economics provides students with the knowledge, understanding and skills necessary for living as individuals and as members of a family. ... It prepares young people for the opportunities and challenges they will meet in the course of their lives, will meet in the course of their lives by giving them vital social, creative and management skills.*

*Home economics has three major components; home management, food and fabrics. Under home management, there are a number of components that include cookery, laundry, health education and house craft. Innovation is one of the most important concerns of each organization and its role in the development and coordination of the market is inalienable. Innovation in all human areas is applicable from product development, methods of management, ways of doing works and etc.*

**Keyword** – Innovation, Education, Economic Growth, Skills

### Introduction :

People working in the field of home economics educate, take action and advocate to government, industry and the community in order to enhance the wellbeing of individuals and families, especially as it relates to food and nutrition, living environments and textiles. At one level, the focus of the work is to enable individuals and families to make informed and ethical decisions in order to enhance their everyday living. At another level, the focus of the work is on policies and practices that support individual and family wellbeing. Home economics professionals work in community health, in industry and as teachers in high schools. Home economics professionals may specialise in, for example, families, food management, nutrition, resource management, consumerism, child care, aged care, textiles, housing. Home economics professionals perform a variety of tasks dependent on the setting and the area of specialization.

Home economists may have expertise in one or more of the following:

- Childcare
- Consumer education
- Design
- Environmental, social and Economics issues related to households, families and society
- Family studies
- Food marketing
- Food studies
- Health and nutrition
- Hospitality and catering
- Housing and interiors
- Product promotion
- Resource management
- Technology practice
- Textiles, fashion and clothing

Innovation is defined as

Innovation in Home-Economics

“the process of making changes to something established by introducing something new.” It applies to “...radical or incremental changes to products, processes or services.” Over the years there have been many changes in the way education is designed and delivered in parts of the world.

Innovation is the creation and transformation of new knowledge into new products, processes, or services that meet market needs. As such, innovation creates new businesses and is the fundamental source of growth in business and industry. Placing purpose at the core of your organization's innovation strategy allows you to focus efforts in the right areas and motivate your team to deliver disruptive results. When you underpin innovation with purpose, you have created a powerful, meaningful context that drives success.

In today's innovation economy, education becomes even more important for developing the next generation of innovators and creative thinkers. ... It ignites a passion for learning and provides students with the tools they need to succeed in the innovation economy.

### **Innovation in its modern meaning is**

"a new idea, creative thoughts, new imaginations in form of In business and in economics, innovation can become a catalyst for growth. Since then, hubs of innovation have sprung up globally with similar a version of the incandescent light bulb economically viable for home use, ...

The purpose of innovation, research and development. In an engineering business, innovation is a core activity. It is important for its survival and can help the business remain competitive in changing markets. Innovation can be applied to product renewal or the design of new processing technologies.

### **The objectives of Home Economics**

- (1) to help students prepare themselves for home and family living;
- (2) to provide certain experiences which are preparation for professional home economic employment;
- (3) to provide the home economics education curricula which will qualify the person to meet

### **Hypotheses**

- (1) students prepare themselves for home and family living;
- (2) importance for professional home economic employment;
- (3) to provide the home economics education curricula which will qualify the person to meet

### **Types of Innovation**

Incremental Innovation:- Incremental Innovation is the most common form of innovation.

Disruptive Innovation:- Disruptive innovation, also known as stealth innovation, involves applying new technology or processes to your company's current market.

Architectural Innovation:- Radical innovation. One of the most useful technological innovation examples are the innovations in renewable energy. The innovations include technological inventions such as wind turbines, photovoltaic cells, concentrated solar power, geothermal energy, ocean wave power and many other emerging innovations

Breakthrough innovation comes from Zipcar :- The company re-envisioned the business model for driving through its subscription service. ... A radical shift away from the existing car ownership and car rental business models, Zipcar is a true example of breakthrough innovation.

The four different types of innovation mentioned here – Incremental, Disruptive, Architectural and Radical – help illustrate the various ways that companies can innovate. There are more ways to innovate than these four. The important thing is to find the type(s) that suit your company and turn those into success.

The simplest way to categorize innovation is into two types – incremental and radical. Incremental innovation is an improvement in an existing thing (e.g. product, process or service). ... Larry Keeley in his excellent book, Ten Types of Innovation, divides all corporate innovations into ten categories

### **A working definition of innovation**

The Latin word innovare – which means 'to make changes' or 'to do something differently' offers a partial answer to the question what innovation is. ... The key driver for all innovation is value creation and, ultimately, the long-term survival of your business

Promoting a well-being of an individual that's – Home economics. This subject helps the society to develop human progress for it comprises major ideas on food, clothing, home and family. Human progress is necessary for the society to grow. It is so important since well-being vibrates all aspects of human experience.

Home economics, domestic science or home science is a field of study that deals with the relationship between individuals, families, communities, and the environment in which they live. Home economics courses are offered internationally and across multiple educational levels. Home economics courses have been important throughout history because it gave women the opportunity to pursue higher education and vocational training in

a world where only men were able to learn in such environments. In modern times, home economics teaches people of all genders important life skills, such as cooking, sewing, and finances. With the stigma the term "home economics" has earned over the years, the course is now often referred to by different terms, such as "family and consumer science." requirements of the ...

The process of translating an idea or invention into a good or service that creates value or for which customers will pay. In business, innovation often results when ideas are applied by the company in order to further satisfy the needs and expectations of the customers. In addition to the fact that innovation allows organizations to stay relevant in the competitive market, it also plays an important role in economic growth. The ability to resolve critical problems depends on new innovations and especially developing countries need it more than ever.

### **Innovation is Important**

Innovation is vital in the workplace because it gives companies an edge in penetrating markets faster and provides a better connection to developing markets, which can lead to bigger opportunities, especially in rich countries

One of the most useful technological innovation examples are the innovations in renewable energy. The innovations include technological inventions such as wind turbines, photovoltaic cells, concentrated solar power, geothermal energy, ocean wave power and many other emerging innovations

- Cooking. Since food preparation was central to homemaking, cooking is one of the earliest disciplines in home economics. ...

- Child Development. ...
- Education and Community Awareness. ...
- Home Management and Design. ...
- Sewing and Textiles. ...
- Budgeting and Economics. ...
- Health and Hygiene.

Home economics has three major components; home management, food and fabrics. Under home management, there are a number of components that include cookery, laundry, health education and house craft. Innovation is one of the most important concerns of each organization and its role in the development and coordination of the market is inalienable. Innovation in all human areas is applicable from product development, methods of management, ways of doing works and etc.

Home Economics provides students with the knowledge, understanding and skills necessary for living as individuals and as members of a family. ... It prepares young people for the opportunities and challenges they will meet in the course of their lives, will meet in the course of their lives by giving them vital social, creative and management skills.

Innovation is essential for sustainable growth and economic development. Several core conditions enable innovation and encourage economic growth. In the modern economy, innovation is crucial for value creation, growth and employment and innovation processes take place at the enterprise, regional and national level.

Promoting a well-being of an individual that's –Home economics. This subject helps the society to develop human progress for it comprises major ideas on food, clothing, home and family. Human progress is necessary for the society to grow. It is so important since well-being vibrant all aspect of human experience.

In addition to the fact that innovation allows organizations to stay relevant in the competitive market, it also plays an important role in economic growth. The ability to resolve critical problems depends on new innovations and especially developing countries need it more than ever

In addition to the fact that innovation allows organizations to stay relevant in the competitive market, it also plays an important role in economic growth. The ability to resolve critical problems depends on new innovations and especially developing countries need it more than ever

Design, creation, evaluation

- Adapting and improvising
- Assessing
- Being creative and enterprising
- Creating
- Discerning
- Evaluating
- Leading
- Problem solving
- Producing

- Recognizing standards in relation to foods,
- textiles, clothing and living environment

Teachers of home economics/ design and technology/ health/ hospitality might perform the following tasks: Provide opportunities for students to understand and shape preferred solutions to a range of challenges in their personal, family, community and work roles. For example, they may develop and implement learning experiences that enable students to learn how to:

- Be innovative, enterprising and creative
- Balance work responsibilities with personal responsibilities and leisure
- Choose nutritious foods in a changing marketplace
- Design, evaluate and make decisions related to textiles and food
- Make informed, responsible and ethical consumer decisions
- Negotiate for effective and diverse family and interpersonal relationships
- Prepare nutritious foods and develop health promoting food behavior's
- Take control of their health and develop health promoting behaviors'
- Understand and take action to enhance human growth and development
- Understand and confront the way they influence and are influenced by broad societal factors such as media, advertising, peer pressure, government policies and changing technologies
- Utilize design and technology relevant to families and households
- Provide opportunities for students to develop vocationally related knowledge and skills such as those related to food technology, hospitality, childcare and the design and textile industries.

#### Home economists in industry might perform the following tasks:

Develop and/or test products within the food, textiles and/or household appliance industries.

Provide information about and promote products and services such as those related to food and household appliances.

Prepare educational materials for the community – for example, DVDs, CD-ROMs, videos, pamphlets, newsletters, teaching kits and other promotional material.

Present educational materials through, for example, television and radio, media releases, campaigns and newsletters.

Research and analyses consumer needs and preferences and provide advice to industry for product/service development and/or improvement.

Home economists in community health might perform the following tasks:

#### Conclusion:-

Provide information services for individuals and families on matters such as financial management, family relationships, childcare, food and nutrition, household management, housing and energy.

Develop nutritionally balanced menus for a range of community settings including childcare centers, aged care centers, school canteens, retirement villages and institutional care.

Manage food service operations in the community – for example, childcare centers, aged care centers, Meals on Wheels.

Design and teach independent living skills for disabled and disadvantaged people. Develop programs and policies for the design and delivery of health and social services. Develop and implement programs to assist newly-arrived migrants perform their personal, family, community and work roles.

## A Standard Of Living Of Government Employed And Self-Employed People.

Dr. Umesh Vyas

Director of Physical Edu. & Sport  
Locmanya Tilak Mahavidyalaya, Wani**Abstract**

*The purpose of the study was to compare "A Standard of living of Government Employed and Self-Employment Persons" For the present study researcher had collected data from Chandrapur. Twenty (20) subjects 10 Government Employed and 10 Self-Employed Person were selected as subjects with purposive sampling methods. The age of the subjects were ranged between 30 to 40 years. Standard of living was measured with Life Style Scale developed by S. K. Bawa & S. Kaur. Statistical analysis was done on the basis of 't' test. The level of significance was kept on 0.05 of degree of freedom. Result shows that on the basis of mean difference there was difference between the means of various dimensions of Standard of living between Government Employed and Self Employed. To see this difference is significant or not at 0.05 level of significance. Researcher further calculated 't' test & above table shows that there is significant difference were found in Health Conscious Standard of living, Academic Oriented Standard of living, Career Oriented Standard of living, Trend Seeking Standard of living and Standard of living between Government Employed and Self Employed as the calculated 't' value 4.84, 3.99, 3.80, 2.90, and 2.73 was greater than tabulated 't' value 2.101. But there is insignificant found were found in Social Oriented Standard of living and Family Oriented Standard of living between Government Employed and Self Employed, as the calculated 't' value 0.33 and 1.44 is lesser than the tabulated 't' value 2.101. The differences may be attributed to that Government Employed enjoys many health benefits because of various health insurance and health program offered by Government. As in Academic Oriented Standard of living and Career Oriented Standard of living Government Employed were always eager to improve their Educational and Career because of their placement/promotion and as well as to be success in their life as compared to Self Employed. Whereas there is insignificant difference were found in Social Oriented Standard of living and Family Oriented Standard of living between Government Employed and Self Employed, it may be attributed that both were enjoy the same level of social and family life.*

**Keyword:** Standard of living, Government Employed, Self-Employed.

**Introduction**

Standard of living is an attitude, interests, opinions, behaviors, and behavioral orientations of an individual, group, or culture. Standard of living is a style of life or living which not only affects the individual who adopts it but also affects society an community. The term Standard of living was first propounded by Alfred Adler in the twentieth century it defines the attitude, values and somewhat exhibits the social position. Moreover it also includes pattern of social relations, consumptions, entertainments and dressing style it reflects person's views, habits, attitude and the way of life which has the direct influence on the person daily life. In the other word we can say that it is a "way or standard of living".

Standard of living of youth in India is taking a rapid turn with the fast changing world. Influence of globalization, modernization, changing needs of the society and awareness is making the youth more and more ambitious, hence affecting their Standard of living. Standard of living can be determine or studied through their orientation to career, society, family, education and trend seeking attitude of an individual. The way of living has a great impact on the competencies of an individual to get success and satisfaction in life. Every individual has their own way and style of living. Thus, Standard of living can be defined as "a person's pattern of living expressed through his/her activities, interests and opinions." Owing to this fact he/she may have health oriented Standard of living, family oriented, academic oriented or career oriented Standard of living. Keeping this in mind the scale of Standard of living for youth has been constructed having the following dimensions :

**Health Conscious Standard of living:** The Standard of living in which the individual always remains conscious for keeping himself physically fit and fine.

**Academic Oriented Standard of living:** it refers to the Standard of living of an individual who always remains involved in his academic field.

**Career Oriented Standard of living:** An individual's Standard of living said to be career oriented when he is always curious to gain more and more knowledge in his career.

**Family Oriented Standard of living:** A person is always in close touch with his family and shares each and every moment of his/her daily activities with family.

**Socially Oriented Standard of living:** An individual, who always participates in social activities and is always keen to do good for society.

**Trend Seeking Standard of living:** An individual, who is keen to adopt new fashion and always willing to update himself with new trends.

A job, service or occupation, is a person's role in the society. A job is an activity, performed regular in exchange for payment or salary. Many people render multiple jobs (e.g., parent, homemaker, and Employed). A person can begin a job by becoming an Employed in a government or private sector, volunteering services, starting own business (self employment), or becoming a parent. The duration of a job or services may range from temporary like daily wages to a lifetime like judges.

Government Employed often called a civil servants or public Employed, working in a various fields such as teaching, sanitation, health care, and administration for the federal, state, or local government. Governments establish basic prerequisites for employment such as compliance with minimal age and educational qualification requirements. In Government job Employed enjoy job security, promotion and educational opportunities, medical coverage, and pension and also many other benefits.

Self employment is the toughest job because it requires lots of courage or guts. It requires lots of investment and many other factors which affect directly or indirectly to start own business. Some may face many questions from their parents, relatives and even friends which will creates a lots of doubt or confusion in your mind weather to start or not. But there are a lot of benefits also like once the business is set or it captured the market it's like a lifetime achievement.

Choosing a job in government sector or private sector/self-employment may be a bit difficult. But it is one's choice and we can say that it is mainly based on an individual's capabilities. By seeing the various matters researcher has taken the study "A Standard of living of Government Employed and Self-Employed People"

## Materials and Methods

### Subject:

For the present study researcher had collected data from Chandrapur. Twenty (20) subjects 10 Government Employed and 10 Self-Employed Person were selected as subjects with purposive sampling methods. The age of the subjects were ranged between 30 to 50 years.

### Criterion measures

**Life Style:** Standard of living was measured with Life Style Scale developed by S. K. Bawa & S. Kaur.

### Statistical Analysis

Statistical analysis was done on the basis of 't' test. The level of significance was kept on 0.05 of degree of freedom. Statistical analysis is shown in the following table.

**Table-1**

**Comparison of Various Dimensions of Standard of living between Government Employed and Self Employed**

Variables	Subject	Mean	SD	SE	MD	Obt 't'	Cal 't'
Health Conscious	Govt Employed	31.5	3.206	1.46	7.1	4.84*	2.101
	Self-Employed	24.4	3.34				
Academic Oriented	Govt Employed	27.9	2.846	1.28	5.1	3.99*	
	Self-Employed	22.8	2.86				
Career Oriented	Govt Employed	26.8	3.615	2.08	7.9	3.80*	
	Self-Employed	18.9	5.486				
Socially Oriented	Govt Employed	18.1	4.306	2.12	0.7	0.33	
	Self-Employed	18.8	5.138				
Trend Seeking	Govt Employed	24.9	4.63	2.31	6.7	2.90*	
	Self-Employed	31.6	5.641				
Family Oriented	Govt Employed	23.3	2.263	1.66	2.4	1.44	
	Self-Employed	20.9	4.725				
Standard of living	Govt Employed	152.5	11.85	5.52	15.1	2.73*	
	Self-Employed	137.4	12.8				

\*Significant at 0.05 level

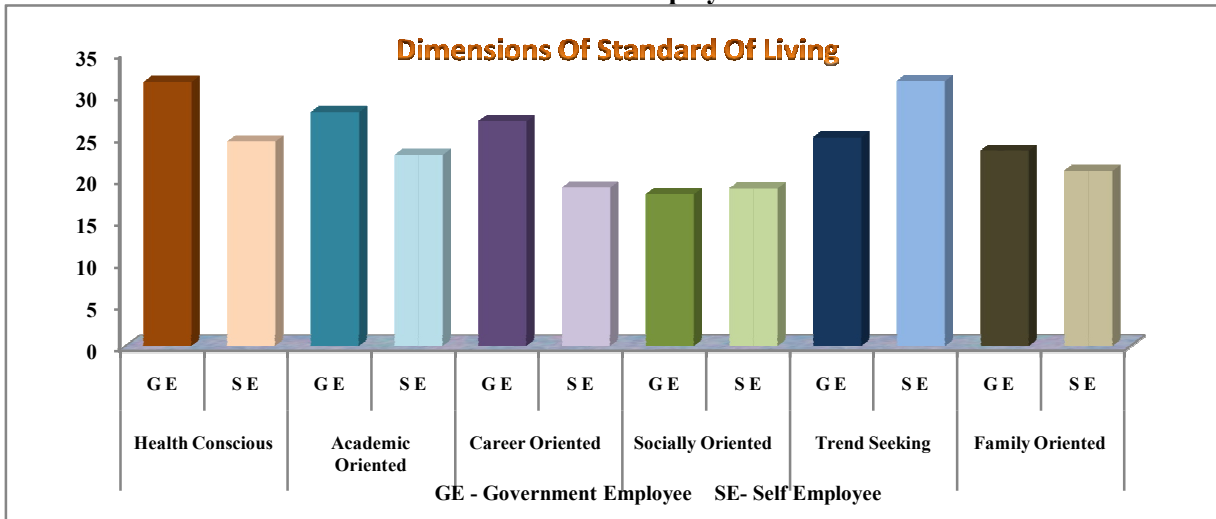

## Result

The above table shows that on the basis of mean difference there was difference between the means of various dimensions of Standard of living between Government Employed and Self Employed. To see this

difference is significant or not at 0.05 level of significance. Researcher further calculated ‘t’ test & above table shows that there is significant difference were found in Health Conscious Standard of living, Academic Oriented Standard of living, Career Oriented Standard of living, Trend Seeking Standard of living and Standard of living between Government Employed and Self Employed as the calculated ‘t’ value 4.84, 3.99, 3.80, 2.90, and 2.73 was greater than tabulated ‘t’ value 2.101. But there is insignificant found were found in Social Oriented Standard of living and Family Oriented Standard of living between Government Employed and Self Employed, as the calculated ‘t’ value 0.33 and 1.44 is lesser than the tabulated ‘t’ value 2.101.

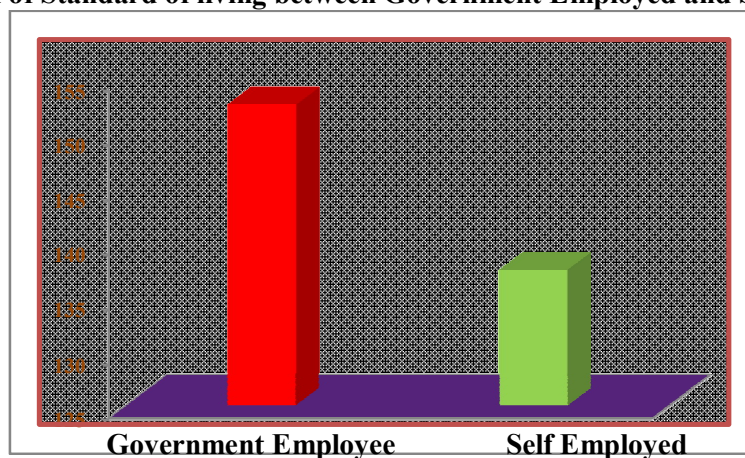

**Graph-2**

**Comparison of Various Dimensions of Standard of living between Government Employed and Self Employed**

**Graph-2**

**Comparison of Standard of living between Government Employed and Self Employed**

**Conclusion**

From the above result we found that there is significant difference were found in Health Conscious Standard of living, Academic Oriented Standard of living, Career Oriented Standard of living, Trend Seeking Standard of living and Standard of living between Government Employed and Self Employed. Government Employed shows better in Health Conscious Standard of living, Academic Oriented Standard of living, Career Oriented Standard of living and Standard of living as compared to Self Employed. The differences may be attributed to that Government Employed enjoys many health benefits because of various health insurance and health program offered by Government. As in Academic Oriented Standard of living and Career Oriented Standard of living Government Employed were always eager to improve their Educational and Career because of their placement/promotion and as well as to be success in their life as compared to Self Employed. Whereas there is insignificant difference were found in Social Oriented Standard of living and Family Oriented Standard of living between Government Employed and Self Employed, it may be attributed that both were enjoy the same level of social and family life.

Government and self-employed both sectors are very good at their own place. But what is one's need? It mean to say that if someone like competitive and updating environment, and some are very ambitious and passionate about his career then he must do something his own business. In self-employed or private sector growth rate is very high it is very fast and sensitive because it requires fast input and gives fast output just opposite to the Government sector. Government sector is little sluggish though it gives job security but here is scope of updating skills and career growth is very less.

## A Comparative Study Of Endurance Strength & Flexibility Between Baseball And Softball Players Of Amravati City

Dr. Atul G. Bijwe

PGTD of Physical Education, Amravati

### Abstract:

Physical fitness denotes a person status of physique in relation to its physical achievements. The latest scientific evidence also edict the fact that for inner or physiological soundness physical fitness is essential. Modern physical educators are divided the components of fitness into Health related and skill related physical fitness components. Physical fitness states to the capacity of a sportsperson to meet the varied physical stresses of their sport without reducing the athlete to a fatigued state. The components of physical fitness are Cardio vascular endurance, Muscular strength, Flexibility. For this study 15 male District level Baseball Players and 15 male District level Softball players of Amravati city were selected as the subjects. All the subjects were specialized in Baseball and Softball players and undergoing training at the Amravati city. District level male Baseball Players have better average performance than District level male Softball Players in flexibility. District level male Softball Players are not having better average performance than District level male Baseball Players in 10x6 mts shuttle run. Baseball Players are better than Softball Players in sit and reach. The average performances of male Baseball players are higher than softball players in endurance. The calculated value of t-ratio was higher than the calculated value required at 0.05 level of confidence. The results of the study after compared with physical fitness of both the groups showed that mutually are not equal.

**Keywords:** *Physical Fitness, Baseball players, Softball Players.*

### Introduction:

Fitness is the word which is generally used in the modern day health conscious society. The people have appreciated the importance of fitness in day to day routines and also in achieving sports quality. Fitness denotes a person status of physique in relation to its physical achievements. The latest scientific proof also edict the statistic that for inner or physiological soundness physical fitness is essential. It is also a great concern for a coach to develop several skills and for this the sportsperson's skill related physical fitness should be upgraded and developed. Physical fitness refers to the capacity of an athlete to meet the varied physical demands of their sport without reducing the athlete to a fatigued state. Physical fitness is component of total fitness an individual. Total fitness is a result of the genetic makeup and the interaction with the environment. Entirely fit individual is psychological unwavering, mentally alert, emotionally stable and socially adaptable to shifting circumstances prevailing in the society. For effective motor system to achieve, an accurate and effective movement is needed whether it is a single effort as in a golf drive or a series of complex and rapidly changing movements as in baseball & softball game.

### Methodology

The purpose of the study was to compare the physical fitness components among male Baseball and Softball players. to achieve this purpose, male Baseball and Softball players from Amravati city who participation in the District level game. Those were selected as subjects they participated in the district level tournament. 10x6m shuttle run, 30 meter sprint, sit & reach and 1.6 km run tests were administered to the subjects. For this study were selected total number of subjects (n=30).

### Result of the Study

Table 1: Comparison of Physical fitness components of Baseball and Softball Players of Amravati city

Motor components	Subjects	No of Players	Mean	SD
30 Meters sprint	Baseball Players	15	5.1293	0.2085
	Softball Players	15	5.2533	0.2437
10 mX6 m Shuttle run	Baseball Players	15	16.7673	0.6904
	Softball Players	15	16.5347	0.3854
Sit & reach	Baseball Players	15	15.6667	4.8648
	Softball Players	15	12.0667	2.5204
1.6 km run	Baseball Players	15	11.1280	1.1530
	Softball Players	15	12.2733	1.3207

\*Significant at 0.05 level

The table no-1 indicates that the comparison of all variables viz. 30 meters sprint, 10x6 meters Shuttle run, sit and Reach and 2.4 km run in respect of male district level Baseball and Softball players of Amravati city. The calculated value of Mean and Standard deviation on the First variable shows in (30 meters sprint) 5.1293, 0.2085 and 5.2533, 0.2437 respectively in respect of male district level Baseball and Softball players of Amravati city. There is a little variation as the Mean value of male Baseball players are less than male Softball players and this can be interpreted that in this variable Softball players are better than Baseball players. The calculated value of Mean and Standard deviation on the Second variable shows in (10x6 meters Shuttle run) 16.7673, 0.6904 and 16.5347, 0.3854 respectively in respect of male Baseball and Softball players of Amravati city. There is a little variation as the Mean value of male Baseball players are higher than that of Softball players and this can be attributed that in this variable male Softball players are not better than male Baseball players. The calculated value of Mean and Standard deviation on the third variables shows in (Sit and Reach) 15.6667, 4.8648 and 12.0667, 2.5204 respectively in respect of male Baseball and Softball players of Amravati city. There is a little variation as the Mean value of male Baseball players are higher than that of male Softball players and this can be explained that in this variable District level Baseball players are better than District level Softball players. The calculated value of Mean and Standard deviation on the fourth variables shows in (2.4 km run) 11.1280, 1.1530 and 12.2733, 1.3207 respectively in respect of male District level Baseball and Softball players of Amravati city. There is a little variation as the Mean value of male District level Baseball players are less than male District level Softball players and this can be explained that in this variable male District level Softball players are better than male Baseball players.

### Discussion

Based on the results of the above study the investigator has drawn the following conclusions: District level male Softball players have better average performance than District level male Baseball players in speed. This speaks that 30 meters sprint is speed event, which comes under sprinting distance. Hence District level male Softball players are already having good speed and can cover 30 meters sprint in less time compared to male Baseball players. The reason is that male Softball players of Amravati city training schedule include mostly activities like strength training, explosive strength training and speed training. District level male Softball players are not having better average performance than District level male Baseball players in 10x6 mts shuttle run. This speaks that District level Softball players are not having good speed and agility. To improve speed and agility Sports male District level Baseball players play the game which improves the agility like the kho-kho, handball and short races etc. The average performances of District level male Baseball players are better than male Softball players in Sit and Reach component. This speaks like that they are having good flexibility. To improve the flexibility in the body their training program includes stretching that is individual and partner stretching. The average performances of District level male Softball players are higher than District level male Baseball players in endurance. To find out whether there is any significant difference among Softball players and Baseball players of Amravati city t-ratio was tabulated. The calculated value of t-ratio was higher than the tabulated value required at 0.05 level of confidence. The results of the study when compared with physical fitness of both the groups showed that both are not equal in physical fitness.

**Yoga The Prevention And Management For Harmful Sicknesses****Mr. Nilesh S. Ingole.**

PGTD of Physical Education, Amravati

**Abstract**

Counteractive action of addictive infections ought to be mind boggling and methodical and it ought to incorporate preparing of social aptitudes, basic leadership abilities, family mediation, and so on. Correspondingly, compelling treatment is typically long haul, deliberate and complex. Physical exercise and yoga can be helpful segments of exhaustive aversion and treatment programs. Then again, aggressive pro athletics rather increment the quantity of hazard elements of substance-related issues (wounds, push, doping, uneven strain, weariness, unequal way of life, and so forth.) Practical involvement with the utilization of yoga in substance subordinate patients and obsessive players are referenced. The upsides of yoga incorporate the reconciliation of physical exercise and unwinding. Adjacent to this, yoga isn't focused, does not require costly hardware and it tends to be utilized even in patients with serious medical issues. The act of yoga will assist individuals with controlling the feelings and interests and obstruction control increments and expels the aggravating components from psyche. Yoga helps in keeping up great wellbeing and giving opposition, stamina, essentialness and energy to the body. Yoga is the best remedial and preventive drug. The strength of our body and brain relies upon the soundness of the wellbeing of our inner organs the heart, lungs, stomach related framework, organs, nerves framework, solid framework and so forth. Yoga practices tenderly tone and shape the body, enhance stance, adaptability and add to feeling of prosperity advancement to positive wellbeing, to the expert in expanding their abilities and enhance the personal satisfaction.

**Introduction**

Yoga is an art of right living and it works when incorporated in our day by day life. It chips away at all parts of the individual: the physical, mental, enthusiastic, mystic and otherworldly. The word yoga signifies 'solidarity' or 'unity' and is gotten from the Sanskrit word 'yuj' which signifies 'to join'. Yoga improves the wellbeing of the body and brains. The word yoga intends to burden or to unite all parts of the body and psyche. Grasping solidarity and decent variety, yoga's definitive point is a more profound association with ourselves and the world around use for some awesome once we influence this association we to can lead an actual existence of grater bliss, acknowledgment and harmony.

"Yoga" originates from the Sanskrit root yuj, which signifies "to join" or "to burden". Yoga is a functional guide, not a religion. Yoga is an antiquated workmanship dependent on a fitting arrangement of improvement for the body, brain, and soul. The proceeded with routine with regards to yoga will lead you to a feeling of harmony and prosperity, and furthermore a sentiment of being at one with their condition. This is a straightforward definition. The act of yoga creates the body solid and adjustable; it likewise enhances the working of the respiratory, circulatory, stomach related, and hormonal frameworks. Yoga realizes enthusiastic solidness and lucidity of brain. In the act of Yoga a definitive point is one of self-improvement and self-acknowledgment.

Yoga the prevention and the treatment for substance-related problems

**Asthma**

The only supportable treatment for asthma lies in yoga. Inhalers can save your life when you get an asthma attack but for a long-term cure you have to practice pranayama.

**Diabetes**

Diabetes is one of the major incurable diseases in the world. You cannot actually treat insulin resistance but some yoga asana like the triangle pose can help to regulate your blood sugar levels.

**Hypertension**

High blood pressure can be caused due to a number of reasons. It is a disease that can be cured only by regular practice of meditative yoga asana like the pranayama.

**Indigestion**

Indigestion is not just a disease but an epidemic among working people these days. But, you can treat indigestion with prescriptions by trying the child pose or wind relieving pose.

**Migraine**

Migraine headaches are often caused because there is not enough blood supply to the brain. Try the yoga poses like sirs-asana or complete headstand to treat migraine headaches instead of popping pain killers.

**Lower Back**

Pain Lower back pain has become a chronic disease among working professionals and people even undergo surgery for it. Try yoga poses like tadasana or the tree pose.

**Arthritis**

Arthritis is a disease that causes severe joint pain and unfortunately incurable. But yoga can help control the amount of pain caused due to arthritis. Try the surya namaskar as a versatile way to cure arthritis pain.

**Liver Problems**

Liver problems can range from minor ingestion to the severe fatty liver syndrome. To have your liver healthy, try some very basic yoga poses that increase the blood circulation in the tummy. The bridge pose and cat pose are good instances.

**Depression**

Yoga is one of the most potent cures for depression. If you don't want to be hooked on on anti-depressants and sleeping pills, try yoga asanas like uttanasana.

**Poly Cystic Ovaries**

PCOS is one of the epidemics that are attacking young women these days. The symptoms are irregular periods and it can even lead to infertility. So try yoga poses like the corpse pose to cure ovarian cysts without medication or surgery.

**Conclusion**

Yoga helps in maintaining good health and giving resistance, stamina, vitality and vigor to the body. Yoga is the best curative and preventive medicine. The health of our body and mind depends on the soundness of the health of our internal organs the heart, lungs, digestive system, glands, nerves system, muscular system etc. Yoga exercises gently tone and shape the body, improve posture, flexibility and contribute to feeling of well-being promotion to positive health, to the professional in increasing their skills and improve the quality of life.

**Yoga As Play For Health And Happiness.****Mr. Santosh L. Ingole<sup>1</sup>****Mr. Vilas V. Dalal<sup>2</sup>****Degree college of physical Education, Amravati.****Abstract**

*Yoga Therapy is the exploration of applying the different systems of yoga in an assortment of diseases and conditions, to encourage ideal wellbeing, recuperating and arousing. Classes are intended for the individual or gathering with a remedial concentration for an explicit wellbeing condition e.g. disease, heart, pre-birth, diabetes, various sclerosis.*

**Introduction**

Yoga involves an extensive variety of psyche/body works on, going from postural and breathing activities to profound unwinding and reflection. Yoga treatment tailors these to the wellbeing needs of people. It advances all round aggregate wellbeing, and in addition helping specific medicinal conditions. Yoga offers a brilliant preparing program to maintain one's wellbeing. Ordinary routine with regards to Yoga, for least 30 to 45 minutes day by day, helps in building up a physical wellness as well as, in keeping the event of numerous such diseases which perpetually result from chaotic pace of current way of life.

"On the off chance that psychotherapy is characterized as "relational technique for alleviating enduring" numerous psychotherapeutic frameworks have existed in India quite a while. In contrast to Western frameworks, these have come up short on a clinical predisposition yet have given an increasingly worldwide structure. The eventual fate of psychotherapy in both East and West lies in finding a reasonable structure with all inclusive legitimacy inside which specially appointed treatments—for side effect alleviation, identity improvement, or relational alteration—can be created"

**Reason for yoga**

At the appropriate time of lime, yoga is essentially viewed as an arrangement of strategies helpful for accomplishing wellness in every day life and anticipation and fix of some explicit illnesses or clutters. Be that as it may, the objective of yoga was diverse when yoga rehearses appeared in excess of three thousand years prior. Since its commencement, yoga appears to have experienced changes in regards to the reason for which it was drilled. A wide range of assortments of yoga came to be polished for various purposes. The primary assortments of yoga incorporate

**Bhaktiyoga**(Yoga of commitment): is the most seasoned assortment of yoga in which the individual rehearsing it summons the Creator of the universe to shower effortlessness and sympathy. This elegance and sympathy is intended to enable the lover to beat every one of the travails and hardships of living . Routine with regards to Bhaktiyoga incorporates supplication, reveres of living. Routine with regards to Bhajtiyoga incorporates petition, venerate, watching severities and restraint, and routine with regards to ethicalness. In the medieval times in India, Many holy people developed the method for dedication as mass-development.

**Karamayoga**(Yoga of obligation or activity): is portrayed in extraordinary detail in the Bhagavad Gita. The fundamental standards of karamayoga incorporate

(a) never surrendering and never bombing in one's obligation, a

(b) looking similarly upon alternate extremes, for example, achievement and disappointment, joy and agony, warmth and chilly, and so forth., without being effected or influenced away by them.

**Jnyanayoga**(Yoga of learning): Is clarified altogether in the Yogasutra of Patanjali (second century BC.). It comprises of eight-overlap yoga. Ynyanayoga incorporates external and internal parts of teaching and preparing the body and brain. It has three imperative strategies: stances, breath-control, and contemplation.

**Hathayoga** (Yoga of real exhibitions): as of late, Hath yoga has turned out to be extremely famous . It was promoted by the specialists if Tantra, called the Natta-yogis in the periods among twelfth and fifteenth hundreds of years AD. Two fundamental specialists who promoted hathayoga incorporate Matsyendranatha, Gorakhnatha, and so on. Hathayoga is portrayed as the yoga of solidarity of ha and tha. This implies the solidarity of the sun promotion the moon in body or the solidarity of vitak pretense - prana and apana.

The motivations behind the four assortments of yoga in day by day life are not the equivalent. Bhajtuyiga tries to appease the protest of love, i.e. God. Because of this love, the specialist of bhaktiyoga would like to conquer challenges in every day life as well as to evacuate the obstacles on the objective all things considered. Karmayoga depends on the perfect that by serenity (samattva) in connection to the contrary energies (dvandvas), the expert of karmayoga can be liberated from the shackles of his/her deeds (karma-band

ha), and along these lines accomplish freedom (mukti). Patanjali's jnyanayoga or raja yoga includes systems for cleaning the psyche by expelling polluting influences through the eight-overlay practice. These include:

(a) Postures or asana: Asanas are an extensive variety of stances that enhance adaptability of muscles and suppleness of joints. Individuals who are not adequately very much educated about different parts of yoga trust that yoga practice for the most part involves routine with regards to asanas. This is maybe in light of the fact that an extensive number of yoga educators are instructors or specialists of azans, numerous books on yoga talk about just the methods of different asanas, and numerous normal dialog, displays and execution of yoga bargain just with the asanas. There are two fundamental classes of asanas. These incorporate

The contemplation an I presents - useful for sitting serenely and consistently for quite a while with the end goal of breath-control or reflection. They have three primary advantages. These are to alleviate pressure from the body and psyche, enhance assimilation and effort, and defeat postural imperfections. There are about six such stances accessible. The social or practicing presents - include extending, squeezing or crushing activity and course of action of the appendages in a sitting, standing, resting, modified, or adjusting position. Hundred of such stances can be learned and rehearsed, and every last one of them has its very own uncommon points of interest.

(b) Breath control or pranayama with strong looks or bandhas: Pranayama is a strategy of controlling relaxing. It include sitting in an agreeable, consistent, loosened up position, and taking profound, full breaths with drawn out, uniform and finish motivations and lapses. In the wake of rehearsing profound relaxing for quite a while, maintenance of breath inside and outside may likewise be polished. Pranayama yields benefits for all capacities like breath, blood flow, processing, discharge, emission, and for enhancing muscle tone, evacuating clog of blood, and arrival of pressure. It encourages extensively to quiet down a chafed and energized brain and make it enduring. The bandhas that include enthusiastic withdrawals of specific muscles upgrade the advantages of pranayama. Reflection should be possible effectively after a couple of rounds of pranayama.

(c) Cleaning methods or shuddhikriyas: Shuddhikriyas are purging strategies that wash down different inside organs of the body. They are likewise called shatkriyas or shatkarma on the grounds that they are six in number.

#### These incorporates:

- Neti: which is utilized for purifying the nasal entry with water, a cloth string, or elastic catheter.
- Dhauti: which is utilized for purifying the stomach with water or with a twenty-two feet long portion of fabric.
- Basti: which is the strategy of purging of colon.
- Trataka: Which is a strategy to rinse the eyes and the psyche.
- Nauli: which is the preeminent among the purging methods, is usec :: wash down every one of the organs and organs inside the guts and make them solid.
- Kapalabhati: which is an activity in ceaseless stomach breathing, is said r :,"eanse the skull and make it sparkling.

(d) Relaxation: The dead posture, called shavasana is an uncommon procedure of yoga for profound unwinding so as to exercise the evil impacts of pressure. Meditational stances and pranayama are additionally powerful in lessening the unfriendly impacts of pressure bringing about the unwinding.

(e) Meditation: It is a compelling technique for enhancing the balance and dependability of the brain. At the point when contemplation is joined with different procedures of yoga, its impact is enormously upgraded for treatment of an extensive variety of medical issues or scatters.

#### What are the upsides of yoga ?

Yoga has numerous points of interest over different strategies for looking after wellbeing, for example, aerobic, games, high impact exercise, amusements, and different types of activity. It needn't bother with any expensive gear and materials, or play areas, swimming pool, rec centers, and so forth. Yoga can be polished consistently. It can the same be drilled inside the house or in the outside, separately or in gatherings. The main necessity is a thick cover spread on the floor and secured with a spotless sheet of fabric. Yoga should just be polished on void stomach. You can do it whenever amid the day. It will profit you regardless of whether you are youthful or old, lean or intensely fabricated, exceedingly instructed or unlettered, rich or poor, from higher or bring down white collar class, occupied, over occupied, or resigned or laborer in the manufacturing plant or in the field.

**Conclusion**

Yoga has something entirely profitable, and valuable to offer to everybody. Usually depicted as the best type of medical coverage for all from the age of seven to seventy seven or more. Two fundamental points of interest of Yoga are avoidance of disarranges and illnesses and upkeep of wellbeing and wellness in everyday life. Other preferred standpoint incorporate adaptable muscles, supple joints, loose and strain free personality and effectively working imperative organs, for example, the heart, lungs, endocrine organs, liver, pancreas and great harmony between different capacities, for example, neuromuscular coordination, and so forth.

## ICT Application In Libraries

**Sandeep A. Lande**

Librarian, Sahakar Maharshi Late Bhaskarrao Shingne Arts College, Khamgaon

### Abstract

*Information Communication Technology (ICT) has remained a catalyst in the issue of national advancement and development. It is proved important for libraries, as it is useful in many ways for libraries. ICT has totally altered the concept of library and information center as it was before. Libraries are adopting ICT for execution of both housekeeping operations as well as to provide services to the library clients. Application of ICT has benefit to the services and libraries are becoming very useful among the users. With the aid of ICT libraries are able to provide pinpointed comprehensive and quick information to those who are in need of particular information. However, it pose some challenges such as lack of finance, lack of policies, maintenance, etc. which can be overcome along the time.*

**Keywords:** *ICT, ICT Application, ICT Challenges, Resource Shearing, Best Practices,*

### Introduction

Information Communication Technology (ICT) has remained a catalyst in the issue of national advancement and development. Information, as power is effectively an infinite resource and a vital tool needed for the development of all sectors in any nation. It is therefore, imperative that application in libraries would go a long way in satisfying the information need of the citizens.

ICT involves incorporation of a range of technologies that are used to support communication and information dissemination. The advent of ICT is indeed a boost to the library services as it now assists many librarians to use their ICT potentials to reach out to library users. Chisenga (2004) identified some of the ICT-based services that are provided by libraries as follows:

- Provision of web access to OPAC: Libraries are providing access to web-based Online Public Access Catalogue (OPAC) interfaces. The OPAC makes it easier for users to access and use information resources. OPAC is the computer form of library catalogue, to access materials in the library (Afolabi and Abidoye, n.d.)
- Electronic Document Delivery: Libraries implement ICT-based interlibrary lending system, with electronic networks for documents delivery. In essence, the Document Delivery Service (DDS) enables a library to use copies of research papers or other research document, from other libraries. These documents could be journal articles or other documents in digital format. They are mainly in portable document format (PDF) and they delivered to library users' desktops.
- Online Instruction/User Education: There is implementation of online based bibliographic or library user programmes such as online tutorials on searching online resources and virtual tours of library collections. Libraries can also use internet or CDROMs to educate users.
- Online Readers Advisory Services: Libraries now implement web-based versions of reader's advisory services to include informing users about new acquisitions, provide reviews and recommendations and so on in using the web.
- Networked Information Resources: Libraries now provide users with access to networked information such as database, electronic scholarly journals and other publications from various publishers.

The services rendered in a library differ from one library to another, depending on the type of library, the type of patrons and the parent body's objectives. Other library services as

### Highlighted by Idowu (2011) include:

- Reference Service
- Current Awareness Services (CAS)
- Selective Dissemination of Information (SDI)
- Reprographic Service
- Exhibition and Display
- Technical Services
- Serials Control
- Computerized Interactive Search
- Borrowing, Renewing and Reserving

Reprographic Technology: These are widely used in libraries globally. Reprographic machines are provided in libraries to ease photocopying of documents on demand.

**Library Retrieval System:** This involves the use of compact disc read only memory (CDROM), a technological mechanism for acquisition of specialized CD-ROM databases in various discipline such as law, sciences, medicine technology, agriculture, humanities and so on.

**Indexing and Abstracting Services:** It is a service that is carried out to provide summaries of documents and to assign descriptors for referencing documents. 5

**Institutional Repositories:** It is an online archive for collection, preservation and dissemination of digital copies of the intellectual output of academic or research of institution, this could be journal articles as well as digital versions of theses and dissertations. This service is mostly provided in academic or research libraries.

**Document Scanning Services:** Scanner is important equipment in modernization of library. It is useful for scanning text, image and content page of books and providing great help for establishing digital and virtual library.

## 2. Information and Communication Technology (ICT) for Libraries

In the past, volume of information was not as large it is today, and the libraries were in the position to organize the information materials through manual operation. But since the 2nd World War, there has been a tremendous output of information, which has been usually referred to as information explosion. The materials of information in both print and non-print media (i.e. manuscripts, books, journals, reports, films, discs, tapes) continue to be produced and used in greater and greater quantities. As Xerox Corporation put it in one of their promotional brochures in 1984, "recorded knowledge has doubled during the last twelve years. It will double again during the next ten." This vast amount of information has to be processed, stored and retrieved whenever required. The very complexity and magnitude of the problem makes it an impossible task to process by manual method. Library and information professionals are increasingly being compelled to take the help of semiautomatic and automatic machines for information handling. The revolutionary developments in information technology have two impacts. Firstly, as more and more information is readily available in machine-readable form, there has been a fundamental shift in the concerns of the information profession from "more information" to "accurate, up-to-date and timely information." Secondly, as computers are used increasingly for provision of information, librarians and other information professionals must familiarize themselves with the latest technological development in this field.

## 3. History of ICT Applications in Libraries

The American pioneers of library automation were outlasted more than other countries. In 1930s, Herman Hollerith of the US Census Bureau invented Punch Card technology with the help of Dr. Jolul Show Billings. In 1936, Ralph Parker installed Hollerith Punch Card system at the University of Texas for circulation control of the library and in the mid of 1940s the system was also experimented in the serial record control. In 1950, the Library of Congress introduced a book catalogue using Punch Cards. In 1960s, the first library automation was developed in U.S. In the 1970s, integrated chips and storages devices were also developed and RLIN and WLN was started the online library networks. In 1980s, the use of computers in libraries increased greatly. Many library automation packages came into the market and in the late 1980s; CD-ROMs that contained databases, information and software were also introduced. In 1990s, the development of computer networking was started. The overwhelming explosion of technology with the latest one penetrate the library automation system till date that started using high technology services and security system in the library to facilitate information protection, sources and services.

## 4. ICT Application in Libraries

Information Technology means a variety of technological applications in the process of communication of information. The term "information technology" has been used as collective term for the whole spectrum of technologies providing the ways and means as to acquire, store, transmit, retrieve and process information. According to the Webster's New Encyclopedia, information technology is the collective term for the various technologies involved in the processing and transmission of information. Thus information technology includes computer technology, communication technology, multimedia technology, optical technology, networking and barcode technology, etc.

a) **Computer Technology:** Computer can store every variety of information recorded by people, recall it whenever need arises and can calculate millions of times faster than the human brain. Thus, computer can do precisely all those jobs in the library for which we use many devices with a set detailed instructions.

b) **Communication Technology:** It is used in communicating the information from generator to the user of the information. Some communication tools like telephone, fax, television, e-mail, and Internet are very much popular for communicating with the person.

c) **Multimedia Technology:** Multimedia technology is most commonly applied to the simultaneous use of sound, text, image and video in preparing presentations and used in bigger libraries where the special kinds of students have to access and used for it.

d) **Optical Technology:** Compact discs are one of the most important and useful electronic media of storing the information. A CD-ROM can store a huge amount of records of library like Ramayana and Mahabharata.

e) **Networking Technology:** Merging of computer and communication technologies has emerged as a networking. In India NICNET, INDONET, PUNNET, CALIBNET, DELNET, INFLIBNET are some of the important networks.

f) **Barcode Technology:** Barcode technology can be defined as a self contained message with information encoded in a series of black bars of varying breadths and white spaces between every two of them. These are helpful in terms of circulation work and stack verification work of library documents.

## 6. Functions of Library affected by ICT Application

The following operations of the library functions can be speedily processed by the computer.

These are outlined briefly as:

**Acquisition:** Duplicate checking, Preparation of order lists, Sending orders to book supplier(s), Monitoring orders and follows up action, Verification with order file and invoices, Maintaining state of funds, budget control etc.

**Cataloguing:** Duplicating cataloguing cards, Preparation of authority file/subject headings list, sorting, checking, and filing of catalogue cards, Automatic generation of added entries, generating the monthly accession lists, developing centralized and cooperative cataloguing system.

**Circulation Control:** Registration of members, Charging and discharging of documents, Updating the records file, Preparation of reminders, Maintaining statistics, Information retrieval etc.

**Serial Control:** Ordering of serials, Receipt and updating the record file, Receipt to vendors/publishers, List of holdings, Maintaining statistics, Information retrieval etc.

**Documentation and Information Retrieval:** Indexing of micro and macro documents, Thesaurus construction, Abstracting work, Compilation of union catalogue/lists, Bibliographic work, Searching and print-outs of queries of users.

In addition to what has been outlined above, more library operations can be manipulated with the computer system to achieve efficiency, effectiveness, and to reduce per unit costs etc. ICT provides easy access to information resource and the facilities of technologies have been the driver of knowledge society.

## ICT based best practices in college library

1. **Library automation with library software:** Libraries utilize software's designed to manage different library routines and processes. Most of the software are integrated and have modules for the different activities or tasks carried out in the library like cataloging, statistics, acquisition processes and serial control etc. Many software packages for various applications in the field of library and information management services i.e. SOUL, LIBSYS, KOHA, LIBRARIAN, , Dspace, Greenstone and Library manager used for automation purposes.
2. **Library websites/web page:** A medium of communication for libraries to their users. In most of the library website is included all library details like catalogue, list of subscribe journal with access link, back volumes, curriculum, scanned exam papers, photographs-video of function and daily updated news related to users. A library Web page or a Universal Resource Locator (URL) makes it easy to access a single window for various Web-enabled library services.
3. **Online public access catalog (OPAC):** This is the computerized form of the library catalog or a database of library holding. It is an online database of documents held by a library or group of libraries. It provides access to the catalogues of a library on the local intranet, extranet or even the internet.
4. **Electronic document delivery services:** Libraries may not rely any more on postal services to send documents to users or carry out inter library lending. Libraries send documents through electronic networks that can deliver documents in various format e.g. PDF straight to user's desktops.
5. **CAS and SDI services:** A selection of current awareness services in the form of table of contents alerts, lists of newcomers to journals and books, press clippings, research compendiums, including the abstract and indexing (dissertation) service have library. Selective dissemination of information refers to the tools and resources used to inform a user of new resources on specific topics.
6. **E-mail:** E-mail means communication between the library and the users. Email is very useful for sending messages to and from remote areas with an enhanced network. In addition, it is also useful in various aspects of the library environment. Thus, it can be argued that e-mail can play an important role in information dissemination services.

7. Electronic resources: Electronic resources on magnetic and optical media have a significant impact on library collections. The currently available electronic resources are electronically accessible through traditional media such as CDROMs or via the Internet in the form of electronic journals, online databases, ebooks or OPACs, blogs, wikis, podcasts, etc. Today many journals and databases are available in electronic form - some are full text and others contain only bibliographic references information with summary. Some international societies and associations have developed their own digital libraries through which users can access all their publications. The services are available to members of society or associations by subscription. The some electronic journal and online database as,

### ICT Resources in Libraries for Sustainable Development

ICT as aggregate of computers, telecommunication gadgets, multi-dimensional resources and other related technologies are applied and utilized in the total process of information management and dissemination. The various components of ICT have provided a facelift for the support of varying professional services. Nwabueze and Ozioko, (2011); Umana (2018) identified the following primary ICT resources as imperative in actualizing Nigeria's sustainable development goal. Likewise, the same ICT resources are paramount to effective delivery of library services. The ICT resources include:

**1) Computers:** These are essential management tools which can be used to handle different operations more efficiently. Computers can be used for various activities such as information generation, processing, storage, analyzing and information dissemination for sustainable development. The use of computers in the library is noted with great assets such as speedy information transmission, cost effectiveness and optimal utilization of available resources. Other computer accessories include CDs, Flash drive and so on. The computers are used to perform various library operations and routine such as ordering/acquisition, circulation e.t.c.

**2) The Internet:** This ICT resources is a means to speedy flow of information. It is a network of computers, communicating with others, often via telephone line. The internet provides a worldwide platform for information sharing among individuals, institutions and organizations. The use of internet enables the provision of current and useful information to enhance productivity and good governance.

**3) Electronic Mail (E-mail):** This is the most widely used resource of the internet. It is used for sending and receiving of messages otherwise known as mails. The messages are communicated through electronic device. E-mail enables faster and cheaper organizational communication.

**4) World Wide Web (WWW):** This is also an internet- based resource. Websites help individuals, organizations or institutions find products or information and transacts business. Relevant information is made available to members of the public through the websites of many organizations or institutions. Being on the web, places any nation or organization on the right cause of speedy and sustainable development in line with emergence of changes in technology, economic and political area.

**5) Video Conferencing:** This enables people at different locations to hold conferences by data communication network. It is convenient and less expensive for conducting a conference between two or more participants situated at different remote location (Mishra and Mishra, 2014).

**6) Printing Technology:** A printer is a device that converts computer output into printed images. There are different kinds of printers used in library. They include Laser printer, Inkjet Dot-matrix printer and so on.

**7) Online Public Access Catalogue (OPAC):** It is the computer form of library catalogue to access information materials in the library. It is an online database of materials held by a library or group of libraries. It is a computerized library catalogue made available to the public. Most OPACs are accessible over the internet to users all over the world (Mishra and Mishra, 2014).

### Challenges of Using ICT for Provision of Library Services

There is awareness that a lot of benefits are derived, through the adoption and use of Information and Communication Technologies (ICTs) in libraries, nevertheless, there are many challenges to be addressed. These include:

- **Limited Financial Resources:** The acquisition and maintenance of the relevant equipment depends on the availability of fund. Mostly, there is paucity of funds in many libraries in Nigeria thereby, leading to inability to acquire, the necessary ICTs that would enable them connect to the internet, make subscription to various online database and obtain software licenses.<sup>9</sup>
- **Shortage of ICT Facilities and ICT Skills:** The computers are used to receive and store large volumes of information. Likewise, the internet accessibility is made possible through the use of computer, they are used to access Online Public Access Catalogue (OPAC) and also to perform many other routine activities in the library. Shortage of computers and other facilities remains a big challenge to many libraries. Many librarians also lack the ICT skills and this makes it difficult for them to embrace

technological innovations. Lack of ICT skills places a serious restriction on the application of ICT to provision of library services. Most African countries do not have workable ICT policies which are to act as guideline for implementation of development plans and strategies. When ICT policies are not available or adequately implemented, it can affect the sustainability of a nation's development.

- Lack of ICT Policies: There is lack of systematic ICT policy in developing countries and it impedes the deployment of ICTs (Afolabi and Abidoye, n.d).
- Poor maintenance of ICT Equipment: Many libraries do not have space and conducive environments for keeping ICT equipment. In addition, most of the ICT equipment are not adequately maintained in most libraries as a result of the maintenance cost which is usually very high. Also, as a result of lack of maintenance culture.
- Erratic Power Supply: In developing countries, large areas are still without a reliable supply of electricity (Said, Tukur and Adamu, 2014). Other challenges are;
- Insufficient bandwidth.
- Lack of technical IT knowledge by library staff.
- Constant change of software and hardware.
- Copyright and intellectual property right management.

### Conclusion:-

Information and communications technology (ICT) bring out extraordinary transformation and changes to libraries. It made libraries to go in a normal pace with no mistakes and reducing cumbersome manual work. ICT has reduced the library from its stature as custodian of our literary heritage to being a competitor among many others in the information society. Access has replaced ownership and the Internet has made remote access to databases possible 24 hours 7 days per week.

The delivery of the services to library user is very easy and fast and it can save the time of user and staff both with the help of ICT. ICT has totally altered the concept of library and information center as it was before. Libraries are adopting ICT for execution of both housekeeping operations as well as to provide services to the library clients. Application of ICT has benefit to the services and libraries are becoming very useful among the users. With the aid of ICT libraries are able to provide pinpointed comprehensive and quick information to those who are in need of particular information. Information and communication technology is applied for providing information services, which are more appropriate, well accessible and cost effective. However, it pose some challenges such as lack of finance, lack of policies, maintenance, etc. which can be overcome along the time.

## आजची युवा पिढी आणि मोबाईल— एक समाजशास्त्रीय अध्ययन

प्रा. डॉ. सुधा मु. खडके (कडू)

समाजशास्त्र विभाग प्रमुख  
लोकनायक बापूजी अणे महिला महा. यवतमाळ

### सारांश

गरज ही शोधाची जननी आहे. विज्ञानाच्या आधारे मोबाईलचा शोध लागला 'कर लो दुनिया मुठ्ठी में' असे म्हणत मोबाईलचे जाळे सर्वत्र विणले गेले. पुर्वी एकमेकांशी संपर्क साधण्यासाठी पत्राचा उपयोग केला जायचा पुढे यात प्रगती होऊन आणखी माध्यमे निर्माण करण्यात आले जसे व्हाट्सअप, फेसबुक, इन्स्टाग्राम इत्यादी आज मोबाईल शाप ठरला की वरदान हा प्रश्नच आहे.

### शोधनिबंधाचा उद्देश —

- 1) विकसित तंत्रज्ञानाच्या संकल्पनेचे विश्लेषण करणे.
- 2) मोबाईलसारख्या माध्यमाच्या प्रभावामुळे समाज परिवर्तन कशा प्रकारे झाले याचा मागोवा घेणे.

### गृहीतकृत्य —

- 1) मोबाईल म्हणजे जलदगतीने संवाद साधण्याचे प्रभावी साधन आहे.
- 2) मोबाईलच्या अतिरेकी वापरामुळे युवापिढीवर सकारात्मक व नकारात्मक परिणाम दिसून येत आहेकृ

मोबाईलचे सकारात्मक परिणाम आहे तसेच तोटेही आहे. परंतु तो मोबाईलचा दोष म्हणता येणार नाही. तर तो ते वापर करणाऱ्या माणसाचा दोष आहे म्हणून पूर्णपणे मोबाईल हा शाप आहे, असे म्हणता येणार नाही. मोबाईलमुळे एखाद्याचा जीव वाचू शकतो. तसेच मोबाईलमुळे जीव गमावणारेही आहेत. मोबाईलवर अभ्यास करणे ही विद्यार्थ्यांची गरज आहे विद्यार्थ्यांना प्रोजेक्टसाठी त्याचा वापर करता येतो. बरेचदा पालक मोबाईल वापरण्यासाठी मुलांना विरोध करतात. त्यामुळे या मोबाईलमुळे युवापिढी व पालक यांच्यात सतत वाद होतांना दिसतात. तात्पर्य हेच की मोबाईलचे सकारात्मक व नकारात्मक परिणाम युवा पिढीवर होत आहे. आजची युवा पिढी मोबाईलमुळे दिशाहीन झालेली आहे. मोबाईलच्या अतिवापरामुळे एकाकीपणा वाढला आहे. वैयक्तिक संवाद साधल्या जात नाही. मोबाईलचा गैरफायदा घेणारे मोबाईलवर चॅटींग करून मैत्री करतात. मोबाईलच्या अतिवापराची उदाहरणे बघता सर्वात जास्त आकर्षित झाली ती तरुण पिढी. मोबाईलमध्ये कॅमेरा, संगीत, अश्लील छायाचित्र बघण्याची सुविधा असल्यामुळे तरुण पिढी अनैतिक मार्गाकडे वळत आहे. मोबाईल सारख्या तांत्रिक साधनामुळे जागतीक जनमत तयार होते. काही वेळातच जगातील लोक एकमेकांशी जोडले जातात. सामाजिक मुल्ये मानवी विकासासाठी कल्याणकारी असतात. मुल्यांचे संरक्षण व संवर्धन ही युवापिढीपुढे आव्हान आहे. शैक्षणिक व संशोधन क्षेत्रात परिवर्तन घडवून आणण्यासाठी मोबाईलसारखी साधने महत्वाची भूमिका वठवीत आहे निष्कर्ष — १) मोबाईल संवाद साधण्याचे प्रभावी साधन आहे. २) मोबाईलच्या अतिवापरामुळे युवापिढीच्या केवळ विचारधारेवरच परिवर्तन झाले नाही तर त्यांच्या एकूणच जीवनशैलीमध्ये बदल घडून येत आहे.

### प्रस्तावना

गरज ही शोधाची जननी आहे. विज्ञानाच्या आधारे मोबाईलचा शोध लागला 'कर लो दुनिया मुठ्ठी में' असे म्हणत मोबाईलचे जाळे सर्वत्र विणले गेले. स्वामी विवेकानंदानी विज्ञानाचा सदैव पुरस्कार केला ते म्हणतात 'विज्ञानामुळेच जगाची प्रगती साधने शक्य आहे. ज्या विज्ञान तंत्रज्ञानाने जगाला अशक्यप्राय गोष्ट शक्य करण्याचे सामर्थ्य दिले. त्या तंत्रज्ञानाचे एक रूप म्हणजे तांत्रिक जनसंपर्क साधने होय. त्यातील एक अत्यंत महत्वाचे साधन म्हणजे मोबाईल होय.'

पुर्वी एकमेकांशी संपर्क साधण्यासाठी पत्राचा उपयोग केला जायचा पुढे यात प्रगती होऊन आणखी माध्यमे निर्माण करण्यात आले जसे व्हाट्सअप, फेसबुक, इन्स्टाग्राम इत्यादी आज मोबाईल शाप ठरला की वरदान हा प्रश्नच आहे. मोबाईलमुळे जगात फार मोठी क्रांती झाली त्यादृष्टीने विचार करता मोबाईल वरदानच ठरतो.

आज लहानपणापासूनच मुलांचे बाह्य सामाजिकरण जनसंपर्क साधनांच्या प्रभावाखाली होतांना दिसत आहे. त्यातील प्रमुख साधन म्हणजे मोबाईल होय.

इरवीन यांच्या मते सामाजिकरण म्हणजे "Whole process by which an individual born with behavioral potentialities of enormously wide range, is led to develop actual behavior which is confined within a much

narrower range - the range of what is it customary and acceptable for him accordingly to the standards of his group” वयाच्या पहिल्या वर्षापासूनच मोबाईल हाताळणारी आजची पिढी चुकीच्या बाह्य सामाजिकरणाला बळी पडत आहे.

### शोधनिबंधाचा उद्देश –

- १) विकसीत तंत्रज्ञानाच्या संकल्पनेचे विश्लेषण करणे.
- २) मोबाईल समाजपरिवर्तनाचे केंद्र बिंदु आहे विशद करणे.
- ३) मोबाईलसारख्या माध्यमाच्या प्रभावामुळे समाज परिवर्तन कशा प्रकारे झाले याचा मागोवा घेणे.
- ४) मोबाईल ग्रस्त युवा पिढीवर त्याचे सकारात्मक व नकारात्मक परिणामांचे विश्लेषण करणे.

### गृहीतकृत्य –

- १) मोबाईल म्हणजे जलदगतीने संवाद साधण्याचे प्रभावी साधन आहे.
- २) मोबाईलसारख्या विकसीत तंत्रज्ञानामुळे विविध क्षेत्रात क्रांतीकारक परिवर्तन घडवून आणले आहे.
- ३) मोबाईलच्या अतिरेकी वापरामुळे युवापिढीवर सकारात्मक व नकारात्मक परिणाम दिसून येत आहे. **अध्ययनाची पद्धती**

प्रस्तुत शोधनिबंधाच्या अध्ययनासाठी दुय्यम स्रोताचा वापर करण्यात आलेला आहे. यामध्ये पुस्तके, मासिके, वृत्तपत्रातील लेख, युवकांच्या व पालकांच्या विविध प्रतिक्रिया विविध अहवाल, दूरदर्शनवरील चर्चासत्रे, विविध कार्यशाळा व परिसंवाद यातील मते मतांतरे, सेमिनार मधील नोंदी, युवकांशी साधलेला संवाद, इंटरनेवरील माहिती यांचा उपयोग करून शोधनिबंध पूर्ण करण्यात आला.

प्रस्तुत शोधनिबंधातून मोबाईलच्या अतिवापरामुळे युवापिढी दिशाहीन झालेली आहे. याचा मागोवा घेण्याचा प्रयत्न केला आहे. मोबाईल सारख्या तांत्रिक साधनामुळे सामाजिक परिवर्तन कसे घडत आहे व त्याचे सकारात्मक व नकारात्मक परिणामांचा मागोवा घेणे हा या शोधनिबंधाचा मुख्य उद्देश आहे.

### मोबाईल जलदगतीने संवाद साधण्याचे माध्यम –

खरे पाहता मोबाईल हे कमी वेळात व कमी खर्चात दूरपर्यंत असलेल्या व्यक्तींशी संपर्क साधण्याचे प्रभावी साधन होय. मोबाईलमुळे आज प्रत्येक कामासाठी दुसऱ्यांवर अवलंबून राहावे लागत नाही. सण असो, वा समारंभ, आनंदाची गोष्ट असो वा शुभेच्छा असो, एखाद्याची खुशहाली विचारणे असो तात्पर्य नाती जपण्यासाठी मोबाईल महत्वाची भूमिका बजावते. मोबाईलच्या माध्यमातून आपोष्टांना गोड आठवणी पाठवून आनंद द्विगुणित करता येतो. आधुनिक काळातील गतीमान जीवनशैलीचा मोबाईल हा एक अविभाज्य भाग बनला आहे.

मोबाईलचे सकारात्मक परिणाम आहे तसेच तोटेही आहे. परंतु तो मोबाईलचा दोष म्हणता येणार नाही. तर तो ते वापर करणाऱ्या माणसाचा दोष आहे म्हणून पूर्णपणे मोबाईल हा शाप आहे, असे म्हणता येणार नाही.

मोबाईलचा जन्म झाला आणि जगात मोठी संपर्क क्रांती झाली. भारतामध्ये श्रीमंत, मालक, कामगार स्त्री तरूण पिढी, वृद्ध सर्वांच्याच कानाला मोबाईल दिसू लागला. मोबाईलच्या उपयोगाबरोबरच त्याचा दुरुपयोगही सुरू झाला त्यामुळे मोबाईल जीतका उपयुक्त ठरला तितकाच उपद्रवी ठरला. एकविसाव्या शतकात मोबाईल काळाची गरज बनली आहे. फोन करणे, मेसेज करणे, व्हीडीओ कॉल , इंटरनेट बँकींग ह्या सगळ्या गोष्टींसाठी मोबाईलचा वापर केल्या जात आहे. जर मोबाईलचा नीट वापर केला तर त्याची उपयोगिता फार मोलाची आहे. संकटकाळी मदत मागण्याचे प्रभावी साधन म्हणजे मोबाईल होय. मोबाईलमुळे दुरावलेली नाती जवळ येतात. पैशाची देवाणघेवाण करता येत आहे. मोबाईल आज प्रत्येक व्यक्तीची गरज बनली आहे. अन्य कोणत्याही साधनाचा मोबाईल इतका व्यापक प्रभाव मानवी जीवनावर झाला नाही.

### मोबाईलचे सकारात्मक व नकारात्मक परिणाम –

एका नाण्याला दोन बाजू असतात तसे मोबाईलचे आहे. मोबाईलमुळे बरीच कामे सुखकर व घरबसल्या होऊ लागली परदेशात मित्र परिवार अडचणीत असेल व त्याची माहिती देण्यासाठी मोबाईलसारखे दुसरे साधन नाही. मोबाईलमुळे लवकरात लवकर मदत मिळते. त्यामुळे मोबाईलचा चांगला व महत्वाच्या गोष्टीसाठी उपयोग केला जाऊ शकतो.. मोबाईलमुळे एखाद्याचा जीव वाचू शकतो. तसेच मोबाईलमुळे जीव गमावणारेही आहेत. मोबाईलच्या नादात आपण कुठे चाललो याचे भान तरूणांना नाही. मोबाईलवर अभ्यास करणे ही विद्यार्थ्यांची गरज आहे विद्यार्थ्यांना प्रोजेक्टसाठी त्याचा वापर करता येतो. बरेचदा पालक मोबाईल वापरण्यासाठी मुलांना विरोध करतात. काही पालकांना तर मोबाईलवर अभ्यास करणे ही संकल्पनाच माहिती नाही. त्यामुळे या मोबाईलमुळे युवापिढी व पालक यांच्यात सतत वाद होतांना दिसतात.

खरे तर मोबाईलचा अजिबात वापर नाही तर मोबाईलचा अतिवापर या दोन्ही गोष्टी चुकीच्याच आहेत.

मोबाईल म्हणजे माणसाचा अवयव नसून एक विकसीत तंत्रज्ञान आहे. त्यामुळे मानवांनी यंत्र बनू नये तर मोबाईलचा यंत्रासारखा वापर केला पाहिजे याचे भान आजच्या युवा पिढीने ठेवणे ही काळाची गरज आहे. तात्पर्य हेच की मोबाईलचे सकारात्मक व नकारात्मक परिणाम युवा पिढीवर होत आहे. आजची युवा पिढी मोबाईलमुळे दिशाहीन झालेली आहे.

- आज खेड्यामध्ये प्रत्येक तरुणाच्या हातात मोबाईल दिसतो काही विकृत तरुण अश्लील चित्र पाहणे, घाणेरडे एसएमएस पाठविणे, त्रास देणे अशा प्रकारे नुकसान पोहचविण्यात विकृत व्यक्तीमत्त्व असलेल्या व्यक्ती त्यांचा दुरुपयोगच करणार.
- वाईट गोष्टीला अंत नाही. परंतु यशस्वीतेसाठी चांगल्याचा वापर करावा अशा मानसिकतेचे लोक मोबाईल सारख्या साधनांचा फायदा करून घेतात. त्यामुळे अशा लोकांसाठी मोबाईल हे वरदानच ठरतात.
- जेव्हा एखाद्या गोष्टीशिवाय एखादी व्यक्ती राहूच शकत नाही तेव्हा त्याला व्यसनाधीनता म्हणता तसेच मोबाईल हे युवापिढीचे व्यसन बनले आहे. आपण काय करित आहो याचे भान देखील त्याला नसते.
- मनोरंजनासाठी, सिलेंडर बुक करण्यासाठी, बँकींगसाठी आपल्या कुटुंबियांशी सांद साधता येतो. त्यामुळे मुलांमध्ये एकाकीपणा येत नाही. मुलगा परदेशात जरी असला तरी व्हिडीओ कॉलमुळे आईवडीलांशी बोलता येते. त्यामुळे मुलांमध्ये व आईवडिलांमध्ये दुरावा येत नाही.
- लहानमुले मोबाईलवर खूप गेम खेळतात, त्यामुळे लहान वयातच चष्मा लागतो. सार्वजनिक ठिकाणी मुले मोबाईलवर बोलतात. वाहन चालवितांना मोबाईलवर बोलल्यामुळे अपघात होत आहे. मोबाईल न दिल्यामुळे लहान मुले आत्महत्या करित आहे. त्यामुळे मोबाईल हे मुलांचे व्यसन बनले आहे.
- मोबाईलच्या अतिवापरामुळे एकाकीपणा वाढला आहे. वैयक्तिक संवाद साधल्या जात नाही. मोबाईलचा गैरफायदा घेणारे मोबाईलवर चॅटींग करून मैत्री करतात. मोबाईलवर झालेल्या मैत्रीमध्ये बँकेतून पैसेही काढले जातात. युवापिढीवर तर मोबाईलने साम्राज्य पसरविले आहे, मोबाईलमुळे आपलं जगणच हैराण करून सोडले आहे.
- आई वडिलांनी मोबाईल दिला नाही म्हणून मुलांनी आत्महत्या केल्याचे अनेक उदाहरणे आपल्याला दिसून येतात. हरियाणामध्ये एका मुलीने मोबाईल दिला नाही म्हणून नस कापून घेतली व आत्महत्येचा प्रयत्न केला. अशा क्षुल्लक बाबींवरून आत्महत्येचा प्रयत्न जर आजची पिढी करित असेल तर मोबाईलचा किती वाईट प्रभाव मुलांवर झालेला दिसतो.
- मोबाईलमध्ये सेल्फी काढण्याच्या नादात तरुण मुलगी समुद्रात पडली. मोबाईलमध्ये सेल्फी काढण्याच्या नादात स्वतःचे नुकसान करून घेत आहे. गुन्हेगारी मार्गाला लागली आहे.
- मोबाईलच्या अतिवापराची उदाहरणे बघता सर्वात जास्त आकर्षित झाली ती तरुण पिढी. मोबाईलमध्ये कॅमेरा, संगीत, अश्लील छायाचित्र बघण्याची सुविधा असल्यामुळे तरुण पिढी अनैतिक मार्गाकडे वळत आहे. प्रेमाचे आमीष दाखवून लग्नाचे आमीष दाखवितात. मुलींची फसवणुक करतात.
- मोबाईलच्या अतिवापरामुळे 'स्लिपडिस ऑर्डर' या आजाराचे प्रमाण वाढत आहे तसेच पार्निग्राफच ऑडीक्शही वाढत आहे.
- मोबाईलमुळे वैवाहिक आयुष्यामध्ये समस्या निर्माण होत आहे. जोडीदाराबद्दलचे आकर्षण कमी होत आहे.
- युवा वर्ग दिवसातून कमीत कमी चार जास्तीत जास्त आठ तास मोबाईलवर असतात असे तज्ञांचे मत आहे. तज्ञांच्या मते हे प्रमाण २० मिनीटच असायला पाहिजे. आठ आठ तास जर एखादा तरुण मोबाईलवर राहत असेल तर तो विश्रांती, झोप, कुटुंबियांसोबत संवाद, गप्पा, अभ्यास, वाचन या गोष्टी तो कधी करतो. म्हणजेच तो चांगल्या गोष्टींपासून दूर जात आहे. तरुण पिढी दिवसेंदिवस मोबाईलच्या चक्रजाळ्यात अडकत चालली आहे. त्यातून बाहेर काढणे गरजेचे आहे. विकसीत तंत्रज्ञानाचा वापर युवापिढीने केलाच पाहिजे या मताशी सहमत आहे. परंतु माणूस हा तंत्रज्ञानासाठी नाही हे आजच्या तरुण पिढीने लक्षात घ्यायला पाहिजे.
- मोबाईलच्या कंपनी आकर्षक सुविधांचा सपाटा लावतात विविध प्रलोभने देवून तरुण पिढीला आकर्षित करतात. मोबाईलच्या कंपनीच्या चुकीच्या जाहिरातीमुळे तरुण पिढी खोटेच जाहिरातीला बळी पडत आहे. तरुण पिढी बरोबरच पालक सुद्धा त्यात अडकतात.
- आज मैदानी खेळाची जागा मोबाईलने घेतली आहे. त्यामुळे मुलांच्या शरीरावर व मनावर त्याचे वाईट परिणाम होत आहे. तासनतास मुल मोबाईल घेऊन बसतात मोबाईलचा थेट परिणाम मुलांच्या बुद्धीच्या विकासावर होऊन मुलांची वाढ खुंटत आहे.

तरुण वयातील मुले जर वाईट गोष्टींच्या आहारी गेली तर त्याचे काय परिणाम होतात हे आपण दैनंदिन जीवनात पाहतच आहोत. घरामध्ये पालकच जर सतत मोबाईलवर राहत असेल तर मुलाना बोलून तरी काय उपयोग. त्यामुळे मुलांमध्ये व पालकांमध्ये संवादच होत नाही तो होणे गरजेचा आहे. जिव्हाळा, आत्मीयता कमी होत आहे 'कर लो दुनिया मुझी में' अशी जाहीरात खरी ठरते की काय असे वाटायला लागले.

सामाजिक परिवर्तन व विविध क्षेत्रात मोबाईलची भूमिका— (विविध क्षेत्रात झालेले परिवर्तन)

१.मोबाईलमुळे यशस्वी चळवळीची वाटचाल होत आहे -

मोबाईल सारख्या तांत्रिक साधनामुळे जागतीक जनमत तयार होते. काही वेळातच जगातील लोक एकमेकांशी जोडले जातात. युवकांना सामाजिक प्रेरणा देण्याची भूमिका मोबाईलच्या माध्यमातून होत आहे. 'मै अन्ना हु' ही चळवळ गांधी टोप्या घालून हजारांच्या संख्येने या चळवळीत उतरले. यावरून यशस्वी चळवळीच्या वाटचालीत मोबाईलच्या माध्यमातून युवापिढी चांगली भूमिका बजावीत आहे

२.सामाजिक मूल्यांचा ऱ्हास -

सामाजिक मुल्ये मानवी विकासासाठी कल्याणकारी असतात. मुल्यांचे संरक्षण व संवर्धन ही युवापिढीपुढे आव्हान आहे. मोबाईलच्या क्रांतीमुळे सामाजिक मुल्यांचा ऱ्हास होत आहे. हिंसा, अन्याय, धर्मांधता, विरोधी जनमत याकडे युवापिढी अधिक वळत आहे. सामाजिक परिवर्तनाला चालना देण्याचे काम युवा पिढी करू शकते. परंतु ती पूर्णतः मोबाईलच्या विळख्यात अडकलेली दिसते.

३.शैक्षणिक क्षेत्रात झालेला बदल -

शैक्षणिक व संशोधन क्षेत्रात परिवर्तन घडवून आणण्यासाठी मोबाईलसारखी साधने महत्वाची भूमिका वळवीत आहे ऑनलाईन ज्ञान अर्जित करण्यात विद्यार्थ्यांचा कल वाढला आहे. भारतीय संशोधन तंत्रज्ञानामुळे देशाच्या बाहेर गेले आहे. मोठ्या प्रमाणात हे तंत्रज्ञान शिक्षण व संशोधनाच्या क्षेत्रात प्रसार घडवून मोठ्या प्रमाणात शैक्षणिक परिवर्तन घडवून आणत आहे.

४.राजकीय क्षेत्रात झालेला बदल—

राजकारण हे समाज परिवर्तनाचे प्रभावी साधन आहे. जो तंत्रज्ञानात जिंकेल तो परिवर्तनशील होईल. परंतु हे सोपे नाही. राजकारणी लोक चांगल्या व वाईट दोन्ही गोष्टींसाठी मोबाईलचा वापर करतात असे म्हणतात कि जो सामाजिक माध्यमांना जिंकेल तोच सत्ताधीश बनेल.

५.मोबाईल व मनोरंजन क्षेत्रात झालेला बदल -

मनोरंजन क्षेत्रात मोबाईलमुळे क्रांतीकारक परिवर्तन झाले आहे. त्याचा गैरवापरही होत आहे. मोबाईल सारखे तंत्रज्ञान विकसीत झाले तेव्हा भारतीय लोक त्याचा कसा वापर करतील अशी शंका होती. परंतु साक्षर, निरक्षर तरूण, वृद्ध, महिला, बालके या सर्वांमध्ये मोबाईलचा वापर सहज—सुलभ झाला आहे.

निष्कर्ष -

१. आधुनिक काळातील गतीमान जीवन शैलीचा मोबाईल एक अविभाज्य भाग बनला आहे.
२. समाजातील युवापिढीच्या व्यक्तीमत्त्व विकासात मोबाईल महत्वाची भूमिका बजावीत आहे.
३. मोबाईल संवाद साधण्याचे प्रभावी साधन आहे.
४. सामाजिक माध्यमांमध्ये मोबाईल हे आधारित ज्ञानपिठ आहे.
५. मोबाईलच्या अतिवापरामुळे कुटुंबातील सुसंवाद कमी होत आहे. तसेच युवापिढीमध्ये एकाकीपणा वाढत आहे.
६. मोबाईलमुळे अश्लील एसएमएस करणाऱ्या तरूणांची संख्या दिवसेंदिवस वाढत आहे. गुन्हेगारी प्रवृत्तीकडे युवापिढी वळत आहे. एकप्रकारे मोबाईल हे युवापिढीचे व्यसन बनले आहे.
७. इंटरनेटच्या माध्यमातून युवा—पिढी आपला जोडीदार निवडत आहे.
८. मोबाईलच्या अतिवापरामुळे युवापिढीच्या केवळ विचारधारेवरच परिवर्तन झाले नाही तर त्यांच्या एकूणच जीवनशैलीमध्ये बदल घडून येत आहे.
९. मोबाईलमुळे दुरावलेली नाती जवळ येत आहे.
१०. मोबाईलला सतत चिटकून असणारी युवापिढी स्वतःची प्रगती कशी साधेल हीच खरी चिंता आहे.

समारोप

तरूण पिढी ही आजच्या भारताचे भविष्य आहे. समाजाचे आशास्थान आहे. परंतु आजची तरूण पिढी मोबाईल नावाच्या व्यसनाच्या आहारी गेली आहे. त्यामुळे त्यांचे जीवन उध्वस्त होत आहे. पालकांनी सुद्धा मोबाईलचा अति आहारी गेलेल्या मुलांना त्यातून बाहेर काढावे. महागडा मोबाईल घेऊन दिला म्हणजे कर्तव्य संपत नाही. मुलांसाठी वेळ काढून त्यांच्याशी संवाद साधला पाहिजे. त्यामुळे मोबाईलचे आकर्षण कमी होईल व तरूण पिढी बिघडणार नाही ती योग्य मार्गाकडे वळेल. त्यांच्या जबाबदारीची जाणीव करून द्यावी. उद्याचे भविष्य काय आहे याचीही जाणीव त्यांना करून द्यावी. मोबाईलचा

यंत्र म्हणून वापर करावा आपण यंत्र बनू नये. याची युवापिढीने जाणीव ठेवणे काळाची गरज आहे.

## Skill Gap Bridging: A Way Towards Development Of Employability

**Prof Y. R. Vaidya**

Assistant Professor  
Department of Management Studies,  
PRMIT&R, Badnera-Amravati

**Dr. S. S. Kawitkar**

Associate Professor  
Department of Management Studies,  
Vidya Bharti Mahavidyalaya, Amravati

### Abstract

*Unemployment is one of the major areas of concern for our economy. Employability is a man or woman's ability to gain and maintain the work they have achieved because of their ability. It is the person's ability to move within the labour force of the economy and to realize the capacity inherent to them. The study's key objective is to define methods and solutions to bridge the gap in higher education employability skills. Appropriate employability skills play an important role in a successful career as well as during social interactions in the society. These skills are also highly sought after by employers recruiting fresh graduates.*

*Employability skill gap is the main problem facing both employees and employers in today's fast-moving world. Reducing the gap in skills can lead to professional enhancement, increase efficiency, increase promotional chances and increase retention of employees.*

**Keywords:** Education System, Employability, Soft Skills, Skill Mismatch, Industry

### Introduction

The present business environment focuses on developing strategic skills and working experience by emphasizing higher training for employability. Training is the greatest need for workers and college graduates to learn as training would improve their employability skills. Participation in the training process and getting input from stakeholders is useful for the development of future skills. Analyses of current skill efficiency, needs and updates skill development strategies, the challenges facing skill development and the same solution.

Employability skills are the skills that an individual needs to pass in order to make him or her employable.' Besides a good technical understanding and subject knowledge, managers also ask for a set of skills from a worker that they want. These skills or skills set as they are called are like Team Player, Problem Solving, Self-Management, Business Knowledge, Position-related literacy and numeracy, ICT knowledge, Good Interpersonal and Communication Skills, While the ability to use one's own initiative is required, individual needs to follow instructions and Leadership Skills when necessary.

The National Skill Development Corporation (NSDC) has observed that every year, a huge number of college graduates enter the workforce, India has the potential to provide workforce to the world by 2020. Yet we are struggling today in metropolitan cities like Chennai, Delhi and Bengaluru with terribly low employability levels. Lack of language skills, outdated academic syllabus, insufficient practical sessions and a total absence of career counselling facilities are the advanced reasons for such low employability rate.

### Research Methodology

The paper has review the strategies to close the employability skill gap in higher education and highlighted the benefits of closing the gap in Indian economy. The paper is based on the conceptual study and the data has been gathered from the secondary sources of information like different published papers, internet sources.

### Objectives of the Study

1. To throw light on the employability skills required for industries.
2. To explore how soft skills & Employability Skill can be integrated with curriculum thereby grooming the professional students for employment.
3. To discuss the initiatives taken by the State Government towards Skill Building of students.

### Literature Review:

In his research entitled "Employability skills in Chennai retail market, India," Rajkumar Paulrajan (2011) aimed at understanding the skill quality set for employment studied method of improving employability skills, evaluating the human resource needs of the integrated retail industry and assessing the skill set. Statistical methods used were Knowledge Matrix and Analytic Hierarchy System. The basic skill set was established to achieve and maintain jobs in the integrated retail fruit and vegetable industry. The study concluded that for entry-level jobs, a combination of academic qualifications, essential vocational skills and personal skills and

sales skills were considered to be required. Employers in the retail industry are looking for people with different skills such as academic qualifications, communication skills, leadership skills, teamwork skills and work experience.

According to Sanjeev Duggal, most institutions are not preparing candidates for the new world of work, making them struggle in the face of professional skills. There is a need to provide students with interpersonal communication, basic knowledge of software, the ability to speak English and work as a team.

Study says, "Since a degree is deemed a road to a career in the knowledge economy, there is a need for sustained school / college action to develop students ' basic skills." The Indian Chambers and Industry Federation conducted a survey in 2010 and provided tarnishing information on the Indian higher education system, many students report being unemployed because they lack adequate "Soft Skills" to be jobs in the industry. Nearly all findings from the report and survey show that it is mainly two facts

1. Outdated Curriculum with Old-fashioned pedagogy
2. Lack of Soft Skill in Students

Employability skills allow you to connect with co-workers, solve problems, consider your position in a group, make the right choices, and be accountable for your own future. The way you interact with others influences personal qualities, habits, and attitudes. Employers place great value on these skills because they are linked to how you manage your relationship with employees and customers, your job performance, and success in your career.

### **Different Employability Skills Needed in the Industries:**

**Communication skills** The University has established important skills such as listening, communicating and speaking clearly, writing properly to different audiences, persuading and efficiently bargaining, showing sensitivity, assertiveness and patience, knowing customer / customer needs, establishing relationships and networking, sharing information and feedback, fluency in English

**Team Working in a team** skills team is a term used by all; but it is important to work effectively in teams following skill sets. Skills such as, Working effectively with people of different ages, gender, race, religion or political persuasion, Identifying team members ' strengths, Recognizing strengths & limitations, Clarifying team roles & performing agreed tasks, Proving leadership as appropriate, Coaching, mentoring & motivating others, Giving & receiving constructive feedback, Resolving differences of opinion.

**Problem solving skills** refers to our ability to solve problems in an effective and timely manner without any impediments. It involves being able to identify and define the problem, generating alternative solutions, evaluating and selecting the best alternative, and implementing the selected solution.

**Initiative and enterprise** involves being able to see innovative ways of doing things, seizing opportunities, and taking initiative. It may involve a newer way of looking at a situation or the addition of a new idea to improve or streamline an existing process.

**Planning and organizing** involves the ability to identify what is required in a given situation and to manage people and resources effectively to achieve results. It also involves being able to manage time efficiently and priorities what tasks need to be done to achieve an overall goal.

**Self-management skill** refers to the ability to take responsibility for your own actions and life direction, and to set goals and successfully achieve them. It involves setting achievable goals and using your time and resources effectively to achieve them.

**Using technology** involves being able to keep abreast of current technology and apply it to problems, as well as the ability to embrace life-long learning in the field of technology.

### **Revamping Colleges Curriculum**

Need of Hour Narendra Jadhav, Planning Commission member and former Vice Chancellor of Pune University once said, "The quality of teaching at our campuses is obsolete. They don't follow the latest market demands. "Another noteworthy statement was made about this topic by CNR Rao, Bharat Ratna Awardee, and scientist" 90 percent of colleges and higher education institutions in India have obsolete curricula. We're talking about increasing support, growing technology, but there's no change in the curriculum we're teaching in our hi-tech classrooms.

Talent hunt has always been limited in our world, we teach our students what Newton and Faraday did, but there is no system in the country to quest for similar talent. Each and every word of the above statement is overwhelmingly inclined to revamp the current curriculum taught in our universities and colleges. The paradigm shift in higher education needs institutional changes.

1. Industry-linked curriculum should be initiated in colleges and universities.
2. Practical-based classes should be given priority in syllabus
3. Industrial visits and educational visits should be compulsory in higher educational institutions.
4. Students should be taught the importance of professional ethics and human values.
5. Workshops seminars, conference on relevant subject and topic should be organized in campus for the better understanding of the topic.
6. Exam-oriented classes should be dismissed.

### Government Initiatives for Bridging Employability Skill Gap in India:

Showing activism for bridging employability gap in students, Indian government has taken initiatives and established many organization, institution and agencies for this purpose.

1. National Vocational Education Qualification Framework – It is an initiative by Human Resource Development Ministry, India. It aims at developing a pool of skilled professionals by enriching their curriculum with vocational training. This framework will provide an opportunity to start doing job just after completing intermediate. This framework will link schools, vocational institutes and colleges with one system and will provide placement assistance. Courses and programs in agriculture, BPO, construction, infrastructure, finance, banking and tourism will be offered. The program is expected to cater to at least five million students for vocational degree and diploma every year.
2. National Skill Development Corporation – National Skill Development Corporation was set with public-private partnership with the purpose of catalyzing the skills landscape in India. Main objectives are to upgrade skills to international standards through significant industry involvement and develop necessary frameworks for standards, curriculum and quality assurance, to enhance support and coordinate private sector initiatives for skill development and to play a role of market maker.
3. National Skill Development Corporation – NSDC is working with 21 universities, UGC, AICTE catering to more than 1200 colleges and 400 community colleges. In order to bridge the industry academia gap NSDC has developed a unique model to integrate skill based trainings into the academia cycle of the university.
4. National Skill Development Fund – The national skill development fund was set up in 2009 by government of India for raising funds both from government and non-government sector for skill development.
5. Skill Development Bureau – The vision of bureau has been mentioned on its website “: The education is fundamental to all round human development. Skills and knowledge are the driving forces of economic growth and social development for any country. Countries with higher and better levels of skills adjust more effectively to challenges and opportunities of world of work”. This bureau arranges investment for harnessing the country’s demographic dividend. These types of government initiatives are really boosting skills in India Innovative Pedagogical Tools May Connect Jobs Education There are many pedagogical tools that can tie education to jobs.

Scaffolding Teaching Strategy–This strategy aims to give the students in the classroom extra freedom to get interested in teaching with the teachers and generate their own thoughts on any subject matter. This method of teaching is very popular in all universities in Australia.

Practice-based Pedagogy–This method of teaching requires students to place themselves in the same situation, evaluate the circumstances, and finally give their opinion.

Pedagogy-based business simulator games–This pedagogy aims to make business students informed of business-related issues such as labour strike, product launch, and so on by digital company.

In addition to all these above-mentioned teaching methods, we also have many other strategies such as multimedia-based teaching approaches, Manufacturing experiences with learners, real-life case studies, and so on which our students can easily understand and apply management principles in their workplace.

### Findings & Conclusions

A famous quote about college education says “A college degree is key to realizing the dream, well worth the financial sacrifice because it is supposed to open the door to a world of opportunity” The quotation has a very profound meaning as we all know that when a student joins college parents as well as community feels that after graduation the student will be able to earn money and support the financial expanses of the home, that is why parents do not hesitate to spend tremendous money in their children's education as they know that college fees are a kind of investment and a healthy one. But if students are unable to get a job after investing in higher studies, it seems like a waste of time and money.

There is a ray of optimism in the refurbishment and redesign of the university program and the construction of a completely developed soft competence workshop on college campus. Also where we are not yet able to shine, we will be able to rank among top colleges. Holistic growth approach will work here, and as we all know that "health" is a concurrent subject, so that not only the central government but also the state authorities must come forward to reconstruct India's higher education system.

There is still a golden glimpse of ancient colleges in our minds as students from different countries used to come and study at Indian universities like Takshashila and Nalanda, these universities used to fulfil the academic need and intent of that period. We need to build the same type of curriculum that would fulfil the educational goal.

## Innovations And Curriculum Development In Home Economiseducation

Prof. Dr. Seema B. Adhau  
Indira bai Meghe Mahila Mahavidyalay  
Amravati

### Abstract

The paper focused on the innovations and challenged for developing home economics curriculum in colleges . it highlighted the philosophy and objectives of Home Economics as stated in National Commission for college of Education (NCCE) Minimum standard. Challenges which inhibit the full implementation of Home Economics were discussed. This includes problem of personnel, vocationalism and competences inadequate funding. Lack of equip laboratories. Poor attitude and preparation of teachers insufficient time for practical and team teaching. For effective implementation, the paper recommended research grants, use of ICT (information and communication Technology) workshops. Field trips and good laboratories. Some recommendations were made.

Home economics teaching today is no field for the meek. Courage and imagination are needed in development the programs to meet the challenges of the present and foreseeable future in interpreting programmes and need, and in demanding the funds and facilities needed to carry out these programs . There are so many challenges in curriculum development in home economics at all levels: elementary, secondary, post secondary, adult and professional. These changes are becoming difficult to solve because of the rapidity of societal change and the development of knowledge of the content of home economics in the areas of teaching and learning. The concept of continued learning as a way a way of life provides challenges to education at all levels and in all fields.

Curriculum as defined by Olaitan and Agusibo (1981) is all learning experiences which are planned and guided the school whether they are carried on by groups or individually inside the schools. In other words it means a wide range of theoretical and practical courses provided in an institution. Some of which may be extracurricular activities.

Curriculum is also defined as by tanner and tanner (1991) is the planned and guided learning experiences and intended learning outcomes, formulated through the systematic reconstruction of knowledge and experience under the auspices of the school, for the learners continuous and willful growth in personal and social competence.

Innovation is change that creates new dimension of performance Minton (2000), uses the term “innovative” to refer to “ideas or practices that are within the context of the school. Another definition of innovation involves newly introduced method, customs device. Change in the way of doing things, renew alter. (Webster’s new, world dictionary 2001) doing things differently in different ways (Ducklin 2002).

### The philosophy and objectives of home economics education

As stated in the national commission for colleges of education (NCCE) minimum standard (2004), the philosophy of home economics borders on the improvement of the quality of life for the individuals and family specifically and the society at large. It focuses on the acquisition of knowledge, skills and competences which family members require to satisfactorily improve family living.

### The objectives of the programme are.

- \* Trained home economics teachers with a sound basis for professional growth and personal
- \* Development via home economics education.
- \* Exhibit through knowledge of jobs skills and career opportunities in home economics.
- \* Demonstrate positive human relationship and ability to work people.
- \* Prepare teacher to qualify them for a full time two (2) years post NCE degree programme in Home

### Economics in Nigeria Universities.

There are certain challenges in the development of home economics curriculum. These challenges are inhibiting the implementation of home economics curriculum. Useful innovation need to be introduced in the curriculum of home economics education at N.C.E. level.

### Challenges of curriculum development in home economics education at NCE level

The problem of personnel. Since the inception of the National policy on education (2004) it has never been easy to recruit vocational teachers for the system. Although, efforts were made by the federal government

to train vocational technical teachers by establishing more colleges of education (technical) and instituting scholarships. There are few vocational teachers available to implement the vocalization programme of National policy on education (Nwaokolo,2004)

Self vocationism and Employment Competences. The curriculum is too theoretical and not practical oriented. There are too many courses listed in the minimum standard. As a result, the courses are over-crowded and students end up not specializing in any area of home economics education.

Inadequate funding - insufficient funds are provided in some school for purchasing materials for practical lessons. This makes it difficult for teachers to demonstrate concepts. Lack of adequate practical demonstration tends to make the concepts abstract. Extra financial burden on the students for the purpose of practical makes them develop negative attitude towards the subject (uzozie,1990)

The problem of well equipped laboratories. Some colleges lack well equipped Home Economics laboratories. Positive achievement achievement in Home Economics is linked to activity based or practical using appropriate laboratory equipment and technology. In the few colleges that have equipment, they are not adequate for the large population of students.

Utilization of teaching methods that will around and sustain students interest in home economics. When a learner's interest has been substantially around and sustained in a teaching learning – learning process he/she is likely to develop a positive attitude towards the subject. Development of positive attitude is fundamental because achievement is a function of attitude.

Poor attitude and preparation of teachers. Poor attitude lead to ineffective implementation of home economics curriculum. Some teachers are not prepared to meet the challenges of modern day home economics. Such teachers fail to make research improve their skills and are generally careless. Uzozie, (1990) noted that most teachers are not yet trained for proper implementation of the home economics programme.

Insufficient time for practical. In some cases the time allotted for practical is insufficient, ranging from two or three hours per period. This is mainly caused by overloading the students' time table with many other courses. There is need to devise other strategies to cover lost ground.

Luck of team teaching. Team teaching is simply based on the recognition teachers differ in their areas of specialization, content, mastery, preference and degree of competency (Hall and Paulucci, 1973 and Janda, 2001). Goetz and Egallery (2000) further explained that this form of teaching reinforced students understanding of new concepts as the group is exposed to two human resources and two different opportunities to understand new ideas.

### Strategies for implementation of Home Economics Curriculum

Home Economics education at N.C.E. level needs innovation and restructuring. This reform is required to improve the performance of home economics education in the country. Obiakor (2006) listed some innovations in Home Economics to include.

**Research-** research is one of the strategies to improve the image of home economics. Home economics is known for her improvisation. Research is the basis for socio-economic, political and scientific and technological advancement of the country.

**The use of information and communication technology. (ICT)-** ICT is a powerful tool that the home economist could use for mobilization, information exchange and empowerment. Teaching and learning would be made easier through the use of ICT.

**Workshops:** should be organized for students and teachers. Workshops should be organized for students and teachers of Home Economics. This will provide a platform for interaction, exchange of ideas, learning new things and keeping in touch with current issues. Workshops should be geared towards skill acquisition rather than fees charged and certificate got.

**Provision of good laboratories** Home Economics laboratories should be available in all school offering the course. The laboratories should be well equipped with the necessary facilities and materials just like other science laboratories. Electricity and water should be in constant supply to avoid frustrations. Equipment and materials should be improvised by teachers and students where the ideal is not available. If in place, the teachers should have the required skilled to bring it to fruitening.

**SIWES (Students Industrial work Experience Scheme)** According to Agwasim and Agwasim (1985), SIWES is a medium by which students are exposed to the realities of the world of work in their chosen vocations. It exposes students to relevant industry based skills needed for smooth transition to the world of work. This scheme should be made effective through proper supervision.

**Provision of relevant literature** Home Economics textbooks are scarce. Most of the textbooks available for specific aspects of Home Economics are foreign. Teachers should rise up to this challenge and write Home Economics textbook having familiar examples.

**Field trips** – it can be effective in curriculum implantation. It involves trips to various places in the community to obtain information directly by seeing things as they are. It provides an on the spot observation of some specific process or activity.

### Conclusion

Home economics is a dynamic and evolving profession whose major concern is the welfare and sustainable development of the individual, the family and the society. The curriculum should be planned to meet the rapid changes and the needs of society.

## Role Of Library In Teaching And Learning

Dr .Anita P . Patil

College of social work Anjangaon Bari Road, Badnera Amravati.

### Abstract

*The theme of present paper is focus on role of library in teaching and learning. libraries are playing an important role in acquiring and dissemination of knowledge. In this paper to highlight on different of library teaching and learning.*

*Key words:- Library, Role of library, Teaching and learning.*

### Introduction

Library is a collection of source of information which makes accessible to a defined community for reference or borrowing. It contains books, periodicals, newspaper, manuscript, films, maps, prints, documents, microforms, CDs cassettes, video tap news, DVDs, e-books, data basics and others.

Library is a powerful institution which gives formal education. The library is as important as educational institution in education system. Library should be developed enough to provide information, facts and stats need by student, teachers, and research. Moreover, in today's information age as more and more data and information is created and disseminated on daily basis, the libraries should be update regularly.

To make teaching and learning effective, the library needs to be well equipped. Libraries are known as storehouse of knowledge and information

### Definition:-

**Library:-**A library is an organized collection of information resources made accessible to a defined community for reference or borrowing. It provide physical or digital access to material, and may, be a physical or room or a virtual space, or both(Allen,1984).

**What is library:-**According to Dr S.R. Ranganathan libraries are not store house but rich springs from which knowledge flows flow out to irrigate the wide fields of education and culture. This take of collection organization and dissemination of information / knowledge and the task of converting every person in its neighborhood into a habitual library goer lies on the shoulders of library staff.

Libraries are important when the whole idea of education is getting more importance in the learning society.

“A library is not a luxury but one of the necessities of life.”

Education given by the teachers in the class-room is not least. Direct knowledge in the class-room is the function of the teachers. Where as to impart knowledge in directly or through books in the library is teaching function of librarian. So students can acquire knowledge through library. In higher education role of teachers is to guide. To acquire knowledge by using library is a true education.

Educational system is classified in three divisions namely schools. Colleges and universities so library attached to these systems are 1) school libraries. 2) college libraries 3) university libraries. University and college libraries are the soul in the body of the educational system and play very important role in teaching learning process .

### Libraries serve in three ways of learning and teaching

It serves a practical role in sharing expensive resources, physical resources such as book, graphics, periodical and database etc. These contents of libraries help in both ways i.e. teaching and learning.

The second role of the library is in preserving and organizing arte facts and ideas which make things accessible for future learners.

Thirdly, libraries play a vital role in the social an intellectual manner y bringing together people and ideas.

This practical role of haring resource in between teachers and learners in the class room motivates them to come forward in knowledge sharing and transforming.

In current scenario , the role of the libraries have been expanded and it is providing services to faculty and students involved in distance education. The expansion of education can be observed very easily as the distance education has become very much popular across the country. The quality of education is stretching at the very interior part of nation successfully resulting in the increase of literacy percentage of nation which is enhancing gradually and speedily. The mode of education which libraries are adopting is remarkable. Proper

successful distance education courses are really remarkable. As a result, an economically weaker section of the community is also getting the quality education by this great role of libraries.’

A library is the heart of the school, college and universities academic activities. The quality, growth, manners, etiquettes, human values, culture are greatly influenced by libraries. The teaching and learning process will certainly be lacking luster without a good library. It is indispensable for students centered teaching and learning process.

An idea library of any school provide stimulation and inspiration to both teaches and students which develops an interest in the subject and wider the horizon of students, the library I not the centre poof academic learning. It also provides us the best company when we are idle, free lonely and bored. Today when there is a tremendous explosion in knowledge at the very fast pace, the library provides requisite supplementary material and extra reading to the students to understand the subject and get the required information.

A ideal library plays a very crucial instrument al role in developing teachers and students, enhancing teacher’s effective needs in classroom in adopting the enormous mode of teaching which increase the classroom performance relatively.

A great library promotes individual and group learning .It also help in developing students vocabulary . enhance comprehensions, developing the habits of silent reading and problem-solving attitude of the students. Last but not the least in present time the role of the library has increased and widened in so many ways, it function as a kingpin of the educational arena where the wheel of education, individual growth, national progress and prosperity move around it. The social educational and economic growth of an individual and nation always influences deeply by the nurturing libraries. Managing and sustaining the ideal library in every school and public domain have a great impact in the growth of human resource development and their upliftment for their right future.

Reading the key to success should be fun and not a chore. As such, the library acts as a catalyst in teaching and learning process and the role is as important as an architect remains in your ability to design a space that is socially, intellectually and emotionally conducive to sense making for the public.

It serves a practical role in sharing expensive resources, physical resources such as book, graphics, periodical and databases etc. These contents of libraries help in both ways i.e. teaching and learning.

### **The importance of library**

Library is the most important component of higher education prof. Kothari described the ideal academic function of college library as “ The library should provide library facilities and services necessary o success of all formal problem programmers’ of instruction. Open the door to the world wide of books students and scholars together under conditions which encourage reading pleasure, self discovery personal growth and the sharpening of intellectual curiosity. The staff should be able to convert the library in to an intellectual workshop and should along with teacher be in a position to teach with books. “

Dr. Radhakrishna commission said about the importance of university library that “the library is the heart of the university work directly so, as regards its research work and indirectly or regards the educational work, which derives its life from research scientific.

Libraries are knowledge hub .Libraries are the most important part of educational system at school, college and university level. Availability of books, reference books, journals, magazines, e-books, e-journals in the library improve the knowledge level of teacher s and students of the academic institution. Availability of reading rooms, pleasant environment, fast and quality library services motivates the users to use the library to gain the required knowledge and up grade themselves.

Libraries are said to be the gate way to the knowledge and information society get benefited by the use of libraries by means of learning. Research etc. library create opportunities to upgrade oneself and build their carrier in various fields. Libraries are also known as local centre of information and learning. Academic libraries and public libraries are the source of information and ideas for all sectors of the society. Thoughts ,information and knowledge is disseminated through the libraries creating the opportunities for research , development and employment generation.

**Role of librarian in teaching:-** ( Be teacher of teachers) Librarian should be a good teacher. To orient the users with the library service, library professionals should have good teaching skill. This will be helpful to inculcate good reading habits amongst the users.

Librarians and information professionals have a key role to play in this era of information explosion. They are not only helping users find the required information, but also provide them with the tools to assess and use the resources for their individual needs. Several new skills and competencies are essential for the librarians working in the digital environment to create and manage library collection and services. They are required to keep updated with the latest tools and techniques in order to meet the rising demands of users.

**Library as Educator :-** Libraries should play important roles in educating patrons about the new technologies and the social networking skill. We can educate our users on new skills and competencies needed to flourish in the new environment. Users need to know how to navigate the web as new method of learning requires a form of connectivity with other people as knowledge is no longer acquired in a linear manner. Librarians can and should educate patrons on the use of these social networking tools to adapt to new ways of accessing , communicating and sharing knowledge. Brilliant use of the social cyberspace promotes opens access to knowledge.

Education and library are the twin sisters and one cannot survive without the other. The school library inculcates reading habits in school children while college and university library are supposed to be institutions of higher learning. A university is a community where scholars and teachers are head, students are the body and library is the heart. Library is the place where one finds out and where one learns how to find out. Library is a vital organ of the university which can play an important role in the fulfillment of its objectives.

**Teaching and Guidance :-** Librarians help to students, faculty in learning process by guiding and instructing them in the effective use of library resources and providing information or document required to supplement class-room teaching through reference and information services. A reference librarian, who find answerer to reference , a research questions from documents, makes teaching more effective. Thus user orientation, reference and information service, bibliographical service etc. can rightly be called teaching functions which are performed by the librarian. It is necessary to communicate with the users.

### Conclusion

Education teaching and learning is the continuous process for the development of society, and it is being done stored, preserved, disseminated by the libraries for further references. So we can say that libraries are most important part of educational, social, culture, economically, environmental development of the world.

Finally it can be concluded that role of library in teaching and learning play very important. The challenges in higher education are enormous in 21 st century. The traditional methods of teaching and learning are giving way to new order which is highly dynamic and likely to remain so in immediate future e-learning is a modern concept and information provider tool.

## ग्रामीण भागातील शिक्षण व संवाद विषयक समस्या

डॉ.र.तु.आदे

सहयोगी प्राध्यापक, इंदिरा महाविद्यालय, कळंब  
जि.यवतमाळ.

### सारांश :

शिक्षणामुळेच मानवाचा सर्वांगीण होऊ शकतो. शिक्षणाची कास मानवाने धरल्यामुळेच त्याचा कायापालट झाला आहे. त्याच्यातील मागासलेपणा जाऊन तो सुजाण व प्रगतीशील होण्यासाठी शिक्षणानेच कांती घडवली आहे. शिक्षणामुळेच जमिनीवरील मानवाने आपल्या बुद्धीसामर्थ्याने आकाशात झेप घेतली. आज संपूर्ण विश्वाला एका लहानशा खेड्याचे रूप प्राप्त झाले त्याला मानवाने केलेली भौतिक प्रगतीच कारणीभूत ठरली आहे. मात्र, विश्वाला कवेत घेणा-या मानवाला शेजा-याशी संवाद साधता आला नाही. नात्याची उसवलेली वीण सांधता आली नाही. शिक्षणाने माणूस सुसंस्कृत होतो, असे मानले जाते. ग्रामीण-शहरी अशी प्रतवारी केलेल्या समाजामध्ये परस्पर साहचर्य राहिले नाही. दूर्गम भागात, घनदाट अरण्यात, द-याखो-यात, डोंगरकपारीत, आदिवासी बहुल भागात आपले अत्यंत कष्टप्रद जीवन जगणा-या व्यक्तींसाठी मुख्य प्रवाह पतीतच राहिले. त्यांच्या समस्या, त्यांचे जगणे, त्यांचे जीवन हा सुधारलेल्या समाजाच्या औत्सुक्याचा वा सहानुभूतीचा विषय कधी झालाच नाही. त्या प्रवाहपतितांना मुख्य प्रवाहात सामावून घेण्याची फार मोठी जबाबदारी सुशिक्षित समाजाला घ्यावी लागेल व त्यांच्यातील खंडित झालेला संवाद पुनरावृत्त करण्याचा कसबीपणा समाजाला दाखवावा लागेल. तरच शिक्षणाचे सामर्थ्य आपल्याला अधोरेखीत करता येईल.

**बीजशब्द :-** ग्रामीण, शिक्षण, भाषा, बोली, प्रथा-परंपरा, श्रद्धा, अंधश्रद्धा, अशिक्षितपणा, मागासलेपणा

### प्रस्तावना:

शिक्षण ही निरंतर चालणारी प्रक्रिया आहे. मनुष्याच्या सर्वांगीण विकासासाठी शिक्षण हे अत्यंत उपयुक्त आहे. शिक्षणामुळेच मानवी जीवनात परिवर्तन झाले आहे. सुसंस्कृत समाजाच्या निर्मितीसाठी शिक्षणाचे मोल अपार आहे. गतिमान समाजाच्या घडणीत शिक्षणाला अनन्यसाधारण महत्त्व प्राप्त झाले आहे. शिक्षणाचा उद्देश केवळ पदवी मिळवणे हा नसून आचार -विचारात बदल घडवणे हा शिक्षणाचा मूलभूत उद्देश आहे. ' विद्येनेच मनुजा श्रेष्ठत्व आले या जगामाजी ' असे जे म्हटले जाते, त्याचाही अर्थ तोच आहे. पाश्चात्य विचारवंत बेकन यांनी ' ज्ञान ही शक्ती आहे ' ; ज्ञदवूसमकहम पे चवूमतद्ध असे म्हणत ज्ञानाची महती विषद केली आहे. शिक्षण हा समाजाला लाभलेला तिसरा डोळा आहे. त्यामुळे मनुष्य सुजाण, सुसंस्कृत व चिकित्सक होण्यास मदत होते. शिक्षणामुळेच समाजाचे चित्र बदलण्यास मदत होते. मानवी जीवन सफल-संपूर्ण, समृद्ध, विकसित होण्यासाठी शिक्षण हाच तरणोपाय आहे. माणूस चिकित्सक, बुद्धिप्रामाण्यवादी, चोखंदळ व संशोधकबुद्धी जोपासणारा ठरतो तो शिक्षणामुळेच ! शिक्षण प्रक्रियेत नित्यनूतन असे बदल होत असतात. त्यामुळे नवनवीन आव्हाने पुढे उभे राहतात. ती आव्हाने पेलण्याची क्षमता जी भाषा अंगी बाळगते तीच जनप्रिय ठरते. आजच्या गतिमान जीवनात भाषाविकासाची चक्रे अतिशय वेगवान झालेली असताना, नवीन तांत्रिक परिभाषांचा स्वीकार जलदगतीने होत असताना आणि उंच उंच झेप घेण्याचे बळ भाषेच्या गरूडपंखांना लाभले असताना ज्या बहुसंख्याकाकरिता ही भाषा उपयोजिली जावी त्यांनाच याची माहिती नसावी, किंवा त्यांनाच ही भाषा ज्ञात नसावी ही कटु वस्तुस्थिती आहे.

ग्रामीण भागातील ७० टक्के जनता ही शेतीव्यवसायात वा गावातील लहानमोठ्या उद्योगात गुंतलेली आहे. त्यांच्यात साक्षरतेचे प्रमाणही अत्यल्प आहे. त्यामुळे सामाजिक पर्यावरणात होणारे बदल त्यांच्यापर्यंत पोचत नाहीत. त्यांची (बोली) मातृभाषा आणि ज्ञानदानाची प्रमाणभाषा यात समन्वयाचा अभाव असल्यामुळे उपयुक्त ज्ञान त्यांच्यापर्यंत पोचत नाही. परिणामी त्यांचे मागासलेपण कायम राहते. भाषा ही संस्कृतिसंवर्धनाचे प्रभावी माध्यम मानले जाते. ती टिकली तरच संस्कृती टिकेल. " भाषा ही बौद्धिक व भावनिक अभिव्यक्तीचे साधन आहे. दोन पिढ्यांमध्ये सांस्कृतिक देवाणघेवाण याच भाषेच्या माध्यमातून होते. वैज्ञानिक ज्ञान व जगाचे

गवाक्ष याच भाषेच्या माध्यमातून खुले होतात.”<sup>१</sup> ग्रामीण भागात सर्व व्यवहार हे बोलीच्या माध्यमातूनच होत असल्याने तीच बोलीभाषा त्यांच्या अंगवळणी पडली आहे. अलीकडे शहरी आणि ग्रामीण समाजजीवनामध्ये एक भिंत उभी राहत असल्याचे दिसते. खेड्यातील ग्रामीण बोली बोलणा-या व्यक्तींकडे उपेक्षेने वा हास्यास्पद नजरेने बघितले जाते. ती व्यक्ती शहरी संस्कृतीत थट्टेचा विषय होते. आज समाजात केवळ ग्रांथीक मराठी भाषेत वा इंग्रजीमध्ये फाडफाड बोलणारी व्यक्ती सुसंस्कृत तर बोलीचा संपन्न वारसा जपणारी व्यक्ती अशिक्षित, अडाणी समजली जाते. हे चित्र अत्यंत चिंताजनक आहे. त्यामुळेच ग्रामीण भागातील व्यक्तींमध्ये न्युनगंडाची भावना वाढीस लागलेली दिसते. त्याकरिता बोली आणि प्रमाणभाषेची उसवत चाललेली वीण पुन्हा एकदा घट्ट विणणे आवश्यक आहे. ग्रामीण भागातील संस्कृती, प्रथा-परंपरा, ग्रामदैवते, बोलीभाषा, यांच्या विषयीची सकारात्मक भावनाच ग्रामीणांविषयी सन्मानाची बीजे रोवू शकेल.

अभ्यासक्रमाची रचना करताना माध्यमिक व उच्च माध्यमिक स्तरावर शिक्षणाचे माध्यम म्हणून स्वीकारलेल्या मराठी भाषेतून सर्वांना ज्ञानदान केले जावे, हे सूत्र स्वीकारले आहे. विद्यापीठ स्तरावरही हेच सूत्र अनिवार्य मराठीबाबत स्वीकारले असून मराठी वाङ्मय विषयात बोलींना ( अभ्यासक्रमात कलाकृती नेमून ) प्राधान्य दिलेले आहे. ग्रामीण विभागात बोलीमधूनच सर्व व्यवहार चालत असल्यामुळे प्रमाण मराठीच्या शिष्टमान्य स्वरूपामुळे ग्रामीण विद्यार्थ्यांची कुचंबणा होते. त्याचे मन भयभीत होते व शिकलेल्या लोकांपुढे माझे कसे होणार ? या भीतीने त्यांच्यामध्ये न्युनगंडाची भावना निर्माण होते. त्याकरिता बोलींनाही मानमान्यता व प्रतिष्ठा मिळवून देणे गरजेचे आहे. कोणतीही भाषा ही आधी बोलीच असते, हे भाषातज्ज्ञानीही मान्य केले आहे. “भाषा या कधीच अवगुंठीत नसतात. त्या सतत उत्क्रांत होतात, नवीन सामाजिक व आर्थिक घटकानुसार नवे रूप घेत असतात. त्या वाढतात, काही वेळा आकसतात, स्थित्यंतरीत होतात, त्यांचा विलय होतो काही वेळा एखाद्या भाषेचा मृत्यूही ओढवतो. भाषेचा प्रकाश नसेल तर आपण जगातील अंधारात चाचपडत राहू, असे महान भारतीय कवी आचार्य दंडी यांनी म्हटले होते.”<sup>२</sup> त्यामुळे बोली जगली तरच भाषांचे मूळ रूप शिल्लक राहील. त्यासाठी बोलींकडे हेटाळणीच्या दृष्टीने पाहण्यापेक्षा समदृष्टीने पाहणे उचित ठरेल. अलीकडे ग्रामीण, आदिवासी बहुल भागातील मुलांकरिता त्यांची बोली जाणणा-या शिक्षकांना नेमले जात आहे. ही जमेची बाजू मानता येईल. विद्यार्थ्यांशी त्यांच्या बोलीतून संवाद साधत अध्यापन केले जात असल्यामुळे शिक्षकांशी त्यांची जवळीक साधली जात आहे. त्यामुळे त्यांच्या मनातील भीती दूर होऊन शिक्षकांविषयी व शिक्षणाविषयी त्यांच्यात आवड निर्माण होत आहे. हा संवाद असाच वाढत राहिला तर ग्रामीण भागातील लाज-या बुज-या मुलांनाही त्यांच्या प्रगतीचा मार्ग गवसेल व ते मुख्य प्रवाहात संमिलित होतील.

### ग्रामीण भागातील शिक्षणाची सद्यस्थिती :-

ग्रामीण भागात जीवन जगणारी बहुसंख्य जनता ही आजही अतिशय दुर्गम भागात, कडेकपारीत, डोंगरद-यात, श्वापदांच्या दहशतीत, प्राथमिक गरजांची पूर्तताही होणे जिथे अशक्यप्राय आहे अशा ठिकाणी अतिशय हलाखीचे जीवन जगत आहे. प्रथा-परंपरा, देव-दैवते, श्रद्धा-अंधश्रद्धा, गतानुगतीक-परंपरागत विचारसरणी स्वीकारत सुधारलेल्या माणसांपेक्षा अनेक पावले मागे पडलेला आहे. दळणवळणाच्या सोयींचा अभाव, शैक्षणिक सुविधांचा अभाव, गरिबी, दैन्य, दारिद्र्य यामुळे त्याचे जगणे परावलंबी व लाचारीचे झाले आहे. त्यामुळे शाळेत जाणे ही त्यांना चैन वाटते. घरी राहिल्यास मजुरीसाठी, गावातील कुठल्या कामावर, शेतावर गेल्यास तो कुटुंबासाठी काही मदत करू शकेल म्हणून शाळेमध्ये पाठविण्याची पालकांची मानसिकता नसते. आजही हे चित्र ब-याच मोठ्या प्रमाणात बघावयास मिळते.

शहराजवळ असलेल्या गावांमध्ये शिक्षणाचे प्रमाण दिसते पण त्यांची मनोवृत्तीही काहीशी मनोरंजनाकडे कल असलेली, भ्रमणध्वनीच्या आधीन झालेली, प्रसारमाध्यमांच्या आहारी गेलेली, नको त्या व्यसनांच्या आधीन झालेली, शिक्षणाच्या मुख्य ध्येयापासून परावृत्त झालेली दिसत आहे. अर्धवट ज्ञान हे फार घातक असते, असे म्हटले जाते. आज शहरानजिक राहणा-या मुलांच्या बाबतीत ही समस्या गंभीर बनली आहे. त्यामुळे ते अधांतरी असल्यागत दिसत आहेत. अति दुर्गम भागातील लोकांपर्यंत ज्ञान पोचले नाही म्हणून समस्या आहे. शहरानजीकच्या मुलांचा अंधानुकरणाकडे कल वाढल्यामुळे अडचण आहे, त्यामुळे त्या दोहोंपर्यंत ज्ञानाचा खरा हेतू पोहचविणे ही काळाची गरज आहे. त्याशिवाय ग्रामीण भागातील मुलांमध्ये जाणीव जागृती निर्माण होणार नाही.

ग्रामीण भागातील तरूण पिढी योग्य मार्गदर्शनाअभावी दिशाहीन व कर्तव्य पराड्.मुख झालेली आहे. कमालीची उदासीनता, भविष्याविषयीचा बेफिकीरपणा, शिक्षणाविषयीची नकारात्मकता, नाउमेद झालेली मनोवृत्ती, निसर्गाचा लहरीपणा या सर्व बाबींमुळे हवालदिल झालेले त्यांचे मन देववाद आणि दैववाद याकडे झुकून गतार्थ परंपरांचे पाईक होण्यातच धन्यता मानताना दिसत आहे. समाजजीवनातील बदलाविषयी, जगातील परिवर्तनाविषयी अनभिज्ञ असलेले ग्रामस्थ निराशने ग्रासलेले,परावलंबी जीवन जगणारे, भयप्रद व भीडस्त जीवन जगणारे, परस्परविषयीची सहानुभूती हरवून बसलेले दिसत आहेत. त्यामुळेच त्यांचा परस्परांमधील संवादही लोप पावत चाललेला दिसतो. अशा या चेतनाहीन,विकल,गलितगात्र जीवन जगणा—या ग्रामीण भागातील बांधवांना उर्जितावस्था प्राप्त करून द्यायची असेल तर त्यांना समजेल अशा भाषेत त्यांच्याशी संवाद साधणे गरजेचे झाले आहे. त्यांचा हरवलेला आत्मविश्वास जागृत करणे ही काळाची गरज आहे. “ २०१९ हे संयुक्त राष्ट्रांनी आंतरराष्ट्रीय स्थानिक किंवा देशी भाषा वर्ष जाहीर केले आहे. यात देशी भाषांचे संवर्धन, पुनरुत्थान व त्यांना उत्तेजन देणे अपेक्षित आहे . भारतात अशा अनेक आदिवासी भाषा आहेत ज्या आता अस्तंगत होण्याच्या दिशेने मार्गक्रमण करीत आहेत.”<sup>३</sup> अशा भाषांचे संगोपन केले जाणे गरजेचे आहे. त्यासाठी बोलींचा वापर समाजात टिकवून ठेवणे आवश्यक आहे. भाषा ही एका पिढीकडून दुस—या पिढीकडे संक्रमित होत असते तेव्हा केवळ ती भाषाच नाही तर तत्कालीन समाजस्थिती, समाजास हितावह ठरणारे अनेक प्रकारचे ज्ञान सुद्धा या नव्या पिढीकडे येत असते त्यामुळे ते सर्वकष ज्ञान पुढेही टिकविण्याची आवश्यकता आहे.

ग्रामीण भागातील संवादविषयक समस्या :-

ग्रामीण भागातील लोकांची पारंपरिक व रूढीप्रिय मनोवृत्ती संवाद—संभाषणापासून दूर राहण्यास कारणीभूत ठरत आहे. अशिक्षितपणामुळे नकारात्मक विचारांकडे त्यांचा कल अधिक वाढता आहे. नव्याचा स्वीकार करण्याकडे त्यांची प्रवृत्ती दिसत नाही.शैक्षणिक सुविधांचा अभाव, ग्रंथालयांची अनुपलब्धता, ग्रामजीवनातील अज्ञान— अंधःकारामुळे जगातील बदलाविषयी अनभिज्ञ, भाषेची समज नसणे, बोलीभाषेतून व्यवहार करण्याकडे कल, संकुचित वृत्ती, राहणीमानाचा प्रभाव, आळशीपणा, अल्पसंतुष्टवृत्ती, न्युनगंडामुळे नवनवीन आव्हान पेलण्यास तयार नसलेले मन,नव्या ज्ञानार्जनास उत्सुक नसलेली मानसिकता, मागासलेपणातून आलेली भीती, लहानपणापासून अंगवळणी पडलेल्या सवयी सोडण्यास तयार नसलेले मन, गावापासून दूर जाण्यास तयार नसलेली मानसिकता, गावगाडयात व वडिलोपार्जित धंद्यात रमलेले मन, नव्या जगाविषयी अनामिक आकर्षण असले तरी भीडस्त पणामुळे बाहेर जाण्याची भीती, अनुत्सुकता,तांत्रिक ज्ञानाविषयी अज्ञान,अशा अनेकविध कारणांमुळे ग्रामीण भागातील लोकांचा परस्परांमधील व समाजातील संवाद हरवलेला दिसतो. संवादासाठी हवे असणारे भाषिक सामर्थ्य स्वतःकडे नाही, या भावनेनेच ग्रामीण तरूण मागे पडत आहे. स्थितीवादी प्रवृत्ती हीच मागासलेपणाची खरी समस्या ठरली आहे. धंदेवाईक शिक्षणाकडे कल नसल्यामुळे ग्रामीण तरूण परिवर्तशील अवस्थेत टिकू शकत नाही. संकुचित वृत्ती टाळून जोवर ग्रामीण जीवनातील शिक्षण व संभाषण यात समन्वय साधला जात नाही तोवर ग्रामजीवनातील विकासाची गती प्रवाहित होणे अशक्यप्राय वाटते.

ग्रामीण भागातील शिक्षण व संवाद यात समन्वय साधण्यासाठी उपाययोजना :-

१. दुर्गम भागातील ग्रामीण तरूण—तरूणींना शिक्षणाचे महत्त्व समजावून सांगणे.
२. शिक्षणासाठी विविध सोयी सवलती उपलब्ध करून देणे.
३. विविध प्रकारच्या शुल्कांमध्ये सुट देणे, अभ्यासक्रमासाठी कमी फी आकारणे
४. योग्य पद्धतीने व आत्मीयतेने शिक्षण देणे.
५. पारंपरिक ज्ञानासोबतच तांत्रिक व व्यवहारोपयोगी शिक्षणाची सुविधा निर्माण करून देणे
६. आरोग्याविषयी मार्गदर्शन करणे व निकोप आरोग्यासाठी सुविधा केंद्रांची निर्मिती करणे.
७. संगणकाची ओळख निर्माण करून त्याच्या फायद्याविषयी जागरूकता निर्माण करणे .
८. स्पर्धेच्या युगात टिकण्यासाठी मार्गदर्शक केंद्राची स्थापना करणे.
९. जीवनाकडे बघण्याचा नकारात्मक दृष्टिकोण बदलण्यासाठी प्रयत्न करणे.
१०. पुरोगामी विचारांसाठी फुले,शाहू आंबेडकर यांच्या विचारांचा परिचय करून देणे
११. बोलींची प्रतिष्ठा जपण्यासाठी जाणीवपूर्वक व गांभीर्याने प्रयत्न करण्याची आवश्यकता आहे.

- १२.स्वाभीमानाचे जीवन प्रदान करण्यासाठी पूरक व्यवसाय,धंदेवाईक शिक्षण यांच्या संधी उपलब्ध करून देणे.
- १३.शिक्षणामुळे विविध क्षेत्रात लीलयेने पदार्पण करता येईल.

#### निष्कर्ष

१. ग्रामीण भागात शिक्षणाचा पुरेसा प्रसार आणि प्रचार झालेला नसल्यामुळे दुर्गम भागातील व्यक्तींचा विकास झालेला नाही.
२. ग्रामीण भागात मनोरंजनाची साधने मोठया प्रमाणात पोचली. ज्ञानार्जनापेक्षा मनोरंजनाकडे कल वाढला. वाचनाचे महत्त्व न कळल्यामुळे ही पिढी दिशाहीन झालेली दिसते.
३. ग्रामीण भागात शैक्षणिक साधनसुविधांचा अभाव, दळणवळणांच्या साधनांचा अभाव, ग्रंथालयांची अनुपलब्धता या बाबींमुळे विकासाचा मार्ग थांबल्यागत झाला आहे.
४. ग्रामीण भागातील लोकांची कमालीची उदासीनता, देववादी-दैववादी प्रवृत्ती, परंपरागत जीवन जगण्याकडे असलेला कल व अल्पसंतुष्टवृत्तीमुळे त्यांच्या ठिकाणी कमालीचे औदासिन्य पहायवयास मिळते.
५. शिक्षणाभावी भाषेचे महत्त्व कळले नाही. भाषेविषयीची सजगता अनेक क्षेत्रात सेवेची संधी उपलब्ध करून देऊ शकते, याविषयी ही माणसे अनभिज्ञ आहेत.

## Need & Scope Of Innovation In Home Eco Subject

**Dr. Sarita Dinkarrao Deshmukh**

Professor Loknayak Bapuji Aney Mahila Mahavidyalay, Yavatmal

### Introduction

Home economics, study of homemaking and the relation of the home to the community. Formerly limited to problems of food (nutrition and cookery), clothing, sewing, textiles, household equipment, housecleaning, housing, hygiene, and household economics, it later came to include many aspects of family relations, parental education, consumer education, and institutional management. The application of scientific techniques to home economics was developed under the leadership of Ellen Henrietta Swallow Richards ; later an emphasis was placed on the social, economic, and aesthetic aspects. Although called in some countries home science, household arts, domestic science, or domestic economy, the subject is known today in the United States as home economics, and specialized terms are used for its subdivisions. The field of home economics has, at different times, emphasized training in needlework, cookery, the management of servants, the preparation of medicines, and food preservation; such instruction was once given mainly in the home and from a practical rather than a scientific standpoint. In the United States the teaching of cooking and sewing in the public schools was coincident with manual training for boys, beginning in the 1880s. State institutions, notably in Iowa, Kansas, and Illinois, pioneered in introducing home economics courses on the college level in the 1870s. In 1914, the Smith-Lever Act made federal funds available for extension work in home economics and agriculture, in cooperation with the states; through this provision, supplemented by later acts, home demonstration work is carried on in many rural localities. The Smith-Hughes Act of 1917 instituted secondary school vocational education in home economics and other fields. Home economics, once taught only to women, is now taught to both men and women; in the United States home economics courses are taught mainly at the secondary school level, more commonly in rural than in urban areas. The International Federation of Home Economics, an organization devoted to the teaching of home economics on a worldwide basis, has members in over 60 countries.

### International Contributions

Over the years, home economists in other countries have contributed significantly to strengthening programs aimed at women, families, and children (O'Toole and Nelson 1988), and to formally and informally educating women, increasing understanding and appreciation of other cultures, improving public health, and improving the process of introducing change (O'Toole et al. 1988). Home economists in the United States began to become involved outside their country at the start of the twentieth century when mission boards hired graduates to assist in establishing home economics departments in schools and colleges in other countries to improve the living conditions of the people with whom the missionaries worked (O'Toole and Nelson 1988).

Several professional organizations also have facilitated international involvement. The International Federation of Home Economics, IFHE; the American Home Economics Association (now the American Association of Family and Consumer Sciences, AAFCS); and the American Association of State Universities and Land Grant Colleges, AASULGC (now the National Association of State Universities and Land-Grant Colleges, NASULGC) have been active internationally. The IFHE is the only international nongovernmental professional organization concerned with home economics as a whole. Founded in 1908 in Friburg, Switzerland, IFHE brings together institutions, organizations, associations, and individuals from more than 110 countries worldwide to further the mission of home economics. IFHE has been involved with several United Nations Conferences on Women, including the 1995 Beijing conference. It has consultative status with UCOSOC (United Nations Economic and Social Council), UNESCO (United Nations Education, Scientific, and Cultural Organization), FAO (Food and Agricultural Organization), UNICEF (United Nations International Children's Emergency Fund), and other United Nations and international agencies. IFHE also cooperates with other international nongovernmental organizations related to home economics to strengthen and promote home economics concerns and exchange information (Davis 1999).

### What is the Scope of Home Economics?

A home economist may choose to specialize in one home economics study area or may be a generalist in many facets of home economics. Examples of the fields in which home economists are active include:

- Community Service / Development
- Advertising

- Marketing and Sales
- Product Research
- Food Editor
- Promotion and Public Relations
- Journalism
- Dietetics
- Media Relations
- Recipe Development/Food Styling
- Co-op Housing
- Teaching
- International Development
- Resource Management
- Textile Design
- Financial Counselling
- Fashion/Craft Editor
- Public Health Nutritionist
- Consumer Consultant

I anticipate that my inquiry question and process will continue as I enter into practicum, and throughout my teaching career. As concepts of social justice and sustainability continue to change, as will my incorporation of the issues. It is an evolving question, an evolving topic, and an evolving discipline- one that I am excited to be a part of at this pivotal time of change.

-Georgia Campbell

### Conclusion

At this point, I do not have a final answer as to what the best practices are to teach critical thinking through home economics. I am, however, eager to begin teaching and explore for myself what works and what does not, and especially where my comfort level is at when introducing higher-order thinking activities. Very soon, I will be teaching in a foods classroom and I am excited to inspire and, in turn, be inspired by the students in all aspects of being an educator. I plan to learn all that I can from this practicum experience, and hopefully delve more into this teacher inquiry learning process. The plan now is to continue to grow and refine in my teaching style and ideas, to become more experienced and aware of best practices, and continue to advocate for home economics as a key to learning life-long learning skills.

## Need & Scope Of Innovation In Home- Eco Subject

Dr Kalpana P Korde  
Head Of Home-E-Economics Department  
Shivshaktimahavidyalay,Babulgao

### Introduction

Research objective- explains and substantiates the necessity of innovative learning process and introducing in subject "Home economics and technologies", improving the content of learning process and updating the development of life quality comprehension, what can be achieved by acquiring a variety of handicraft and modern technology. In the article compared the Ministry developed subject programs and the author's programs of A.Pridāne parts "Technological creativity and practical application to the human habitats to improve" and "Product ideas, ideas generation, presentation".

### Importance in Today's World

The study of home sciences has been around for over a century, and started as basic outreach programs that taught about food, textile and family sciences to rural communities. As the demand for home sciences increased, this is where we saw the beginning of and growth in home economics, the basic skills for life, because home economics focuses on the health of the individual, family, and the community.

Home Economics is not new, there were home economics conferences held as early as 1899 in Lake Placid, to discuss present home science needs, and the future of mental, moral, and physical health in the family.

The best examples I can think of early Home Economists in Canada are Fannie Twiss and Ruth Binnie. They both saw a need to reach rural communities in Saskatchewan, travelling over one thousand miles a month, teaching their household sciences program, which included textiles, nutrition, and also a hot lunch. The main goal was to teach children and youth to sew, and make a hot meal for dinner when they grew up.

While home economics has evolved, and its name has changed, to primarily human ecology in Canada, it still focuses on improving and empowering the wellbeing and quality of life for communities, families and individuals.

Home economics is formed by the human ecological model. At the core is humans, or individuals, and the natural environment, human constructed environment and the human behaviour environment surrounding the core. Individuals are seen through this lens, and interventions are done accordingly.

Home economics isn't just about what is trendy. For example, instead of focusing on what the latest diet is, home economics is science focused, which has been an anchor throughout these health trends, that a healthy nutritional diet and balanced lifestyle helps maintain well-being.

In 2015, home economics is needed more than ever, with rapidly increasing consumer debt, individual nutrition concerns, obesity, ever changing family dynamics and roles, individuals, families and communities need information and interventions at the individual, family, community and government level that will support them and help them grow and adapt to an ever changing world.

### Innovative teaching ideas

- Be innovative, enterprising and creative
- Balance work responsibilities with personal responsibilities and leisure
- Choose nutritious foods in a changing marketplace
- Design, evaluate and make decisions related to textiles and food
- Make informed, responsible and ethical consumer decisions
- Negotiate for effective and diverse family and interpersonal relationships
- Prepare nutritious foods and develop health promoting food behaviours
- Take control of their health and develop health promoting behaviours
- Understand and take action to enhance human growth and development
- Understand and confront the way they influence and are influenced by broad societal factors such as media, advertising, peer pressure, government policies and changing technologies
- Utilise design and technology relevant to families and households.

### Conclusion

Through my research I found social and environmental justice issues are ripe within Home Economics; every unit within Food Studies can have a social or environmental justice element ranging from organic, local/seasonal, meat production, factory farming, food miles, migrant farm workers, and global inequalities in access to nutritious food; Textiles Studies can readily address social and environmental issues in the textile and garment industries, fabric and fibre production, and the hidden costs of cheap disposable fashion; Family Studies can address issues of marketing, consumption, and deconsumption, conservation of energy and resources, and global and local social inequalities. All of these issues are meaningful, relevant, and important issues that increase global awareness and foster global citizenship- important aspect of 21st century learning.

**Role Of Information Technology (IT) In Sports Performance****Dr. Amol Onkarrao Deshmukh**

Lokhit College Of Physical Education Yavatmal

**Introduction**

Information Technology has become an important inter-disciplinary partner for sports, this way physical education has its branches of Sports psychology, Sports Statistics, Biochemistry, Sports Medicine, Kinesiology and Bio-mechanics etc. Taking into consideration its association with other disciplines and its various aspects, computer can be used and are being used in physical education and sports. Human play, as embodied in sports, is one of most important in expressions of human culture. The games in which people in the society it's reflects their society and culture as a whole. It is said that communication is one dominant contribution to the human being on the planets.

The Olympic movement is one of the social movements on human society. The countries from all over the world gathering in one place during summer Olympic games for peaceful is the epitome of intersection of sports and communication. This fact underscores the importance of the media and the Olympics. The presentation will briefly explain the relationship between information technology and sports.

**Information Technology in Sports:**

The information age was 1970's. The change was brought to the society with the creation of world web (the web). As change in technology, changes channels of communication and message content. The early 1960's, the computer technology establish protocols which become as the internet in 1969. And later development of Hypertext Mark-up Language (HTML) in 1989 that became the basic for the development of web in 1993. The web was introduced to the public at large. During the formative days of the web lot of things was include such as email, blog, face book, twitter, lot of website, journals, you tube etc.,. Another important fact of information technologies being used in sports is seen in the trend analysis done by administrators in sports, franchises and leagues while the most basic functions are storing data used to determine statistics, disclosing the score of a game or uploading pictures for fans to view thorough out a game. In the past, task such as developing rosters (name list) of athletes, managers, officials, timekeepers, drivers and medical staff was too much time to done the work with hand. But the institution of IT in sports, team administration was now able to not only create detailed rosters of these individuals but can schedule them for work. Also, most profession sports venues have very modern scoreboards that are programmed to update statistics and information directly to a computer system. So with the use of such modern technology, almost every area of sports has become dependent of automation due to relevance that it implies to the lives of spectators all over the world.

**Application in Sports:**

The field of physical education and sports can make a significant contribution to the role that technologies play in our lives by carefully considering the benefits and liabilities of new information technologies on the whole person, body as well as mind. Nowadays in schools, colleges and other institutions, students are given more organized and disciplined education through I.T. and computers, because it is more authentic innovation and convincing. A variety of programmes are available which help in track-grading, conducting health assessment, monitoring research projects, and analyzing sports performances.

**Benefits of Information Technology:**

Here are some of the ways technology can provide or facilitate most of the types of support that someone trying to become or stay physically active needs. Now a day's computer is widely used as a teaching aid. In this era of globalization black board is quit away. Power point presentations, Video clips, Animation, Graphics, and Sound have become much more effective and needful, CD, DVD, MP3, are more useful in teaching. IN some way computer is applied in sports sciences, scoring systems, computerized test all evaluation can be largely followed. A coach keeps monitoring on the players. A computers helps us if any deficiency is found. Records of the player can be maintained for future plan Selection of players for various game and sports is an important for this multiple regression helps in many ways. Hence computer plays a significant role in storing research data and its analysis. Treatments in sports medicine involve Cardio-Vascular, Flexibility and strength building programme. Sports Medicine is the study, prevention and treatments of sports and fitness related injuries.

**Advantage and disadvantage of Information Technology:**

Technology in sports is constantly changing in today's era. This change is making a big impact, whether the technology is a disadvantage to the sport and slows down the speed of the game or uses the technology to an advantage and speeds the game up to help make accurate calls. People are always looking for

the technology to be able to get ahead of other opponents. The use of technology has crept into the athletes' games. Technology is more of an advantage or disadvantage. One of the main reason's through which technology compromise a sports experience is that people are watching the games at home instead of watching the games that are played live. Some people would rather stay at home than spend the money to go to view the game. With the game being shown on television, means fewer supporters in attendance. Fewer supporters mean less money for the teams in terms of income and profits. The enhanced experience of technology has made it easy for teams to know and learn about the opposite teams. Some people believe that it was necessary for technology. Sometimes the referee's decision will be wrong, there technology will work and give accurate result will be given

#### Through using Information technology to improve the standard of Sports in the following process

- To update the health status of players.
- Preparing training schedule
- Video Feed back for players practices.
- To assessment of physical activity by using Information Technology.
- Storing the results
- To analysis the team performance at the time of competition.
- Online registrations and profile verifications.
- The Coach can have the self-appraisal through the Information technology.
- Storing the personal data's of athletes.
- Search engine for the latest training in sports.

**Impact Of Social Media On Teaching Learning Process****Dr. B.P. Yeole**Ass.Prof. (Political Science)  
MJF College, Amravati**Abstract**

*From last few years use of social media is increasing by the people of world in various sectors. Teaching learning process is one of them Use of social media by Teachers, educators or students make teaching, learning process more collaborative, interactive, informative participative Use of social media has created positive & negative impact on teaching learning process. The paper focus on positive and negative impact of using social media because it is the need of the hour, that every people who are related with education sector has known how social media impact on their life.*

**Key words-** Teaching- Learning process, social media Technology,

**Introduction**

The growth of technology has changed our life ultimately in each and every sector from IT sector to our kitchen also Social media is an offspring of technology. Social media is a tool of technology which connects people to each other to interact with each other. Millions of people use social media because it is very easy for operating easily share information with each other open world for sharing knowledge etc.

There are several engine for social media like face book, Linicedin Twitter, YouTube & Instagram etc Social media is beneficial for everyone. There is nobody in the world today who doesn't know social media.

**Statistical data of social media users :** The following figure highlights the use of social media in worldwide.

A new survey from Pew Research Centre found that 3.2 billion people are (means which equals to about 42% of the population) social media user in worldwide, 68% facebook user, 500 million daily active instgram stories user, 91% people access social channels via mobile devices, like wise almost 80% of total time spent on social media sites occurs on mobile platforms. Overall social media use a spend an average of 2 hours & 22 minutes per day on social network & messaging.<sup>1</sup>

**Social Media Users In India:-**

The following statistics show that India is no exception. In India according to report published by Statista Research Dept. in June 21 2019, India is the second largest country of mobile internet usages behind china. An estimate of 262 million users living in urban communities and 109 million living is rural areas In 2021 it is estimated that there will be around 358.2 million people social network users in India, 195 million face book user.<sup>2</sup>

Means according to above statistical data shows that most of people use social media in each & every field. There it doesn't matter for the user that whether he is rural or urban, literate or highly qualified etc.

The people usually use social site for many purpose. Entertainment, study, Research, Chatting etc.

**Role of Social Media in Teaching Learning Process :**

Social media play a very active role in education field, especially in teaching learning process. Students use it to get information, to interact with the world to, stay update into knowledge because social media provides any data very easily & quickly within seconds.

No doubt, that students spend more & more time in accessing data from various sites.

In modern era no one can imagine without smart phone. According to statistics report overall 91% people access social channel via mobile devices in teaching process.<sup>3</sup> A recent survey conducted by the Badson Survey Research group in collaboration with New Marketing labs & Education Consulting Group pearson learning solutions drew from almost 1000 Colleges & University's faculty nationwide and revealed that 80% professors are using social media in same capacity and more than half use these tools as a part of their teaching. The survey noted that 30% faculties are using social network to communicate with students, 52% are using online videos, podcasts, blogs and wikis during class time.<sup>4</sup> Even not so, many universities have made their campus wifi And now it is mandatory for college to use technology in teaching learning process.

Basically a northan university classified as a computer school created Virtual Campus to create a sense of community for their students. To provide them with a safe & secure teaching environment. This university designed a campus connect program with the help of wireless company, where integrated mobile phone into their Learning Management System Every student was required to have a mobile phone to receive all campus information & alerts.<sup>5</sup> (chapel 2008)

Other university developed their own interactive social media based learning environment, where students could used their mobile devices to interact with the system during the lecture and at home.<sup>6</sup> (chao, parker & Fontana 2011) what important role is being played by social media in education sector.

From the above references it is found that universities, colleges and actually many, faculties are using social media. Faculty using variety of software tools & free web application to enhance learning communication and engagement. Social media provides opportunities for learning to develop & maintain their own learning activities. Faculty using E-learning for seminar presentation, to simplify difficult topic, to arrange online test, students feedback, to provide notes through Google Class Room etc Now ICT use has become a basic need of teachers & students also.

### Impact of Social Media :

In Recent period social media play active role in teaching & learning process But its advantages & disadvantages are two sides of coin. Social media is not only beneficiary for students, teachers, parents, but there are some sideeffects .

### Social media hve following positive impact on teaching learning process .

- 1) Social media encourage to student centric, participatory learning which are empowering students and teachers.
- 2) It is a tool to connect teachers, parents & Students
- 3) Students engaged with new technologies, new knowledge & up to date with information
- 4) Information can be easily accessible to students without location restriction.
- 5) The professor can always stay in touch with the students.The professor or faculty is available within second. So Social media has become a useful tool for interconnecting to students & teachers.
- 6) Social media has encouraged collaborative learning, world became a small place and open for everyone information sharing by students anywhere and everywhere.
- 7) Social media can motivate students, professor in participation is teaching learning process because it is more attractive, compare traditional learning process.
- 8) Social media provides huge opportunities to educator for Marketing their skill
- 9) Now due to social media, educator had did not depend upon traditional study material,
- 10) Credit goes to social media for become in a teaching learning process paperless.

### Negative impact on teaching learning process:

#### Following are the negative impact of social media on teaching learning process

1. No doubt, that students or others, spent more time on social media but it is fact that social media is a addiction. This addiction is dangerous to students mentally, physically and emotionally also. In traditional education system, students spends their maximum time in sports, outdoor games, face to face interaction, Intellectual games, Collaborative games etc, but due to social media students are detach with parents, friends, teachers , society On ground level. They are connected only on mobile or social media, now face to face interaction was closed.
2. There are many sites on social media where students spend extra time.
3. Technology provides lot of auto technique like grammar, spellcheck, current pronunciation etc these tools are reduced students ability to S.A. writing construction technique,Communication There are hundred of thousand fake accounts on social network it is ofen abused visit to site very unusually and they were cheated.<sup>6</sup>
4. Social media is changing the relationships between students and teachers. The student is not entirely dependent on the teacher for the study As such, respectful fears about teachers have diminished in new era.
5. Lots of online degree courses available in many sites, they cheat students. Many students rely on the accessibility of information on social media and the web to provide answer that means a reduced focus on learning and retaining information.<sup>7</sup>

### Conclusion

According to the above study we came to know that Social Media, is a part of technology, no one can escape the use of it but it is not used properly it can be a curse. Most of the negative aspects can be overcome by reducing the amount of time spent in social network sites. Students should save as much time as possible. They should use that time for their academic progress., skill developed or enjoying hobbies.

It has to be acknowledgement that social media is made up of business sector on you-tube, we are agree that it is a source of income but we should not forgate that education is a service area. So with paying more attention and preedution we can reduce negative consequences. All this we help us to reduce the negative impact of social media on education.

Mahatma Gandhi said, "Do not go to the machine otherwise you will be the hands of the machine."

**Impact of Innovative e-Learning on Social and Cultural Development****Ms. D.P. Bondre**

Department of Computer Science,

Mungasaji Maharaj Mahavidyalaya, Darwha-445202

**Abstract|:**

*The present paper deals with the impact of e learning education in the social and cultural activity. The importance of the online interaction and communication. In our todays education system it is compulsorily attach with this on line education system so that they will get proper knowledge of not only the particular system but also all other system which is depend on area of interest of the learner.*

**Keywords:** E- learning ; Communication ,effective learning, lecturing

**1. Introduction**

**The Educational technology** is the effective use of technological tools in learning. As a concept, it concerns an array of tools, such as media, machines and networking hardware, as well as considering underlying theoretical perspectives for their effective application. Educational technology is not restricted to high technology. Nonetheless, electronic educational technology, also called **e-learning**, has become an important part of society today, comprising an extensive array of digitization approaches, components and delivery methods. For example, m-learning emphasizes mobility, but is otherwise indistinguishable in principle from educational technology. Educational technology includes numerous types of media that deliver text, audio, images, animation, and streaming video, and includes technology applications and processes such as audio or video tape, satellite TV, CD-ROM, and computer-based learning, as well as local intranet/extranet and web-based learning. Information and communication systems, whether free-standing or based on either local networks or the Internet in networked learning, underlie many e-learning processes. Theoretical perspectives and scientific testing influence instructional design. The application of theories of human behavior to educational technology derives input from instructional theory, learning theory, educational psychology, media psychology and human performance technology. The Educational technology and e-learning can occur in or out of the classroom. It can be self-paced, asynchronous learning or may be instructor-led, synchronous learning. It is suited to distance learning and in conjunction with face-to-face teaching, which is termed blended. Educational technology is used by learners and educators in homes, schools, businesses, and other settings.

**2. Concept and definition of online learning**

As per **Richey** educational technology as "the study and ethical practice of facilitating learning and improving performance by creating, using and managing appropriate technological processes and resources". **The Association for Educational Communications and Technology (AECT)** denoted as "The theory and practice of design, development, utilization, management, and evaluation of processes and resources for learning." As such, educational technology refers to all valid and reliable applied education sciences, such as equipment, as well as processes and procedures that are derived from scientific research, and in a given context may refer to theoretical, algorithmic or heuristic processes: it does not necessarily imply physical technology.

**3.Scope of online education**

Educational technology refers to the use of both physical hardware and educational theoretic. It encompasses several domains, including learning theory, computer-based training, online learning and, where mobile technologies are used, m-learning. Accordingly, there are several discrete aspects to describing the intellectual and technical development of educational technology:

- Educational technology as the theory and practice of educational approaches to learning
- Educational technology as technological tools and media that assist in the communication of knowledge, and its development and exchange
- Educational technology for learning management systems (LMS), such as tools for student and curriculum management, and education management information systems (EMIS)
- Educational technology itself as an educational subject; such courses may be called "Computer Studies" or "Information and Communication Technology (ICT)"

**4. Requirements for online Education**

The extent to which e-learning assists or replaces other learning and teaching approaches is variable, ranging on a continuum from none to fully online distance learning. A variety of descriptive terms have been employed to categorize the extent to which technology is used. For example, 'hybrid learning' or 'blended learning' may refer to classroom aids and laptops, or may refer to approaches in which traditional classroom time

is reduced but not eliminated, and is replaced with some online learning. 'Distributed learning' may describe either the e-learning component of a hybrid approach, or fully online distance learning environments.

### **E-learning may either be synchronous or asynchronous.**

Synchronous learning occurs in real-time, with all participants interacting at the same time, while asynchronous learning is self-paced and allows participants to engage in the exchange of ideas or information without the dependency of other participants' involvement at the same time. The Synchronous learning refers to the exchange of ideas and information with one or more participants during the same period. Examples are face-to-face discussion, online real-time live teacher instruction and feedback, Skype conversations, and chat rooms or virtual classrooms where everyone is online and working collaboratively at the same time. Since students are working collaboratively, synchronized learning helps students create an open mind because they have to listen and learn from their peers. Synchronized learning fosters online awareness and improves many students' writing skills. The Asynchronous learning may use technologies such as email, blogs, wikis, and discussion boards, as well as web-supported textbooks, hypertext documents, audio-video courses, and social networking using web 2.0. At the professional educational level, training may include virtual operating rooms. Asynchronous learning is beneficial for students who have health problems or who have child care responsibilities. They have the opportunity to complete their work in a low stress environment and within a more flexible time frame

### **Linear learning**

Computer-based training (CBT) refers to self-paced learning activities delivered on a computer or handheld device such as a tablet or smartphone. CBT initially delivered content via CD-ROM, and typically presented content linearly, much like reading an online book or manual. For this reason, CBT is often used to teach static processes, such as using software or completing mathematical equations. Computer-based training is conceptually similar to web-based training (WBT) which are delivered via Internet using a web browser.

### **Collaborative learning**

Computer-supported collaborative learning (CSCL) uses instructional methods designed to encourage or require students to work together on learning tasks. CSCL is similar in concept to the terminology, "e-learning 2.0" and "networked collaborative learning" (NCL). Collaborative learning is distinguishable from the traditional approach to instruction in which the instructor is the principal source of knowledge and skills.

### **Classroom 2.0**

Classroom 2.0 refers to online multi-user virtual environments (MUVES) that connect schools across geographical frontiers. Known as "e-Twinning", computer-supported collaborative learning (CSCL) allows learners in one school to communicate with learners in another that they would not get to know otherwise, enhancing educational outcomes and cultural integration. Examples of classroom 2.0 applications are Blogger and Skype.

### **Media**

The Educational media and tools can be used for task structuring support: help with how to do a task (procedures and processes), access to knowledge bases (help user find information needed) alternate forms of knowledge representation (multiple representations of knowledge, e.g. video, audio, text, image, data).

Numerous types of physical technology are currently used: digital cameras, video cameras, interactive whiteboard tools, document cameras, electronic media, and LCD projectors. Combinations of these techniques include blogs, collaborative software, e-Portfolios, and virtual classrooms.

### **Audio and video**

Radio offers a synchronous educational vehicle, while streaming audio over the internet with webcasts and podcasts can be asynchronous. Classroom microphones often wireless can enable learners and educators to interact more clearly.

Video technology has included VHS tapes and DVDs, as well as on-demand and synchronous methods with digital video via server or web-based options such as streamed video from YouTube, Teacher Tube, Skype, Adobe Connect, and webcams. Telecommuting can connect with speakers and other experts. Interactive digital video games are being used at K-12 and higher education institutions.

### **Computers, tablets and mobile devices**

Collaborative learning is a group-based learning approach in which learners are mutually engaged in a coordinated fashion to achieve a learning goal or complete a learning task. With recent developments in smartphone technology, the processing powers and storage capabilities of modern mobiles allow for advanced development and use of apps. Many app developers and education experts have been exploring smartphone and tablet apps as a medium for collaborative learning. Computers and tablets enable learners and educators to access websites as well as programs such as Microsoft Word, PowerPoint, PDF files, and images. Many mobile devices support m-learning. Mobile devices such as clickers and smartphones can be used for

interactive audience response feedback. Mobile learning can provide performance support for checking the time, setting reminders, retrieving worksheets, and instruction manuals.

### **Social Networks**

Group WebPages, blogs, wikis, and Twitter allow learners and educators to post thoughts, ideas, and comments on a website in an interactive learning environment. Social networking sites are virtual communities for people interested in a particular subject to communicate by voice, chat, instant message, video conference, or blogs. The National School Boards Association found that 96% of students with online access have used social networking technologies, and more than 50% talk online about schoolwork. Social networking encourages collaboration and engagement and can be a motivational tool for self-efficacy amongst students. Every student has his or her own learning requirements, and a Web 2.0 educational framework provides enough resources, learning styles, communication tools and flexibility to accommodate this diversity.

### **Webcams**

Webcams and webcasting have enabled creation of virtual classrooms and virtual learning environment.

### **Whiteboards**

The whiteboards predate tablets and other technological tools, but current interactive whiteboards and smart boards allow learners and instructors to write on the touch screen. The screen markup can be on either a blank whiteboard or any computer screen content. Depending on permission settings, this visual learning can be interactive and participatory, including writing and manipulating images on the interactive whiteboard.

### **Screen casting**

Screen casting allows users to share their screens directly from their browser and make the video available online so that other viewers can stream the video directly. The presenter thus has the ability to show their ideas and flow of thoughts rather than simply explain them as simple text content. In combination with audio and video, the educator can mimic the one-on-one experience of the classroom and deliver clear, complete instructions. Learners have an ability to pause and rewind, to review at their own pace, something a classroom cannot always offer.

### **Virtual classroom**

A virtual learning environment (VLE), also known as a learning platform, simulates a virtual classroom or meetings by simultaneously mixing several communication technologies. For example, web conferencing software such as GoToTraining, WebEx Training or Adobe Connect enables students and instructors to communicate with each other via webcam, microphone, and real-time chatting in a group setting. Participants can raise hands, answer polls or take tests. Students are able to whiteboard and screencast when given rights by the instructor, who sets permission levels for text notes, microphone rights and mouse control.

### **E-learning authoring tools**

E-learning authoring tools are software or online services that enable users to create courses, simulations, or other educational experiences. These tools typically support conventional, presentation-like courses, and may enable screen recording, multimedia, interactivity, quizzes, and non-linear or adaptive approaches

### **Learning Management System**

A learning management system (LMS) is software used for delivering, tracking and managing training and education. For example, an LMS tracks attendance, time on task, and student progress. Educators can post announcements, grade assignments, check on course activity, and participate in class discussions. Students can submit their work, read and respond to discussion questions, and take quizzes. An LMS may allow teachers, administrators, students, and permitted additional parties (such as parents if appropriate) to track various metrics. LMSs range from systems for managing training educational records to software for distributing courses over the Internet and offering features for online collaboration. The creation and maintenance of comprehensive learning content requires substantial initial and ongoing investments of human labor. Effective translation into other languages and cultural contexts requires even more investment by knowledgeable personnel.

### **Learning content management system**

A learning content management system (LCMS) is software for author content (courses, reusable content objects). An LCMS may be solely dedicated to producing and publishing content that is hosted on an LMS, or it can host the content itself. The Aviation Industry Computer-Based Training Committee (AICC) specification provides support for content that is hosted separately from the LMS.

### **Computer-aided assessment**

The Computer-aided assessment i.e. e-assessment ranges from automated multiple-choice tests to more sophisticated systems. With some systems, feedback can be geared towards a student's specific mistakes or the

computer can navigate the student through a series of questions adapting to what the student appears to have learned or not learned. Formative assessment sifts out the incorrect answers, and these questions are then explained by the teacher.

### **Executive Summary**

Today the on line education system is the most important and technical education which is required as per in our innovative world. In our todays education system it is compulsorily attach with this on line education system so that they will get proper knowledge of not only the particular system but also all other system which is depend on area of interest of the learner. The another most important thing is that there is no age limit, no restriction of time and no imitations of knowledge while taking the benefit of the on line education system.

## Modern Technologies And Their Impact On Sports

**Prin.Dr.Devendra Gawande**

Smt.Salunkabai Raut Kala Vanijya Mahavidyalay,  
Vanoja Dist.Washim

### Abstract

*Technology plays an important part in modern sport. With it being a necessary part of some sports (such as motorsport), it is used in others to improve performance. Some sports also use it to allow off-field decision making.*

### Introduction

Sports science is a widespread academic discipline, and can be applied to areas including athlete performance, such as the use of video analysis to fine-tune technique, or to equipment, such as improved running shoes or competitive swimwear. Sports engineering emerged as a discipline in 1998 with an increasing focus not just on materials design but also the use of technology in sport, from analytics and big data to wearable technology. In order to control the impact of technology on fair play, governing bodies frequently have specific rules that are set to control the impact of technical advantage between participants. For example, in 2010, full-body, non-textile swimsuits were banned by FINA, as they were enhancing swimmers' performances.

One of the most definitive tests for human athleticism is sports, but this does not mean that technology cannot facilitate it. When administering and officiating sports, technology can succeed where humans may not. This guarantees fair judgment of the performance and ensures that athletes win fairly. Here are five exciting new technologies being used in the sports industry today.

### Technologies in sports

#### Sensor Tools

Sensor tools are often used to analyze whether a goal is valid or not. It is often used in cases where the naked eye cannot truly tell if a ball went past the goal line. Different sports use varying sensor tools. For example, cricket's Hawk-Eye technology analyzes sound to determine if the ball smashed into the bat before it was caught. Hawk-Eye is also used to determine where the ball would have landed if it had not hit a player's foot. This establishes whether the ball was unfairly blocked from striking the wicket. On the other hand, tennis sensor tools use laser beams to determine whether the tennis ball went out of bounds or not. Sensor technologies help to accurately determine the position of the ball at a given time.

#### Timing Systems

Nobody uses a stopwatch when timing a race anymore. This means that differences in reaction time no longer affect the precision and consistency of a racing event. In many races today, the starter pistol is linked to a clock. Once the pistol goes off, the clock immediately starts timing the race. On the other hand, swimming uses a touch pad placed at the finish lanes as well as wearable inertial sensors to determine performance. Many racing events also use laser beams and photographs to determine winners.

The results of timing systems are often provided to the nearest thousand of a second. However, world and Olympic records are only recorded to the nearest hundredth of a second. This technique was established to eliminate insignificant errors.

#### Equipment Development

In sports, safety is a key factor. Equipment manufacturers have developed devices to reduce injuries on athletes. In the 2010 season, special helmets were used in the National Football League after several players experienced concussion injuries. The helmets were designed to absorb shock caused by collisions and protect athletes from suffering head and neck injuries. Similar technology is being used for games like auto racing and hockey to enhance the safety of participants.

Technology has taken over today's modern world. Many professional and amateur sports bodies have embraced new technologies featuring certain gears and gadgets to protect athletes and make it easier to officiate the games.

#### Hawk-Eye Technology

Just as it sounds, this technology uses 6-7 high-end cameras situated above the field of play (e.g. a birds-eye view) to analyze the flight and trajectory of an object being used in sports competition. Most

commonly used in tennis, cricket, rugby and volleyball, Hawk-Eye Technology has been in use since 2006 in tennis and is more accurate than a judges eye.

#### **Benefits of this technology:**

- Hawk-Eye technology helps to take an error-free decision in cricket, lawn tennis, rugby league, football, and baseball.
- This technology has reduced the criticism of the players and spectators about the decision of the match referee.
- By analyzing the movement of the balls through this technology, the umpire can take an error-free decision quickly when the game is going on.

The only downside of Hawk-Eye technology is that we haven't been introduced to the next John McEnroe. Without terrible calls by chair umpires, there are no more wildly entertaining tantrums and racket throwing.

#### **HANS device**

A vast majority of technological advancements in sports revolve around safety, and the HANS (Head and Neck Support) device used in motorsports is one of the most famous.

At the time of Dale Earnhardt's death on the track at the Daytona 500 due to head and neck trauma, Thomas Gideon, senior director of Safety, Research & Development of NASCAR, claims that only about six drivers were wearing a HANS device. That moment changed the sports as more drivers adopted this technology geared towards saving their lives in the event of a tragic crash.

#### **Details of a HANS device:**

- U-shaped device which is placed behind the neck and its two arms are placed over the pectoral muscles of the chest
- It is only connected to the helmet by two anchors on each side and supported by the shoulders
- A HANS device keeps the head from whipping forwards and backward in a crash, while also preventing excessive twisting movements.

#### **Video Technology**

To remind just how long ago 1980 was – The 'Miracle on Ice' was not broadcast live. The epic Olympic hockey battle between USA and USSR, won in epic fashion by the US, was on tape delay, ending over an hour before the TV broadcast started. There is no way that would happen in today's sports era.

Everything is live, and not just on your home TV, but on your smartphone, tablet, and the overhead screen in your local church. In today's sports world you are never far from live access.

But it isn't just access that has adapted to the times, it is features. Instant replay, 1st and ten lines, pitch trackers, HD TV sets, DVR's – the experience of watching sports has changed dramatically for the better.

#### **Sports skills**

Fundamental movement skills are basic movements such as throwing, kicking, running, jumping, hopping and catching. Fundamental sport skills are these movement skills applied to a sport situation: for example, kicking a soccer ball, running a sprint, jumping up for a basketball rebound, catching a baseball.

By mastering fundamental movement skills, children will find it easier to learn fundamental sport skills. The combination of these two types of skills forms the basis of physical literacy and opens the door to new sports and physical activities and helps build a better, more confident athlete and person.

#### **Planning the Movement**

- Timing the movement
- Think/predict what to do
- React to a situation if different from what you predicted Bilateral coordination
- To use both sides of the body together
- Can be a symmetrical movement (star jumps)
- Can be an alternating movement (walking)

#### **Hand Eye coordination**

- Eyes guide the hands to complete movement (catching, striking)

Coordinated movements start in your large muscles groups and move into your smaller muscle groups working together for a fluid motion.

**Eyes**

- Make sure you are always watching the ball the entire time.

**Prepare your body**

- Feet shoulder width apart
- Weight on back foot
- Body is sideways with shoulder facing the ball
- Bat, stick, club or racket reaches far for backswing

**Forward motion**

- Feet move the body in line with the ball
- Rotate hips and trunk as bat, club, stick or racket is brought forward
- Weight transfers from back foot to front foot
- Bat, racket, club, or stick strikes the object

**Follow through**

- Full follow through along the swing path

Seeing what direction the ball flies after the strike can give hints to error in technique or stance.

**Conclusion**

Sports as a special social phenomenon, has become a modern technology accessories. The word of sport is changing because of technology, as technology plays large roles in daily lives, it also play a large role in changing the body. Thus, technology continues to change the way sports are played, how injuries are treated, what kinds of sports are played and enhances performance outcomes. Sporting technologies are man-made means developed to reach human interests or goals in or relating to a particular sport. It is a technical means by which athletes attempt to improve their training and competitive surroundings in order to enhance their overall athletic performance.

## New Gadgets And Its Benefits For Sportsman

Dr. Anil A. Deshmukh

Prof. Rajabhau Deshmukh Kala Mahavidyalay Nangaon Khandeshwar Dist. Amravati

### Abstract

*Sport includes all forms of competitive physical activity or games which, through casual or organised participation, at least in part aim to use, maintain or improve physical ability and skills while providing enjoyment to participants, and in some cases, entertainment for spectators. Hundreds of sports exist, from those between single contestants, through to those with hundreds of simultaneous participants, either in teams or competing as individuals.*

### Introduction

Sport in India refers to the large variety of games played in India, ranging from tribal games to more mainstream sports such as cricket, badminton and football. India's diversity of culture, people and tribe as well as its colonial legacy is reflected in the wide variety of sporting disciplines in the country. Sports games involve physical and tactical challenges, and test the player's precision and accuracy. Most sports games attempt to model the athletic characteristics required by that sport, including speed, strength, acceleration, accuracy, and so on. As with their respective sports, these games take place in a stadium or arena with clear boundaries. Sports games often provide play-by-play and color commentary through the use of recorded audio.

Sports games sometimes make use of different modes for different parts of the game. This is especially true in games about American football such as the Madden NFL series, where executing a pass play requires six different gameplay modes in the span of approximately 45 seconds. Sometimes, other sports games offer a menu where players may select a strategy while play is temporarily suspended.

### Technologies in sports

#### Computer vision

As the sports ecosystem is putting increasingly more focus on the fan experience, AI plays an essential role in shaping a relevant and impactful customer journey for sports viewers at home and in arenas.

Computer vision, the ability of a machine to recognize, analyze and contextualize visual data, is one of the most influential and compelling types of AI for sports. The market for computer vision systems is projected to reach \$25.32 billion by 2023, at a CAGR of 47.54% between 2018 and 2023, according to ReportBuyer. Many professional venues today are already equipped with high-resolution and motion tracking cameras that track hundreds of movements and data points during games and produce automated video highlights, but the full potential of this technology is yet to be explored.

#### Performance tracking, wearables and more

Smart wearables, tracking sensors and other connected devices have been gaining momentum in the sports industry for a few years. Today, Catapult's chest-strap is used by over 400 sports organizations across the globe and every uniformed NFL player wears shoulder pads with Zebra sensors. The reason for such sweeping adoption is the immense volume of performance and health data these devices supply to athletes, coaches, and sports professionals. The speed of adoption shows no signs of slowing, and the technology is evolving beyond tracking chips that are integrated into sports equipment or traditional wearables such as smart watches and activity trackers.

As sensors become smaller and all but invisible, they can be woven into the very fabric of equipment or clothing. **Wearable technology** is now expanding in the direction of smart clothing and electronic textiles, such as the self-heating jackets that the U.S. team wore at the Winter Olympics in South Korea, or Nike's Hyper Adapt shoes with self-tying laces. Tech giants such as Microsoft, Google, and even Apple are all developing smart fabric and interactive garments, which means we will likely see new products on the market soon.

#### Prosthetic Devices for Disabled Athletes

What used to be the end of the story is now just a beginning of a new one. People with disabilities, or lost limbs, never had a chance to compete, but with the advancement of prosthetic technology more and more physically disabled are competing like before.

Dr. Rory A. Cooper is a leader in developing cutting-edge prosthetics. As the Director of Human Engineering Resources Laboratories at the University of Pittsburgh, Dr. Cooper places athletes in body suits embedded with motion sensors. The athletes then go through a series of drills based around athletic

movement, the cameras and the wearable tech report back on their movements. The prosthetic design process begins after this motion study, which in the end creates a custom.

### Wearable Computers

Another advancement in the world of safety and monitoring, wearable computers allow for real-time tracking of an athlete's health. Since their creation, the incidents of dehydration, heart attacks and worse, have dramatically decreased.

When Minnesota Vikings offensive lineman Korey Stringer died of heat stroke during training camp in 2001, companies began to investigate ways to monitor health in real-time and stave off tragedies like this. Wearable tech has made a difference in the lives of many athletes, by supervising pulse rate, hydration, and temperature through its wireless and microscopic health monitoring system.

### Sports skills

#### Catching

##### Eyes

- Make sure you are always watching the ball
- Keep your eyes open at all times

##### Hands

- Catch the ball with your hands (young kids may scoop with arms)
- Out and ready for the catch
- Hands and fingers are relaxed
- Slightly cupped hands to catch the object
- Close hands and fingers to grip the ball during catch
- Bend elbows to absorb throw

##### Feet

- Feet move the body in line with the ball being caught.

Keep your eye on the prize and the prize is the ball.

##### Hoping

#### Take off

- Head up
- Eyes look in direction of the hop or forward
- Stand on one foot and bend knee
- Knee of other leg bent and foot off ground
- Straighten the leg you are standing on to push off
- Push off from the ball/midsection of the foot

#### Flight

- Keep knee of raised leg bent
- Arms are bent and swing forward and up
- Leg and arms swing in rhythm with the hop

#### Landing

- On one foot
- Support knee bends for a soft, absorbed landing
- Movement starts again from that bend

Hopping is a smooth nonstop movement that is quiet.

### Conclusion

Sports as a special social phenomenon, has become a modern technology accessories. The word of sport is changing because of technology, as technology plays large roles in daily lives, it also play a large role in changing the body. Thus, technology continues to change the way sports are played, how injuries are treated, what kinds of sports are played and enhances performance outcomes. Sporting technologies are man-made means developed to reach human interests or goals in or relating to a particular sport.

## Effect Of Technologies On Sports And Various Skills

Dr. Umesh Rathi

Arts And Science College Kura, Dist Amravati

### Abstract

*Sport and exercise science like most areas of life have been affected greatly by technological advancements. It is difficult to imagine modern sports and various sub-disciplines of exercise science without technologies. The use of technologies is, without exception, tainted with frustration and ambivalence. Paradoxically, it is the omnipresence of technology that has contributed most to people's inability to fully grasp the scope and depth of its influence and also uncertainty as to what role various technological advancements play in sports. Indeed, the influx of sport technologies has profoundly changed the landscape of sport and exercise science. Importantly, technology has in many ways changed what we think of as the athletic body. Therefore, this paper examines the impact of technology on sport performance, considering the theories of technology and quest for improved performance, types of sport technologies, the advantages and disadvantages of sport technologies in modern day sports. It is recommended that those managing, handling and using sport must be equipped to make wise choices on the type and use of sport technologies that would assist in the right performance.*

### Introduction

Sport world today is getting technological by combining natural athletic talent with advanced analytics and artificial intelligent to produce the best possible outcomes on the playing field of sports. Sport excite people as a triumph of human effort, with Barr (2016) stating that behind the scenes are a number of things that go into that triumph and at the top is technology. Technology has been utilized in sport for many years in various forms and play particularly vital role especially for the elite sport. Numerous attempts to define technology have yielded such an array of descriptions that one may resigned to the idea that technology is simply not definable. On the one hand, it is synonymous with science and rational thought, encompassing every little gadget ever held in hands.

### Sports technology

Technology is changing the face of modern sports, sports psychology and coaching. State-of-the-art technologies are used to optimize performance in sports as diverse as cycling, speed-skating, swimming, golf, skiing, surfing, football/soccer ball, tennis racket and ball, running, facilities and many more. Technology in sport today is found in countless forms with each innovation has potentially positive and beneficial outcomes. Understanding the implications of sport technologies involve basic typology used in classifying, these are done in six types of sport technologies though not mutually exclusive, in some cases same technologies could fit into multiple categories of many types of sport technologies help to obtain a better perspective on which technological options athletes eventually have access to and impact on sport performance.

### Computer vision

As the sports ecosystem is putting increasingly more focus on the fan experience, AI plays an essential role in shaping a relevant and impactful customer journey for sports viewers at home and in arenas.

Computer vision, the ability of a machine to recognize, analyze and contextualize visual data, is one of the most influential and compelling types of AI for sports. The market for computer vision systems is projected to reach \$25.32 billion by 2023, at a CAGR of 47.54% between 2018 and 2023, according to ReportBuyer. Many professional venues today are already equipped with high-resolution and motion tracking cameras that track hundreds of movements and data points during games and produce automated video highlights, but the full potential of this technology is yet to be explored.

A brilliant example of what computer vision can do for sports came from a California-based company called GumGum, which applied its patented technology to sponsorship valuation by tracking and analyzing branding across sports footage and social media mentions. By providing almost instantaneous ROI metrics, GumGum's computer vision empowers rights holders and brands to reevaluate their sponsorship spending in the digital economy.

### Video Technology

To remind you just how long ago 1980 was – The 'Miracle on Ice' was not broadcast live. The epic Olympic hockey battle between USA and USSR, won in epic fashion by the US, was on tape delay, ending over an hour before the TV broadcast started.

There is no way that would happen in today's sports era.

Everything is live, and not just on your home TV, but on your smartphone, tablet, and the overhead screen in your local church. In today's sports world you are never far from live access.

But it isn't just access that has adapted to the times, it is features. Instant replay, 1st and ten lines, pitch trackers, HD TV sets, DVR's – the experience of watching sports has changed dramatically for the better.

### **Wearable Computers**

Another advancement in the world of safety and monitoring, wearable computers allow for real-time tracking of an athlete's health. Since their creation, the incidents of dehydration, heart attacks and worse, have dramatically decreased.

When Minnesota Vikings offensive lineman Korey Stringer died of heat stroke during training camp in 2001, companies began to investigate ways to monitor health in real-time and stave off tragedies like this. Wearable tech has made a difference in the lives of many athletes, by supervising pulse rate, hydration, and temperature through its wireless and microscopic health monitoring system.

### **Sports skills**

#### **Planning the Movement**

- Timing the movement
- Think/predict what to do
- React to a situation if different from what you predicted

#### **Bilateral coordination**

- To use both sides of the body together
- Can be a symmetrical movement (star jumps)
- Can be an alternating movement (walking)

#### **Hand Eye coordination**

- Eyes guide the hands to complete movement (catching, striking)

Coordinated movements start in your large muscles groups and move into your smaller muscle groups working together for a fluid motion.

### **Throwing**

#### **Prepare your body**

- Head up eyes on target
- Stands with side of body facing the target
- Show ball to your toes (start with ball low)

#### **Backswing (1. nose 2..shows)**

- Bring the ball to your nose (ball up beside head)
- Show to someone behind you (stretch arm far back)

#### **Forward Motion (3. throws)**

- Step with foot opposite of throwing arm
- Arm moves forward forcefully
- Shoulder and hip follow the arm

#### **Release**

- Let the ball go in the direction of target

#### **Follow through**

- Throwing arm continues to move across your body

The back swing and follow through of arm and body are what gives a throw its power, distance, and speed.

### **Conclusion**

Sports as a special social phenomenon, has become a modern technology accessories. The word of sport is changing because of technology, as technology plays large roles in daily lives, it also play a large role in changing the body. Thus, technology continues to change the way sports are played, how injuries are treated, what kinds of sports are played and enhances performance outcomes. Sporting technologies are man-made means developed to reach human interests or goals in or relating to a particular sport.

## Innovations In Sports And Improvement In Sports Skills

**Prof. Dilip More**

Smt. Kokilabai Gawande Mahila Mahavidyalay Daryapur

### Abstract

*Sport includes all forms of competitive physical activity or games which, through casual or organised participation, at least in part aim to use, maintain or improve physical ability and skills while providing enjoyment to participants, and in some cases, entertainment for spectators. Hundreds of sports exist, from those between single contestants, through to those with hundreds of simultaneous participants, either in teams or competing as individuals. In certain sports such as racing, many contestants may compete, simultaneously or consecutively, with one winner; in others, the contest is between two sides, each attempting to exceed the other. Some sports allow a "tie" or "draw", in which there is no single winner; others provide tie-breaking methods to ensure one winner and one loser.*

### Introduction

Sport and exercise science like most areas of life have been affected greatly by technological advancements. It is difficult to imagine modern sports and various sub-disciplines of exercise science without technologies. The use of technologies is, without exception, tainted with frustration and ambivalence. Paradoxically, it is the omnipresence of technology that has contributed most to people's inability to fully grasp the scope and depth of its influence and also uncertainty as to what role various technological advancements play in sports. Indeed, the influx of sport technologies has profoundly changed the landscape of sport and exercise science. Importantly, technology has in many ways changed what we think of as the athletic body. Therefore, this paper examines the impact of technology on sport performance, considering the theories of technology and quest for improved performance, types of sport technologies, the advantages and disadvantages of sport technologies in modern day sports. It is recommended that those managing, handling and using sport must be equipped to make wise choices on the type and use of sport technologies that would assist in the right performance.

### Technology in sports

#### Implement Technologies

It includes equipment that athletes use or that they kick, hurl or otherwise propel. Other examples include football/soccer helmets equipped with warning devices and radios; shark suits that allow swimmers to move efficiently slice through the water and high-tech running shoes, golf clubs and tennis rackets. The interesting controversy involving these kinds of technologies is the use of fish-finding computers in sport fishing. This technology uses tools (pedometer or balance board), media (video, audio, or both), and social interaction (playing with another person) to persuade individuals to adopt the behaviour without their actually knowing it.

#### Database Technologies

It involves computer innovations that allows athletes and coaches to know everything they need to know about their opponents and themselves. Database programmes have greatly affected the way that many and most professional coaches and players do their business. Informational feedback technologies (a Nike GPS sports watch; a Polar heart rate monitor) allow individual athletes to continuously track their progress on important physiological and performance parameters. Even when not training for an Olympic gold medal, technology can play a positive and supporting role, helping people to get motivated in adhering to a healthy exercise routine, or in rehabilitating after injury. Competitive level of modern sports, especially high level of sport performance has been close to the limits of natural conditions of mankind, the idea of using the natural advantages, original training methods, to limit the movement of human beings, has long been a dream. The large number of computer technology, biological engineering, new materials and energy technology, information technology, and theory of modern science and technology have been widely used in sports fields, making the face of sports and sports training environment greatly changed and improved, training methods updated, site equipment improved, greatly improved the level of competitive sport, the wide range of functions and effects of sports therefore has been fully exhibited.

#### Performance tracking, wearables and more

Smart wearables, tracking sensors and other connected devices have been gaining momentum in the sports industry for a few years. Today, Catapult's chest-strap is used by over 400 sports organizations across the globe and every uniformed NFL player wears shoulder pads with Zebra sensors. The reason for such sweeping adoption is the immense volume of performance and health data these devices supply to athletes, coaches, and sports professionals. The speed of adoption shows no signs of slowing, and the technology is

evolving beyond tracking chips that are integrated into sports equipment or traditional wearables such as smart watches and activity trackers.

### Hawk-Eye Technology

Just as it sounds, this technology uses 6-7 high-end cameras situated above the field of play (e.g. a birds-eye view) to analyze the flight and trajectory of an object being used in sports competition. Most commonly used in tennis, cricket, rugby and volleyball, Hawk-Eye Technology has been in use since 2006 in tennis and is more accurate than a judge's eye.

#### Benefits of this technology:

- Hawk-Eye technology helps to take an error-free decision in cricket, lawn tennis, rugby league, football, and baseball.
- This technology has reduced the criticism of the players and spectators about the decision of the match referee.
- By analyzing the movement of the balls through this technology, the umpire can take an error-free decision quickly when the game is going on.

The only downside of Hawk-Eye technology is that we haven't been introduced to the next John McEnroe. Without terrible calls by chair umpires, there are no more wildly entertaining tantrums and racket throwing.

### Sports skills

#### Jumping

##### Take off

- Eyes looking in direction of jump (forward or up)
- Take off from one or both feet
- Bend knees
- Swing arms back behind body
- Push up from heel to toes
- Forceful forward motion, swing arms upward

##### Flight

- Legs straighten in the air
- Control your body movement

##### Landing

- Keep both feet pointing straight for landing
- Land on balls of both feet
- Knees bent and directly over toes to absorb landing
- Control landing with no more than one small step

#### Throwing

##### Prepare your body

- Head up eyes on target
- Stands with side of body facing the target
- Show ball to your toes (start with ball low)

##### Backswing (1. nose 2..shows)

- Bring the ball to your nose (ball up beside head)
- Show to someone behind you (stretch arm far back)

##### Forward Motion (3. throws)

- Step with foot opposite of throwing arm
- Arm moves forward forcefully
- Shoulder and hip follow the arm

##### Release

- Let the ball go in the direction of target

##### Follow through

- Throwing arm continues to move across your body

### Conclusion

Sports as a special social phenomenon, has become a modern technology accessories. The word of sport is changing because of technology, as technology plays large roles in daily lives, it also play a large role in changing the body. Thus, technology continues to change the way sports are played, how injuries are treated, what kinds of sports are played and enhances performance outcomes. Sporting technologies are man-made means developed to reach human interests or goals in or relating to a particular sport.

## Changes In Sports Using Technological Devices And Skills

Prof.Dr. Santosh P. Tayde

Shri. Ganesh Arts College Kumbhari, Dist. Akola

### Abstract

*Sport is generally recognised as system of activities which are based in physical athleticism or physical dexterity, with the largest major competitions such as the Olympic Games admitting only sports meeting this definition, and other organisations such as the Council of Europe using definitions precluding activities without a physical element from classification as sports. However, a number of competitive, but non-physical, activities claim recognition as mind sports. The International Olympic Committee (through ARISF) recognises both chess and bridge as bona fide sports, and SportAccord, the international sports federation association, recognises five non-physical sports: bridge, chess, draughts (checkers), Go and xiangqi, and limits the number of mind games which can be admitted as sports.*

*Sport is usually governed by a set of rules or customs, which serve to ensure fair competition, and allow consistent adjudication of the winner. Winning can be determined by physical events such as scoring goals or crossing a line first. It can also be determined by judges who are scoring elements of the sporting performance, including objective or subjective measures such as technical performance or artistic impression.*

### Introduction

Sports science is a widespread academic discipline, and can be applied to areas including athlete performance, such as the use of video analysis to fine-tune technique, or to equipment, such as improved running shoes or competitive swimwear. Sports engineering emerged as a discipline in 1998 with an increasing focus not just on materials design but also the use of technology in sport, from analytics and big data to wearable technology. In order to control the impact of technology on fair play, governing bodies frequently have specific rules that are set to control the impact of technical advantage between participants. For example, in 2010, full-body, non-textile swimsuits were banned by FINA, as they were enhancing swimmers' performances.

One of the most definitive tests for human athleticism is sports, but this does not mean that technology cannot facilitate it. When administering and officiating sports, technology can succeed where humans may not. This guarantees fair judgment of the performance and ensures that athletes win fairly. Here are five exciting new technologies being used in the sports industry today.

### Technology in sports

The world of sport is continually changing over the years, and the use of technology is just one of those areas that has made an impact on many sports in the modern day. See the annual sports technology awards for the latest technology ideas in the world of sport.

Making changes to a sport, with the inclusion of new technologies, has often caused controversy. One criticism of the use of technology is that it can slow down the speed of the game, but on the other hand for many people it makes watching it more enjoyable to see the correct decisions being made. If a new technology is available, and shown to be accurate, then it should be used so that the correct decisions can be made. It is only fair to the players and teams that the right decisions are made.

Most professional sports in the United States have long used instant replay and other high-tech aids to help referees make the right call. Gridiron has used video replay systems to check referees' calls for many years. Basketball referees use replay systems to make sure players are shooting within the time allotted by the shot clock. In international cricket, the third umpire has been used, one sitting off the ground with access to TV replays of certain situations (such as disputed catches and boundaries) to advise the central umpires. The umpires out on the field are in communication via wireless technology with the other umpire. The third umpire is also asked to adjudicate on run out decisions, which he makes without consultation with the two central umpires. One sport that has resisted the use of high-tech assistance until very recently is soccer/football. Replays could be used to decide off-side decisions, whether a ball passes over the goal line, and clarify penalty decisions.

### Hawk-Eye Technology

Hawk-eye is the name of a computer and camera system which traces a ball's trajectory. It is being used in international cricket and tennis, and many other sports are also looking at making use of this technology. The system is also being trialled in soccer as part of the goal line assessment. The Premier League of Football in the UK has agreed to the introduction of goal-line sensors after being given approval by football's rule-makers. The system being developed by the UK company Hawk-Eye, would give a definitive

decision on whether the ball had crossed the line. The Hawk Eye uses a camera taking 600 frames a second on the goal-line, with the information is analyzed by computer and sent to the referee's headset or a device on his wrist. In 2015, Hawkeye technology was also used by rugby officials at the 2015 Rugby World Cup, to improve decision-making by the television match official (TMO) and also assist with player safety. In this case it is enhanced video review, rather than the ball tracking technology as used in other sports.

### **Wearable Computers**

Another advancement in the world of safety and monitoring, wearable computers allow for real-time tracking of an athlete's health. Since their creation, the incidents of dehydration, heart attacks and worse, have dramatically decreased.

When Minnesota Vikings offensive lineman Korey Stringer died of heat stroke during training camp in 2001, companies began to investigate ways to monitor health in real-time and stave off tragedies like this. Wearable tech has made a difference in the lives of many athletes, by supervising pulse rate, hydration, and temperature through its wireless and microscopic health monitoring system.

### **Prosthetic Devices for Disabled Athletes**

What used to be the end of the story is now just a beginning of a new one. People with disabilities, or lost limbs, never had a chance to compete, but with the advancement of prosthetic technology more and more physically disabled are competing like before.

Dr. Rory A. Cooper is a leader in developing cutting-edge prosthetics. As the Director of Human Engineering Resources Laboratories at the University of Pittsburgh, Dr. Cooper places athletes in body suits embedded with motion sensors. The athletes then go through a series of drills based around athletic movement, the cameras and the wearable tech report back on their movements. The prosthetic design process begins after this motion study, which in the end creates a custom prosthetic that moves with their body.

## **Sports skills**

### **Coordination**

#### **Planning the Movement**

- Timing the movement
- Think/predict what to do
- React to a situation if different from what you predicted

#### **Bilateral coordination**

- To use both sides of the body together
- Can be a symmetrical movement (star jumps)
- Can be an alternating movement (walking)

#### **Hand Eye coordination**

- Eyes guide the hands to complete movement (catching, striking)

Coordinated movements start in your large muscles groups and move into your smaller muscle groups working together for a fluid motion.

### **Running**

#### **Head**

- Head up
- Let your eyes lead you

#### **Arms**

- Arm swing forward and backward
- Not across your body

#### **Torso**

- Running tall, stretch yourself up
- Don't bend

#### **Legs**

- High knee lift for short distance fast running
- Smaller knee lift, shorter strides for distance

#### **Ankles and Feet**

- Feet should land under your body
- Don't slap the ground, running is quiet.

Take breaks and have water on hand.

## **Conclusion**

The use of technological applications is now widespread across many major sports science disciplines and the adoption of these tools to gain a 'competitive advantage' is an increasingly important feature of elite sports. These innovations have shaped the way data is collected and processed, how information is relayed

between coaches and staff or to athletes, and has had a big impact on the way in which athletes are monitored in the daily training and competition environments. Today's sports became more better due to the technologies and knowing sports skills.

## Role Of Technologies And Skills For Better Development In Sports

**Prof. Rahul Radke**

Smt. Shakuntalabai Dhabekar Mahavidyalay  
Karanja(Lad),Dist.Washim

### Abstract

*The use of technological applications is now widespread across many major sports science disciplines and the adoption of these tools to gain a 'competitive advantage' is an increasingly important feature of elite sports. These innovations have shaped the way data is collected and processed, how information is relayed between coaches and staff or to athletes, and has had a big impact on the way in which athletes are monitored in the daily training and competition environments. This review highlights and provides examples of some of the latest technologies for data collection and processing, feedback methods and training tools.*

### Introduction

Technology plays an important part in modern sport. With it being a necessary part of some sports (such as motorsport), it is used in others to improve performance. Some sports also use it to allow off-field decision making. Sport and exercise science like most areas of life have been affected greatly by technological advancements. It is difficult to imagine modern sports and various sub-disciplines of exercise science without technologies. The use of technologies is, without exception, tainted with frustration and ambivalence. Paradoxically, it is the omnipresence of technology that has contributed most to people's inability to fully grasp the scope and depth of its influence and also uncertainty as to what role various technological advancements play in sports.

### Technology in sports

Most professional sports in the United States have long used instant replay and other high-tech aids to help referees make the right call. Gridiron has used video replay systems to check referees' calls for many years. Basketball referees use replay systems to make sure players are shooting within the time allotted by the shot clock. In international cricket, the third umpire has been used, one sitting off the ground with access to TV replays of certain situations (such as disputed catches and boundaries) to advise the central umpires. The umpires out on the field are in communication via wireless technology with the other umpire. The third umpire is also asked to adjudicate on run out decisions, which he makes without consultation with the two central umpires. One sport that has resisted the use of high-tech assistance until very recently is soccer/football. Replays could be used to decide off-side decisions, whether a ball passes over the goal line, and clarify penalty decisions.

### Computer Software

There are numerous software packages that are designed for fitness and nutrition professionals to organize data and produce reports, ideal for visitors to this site. Here are a couple of packages that come recommended by Topend Sports.

- Team Beep Test — the most versatile and useful software for conducting and recording results of the beep / beep test, with results recorded directly onto your computer.
- BodyByte — a universal standalone computer software program specially developed to comprehensively organize and manage all the information associated with nutrition, training and fitness.

### Ingestible Thermometer Pills

If you are an athlete, it is important to supervise visceral organs, temperature and heart rate. But it is not always possible to check it manually. To observe the body temperature accurately, some trainers are using indigestible pills.

When you swallow a pill, it moves around the gastrointestinal tract and transmits vital information of the body to medical personnel. So if there is any problem in your body, it can be solved before any accident.

It will help to minimize death from heat exhaustion which is the second most common reason for athlete fatalities.

### Wearable Computers

Another advancement in the world of safety and monitoring, wearable computers allow for real-time tracking of an athlete's health. Since their creation, the incidents of dehydration, heart attacks and worse, have dramatically decreased.

When Minnesota Vikings offensive lineman Korey Stringer died of heat stroke during training camp in 2001, companies began to investigate ways to monitor health in real-time and stave off tragedies like

this. Wearable tech has made a difference in the lives of many athletes, by supervising pulse rate, hydration, and temperature through its wireless and microscopic health monitoring system.

### Sports skills

#### Dynamic Balance

To control your body while it moves around in a space.

#### Step action

- Step with right then left like walking
- Do not use a shuffle step

#### Eyes and head

- Stable and facing forward

#### Trunk

- Core stability is important

#### Arms

- There should be no excessive movement

Adjust height levels of equipment (low to high) and width of equipment (wide to narrow) to progress this skill.

#### Rhythm

##### A body in Motion

- Helps kids learn to move though their environment in a smooth flowing and graceful way assessing the skill
- It is hard to break rhythm down into a specific body movements or pattern, it should be a part of all movement
- It is important to offer activities in programs like dance, music play, skipping, hopscotch, etc. that work on rhythm
- Activities should allow children to move in patterns, changing the shape of their bodies, move to a beat/music and move around each other skilfully developing Rhythm helps children perform many fundamental movements easier and with more confidence.

#### Kicking

A good strong kick comes from the hip

#### Eyes

- On the ball during contact
- Will move from target to ball

#### Prepare

- Ball is in front of kicker
- Kicker takes a step and plants non kicking foot beside the ball

#### Forward motion

- Leg comes forward hip and knee slightly bent
- Ball is contacted with the laces not toe
- Knee should be over ball

#### Follow through

- Leg straightens and follows through in the direction that the ball is going

Focus on the full swing of the leg don't slow down before impact which means have a good follow through.

#### Conclusion

Sports as a special social phenomenon, has become a modern technology accessories. The word of sport is changing because of technology, as technology plays large roles in daily lives, it also play a large role in changing the body. Thus, technology continues to change the way sports are played, how injuries are treated, what kinds of sports are played and enhances performance outcomes. Sporting technologies are man-made means developed to reach human interests or goals in or relating to a particular sport.

## Role Of Technologies And Skills For Better Development In Sports

Prof. Vinod Kapile

R.G. Rathod Arts And Science College Murtizapur, Dist Akola

### Abstract

*Sport and exercise science like most areas of life have been affected greatly by technological advancements. It is difficult to imagine modern sports and various sub-disciplines of exercise science without technologies. The use of technologies is, without exception, tainted with frustration and ambivalence. Paradoxically, it is the omnipresence of technology that has contributed most to people's inability to fully grasp the scope and depth of its influence and also uncertainty as to what role various technological advancements play in sports. Indeed, the influx of sport technologies has profoundly changed the landscape of sport and exercise science. Importantly, technology has in many ways changed what we think of as the athletic body. Therefore, this paper examines the impact of technology on sport performance, considering the theories of technology and quest for improved performance, types of sport technologies, the advantages and disadvantages of sport technologies in modern day sports. It is recommended that those managing, handling and using sport must be equipped to make wise choices on the type and use of sport technologies that would assist in the right performance.*

### Introduction

Sports science is a widespread academic discipline, and can be applied to areas including athlete performance, such as the use of video analysis to fine-tune technique, or to equipment, such as improved running shoes or competitive swimwear. Sports engineering emerged as a discipline in 1998 with an increasing focus not just on materials design but also the use of technology in sport, from analytics and big data to wearable technology. In order to control the impact of technology on fair play, governing bodies frequently have specific rules that are set to control the impact of technical advantage between participants. For example, in 2010, full-body, non-textile swimsuits were banned by FINA, as they were enhancing swimmers' performances.

### Technology in sports

Sport world today is getting technological by combining natural athletic talent with advanced analytics and artificial intelligent to produce the best possible outcomes on the playing field of sports. Sport excite people as a triumph of human effort, with Barr (2016) stating that behind the scenes are a number of things that go into that triumph and at the top is technology. Technology has been utilized in sport for many years in various forms and play particularly vital role especially for the elite sport. Numerous attempts to define technology have yielded such an array of descriptions that one may resigned to the idea that technology is simply not definable. On the one hand, it is synonymous with science and rational thought, encompassing every little gadget ever held in hands. Cave and Miller (2015) states that technology plays an increasing role in assisting professional athletes, amateur runners and armchair fans to engage in the sport.

### Computer Software

There are numerous software packages that are designed for fitness and nutrition professionals to organize data and produce reports, ideal for visitors to this site. Here are a couple of packages that come recommended by Topend Sports.

- Team Beep Test — the most versatile and useful software for conducting and recording results of the beep / beep test, with results recorded directly onto your computer.
- BodyByte — a universal standalone computer software program specially developed to comprehensively organize and manage all the information associated with nutrition, training and fitness.

### HANS device

A vast majority of technological advancements in sports revolve around safety, and the HANS (Head and Neck Support) device used in motorsports is one of the most famous.

At the time of Dale Earnhardt's death on the track at the Daytona 500 due to head and neck trauma, Thomas Gideon, senior director of Safety, Research & Development of NASCAR, claims that only about six drivers were wearing a HANS device. That moment changed the sports as more drivers adopted this technology geared towards saving their lives in the event of a tragic crash.

### Details of a HANS device:

- U-shaped device which is placed behind the neck and its two arms are placed over the pectoral muscles of the chest
- It is only connected to the helmet by two anchors on each side and supported by the shoulders
- A HANS device keeps the head from whipping forwards and backward in a crash, while also preventing excessive twisting movements

**Video Technology**

To remind you just how long ago 1980 was – The ‘Miracle on Ice’ was not broadcast live. The epic Olympic hockey battle between USA and USSR, won in epic fashion by the US, was on tape delay, ending over an hour before the TV broadcast started.

There is no way that would happen in today’s sports era.

Everything is live, and not just on your home TV, but on your smartphone, tablet, and the overhead screen in your local church. In today’s sports world you are never far from live access.

But it isn’t just access that has adapted to the times, it is features. Instant replay, 1st and ten lines, pitch trackers, HD TV sets, DVR’s – the experience of watching sports has changed dramatically for the better.

**Wearable Computers**

Another advancement in the world of safety and monitoring, wearable computers allow for real-time tracking of an athlete’s health. Since their creation, the incidents of dehydration, heart attacks and worse, have dramatically decreased.

When Minnesota Vikings offensive lineman Korey Stringer died of heat stroke during training camp in 2001, companies began to investigate ways to monitor health in real-time and stave off tragedies like this. Wearable tech has made a difference in the lives of many athletes, by supervising pulse rate, hydration, and temperature through its wireless and microscopic health monitoring system.

**Sports skills****Coordination****Description**

Getting different parts of your body to work together to move in the pattern wanted.

**Planning the Movement**

- Timing the movement
- Think/predict what to do
- React to a situation if different from what you predicted

**Bilateral coordination**

- To use both sides of the body together
- Can be a symmetrical movement (star jumps)
- Can be an alternating movement (walking)

**Hand Eye coordination**

- Eyes guide the hands to complete movement (catching, striking)

Coordinated movements start in your large muscles groups and move into your smaller muscle groups working together for a fluid motion.

**Rhythm****A body in Motion**

- Helps kids learn to move though their environment in a smooth flowing and graceful way

**Assessing the skill**

- It is hard to break rhythm down into a specific body movements or pattern, it should be a part of all movement
- It is important to offer activities in programs like dance, music play, skipping, hopscotch, etc. that work on rhythm
- Activities should allow children to move in patterns, changing the shape of their bodies, move to a beat/music and move around each other skillfully

Developing Rhythm helps children perform many fundamental movements easier and with more confidence.

**Conclusion**

The word sport is changing because of technology, as technology plays large roles in daily lives, it also play a large role in changing the body. Thus, technology continues to change the way sports are played, how injuries are treated, what kinds of sports are played and enhances performance outcomes. Sporting technologies are man-made means developed to reach human interests or goals in or relating to a particular sport.

## Technological Changes In Sports And Skills For Development

**Prof. Chandrashekhar Ingole**

Ramkrushna Mahavidyalay Darapur, Dist.Amravati

### Abstract

*Technology plays an important part in modern sport. With it being a necessary part of some sports (such as motorsport), it is used in others to improve performance. Some sports also use it to allow off-field decision making. Sport includes all forms of competitive physical activity or games which, through casual or organised participation, at least in part aim to use, maintain or improve physical ability and skills while providing enjoyment to participants, and in some cases, entertainment for spectators. Hundreds of sports exist, from those between single contestants, through to those with hundreds of simultaneous participants, either in teams or competing as individuals.*

### Introduction

Sport is generally recognised as system of activities which are based in physical athleticism or physical dexterity, with the largest major competitions such as the Olympic Games admitting only sports meeting this definition, and other organisations such as the Council of Europe using definitions precluding activities without a physical element from classification as sports. However, a number of competitive, but non-physical, activities claim recognition as mind sports. The International Olympic Committee (through ARISF) recognises both chess and bridge as bona fide sports, and SportAccord, the international sports federation association, recognises five non-physical sports: bridge, chess, draughts (checkers), Sport is usually governed by a set of rules or customs, which serve to ensure fair competition, and allow consistent adjudication of the winner. Winning can be determined by physical events such as scoring goals or crossing a line first. It can also be determined by judges who are scoring elements of the sporting performance, including objective or subjective measures such as technical performance or artistic impression.

Records of performance are often kept, and for popular sports, this information may be widely announced or reported in sport news. Sport is also a major source of entertainment for non-participants, with spectator sport drawing large crowds to sport venues, and reaching wider audiences through broadcasting. Sport betting is in some cases severely regulated, and in some cases is central to the sport.

### Technology in sports

Technology is not just out there in the world, on the contrary, it is inside us as well. Indeed, on any given day our bloodstreams carry the remnants of ibuprofen and multivitamins, that many individuals have been technologized, or made more technologized, through artificial hearts, contact lenses, and other medical procedures. Technology is describe as any tangible, conceptual, or procedural element of modern sport and exercise science aimed at progress. The flexible definition allows everything from advancements in running shoes and eyewear to different ways of thinking about the body as technological. In the pre-digital age, the application of technologies in sport was heavily concentrated on athlete testing (diagnostics); improved sports equipment through better engineering and design, and utilized more at competitions.

### Self -Technologies

This represents the most obvious and distributing for many people form of technology due to the potential of fundamentally and often permanently alter an athlete's physical or psychological being/make-up. Banned performance-enhancing drugs are the most recognizes of these technologies. Self-technologies encompass other kinds of athletic innovations, of which are also controversial. Others include surgical procedures, prosthetic/bionic limbs, sport psychological interventions and genetic engineering are all classified as self-technologies. The presence of certain self-technologies in sport may be seen as future such as bionic prostheses (as used by Oscar Pistorius). Scientists working on a muscle-building vaccine derived from engineering genes already recognised the implications of their work for sport. Thus, the generic alteration of athletes or gene doping is a human genome projects to map all the genes in the human body, which can increases the muscle mass. Although it is unclear whether the long-term effects are safe or not.

### Hawk-Eye Technology

Hawk-eye is the name of a computer and camera system which traces a ball's trajectory. It is being used in international cricket and tennis, and many other sports are also looking at making use of this technology. The system is also being trialled in soccer as part of the goal line assessment. The Premier League of Football in the UK has agreed to the introduction of goal-line sensors after being given approval by

football's rule-makers. The system being developed by the UK company Hawk-Eye, would give a definitive decision on whether the ball had crossed the line. The Hawk Eye uses a camera taking 600 frames a second on the goal-line, with the information is analyzed by computer and sent to the referee's headset or a device on his wrist. In 2015, Hawkeye technology was also used by rugby officials at the 2015 Rugby World Cup, to improve decision-making by the television match official (TMO) and also assist with player safety. In this case it is enhanced video review, rather than the ball tracking technology as used in other sports.

## Sports skills

### Coordination

#### Planning the Movement

- Timing the movement
- Think/predict what to do
- React to a situation if different from what you predicted

#### Bilateral coordination

- To use both sides of the body together
- Can be a symmetrical movement (star jumps)
- Can be an alternating movement (walking)

#### Hand Eye coordination

- Eyes guide the hands to complete movement (catching, striking)  
Coordinated movements start in your large muscles groups and move into your smaller muscle groups working together for a fluid motion.

### Striking

#### Eyes

- Make sure you are always watching the ball the entire time!

#### Prepare your body

- Feet shoulder width apart
- Weight on back foot
- Body is sideways with shoulder facing the ball
- Bat, stick, club or racket reaches far for backswing

#### Forward motion

- Feet move the body in line with the ball
- Rotate hips and trunk as bat, club, stick or racket is brought forward
- Weight transfers from back foot to front foot
- Bat, racket, club, or stick strikes the object

#### Follow through

- Full follow through along the swing path  
Seeing what direction the ball flies after the strike can give hints to error in technique or stance.

## Conclusion

Sporting technologies are man-made means developed to reach human interests or goals in or relating to a particular sport. It is a technical means by which athletes attempt to improve their training and competitive surroundings in order to enhance their overall athletic performance. It is the knowledge and application of using specialised equipment and the latest modern technologies to perform tasks more efficiently. Therefore, coaches and athletes must be aware of sport technologies, and make wise choices about how it affects their performances.

## Implement Of Technologies In Sports And Benefits Of Skills

Dr. Shridhar R. Dhakulkar

Mahatma Jotiba Fule Mahavidyalay Amravati, Dist Amravati

### Abstract

*Sport is usually governed by a set of rules or customs, which serve to ensure fair competition, and allow consistent adjudication of the winner. Winning can be determined by physical events such as scoring goals or crossing a line first. It can also be determined by judges who are scoring elements of the sporting performance, including objective or subjective measures such as technical performance or artistic impression.*

### Introduction

Technology plays an important part in modern sport. With it being a necessary part of some sports (such as motorsport), it is used in others to improve performance. Some sports also use it to allow off-field decision making. Sports science is a widespread academic discipline, and can be applied to areas including athlete performance, such as the use of video analysis to fine-tune technique, or to equipment, such as improved running shoes or competitive swimwear. Sports engineering emerged as a discipline in 1998 with an increasing focus not just on materials design but also the use of technology in sport, from analytics and big data to wearable technology. In order to control the impact of technology on fair play, governing bodies frequently have specific rules that are set to control the impact of technical advantage between participants. For example, in 2010, full-body, non-textile swimsuits were banned by FINA, as they were enhancing swimmers' performances.

### Technology in sports

Most professional sports in the United States have long used instant replay and other high-tech aids to help referees make the right call. Gridiron has used video replay systems to check referees' calls for many years. Basketball referees use replay systems to make sure players are shooting within the time allotted by the shot clock. In international cricket, the third umpire has been used, one sitting off the ground with access to TV replays of certain situations (such as disputed catches and boundaries) to advise the central umpires. The umpires out on the field are in communication via wireless technology with the other umpire. The third umpire is also asked to adjudicate on run out decisions, which he makes without consultation with the two central umpires. One sport that has resisted the use of high-tech assistance until very recently is soccer/football. Replays could be used to decide off-side decisions, whether a ball passes over the goal line, and clarify penalty decisions.

The world of sport is continually changing over the years, and the use of technology is just one of those areas that has made an impact on many sports in the modern day. See the annual sports technology awards for the latest technology ideas in the world of sport.

Making changes to a sport, with the inclusion of new technologies, has often caused controversy. One criticism of the use of technology is that it can slow down the speed of the game, but on the other hand for many people it makes watching it more enjoyable to see the correct decisions being made. If a new technology is available, and shown to be accurate, then it should be used so that the correct decisions can be made. It is only fair to the players and teams that the right decisions are made.

### Hawk-Eye Technology

Just as it sounds, this technology uses 6-7 high-end cameras situated above the field of play (e.g. a birds-eye view) to analyze the flight and trajectory of an object being used in sports competition. Most commonly used in tennis, cricket, rugby and volleyball, Hawk-Eye Technology has been in use since 2006 in tennis and is more accurate than a judges eye.

### Benefits of this technology:

- Hawk-Eye technology helps to take an error-free decision in cricket, lawn tennis, rugby league, football, and baseball.
- This technology has reduced the criticism of the players and spectators about the decision of the match referee.
- By analyzing the movement of the balls through this technology, the umpire can take an error-free decision quickly when the game is going on.

The only downside of Hawk-Eye technology is that we haven't been introduced to the next John McEnroe. Without terrible calls by chair umpires, there are no more wildly entertaining tantrums and racket throwing.

### Computer Software

There are numerous software packages that are designed for fitness and nutrition professionals to organize data and produce reports, ideal for visitors to this site. Here are a couple of packages that come recommended by Topend Sports.

- Team Beep Test — the most versatile and useful software for conducting and recording results of the beep / beep test, with results recorded directly onto your computer.
- BodyByte — a universal standalone computer software program specially developed to comprehensively organize and manage all the information associated with nutrition, training and fitness.

### Sports skills

#### Striking

##### Eyes

- Make sure you are always watching the ball the entire time!

Prepare your body

- Feet shoulder width apart
- Weight on back foot
- Body is sideways with shoulder facing the ball
- Bat, stick, club or racket reaches far for backswing

##### Forward motion

- Feet move the body in line with the ball
- Rotate hips and trunk as bat, club, stick or racket is brought forward
- Weight transfers from back foot to front foot
- Bat, racket, club, or stick strikes the object

##### Follow through

- Full follow through along the swing path
- Seeing what direction the ball flies after the strike can give hints to error in technique or stance.  
It is important to practice this skill on each foot.

##### Take off

- Head up
- Eyes look in direction of the hop or forward
- Stand on one foot and bend knee
- Knee of other leg bent and foot off ground
- Straighten the leg you are standing on to push off
- Push off from the ball/midsection of the foot

##### Flight

- Keep knee of raised leg bent
- Arms are bent and swing forward and up
- Leg and arms swing in rhythm with the hop

##### Landing

- On one foot
- Support knee bends for a soft, absorbed landing
- Movement starts again from that bend

Hopping is a smooth nonstop movement that is quiet.

### Conclusion

Technology continues to change the way sports are played, how injuries are treated, what kinds of sports are played and enhances performance outcomes. Sporting technologies are man-made means developed to reach human interests or goals in or relating to a particular sport. It is a technical means by which athletes attempt to improve their training and competitive surroundings in order to enhance their overall athletic performance. It is the knowledge and application of using specialised equipment and the latest modern technologies to perform tasks more efficiently. Therefore, coaches and athletes must be aware of sport technologies, and make wise choices about how it affects their performances.

**Benefits Of Various Technologies In Sports And Skills****Prof. Prashant Sudhakar Rao Charjan**

Dr.Shama Prasad Mukharjee Kala Mahavidyalaya Shendurjanaghat, Dist Amravati

**Abstract:**

*Sports science is a widespread academic discipline, and can be applied to areas including athlete performance, such as the use of video analysis to fine-tune technique, or to equipment, such as improved running shoes or competitive swimwear. Sports engineering emerged as a discipline in 1998 with an increasing focus not just on materials design but also the use of technology in sport, from analytics and big data to wearable technology.*

**Introduction:**

Sport includes all forms of competitive physical activity or games which, through casual or organised participation, at least in part aim to use, maintain or improve physical ability and skills while providing enjoyment to participants, and in some cases, entertainment for spectators. Hundreds of sports exist, from those between single contestants, through to those with hundreds of simultaneous participants, either in teams or competing as individuals. In certain sports such as racing, many contestants may compete, simultaneously or consecutively, with one winner; in others, the contest is between two sides, each attempting to exceed the other. Some sports allow a "tie" or "draw", in which there is no single winner; others provide tie-breaking methods to ensure one winner and one loser. A number of contests may be arranged in a tournament producing a champion. Many sports leagues make an annual champion by arranging games in a regular sports season, followed in some cases by playoffs.

**Technology in sports:**

The world of sport is continually changing over the years, and the use of technology is just one of those areas that have made an impact on many sports in the modern day. See the annual sports technology awards for the latest technology ideas in the world of sport.

Making changes to a sport, with the inclusion of new technologies, has often caused controversy. One criticism of the use of technology is that it can slow down the speed of the game, but on the other hand for many people it makes watching it more enjoyable to see the correct decisions being made. If a new technology is available, and shown to be accurate, then it should be used so that the correct decisions can be made. It is only fair to the players and teams that the right decisions are made.

Basketball referees use replay systems to make sure players are shooting within the time allotted by the shot clock. In international cricket, the third umpire has been used, one sitting off the ground with access to TV replays of certain situations (such as disputed catches and boundaries) to advise the central umpires. The umpires out on the field are in communication via wireless technology with the other umpire. The third umpire is also asked to adjudicate on run out decisions, which he makes without consultation with the two central umpires. One sport that has resisted the use of high-tech assistance until very recently is soccer/football. Replays could be used to decide off-side decisions, whether a ball passes over the goal line, and clarify penalty decisions.

**Hawk-Eye Technology:**

Just as it sounds, this technology uses 6-7 high-end cameras situated above the field of play (e.g. a birds-eye view) to analyze the flight and trajectory of an object being used in sports competition. Most commonly used in tennis, cricket, rugby and volleyball, Hawk-Eye Technology has been in use since 2006 in tennis and is more accurate than a judge's eye.

**Benefits of this technology:**

Hawk-Eye technology helps to take an error-free decision in cricket, lawn tennis, rugby league, football, and baseball.

This technology has reduced the criticism of the players and spectators about the decision of the match referee.

By analyzing the movement of the balls through this technology, the umpire can take an error-free decision quickly when the game is going on.

The only downside of Hawk-Eye technology is that we haven't been introduced to the next John McEnroe. Without terrible calls by chair umpires, there are no more wildly entertaining tantrums and racket throwing.

**Wearable Computers:**

Another advancement in the world of safety and monitoring, wearable computers allow for real-time tracking of an athlete's health. Since their creation, the incidents of dehydration, heart attacks and worse, have dramatically decreased.

When Minnesota Vikings offensive lineman Korey Stringer died of heat stroke during training camp in 2001, companies began to investigate ways to monitor health in real-time and stave off tragedies like this. Wearable tech has made a difference in the lives of many athletes, by supervising pulse rate, hydration, and temperature through its wireless and microscopic health monitoring system.

**Prosthetic Devices for Disabled Athletes**

What used to be the end of the story is now just a beginning of a new one. People with disabilities, or lost limbs, never had a chance to compete, but with the advancement of prosthetic technology more and more physically disabled are competing like before.

Dr. Rory A. Cooper is a leader in developing cutting-edge prosthetics. As the Director of Human Engineering Resources Laboratories at the University of Pittsburgh, Dr. Cooper places athletes in body suits embedded with motion sensors. The athletes then go through a series of drills based around athletic movement, the cameras and the wearable tech report back on their movements. The prosthetic design process begins after this motion study, which in the end creates a custom prosthetic that moves with their body.

- Sports skills
- Jumping
- Take off
- Eyes looking in direction of jump (forward or up)
- Take off from one or both feet
- Bend knees
- Swing arms back behind body
- Push up from heel to toes
- Forceful forward motion, swing arms upward
- Flight
- Legs straighten in the air
- Control your body movement
- Landing
- Keep both feet pointing straight for landing
- Land on balls of both feet
- Knees bent and directly over toes to absorb landing
- Control landing with no more than one small step
- Remember to practice jumping up, jumping forward and jumping off of equipment from a raised height.
- Running
- Head
- Head up
- Let your eyes lead you
- Arms
- Arm swing forward and backward
- Not across your body
- Torso
- Running tall, stretch yourself up
- Don't bend
- Legs
- High knee lift for short distance fast running
- Smaller knee lift , shorter strides for distance
- Ankles and Feet
- Feet should land under your body
- Don't slap the ground, running is quiet.
- Take breaks and have water on hand.
- Rhythm

**A body in Motion:**

Helps kids learn to move though their environment in a smooth flowing and graceful way

**Assessing the skill:**

It is hard to break rhythm down into a specific body movements or pattern, it should be a part of all movement

It is important to offer activities in programs like dance, music play, skipping, hopscotch, etc. that work on rhythm

Activities should allow children to move in patterns, changing the shape of their bodies, move to a beat/music and move around each other skilfully

Developing Rhythm helps children perform many fundamental movements easier and with more confidence.

**Conclusion**

Technology plays an important part in modern sport. With it being a necessary part of some sports (such as motorsport), it is used in others to improve performance. Some sports also use it to allow off-field decision making. Technology continues to change the way sports are played, how injuries are treated, what kinds of sports are played and enhances performance outcomes. Sporting technologies are man-made means developed to reach human interests or goals in or relating to a particular sport.

## ग्रामीण भागातील शैक्षणिक समस्या

स्वप्नील रामभाऊ चिकटे

समाजकार्य पारंगतए भाग-२ III o IV सेमीस्टर

सुषीलाबाई रामचंद्रराव मामिडवार कॉलेज ऑफ सोशल वर्कए पडोली, चंद्रपुर

### सारांश

ग्रामीण जीवनाशी व परिसराशी अनुरूप असे शिक्षण म्हणजेच ग्रामीण शिक्षण होय. ग्रामीण जीवन आणि नागरी जीवन यात मोठे अंतर असते. आणि नागरी जीवन यात मोठे अंतर असते. गैरसोयी आणि जगापासून अलगपणा यामुळे ग्रामीण शिक्षणावर फार मोठा परिणाम होतो. विद्यार्थी, पालक, शिक्षण, शिक्षणाधीकारी, अभ्यासक्रम, शैक्षणिक प्रशासन आणि शिक्षण खर्च या खर्चाचा विचार करताना खेड्यातील वस्तुस्थितीचा विचार करणे भाग असते. ग्रामीण भागात चांगले शिक्षण देण्याचा दृष्टीने अनेक अडचणी येतात. मुलांची संख्या थोडी म्हणून शाळा काढता येत नाही. आणि काढलीच तर एकाच शिक्षकाकडे सर्व इयत्ता सोपवाव्या लागतात. ग्रामीण शिक्षणामध्ये भाषा ही खुप महत्वाची आहे. त्यामुळे अनेक अडचणी निर्माण होतात. ग्रामीण व नागरी शिक्षणे हे समान असावे. हा एक वादाचा मुद्दा आहे. असा भेद नसावा. लोकशाही आणि समान संधी यांच्या दृष्टीने अशी भिन्नता अनिष्ट आहे. ग्रामीण भागातील शिक्षणाची स्थिती आज विदारक झाल्याचे दिसून येते. आज शाळांमध्ये बसण्यासाठी बाक, सर्व शैक्षणिक साहित्य तसेच काही शाळा या संगणीकृत होत आहे. मात्र तरीही शिक्षणाचा प्रभाव का पडत नाही? हे प्रश्नचिन्ह डोळ्यासमोर उभे राहते. ग्रामीण शिक्षणाची अधोगती पाहता याचा अंत कसा असेल याचा विचारानेही अंगावरील शहारे उभे राहतात.

### प्रस्तावना

बऱ्याच वेळा आपण घरातील वडिलधाऱ्या माणसांकडून ऐकतो 'आमच्या वेळी आम्ही दहा दहा मैल चालत अंतर काढून शाळेत जायचो. पारानो तुम्ही नशीबवान आहात आज तुम्हाला सर्व शैक्षणिक सुखसोयी उपलब्ध आहे. मात्र सध्याची परिस्थिती पाहली तर प्रत्येक जन आपआपल्या कुवतीनुसार व परिस्थितीनुसार शिक्षण घेत असतो. ग्रामीण भागातील प्रमाण हे चिंताजनक आहे. त्यामुळे विद्यार्थ्यांची शिक्षणातील होणाऱ्या एवढ्या मोठ्या प्रमाणातल्या गळतीची कारणेही तेवढीच मोठी आहे. शिक्षणाचे बाजारीकरण हे ग्रामीण भागापर्यंत पोहचलेले आहे. त्यामुळे गरज नसतानाही अनेक पालक खाजगी शाळांमध्ये आपले मुल कसे जाईल याकडे अधिक आग्रही राहत आहे. तर सरकारी शाळांना दिल्या जाणाऱ्या सोयीसुविधा आणि शिक्षकांचे प्रशिक्षण आणि त्यांचे अज्ञान हा एक महत्वाचा भाग आहे. म्हणूनच 'असर' च्या अहवालात पाचवीच्या मुलांना तिसरीचे पुस्तक वाचता येत नाही. तर चौथीतल्या मुलांना चार अंकी गणीत सोडविता येत नाही. तर सातवीच्या मुलांना सात चा पाढाही म्हणता येत नाही ही वस्तुस्थिती ग्रामीण भागातील शाळांची गुणवत्ता राखण्यास कारणीभूत ठरली आहे.

शाळांच्या मानाने ग्रामीण भागात शिक्षणाची परिस्थिती फारच कठीण पाहायला मिळते. आज ग्रामीण भागातील मुलांचे शिक्षणाबद्दल मन ऐकून थक्क झाल्यासारखे व आभाळ कोसळल्या सारखे वाटते. "विद्यार्थ्यांचे मत आहे की शिक्षण घेण्यापेक्षा शेती करणे सोपे झाले आहे" हा एक आजच्या शिक्षणासंबंधात मला आलेला थक्क करणारा अनुभव आहे. राज्यात गेल्या काही वर्षांपासून प्रसिद्ध होत असलेले "असर", "समर्थन" राज्य सरकारकडून प्रसिद्ध होणारा 'लोकलेखा' यशदा आदीचे अहवाल पाहल्यास राज्यातील ग्रामीण भागातील शिक्षणाची अवस्था आणि त्याचे वास्तव्य विविध अहवालामुळे कोणालाही नाकारता येत नाही.

### संशोधनाची उद्दीष्टे

१. ग्रामीण शिक्षणाची परिस्थितीचा अभ्यास करणे.
२. विद्यार्थ्यांचे शिक्षणाबद्दल मत जाणून घेणे.
३. ग्रामीण भागातील शैक्षणिक समस्यांचा अभ्यास करणे

#### उपकल्पना

१. ग्रामीण शिक्षणाची परिस्थिती ही अत्यंत ढासाळली आहे.
२. विद्यार्थ्यांचे शिक्षणाबद्दल मत हे नकारात्मक होत चालले आहे.
३. ग्रामीण भागामध्ये अनेक शैक्षणिक समस्या आहेत.

#### संशोधन आराखडा

‘ग्रामीण भागातील शैक्षणिक समस्या’ या शोधनिबंधाच्या मांडणीसाठी अंशतः वर्णनात्मक आणि अंशतः निदानात्मक संशोधन आराखड्याच्या उपयोग केला आहे. आणि प्रस्तुत शोधनिबंधाचे लेखन केलेले आहे.

#### प्रमुख शोध व निष्कर्षरू

शैक्षणिक समस्या निर्माण होण्याची कारणे:—

१. शिक्षणाच्या बाजारपणचा ग्रामीण भागावर मोठ्या प्रमाणावर पडल्यामुळे शैक्षणिक समस्या निर्माण झाल्या
२. सरकारी शाळांना मिळणाऱ्या सोयीसुविधा व शिक्षकांचे प्रशिक्षण व त्यांचे अज्ञान हा एक महत्वाचा भाग आहे.
३. सरकारी शाळेमध्ये होणारी विद्यार्थ्यांची गळती
४. विद्यार्थ्यांचे व पालकांचे शिक्षणाबद्दल मत हे नकारात्मक होत आहे.
५. ग्रामीण भागातील शिक्षणाकडे पाहण्याचा दृष्टीकोन हा बदलत चालला आहे.
६. ग्रामीण भागातील शिक्षकांचा बेजवाबदारीपणा
७. शिक्षक आणि विद्यार्थी, पालक यांच्याशी होणारा खुप कमी संवाद
८. शिक्षक ग्रामीण भागामध्ये स्थायी न होणे.
९. सर्व वर्ग एकाच शिक्षकाकडे असल्याने गुणवत्ता ढासळणे.
१०. ग्रामीण भागात विविध विषयांचे खास शिक्षक नसतात.
११. समाज मागासलेला असल्याने तो शिक्षकावर गैरवाजवी हुकुमत आणि अधिकार गाजवितो.
१२. संगणकीकृत झालेल्या शाळांमध्ये त्या साधनांचा योग्य तो उपयोग नसणे.
१३. ग्रामीण भागामध्ये शिकवणी वर्ग नसणे व असल्यास त्याचा उपयोग न करणे.
१४. ग्रामीण भागातील कल हा खाजगी शिक्षणाकडे वाढत असल्यामुळे त्याचा विपरित परिणाम होत आहे.
१५. कुटूंबाची कामामध्ये व्यस्तता.
१६. शिक्षणामध्ये भाषेचा पगडा

#### उपाययोजनारू

१. विशेष तंत्र व उपाय आखणे.
२. शिक्षण हे जीवनशैलीशी जोडणे, जिवन शैलीचा आधार देणे.
३. फिरते शिक्षक वा फिरत्या मोटारगाड्या वा रेल्वेचे डबे यांचा उपयोग करून विज्ञान, हस्तव्यवसाय इ. विषयांच्या शिक्षणाची सोय करता येते.
४. शिक्षकांना ग्रामीण भागामध्ये राहावयाची सोय उपलब्ध करून देणे.
५. शेतीच्या हंगामानुसार शाळा भरविणे.
६. ग्रामीण भागात काम करणाऱ्या शिक्षकांना खास प्रशिक्षण देणे.

७. विद्यार्थ्यांना प्रात्याक्षिक शिक्षण देणे .
८. योग्य संवादकौशल्याचा उपयोग करणे .
९. शिक्षक, विद्यार्थी आणि पालक यांच्यातील संबंध वाढविणे .
१०. साधनसामुग्रीचा योग्य वापर, व त्यासाठी आवश्यक प्रशिक्षण देणे .

**Emerging Trends In EFL Teaching In The Global Expansion Of English Language**

**Asstt. Prof. Ku. Priyamvada Dinesh Bhat**, English,  
B.B. Arts, N.B. Commerce & B.P. Science College, Digras. 445203, Dist Yavatmal

**Abstract:**

*This article draws a distinction between teaching English as a second and foreign language, demonstrating that in the later case, teaching should be modified towards greater emphasis on formal grammar instruction and on developing learner's interlingual and intercultural awareness. Advantages of EFL teachers who are non-native speakers of English are shown for some EFL teaching conditions. The advantages are tied to the fact that such EFL teachers are those who, as a rule, share their students' mother tongue, and culture and are therefore, better prepared for coping with the specific problems that originate from incompatibilities or differences in target and native languages or cultures.*

**Keywords:**

Teaching English as EFL (English as a foreign language), teaching English as a Second language (ESL)

With the global expansion of English as the language of international communication, another expansion is taking place that of teaching and learning English as a foreign language (EFL), i.e., outside the countries where it is spoken and where it has internal communicative functions and sociopolitical status. This second expansion puts two questions to the forefront of professional discussion. The first of them is whether EFL can and should be taught in the same way as English as a second language (ESL) is taught when it is acquired by speakers of other languages in the countries where English is the mother tongue of the majority of the population.<sup>1</sup> The second question is tied to the fact that in EFL teaching situations the majority of teachers are not native speakers due to obvious reasons. It is enough to mention one of them the most apparent. With the global expansion of English and the quickly growing need of learning the language felt by millions of people, there never will be enough professional teachers of English who are native speakers to meet the demand of the world over. In EFL, native speakers of English will inevitably be in the minority as teachers. Hence, the question is whether a professional teacher of English who is not the native speaker of the language she teaches is always at a disadvantage as compared to his or her colleague who had been lucky enough to be born in the UK, USA, Canada, or Australia. Is it possible that in EFL situations the former may have some advantages over the later? Which are those advantages that she or he can reasonably hope to enjoy and can the obvious disadvantages of such a teacher's position be somehow softened and avoided. The purpose of this article is to discuss some answers to these questions

Researcher's opinions differ as to the answer to the first question above because some of them deny the existence of any difference in the way EFL should be taught in comparison with ESL. On the contrary, other authors emphasize the difference analyzing its underlying reasons.

Those authors who do not see the necessity of a clear differentiation between ESL and EFL teaching base this opinion on the assumption that second language acquisition data are fully applicable to foreign language learning. Yet, many others support the notion that the two processes do not coincide.

All in all, it may be said that there is no unanimous opinion concerning the relationship between the second language acquisition and foreign language learning (VanPatten & Lee 1990). But the opinion that the two processes are different at least in some respects and therefore should be treated differently is quite well founded and matches much of the empirical data. Two principal differences can be pinpointed that will hardly evoke any objection on the part of researchers and practical teachers. In other words when English is taught in the countries where it has little or no internal communicative function or sociopolitical status, it is just a school subject with no recognized status or function at all.

This means that EFL learners get in touch with English only in the classroom, and hardly anywhere else outside it. And class hours in EFL conditions are inevitably limited. If English is learned at school or university, there are many other subjects to study; therefore, classes of English can not be held more frequently than two or three times a week. If it is learned in the framework of some intensive program, the situation is of course better, but even in these conditions people can not have classes every weekday for five or six hours as is usually designed for learners.

The unavoidable deficiency has to be compensated for, and such a compensation has hardly any other alternative than explicit focusing on language forms with the aim of supplying students with hypotheses and testing them in special language form-focusing learning activities.

In ESL teaching the need for and usefulness of what is called focus on language form and formal grammar instruction has until lately been either strongly doubted or completely rejected, following Krashen's SLA theory. Since nobody doubts that English is taught for communication and the only way to teach

communication in target language is learning it in communication. The question is how to achieve in EFL the integration of formal grammar instruction and focus on language form into the dominantly communicative approach leaving intact the prevailing communicative constituent of the teaching learning process.

This approach is based on the assumption that focus on language form will serve the purpose of EFL learning for communication only. A combination of communication and cognition is possible if the pattern of “guided communication focus on language form- unguided communication” is followed in the organization of learning activities in the framework of every learning unit consisting of several classes.

According to this pattern, the first stage in the learning unit is devoted to students’ receiving the greatest possible amount of comprehensible input in the target language and to their attempts to use this input in their own communication without analyzing new language forms-just on the basis of input models as comprehensible output. It can be done only with different speech supports from the teacher and different teaching materials guiding the process of learner’s verbal interaction and making it a guided quasi-communication.

It permits making the second stage in the learning unit a class of analysis devoted to focusing students’ conscious attention on the new language forms that were already used in guided communication. The principal contents of learning activities at this stage are analyzing these forms and their purposeful practicing. Though this practicing is primarily language form-focused, it should at the same time simulate some basic features of communication as the function of this practice is gaining command of language forms for their free and fluent use in further verbal interaction.

This leads to the crowning stage in a learning unit that of unguided communication with no artificial speech supports. It ensures the gradual elimination of the middle link in the “guided communication focus on language form unguided communication” pattern as soon as learners master some preset minimum of target language forms.

1. Verbal communicative behavioral patterns that can be demonstrated by a culturally recognized behavioral difference between two questions.
2. Non-verbal communicative behavioral patterns such as whether it is required or not to shake hands upon meeting, what style of dressing is socially and culturally acceptable and what is the meaningful message of this or that mode of dressing for members of the given community and a multitude of similar patterns.
3. Lifestyle communicative behavioral patterns that reflect ways of doing simple everyday things are done very differently in different cultures.

### Conclusion:

This leads to the conclusion that there must be two principal differences in organizing EFL teaching as compared to ESL. The first of them is almost universally admitted. It is necessary to pay much greater attention to focus on language form and formal grammar instructions. The second difference is generally much less emphasized but seems no less important. It lies in the requirement to pay much greater attention to developing target culture communicative behavioral patterns on the basis of comparing them to those of home culture.

EFL teaching has some important differences from ESL requiring a specific approach with a greater emphasis on focus on language forms and on getting command of culture-specific communicative behavioral patterns characteristic of English-speaking nations.

## Active Volcano with Wireless Sensor Network

Ms. Apurva R.Raut, Ms. S. K. Totade, Mr. S. B. Bele

Department of Computer Application Vidyabharati Mahavidyalaya, Amravati

### Abstract:

Augmenting heavy and power hungry data collecting equipment with lighter, smaller wireless sensor network nodes leads to faster, larger deployments. Arrays comprising dozen of wireless sensor nodes are now possible allowing scientific studies that are not feasible with traditional instrumentation. Designing sensor network to support volcanic studies require addressing the high data rate and high data fidelity these studies demand. Getting a lot of information out of one of the worlds most dangerous place-an active volcano-is no easy task. But the US government said it is looking to spend millions to make gathering such data via wireless sensor network and other high-tech processes a whole lot easier. A Volcano is an opening on the surface of planet or moon that allows material warmer than its surroundings to escape from its interior. When this material escapes, it causes an eruption. An eruption can be explosive, sending material high into the sky. Or it can be calmer, with gentle flows of material.

**Keywords:** Volcano, Sensor Network Application Design, Volcano Monitoring, Network Hardware, Network Operation

### Introduction:

Today's typical volcano data-collection station consist of group of bulky, heavy, power hungry component that are difficult to move and require car batteries for power. Remote deployment often requires vehicle or helicopter assistance for equipment installation and maintenance.

The geophysics community has well established tools and technique it uses to process signals extracted by volcanic data –collection networks. These analytical method require that our wireless sensor network provide data of extremely high fidelity a single missed or corrupted sample ca invalidate an entire record.

An important feature of volcano signal is that much of data analysis focuses on discrete events, such as eruption, earthquakes, or tremor activity. Although volcano differ significantly in the nature of their activity, during the deployment, many interesting signals spanned less than 60 sec and occurred several dozen times per day. Therefore a design that capture time-limited events, rather than continuous signals.

### Design Goal:

#### Sensor Network Application Design:

Given wireless sensor network nodes current capabilities, we set out to design a data collection Network that would meet the scientific requirement. Before describing our design, lets take a view of our sensor node hardware and overview the network operation. Below Figure shows sensor network architecture.

Fig : Sensor N/W Architecture

The Volcano architecture monitoring sensor network architecture as shown in figure. The network consist of 16 sensor nodes, each with a microphone, collecting acoustic data on volcano activity. Nodes relay data via a multihop network to gateway node connected to a long –distance freeware modem, providing radio connectivity with a laptop at the observatory. A GPS receiver is used along with a multihop time –synchronization protocol to establish a network wide timebase.

### Network Hardware:

The sensor network comprised 16 station equipped with acoustic sensors. Each station consisted of a Moteiv, TMote Sky wireless sensor network node an 8-dBi 2.4-GHz external omnidirectional antenna, a microphone, and a custom hardware interface board. Each of 14 nodes are fitted with a Geospace Industrial GS-11 geophone a single axis with a corner frequency of 4.5 Hz oriented vertically. The two remaining nodes with triaxial Geospace Industries GS-1 with corner frequency of 1Hz yielding separate signal in each of the three axes.

The TMote Sky is a descendant of the University of California, Berkeley's Mica mote, • sensor node. It features a Texas Instruments MSP430 microcontroller, 48 Kbytes of program memory, 10 Kbytes of static RAM, 1 Mbyte of external flash memory, and a 2.4-GHz Chipcon CC2420 IEEE 802.15.4 radio. The TMote Sky designed to run TinyOS, 3 and all software development used this environment. The TMote sky is chosen

because the MSP430 microprocessor provides several configurable port that easily support external devices and the large amount of flash memory was useful for buffering collected data.

A custom hardware board is built to integrate the TMote Sky with the seismoacoustic sensors. The board features up to four Texas Instruments AD7710 analog-to-digital converters (ADCs), providing resolution of up to 24 bits per channel.

The MSP430 microcontroller provides on-board ADCs, but they are unsuitable for our application. First they provide only 16 bit of resolution whereas we required at least 20 bits. Second, seismoacoustic signals require an aggressive filter centered around 50 Hz. Because implementing such a filter using analog components isn't feasible, it's usually approximated digitally, which requires several factors of oversampling. To perform this filtering the AD7710 sample at more than 30 KHz while presenting a programmable output word rate of 100Hz. The high sample rate and computation that digital filtering require are best delegated to a specialized device.

A pair of alkaline D cell batteries powered each sensor node our networks remote location made it important to choose batteries maximizing node lifetime while keeping cost and weight low. D cells provided the best combination of low cost and high capacity, and they can power a node for more than a week. Roughly 75 percent of the power each node draws is consumed by the sensor interface board primarily due to the ADCs high power consumption. The network is monitored and controlled by a laptop base station, located at a makeshift volcano observatory roughly 4 km from the sensor network itself. Freeware radio modem using 9-dBi directional Yagi antennae were used to establish a long distance radio link between the sensor network and the observatory.

### Typical Network Operation:

Each node sample two or four channel of acoustic data at 100Hz, storing the data in local flash memory. Nodes also transmit periodic status message and perform time synchronization. When a node detects an interesting event, it route a message to the base station laptop. If enough nodes report an event within a short time interval, the laptop initiates data collection, which proceeds in a round-robin fashion. The Laptop downloads between 30 and 60 seconds of data from each node using a reliable data collection protocol, ensuring that the system retrieve all buffered data from the event. When data collection completes, nodes return to sampling and storing sensor data.

### Sensor-Network Device Enclosures and Physical Setup :

A single sensor network node, interface board, and battery holder were all housed inside a small weatherproof and watertight pelican case as shown below:

Above Figure shows a two component station, The blue Pelican case contains the wireless sensor node and hardware interface board. The external antenna is mounted on the PVC pole to reduce ground effects. A microphone is taped to the PVC pole, and a single seismometer is buried nearby. Environmental connector are installed through the case letting cables to be attached to external sensor and antennae without opening the case and disturbing the equipment inside.

For working in wet and gritty condition, these external connector became a tremendous asset.

Installing a station involved covering the Pelican case with rocks to anchor it and shield the contents from direct sunlight. The antennae is elevated on 1.5-meter lengths of PVC piping to minimize ground effects, which can reduce radio range. We buried the seismometers nearby, but far enough away that they remained undisturbed by any wind-induced shaking of the antenna pole. Typically, we mounted the microphone on the antenna pole and shielded it from the wind and elements with plastic tape. Installation took several minutes per node and the equipment was sufficiently light and small that an individual could carry six station in a large pack. The PVC poles were light but bulky and proved the most awkward part of each station to cart around.

**Network Location and Topology:**

We installed our station in a roughly linear configuration that radiated away from the volcano's vent and produced an aperture of more than three kms. We attempted to position the station as far apart as the radios on each node would allow.. Although our antennae could maintain radio links of more than 400 meters, the geography at the deployment site occasionally required installing additional stations to maintain radio connectivity. Other times, we deployed a node expecting it to communicate with an immediate neighbour but then noticed that the node was bypassing its closest companion in favour of a node closer to the base station.

Most nodes communicated with the base station over three or fewer hops, but a few were moving data over as many as six. In addition to the sensor nodes, three Free wave radio modems provided a long-distance, reliable radio link between the sensor network and the observatory laptop. Each Free wave required a car battery for power, recharged by solar panels. A small number of crossbow MicaZ sensor network node served supporting roles. One interface between the network and the free wave modem and another attached to a GPS receiver to provide a global time base.

**Design Issues Of Deploying a WSN On The Active Volcano :****Overcoming High Data Rates: Event Detection and Buffering**

When designing high data rate sensing applications, we must remember an important limitation of current sensor network nodes: low radio bandwidth IEEE 802.15.4 radios, such as the Chipcon CC2420, have raw data rate of roughly 30 kbytes per sec. However, overheads caused by packet framing, medium access control (MAC), and multihop routing reduce the achievable data rate to less than 10 Kbytes per second, even in a single-hop network. Consequently, nodes can acquire data faster than they can transmit it. Simply logging data to local storage for later retrieval is also infeasible for these applications.

The TMote Skys Flash memory fills in roughly 20 min when recording two channels of data at 100 Hz. Fortunately, many interesting volcano events will fit in this buffer. For a typical earthquake or explosion at Reventador, 60 Sec of data from each node is adequate.

Each sensor node stores sampled data in its local flash memory, which we treat as a circular buffer. Each block of data is time stamped using the local node time, which is later mapped to a global network time. Each node runs an event detector on locally sampled data. Good event-detection algorithms produce high detection rates while maintaining small false-positive rates. The detection algorithms sensitivity links these two metrics a more sensitive detector correctly identifies more events at the expense of producing more false positives. Then implemented a short-term average/long-term average threshold detector, which computes two exponentially weighted moving averages (EWMAs) with different gain constants. When the ratio between the short term average and the long term average exceeds a fixed threshold, the detector fires. The detector threshold lets nodes distinguish between low amplitude signals, perhaps from distant earthquakes, and high amplitude signal from nearby volcanic activity.. When the event detector on a node fires, it routes a small message to the base-station laptop. If enough nodes report events within a certain time window, the laptop initiates data collection from the entire network.

The global filtering prevents spurious event detections from triggering a data collection cycle. Fetching 60 sec of data from all 16 nodes in the network takes roughly one hour. Because nodes can only buffer 20 min. of eruption data locally, each node pauses sampling and reporting event until it has uploaded its data. Given that the latency associated with data collection prevents our network from capturing all events, optimizing the data collection process is a focus of future work.

**Reliable Data Transmission and Time Synchronization**

Extracting high-fidelity data from a wireless sensor network is challenging for two primary reasons. First, the radio links are lossy and frequently asymmetrical. Second, the low-cost crystal oscillators on these nodes have low tolerances, causing clock rates to vary across the network. Much prior research has focused on addressing these challenges.

A reliable data-collection protocol was developed, called Fetch, to retrieve buffered data from each node over a multihop network. Samples are buffered locally in blocks of 256 bytes, then tagged with sequence numbers and time stamps. During transmission, a sensor node fragments each requested block into several

chunks, each of which is sent in a single radio message. The base-station laptop retrieves a block by flooding a request to the network using Drip, a variant of the TinyOS Trickle6 data-dissemination protocol. The request contains the target node ID, the block sequence number, and a bitmap identifying missing chunks in the block. The target node replies by sending the requested chunks over a multihop path to the base station.

Scientific volcano studies require sampled data to be accurately time stamped; in this case, a global clock accuracy of ten milliseconds was sufficient. The Flooding Time Synchronization Protocol (FTSP) is chosen to establish a global clock across our network. FTSPs published accuracy is very high, and the TinyOS code was straightforward to integrate into our application. One of the nodes used a Garmin GPS receiver to map the FTSP global time to GMT. Unfortunately, FTSP occasionally exhibited unexpected behavior, in which nodes would report inaccurate global times, preventing some data from being correctly time stamped. We are currently developing techniques to correct our data sets time stamps based on the large amount of status messages logged from each node, which provide a mapping from the local clock to the FTSP global time.

### Command and Control:

A feature missing from most traditional volcanic data-acquisition equipment is real-time network control and monitoring. The long-distance radio link between the observatory and the sensor network lets our laptop monitor and control the networks activity. A Java-based GUI is developed for monitoring the networks behavior and manually setting parameters, such as sampling rates and event-detection thresholds. In addition, the GUI was responsible for controlling data collection following a triggered event, moving significant complexity out of the sensor network. The laptop logged all packets received from the sensor network, facilitating later analysis of the networks operation.

The GUI also displayed a table summarizing network state, based on the periodic status messages that each node transmitted. Each table entry included the node ID; local and global time stamps; various status flags; the amount of locally stored data; depth, parent, and radio link quality in the routing tree; and the nodes temperature and battery voltage. This functionality greatly aided sensor deployment by letting a team member rapidly determine whether a new node had joined the network as well as the quality of its radio connectivity.

### Conclusion:

By examining the data downloaded from network, we verified that the local and global event detector were functioning properly. As we described, we disabled sampling during data collection, implying that the system was unable to record two back-to-back events.

In some instances, this meant that a small event would triggered data collection. This approach raises many exiting directions for future work with continue improvement in sensor network design and pursuing additional deployments at active volcanoes.

This volcano work will focus on improving event detection and prioritization, as well as optimizing the data collection path. With the continuous Internet connectivity via a satellite uplink a much larger array like 100-nodes is to be delayed.

**Effect Of Selected Yoga Asana On Obese People Of Amravati****Dr. Hemantraj J. Kaware**  
PGTD of physical Education Amravati**Introduction:**

Obesity is one of the main sources of death in created nations. Obesity mellitus is a basic in India as in different parts of the world. It is likewise portrayed as an infection of strange starch digestion because of an unsettling influence in the connection between saturated fat in the blood and accumulation of fat around organs. It is described by high amount of body fat and is related with a reasonable number of confusions vascular, renal, heart disease, diabetes, high blood pressure, neurological and numerous others.

**Methodology:**

For the present study the data were collected from forty male obese patients of Amravati city. They were divided into two equal groups; one group was the control group while the other was experimental group.

The Experimental group was subjected to an experimental treatment in which a set of Thirteen Yogic practices were performed on six days per week between 6.30 am to 8.00 am total periods of experimental was seven weeks. The control group was instructed not to practice yogansanas during the period of experiments. Seven Weeks Training Programme for Experimental Group.

S.No.	Name of Yogic Practices	Duration
1.	Padmasana	2 min.
2.	Viparitkarani	2 min.
3.	Suvarnagasana	2 min.
4.	Shalabhasana	2 min.
5.	Pavan Muksana	2 min.
6.	Vakrasana	2 min.
7.	Pachimotanasana	2 min.
8.	Vajrasana	4 min.
9.	Yoga Mudra	4 min.
10.	Halasana	2 min.
11.	Bhujangasana	4 min.
12.	Chakrasana	2 min.
13.	Shavasan	10 min.

**Result of the Study:**

The difference between the mean scores of the final test of the two groups was tested for statistical significance by computing the 't' ratio.

**Table – I**

Parameters Studied	Score (N = 20)	Mean	M.D.	't' ratio
Blood Sugar	Initial	286.20	80.24	4.02**
	Final	198.67		
Blood Pressure	Initial	125.10	8.60	2.22*
	Final	120.42		

\* Significant at 0.05 level

The table No. 1 reveals that the seven weeks of Yogic Training reduced the blood sugar and blood pressure. It is statistically significant.

Table – II

Parameters Studied	Group Studied (N = 20)	Mean	M.D.	't' ratio
Blood Sugar	Yoga	198.67	115.62	4.89
	Control	316.28		
Blood Pressure	Yoga	120.42	12.67	3.72
	Control	129.25		

Significant at 0.05 level

It is clearly observed that from table No. 2 the blood sugar and blood pressure have reduced significantly in the experimental group compared with control group.

**Discussion:**

Two past studies (Doer et al. 1975; West et al. 1975) have shown that the marked improvement in Glucose tolerance (particularly in fasting blood glucose) is accompanied by an increase in plasma insulin response.

It is seen that all our patients included in this study had reduction in fasting blood sugar in seven weeks Yogic Training and Yogic Relaxation Technique which makes the patients calm and relaxes him from environmental stress.

**Conclusion:**

This study very effectively shows the marked reduction in blood sugar, especially fasting blood sugar, after the regular practice of yoga. Yoga is much superior to the conventional exercise programme advised to obese like walking and running. Running and Walking have practical difficulty of enough space time etc, and it poses future problem to the elderly obese.

Yoga can be practiced indoors, it needs minimum space and after yoga the subject is relaxed and calm. Yoga will be particularly advantageous to those obese belonging to the low socio-economic setup. Yoga is not a replacement for drugs. Many can reduce drugs if they practice yoga regularly and sincerely.

## आंबेडकरवादी समाज जाणीव आणि विद्रोह

प्रा.डॉ. अशोक कांबळे

मराठी विभाग प्रमुख

आबासाहेब पारवेकर महाविद्यालय, यवतमाळ

सारांश :

आंबेडकरी कवितेतील विद्रोह मुल्यांच्या प्रतिष्ठापणेसाठी असतो. एक मूल्यसमूह नाकारून नवा मूल्यसमूह अस्तित्वात यावा म्हणून विद्रोहाचा पुरस्कार केल्या जातो. मूल्यभाव नसेल तर विद्रोहाला काही अर्थ नाही. मूल्यभाव व विद्रोह यांच्यात परस्परपूरक संबंध आहेत. आंबेडकरवादी कवी विद्रोहाच्या प्रक्रियेत जिवंत जाणीव व्यक्त करतो. या कवीचा विद्रोह समाजव्यवस्था बदलविण्यासाठी व अस्मिता शोधण्यासाठी विद्रोहाचा जन्म झालेला आहे. विद्रोही साहित्याचा जन्म मराठी साहित्यात झालेला आहे. आणि महानवतावादी समाज निर्माण करण्याचा प्रयत्न या साहित्यातून होतो. वेदना, नकार, संघर्ष यातून विद्रोहाचा मुलभूत आशय समाज विचारातून व्यक्त झालेला आहे.

समाज जाणीव आणि विद्रोह

भारतातील वर्ण – जातिव्यवस्थेचा, समाज रचनेचा, अस्पृश्यतेचा, हिंदूधर्मसंस्कृतीचा व सामाजिक इतिहासाचा सखोल अभ्यास करून या देशाला विज्ञाननिष्ठ शास्त्री पध्दतीने मूलगामी व कांतिकारक विचारप्रणाली देणारे डॉ. बाबासाहेब आंबेडकर यांची नव्या परिवर्तन कांतिकारी समाज युगाचे प्रवर्तक म्हणून इतिहासामध्ये मुख्य नोंद झाली आहे. त्यांनी भारतीय समाजाला बुद्धिप्रामाण्य, विज्ञाननिष्ठ, इहवादी अशा वैचारिक जाणिवेचा दृष्टिकोन दिला. अंधारात चाचपडणाऱ्या अस्पृश्य समाजाला उजेडाची वाट दाखवून त्यांच्यात अस्मिता जागृत केली. भारतीय समाजात महत्त्वाकांक्षा निर्माण केली.

पिढ्यानपिढ्या अंधाराला कवटाळून जगणाऱ्या दलिताना आपला उद्धार आपणास स्वतःच्या पायावर उभे राहून केला पाहिजे. माणुसकीच्या सर्व हक्कांवर उच्चवर्णीयां इतकाच त्यांचाही मूलभूत अधिकार आहे व त्या हक्कासाठी झगडणे हे त्यांचे न्याय्य व पवित्र कर्तव्य आहे. याची तीव्र सामाजिक जाणीव प्रथम डॉ. बाबासाहेब आंबेडकरांनी दलित वर्गात निर्माण केली. समाजामध्ये अन्यायाविरुद्ध चीड व प्रतिकाराची भावना, स्वाभिमान, विद्रोह बंडाची चेतना आणि राजकीय, आर्थिक तसेच सामाजिक सांस्कृतिक क्षेत्रात वैचारिक जागृतीचा धगधगता आविष्काराचे महान कार्य डॉ. आंबेडकरांनी समाजात केले.

डॉ. बाबासाहेब आंबेडकर हे समस्त दलित, बहुजन, पीडित, शोषितांच्या जीवनाचे प्रेरणास्थान ठरले. “लक्षावधी पददलिताना धुळीतून धवलतेकडे आणि तूणवत्तेकडून तेजाकडे नेणारे डॉ. बाबासाहेब आंबेडकर या युगाचे महान शिल्पकार आहेत. दलिताना आत्मप्रतिष्ठेचे मूल्य व हक्काची भाषा देऊन त्यांना तेजस्वीतेचा स्पर्श देणाऱ्या डॉ. आंबेडकरांचे अद्वितीय व कर्तृत्व या पाश्र्वभूमीवर सूर्यतेजाचे लेणे ठरते.” डॉ. आंबेडकरांनी बहुजन समाजाला जीवनाच्या सर्व क्षेत्रात समर्थ व सक्षम होण्याची सामाजिक जाणीव करून दिली.

डॉ. बाबासाहेब आंबेडकरांच्या लेखनाचा आद्य हेतू सामाजिक प्रबोधनाचा होता. समता, स्वातंत्र्य, बंधुता निर्माण करण्याचा होता. डॉ. आंबेडकरांनी दलित, बहुजन समाजाचे वैचारिक जीवन समृद्ध केले. त्यामुळे आंबेडकरी इतिहासाला नवे वळण प्राप्त झाले. कोणतीही सामाजिक कांती प्रबोधनावाचून होऊ शकत नाही आणि या सम्यक कांतीसाठी डॉ. आंबेडकरांचे तत्वज्ञान हा त्यांचा प्रभावी आधार आहे. दलित शोषितांची मानसिक गुलामगिरी नष्ट करण्यासाठी सामाजिक जाणिवेची नितांत गरज आहे. बाबासाहेबांनी लोकशाही समाजावादाचे स्वप्न पाहिले होते, ते कृतीत आणण्यासाठी धर्मांतर हे पहिले पाऊल उचलले होते.

सामाजिक जागृती हा आंबेडकरवादी साहित्याचे उद्दीष्टे आहे. ठेविले अनंते। तैसेचि रहावे। चित्ती असू द्यावे समाधान। या सामाजिक जाणीवेविरुद्ध आंबेडकरी कवींनी विद्रोह केला. डॉ. बाबासाहेब आंबेडकरांच्या विचारांमुळे त्यांनी नेतृत्व दिलेल्या मुक्तिसंग्रामामुळे दलिताना अस्मिता जागी झाली. अंतरीचे धावे स्वभावे बाहेरी। या न्यायाने आंबेडकरवादी कविता उदयास आली. या कवितेचे नाते परिवर्तनवादी तत्वज्ञान व सामाजिक जाणिवेशी आहे. शोषणध्विष्ट समाज व्यवस्था उखडून टाकण्यासाठी दलित शोषित समाजाने जागृत होऊन आणि संघटित होऊन आपल्या न्याय्य अस्तित्वासाठी संघर्ष चालू ठेवला पाहिजे. याची जाणीव डॉ. आंबेडकरांनी करून दिली. सामाजिक जाणीव असल्याशिवाय सामाजिक परिवर्तन होऊ शकत नाही, यावर डॉ. आंबेडकरांची निष्ठा होती. डॉ. आंबेडकरांच्याच कृती-उक्तीचा, वाणी-लेखणीचा, विचारांचा वणवा म्हणजे आजची बहुजनांची सामाजिक व साहित्याची चळवळ होय. आजही दलिताना अस्पृश्यता, भेदभाव, सामाजिक विषमता विरुद्ध लढावे लागते. ही लढाई मागची सामाजिक जाणीव विद्रोहाला जागृत करते.

आपल्या हक्काची भाषा व सामाजिक जाणीवेच्या आविष्कारातून साहित्याचे रूप धारण केले. त्यातून आंबेडकरी कविता जन्मास आली. अन्याय, विषमता, वेदना, नकार, चीड, संताप या विद्रोहाची भावना साहित्यातून एकवटली. नव्या समाजव्यवस्थेचा, नव्या युगमूल्यांच्या प्रस्थापनेसाठी आंबेडकरवादी साहित्य प्रकर्षाने सिध्द झाले. आपल्या हक्कासाठी, संघर्ष पाहिजे या जाणिवेतून, सामाजिक परिवर्तनातून विद्रोही जाणीव व्यक्त करण्यात आली.

डॉ. बाबासाहेब आंबेडकरांनी दलित, शोषितांच्या मुक्या मनाला जागृत केले. स्वयंविकासाची व माणूस म्हणून जगण्याची प्रतिष्ठा दिली. “दलितानांच्या माणुसकीची, माणूस म्हणून असणाऱ्या त्यांच्या मूलभूत हक्काची अभ्युदयाच्या त्यांच्या आकांक्षेची, त्यासाठी द्यावयाच्या लढ्याची आणि आत्मोद्धाराच्या युगप्रवर्तक जाणीव डॉ. आंबेडकरांनी चेतविली. प्रेतवत दलित जीवनात त्यांनी चैतन्याचे दीप उजळले. दलितानांच्या जन्मसिध्द स्वातंत्र्याची निसंपन्न भवितव्यासाठी युगप्रवर्तक चेतना त्यांनी दिली. या चेतनेला दलित कविमनांनी काव्यातून रूपास आणले.” दलित समाजाची अस्मिता साहित्यातून सामाजिक जाणिवेतून व्यक्त झाली.

डॉ. आंबेडकरांची सामाजिक न्यायाची भूमिका समाजविकासाच्या प्रेरक तत्वांशी कटिबध्द झाली होती. समाज परिवर्तनाशी कटिबध्द होती. समाजपरिवर्तनासाठी सामाजिक लोकशाहीची प्रतिष्ठापना हे त्यांचे राजकीय ध्येय होते. सामाजिक लोकशाहीव्दारेच व्यक्ती व समाजजीवनात सर्वांगीण कांती घडून येत असते. अशी त्यांची निष्ठा होती. म्हणून समाजाला त्यांनी शिका, संघटित व्हा आणि संघर्ष करा, असा लोकशाही कांतीचा संदेश दिला.

डॉ. आंबेडकरांचा विचार हा गतिमान जीवनाचा विचार आहे. सामाजिक जाणीवतून विद्रोह पुकारणे हा या विचाराचा गाभा आहे. “समाज व राष्ट्रजीवनाच्या उत्कर्षासाठी निर्माण झालेले गतिमान असे संपूर्ण आंबेडकरी तत्वज्ञान म्हणजेच ‘आंबेडकरवाद’ होय. आंबेडकरवाद हा एक जीवनाचा गतिमान विचार आहे. त्याचप्रमाणे आंबेडकरवाद ही समाजवादी समाजरचनेची मूलभूत प्रेरणा आहे.” असे डॉ. रावसाहेब कसबे यांनी मांडले ते खेच आहे.

डॉ. आंबेडकरांचे सामाजिक तत्वज्ञानाची जाणीव ‘बहुजन हिताय – बहुजन सुखाय’ आहे. समाजपरिवर्तन आणि न्याय व समताधिष्ठित नवी समाजरचना निर्माण करणारी ठरली. आंबेडकरवाद हे समाजाभिसरणाचे व सज्जनाचे जसे हत्यार आहे. तसा तो समाजरचनेच्या नवनिर्मितीचा विधायक व डोळस दृष्टिकोणही आहे. एक प्रगमशील प्रबुध्द जाणीव आहे. आंबेडकरवाद हा युध्दा बुध्दवादच होय. आंबेडकरवाद म्हणजेच मूलगामी सामाजिक कांतीचे विज्ञानशास्त्र समजले जाते.

डॉ. बाबासाहेब आंबेडकरांनी केलेल्या दलितोध्दाराच्या चळवळीत स्वातंत्र्याची मूलभूत हक्काच्या मागणीची, व्यक्तिविकासाची दृष्टी होती. म्हणूनच त्यांनी अस्पृश्य समाजात जिद्द, चिकाटीव महत्वाकांक्षा निर्माण केली. कांतीकार विचारप्रणाली, सामाजिक लोकशाहीचे तत्व धर्मातर, संविधानात्मक विचार इत्यादी वैचारिक साधनांच्या बळावर डॉ. आंबेडकरांना सामाजिक जाणीवतून कांती घडवून आणता आली. हे त्या समाजात झालेले कांतीकारी परिवर्तन अत्यंत महत्वाचे व लक्षणीय ठरले आहे. माणसाच्या जाणिवेत आमूलाग्र परिवर्तन करण्याची फार मोठी ताकद होती. म्हणून शशोषणविरहीत समाजनिर्मितीचे डॉ. आंबेडकरांची स्वप्न त्यांना साकार करता आले. समाजवादी विचार रूजविण्यासाठी माणसाच्या जाणिवेत बदल होणे आवश्यक आहे. हा समाजवादाचा मूलभूत विचार आंबेडकरवादातून सिध्द झाला आहे.

भारतीय समाज एकाच वेळी मध्ययुगीन व आधुनिक अशा दोन युगात, दोन समाजव्यवस्थेत व च्या मानसिक अवस्थेत जगत आहे. या दृष्टीतून भारतीय समाजामनाचा, वर्ण, जातीभेद, धर्मव्यवस्थेचा साखोल अभ्यास डॉ. बाबासाहेब आंबेडकरांची चळवळ ही मुख्यतर समाजवादी समाजनिर्मितीच्या स्वप्नांची प्रेरणा देणारी एक सामाजिक चळवळ होती. या स्वप्नाला वास्तवरूप देण्यासाठी म्हणूनच सांसदीय लोकशाही व बौध्दधर्म ही दोन साधने आंबेडकरांनी वापरायचे ठरविले. राजकीय कांतीला सांस्कृतिक कांतीची पार्श्वभूमी असल्याशिवाय भारतात समाजवाद येऊ शकणार नाही. अशी डॉ. आंबेडकरांची आग्रही भूमिका होती. ही भूमिका योग्य आणि ऐतिहासिकदृष्ट्या न्याय्य होती.” यात शंका नाही.

सामाजिक जाणिवेचा उदय हा अटळपणे व्यक्ती व समाज यांच्या परस्परसंबंधातून होतो. आंबेडकरवादी कवितेतील सामाजिक जाणिव ही अस्सल स्वरूपाची आहे. ती जीवनाच्या अनुभूतीतून व्यक्त झाली आहे. समता, स्वातंत्र्य, बंधुत्व, सामाजिक न्याय व मानवी मूल्यधिष्ठित समाजव्यवस्थेसाठी वचनबध्द असलेली कविता विद्रोही पवित्रा घेऊनच वावरते. हा विद्रोह मराठी साहित्यातील विषमता पोसणाऱ्या परंपराविरुध्द, वाड्मयीन संकेताविरुध्द, लेखनाच्या भाशेविरुध्द आणि वाड्मयीन श्रेष्ठतेच्या निकषाविरुध्द तर दुसरीकडे येथील शोषण करीत राहिलेल्या समाजव्यवस्थेविरुध्द आहे. सामाजिक जाणिवेतून बांधिलकीतून समाजपरिवर्तनाचा लढा उभारला जातो. लढा यशस्वी करण्यासाठी विद्रोहाची भूमिका घ्यावीच लागते. समताधिष्ठित समाज रचना निर्माण करणे हे आंबेडकरवादी कवितेचे ध्येय आहे. शशोषणाधिष्ठित समाजव्यवस्था उखडून टाकण्यासाठी, न्याय अस्तित्वासाठी संघर्ष करावा लागतो याची सामाजिक चेतनेची जाणीव डॉ. आंबेडकरांनी करून दिली.

**नैतिक जाणीव आणि विद्रोह**

आंबेडकरवादी कवितेतील जाणीव बुध्दीवादी तत्वज्ञानातून निर्माण झाली आहे. या कवितेने अनात्म, अनिश्चरवादी, बुध्दिप्रामाण्यवादी, न्यायवादी आणि मानवतावादी विचार जोपासला आहे. धर्म-कर्मकांड, अमानवी पाखंडाविरुध्द आणि वर्ण, जातिव्यवस्था व विषमतेविरुध्द आवाज उठविला. त्यामुळे ही कविता समाजजीवनाचा कांतीसंदर्भ हा आशय ठरला. व्यक्तिस्वातंत्र्यवाद, बुध्दिप्रामाण्यवाद, विज्ञानवाद, समाज, स्वातंत्र्य आणि बंधुता ही नैतिकता, आधुनिक जीवनमूल्ये आंबेडकरवादी कवितेत अंतर्भूत आहे.

डॉ. आंबेडकरांच्या तत्वज्ञानात बुध्दांच्या विचारांची नैतिक जाणीव प्रकट झाली आहे. नैतिकता हे धम्माचा उद्देश सृष्टीची पुनर्रचना पुनिर्माण करणे हा आहे. माणसाला जगण्याकरिता बुध्दाने दोन प्रधान तत्वे सांगितली आहे. ती म्हणजे प्रज्ञा आणि करूणा प्रज्ञा म्हणजे निर्मळ बुध्दी व करूणा म्हणजे प्रेम आंबेडकरवादी कवितेत या तत्वज्ञानाचा मोठा परिणामकारक प्रभाव पडला. आंबेडकरवाद धर्माधता अंधश्रध्दा कुनीती या सर्व मानल्या गेलेल्या अनीतीला नाकारणारे तत्वज्ञान म्हणजे आंबेडकरवाद होय. समाधी, विपश्यना, गुढवाद, रहस्यवाद यांना नाकारून ऐहिक जीवन जगण्याला प्रेरीत करणारी, बहुजनांच्या उन्नतीचा मार्ग दाखविणारी जीवनप्रणाली व बुध्दाचा धम्म म्हणजे आंबेडकरवाद.

बुध्दाने जातिव्यवस्थेचा प्रचंड विरोध केला. वेद प्रमाण आहे हे नाकारले. चातुर्वर्ण्याधिष्ठित समाजरचनेचा विरोध बुध्दाप्रमाणेच डॉ. आंबेडकरांनी केला आहे. बुध्दाचा धम्म हा प्रवर्तनशील तो कालसापेक्ष आहे, विज्ञाननिष्ठ आहे. तसेच धम्म विश्व बदलविण्यास प्रवृत्त करतो. हा विचार मनोमन पटल्यामुळेच डॉ. आंबेडकरांनी तो स्वीकारला. एवढेच नव्हे तर त्यानुसार चळवळ केली. बुध्दाचा विचार तत्वज्ञान हेच डॉ. आंबेडकरांच्या चळवळीचे, संघर्षाचे प्रमुख अधिष्ठान होते.

डॉ. बाबासाहेबांच्या मते, “धर्माने पददलित समाजाचा मानसिक व नैतिक कायदा कोणता होणार हे प्रत्येक धर्माने घोषित केलेच पाहिजे, यात संशय नाही, असा फायदा ज्या धर्माने होणे शक्य नाही तो धर्म ठार मारणारच. हिंदू धर्म हा आपल्या धर्मातील मागासलेल्या व अस्पृश्य वर्गाला मानसिक व नैतिकदृष्ट्या उपकारक होणार नाही, याचे उत्तर उलट पक्षीच मिळणारे आहे.” आंबेडकरवादी नैतिक जाणीवतून अनात्मवाद, मानवतावाद, अनिश्चरवाद, गतिवाद, विज्ञानवाद, जडवाद व इहवादाचा, पुरस्कार ही जाणीव करते.

आंबेडकरवादी जाणीव जीवनवादी, परिवर्तनावादी आहे. विद्रोह, वेदना, कांती, आशावाद हा त्या जाणिवेचा गाभा आहे. स्वर्ग, पुनर्जन्म, ईश्वर, आत्मा या संकल्पना बुध्दाने नाकारल्या आणि प्रज्ञा, शील, करूणा, मेत्री या संकल्पनाची आवश्यकता प्रतिपादन केली. म्हणून बुध्दाची जीवनमूल्ये अशोकाने नीतित्व म्हणून राबविली. तयाची मानवी जीवनातील गरज ओळखून ती आपल्या शीलालेखावर कोरली. आज जगभरची जी लोकशाहीमूल्ये आहेत ती मानवी जीवन सुंदर बनविण्यासाठी पुरस्कृत केलेली आहेत. विचारच महत्वाचा असतो. विचारच जिवंत असला पाहिजे. जीवनाला सुंदर करणारा विचार जिवंत ठेवणे हे प्रत्येक चांगल्या माणसाचे अद्य कर्तव्य आहे.

नैतिकतेचा संबंध माणसाशी निगडित आहे. माणसाने माणसावर प्रेम करण्याची गरज हीच नीतिची जननी आहे. “It does not require the sanction of God. It is not to please God that man has to be moral. It is for his own good that man has to love man.” Gk केवळ मानवी नीतीचा जाहिनामा आहे. हा बुध्दिप्रामाण्यवाद आहे. आंबेडकरवादात नीतीला फार मोठे स्थान आहे.

नीतीचे ईश्वर आणि माणूस हे परिणाम पूर्णतः विघातक म्हणून नाकारून माणूस आणि माणूस हे प्रस्तु परिणाम आंबेडकरवादी कवितेत नैतिकतेला प्राप्त झाले आहे. समाजसापेक्ष मानव समूहाचा आपसातील व्यवहार म्हणजे नीती. विश्वातील नैतिक व्यवस्थ परमेश्वरावर अवलंबून नाही ती बऱ्या वाईट कर्मनियमावरच अवलंबून आहे. आंबेडकरवादी साहित्यात नैतिक जाणिवेला मूल्य प्राप्त झाले आहे. नैतिकता म्हणजे बंधुता, हाच उज्वल मानवी जीवनाचा, कल्याणकारी मानवी सहजीवनाचापाया आहे. आंबेडकरवाद हे मनुष्यकेंद्री म्हणजे ऐहिक मानवी जीवनाला केंद्र मानणारे तत्वज्ञान आहे. माणसाचे ऐहिक जीवन, त्यातील प्रज्ञा आणि करूणेवर आधारलेले संबंध हे आंबेडकरवादाचे ध्येय आहे. कर्तृत्व संपन्न जगण्यासाठी सुंदर, संपन्न नैतिकतेची गरज आहे.

आंबेडकरवादी नैतिकतेची जाणीव व्यक्तिविकासवादी आहे. व्यक्तीचा विकास समाजातच होतो. पण या समाजाजवळ सर्व व्यक्तींना विकासाची मुक्ती संधी देणारी नैतिकता नसेल तर त्या समाजाची प्रगती होणार नाही. नैतिकता आंबेडकरवादाचे मुख्य मूल्य आहे. ते जोपासले पाहिजे हेच आंबेडकरवादाचे नीतीविषयक धोरण आहे.

#### निश्कर्ष

आंबेडकरवादी कवितेतील विद्रोह प्रस्थापित मूल्यांविरुद्ध व व्यवस्थेविरुद्ध पुकारलेला तो आंबेडकरवादी साहित्याचा ध्येयवाद आहे.

वर्ग, जाती, धर्म, विशमता नष्ट करण्यासाठी वेदना, विद्रोह, नकार, मानवता, प्रज्ञा, करूणा, संघर्षशिलता असे आंबेडकरवादी कवितेचे विद्रोही स्वरूप आहे.

आंबेडकरवादी कवितेने या देशातील गुलामीचे तत्वज्ञान नाकारले आणि जडवादी तत्वज्ञानाशी अर्थात बुद्ध, फुले, आंबेडकर या विचारांशी नाते जोडले.

**A Critical Analysis Of The Challenges In The Process Of Talent Acquisition And Retention****Prof. Minal Mahavir Nistane**

Assistant Professor, Department of Management Studies, Prof. Ram Meghe Institute of technology &amp; research, Badnera-Amravati, Maharashtra.

**Abstract**

*Talent Acquisition would be a newly coined terminology for many of us but it's not new for the HR practioners. Talent acquisition, as defined by Deloitte, is "a strategic approach to identifying, attracting and on boarding top talent to efficiently and effectively meet dynamic business needs. There is always a huge potential for highly talented resource globally and acquiring such talent has always been a challenging task for practioners. This paper had tried to examine and review the research papers which shares global perspective about different strategies of Talent acquisition and also its implications. As companies increasingly compete on the basis of talent, their success will largely hinge on their ability to recruit, develop, deploy and retain skilled people at every level from production employees and technicians to scientists and engineers to middle managers and executive leaders. Because of this critical issue, companies have started formulating strategies and techniques for acquiring Talents. Hence it becomes critical for understanding different Talent Acquisition strategies across globe and understands its implications. The research method used here is purely qualitative as we could proceed with secondary data analysis by referring and analysing research papers of this nature and the findings & suggestions made here are based on grounded theory approach.*

**Keywords**— Talent Acquisition, strategies, Social Recruitment, Employer Branding, E Recruitment**Introduction**

When you hire proactively rather than reactively you reduce the financial and emotional risks of a hiring a bad employee. Putting a talent acquisition strategy to work allows your company to build a relationship with a candidate over time, even if they aren't actively searching for a job, just yet.

Whether your team operates in four countries or 40, a global talent acquisition strategy can help you target top talent, regardless of where that talent is based. A flexible, border-fluid approach to talent acquisition enables the most creative enterprises to build and maintain position as market leaders.

As a talent executive or HR leader, you can add value by initiating a business conversation around this approach. To help spark the discussion, here are five key benefits of talent acquisition driven by a global focus.

**Talent acquisition benefit 1: operational efficiency**

Companies with far-reaching operations often enlist local agencies to help source hires. Alternatively, a global approach to talent acquisition helps your business streamline hiring processes. It can reduce costs while improving communication about hiring needs and regional skills gaps.

**Talent acquisition benefit 2: better candidate journey and employee experience**

Global talent acquisition also enables greater consistency along the candidate journey. With a unified approach to candidate messaging, you can ensure each touch point represents your employer brand.

**Talent acquisition benefit 3: richer diversity and tangible business gains**

Thanks to advanced collaboration, messaging, and video-conferencing technologies, companies can schedule brainstorming meetings with team members on different continents. These tools allow your business to access the skills, knowledge, and creativity of people from across the globe.

**Talent acquisition benefit 4: local insights into new markets**

When expanding into new and emerging markets, companies must understand the local culture, economic climate, business practices, and effective sales strategies of each region. These are not the same the world over.

**Talent acquisition benefit 5: business solutions powered by key skills**

Flexible work incentives intensify the competition for skilled workers. But a strong global talent acquisition strategy can let you cast a worldwide net to attract the people who offer key creative and cognitive skills.

**Research Methodology:**

The research paper is an attempt of descriptive research, based on mainly secondary data collected from various sources, such as reference books, magazines, journal, & research papers & websites which are sited at the appropriate places related to above.

**Research Objectives:**

- To understand the concept of talent acquisition. . To identify importance of talent acquisition.
- To know the process of talent acquisition.

**Research Design: Descriptive Research Design**

**Data Sources: Secondary Data collected from Books, internet, Research Journals****WHY EFFECTIVE TALENT ACQUISITION VITAL FOR BUSINESS**

Those outside of the human resources department might dismiss talent acquisition; many people are apt to simply write it off as recruiting. Recruitment is not the same as acquiring talent, however, and many businesses are discovering just how important the process of acquiring talent actually is. In fact, effective talent acquisition is vital for just about any business and here's why.

**Get the Right People**

One of the major differences between acquiring talent and simply recruiting is focus. Recruitment focuses on the here and now; companies are most interested in getting people into open jobs as soon as possible. They're less concerned with the "fit" of the candidate.

**Invest In The Future**

Perhaps the most crucial thing about talent acquisition is that it is forward looking. Your senior management may not be with you forever—some of them may be looking toward retirement, while others may move on to opportunities with other firms.

**Save Time and Money**

One last reason effective talent acquisition is so important is that it ultimately saves time and money. Most employers see recruiting as quick and easy it gets someone into a position quickly, without too much effort.

- **Talent Acquisition Planning and Strategy:** ensures business alignment, examines workforce plans, requires an understanding of the labour markets, and looks at global considerations.
- **Workforce Segmentation:** requires an understanding of the different workforce segments and positions within these segments, as well as the skills, competencies, and experience necessary for success.
- **Employment branding:** includes activities that help to uncover, articulate and define a company's image, organizational culture, key differentiators, reputation, and products and services. Employment branding can help advance the market position of organizations, attract quality candidates and depict what it is truly like to work for that organization.
- **Candidate Audiences:** necessitates defining and understanding the audiences in which an organization needs to source for specific roles. Different sourcing strategies should be applied based on the understanding of the jobs and where the audiences will come from to fill them.
- **Candidate Relationship management :** includes building a positive candidate experience, managing candidate communities, and maintaining relationships for those candidates not selected.
- Merits and Analytics are the continuous tracking and use of key metrics to drive continuous improvement and to make better recruiting decisions, to ultimately improve the quality of hire.

**The Changing Recruiting Landscape:** Changing recruitment philosophies Of all the different disciplines that come under HR's remit, recruitment has probably experienced the most disruptive change in recent years.

- On- premise and outsourced options while recruitment planning is best approached in the context of a broader talent management strategy; it will often be executed as a standalone activity.

**Managing The Fundamentals**

- The business case for automation Few requests for IT investment stood up to scrutiny during the height of the global financial crisis, but amid signs of economic recovery, the business case for investing in software and services to support recruitment activities is more likely to get a fair hearing, particularly if its built on solid returns.
- **Reduced costs:** Reducing the time spent by line managers, recruiters and HR administrators on the recruitment cycle brings a direct cost saving, triggered by measures such as:
  - Automating manual workflows
  - Implementing self-service for HR, managers, employees and candidates
  - Receiving applications through pre-designed Web forms, which reduce rekeying and associated errors and also standardizes application to make comparison easier.
- **Automated filtering of CVs.**
- The ability to manage high volumes:- In times of high unemployment, the average volume of application for each post increases, putting considerable stress on organization that rely on manual processes. To deal with high volumes organizations face a difficult choice of throwing more resources at the problem which increases cost or arbitrarily viewing selected application which increases the chance of missing high applicants.

- **Faster response:-** During high unemployment, the speed at which organization can filter job application, securing candidates, manage the interviewing the process carry out the background checks and make offers can make the difference between a successful heir and losing high quality candidate to a competitor.
- **Improved productivity:** - Automating process and data management enables new recruits to get up to speed more quickly.
- **Process standardization:** - By managing workforce throughout the recruitment process, organization can extent best practices across all hiring programs.
- **Improved employee referral processes:** - Referrals are a high cost effective sourcing strategy. Organizations can improve the effectiveness of their referral program by automating key processes such as candidate submission and referral fee pay out.
- **Improved reporting and analysis:-** One by product of automation is that it generates a central store of electronic data for analysis, enabling organization to improve recruitment efficiency and effectiveness, focus their efforts on filling critical roles, identifying the most cost effective sources and reduce spend on agencies.
- Distinctions between software and service offerings Recruitment software come in many different guises, offered both for conventional on premise systems and through outsourcing arrangements.

- **Completing the acquisition cycle:**

on boarding The final stage of the recruitment process is too smooth the new employee's path into the organization and enable them to become fully productive a step often know as on boarding, It' a process that touches multiple business functions since hiring a new employee involves setting up a suitable workspace; ensuring that PCs, laptops, telephones and other mobile devices are available and configured; putting relevant data into security and associated front of house systems; enabling access to software applications and services; and ensuring that payroll; benefits and associated systems are up-to-date.

### Web Based Recruitment

- Informational and transactional activities Web based recruitment is rapidly becoming a standard business requirement and most organizations now recognize that they need to provide some level of applicant interface on their websites. This will include the ability to accept job applications online. Web based recruitment is spitted into two categories.
- The Business Case

### From a business case perspective, the potential benefits of web-based recruitment include:

- Improved Talent Acquisition: Based on the ability to identify high performer and beat competitors to their signature. This stems form:
- Improved sales and marketing capability including the ability to extend the reach of recruitment campaigns and market the employer's organizations on the web.
- Enhancing the employers' brand in the shape of a modern website which is particularly important for recruiting among a younger talent pool.

### Social media:

The resource factor Recruitment via social networking sites such as Facebook or Linked in is

Still greeted with some scepticism in the HR community. According to survey, opinion is sharply divided among HR managers about the potential benefits with 38% of respondents agreeing that social media sites provide a great way to reach potential new recruits- and 26% disagreeing.

### Conclusion

This research primary focus is on people management, multiple country payroll, customer relationship management, and financial management.

When speaking about global perspective, we understand that Talent Acquisition has emerged with lot many innovative changes and World is getting ready for the Talent Hunt with all its new innovative strategies. When speaking about India, We are developing country and there is a huge potential seen with us to become the global hub for talent and our talents are being easily attracted globally for various reasons. But it becomes necessary for us to acquire the potential talent and retain them with us so that we can grow even faster than the present growth rate. Like other countries, Organisations in India, also need to concentrate on Talent Acquisition and start strategizing their existing model of Acquisition. This would help the companies to compete globally. Similarly, we believe that this research would definitely support Indian Industry in implementing the best practices of Talent Acquisition.

**Need and Scope of Innovation In Home –Economics****Dr. Nilima P. Mahore**

Yuvashakti Arts and Science College Amravati

**Abstract**

*Home –Economics is a vast subject, and its branches are broad. This subject covers each and every part of life. This subject not only teaches us about the life, but it also helps us to set our career. The development of a person to be professionally, technically and academically trained is the main motive of Home –Economics. If we deeply study Food and Nutrition, then there is a huge scope in Dietetics and Dietitian. In textile also there is each and every information about every type of loom , knitting machines, each and every aspect of fabric manufacturing, that's why there is a wide scope in fabric designing, color designing, house designing. In extension education there is a huge scope in youth development, leadership development, and rural development. In family resource management from financial management, purchasing management to office management there is great scope to set our career. Consumer Economics and Human Relationship are very important topic in this modern era.*

**Introduction**

Home-Economics is an ancient subject. Its broad areas of concern revolve around the goal of helping families meet their basic needs and realize satisfying personal, family and community goals based on an understanding of the physical, psychological and socio-economic needs of the family.

It was these pioneering women who first set out the seven areas of home economics in an effort to teach girls how to properly care for a home and family and to open new career avenues. Now known as family and consumer science according to the Los Angeles Times, modern home economics courses now offer a more inclusive education to all students, including those in their life.

The main goal of home economics is to train persons to be professionally and academically competent in imparting technical and vocational skills to students at different levels of the educational system. Home economics has played other roles in society. The main branches of home economics are

- Food and Nutrition
- Textile
- Human development
- Family resource management
- Extension education
- Consumer economics
- Human relationship

These are the main branches of home economics. Home economics helps people to maintain their homes and organize their lives. This term was formerly used to describe female domestic work, but nowadays, the definition of home economics has been expanded due to the increased influence of households on the national economy. Now a days there is a wide scope of career in the various branches of Home economics. Therefore having knowledge about it is very important

**Objectives of the study:**

- 1) To show that Home-Economics touches each and every part of our life.
- 2) To explain that Home –Economics teaches us to live our life in a better way.
- 3) To explain that there is a wide scope in this career field if we innovate new things.
- 4) To show that if we will develop this subject then this will become a powerful subject.

**Recent scope of Food and Nutrition.**

Nutrition is the study of nutrients in food, how the body uses nutrients, and the relationship between diet, health, and disease. There is a lot of overlap between what nutritionists and dietitians do and study. Some nutritionists work in a healthcare setting, some dietitians work in the food industry, but a higher percentage of nutritionists work in the food industry and in food science and technology, and a higher percentage of dietitians work in healthcare, corporate wellness, research, and education.

Educational qualifications required: B.Sc. in Home Science (Food and Nutrition) or B.Sc. in Nutrition and Dietetics or other relevant B.Sc. course. After B.Sc., one must also complete M.Sc. or PG Diploma in Clinical Nutrition or Food & Nutrition internship stint at any one of the many hospitals recognized by the IDA OR possess 2 years work experience at any multidisciplinary hospital as a dietician.

- Diploma courses in food and nutrition
- Diploma in Dietetics
- Diploma in Nutrition and Dietetics
- Diploma in Food Science and Nutrition
- Diploma in Dietetics and Clinical Nutrition
- Diploma in Nutrition and Food Technology
- Textile

Textile designers are the trained professionals having sound technical knowledge of each and every aspect of fabric manufacturing. Textile designer must have knowledge of yarn making, weaving, knitting, dyeing, finishing processes, and also knowledge about different types of looms, knitting machines and printing processes. Any textile designer can work for creating textile to be used in one or both of these categories and these all steps are in textile the branch of Home-Economics

A textile designer can be employed in the garment, fashion, home furnishing and the interiors segment among other industries. Specifically in garments there is Fashion Designing, Garment Designing, Textile Designing, Cloth Design and Fabric design. Export houses employ a good number of textile designers in the form of designers or merchandisers. .

- Job Profile of a Textile Designer:
- Fabric Designing
- Cloth Designing
- Color Specialists
- Fashion Designing
- In house designing

### Extension education

Extension Home Economics is program for the homemaker. It reflects the needs of contemporary living, with emphasis on consumer education, management, and family economics. It is the home economist in the county Extension office who carries this educational program to homemakers. They are professionally trained, hold a college degree and may be studying for another. These specialists are trained in nutrition, family economics, home management, housing and home furnishings, clothing and textiles, human relations, child development, and other fields.

### Recent scope in extension education

It includes all activities of rural development. So extension programmers should be dynamic and flexible. The areas indicating scope of Extension are listed below:

- Increasing efficiency in agricultural production.
- Increasing efficiency in marketing, distribution and utilization of agricultural inputs and outputs
- Conservation, development and use of natural resources.
- Proper farm and home management
- Better family living.
- Youth development.
- Leadership development.
- Community and rural development.
- Improving public affairs for all round development.

### Family ResourceManagements

Management education helps the homemaker consider family life as a whole and the ways that family goals can be reached. we learns to apply the "decision-making process" in Our daily life.Through home management education, a home- maker learns to make efficient use of time, energy, and money, for better living for all the family Housing and Home Furnishings The homemaker hopes to create an environment in which she and her family can develop their highest potential. Extension programs teach her the economic and social aspects of housing, how to plan space requirements, how to create home beauty and comfort. She learns how to select durable, labor-saving, and attractive furnishings and equipment at a price that fits the family budget.

- Recent Scope Of Management
- Human Resource Managements.

- Marketing Management:
- Production Management:
- Material Management:
- Purchasing Management:
- Maintenance Management:
- Office Managements

### Consumer Economics

Extension provides unbiased consumer information that will help families get the most satisfaction from the money they spend for goods and services. It also helps homemakers make better use of the things they buy. Home economists teach them how to use credit wisely, show them how our economic system functions — how it affects them as consumers.

Young people are important consumers. Home economics programs help them think through their values and learn to consider the budget needs of the rest of the family.

### Human Relationship

From Extension home economists, homemakers learn about the growth of individuals and their relationships with others. They study the whole person, the whole family, and the whole community.

Programs include teaching parents more about . . .

- Children, with emphasis on their developmental needs and tasks in a changing society.
- Family relationships at different stages in the life cycle.
- Community resources that can help them.

Basically Home-Economics is very important subject and there is a need to innovate something new in it because it is the back bone of our life. Therefore if we will make some innovations in it then this subject will immerge as a powerful subject.

## समकालिनता आणि आंबेडकरवादी कविता

डॉ. शांतरक्षित गावंडे

नेहरू महाविद्यालय, नेरपरसोपंतजि. यवतमाळ

## सारांश

कविता या वाङ्मयप्रकाराचे प्राचीन कविता, अर्वाचिन कविता, समकालीन कविता अशा विविध रीतीने वर्गीकरण करता येते. यापैकी समकालीन कविता म्हणजे कालसंगत जाणिवांचा आविष्कार होय. एकूणच मराठी कवितेत १९४५ नंतर समकालीन जाणिवा व्यक्त झाल्या. आंबेडकरवादी कवितेतही १९६० नंतर सामाजिक वास्तव, महानगरीचे भेसूर चित्र, सांस्कृतिक ताणतणाव जोरकसपणे व्यक्त झाले.

१९६० नंतर आरती प्रभू, चित्रे, कोल्हटकर, ग्रेस, परब, महानोर, गणोरकर, डहाके आदी कवींनी समकालीन जाणिवांचा आविष्कार केला तर नामदेव ढसाळ नारायण सुर्वे यांनी सामान्य माणसांचे संवेदन अभिव्यक्त केले. यात ठळक वैशिष्ट्य असे लक्षात येते की, मराठी कवितेच्या मध्यवर्ती प्रवाहात वंचितांच्या संवेदनापेक्षा महानगरीय जाणिवा, भावनिक घुसमट दिसून येते. समकालीन कवितेवर अवास्तव व्यक्तिवादाचा प्रभाव आहे. मर्दंकरांच्या आकृतीवादातून ती मुक्त होऊ शकली नाही. लघुनियतकालितून लिहिण्यात येणाऱ्या कवितेत अगतिकता जीवनातील विसंगती दिसून येते. लैंगिक प्रतिमांचा वापर दिसून येतो.

आंबेडकरवादी कवितेने मात्र थेट माणूसकेंद्री कविता लिहिली. त्यात वहिष्कृत अपेक्षित शोषित जीवनाचा उद्गार आहे. यात प्रातिनिधिक कवी म्हणून नारायण सुर्वे आणि नामदेव ढसाळ यांच्या कवितेची वैशिष्ट्ये पहावयाची आहेत.

नारायण सुर्वे यांनी कामगार, कष्टकरी लोकांच्या संवेदना आपल्या कवितेतून व्यक्त केल्या. नव्या समाजरचनेच्या स्वप्नपूर्तीसाठी सुर्वे विद्रोही भूमिका घेतात. दुसरे कवी नामदेव ढसाळ यांनी मराठी कवितेचे बुरूज ढासळविले. सळासळा विद्रोह आणि जगण्याची वास्तववादी भाषा हे त्यांच्या कवितेचे वैशिष्ट्ये आहे. अशारितीने ढसाळ आणि सुर्वे यांची कविता समकालीन कवितेहून पूर्णतः वेगळी आहे. मार्क्सवादी कविता लघुनियतकालिकातील कविता यापेक्षा आंबेडकरवादी कविता प्रकृतीने वेगळी आहे. सर्वकष मानवी कल्याणासाठी विद्रोहाचे लेणे घेऊन ती मराठी विश्वात दाखल झाली.

## समकालिनता आणि आंबेडकरवादी कविता

साहित्याचे वर्गीकरण करताना 'प्राचीन साहित्य', 'आधुनिक साहित्य' आणि 'समकालिन साहित्य' अशा तीन प्रकारे करण्यात आलेले आहे. यानुसारच कवितेचे वर्गीकरण तीन प्रकारे करण्यात येते 'प्राचीन कविता', 'अर्वाचीन कविता' आणि 'समकालीन कविता' हे तीन प्रकार होय. याशिवाय कालखंडा व्यतिरिक्त आशयानुसार, जाणीवेनुसार कवितेचे प्रकार करण्यात येतात. येथे समकालील काव्यप्रवाह आणि साठोत्तरी काव्यप्रवाह यातील अनुबंध शोधायचा आहे. त्याकरिता प्रथम समकालीनता म्हणजे काय ते पाहू या.

"समकालीन म्हणजे काळाच्या बरोबर असणे, कालसुसंगतता हे समकालीन साहित्याचे प्रमुख वैशिष्ट्ये असते. त्या काळात घडलेल्या घटनांचे पडसाद ज्यात उमटतात, त्यास समकालीन साहित्य म्हणतात." यशवंतराव चव्हाण महाराष्ट्र मुक्त विद्यापीठाच्या पुस्तकात "समकालीन साहित्य म्हणजे जे साहित्य आपल्या काळाबरोबर आहे. ज्या काळात ते निर्माण होत असते, त्या काळाचे प्रतिबिंब आहे. त्या काळातील विचार, जाणीवा, मते ज्या साहित्यातून व्यक्त होतात, असे साहित्य" १

या संबंधीचे अधिक विवेचन करताना याच पुस्तकात पुढे स्पष्टीकरण आहे, त्यानुसार,

"..... या काळातील मानवाच्या इच्छा, आकांक्षा प्रयत्न, असहायता, पराभव, वेदना, विद्रोह, स्वप्ने इत्यादींचा प्रमाणिक आविष्कार साहित्यातून होतो. त्यामुळे त्याला समकालीन साहित्य म्हटले जाते." २

समकालीन साहित्याचा कालखंड १९४५ पासून मानण्यात येतो. प्रस्तुत अभ्यासाविषयानुसार १९६० नंतरच्या कवितेचा येथे विचार करायचा आहे.

१९६० नंतरचा काळ वेगवेगळ्या सामाजिक सांस्कृतिक राजकीय परिवर्तनाचा कालखंड आहे. त्यामुळे वाङ्मयीनदृष्ट्याही हा परिवर्तनाचा काळ आहे. १४ ऑक्टोबर १९५६ ला डॉ. बाबासाहेब आंबेडकरांनी धम्मचक्र प्रवर्तन केले. १९६० लाच महाराष्ट्र राज्याची निर्मिती झाली. १९६७ ला नक्षलबाडी येथे सशस्त्र उठाव झाला. त्यातूनच पुढे नक्षलवादी चळवळ उदयास आली. १९६८ ला फ्रान्स आणि जर्मनी येथील विद्यार्थ्यांनी आंदोलने केली. याच काळात अमेरिकेने व्हिएतनामवर युद्ध लादले, तर चिनमध्ये माओ-त्से-तुंग यांच्या नेतृत्वाखाली लाल क्रांती झाली. वाङ्मयीनदृष्ट्या पाहिले तर लघुनियतकालिकांची चळवळ निर्माण झाली. भारतीयांसोबत पाश्चिमात्य लेखकांचे आदानप्रदान वाढले. १९६२ मध्ये अशोक शहाणे यांची 'मराठी वाङ्मयावर क्ष किरण' यातून सडेतोड मांडणी केली. शिक्षणाने आत्मभान प्राप्त झालेली पिढी विद्रोह व्यक्त करू लागली. आंबेडकरवादी साहित्य आणिदलित पंथर या चळवळी समांतर रीतीने १९६० नंतरच निर्माण झाल्या. अशारीतीने उपरोक्त मानवी स्थितीचे पडसाद १९६० नंतरच्या साहित्यात उमटले आहेत, त्यामुळेच १९६० नंतरचे साहित्य समकालीन साहित्य आहे. ३

एकंदरीत, समकालीन जाणिवांचा समर्थ आविष्कार आंबेडकरवादी कवितेतून झाला. आंबेडकरवादी कवितेत राजकीय, सामाजिक वास्तव महानगरीचे भेसूर चित्र, सांस्कृतिक ताणतणाव जोरकसपणे व्यक्त झाले.

## समकालीन कवितेत आंबेडकरवादी कवितेचे वेगळेपण

१९६० नंतरच्या समकालीन कवितेचा विचार करताना आरती प्रभू, मधुकर केचे, दिलीप चित्रे, भालचंद्र नेमाडे, तुलीसी परब, ग्रेस, ना. धो. महानोर, प्रभा गणोरकर, वसंत आबाजी डहाके, गुरूनाथ धुरी इ. कवींचा विचार करावा लागतो. या

कवींकडून नव्या जाणिवेची कविता येत होती. परंतु सुर्वे आणि ढसाळ याच काळात लिहित होते. परंतु ढसाळ, सुर्व्याची कविता सामान्य माणसांच्या संवेदना व्यक्त करणारी कविता होती.

उपरोक्त सर्व कवींच्या कवितांचा धावता आढावा घेणे आवश्यक आहे. त्यावरून समकालीन कवितांचा धावता आढावा घेणे आवश्यक आहे. त्यावरून समकालीन कवितेची वैशिष्ट्ये लक्षात येतील आणि आंबेडकरवादी, आदिवासी कवितेचे वेगळेपणही लक्षात येईल.

चिंतामणी त्र्यंबक खानोलकर यांचे 'आरती प्रभू' हे टोपण नाव आहे. त्यांचा 'दिवे लागण' (१९६२), 'नक्षत्रांचे देणे' (१९७५) हे महत्वाचे कविता संग्रह आहेत. त्यांच्या दिवेलगण कविता संग्रहातील पुढील ओळी पहा

अशा रस्त्याने जाता येते।

गटाराच्या घाण पाण्यात पाहा तरी

पाहा तरी त्यांना कसे न्हाता येते।

महानगरातील मध्यमवर्गीय वास्तव्याचे चित्रण येथे आहे. मुळात खानोलकर भावकवी परंपरेतील कवी आहेत. 'मर्देंकरी कवितेचा वारसा पचवून सौंदर्यवादी आणि मानवी अस्तित्वासंबंधी सामाजिक चिंतन अशी खानोलकरांची कविता आहे'४ तर 'चित्रे याच्या कवितेचा स्वभाव अतिवास्तववादी – अतिव्यक्तिवादी असा आहे' मराठी व पाश्चात्य परंपरेचे संस्कार पचवून आधुनिक स्वरूपाची वेगळी स्वतंत्र कविता चित्रे यांनी लिहिली.'५

नियतकालिक आणि लघु अनियतकालिक यात कविता लिहिणारे महत्वाचे कवी म्हणजे अरूण कोलटकर. कोलटकरांनी मराठी आणि इंग्रजीत रचना केल्या. कोलटकरांनी भाषेची मोडतोड केली. अनोखी प्रतिमासृष्टी निर्माण केली. त्यांच्या काही ओळी पाहिल्यानंतर त्यांच्या कवितेचे वेगळेपण लक्षात येईल.

“टचकन उमलते बेवारशी तृप्ती

पण्यातझुगारलेल्या सिगारेटसारखी

पिकतात खपतात जन्मांध वांगी

तृष्णाकाठी

डोंगर हादरले अर्थव्यवस्थेसारखे

पहून त्याच्या यमक्या टापांचे कथनकौशल्य

खडकावर फुटलेल्या निःसंकोच लाटेतून कबुतरे उडाली”

त्यांच्या 'दिवे' या कवितेतील ओळी पुढील प्रमाणे आहेत –

“अन् मी खिशातनं रूमाल काढणार

तेच माझी करंगळी खाली पडली

ती मी दुसऱ्या हाताने उचलून घेतली

अन् रूमाल नाकावर धरणार

तर नाकच निसटून रूमालात आलं

ते रूमालात गुंडाळून मी खिशात टाकलं”

वसंत आबाजी डहाके यांनी कोलटकरांच्या कवितेला 'अतिवास्तव चित्रकला आणि अतिवास्तव चित्रपट यांचा मेळ'६ असे वर्णन केले आहे. तर रा.ग. जाधवांच्या मते, "कोलटकरांची कविता रीतिलाघवलक्षी आहे, भाषिक हालचालीची आहे. आकृतीवादी माध्यमवर्गीय आहे.७

अरूण कोलटकरांची बहुतांश कविता अनियतकालिकातून प्रकाशित झाली. कोलटकरांप्रमाणेच वसंत दत्तात्रेय गुर्जर, भालचंद्र नेमाडे, सतीश काळसेकर, राजा ढाले, तुलसी परब, मनोहर ओक, चंद्रकांत पाटील, चंद्रकांत खोत यांनीही लघुनियतकालिकातून कविता लिहिल्या. "लघुनियतकालिकातून आलेल्या बहुतेक कवितांमधून मनुष्याची असहायता, अगतिकता, जीवनातील विसंगती, अर्थहिनता व्यक्त होते. चित्रे, कोलटकर, गुर्जर, खोत, ओक हे सर्वच कवी महानगरी संवेदनशीलता व्यक्त करणारे आहेत."

आतापर्यंतच्या समकालीन कवितेच्या विवेचनावरून असे दृष्टीस येते की, समकालीन कवितेवर अवास्तव व्यक्तिवादाचा प्रभाव आहे. मर्देंकरांच्या आकृतीवादातून ती मुक्त होऊ शकली नाही. आंबेडकरवादी कवितेने मात्र थेट माणूसकेंद्री कविता लिहिली. मानवी स्वातंत्र्यासाठी विद्रोहाचे निखारे पेरले. लघुनियतकालिकातील कविता आणि आंबेडकरवादी कविता या मूलतः भेद आहे. दलित साहित्य आणि लिटिल मॅगेझिन्स दोन्ही चळवळींच्या मूळ प्रेरणा वाङ्मयीन आहेत, असे स्पष्ट करून डॉ. गंगाधर पानतावने म्हणतात ".... याच काळातील दोन चळवळींचा मात्र विशेषत्वाने उल्लेख करता येईल. या दोन्ही चळवळींनी मराठी साहित्याला विचार करायला भाग पाडले. दोन्हीसंबंधी अनुकूल प्रतिकूल चर्चा सुरू आहे. त्यातील १) लिटिल मॅगेझिन्सची व २) आंबेडकरी साहित्याची. पहिली प्राधान्याने प्रस्थापित वाङ्मयाविरुद्धची तर दुसरी, बहिष्कृत, उपेक्षित, शोषित जीवनाचा मानवी उद्गार व्यक्त करणारी"८ याचाच अर्थ आंबेडकरी साहित्य उपेक्षित मानवी समाजाचा विचार करते.

आंबेडकरवादी कवितेच्या आशय विषयाच्या अनुषंगाने पुढे विस्ताराने चर्चा होणारच आहे. त्यामुळे समकालिन कवितेतही दलित जाणिवांच्या कवितांनी वेगळेपण कसे जपले, यासाठी नारायण सुर्वे आणि नामदेव ढसाळ या दोनच बाबींच्या उदाहरणाद्वारे पाहू या.

नारायण सुर्वे यांनी कामगार, कष्टकरी लोकांच्या संवेदना आपल्या कवितेतून व्यक्त केल्या. मध्यमवर्गीय जाणिवांना छेद देत ते म्हणतात –

“रोजीचा रोटीचा सवाल रोजचाच आहे,  
कधी फाटकाबाहेर कधी फाटका आत आहे  
कामगार आहे मी तळपती तलवार आहे  
सारस्वतांनो थोडासा गुन्हा करणार आहे”

सुर्वेनी समग्र परिवर्तनासाठी मानवी स्वातंत्र्याचा ‘जाहिरनामा’ व्यक्त केला.

नव्या समाजरचनेच्या स्वप्नपूर्तीसाठी सुर्वे विद्रोही भूमिका घेतात

“इथल्या वस्त्यांना हुंगणारा केवळ काताळाचा काळोख  
वंदील खोपट्यास खोवून वावरू नये, तर काय करावे?  
ज्यांना जन्मभर दुःख, दैन्य, दारिद्र्यच मिळाले असेल,  
त्यांनी तपशीलासह सर्वच नाकारू नये, तर काय करावे”

नारायण सुर्वे पशुत्वाचे आयुष्य देणाऱ्या सर्व प्रथा-परंपरांना तपशीलासह नाकारतात.

आंबेडकरी कवितेत विद्रोही, बंडखोर, खळबळ उडवून देणारा कवी म्हणून ज्यांची मान्यता आहे ते कवी म्हणजे नामदेव ढसाळ. ढसाळांच्या गोलपिठाने प्रस्थापित मराठी कवितेचे बुरूग ढासळविले. सळसळता विद्रोह आणि जगण्याची वास्तववादी भाषा हे त्यांच्या कवितेचे वैशिष्ट्ये आहे. ‘निमित्त १५ ऑगस्ट ७१’ या कवितेत ढसाळांनी स्वातंत्र्यालाच प्रश्न विचारला –

“पंधरा ऑगस्ट एक संशयास्पद भगोष्ठ  
स्वातंत्र्य कुठल्या गाढवीचं नाव आहे  
कंचा मूलभूत अर्थ स्वातंत्र्याचा?”

शतकानुशतके भोगलेल्या यातनांचा कल्लोळ त्यांनी या कवितेतून व्यक्त केला.

‘हे महाग्यानी लोक’ या कवितेत तर व्यवस्थेला विद्रोही आणि उपरोधिक भाषेने प्रश्नांकित केले –

“हे महाग्यानी लोक हिंडताहेत... मशाली पेटवून  
गल्लीबोळातून चाळीचाळीतून जेथे उंदीर उपाशी मरतात  
त्या आमच्या खोपटातील काळोख म्हणे यांना कळतो  
पाणचट गवशीसारखे हे ही एक थोर”

ज्यांना गांडीखालचा अंधार कळत नाही।

त्यांनी पेटलेल्या माणसांना छप्पनटिकली बहुचकपणा अजुनही दाखवावा?

प्रा. केशव मेश्राम ढसाळांच्या कवितेबद्दल म्हणतात ते खरे आहे, “ढसाळांची कविता उत्तुंग, रोखठोक, क्रांतीप्रवण आहे. ती समाजवादी व भविष्यदर्शी आहे. माणुसकीच्या अवेगाने सळसळत येणारी त्यांची कविता रसिकमनाला झपाटून टाकते. बेचैन करते, झोप उडविते तिच्यातील भावनात्मक उद्रेक वादळी स्वरूपाचा.”९

ढसाळ आणि सुर्वे यांची कविता समकालीन कवितेहून पूर्णतः वेगळी आहे. यासंदर्भात मुक्त विद्यापिठाच्या पुस्तकातील पुढील अभिप्राय महत्वाचा आहे. “१९६० नंतरच्या कवितेत आंबेडकरवादी कविता हा एक महत्वाचा टप्पा आहे. उपेक्षित, बहिष्कृत, पीडित, शोषित समाजाच्या व्यथा-वेदनांचे आणि विद्रोहाचे उत्कट प्रकटीकरण या कवितेत झालेले आहे. दलित कवितेची भाषा समकालीन मराठी कवितेहून निराळी आहे. तशीच ती मध्यमवर्गीय पांढरपेशी भाषेहूनही निराळी आहे. तिच्यातले जाणिवांचे विश्व पूर्वकालीन मराठी साहित्यात आढळत नाही. तथापि चित्रे, कोलटकर, डहाके, धुरी लघुनियतकालिकातील निरर्थकतावादी वास्तववादी कविता, वामपंथी जाणिवा व्यक्त करणारी कविता आणि दलित जाणिवा व्यक्त करणारी कविता हे समकालीन कवितेचे वेगवेगळे पैलू होत, असे म्हटले पाहिजे.”१०

वरील विवेचनावरून सारांशाने असे म्हणता येईल की, मार्क्सवादी कविता, लघुनियतकालिकातील कविता यापेक्षा आंबेडकरवादी कविता प्रकृतीने वेगळी होती. सर्वकष मानवी कल्याणासाठी विद्रोहाचे लेणे घेऊन ती मराठी विश्वात दाखल झाली.

निश्कर्ष

- कविता वाङ्मयप्रकाराचे प्राचीन कविता, अर्वाचीन कविता, समकालीन कविता असे वर्गीकरण करता येते.
- समकालीन कविता म्हणजे कालसंगत जाणिवांचा आविष्कार.
- मराठी कवितेपेक्षा आंबेडकरवादी कवितेतील जाणीव केंद्र वेगळे आहे.
- चित्रे, कोल्टकर, ग्रेस आदी समकालीन कवितेत जीवनातील विसंगीती, व्यक्तिवाद व्यक्त होतो.
- ढसाळ, सुर्वे यांची कविता सामान्य माणसांचे संवेदन व्यक्त करते.
- नारायण सुर्वे यांनी कामगार, कष्टकरी लोकांच्या संवेदना व्यक्त केल्या.
- नामदेव ढसाळ यांच्या कवितेत विद्रोह आणि वास्तववाद आहे.
- ढसाळ आणि सुर्वे यांची कविता समकालीन कवितेहून पूर्णतः वेगळी आहे.
- मार्क्सवादी कविता, लघुनियतकालिकातील कविता यापेक्षा आंबेडकरवादी कविता प्रकृतीने वेगळी आहे.
- आंबेडकरवादी कविता मानवी कल्याणासाठी विद्रोहाचे लणे घेऊन मराठी विश्वात दाखल झाली.

**On The Crossroads Of Teaching English In Mofussil Area****Dr. Chaturanand B. Kedar**Assistant Professor, Dept. of English, Smt Radhabai Sarda Arts, Commerce  
& Science College, Anjangaon Surji, Dist. Amravati (MH) - 444705  
drchaturanandkedar@gmail.com**Abstract**

*English is known as an international link language. It is the only language which is spoken all over the world. It is like an American dollar that is cashable wherever one goes. A very important reason behind the increasing popularity of English as a world language is that it is progressive, dynamic and flexible. It is now language of trade, business, judiciary, science and technology, literature and an official language in India. Thus, English language is universally renowned for its power of expression. India is a country of different culture, religion, and languages with rich variety. More than 70% population of India resides in rural and tribal areas. Students of Mofussil area have huge potentialities and equal mental strength like students living in metro cities but, they do not get enough facilities and opportunities in comparison to urban learners. Moreover, Poverty, lack of infrastructural facilities and failure of various government schemes move them in the complexities of learning English. Therefore, a huge number of students of mofussil region remain away from the process of the development of our country. Being oblivious about the importance of English as a language of communication, it remains neglected in some interior areas of India. Though it is generally considered to be a difficult subject in the non-native countries like India, but actually it is not so difficult because its teaching in the right way can certainly make it very easy, interesting and fruitful.*

**Keywords:** Mofussil, Rural, Tribal, Remedies, Complexities, Communication, Methods, ICT

Language is the best medium of expression. In the globalised society, English is the only language which is spoken all over the world. After independence of India, English rapidly occupied a significant place not only in educational system but also in all fields. It means English became the language of science, commerce, technology and tourism. It is like an American dollar that is cashable wherever one goes. Being international language English can be also named as lingua franca of the world. It seems that the wide spread popularity of English in India marching gradually on the footprints of Lord Macaulay retaining Indians only in blood and colour, but transforming them entirely into English in opinion, in morals and in intellect. The importance of English language is well known in India and all over the world. It helps to open new windows towards the world of knowledge and make them capable to face the challenges and difficulties of life. Knowledge of English has increased in urban areas, but students in rural and tribal areas have been facing number of difficulties and challenges in learning English as they do not have enough infrastructure facility and encouragement to practice it. Therefore a large portion the population of mofussil area remains outside of the educational system.

Now, parents are crazy to send their children to English medium school, but unfortunately English medium schools are not found in rural and tribal areas. Neither private management nor government is interested to build English medium school in mofussil areas. Thus, social circumstances, political indifference towards education, lack of motivation, lack of facilities, lack of awareness, illiteracy, and apathetic attitude of teachers have affected the education in tribal and rural India. Hence, the students from tribal and rural areas face number of obstacles; they lack confidence which results in poor performance of the students. Availability of infrastructure facilities and proper guidance can help to develop their confidence and make them capable to face difficulties and challenges.

**Complexities of Teaching English:**

Method of Grammar Translation is one of the responsible factors for declining the standard of English language. Students in rural/tribal areas have been taught English language through grammar translation method for many years. This method makes them dependant on their mother tongue. This grammar translation method is widely used in rural and tribal areas. It helps rural and tribal students to understand only the content of the text but it doesn't help to improve their English language effectively. Hence, this teaching method fails to develop the power of expression and comprehension of the rural and tribal students. Students' participation in learning English is equally importance to develop their listening, speaking, reading and writing skills. There should not be a one-way communication in the classroom. In the teaching-learning interaction process, students should also take active participation. As Dr Pashupati Jha says,

“Teaching would no more be a one-way traffic then; the teacher lecturing all the time without knowing the response of his students. Teaching should be interactive where students should be allowed to participate

actively in the process of disseminating knowledge. This is one of the ways of changing teaching to learning mode.”

Students living in rural/tribal areas find themselves unable to express in English language due to low confidence. Thus, they always feel comfortable in their own mother tongue. Due to the use of vernacular language, problems of English language have aroused. Even English language is taught in the vernacular language. The students as well as teachers are highly comfortable in their own tongue and thus the real essence of English language is forgotten. While teaching English, English words are rarely used in the classroom and it becomes habitual for both of them.

Lack of motivation is one of the responsible factors for the deterioration of English language teaching in rural and tribal areas. Rural and tribal students often are not aware of the aims and objectives of teaching and learning English language. Students hardly motivated by the teachers in rural and tribal areas.

Lack of Encouragement is another responsible factor for the corrosion of English standards in rural or tribal parts of India. Students are not encouraged by teachers while teaching English language in class. Teachers are little pessimistic about rural and tribal students. Therefore they hardly strive to encourage them and as a result they do not learn to communicate and establish a bond of co-operation with people around them.

As we know that practice makes man perfect; in the same way, language can be mastered only by practicing the four skills i.e. Listening, Speaking, Reading and Writing. Though it is a fact, the students who belong to rural or tribal areas can not focus on their practice of these skills. Their poverty is also one of the causes of their acquiring command over language. Sometimes teachers do not make any attempt to practice the four basic skills while teaching.

Lack of audio-visual aids also responsible for declination of English language in rural areas. Many teachers are unable to teach English effectively due to the lack of audio visual aids. Teachers are unable to teach with these insufficient teaching aids to number of students effectively.

Examination pattern is also responsible factor for lacking in English. It is very easy to predict that what questions would be asked in the examination. Therefore, students just have to memories answers of the questions. They avoid reading and writing, even teacher also teaches them only those aspects which are important for the examination.

In most of the rural and tribal areas malpractice is commonly seen at the time of examination. It is on the peak at the time of examination. Students, parents, relatives, teachers, non-teaching staff, officer in charge of examination and principal are involved in the custom of malpractice. They all intensify the problems of teaching English in rural and tribal areas.

The size of classes everywhere is considerably large and thus, the students' participation in the class work is quite impossible. The ratio of students in relation with teachers is not proportional. Therefore individual attention is not possible to the students. Provision of tutorial classes is made but, tutorial classes are rarely taken in the same crowded manner due to the lack of class rooms.

In most of the institutes, teaching positions are vacant, therefore teachers have been overburdened with the extra works. For quality teaching a teacher must get appropriate time for preparation for the lectures. The teachers, when they find themselves overburdened with the work, they can't think of the problems faced by students in learning English language.

### **Problem-solving Methods of Teaching English Language:**

While teaching English, teachers should use different methods. Teachers can use LCD projector to make English language teaching more effective which can reinforce to create interest among students. Teachers can also make use of language laboratory. Instead of using Grammar Translation Method only, teachers can use Direct Method, Bilingual Method, Structural Method, Communicative Method and Situational Method to make English language teaching more effective. Use of appropriate method for teaching various topics accordingly helps to enhance the effect of teaching language.

Teachers must keep in mind the aim of teaching English language while teaching to the students. The teacher should always emphasis on aims and objectives of teaching English. Teacher should enable students to understand English when it is spoken. Teacher should motivate students to practice all four skills, as Reading, Writing, Speaking and Listening.

Teachers should guide students to be competent. Numbers of students from rural and tribal areas feel annoying to learn English language. Teachers should create such an atmosphere around to create interest amongst students. Teachers should make them realize that they have immense potentialities to excel the language.

Special efforts should be made to ensure that teachers are getting proper and adequate teaching facilities including space, book, and other teaching aids like power point projector, audio visual aids and well equipped

language labs and smart class. Various English journals should be subscribed which may enable students to know the latest advancement in the fields linguistics and English language teaching. It would help to improve English language of rural and tribal students.

Teachers should help to build the confidence of the students at the very first meeting itself. Teachers should train students to ask some simple questions like their introduction and little information about the area. These types of practices can help to build the confidence of the students of rural and tribal areas.

If teachers follow the dictum i.e. 'Not Me But You' while teaching English in rural and tribal areas in India, many problems can be removed from the path of teaching-learning process of English. They should step down to the perception level and understanding of the students and then there would be oneness and understanding between teacher and students.

## Problems and Perspectives Of Teaching English In Rural Areas

**Indal Gopalrao Jadhav,**

Assistant Professor, Dept. of English, Smt Radhabai Sarda Arts, Commerce & Science College, Anjangaon Surji, Dist. Amravati (MS) - 444705  
indaljadhav2011@gmail.com

### Abstract

*Language is always equated in terms with communication purpose; it is a powerful tool to link different people from different areas. It is a language which constantly remains the dominant language in international business. English today is the third most common native language in the world; estimated 378 million people speak English as their first language. It is like a universal blood donor who can donate blood to anyone and it is also like an American dollar, cashable everywhere. Mostly, performance of rural students in English is commonly responsible for their high dropout rate. English language is a kind of phobia for them which decreases their confidence levels those results ultimately to break up their education, devoted and expert English teacher can overcome all such challenges by treating them, as a doctor treats his patients.*

*English is an international language. The status of English in India is second language and it is taught as an academic subject in the educational institutions from the primary to the higher educational level. In teaching-learning interaction process, both students and teacher should be an active participants. Moreover, a teacher should sometimes go beyond by breaking all the traditional ways of English teaching to make his lesson more interesting and appealing for students, with the help of modern innovative techniques and ICT facilities, a teacher can make this subject interesting. It is taught as both literature and language subjects. This paper deals with the challenges of rural students face while learning English*

**Keywords:** Teaching English, Challenges, Remedies, Rural Students

### Challenges

Teachers make every possible effort to impart quality education to the students. If rural students learn English language well, they will get better opportunities for employment. Although English is playing a very vital role in shaping the career and the future of students in India, yet one can find a vast difference in the standard and proficiency of English between urban areas and rural areas of India. An English teacher has to face many challenges in the teaching-learning process of English in the rural India. Rural milieu offers few opportunities to learners for acquiring the skills of listening, speaking, reading and writing. It is a Mephistophelean aspect for teachers and learners to maintain the standards of English in minimum facilities in the rural areas. Thousands of universities and colleges are running various proficiency courses and programmes by simplifying the process of English teaching-learning to reinforce rural students in the race of metro cities but, how many of them could achieve success in maintaining their standard in the teaching of English?

There are so many reasons of the lowering standard of English. The basic reason is that the presence of students, most of the time it has been observed that students visit schools or colleges just like guests i.e. only twice thrice in a year at the time of admission and examination. Lack of concentration, alertness, awareness, accuracy and stability in classroom studies result on poor performance in English which are commonly responsible for the high dropout rate of students in the rural areas. In spite of the punctuality of students in class, some reasons for the lacuna in English proficiency in rural India are such as love of mother-tongue, indifferent approach to look at English as a foreign language, lack of use of English in daily life, mismatch between learning and teaching English and the wide gap between the knowledge of the teachers and poor comprehension of students etc. Some students also suffer from the phobia of English which decreases their confidence levels that resulting ultimately to break up of their education.

High percentage of poverty, illiterate family background and lack of educational facilities also affect on the standard of teaching-learning process in the rural or tribal areas. However, the intellectual growth of teacher along with students got faster on minimum efforts in good institutions where smart classes, language labs and other ICT facilities are available and where only bright students are admitted. Since Hindi or any other regional language cannot fill up the place of English as world language but, teaching in rural or tribal areas of India is a challenge or mission for teachers or facilitators.

Other hazards to the standard of English in rural and tribal areas are the elliptical and strange pronunciation of words, unfamiliar intonation, speeds of speaking, only achievement oriented approach to look at examination rather than performance oriented and pressure of extra works on teachers in spite of teaching activity such as election duties and different Govt. Serves etc.

## Remedies

The following remedies can help to solve the problems regarding teaching of English in rural areas.

It is a common consideration in rural areas that English is a difficult subject, but actually it is not that much difficult, teaching in the right way can certainly make it easy, interesting and fruitful. No doubt, teaching a foreign language in the rural areas of India is a herculean task. But it depends upon a teacher and the way he teaches the subject. A sincere teacher always gets encouragement from his students. It is generally said that examinee knows better than examiner. So, it is also duty of a teacher to know the psychology of his students. Because, teaching does not mean only to provide knowledge to the students rather a teacher should assimilate his subject in his mindscape to make it his lifeline. There should not be a one-way communication in the classroom while teaching. In the teaching-learning process, students should also take active participation.

It is said that the proficiency in language use, knowledge about language and knowledge of teaching methods are essential for successful language teaching. It emphasizes that the language awareness can operate in three domains corresponding to the three areas in teacher education. i.e user, analyst and teacher. While the first one involves using language successfully in addition to knowing the rules of use, the second one includes knowing the system of the language and the last one is all about facilitating language learning. Wrights suggestion is indeed an interesting option since current research in language teacher education has shown a lot of sensitivity towards socio-cultural factors, explicit training of and about language and affective factors related to teachers.

A teacher cannot reach his destination without particular aims and objectives of teaching which make him enable to decide the method and skill for performing his task of teaching. The primary aim of English teaching in the non-native speaking countries like India is to lead students to have practical command on it. Students of rural or tribal areas should be helped to understand spoken and written English as well as to facilitate them to speak and write correctly. One can claim on the success of primary aim of English teaching when students utilize it in everyday life acquiring the ability to read, speak, write and learn it. The objectives of teaching-learning process can be achieved by different ways such as in speaking skill; students can take part in role-play, storytelling, group discussion, debate and interview in the classroom to improve their proficiency of speaking.

An expert teacher of the subject is expected to deal with students as a doctor treats his patients. As a doctor diagnoses his patients; a teacher should diagnose his students' problems of English through remedial teaching. The main aim of remedial teaching is hypothetically to abolish learning mistakes of students. Through remedial teaching a teacher can also prevent his students from future errors. While talking on remedial courses in English, NR Gopal states,

“Though the government has already started remedial classes but well before that there is a scope for revision and bridge courses to be introduced. Once the students complete the school, they need to be exposed to various English language courses like – Revision Courses, Bridge Courses, and Remedial Courses.”<sup>1</sup>

There is a lot of confusion in understanding ‘what an activity’ or ‘a task’ is in language classroom. The activity or task needs to let the learner use the language, i.e. get engaged with the language. This requires learner initiating, turn taking, suggesting, debating, etc. the syllabi and a cursory look at textbooks shows that the activities are teacher directed and teacher centered. The syllabus does not visualize how activities in the classroom can be organized and what roles learners and teachers have in the classroom. We can notice the paradox of the syllabus aiming to design communication syllabi and doing the opposite of the same.

English teachers must have a proper introduction to the teaching techniques in rural areas and also to the pedagogical models that have been proven to be most effective in that zone. Teachers must be introduced to the community's relevant ethnographic information in order to smoothly enter into the community, avoiding conflicts that could arise by not having cultural information about the group in question. At this point, it is important to examine and consider the communicative and social interaction rules of the community in order to understand interactions and be able to assertively explain differences in rhetoric or interaction exchanges. For example, teachers must be aware that if children are not allowed to question the authority of adults in the community, it is going to be very difficult for them to answer direct questions to teachers; therefore, the teacher must make these differences explicit so that students can participate without feeling that they are violating appropriateness rules within their social group.

Teachers in some rural schools are themselves from urban areas and have little or no understanding of the background of their pupils; they may be posted to a rural area against their will, have to travel a long distance to school and, as a result, may have very little commitment to their work. As a result of demonization, the curriculum implemented may vary markedly from the original, time available for learning is likely to be reduced, and pedagogical practices are likely to be poor. The teaching styles adopted by some urban teachers

may be alien to what rural children experience in their day-to-day activities because these elite styles presuppose cognitive frameworks based on middle-class cultures

The planning must be done with community participation; it is very important to take into account what the expectations of families and students are, so that they do not feel that their academic programs are being designed by urban centers without their participation. It is crucial that planners learn from communities and actually include their opinions and feedback in the programs. In other words, education in rural areas should account for pertinence. "Pertinence in education has to do with the development of proposals which take into account the rural context in order to avoid exporting traditional education

On the use of English in the classroom in rural areas, there are some considerations to be taken into account. Provided teachers are fully qualified to speak all the time in English, speaking in English should be the rule in English classes, but the difficulties of understanding what the teacher says could actually increase the demotivation of students, so it is important to use –with moderation– the L1 in the classroom, while knowing that the primary language of the class should be English. That means that the teacher should know how and when to use the L1: "In case of rural students, mother tongue is one of the very effective tools of ELT. Translation into the mother tongue also helps a teacher in simplifying the nuances of English

Moreover, a teacher should sometimes go beyond by breaking all the traditional ways of English teaching to make his lesson more interesting and appealing for students. Accepting modern innovative techniques and ICT facilities, he can hold the interest of students in learning difficult topics too. He can also give them ear-training experiences to overcome the difficulties to understand spoken English using audio-visual aids that would be effective to get familiar with different tones, intonations and expressions of speech sounds. In order to get acquainted with different spellings, pronunciations of terms and constructions of sentences, learners must be motivated for reading aloud by teacher who should correct them time to time. Because, it is said that teachers are paid not only to facilitate students in their learning, but to inspire and motivate them.

Another important factor about degradation of the standard of English in the rural areas of India is love for mother-tongue. Psychologically speaking, a child first listens and understands words, then he speaks. Therefore, children easily acquire mother tongue in the natural atmosphere by imitating parents and other persons surrounded by them. In fact, parents also guide them in acquiring the knowledge of mother tongue. But the structure of English is different than any other Indian language. Hence, the teaching of English is different from that of mother tongue. A teacher himself has to create the required natural atmosphere for teaching English on his own effort. It is also important for a teacher to know his students' psychology to make them enable to read, write and speak fluently and correctly. The basic cause behind the difficulty in the proficiency of English in the rural areas is that students first think the matter in their mother-tongue and then translate it in English while speaking. Such method lacks the spontaneity in English speaking. Hence, it is very important to create the atmosphere of English in the class through Direct Method i.e. talking and teaching only in English without use of mother-tongue. To boost students' spontaneity in speaking English various points can be observed such as enough vocabulary, appropriate knowledge of idioms and phrases, accuracy in intonation and pronunciation, adequate knowledge of grammar, use of audio-visual aids in teaching, habit of attending lectures and accompany of English speaking person, etc. The constant practice of the above all things will enable students to write and speak correctly. Direct method forms the habit of thinking in English. It enables students to express his thoughts directly in English without the aid of mother tongue. But even after many years of English's entry to India, Grammar Translation Method is preferred by most of the teachers in rural area as in the Direct Methods of English teaching the possibility of inferiority complex and nervous breakdown cannot deny among slow learners. Therefore, we can say that Grammar Translation Method provides no provision for learning the art of conversation but, it is not entirely useless as it also imparts a vast store of knowledge that helps to comprehend the teaching task comfortably and quickly.

## अध्यापन व शिक्षणातील ग्रंथालयाची भूमिका

पी. टी. जाधव

( विद्यार्थी-एम.लिब.) ग्रंथालय व माहिती शास्त्रपदवी

यशवंत चव्हाण महाराष्ट्र मुक्त विद्यापीठ, नाशिक. व्दारा मातोश्री विमलाबाई देशमुख महाविद्यालय, अमरावती

सार

एक शिक्षक आपल्या विद्यार्थ्यांना सर्वप्रकारची ज्ञान देण्याचे प्रयत्न करीत असतो. आणि विद्यार्थी ते सर्व एकाग्रतेने आध्यग्रहण करतात. ग्रंथालय हे ज्ञानाचे भंडार असलेले गृह असून त्यामध्ये ज्ञानाचे विस्फोट होतो आणि जगातील प्रत्येक क्षेत्रात त्याचा उपयोग होतो. आजच्या काळात असा कोणताही क्षेत्र नाही की त्यामध्ये ग्रंथालयाचा उपयोग होत नाही. विद्यार्थी आणि शिक्षक हे दोन्ही घटक यांचे महत्वपूर्ण उदाहरण आहे. शिक्षकाने दिलेले ज्ञान हे विद्यार्थ्यांचा जिवनातील सर्वात महत्वाची देणगी मिळालेली असते. आणि ते तेव्हापासून जगातील कोणतीही माहिती मिळवण्यास सक्षम असतात. हे सर्व फक्त शिक्षणाच्या माध्यमातूनच शक्य झालेले आहे.

ग्रंथालय हे आजच्या युगातील नसून ते पुर्वकालीन आहेत, त्यामध्ये फक्त बदल झालेले दिसत आहे. ग्रंथालय हे उपयोगासाठी असून त्याचा उपयोग करणे हे आध्य कर्तव्य आहे आणि त्यामधील होणारे बदलाच्या सोबतच आपल्याला असायला पाहीजे कारण ग्रंथालय हे अभ्यासाच्या हेतुने आणि संशोधनाच्या हेतुने पूरक संसाधन आहेत. आणि त्या उद्देशाने ग्रंथालयांना अध्यापन आणि शिक्षणामध्ये महत्वाचे स्थान दिलेले आहे. ग्रंथालयांना यशाची गुरुकिल्ली म्हटले जाते, शाळेतील ग्रंथालयामध्ये विविध प्रकारचे वाचन साहित्य संग्रह केलेले असते त्यामध्ये निवडलेले मासिके आणि नियतकालीकांसह विस्तृत संदर्भ आणि कल्पित संग्रह पुरक असते. वाचनाची सवय लावण्यासाठी विद्यार्थ्यांना वेळोवेळी बायोग्राफी आणि ज्ञानकोश, सामान्य जागरूकता यासारख्या पुस्तकांबद्दल माहिती देणे गरजेचे आहे.

भारतसारख्या देशात मोठा बदल झाला आहे आम्ही आमच्या प्राचीन वारसा शिक्षण प्रणालीपासून आधुनिक काळातील तंत्रज्ञान जानकार विद्यापीठ शिक्षण प्रणालीकडे गेले आहे. आज शिक्षण ही सर्वसमावेशक प्रक्रिया बनली आहे. जी सामाजिक,आर्थिक,राजकीय,सांस्कृतिक राष्ट्रीय इत्यादी जिवनातील जवळजवळ सर्व बाबींचा समावेश आहे. माहिती म्हणजे माहिती तंत्रज्ञान (आयसीटी )चा युग आहे. ज्यामुळे माहितीचा प्रसार विश्वासाह आणि सोपा झाला आहे. भारतीय शिक्षण प्रणाली वैयक्तिक आणि समाजाचा सर्वांगीण विकास साधण्यासाठी प्रयत्नशील आहे. अध्यापण-शिक्षण समुदायाला टिकाउ वाढ आणि विकासासह जागतिक बाजारपेठेत प्रतिस्पर्धा करण्यास सक्षम करते.

प्रस्तावना

ग्रंथालय ही जीवनातील आवश्यक वस्तुपैकी एक आहे:

ग्रंथालय हे माहितीचे स्रोताचा संग्रह आहे त्यामध्ये नियतकालिके मुद्रणे कागदपत्रे ई-पुस्तके आणि इतर समाविष्ट आहेत. यामधूनच माहितीचे प्रसारण अथवा माहितीचा विस्फोट होणे असेही म्हणता येईल. आजच्या रोजनिशी घडामोडी सतत वाढत चालल्या आहेत आणि नवनवीन घडामोडी होत आहेत ह्या सर्व प्रकारच्या माहितीचे संग्रह मिळविणे हे आपल्या जीवनातील महत्वाचे कार्य आहे. ग्रंथालय हे वर्षेनु असल्याने तेथील ज्ञानाचा विस्फोट हा नेहमीच राहणार आहे. आणि स्पर्धात्मक युगामध्ये याचा नेहमीच उपयोग होणार आहेत.

एक ग्रंथालय म्हणजे शाळांमधील शैक्षणिक क्रिया गुणवत्ता, वाढ शिष्टाचार मानवी मुल्ये संस्कृती या ग्रंथालयाद्वारे मोठ्या प्रमाणात प्रभावित होतात. अध्यापन आणि शिकण्याच्या प्रक्रियेमध्ये चांगली लयाबरी नसल्यामुळे ज्ञान कमी पडेल. विद्यार्थी केंद्रीत शिक्षण आणि शिक्षण प्रक्रियेसाठी हे अपरिहार्य आहे. कोणत्याही शाळेचे एक आदर्श ग्रंथालय शिक्षक आणि विद्यार्थ्यांना उत्तेजन आणि प्रेरणा प्रदान करते ज्यामुळे या विषयाची आवड निर्माण होते आणि विद्यार्थ्यांची क्षितिजे विस्तीर्ण होत. ग्रंथालय शैक्षणिक शिक्षणाचे केंद्र नाही आम्ही आळशी, मुक्त , एकटे आणि कंटाळले जाते तेव्हा ही आम्हला सर्वोत्कृष्ट कंपनी देखील प्रदान करते. आज जेव्हा वेगान ज्ञानाचा प्रचंड स्फोअ होतो तेव्हा ग्रंथालय विद्यार्थ्यांना विषय समजण्यासाठी व आवश्यक माहिती मिळविण्यासाठी आवश्यक पूरक साहित्य अतिरिक्त वाचन प्रदान करते.

शिक्षक आणि विद्यार्थी विकसित करण्यात एक आदर्श ग्रंथालय अत्यंत महत्त्वपूर्ण आणि वाडय भूमिका बाजावते. शिक्षकांच्या अध्यापनाच्या प्रचंड पध्दतीचा अवलंब करण्याच्या वर्गात प्रभावीपणा वाढवते ज्यामुळे वर्गातील कामगिरी तुलनेने वाढते.एक उत्तम लायबरी वैयक्तिक आणि सामूहिक शिक्षणला प्रोत्साहन देते . यामुळे विद्यार्थ्यांची शब्दसंग्रह विकसित करणे आकलन वाढवणे रशांत वाचनाची सवय वाढविणे आणि विद्यार्थ्यांचे प्रश्न सोडवण्याची वृत्ती वाढविण्यात मदत होते. या शशेवट्या वेळेस परंतु ग्रंथालयाची भूमिका बऱ्याच प्रकारे वाढली आहे आणि ती रूंद झाली आहे.

शैक्षणिक क्षेत्राचा एक मुख्य भाग म्हणून शिक्षण वैयक्तिक वाढ राष्ट्रीय प्रगती आणि समृद्धी हे आजूबाजूला फिरते. एखाद्या व्यक्तीची आणि राष्ट्राची सामाजिक शैक्षणिक आणि आर्थिक वाढ नेहमीच पालनपोषण करणाऱ्या ग्रंथालयाद्वारे खोलवर प्रभाव पडतो. प्रत्येक रशाळा आणि सार्वजनिक डोमेनमध्ये आदर्श ग्रंथालय प्रस्थापीत करणे आणि टिकविणे याचा मानव संसाधन विकास आणि त्यांच्या उत्त्वलन भविष्यासाठी उत्कर्ष वाढीवर चांगला परिणाम होतो.

ग्रंथालये शिकण्याच्या आणि शिकवण्याच्या तीन मार्गावर काम करतात

महागडया संसाधने पुस्तक ग्राफिक्स नियतकालिका आणि डेटाबेस इत्यादी भौतिक संसाधने सामकयिक करण्यात व्यावहारिक भूमिका आहे ग्रंथालयाची ही सामग्री दोन्ही मार्गांनी म्हणजेच शिकवणे आणि शिकणे यासाठी मदत करते.

ग्रंथालयाची दुसरी भूमिका कलाकृती आणि कल्पना जतन करणे आणि त्यांचे आयोजन करणे जे भविष्यातील विद्यार्थ्यांसाठी गोष्टी सुलभ करतात.

तिसऱ्यांदा लोक आणि कल्पना एकच आणून ग्रंथालये सामाजिक आणि बौद्धिक पध्दतीने महत्त्वपूर्ण भूमिका बजावतात. वर्गातील शिक्षक आणि शिक्षक यांच्यात संसाधने सामायिक करण्याची ही व्यवहारीक भूमिका त्यांना ज्ञान सामायिकरण आणि परिवर्तनात पुढे येण्यास प्रवृत्त करते.

ग्रंथालये शिकण्यास आणि शिकवण्यास कशी मदत करतात

एक ग्रंथालय मुलभूतपणे संसाधनांचा एक संच आहे ज्यामध्ये मानवी सेवा तसेच मीडियाच्या संपूर्ण स्पेक्ट्रमचा समावेश आहे. वाचनालयात शिक्षणात किमान तीन भूमिका असतात. प्रथम ते महाग संसाधने सामायिक करण्यात व्यावहारिक भूमिका बजावतात. पुस्तके आणि नियतकालिका, सॉफ्टवेअर आणि इलेक्ट्रॉनिक डेटाबेस आणि प्रोजेक्टर अशी खास साधने वापरकर्त्यांच्या समुदायाद्वारे सामायिक केलेली भौतिक संसाधने मानवी संसाधने ग्रंथपाल ज्याला मिडीया विशेषज्ञ किंवा माहिती विशेषज्ञ देखिल म्हटले जाते. शिक्षक आणि विद्यार्थ्यांच्या विनंतीला प्रतिसाद देउन उत्तरदायी सेवा आणि शिक्षक आणि विद्यार्थ्यांसाठी क्रियाशील उपक्रम सक्रीय सेवा सुरू करून सूचना कार्यक्रमांना समर्थन देतात. उत्तरदायी सेवेमध्ये राखीव सामग्री राखणे, संदर्भ प्रश्नांची उत्तरे देणे, प्रश्नसूचींची माहिती देणे आणि वापरकर्त्यांना साहित्य कसे वापरावे हे शिकविणे यांचा समाविष्ट आहे.

ग्रंथालये कलाकृती आणि कल्पना जतन आणि आयोजन करण्यात सांस्कृतिक भूमिका बजावतात. साहित्य कला आणि विज्ञान यांची मोठी कामे जतन करून ठेवली पाहिजे आणि भाविष्यातील विद्यार्थ्यांसाठी ते महत्त्वपूर्ण ठरेल. प्राथमिक आणि माध्यमिक शाळेय ग्रंथालये सहसा संग्रहालये आणि प्रयोगशाळा म्हणून देखिल काम करतात आणि आवश्यकतेनुसार दुरूस्ती व देखभाल याद्वारे वस्तुंचे जतन करीत असतात. ग्रंथालयामध्ये साठवण कार्यपध्दती काळजीपूर्वक असते. तसेच अनुक्रमनिका, कॅटलॉग आणि इतर शोधयंत्राद्वारे विद्यार्थ्यांना साहित्य योग्य ते मिळवून देतात. औपचारिक शिक्षण पध्दतशीर आणि निर्देशांद्वारे मार्गदर्शन केले जाते. औपचारिक शिक्षण विविध प्रकारच्या शाळांमध्ये उपलब्ध असलेल्या अभ्यासक्रमांमध्ये आणि नोकरीवरील प्रशिक्षण अभ्यासक्रम किंवा प्रोगाममध्ये होते. ग्रंथालय औपचारिक शिक्षणामध्ये ज्या महत्त्वपूर्ण भूमिका बजावतात त्या विद्यापिठाच्या कॅम्पसमधील शारीरिक महत्त्व आणि ग्रंथालय सेवा आणि साहित्याचा थेट वापर करणाऱ्या अभ्यासक्रमांच्या संख्येद्वारे दर्शविल्या जातात. शाळांमधील बहुतेक माहिती संसाधने थेट सूचना अभियानाशी जोडली जातात.

एकोणविसाव्या शतकाच्या उत्तरार्धात अमेरिकेत विकशित झालेल्या सार्वजनिक वाचनालयाच्या प्रणालीला विना मुल्य विद्यापीठ असे म्हटले जाते. कारण जगातील ज्ञानाकरीता मुक्त प्रवेश देण्यासाठी सार्वजनिक ग्रंथालये तयार केली गेली. सार्वजनिक ग्रंथालये क्लासिक, नॉनफिक्शन पुस्तके, विस्तृत नियतकालिके, संदर्भ स्रोत प्रदान करतात. जनेकरून आपल्या शैलीनुसार निवडलेल्या विषयाबद्दल शिकण्यास मदत होईल. जसे संगणकीय तंत्रज्ञान आणि जागतिक दूरसंचार नेटवर्कमध्ये बदल लागले आहेत.

लायब्ररी शिकण्याची मोकळीक जागा

ग्रंथालयातील तंत्रज्ञान आणि त्याच्याशी संबंधित सेवा शोधण्याचे एक युक्तिवाद म्हणजे एक युनिट म्हणून लायब्ररी संस्थेच्या सर्व शाखांमध्ये कार्य करते. जरी काही कॅम्पस विभागात जागेवर महागड्या उपकरणे असू शकतात परंतु बहुतेक वेळेस ती फक्त प्राध्यापक, पदवीधर विद्यार्थी आणि विभागातील कॅम्पसकरिता उपलब्ध असतात. जरी उपकरणे वापरू शकले असले तरीही, समर्थन सेवा व्यापक समुदायासाठी क्वचितच उपलब्ध आहेत. उपकरणे ऑफर करण्याव्यतिरिक्त, लायब्ररी व्यापक वारकर्ता समुदायास समर्थन देण्यासाठी प्रोगाम डिझाइन करतात. ज्यामध्ये उच्च श्रेणीतल उपकरणांसाठी निधीची कमरतता असते अशा व्यक्ती आणि विभागांमध्ये नावीन्य प्रदान करते. या तरतुदींच्या उदाहरणांमध्ये डेटा व्हिज्युअलाइझेशन तंत्रज्ञान, भौगोलिक माहिती प्रणाली आणि उच्च अंत मीडिया उत्पाद समाविष्ट आहे. शैक्षणिक लायब्ररीत वाढणारे क्षेत्र म्हणजे मेकरस्पेसचा विकास होय.

ग्रंथालयाची वर्गामधील पाच प्रमुख कार्ये :

वर्ग ग्रंथालय संग्रह आणि शांत जागा आहेत ही वस्तुस्थिती त्यांच्या उद्देशाचा फक्त एक छोटसा भाग आहे. ते व्यापक अर्थाने वर्गातील क्रियाकलापांचे कणा आहेत. दररोज जे घडते त्यातील बरेचसे वर्ग ग्रंथालयात संसाधने आणि जागेच्या आसपास किंवा त्यापासून होते. जसे आपण ते पहात आहोत, प्रभावीपणे डिझाइन केलेले वर्ग ग्रंथालयाची किमान पाच महत्त्वपूर्ण कार्ये आहेत.

१) साक्षरतेच्या सूचनांना सहाय्य करणे

वर्ग वाचनालयाचे पहिले कार्य म्हणजे शाळा आणि बाहेर वाचन लेखन सूचनांचे समर्थन करणे यासाठी दररोजच्या अभ्यासक्रमातील सर्व विषयांमध्ये विद्यार्थ्यांच्या शिक्षणस पाठिंबा देण्यासाठी पुस्तके आणि इतर माध्यम सामग्रीसह आपल्या वर्गातील ग्रंथालयाची पोशाख घाला विज्ञान आरोग्य, गणित, इतिहास, अर्थशास्त्र, भुगोल, संगीत, कला, नाटक, नृत्य, भाषा व्याकरण, शब्दलेखन, साहित्य, संगणक आणि इतर विद्यांशी संबंधित सामग्रीचा समावेश असतो.

२) विद्यार्थ्यांना पुस्तकांवियी जाणून घेण्यास मदत करणे:

एक प्रभावी वर्ग ग्रंथालय शिक्षकांना शिकवण्यासाठी आणि पुस्तके आणि पुस्तक निवडीबद्दल मुलांना शिकवण्यासाठी एक स्थान प्रदान करते. येथे मुले शालेय किंवा सार्वजनिक वाचनालयापेक्षा लहान आणि अधिक नियंत्रित वातावरणात अनेक पुस्तक शैली आणि इतर वाचन सामग्री अनुभवू शकतात. पुस्तकांची काळजी कशी घ्यावी हे विद्यार्थ्यांना शिकविण्यासाठी आपण वर्ग ग्रंथालय देखील वापरू शकतो. दुरुस्तीच्या सूचनांसाठी आपण पुस्तक दुरुस्तीचे क्षेत्र सेट करू शकता आणि फाटलेली पृष्ठे कशी सुधारीत करावीत, भडकलेल्या कडा कव्हर करणे किंवा तुटलेली बंधणे कशी दुरुस्त करावी यासाठी स्पष्ट दिशानिर्देश असलेले एक पोस्टर प्रदर्शित करू शकते. विद्यार्थ्यांना संबंधित, मनोरंजक आणि योग्य वाचनाची सामग्री निवडण्यासाठी प्रभावी रणनीती शिकविण्यासाठी वर्ग ग्रंथालय देखील एक उत्तम जागा आहे. चांगली कक्षाची ग्रंथालय विद्यार्थ्यांना पुस्तके सहजपणे शोधण्यात मदत करते आणि त्यांना आरामदायक जागा मिळवून देते.

३) वर्ग संसाधनांसाठी केंद्रिय स्थान प्रदान करणे:

आपण आपल्या वर्ग लायब्ररीचा उपयोग कक्षाच्या निर्देशात्मक संसाधनासाठी आयोजित केलेल्या केंद्रिय स्टोरेज स्थान म्हणून देखील करू शकता येथे विज्ञान उपकरणे, ऑडिओ ल्पेयर डीव्हीडी, संगणक, मासिके आणि शिक्षणस समर्थ देणारी अन्य सामग्री आयोजित करण्यासाठी अतिरिक्त जागा आहे. या संदर्भात वर्ग ग्रंथालय वैयक्तिक आणि जिल्हा पातळीवर माध्यम केंद्राच्या संस्थेचे प्रतिबिंबित करते.

४) स्वतंत्र वाचन आणि अभ्यासाच्या विस्तारासाठी संधी प्रदान करणे:

वर्ग वाचनालयाचे चौथे महत्त्वाचे कार्य म्हणजे स्वतंत्र वाचन वैयक्तिक शोध, प्रकल्प संसोधन, आणि वैयक्तिक मुल्यांकन यासाठी स्रोत आहे जे मुलांच्या त्यांच्या वैयक्तिक मनोरंजनात्मक वाचणाची आवड पूर्ण करणाऱ्या स्वयं निवडलेल्या पुस्तकांच्या स्वतंत्र वाचनास समर्थन देते. वर्ग लायब्ररी विद्यार्थ्यांना संसोधन करण्यास किंवा अभ्यासक्रम विस्तार प्रकल्प पूर्ण करण्यासाठी सहज उपलब्ध योग्य प्रिंट मटेरियल, एक्स्प्लोरेटरी पुस्तके, संगणक तंत्रज्ञान, आणि मिडीया देखील प्रदान करते. एक वर्ग लायब्ररी शांतपणे मोठ्याने वाचण्याची किंवा शिक्षकांसह एखाद्या विषयावर चर्चा करण्यासाठी एक सेटिंग ऑफर करत असते हे आपल्या प्रत्येक विद्यार्थ्यांच्या वाचणाचे अनौपचारिक मुल्यांकन करण्याची एक आदर्श संधी प्रदान करते. जे आपल्याला वैयक्तिकृत सूचनांची योजना करण्यात मदत करेल.

५) विद्यार्थ्यांविषयी पुस्तके व त्यांच्याशी संवाद साधण्याचे ठिकाण म्हणून सेवा :

प्रभावी वर्गातील ग्रंथालय देखील एक एकत्रित जागा म्हणून कार्य करते जेथे विद्यार्थी आणि शिक्षक वाचक म्हणून त्यांचे जीवन व्यक्त करू शकतात पुस्तके रोमांचक करणारे वाचनाची विक्री करणारी जागा म्हणून त्यांचे जीवन व्यक्त करू शकतात. पुस्तके रोमांचक करणारे, वाचनाची विक्री करणारी जागा म्हणून याचा विचार करा हे असे स्थान असावे ज्यामध्ये विद्यार्थ्यांना येण्याची प्रतीक्षा करू शकत नाही येथे ते पुस्तकांरील त्यांच्या प्रतिक्रियाबद्दल बोलू शकतात.

एक महत्त्वपूर्ण पुनरावलोकन लिहू शकतात. आणि तो सरदारांसह सामायिक करू शकतात. किंवा एखाद्या आवडत्या पुस्तकाची जाहिरात करण्यासाठी पोस्टर काढू शकतात. एक लायब्ररी मुलभूतपणे संसाधनांचा एक संच आहे. ज्यामध्ये मानवी सेवा तसेच मिडीयाच्या पूर्ण स्पेक्ट्रमचा समावेश आहे लायब्ररीमध्ये जागा उपकरणे आणि स्टोरेज मिडीयासारखे भौतिक घटक असतात. बौद्धिक घटक जसे की संग्रहीत धोरणे जी कोणती सामग्री समाविष्ट केली जातील हे निर्धारित करतात आणि संग्रहात प्रवेश कसा केला जातो हे निर्धारित करणाऱ्या संस्थात्मक योजना आणि लोक जे लोक शारीरिक आणि बौद्धिक घटकांचे व्यवस्थापन करतात आणि वापरकर्त्यांसमवेत माहितीच्या समस्येचे निराकरण करतात.

ग्रंथालयाची भूमिकेचा विस्तार

ग्रंथालयांचा भूमिकांचा विस्तार केला गेला आहे आणि यामुळे विद्यशाखा आणि दूर शिक्षणात सहभागी विद्यार्थ्यांना सेवा पूर्णविली जात आहे. दूरदूर शिक्षण देशभरात बरेच लोकप्रिय झाले असल्याने शिक्षणाचा विस्तार अगदी सहजपणे दिसून येतो. शिक्षणाची गुणवत्ता राष्ट्राच्या आतील भागात यशस्वीरित्या पसरत आहे आणि परिणामी देशाची साक्षरता टक्केवारी वाढत आहे जी हळूहळू वाढत आहे. आणि वेगाने ग्रंथालये वापरत असलेल्या शिक्षणाची पध्दत उल्लेखनीय आहे. योग्य यशस्वी अंतर शिक्षण अभ्यासक्रम खरोखर उल्लेखनीय आहेत. परिणामी ग्रंथालयांच्या या भूमिकेद्वारे समाजातील आर्थिकदृष्ट्या दृर्बल दर्जेदार शिक्षण घेत आहे.

निष्कर्ष

प्रवेश आणि संसाधनांचा प्रश्न ग्रंथालयांसाठी बारमाही आहे. परंतु ग्रंथालयांनी विविध स्रोतांच्या गटामध्ये आणि मतदारसंघाच्या रूढीकरणस पुरवलेली प्रगती दुर्गम वापरकर्त्यांसाठी उपलब्ध असलेल्या संभाव्य सेवाबद्दल सांगते शैक्षणिक लायब्ररी नेहमीच अध्यापन माहिती स्रोतांमध्ये प्रवेश प्रदान करणे आणि कोर्स डिझाइनमध्ये प्राध्यापकांशी सल्लामसलत करण्यासाठी जबाबदार असतात. ग्रंथालये संरक्षकांना नेटवर्क सेवा उपलब्ध करून देत राहिल्यामुळे दुर्गम ठिकाणी त्यांच्या विद्यार्थ्यांची सेवा अधिक चांगल्या प्रकारे करण्यात सक्षम होईल. आमच्या संरक्षकांनी एकदा लायब्ररीत येण्याची अपेक्षा केली जात होती, परंतु आता आम्ही विचारतो की यापुढे अंतराचा अडथळ नसल्यास आपण संरक्षकांपर्यंत कसे पोहोचू शकतो. डिस्टेंस लर्निंग लायब्ररीला कॅम्पस आणि शैक्षणिक संघटनेत त्यांची सेवा भूमिका विस्तृत करण्याची संधी प्रदान करते.

## Advanced Technologies In Sports

Abhay Y.Bhishma

(Assit.Lecturer)

H.V.S.K.M.Physical Education College Lohara, Yavatmal

### Abstract

*Technological advancement is a natural process, and with its introduction into a sport, athletes simply become "better". Technologies in sports are man-made means developed to reach human interests or goals in or relating to a particular sport. Technology in sports is a technical means by which athletes attempt to improve their training and competitive surroundings in order to enhance their overall athletic performance. It is the knowledge and application of using specialized equipment and the latest modern technologies to perform tasks more efficiently. In this, paper discussed efficient technologies that will help in the performance and quality of sports.*

**Keywords:** Technological advances, Athletes consideration, High speed cameras

### Introduction

Many equipment, such as monocoque racing bicycle race and buoyant swimsuits, this same effect was reverse by rule soon after the changes where introduce bike design returned to the conventional divert frames, and swimsuits reverted to less buoyant, and more permeable materials. Yet independent of whether, or not rukes are imposed on technological advances, sport technology is almost always about the same principle: energy. Sport performance is define by the energy produce by the athlete and released into the environment. The energy must be exclusively produce by the athlete, and must not come from else (example. An external energy source.) However, not all off the energy produce the athlete is necessarily released into the environment. Common source energy loss (non-conservative, non-recoverable energy) is: external fiction (example sliding friction in skiing or rolling friction in cycling); internal friction; aerodynamic drag; hydrodynamic sound; heat; vibrations; and the energy required for stability etc. The task of the sports engineer is finding to energy leaks and develops ways to mend them. Solutions are readily at hand. For example, sport engineer can develops swimsuits that left the body slightly out of the water, thereby reducing water resistance and increasing air drag or perform wind turner test of skiers to find way to optimize the tucked racing position.

### Benefits Of Advanced Sporting Technologies:

Recent development in sporting technologies has created a variety of products aimed at improving and increasing athletic performance. Athletic health can be modern sporting technologies such as heart rate, monitors, pedometers and body- fat monitors, through this a, greater depended

knowledge of the human body and its potential has been recognized, allowing athletes to train complete in sports to much older age. Participant safety at all times has also been made possible through the development of certain sporting equipment, such as helmets and body protection which are used in boxing and ice hockey to help prevent injuries. Modern sporting technologies have also made competition judging easier and more accurate, and spectator interest and excitement is enhanced by broadcasting and in-stadium displays (scoreboard).

### How Can Technology Are Used

To Enhance Athletic Performance Sports gear such as clothing and footwear should be user-friendly and include valuable properties such as strength, flexibility, density, thickness, durability, toughness, resistance to moisture and more importantly cost. Footwear is generally considered more for comfort and injury avoidance rather than performance enhancement. Whereas clothing such as the full body suits used in swimming. Are often claimed to rationalize the competitor's performance times where winning or losing the race is hundredths of a second. In tennis racket has been created in order to provide enhanced ball speed, and reduce the potential vibration that can lead to a condition known as tennis elbow. In other sorting equipment such as the golf club, the overall mass of the club the overall mass of the club has decreased which is believed to result in a greater achievable distance and possible a more precise shot. The bicycle has also undergone modern day advances with the development of specialist wheels, pneumatic tyres; break levers and pedals, which are all aimed at increasing stability and rigidity of the bicycle. The most efficient technology is the high speed cameras which are used in sports. There are various high speed cameras such as high speed –greater than 100 FDS (frames per second) still cameras, motion cameras. Motion cameras are more useful in sports Medicine, Physical education and sports, DV Camera-60 FPS, Digitals Still Camera-0 to 1 FPS, Multiple Cameras requires identical format and frame rate

### Various Types of Advanced Technologies

In Sports [www.iosrjournals.org](http://www.iosrjournals.org) 2 | Page High speed cameras uses in physical education and sports for an example; Shorten the learning curve, Coaching, training and Analysis, Kinematic, Biomechanics Research , locomotives and Behaviour Analysis, physical Therapy, Injury prevention, In refereeing, Cricket –Third Umpire, Tennis ball, In out ,Table-players shots, Equestrian-Horse running analysis, Chest finish (spirits), Correct Technique Model presentation or Animation. Comparison of the technique (trainees) with elite to communicate correct techniques.

## How Can Technologies Be Used To Analyze Athletic Performance

Technologies such as CAD (Computer aided design) can play a major role in the improvement of sporting equipment. CAD allows virtual design and testing techniques to be applied to all aspects of sport and equipment research and development. CAD offers an efficient means of considering and assessing new products and ideas and is primarily used to improve safety, comfort and effectiveness of specialized sports equipment's; CAD is also used regularly in the justification of physical fact figures and for both competitive and training circumstances. Other technologies such as "smart" equipment can be used evaluate performance. Example of "smarts" equipment's technologies include devices used for exercise stress testing and cardiovascular assessment, human reaction time and frequency of movement meters, and jump and run characteristics devices. The use modern technology in sports may mean that competition at the uppermost level is only affordable to the leading top athletes due to the potential high costs of specialized sports equipment's, in those sports incorporating individuals with a particular disability, there are a variety of methods in which assistance can be given. For example, modifications to buildings can be made to make them wheelchair accessible, specialized equipment's can also be produced and training to sports members can be offered in order to give specific assistance to those with a disability.

## Conclusion

Technology also makes better information available to the coach's athletes and spectators, and this serves the sport on many different levels; it enables better match analysis, performance ranking, player selection, sports statistics and predictions and in general makes the more interesting. The Hawk-Eye system is a typical example of a beneficial technology that provides a multitude of information during cricket and tennis matches. Recent developments in sporting technologies have created a variety of products aimed at improving and increasing athletic performance.

### Abstract

*This paper is showing the connection between the media and education. It contains the role and importance of media in providing education and rural education. A radical examination of an oversized set of those on-line tools has unconcealed that social media have several academic blessings. It conjointly talks regarding the utilization of media in schoolroom and within the teaching learning method. Social media networking isn't only for promoting and merchandise placement it may champion a cause, raise awareness of health problems and facilitate educate patients and health care shoppers with correct and trustworthy data. This paper is representing the intensive and extreme use of media in education content and its social impact upon society due to its inherent ability to achieve sizable amount of public.*

**Keywords:** Education, Media, social impact.

### Introduction

Social media is constructed on the concept of however individuals grasp and act with one another. It provides individuals the facility to share, creating the globe additional open and connected with one another. Exploitation of social media isn't restricted solely to professionals or elders however conjointly it's been wide utilized in academic sectors by the scholars. The emergence of social network sites has revolutionized communication tools for facilitating teaching and learning activities. In recent years, social networking has become one amongst the foremost vital communication tools among people; within which exist through the net that has accessibility for tremendous quantity of individuals. Recent years have witnessed associate hyperbolic interest in exploitation social media/social learning with courses in pedagogy. New technologies, most frequently said as internet a pair of 2.0 have created a growing development publically and educational use, ever-changing the manner organizations and other people produce, engage, and share existing or freshly made data through multi-way communication. The social media sites, largely public web-based services enable users to develop a private profile, scan and react on the postings on the positioning. Lecturers exploring this moving landscape will be ready to discover the important potential of social media to remodel drastically the education basis of their teaching expertise, giving them tools that they'll use to form really custom-made and versatile learning experiences for college kids. Students, UN agency plan to multi-task, checking social media sites whereas finding out, show reduced educational performance. Their ability to target the task at hand is considerably reduced by the distractions that square measure caused by YouTube, Facebook or Twitter .The objective of this paper is, therefore, to look at the potential edges of social media in education.

### The Role of Social Media in Educational Life

The term "social media" implies the quantity of activities that embrace coming together and networking on-line through words, footage and videos. Social networking will encourage "consultation patterns" at intervals a thuscial network so on reinforce and cement ideas at intervals the educational cluster signed whether or not that's students or members of a job or skilled cluster. . In today's teaching settings, instructors, student's et al collaborate on the task of information construction. it's a standard indisputable fact that Twitter and Facebook ar thought of to be the quickest ways in which of finding data that may be of nice price for all students. Data and Communication Technologies (ICTs) are more and more prevailing in our society, and consequently, they entail new conditions and opportunities for teaching and learning processes. In 2008-2009 sixty one was of the population were mistreatment Facebook and it went up to eighty seven in 2009-10 and reached ninety eight in 2010-11. Colleges are adopting technologies for education functions and introducing social media into the schoolroom. This is often a trend that has garnered a great deal of support in addition as apprehension.

### Popular Social Media Sites

- You Tube.
- Instagram.
- Blogs.
- Facebook.
- Twitter.Google Docs.

### Effect of Social Media in Education

There area unit positive moreover impact of media in education. Abilities got discovered quicker, students UN agency were good at programming got their name out their simply, student UN agency were smart in music, got their videos out and shared leading them to their dreams. Students area unit having a tougher time reaching to communicate face to face with individuals, and area unit losing their individuals skills, thanks to that they're payment a lot of and longer talking from behind a screen. The convenience with that a student will customize their profile makes them a lot of tuned in to basic aspects of style and layout that aren't usually educated in colleges. Students, UN agency conceive to multi-task; checking social media sites whereas learning, show reduced educational performance. Their ability to focus on the task at hand is considerably reduced by the distractions that area unit brought about by YouTube, Facebook or Twitter. Students neglect the studies by payment time on social networking web site instead of learning or interacting with the individuals head to head. It ought to be unbroken in mind that the social networking creates the virtual world, that's drastically take issue from the truth. Social media additionally brings with it the liberty for learners to attach and collaborate outside of institutional boundaries moreover on gain sensible expertise for the men.

### Conclusion

The objective of this paper was to explore the potential benefits of social media in education. The media has the facility of teaching individuals, the nice and also the dangerous. Since it has an effect on the eyes, the ears and also the mind at the same time nothing will overcome the influence of the media. The lecturers will communicate instantly and directly with the scholars and compare notes on education techniques, information and teaching methodology then on. Listening to their tutorial progress and addressing any problems can go an extended manner towards keeping the negative aspects of social media from influencing their studies. An amazing majority report that they believe that video, podcast, and wikis re valuable tools for teaching, and a majority report that social media sites may be valuable tools for cooperative learning.

## Impact of Tourism On Indian Economy And GDP

**Dr. Shashikant V. Adsod**

Associate Professor  
Nehru Mahavidyalaya, Nerparsopant.

### Introduction

In developing countries like India tourism has become one of the major sector of the economy, contributing to a large proportion of the national income and generating huge employment opportunities. It has become the fastest growing services industries in the country with grade potentials for its further expansion and diversification. However, there are pros and cons involved with the development of tourism industry in the country.

Tourism in India has grown in leaps and bounds over the years, with each reason of India contributing something to its splendour and exuberance. It is a treasure house of cultural and traditional embellishes as reflected in its artefacts, scenic beauties of the rivers, sea and mountains, thus enabling it to gain prestige in the international arena. As per the travel and tourism competitiveness report 2009 by the world economic forum, India is a rank 11th in the Asia pacific resign and 62nd overall, moving up 3 places on the list of the worlds attractive destination. It is rank the 14th best tourist destination for its natural resources and 24th for its cultural resources, with many word heritage sites, both natural cultural, rich fauna, and strong creative industries in the countries. The India travel tourism industries rank 5th in the long term growth and is expected to be the second largest employer in the world by 2019.

### Impact Of Tourism On Economy

#### Generating Income And Employment

Tourism in India has emerged as an instrument of income and employment generation, poverty alleviation sustainable human development. It contributes 6.77% to the national GDP and 8.78% of the total employment in India. Almost 20 Million are now working in the India's tourism industries.

#### Source Of Foreign Exchange Earnings

Tourism is important source foreign exchange earnings in India. This has favourable impact on the balance of payment of the country. The tourism industry in India generated about US\$ 100 Billion in 2008 and that is expected to increase to US\$275.5 billion by 2018 at a 9.4% annual growth rate.

#### Preservation Of National Heritage Environments

Tourism helps preserve several places which are of historical importance by declaring them as heritage sides.

#### Developing Infrastructure

Tourism tends to encourage the development of multiple use infrastructures that benefits the host community, including various means of transports, health care facilities, and sports centre, in addition to the hotels and restaurants that cater to foreign visitors. The development of infrastructure has in turn induced the development of other directly productive activities.

#### Promoting Peace And Stability

Honey and Gilpin Suggests that tourism industries can also help promote peace and stability in developing country like India by providing jobs, generating incomes, diversifying the economy, protecting the environment, and promoting cross cultural awareness. How ever, key challenge like adoption of regulatory frameworks, mechanisms to reduced crime and corruption etc.mustbe addressed if peace enhancing benifits from this industry to be realise.

#### The Multiplier Effect

The flow of money generated by tourist spending multiplies as it passes through various section of the economy.

#### Regional Development

The underdeveloped regions of the country can greatly benefit from tourism development. Many of the economically backward resign contain area of high scenic beauty and cultural attraction.

#### Economic Value Of Cultural Resources

Tourism provides monetary incentives for the development of many local crafts and t cultural, thus it has an effect on the income of the local artisans and artist.

#### Promotion Of International Understanding

Tourism can also become an effective tool to develop a better understanding and interaction amongst people of different countries.

### Roll Of Tourism Industry In India GDP

Tourism industry has contributed enormously in the flourishing graph of India's economy by attracting huge number of foreign and domestic tourist travelling for professional as well as holiday purpose. According to the Travel & Tourism competitiveness report 2009 brought out by the world economy forum the contribution of travel & tourism to gross domestic product (GDP) is expected to be at US\$187.3 billion by 2019. The report also states that real GDP growth for travel & tourism economy is expected to achieve an average of 7.7% per annum over the next 10 years. Export earning from international visitors and tourism goods are expected to generate US\$ 51.4 billion by 2019. Furthermore the sector which accounted for 6.4 % of total employment is estimated to rise to 7.2 % of total employment by 2019.

Some of the most significant features of India's tourism industry roll of in India GDP have been listed below.

Deeming the growing rate of the tourist's arrival in the country, the Indian tourist industry designed a wide spectrum of holiday packages and cheaper airfares to attract more tourists.

Nonetheless, the outgoing graph of tourism industry in India is in no way lagging behind from the inbound one. People travelling from India to abroad or state within India have increased by 25%.

India is most likely to setup forty hotels of global brand by 2011. The hospitality segment in India is assumed to reach 11.41 billion.

The united nation world tourism organization (UNWTO) has estimated the outgoing tourist to reach around 50 million by the year 2020.

The booming success of Indian tourism industry has led to a drastic change in the hospitality department as well. The increase in ratio of tourist resulted in the increased of room rate and also setting of a wide range of hotels and other residing areas.

The roll tourism industry in India GDP also features medical tourism that includes traditional therapies like yoga, mediation, ayurveda, allopathic and other.

Conventional system of medicine are currently estimated to USD 333 million and are most likely to reach USD 2.2 billion by the year of 2012.

By 2021 travel and tourism account for 30439000 jobs directly, and increased of 5508000 (22.1%) over next 10 years

### Conclusion

Tourism is a major driver of economic growth globally. India's tourism industry is experiencing a strong period of growth, driven by the burgeoning Indian middle class, growth high spending foreign tourist and coordinated government campaigns to promote 'INCREDIBLE INDIA' for a developing country like India which is on the path of modern economic growth through structural transformation of the economy, tourism is the right vehicle. with its forward and back word linkages with a host of sectors like transport, hospitality, education , health, banking etc. India is all set to reap full potential of these vibrant sectors. Tourism sector is not only a major contributor to the growth of the economy but generator of employment opportunities as well. Let us hope that Indian tourism will have massive impact and will be a global leader by the year 2020.

**A Study Of Adaptation Of Various Games Practice To Develop Skills In Kho-Kho Game****Dr. Prashant Govindrao Gawande**

Arts , Science And Commerce College, Chikhaldara ,

**Abstract**

*Kho- Kho an ancient game of India. While working in the Kho-Kho field it is notice that many physical fitness components are very important ws games like Atya-Patya, Langadi and Dodge ball for the improvement of kho-kho performance. The researcher himself is a khokho coach and working as a Director of physical education in a academic college since last 20 years. Also running two sports academies. Controlled sprinting , dodging , diving , post dive, taping , covering , post turning are a few attacking and defensive skills exhibited during the game While performing some of the physical fitness abilities are important to get extraordinary result. In this study researcher has made two groups of 12 players each. Regularly one group has given practice of various games like Atya-patya, Langadi and Dodge ball along with kho-kho practice. And one group has given only Kho-kho practice regularly till 6 months to the subjects. data were collected from both groups and calculated .*

**Keywords:**Kho-Kho, Adoption of various games, skills, performance.

**Introduction**

The researcher himself is a khokho coach and working as a Director of physical education in a academic college since last 20 years. Also running two sports academies.Kho- Kho an ancient game of India played in every part of India. Controlled sprinting, dodging, diving, post dive, taping, covering, post turning are a few attacking and defensive skills exhibited during the game. The game can be played on any surface. While performing some of the physical fitness abilities are important to get extraordinary result.

**Review**

Relationship of anthropometric measurements, physiological variables and physical fitness with the performance of collegiate Kho-Kho players is studied.

History of the game: Kho-Kho game originated in India. In India it is very popular rural game. At the very beginning Baroda hind Vijay Jimkhana, Akhil Maharashtra SharirikMandal, Hanuman VyayamPrasarakMandal, Kho-Kho federation of India took efforts to promote this game and framing rules and regulation step by step, and demonstrate this game out side the country. It is usually played on clay surface, but now day's synthetic mats are also used to increase its pace.

**Rules and Regulations**

- The running or chasing side is decided by the toss
- A team consist of 9 playing members play against each other alternately in four turns or quarters of 9 min each.
- Chaser teams takes a sitting positions in the cross lane with opposite back in 8 squares and one player stands near the pole
- Runner teams sends players for running , while other runners will wait for their turn in entry zone area
- Chaser team attempts to catch the running players while passing on kho from one player to another
- The points are awarded by the legal touch of chaser player to the running player

**Method**

In this study researcher has made two groups of 12 players each. Regularly one group has given practice of various games like Atya-patya, Langadi and Dodge ball along with kho-kho practice. And one group has given only Kho-kho practice regularly till 6 months to the subjects. Prior to give training to the players attacking and defense performance data had taken from the both groups , after every 2 months performance of the subjects of two groups taken as a data for this study.

**Result**

Data were collected from both groups and calculated. The group which had given mere Kho-Kho practice or training has not seen significant improvement in their performance. The group which had practiced Atya-patya, Langadi and Dodge ball along with Kho-Kho game, had shown tremendous improvement in their performance and various skills.

**Discussion**

Kho-Kho coaches and fraternity learn the above important points through their experience on field and accordingly use the above methodology which can extract good performance from the players.While working in the Kho-Kho field it is notice that many physical abilities are very very important in the game Kho-Kho

which should be properly discussed among coaches ,sports fraternity and players so that improvement in the knowledge will take place.

### Recommendation

Along with high level physical fitness and practice Kho-Kho game, emphasis on the above methodology is very important and also it is recommended for using practically on Kho-kho field.

### Conclusion

It is observed that in the region or any part of India Kho-Kho game is played. Many players practicing regularly and taking part in University, school, National and Inter-National level, more lacking part is no qualified coaches are working, that is why the above training methods are neglected in the field. So it is important that these methodology are made known to the players and used so that there will be drastic change in the performance of Kho-Kho players.

**Role Of Ict Base Library In The Teaching And Learning Process In The Higher Education****Dr. Gulshan Damodhar Kuthe**

Librarian at LokmanyaTilak Mahavidyalaya, Wani.

**Abstract**

*Library plays a vital role in the process of teaching and learning process. Information and Communication Technology has changed the conventional role of library. Library provide various types of print and non-print material to the users. Teachers and students are the important part of the teaching and learning process. In the teaching and learning process library helps the teacher and students make their teaching and learning comfortable. The present research paper focused on how the library helps the teacher and students in their teaching and learning process.*

**Keywords:** Library, Information and Communication Technology (ICT).

**Introduction**

Education is a process of imparting knowledge and it has an objective to help in all around development of the students. In the higher education library became the important source of knowledge. It is the backbone of the educational institution. Today Information and Communication Technology (ICT) has been changed the role of library and librarian professionals. Library provides various types of books, magazines, periodicals, encyclopaedia, journals, newspapers, reference books in the print form as well as non-print material such as CD's, DVD's, Internet, Computers, OPAC, audio-video material etc. Academic library provides all types of material i.e. print or non-print materials and fulfil the demands of the teachers and students. Academic library supports the teacher and students in their teaching and learning respectively.

Teaching and learning process can be divided into Teacher centric, Student centric and now due to innovation of technology in the education teaching and learning process becomes Techno centric. In the teacher centric method teacher used to deliver his lesson with the help of books and black board. In the student centric method teacher have to help the students in their learning process. In the techno centric method teacher and student can teach and learn with the help of technological instruments such as Television, Projector, using ICT, Internet etc.

**Objective of the Study**

- To show that how the Library helps the teacher in their teaching process.
- To show that how the Library helps the learner in their learning process.
- To show that how the Library makes the teaching and learning process comfortable and affordable to the teacher and students.

**What is ICT?**

According to Encyclopaedia of Computer Science, "Information communication Technology (ICT) is an imprecise term, frequently applied to broad areas of activities and technologies associated with the use of computer and communication."

The term Information and Communication Technology (ICT) is defined as "a diverse set of technological tools and resources used to communicate and create, disseminate, store and manage information."

ICT is a term that includes any communication device of application as well as the various services and applications associated with them.

**ICT in Libraries**

Now a day libraries are not remain only the source of print material but with the help of ICT it could possible to make available the different types of electronic materials in the library such as Internet base services, e-newspapers, electronic references, Electronic document, electronic books, audio-visual materials, OPAC service, E-Learning materials. With the availability of these material in the library it helps to the teachers and students to save their time, energy, space. It also helps in the sharing information and imparting knowledge and increase the co-operation and co-ordination in the teacher-student. In this way ICT is playing vital role in the process of teaching and learning process.

**Library for students**

Library is the service provider in the educational institute. Reading centre for browsing and enjoying books for solving problems and for creating self-study habit. It equips students with life-long learning skills and develops the imagination, enabling them to live as responsible citizens.

**Role ICT Based Library in teaching learning process**

Teachers play the important role in the academic institutions and they are primary source for the students to provide them information and knowledge. Nowadays teachers are not only the person who teaches in the classroom. Information technology also changes the role of teacher's. He uses various teaching aid in the classroom to make their teaching interesting and create healthy atmosphere in the classroom. Library can provide to the teacher CD's, DVD's, YouTube Videos, TV episodes, audio-video data related with the syllabus. Teachers also give some suggestive material to the students for their knowledge.

ICT invent a great concept of E-Learning with the help of electronic media. It is playing the vital role in the learning process across the world. The teacher or institution prepares course material. This includes curriculum, courseware, assignments, quiz, lecture presentations, examination questions, etc. the course material is made available in the electronic format, most of the time online. The course material is made interactive. It is made more understandable.

In the e-learning process, the learner and the teacher need not to travel to a common physical location for the purpose of education. They can be away from each other, yet achieving the goal of education through technological means. E-learning provides remote access to learning facilities through the ICT. As such the e-learner can learn from the place of his convenience, even from home, office, while travelling or from anywhere. One can learn anytime that suits his schedule.

**Mobile Applications**

Mobile is not remains only the communication device. It is playing an important role as an information provider in the teaching and learning process. Library is a service centre. It can provide mobile application to the teachers and students. The trend toward mobile devices have increased the demand for content, particularly interactive and multimedia based content and teachers determine what educational resources are good for their teaching.

With the use of mobile application teachers and students can search the library database and get their required information and sources. Through the library app user can easily access and read required information and can use the non-print material available in the audio and videos forms on the mobile.

**Digital Content**

Digital content in the multimedia material that calls upon students to seek and manipulate information in the collaborative, creative and engaging ways that make digital learning possible. It includes video on demand, CD-ROM's Web sites, e-mail, on-line learning management systems, computer simulations, streamed discussions, data files, databases, and audio.

This new technology of digital content provide access to a vast array of information, including digital libraries, real world data for analysis and connections to other people who provide information, feedback and inspiration-all of which can enhance the learning of teachers and administrators as well as students. It also offers opportunities to individualize instruction and assessment in promising ways for all students. There are some most promising opportunities to enhance learning thorough the use of technology, such as,

- Helping students to comprehend difficult-to understand concepts.
- Helping students to engage in learning.
- Providing students with access to information and resources.
- Better meeting student's individual needs.

**Role of Library professional**

The use of ICT has transformed a modern library into electronic library providing access to information from local and remote databases through Internet, CD's, e-books, e-journals, computerized library operations such as acquisition, classifications etc. information started detaching itself from just the print format. The independence of format that was introduced created an independence of thought in approaching it. These changes transfigured the library and obliged the professionals to prepare themselves for the coming era. In this technological era to fulfil the needs of the users Librarian Professional must keep library and himself update.

**Conclusion**

Changing needs of the user's library need to change its mode of information. In the digital era library can facilitate whole digital sources and print material, different apps, availability of internet and computers and OPAC, in the library which fulfil the needs of teacher and students. Through this sources and applications library can make the teaching and learning process higher easy.

**The role and Importance of ICT in Education: The Rural Issues****Prof. Dr. Ravi Prakash Chapke**

Smt. Vatsalabai Naik Mahila Mahavidyalaya, Pusad Dist. Yavatmal

**Abstract**

*The importance of ICT in this age of technology cannot be over stated. ICT is the convergence of computer, communication and content technologies and it has great potential to improve education system. India has two diverse nations within her; the urban and the rural. ICT education is undoubtedly helpful to upgrade the teaching-learning process in the rural schools for tapping the huge reserves of human resources. The present study discusses the need, importance and the existing challenge for ICT enabled education in rural India. The attempt has been made to suggest some practical remedies for the success of ICT in rural education set up.*

**Key words:** ICT, rural, education, barriers, challenges etc.

**Introduction**

In the age of innovation and productivity today, knowledge, science and technology hold a centre stage in national and international policy debates. The persistent efforts are made on the part of nations across the globe to improve knowledge generation, creation and flow of new technologies. In the present scenario, therefore, it has been duly acknowledged the implementation and adoption of ICT in at all levels, would certainly contribute and enhance its productivity, efficiency and growth. India can enjoy a huge telecom customer base, the world's cheapest mobile handset and most affordable 4G phone. Yet the rate of internet access and connectivity in rural India is still a matter of concern as against urban India. The policymakers are undoubtedly making efforts on overcoming infrastructural barriers to rural access. However, access to ICT devices and internet is only section of the problem of digital addition in rural India.

Like the other sectors and segments across the regions ICT is very much useful in education and it has a direct role to play in the sector. It can assists in benefiting schools, educational institutions as well as community at large. ICT plays a major role in acquiring knowledge, information, and communication sharing among educational machinery. The educational thinkers like Al-Ansari, Manduku, Kosgey, Sang, Sarkar have emphasised the same. In almost of the all developed nations, the implementation of ICT in school and colleges has been compulsory. But the in developing nations like ours the implantation of ICT is far from satisfactory. However, one thing is sure that the importance of implantation of ICT and acquiring ICT skills has been universally accepted to have more informed, learned and efficient nation.

**Definition and Meaning**

The United Nations Development Programme (UNDP) defines Information and Communication Technologies: "ICTs are basically information-handling tools- a varied set of goods, applications and services that are used to produce, store, process, distribute and exchange information. They include the 'old' ICTs of radio, television and telephone, and the 'new' ICTs of computers, satellite and wireless technology and the Internet. These different tools are now able to work together, and combine to form our 'networked world', a massive infrastructure of inter-connected telephone services, standardized computing hardware, the internet, radio and television, which reaches into every corner of the globe". Michaels and Van Crowder define Information and Communication Technologies or ICTs as "a range of electronic technologies which when converged in new configurations are flexible, adaptable, enabling and capable of transforming organizations and redefining social relations. The range of technologies is increasing all the time and there is a convergence between the new technologies and conventional media".

Most of the electronics devices can now be linked to others to share and exchange information and allow it to be used in such a way that they can also be grouped as ICTs. Even books are being incorporated into ICTs either through the potential for informal web publishing or more formal digital book publishing with designated readers or e-books. ICTs, therefore, are an increasing congregation of machineries that can be used to gather, store and share information among people using multiple devices and multiple media. In a broad sense, information and communication technologies (ICTs) in education can be defined as a "diverse set of technological tools and resources used to communicate, and to create, disseminate, store, and manage information" (Blurton 1999).

**Need and Importance of ICTs**

India's adult literacy rate is about 71%—64% in rural areas compared to 84% in urban areas (Economic Times 2015). Consequently; the demand for education is very high. The demand for education today is often beyond the conventional system's ability to provide it. In such scenario, there is a growing realisation that ICT-based resources can extend opportunities to previously deprived and scattered populations. ICT, therefore,

needs to be embedded in educational systems in order to improve the effectiveness and efficiency of education in formal and non-formal settings.

There may not be conclusive research to prove that student achievement is superior when using ICTs in the education space; still, there is a general consensus among practitioners and academicians that integration of ICTs in education has an overall positive impact on the learning environment. "ICTs have the potential to innovate, accelerate, enrich, and deepen skills, to motivate and engage students, to help relate school experience to work practices, create economic viability for tomorrow's workers, as well as strengthening teaching and helping schools change" (Lemke and Coughlin 1998). According to Davis and Tearle (1999), in diverse socio-economic and cultural contexts, ICTs can be successfully leveraged to reach out to a greater number of students, including those to whom education was previously not easily accessible, and help in promoting learning, along with exposing students to the technical skills required for many occupations.

ICT has the potential to improve education system of the nation and undoubtedly it can transform the nature and quality of education. It is helpful in enhancing the quality of education by facilitating new forms of interaction between students, teachers, education employees and the community. Furthermore, ICT enacts as and provides students and teachers with new tools that enable improved learning and teaching and adds to skill formation and improves the learning process through the provision of more interactive educational materials that increase learner motivation and facilitate the easy acquisition of basic skills. With the introduction of ICT education can be accessible for all. It can bring education to the students living in remote rural locations by means of enabling distance learning. It plays a major role in providing access to a vast treasure of educational resources and content for improving literacy. It also leads to integration of technologies with traditional educational activities although it can never replace the conventional teacher-student relationship that is so crucial to the development process. Besides the greater flexibility and individualized learning facilities it has, it offers more challenging and engaging learning environment for students of all ages and can serve multiple teaching functions and diverse audiences. Moreover, it facilitates the efficiency and effectiveness of educational administration and policy by improving the quality of administrative activities and processes.

### Challenges

The Census of 2011 reveals that almost 70 % of Indian population is still rural. This fact illustrates a major concern for policy makers in regard to rural education. In most of the regions in India the percentage of illiteracy is very high. There is no doubt that ICT has immense potential to improve the education system but the same cannot be pronounced about the developing countries like ours. Here in India, we have multiple issues that confront the implementation of ICT education. The challenges are multiple in rural areas and remote villages. ICT in the rural part of the country faces both internal and external barriers.

Lack of skilled teachers in ICT in rural education is one of the major barriers. There is dearth of trained teachers who are formally educated in ICT skills. Besides, in most of the educational organizations, we have unfavourable organisational culture, attitude and belief. The attitude of teachers is outdated and adamant. The teachers seem sceptical about the implementation, effectiveness of ICT in school and college education. Now a day, teachers are usually assigned with varied tasks along with teaching. This results in having shortage of time to design and incorporation of technology in teaching- learning process. Secondly, the maintenance and upgrading of ICT equipments in rural areas is generally subject to their limited financial resources. The government initiatives in such matters remain constraint to budgetary restrictions.

In case of most of the government projects when a project phases out, the maintenance expenditures are borne by students or extracted from them. The rural students having weak backgrounds find themselves difficult to pay of fund for the maintenance of electronic or ICT tools.

The obstacle of insufficient funds leads to outdated and outmoded tools and infrastructure as availability of updated and latest technology determines the effective and efficient usage of technology. In rural part of the country, redundant and obsolete infrastructure and equipments in rural schools forms a major barrier in the process of imparting ICT education. Among the internal barriers in the implantation of ICT in rural educational set up, the challenge of language and content is a serious one. As large quantity of educational software are in English as well as majority of online content is mostly available in English language, the proficiency of the language matters. In majority of rural places the English language is yet really a hard nut to crack. This barrier hinders the maximization of educational benefits of ICT to rural students.

The prominent external barriers include the shortage of equipments, unreliability of equipment, lack of technical support, resource related issues, internet and its quality content and so on. In rural areas, the government institutes lack sufficient numbers of computers and computer related devices such as printers, scanners, LCD projectors, smart boards etc. The basic ICT equipments and computers in rural schools are mostly unreliable. There is dearth of up-to-date software and hardware. The outdated instruments are

undoubtedly hinder the proper implementation and application of ICT, along with, the rural institute also face the issues like the ICT service centres and shortage of trained technical personnel. The technical breakdowns many a times cause loss of time as well as money. Therefore the lack of technical support is one of the major challenges for ICT education in rural areas. Besides, the availability of internet facility largely determines the success of ICT education. In rural places most of the educational institutes face the trouble with supporting infrastructure such as uninterrupted electricity, multimedia etc. as well as the integral part of ICT i. e. internet facility. Most the rural schools lack internet facility and for many of them the fees charged by the service providers of internet are not affordable. The places where internet facility is available the slow and erratic connectivity mars the very essence of ICT.

### Conclusion and suggestions

Undoubtedly ICT is valuable and efficient mean to make remarkable change and advancement in education scenario. We are living in a time when students are attracted more towards e-contents. Many of the e-contents are in the form of multimedia presentations and animations. Various online courses are introduced and study material of most of the boards and universities are available online. Rural people can also have opportunity to get benefited of existing facilities.

The policymakers have been making efforts in the direction of overcoming barriers related to infrastructure such as providing adequate computers and broadband internet facility. The rationale behind providing the infrastructure is that after when the infrastructural gaps are bridged, the use of internet harmonised. However, it must be noted that mere digital inclusion may not end when people overcome access. On the contrary, “when connectivity is provided, psychological and socio-cultural barriers emerge” (Van Dijk 2006). At the same time, “studies have found that interpersonal ties and a sense of community are strong predictors of technology use in rural areas” (Boase 2010; Venkatesh and Sykes 2012).

It is essential that the policies regarding inclusion of ICT should ideally replicate the interest of learners, teachers, administrators, policymakers etc. It will make all stakeholders of education aware of the concerning issues. The networks at village level can facilitate the training of teachers and other panchayat-officials to ascertain best possible utilisation of ICT. The institutions at rural level should, therefore, be provided with adequate funds and trained staff so that these institutions can shoulder the responsibility to ensure the incorporation of ICT at different levels.

Since India houses diverse ethnic groups, cultural and linguistic diversity the involvement of the concerned community can play an important role for success of ICT models not just in the rural but the rest of the developing nation. Keeping in mind the existing educational system, students should be grouped after their learning abilities and approach rather than their grades. Such grouping may enable them to use the digital contents by their capabilities. The timely evolution of the teachers, too, is necessary to achieve desired success.

**Development of Sports in India since Independence and Sports Policies of India****Rupali Abhijit Ingole**

Shri Shivaji Science College, Amravati

**Introduction****Position Of Sports In India After The Independence**

India finally got Independence in the year 1947 and Government of India did various efforts to improve the deteriorated status of physical education. An important step in this direction was the establishment of a committee which was named "Tara Chand Committee". This committee came into existence in the year 1948. Various recommendations were made by this committee to improve the condition or status of physical education in the country. Dr. S. Radha Krishnan committee was also formed in 1948 on school education. To advise the government in various issues relating to physical education, a board, named Central Advisory Board of Physical Education and Recreation was set up in the year 1950. The Kothari Commission on Education (1965) stressed the need of compulsory physical education both in schools and colleges. To provide training to athletes in various games and sports, some special kinds of schemes were introduced by the Government of India. Some other important committees and boards were appointed for promotion of Physical education and sports, which are as under:

- All India Council of Sports (1954)
- National Institute of Physical Education renamed as Laxmibai National College of Physical Education, Gwalior (1957)
- National Institute of Sports, Patiala (1961)
- All India Sports Congress (1962)
- National Sports Policy (1980)
- Ministry of Sports and Youth Affairs (1982)
- National Sports Policy (1984) National Sports (Development) Bill (2011)

Because of various efforts of government, people got attracted towards various sports in a large number. As a result of such popularity, various federations were set up on national level. Government of India established certain institutions which were setup especially to provide training of various physical activities. In these institutions, bachelor degree and master degree can be obtained in games and sports. In India, it was realised by the government that people did not lack in natural qualities, but they did not get proper opportunities to show their talents. So, Sports Talent Search Scholarship scheme was introduced by Government of India. In 1982 Asian Games were conducted in India itself. The organisation of such international tournament in the country helps in improving the standard and infrastructure of games and sports at great extent.

**Education Policy-1986**

Government of India formulated a National Policy on Education in 1986 under the Prime Minister Rajiv Gandhi. According to this policy, learning procedure includes sports and physical education as important parts. These should be included in the evaluation procedure of performances of different participants. In educational area, a nationwide infrastructure for physical education and sports should be provided, which should comprise of various facilities necessary for sports organisation, students and coaches. In urban areas, open spaces should be kept reserved only for the organisation of different sports. Various steps should be taken to establish different kinds of sports institutions or organisations, where in addition to general education, knowledge of sports activities can be imparted. Students with interest in sports should be encouraged to participate in various sports events. Traditional games should be provided an important place in educational curriculum of schools. Yoga should be introduced in all the schools at various levels. Now, Government of India has realised that our country is lagging behind in the field of physical education in comparison to other developed countries of the world, because of which various kinds of steps are taken from time to time. One such step is the establishment of various commissions. One such commission was Kothari Commission. The reason of establishing such authorities is the poor performance of Indian players in international competitions, like Olympics and Asian Games. To improve the performance of various players in these competitions, Indian Government has taken such initiatives. Even presently, when the Olympic Games begin, all the Indian people have great expectations from Indian sportspersons but finally they always appear on the bottom of medal Tally. It is a matter of re-conciliation for us because India is the second highly populated country in the world and still is unable to produce such players who can bring medals for the country in international competitions. Although a good number of sports institutions are there but a lot is to be done in this field.

**Some Important Sports Schemes and Institutions**

To promote various kinds of sports activities in our country, Government of India and various regional sports organisations have established various kinds of sports schemes from time to time. Not only this, for encouraging people to participate in sports activities, various organisations and institutions are also established by government or by non-government agencies where they can get coaching or training of different kinds of activities. In this chapter, our focus will be on various kinds of schemes which are launched by government of India for betterment of sports and sportspersons. The institutions and organisations are also discussed which are owned by the both government and the private authorities. Such important institutions and schemes are mentioned below:

### **The Sports Authority Of India (SAI)**

Sports Authority of India was set up by the Government of India on 16 March, 1984 as a registered society primarily to look after the sports infrastructure created for the IX Asian Games. With the declaration of the National Sports Policy in August, 1984 an amalgamation of the Society for the National Institute of Physical Education and Sports (SNIPES) and the Sports Authority of India took place on May, 1987 with twofold objective: (1) to promote sports consciousness among masses; (2) to stress on competitive activities in collaboration with the National Sports Federations (NSFs) and other agencies.

### **Various Regional Centres Of Sports Authority Of India**

There are six regional centres of Sports Authority of India and the headquarters of all the centres are situated in different states. There are Southern Centre, Eastern Centre, Northern Centre, Central Centre, Western Centre and North Eastern Centre. Important information relating to these centers is as follow: Southern centre is located at Banglaore. This has been developed as a centre of excellence having all types of modern facilities. In the year 1997 this centre of excellence was set up. At Aurangabad, west zone training centre of academy is situated. Its sub-centers are located at Guwahati and High attitude centre at Shillaroo. Facilities for conducting diploma courses in coaching and certificate course in different disciplines are offered by regional centres which are located at Bangalore and Kolkata.

### **Netaji Subhash National Institute Of Sports, Patiala,**

Established in 1961, it is India's most prestigious and Asia's highly prized institution with such precise objectives as (a) to raise the technical competence of the existing coaches and produce a cadre of high caliber coaches in various sports; (b) to serve as a centre of greatest possible information on sports; (c) to render assistance to NSFs, sports councils and other organisations to hunt sports-talent and groom them into star performers as well as to polish the national learns before participation in the international competitions; and (d) to produce and popularise sport literature. Over the years its activities multiplied and diversified covering research, orientation of physical education teachers in sport(s), technical assistance to sports goods manufacturers, cultural exchange with East European countries in sports activities, regional cooperation in sports programmes, etc.16

### **National Coaching Scheme**

With the establishment of the National Institute of Sports, Patiala the existing RajkumariAmritKaur Coaching Scheme was replaced by the National Coaching Scheme in 1961 with the major objective of facilitating coaching of athletes in a scientific and organised manner at all levels of performance and for all age groups in the States (under education, sports departments and councils) under the National Sports Federations (NSFs) with the help of a strong cadre of SAI coaches throughout the country.

### **Special Area Games (SAG) Scheme**

This scheme was launched in 1985 with the sole objective of tapping talent from areas the people of which presumably have either some genetic or geographical advantage or pre-disposition towards excellence in a particular sport/game traditionally played by them over centuries or generations. Specifically the Scheme envisions identification of sport-talent from tribal, hilly, rural or coastal belts keeping in mind sport-specific attributes in archery, fencing, athletics, boxing, weight-lifting, shooting, wrestling, hockey, water sports, cycling, judo etc. Talent may also be tapped from the practitioners of indigenous sports and martial arts.

### **SAI Training Centres**

After a review of Sports Project Development Area scheme and Sports Hostel Scheme, the SAI Training Centres scheme came up in 1994-95. Each of the 40 odd SAI centres carries facility for training of sportspersons in four Olympic disciplines including one compulsory mother sport either athletics, gymnastics, or swimming coupled with two or more indigenous ones. There is a provision for day-boarding athletes who are allowed incentives such as stipend, kit and travel expenses for participation in tournaments. The underlying motive is to (a) make the Central and State Governments to work together for sports development through an integrated effort, (b) remove regional imbalances in the development of sports infrastructure, (c) nurture

talented sports-persons on a long-term basis, (d) ensure maximum utilisation of the existing sports facilities, and (e) make equitable distribution of the funds for the sports development.

### Sport Science Research Fellowship Scheme

The Sports Authority of India awards 5-10 sports science scholarships each of the value of Rs. 20,000 per annum with a contingency grant of Rs. 10,000 per annum to research scholars for carrying out research in various sports sciences such as sport and exercise physiology, sport and exercise psychology, sports medicine, sports nutrition, sports bio-mechanics and sports training methods etc.<sup>17</sup> The SAI acts as a nodal agency for a few schemes of the Government of India such as mentioned below:

### Sports Scholarship Scheme - 1997

The Sports Talent Search Scholarship Scheme was introduced by Government of India in 1970-71 to assist the young promising and talented boys and girls studying at secondary stage of education but proficient in sports with the aim to develop their talent in games and sports and to enable them to have nutritious diet during their studentship. The students are selected on the basis of national or state level sports competitions for the award of scholarships. Scholarship is also provided to outstanding university/ college level sportspersons under the National Sports Organisation programme and to women under the programme of promotion of sports and physical education among women. The old scholarships are also renewed and provided the awardees to maintain or improve their level of achievement. Presently, scholarships are available under the following categories:-

**Table - 1**  
**Sports Scholarship Scheme<sup>18</sup>**

Category – I	State Level	Rs. 5,400- p.a
Category – II	National Level	Rs. 7,200/- p.a.
Category – III	University Level	Rs. 9,000/- p.a.

### Rural Sports Programme

The programme launched in 1970-71 was handled by the National Institute of Sports with the basic objectives to (1) involve major segment of the rural youth in the mainstream of the country's sports activities, and (2) spot out and nurture rural sports talent. The programme involves holding of sports tournaments for the rural youth at the block, state, and national levels. Financial assistance is made available to the State Governments for this purpose.

### National Sports Festival For Women

It was started in 1975 by the Government of India to boost women participation in games and sports. Creation of Sports Infrastructure Under the Five Year Plans and annual budgetary allocations, the Government of India supplements efforts of the State Governments and other organisations such as local self-governments, voluntary bodies by providing matching central assistance for creation of sports infrastructure like playgrounds, indoor/outdoor stadia, swimming pools, skating rings, velodromes, sports hostels, district level and state level sports complexes. The financial assistance is provided on 75:25 shared ratio in case of special category status and 50:50 in case of others. Under a sub-scheme, financial assistance is also given to Rural Schools for the Development of Play-fields and Purchase of Sports Equipment under the main scheme of creation of sports infrastructure. Scheme for laying of Synthetic Track/Artificial Hockey and Artificial Surface This revised scheme provides financial assistance up to Rs. 1 crore or 50% to the estimated cost of the project to the SAI, NSFs, State Sports Councils, Service Sports Control Boards, local bodies, universities, colleges, schools etc. for construction and replacement of the artificial surfaces used in various sports.

### Games And Sports In Universities And Colleges

To promote sports in universities/colleges that receive financial assistance for development of play grounds, construction of stadia and other sports facilities in the ratio of 75:25 in the case of special category states and in the ratio of 50:50 to others, subject to certain ceilings is available. Assistance is also given for the purchase of sports equipment up to maximum amount of Rs.3.00 lakh without any matching share from the institutions.

### Assistance To National Sports Federations

The Government of India financially assists the NSFs for conducting national championships and International tournaments in India, participation in international tournaments abroad, organising coaching camps, procuring sports equipment, engagement foreign coaches and disbursement of salaries to the joint/Assistant

### Secretaries Engaged By NSFs.

The Incentive Schemes of the Ministry of Youth Affairs and Sports

It include

- a) assisting promising sportspersons and supporting to update their Competence
- b) promotion of sports and games in schools
- c) national welfare fund for Sportspersons
- d) sports fund for pension to meritorious sportspersons
- e) special cash award to medal winners in international sports events etc.

### Scheme Relating To Talent Search And Training

Under this Scheme, assistance is provided to promising sportspersons for training and training-cum-competitions in India and abroad, for purchase of equipment and scientific support. Supporting personnel such as coaches, sports scientists, doctors and masseurs etc. are also assisted for undergoing specialised training and for attending seminars/conferences and major international sports events and for appearing in qualifying examinations. This scheme is implemented through Sports Authority of India (SAI).

### National Sports Development Fund

The National Sports Development Fund (NSDF) was instituted by the Central Government with a view to mobilise resources from the Government as well as non-governmental sources for promotion of sports and games in the country. The funds available under NSDF were used towards promotion of sports in general and specific sport disciplines and individual sportspersons for achieving excellence at the national and international level.

### Scheme Of Sports Fund For Pension To Meritorious Sportspersons

This scheme was launched in the year 1994. Under this scheme, those sportspersons, who are Indian citizens and have won gold, silver and bronze medals in Olympic Games, World Cup/World Championships, Asian Games, Commonwealth Games; and Para-Olympic Games and have attained the age of 30 years and have retired from active sports career, are eligible for life pension under this Scheme since July 2008. The details are given below:

**Table- 2**

Pension Scheme to Meritorious Sportspersons 23

1	Medalist at the Olympic Games	Rs. 10,000/- p.m.
2	Gold medalist at the World Cups/ World Championship in Olympic and Asian Games disciplines	Rs. 8,000/-p.m.
3	Silver or Bronze medalist of the World Cups/World Championships	Rs. 7,000/-p.m.
4	Gold medalists of the Asian/Commonwealth Games	Rs. 7, 000/-p.m
5	Silver and Bronze medalists of Asian/Commonwealth Games	Rs. 6, 000/-p.m.
6	Gold medalist of Para-Olympic Games	Rs. 5,000/-p.m.
7	Silver medalists of Para-Olympic Games	Rs. 4,000/-p.m.
8	Bronze medalists of Para-Olympic Games	Rs.3,000/p.m.

### National Welfare Fund For Sportspersons

The National Welfare Fund for sports persons was set up in March 1982 and reviewed in July 2009 with a view to assist outstanding sportspersons of yesteryears, living in indignant circumstances that had brought glory to the country in sports. Apart from the above mentioned schemes former Union Minister and Rajya Sabhamember of Parliament Ashwani Kumar has urged the Prime Minister Manmohan Singh to set up a Prime Minister's special relief fund for international and national level sportspersons who have done the country proud by their feats. The MP was referring to the media report highlighting the plight of the family of ace athlete of yesteryears Makhan Singh, who donned the national colours in the 1962 Jakarta Asian games. Apart from that, in the 1962 Calcutta National games, he got past the legendary Milkha Singh in the 400m race to garner gold. He ended up winning four medals in different events in the same championship. The family of Makhan Singh, who was conferred the prestigious Arjuna award in 1964 by the then President Dr. S. Radhakrishnan, lives in abject penury in Bhathula village in Hoshiarpur. His wife SalinderKaur and son Parminder Singh, who works as a sewadar in the Hoshiarpur BDPO office, have threatened to return the award and the scores of other medals Makhan Singh won back the government "if it does not wake up to their problems." A week after former athlete Makhan Singh's case was highlighted in the tribune, the government said it was going to formulate a policy for the welfare of sportspersons.

### Promotion Of Sports Among Persons With Disabilities

The Ministry formulated a scheme for promotion of sports and games among disabled during 2009. The objective of the Scheme is to broad base participative sports among the disabled. The Scheme of Sports and Games for the Disabled has the following components:

1. Grant for Sports coaching and purchase of consumables and non-consumable sports equipment for schools.
2. Grant for Training of Coaches.
3. Grant for holding District, State and National level competitions for the disabled.<sup>26</sup>

### **Scheme Of Assistance For Anti-Doping Activities**

Doping is the deliberate or inadvertent use by sportspersons of a substance or method banned by Medical Commission of International Olympic Committee/World Anti-Doping Agency (WADA). India is no exception to this malaise. Recognising the urgent need for embarking upon a concerted effort to check doping in collaboration with the global anti-doping community, The Government of India became one of the members of the Foundation Board of WADA, set up with the initiative of the

### **International Olympic Committee.**

#### **National Anti-Doping Agency (NADA)**

NADA is the national organisation responsible for promoting, coordinating and monitoring the doping control programme in sports in the country. The Anti-Doping rules of NADA are compliant with the Anti-Doping Code of WADA.<sup>27</sup> Laxmibai National Institute of Physical Education; Gwalior Central Government took a premium step in the year 1995 by giving the status, of Deemed University to the Institute of Physical Education. The main function of this institution is to prepare or trained the coaches in such a way that they can provide proper training to the students of physical Education at various levels. To do research on various aspects relating to the physical education, this institution has set up various research centres in various parts of the country. To fulfill the requirements or needs of various physical educators, this institute has run an academic staff college of UGC. Various courses are organised by this institute for the improvement of standard of

### **Coaching In The Country.**

#### **Schemes Relating To Incentives To Sports Persons**

The Ministry of Youth Affairs and Sports implements various schemes as incentives in the form of awards to sports persons to take up sports:

#### **Rajiv Gandhi Khelratna Award**

The scheme was launched in the year 1991-92 with the objective of honouring sportspersons to enhance their general status and to give them greater dignity and place of honour in society. Under this scheme an amount of Rs. 7.5 lakhs and a medal are given as award for the most spectacular and outstanding performance by a sports person in the preceding year.

#### **Arjuna Award**

The Arjuna Awards were instituted in 1961. To be eligible for the award, a sportsperson should not only have had good performance consistently for the previous three years at the international level, with excellence for the year for which the Award is recommended but also should have shown qualities of leadership, sportsmanship and a sense of discipline. The Awardee is given a statuette, a scroll of honour, ceremonial dress and a cash award of Rs. 5 lakhs. Not more than 15 awards are given every year. So far 649 outstanding sportspersons from various disciplines have been conferred with this award.

#### **Dhyan Chand Award For Lifetime Achievements In Sports And Games**

Dhyan Chand Award for lifetime achievement in sports and games instituted in the year 2002 is given to honour those sportspersons who have contributed to sports by their performance and continue to contribute to promotion of sports even after their retirement from active sporting career. The award carries a cash of Rs. 5 lakh, a statuette, a scroll of honour and ceremonial dress. Twenty Five sportspersons have been given this award since its inception.

#### **Dronacharya Award**

The Dronacharya Award instituted in 1985, to honour eminent Coaches who have successfully trained sportspersons or teams and enabled them to achieve outstanding results in international competitions. The awardee is given a statuette of Guru-Dronacharya, a scroll of honour, ceremonial dress and a cash award of Rs. 5 lakh. Not more than 5 awards are given every year.

#### **Maulanaabulkalam Azad (Maka) Trophy**

The MaulanaAbulKalam Azad (MAKA) Trophy was instituted in 1956-57. The top overall performing University in the Inter-University Tournaments is given the MaulanaAbulKalam Azad (MAKA) Trophy, which is a rolling trophy. A small replica of the MAKA Trophy is also awarded for retention to the University. In addition, the University also gets a cash prize of Rs. 10 lakh. The second and third best universities also receive cash awards amounting to Rs. 5 lakh and 3 lakh respectively.

### Rashtriyakhelprotsahanpuruskar

Government has instituted a new award entitled RashtriyaKhelProtsahanPuruskar from the year 2009 it has four categories, namely, community sports development, promotion of sports academics excellence, support to elite sportspersons and employment to sportspersons. The award consists of a citation and a trophy in each of the above mentioned categories without any cash award. Special Awards to Winners in International Sports Events and their Coaches This scheme was introduced in the year 1986 to encourage and motivate outstanding sportspersons for even higher achievement and to attract the younger generation to take sports as a career. The amount of cash is given below:

**Table 3**  
**Special Awards to Winners in International Sports Events**

Name of Championship/ Game	Gold Medal First Position	Silver Medal Second Position	Bronze Medal Third Position
Olympic Games	Rs. 50 lakhs	Rs. 30 lakhs	Rs. 20 lakhs
Official World Cups/Asian	Rs. 10 lakhs	Rs. 5 lakhs	Rs. 3 lakhs
Asian and Commonwealth Championship	Rs. 3 lakhs	Rs. 3 lakhs	Rs. 1.5 lakhs

Cash award is also given to coaches. The coaches who have trained the medal winners for at least 240 days immediately preceding the game are eligible for cash award under the scheme. Award money to a coach is 50% of the award money given to the sportsperson whom he had coached.

### National Sports Policy 2001

In order to broad-base sports and to promote excellence, the Government has formulated a National Sports Policy, 2001. The salient features of the Policy are: Broad-basing of Sports and achievement of excellence. Up gradation and development of infrastructure; Support to the National Sports Federations and other appropriate bodies; Strengthening of scientific and coaching support to sports; Incentives to promote sports; Enhanced participation of women, Scheduled Tribes and rural youth; Involvement of the Corporate Sector in sports promotion; and Promote sports mindedness among the public at large.

### PanchayatYuvakridaaurkhelabhiyan (PYKKA)

The Government launched a national programme 'PanchayatYuvaKridaAurKhelAbhiyan' (PYKKA) in 2008-09 for the creation of basic sports infrastructure in all village and block panchayats of the country over a period of 10 years and organising sports competitions at block, districts, state and national levels. All the 2, 50,000 village and block panchayats and equivalent units will be covered during the period. The scheme will not only contribute to public health and social inclusiveness, but also stimulate the economic activities within the sports sector, as it would lead to an exponential growth in the demand for sports instructors, coaches, sports equipment and consumables and sports events and related support services. Under the programme financial assistance shall be given to a village/block panchayat for the following purpose:

#### One-Time Seed Capital Grant:

For development of sports infrastructure, Rs. 1 lakh to each village panchayat having minimum 4,600 population (national average) with additional funding on additional population size beyond the national average. This is contributed on 75:25 basis between the Central Government and State Government for normal States and on 90:10 basis for special Category States.

#### For Block Panchayats:

Grant of Rs. 5 lakh is to each block panchayat is provided for development of sports infrastructure. The sharing pattern between the Central Government and State Government is 75:25 for normal States and 90:10 for Special Category States.

#### Annual Equipment Acquisition Grant: (For A Period Of Five Years For)

Acquisition of sports equipment, accessories, support fixtures, consumables and repair and maintenance is given. Beyond five year it will be the responsibility of the State Government/Local body to fund this component. The grant is hundred percent central grant and a sum of Rs. 10,000 per annum to each village

panchayat and Rs. 20,000 per annum to each block panchayat is given. State Government provides fund to this component. This grant is also hundred per cent and a sum Rs. 12,000 per annum to each village panchayat and Rs. 24,000 per annum to each block pauchayat is granted.

### **Annual Competition Grant: For Organising Tournaments At Block, District, State And National Levels As Per Details Given Below:**

- a) Rs. 50,000 per annum to each block panchayat for organising block level competitions;
- b) Rs. 3 lakh per annum to each district for holding district level competitions;
- c) Rs. 10 Lakh per annum to each State and Rs. 5 Lakh to each Union Territory per annum for holding State level competitions.
- d) Rs. 70 Lakh per annum for holding national level competitions.

### **Annual Competition Grant Is A 100 Per Cent Central Grant.**

Prize money of Rs. 25,000, Rs.15,000 and Rs. 5,000 respectively as 100% share from Central Government is given to first three village prnchayats at the block level tournaments (all 6373 blocks) and prize money of Rs. 50,000, Rs. 30,000 and Rs. 10,000 as 100% share from Central Government is given to the first three block panchayats at the district level tournaments (all 607 districts).

### **Mission Outlay**

Mission Outlay for the twelfth Plan is more or less restricted to the allocation of Rs. 500 crore made by the Planning Commission. The requirement of funds for the Eleventh Plan is projected at Rs. 1,567 crore. The requirement of funds for the Twelfth five Year Plan has been projected at Rs. 2,887 crore without any inflation indexing. The total for the two plan periods comes to around Rs. 4,455 crore.<sup>36</sup>

### **Indian Olympic Association**

In the year 1927 that Indian Olympic Association came into existence. The honour of becoming its first president was enjoyed by Mr. Dorabji Tata. Since then, this association is functioning very efficiently and is affiliated with International Olympic Committee. Once in four years, elections of this association take place. These take place at the annual meeting of the General assembly the purpose to elect members of the councils.

### **Commonwealth Games 2010**

Commonwealth Games, 2010 were hosted in Delhi from 3rd October to 14th October. For successful conduct of the Commonwealth Games, a comprehensive integrated approach was worked out for creation and development of world class sports infrastructure, games village, civic infr 71 countries participated in these games and India won 101 medals including 39 Gold, it was highest ever tally and the country stood second in the medal tally behind Australia with a total of 177 medals.

### **London Olympic Games 2012 And India**

India competed the 2012 Summer Olympics in London, from 27 July to 12 August 2012. The Indian Olympic Association sent the nation's largest delegation to the Games in Olympic history. A total of 83 athletes, 60 men and 23 women, competed in 13 sports. This was India's most successful Olympics in terms of total medal tally, having won a total of 6 medals (2 silver and 4 bronze), doubling the nation's previous record (3 medals at the Beijing Olympics, 2008). Two medals each were awarded to the athletes in shooting and wrestling. India also set a historical milestone for the female athletes who won two Olympic medals.

### **International Co-Operation**

#### **Commonwealth Youth Programme (CYP):**

The CYP came into being in 1974 with the purpose of promoting the development of young men and the Commonwealth countries. The headquarter of CYP is situated in London Exchange of Youth Delegations at International Level The International exchange of youth delegation has been conceived as an effective instrument for promoting exchange of ideas amongst the youth of different countries and to develop better relations with other countries.

### **Some Recent Initiatives**

#### **Enhancement In Assistance To Subroto Mukherjee Sports Education Society:**

The Subroto Mukherjee Cup Football Tournaments are held in India since 1958 and are organised by Subroto Mukherjee Sports Education Society which is being managed by the Air Force Sports Control Board. The Ministry has been providing assistance of Rs. 5 lakh every year to the Society under the Scheme Assistance to National Sports Federations. It has been decided to enhance the annual support to this event to Rs. 25 lakh from the earlier level of assistance of Rs. 5 lakh.<sup>39</sup> Review of the Scheme of National Welfare Fund for Sportspersons: Scheme of National Welfare Fund for Sportspersons was reviewed July 2009 to provide for

lump sum ex-gratia assistance to outstanding sportspersons of yesteryears, who brought glory to the nation, but are now living in indignant circumstances.

### Budget 2013-14, And Sports

A National Institute of Coaching Education will be established with the aim of producing quality coaches of international standards for which Rs 250 crore have been allotted in the 2013-14 budget for the Ministry of Youth Affairs and Sports. To establish the national coaching centre, the National Institute of Sport in Patiala will be de-merged from the Sports Authority of India. In all the finance ministry has allocated Rs. 1,219 crore to the Ministry of Youth Affairs and Sports for the new fiscal year, an increase of Rs 214 crore. For 2012-13, the sports ministry was allotted Rs 1,152 crore, which was later revised to approximately Rs 1005.60 crore. Out of the total outlay, Rs 792.72 crore has been kept aside for sports and games while the youth affairs department will receive Rs 301 crore. The Sports Authority of India (SAI) will receive Rs 326 crore out of the total amount sanctioned, while Rs160 crore will be given to the National Sports Federations. Last year, the sports federations received Rs110 crore.

### Conclusion

As we see sports have traveled a long journey on the way of their upliftment in the Indian society. Government and Non-Government agencies have worked a lot for the broad basing of sports in the country, but a lot is to be done yet in this regard. People are also getting attracted toward games due to many incentives offered on various stages in the form of cash prizes, and reservation in jobs under sports quota etc. It is a good omen for the country that we are receiving positive results in all the sports especially in athletics. With such sincere efforts on the part of both government and public, we can hope that Indian Tri - colour will soar high because of sports achievements.

## The Study Of Streaming Media On Consumer With Reference To Amravati City

Ms. Asawari Devdatta Nande

Student, Department of Management Studies, Prof. Ram Meghe Institute of Technology & Research  
Badnera, Amravati Maharashtra

### Abstract

Streaming media is an nowadays turning force in the way that we can produce, consume, and distribute media. In this report, we look at the impacts of this recent technological advancement on audience practices in a networked society. Audiences far and wide use streaming as a tactic to buck temporarily the strategic power of corporate conglomerates and governments. However, the streaming technology is also used by media in industries to form an emergent streaming media industry. Also Companies like Netflix are part of new ideas governing how television and film get made and distributed. In another way the clash between Internet streaming companies and traditional cable companies raises tensions about shifting audience practices. Streaming Media may also cause an end of the computer era. Through this report we would analyze the consumer perception towards traditional television and modern streaming and also interpret the change in viewing habits of consumers.

**Keywords:** Streaming Media, audiences, technology, etc.

### Introduction

#### What Is Streaming Media?

Streaming Media are defined as listening, viewing media in real time as it comes across the World Wide Web. The streaming technology, may be users watch and also listen to media while it is being sent to their browser, instead of waiting for it completely download and then playing . Before streaming technology was available, a user might wait an hour to complete download a short media file.

Nowadays Streaming media is also video or audio content sent in compressed form over the Internet and played immediately, rather than being saved to the hard drive. With the streaming media, a user does not have to wait to download a file to play it. Because, the media is sent in a continuous stream of data and it can play as it arrives. Whenever users can pause, rewind or fast-forward, and just as they could with a downloaded file, unless the content is being streamed live.

### Streaming Devices

#### Amazon Fire TV

The first-generation are Fire TV device featured 2 GB of RAM, MIMO dual-band Wi-Fi, and Bluetooth remote control with a microphone for voice search. Amazon Fire TV is also supported 1080p streaming and Dolby Digital Plus 7.1 surround the sound but was dependent on the internet bandwidth of the user. In other way on April 2, 2014, the Amazon Fire TV (1st Generation) was made available for purchase in the US the in same day for US\$99 and was launched with a video game is also called as Sev Zero. The second-generation version was released in 2015, adding 4K resolution support in market.

#### Google Cast

The first-generation of Chromecast, is a video of streaming device, was announced on July 24, 2013, and made available for purchase on the same day in the United States for US\$35. The second-generation of the Chromecast and an audio-only model called Chromecast Audio were released in September 2015. The model is also called Chromecast Ultra that supports 4K resolution and high dynamic range was released in November 2016. A third generation of the HD video the Chromecast was released in October 2018.

#### Roku

The Roku players, is branded simply as Roku the series of online media players manufactured by the American company Roku, Inc. Roku partners provide the top in the form of channels. The name comes from the Japanese word rokuia the meaning "six" and was named so, because it was the sixth company that Anthony Wood are founder and CEO since 2002 started. The Roku in the streaming device receives data (the video stream) through a wired or Wi-Fi connection from an Internet router. The data is output via an audio cable, video cable, or an HDMI connector directly on the some of the device models. Programming and content for the devices are available from a wide variety of global providers in streaming media.

## Importance Of Streaming Media

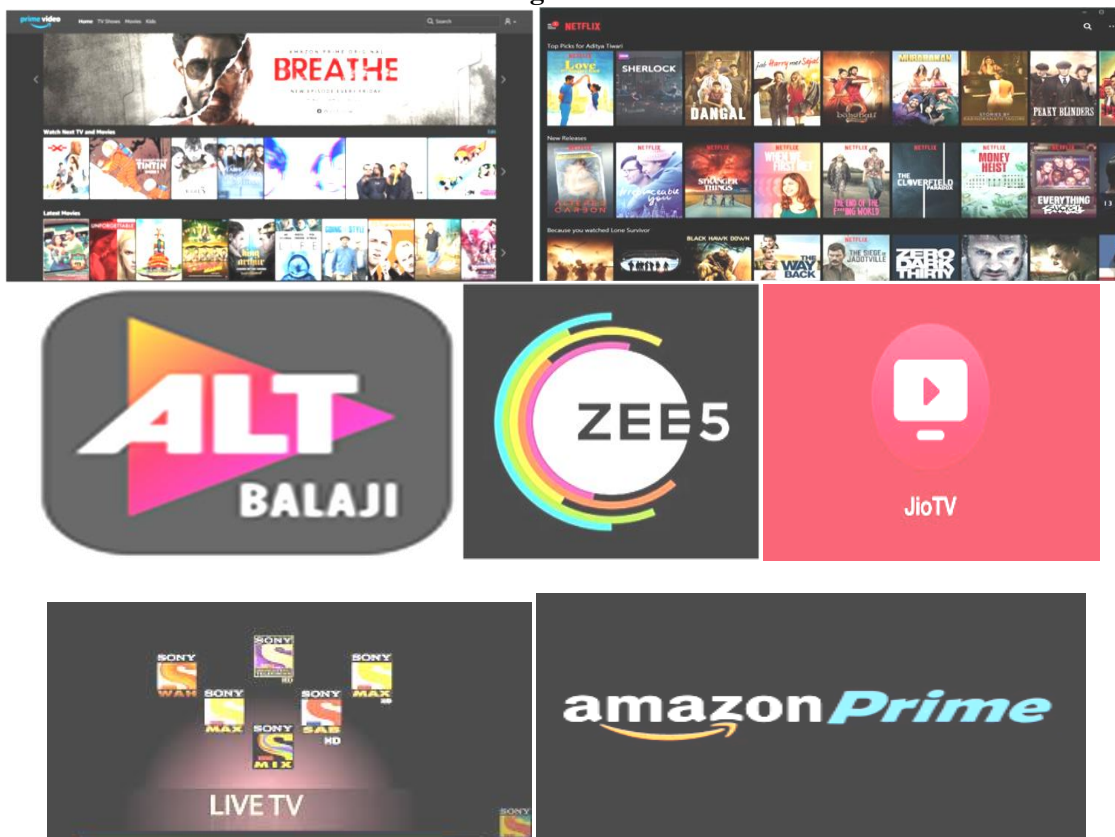

Live streaming is the evolution of live TV. The reasons are why live TV made such a big impact was because it brought viewers up-to-date informative and accessible content. Though it's still popular, since online streaming, and TV subscriptions have been decline.

One of the main reasons are why live streaming is so important, for brands and individuals, is because of the level of interaction and engagement it offers. No other marketing strategy allows for such level of interaction.

One of the reasons why live streaming can help you reach more people is because platforms will favour live content. For example, if you go live on Face book, the chance of your followers seeing it on their newsfeed is higher than if you share an image or a video on demand.

Online streaming is one of the fastest growing industries. In fact, the video of streaming market is worth more than 30 billion dollars. It's expected to be worth more than [70 billion dollars by 2021](#)

## Streaming Sites in India

- Netflix
- Amazon Prime Vedio
- Hotstar
- Sony Liv
- ALTBALJI
- Jio TV
- Voot
- Zee 5

## Reseatrch Methodology

The research methodology used for studying “The impact of Streaming Media on consumers with reference to Amravati City” is exploratory research design and Hypothesis testing research design. In the Research Methodology analysis and interpretation has been done by using the statistical tools and data presented through tables and charts.

## Objective

- To study the changes in viewing habits of consumers.
- To find out the impact of streaming media on youngsters.

- To find out whether streaming sites would cause the end of television era.
- To analyse the future of streaming service in India.

**Hypothesis**

- H0: Majority of Youngsters prefer streaming sites over Television.
- H1: Streaming media would surely cause an end of Television.

**Data Collection**

The data collected for the study consists of primary data and secondary data.

**Primary Data**

In this study, primary data is collected through personnel interview and questionnaires.

**Secondary Data**

This data is to be collected from various books, reports, journals, periodicals, magazines, web pages, etc.

**Sample Design**

The Sample design is definite plan for obtaining a sample from a given population. Sample has been collected by using the systematic sampling method and stratified the sampling method

**Sample Universe**

The sample universe for this study was viewers of Streaming Media in Amravati City.

**Sample Size**

The sample size of this study is 100 respondents.

**Data Analysis & Interpretation**

Change in Viewing Habits Of Consumers

Classification according to source of watching TV

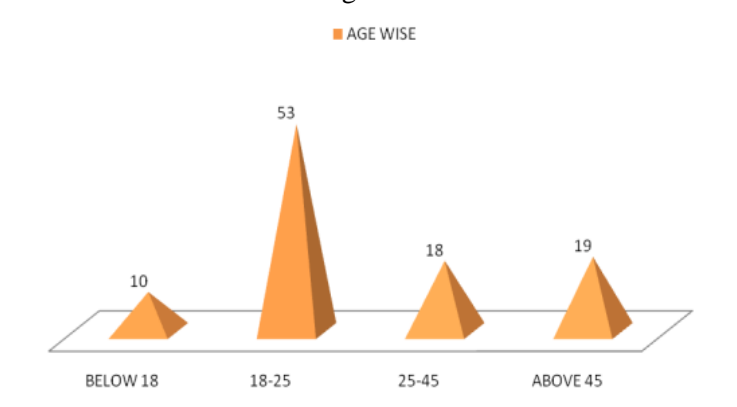

**Interpretation:**

According to the data collected, we came to know that change in viewing habits of consumers out of 100 respondent the classification of watching TV 56% peoples are watching the Set Top Box and 12% people watching Direct TV 23% people watching Online Subscription and 9% people are Never Watching TV.

**Impact of streaming media on Youngsters**

Age wise

**Interpretation**

According to the Impact of Streaming Media on Youngsters of Age Wise Classification is out of 100 respondents but in this analysis below 18 the 10% people are known about this. 53% people are under 18-25 are known about the streaming and also watch TV. 18% people is under 25-45 knowing streaming and 19% people are under above 45 are knowing the streaming and impact on the streaming media.

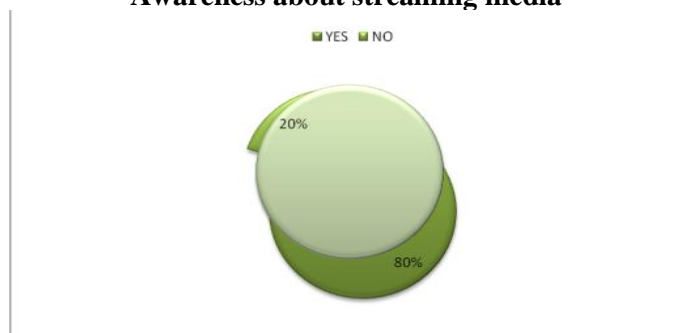

**Time wise classification**

**Interpretation**

According to the Time wise Classification out of the 100 respondent only 20% people are watching in 4 Hours, 5% people are watching in 7 Hours, 56% people are watching less than 4 Hours and 19% people are watching More than 7 hours.

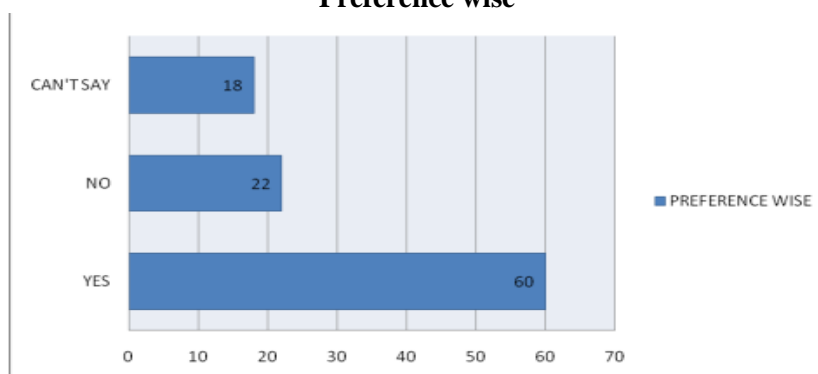

**Awareness about streaming media**

**Interpretation**

According to the Awareness About Streaming Media out of 100 respondent only 20 % people are don't aware about the streaming media but only 80% people are aware about the streaming media and knowing about the streaming app.

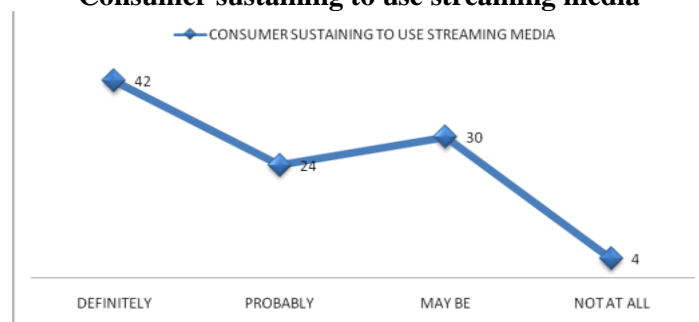

**Impact of Streaming Sites on Television Era Preference wise**

**Interpretation**

According to the analysis of Streaming sites cause an end of Television Era the Preference wise Classification out of 100 respondent 60% people is preference to the Streaming sites. 22% people are do not preference to the Streaming site and some 18% people can either or nor preference to the streaming sites.

### Future of streaming services in India Consumer sustaining to use streaming media

#### Interpretation

According to the Future of Streaming services in India the Consumer Sustaining to use Streaming Media. Out of 100 respondents definitely 42% people are sustaining to use Streaming Media. Probably 24% people are sustaining to use streaming media. May be 30% people are sustaining to use Streaming Media and 4% people are not at all about sustaining to use Streaming Media.

#### Findings

Consumers do not have whole information about operating a streaming site and procedure for buying online subscription. Most of the people are unsuccessful to use streaming sites because they find it difficult to remember the last episode or show they have streamed before. Most people find it difficult to remember their login ID and passwords. A streaming site without subscription continuously shows ads which reduces the consumer's interest. Consumers are unaware about the various plans, offers given by the various streaming channels. The feedback and ratings is taken but there is no proper analysis of this information received. There should be accurate interpretation of data and submitting it for the decision making should be properly channelized. Most of the young generations are aware about streaming but very few among adolescence are aware and using streaming to watch television. Each subscription app does not contain each and every sports, music, web series etc. So consumers have to subscribe for more than one channel. People giving more preference to television are in favour of streaming as they can use android T.V. and devices for streaming on television.

#### Conclusion

The streaming app should support multiple screen and multiple languages. Streaming site must develop their speed and quality, Buffering may irritate the consumers. If one have seen the film or episode then there must be a marked as seen option available. Put an expiry date on when certain films, T.V. shows are leaving streaming sites. Some sort of notification or remainder must be given before expiry of any program. Give us the option to pay extra for watching different countries libraries. There must be an individual ratings or each season of T.V series. A suggestion box for potential films, T.V series should be kept in rural areas. More focus must be given on marketing streaming sites as they provide better services than television. Streaming media should be accessible to the common man for better result. There should not be any restrictions on using particular applications by particular areas.

## Sports On India: Opportunities And Challenges

Mr. Abhay S. Chandekar

Director, Physical Education, Babasaheb Deshmukh Parwekar Mahavidyalaya, Parwa

### Abstract

*To celebrate National Sports Day on August 29 more than an annual ritual, we need to recognize that sports and games are essentially required for human development as an integral part of real education including proper, productive and practical use of hands, head and heart for the Indian youth.*

### Introduction

Sports deserve to be recognized as human resource development (HRD) activity in the Indian context. It is necessary and sufficient to deal with the ups and downs in the economy including share market of the bulls and bears in the spirits of a sports person. Learning tolerance, harmony fair play with discipline for leadership qualities are the opportunities to make it part of the curriculum. The challenges include unhealthy competition with match-fixing, semester system of examination with lesser time and all the challenges of inclusiveness with careless and useless manpower to be made useful and careful. We need to foster sports culture in the Indian universities including private sector with freedom and right to play as a participant if not to compete in the rat race.

To promote sports, the schemes programmers and efforts of the government of India are necessary but not sufficient. To make it sufficient, there is a strong case for reducing if not avoiding over importance to cricket which has done more harm than good to the entire sports and games due to the money involved in it.

Let us think it over with open minds like Americans. It need to be noted that International cricket in America was virtually nonexistent until recently when the united states national cricket team started playing in the world cricket league. Cricket in the united states is run by the united states of America cricket Association, whose effectiveness is lessened by limited funds due to cricket's lack of popularity compared to other sports.

The present situation of sports led to a debate on the ways to improve the sports ecosystem in the country. It is against this backdrop, it is pertinent to understand, analyze and interpret the factors adversely affecting the sports in India and the steps taken by the government to rectify the situation. Moreover. Due to the increased competition, today's parents are giving more attention to the academic concern for their children.

It is sad to observe that the introduction of the semester system in education has left little time for the student for sports and other co-curricular activities for personality development. they remain busy throughout the semester to finish the courses of study followed by an examination. Let the authorities think of replacing semester system by annual system which provides more time for students to do extra curricular activities like NCC, NSS, debates, declamations and sports like athletics, national games like hockey and football, tennis, badminton not cricket only which is responsible for losing interest in other sports only because of money involved therein.

To do justice with sports as personality development activity and part and parcel of the over all education and HRD, we need the annual system of examination rather than a semester.

It has been observed that his social and economic inequalities hurt Indians sport. He denial of access to sports infrastructure due to poverty, the concentration of stadiums and other sports avenues only in cities, lack of encouragement to girl a to participate in sports etc, have impaired the development of positive sports culture in the nation with the potential to prove.

This is one of the most important factors for the apathy of the sports in India. Since infrastructure is necessary for training and organizing games, its non-availability and its access to only a few section of the society have adversely impacted the sports participation and the quality of sportspersons.

For the development of any sector including sports, formulation and execution of an effective policy is a sine qua non. Till date, the sports policy planning and implementation are centralized in the country due to the paucity of resources and the expertise by the state and local governments. Moreover, the absence of a separate ministry of sports at the union level reflects the apathy towards sports.

It needs introspection that in comparison to other developed and developing countries, the allocation of financial resources is meager in India. In the union budget 2017-2018, Rs. 1943 crore stands allocated for sports. While it is much blow that the around Rs. 9000 crore spent annually by the UK for the sports sector.

In September 2017, the union cabinet approved the revamped khelo India program at a cost of Rs, 1756 crore for the period 2017-18 to 2019-20. The program aims at mainstreaming sport as a tool for individual development, community development, economic development and the national development. The revamped khelo India program would impact the entire sports ecosystem, including infrastructure, community sports,

talent identification, coaching for excellence, competition structure and sports economy, if done with the honesty of purpose without corruption and favoritism to anyone anywhere and everywhere.

In march 2017, twelve Indian players of international eminence were appointed by the government as national observers for the first time for the development of various sports in the nation of talented sportsperson. Among other responsibilities, they assess the existing sports infrastructure/ equipment, quality of scientific backup and medical facilities at the venues of the national coaching camps and report the critical gaps falls in the domain of duties. The results of this Endeavour are still awaited and need monitoring and evaluation.

Under the 'Assistance to National Sports Federations' the government of India has been providing financial assistance to the recognized National Sports Federations for supporting girls/women's exposures, training and participation at national/ international level deserve to be used honestly.

To provide the best possible help and support to athletics in their training for the upcoming 2020 Olympics, the government approved the appointment of foreign coaches and supporting staff deserve appreciation.

In April 2016, the Centre Sector Scheme, Khelo India-National program for development of sports was approved by the government of India, it subsumes the erstwhile Rajiv Gandhi KhelAbhiyan, urban sports infrastructure scheme and national sports talent search system program is yet to be assessed with results.

It needs to be noted that despite the above-mentioned measures taken by the government of India, the sports ecosystem is of poor quality in the nation with potential for excellence. For a country of over 130 cores, the existing sports infrastructure is not up to satisfactory levels. The lacks of world class infrastructure and the inadequate support of the government are reflected in the poor performance of Indian athletes in major international events like the Olympics.

### Conclusion

Tiny countries like Cuba, Croatia and Lithuania performed better in the 2016 Olympics compared to India. It is high time, the public and private sector should come together to lift the Indian sports sector from the present situation. There is a strong case for the extension of Justice Lodha Committee recommendations on BCCI to all other sports bodies which will prove to be a right step with hope of needed attention for Indian sports with potential. The existing infrastructure for sports in private universities can better be utilized with co-operations and support of the government and sports authority of India by providing coaches for the entire domain of games and sports. For bringing sufficiency, efficiency and equity, we need to treat sports as HRD activity with logic and rationale to be a part of HRD ministry not only in the centre but 29 states and 7 UTs as still, it falls in the state list. Let every student go to the playground in the morning and evening for keeping fit and mentally healthy and discipline. This calls for financing sports through the corpus funds to be created from the corporate sector under the corporate social responsibility (CSR) by the association of Indian universities. Ethics in sports based on values can be imbibed from Bhagavad Gita which is ism neutral a religion- free treatise on management and welfare economics.

## The Contribution of Media In Indian Music

**Prashant Z. Bagde**

Asst. Professor, Dept. of Music BabajiDatey Kala AniVanijyaMahavidyalaya Yavatmal

As the adage in Sanskrit says “SahityaSangeetKalaheenahPashuPuchchaVishaanaheen” means these who do not know the knowledge of literature music and art are just animals without tails and horns. Having understood this elders and knowledgeable persons have learnt and spread the importance of literature music and art and we could find ample instances for the same.

Everybody agrees that media plays a very significant role in spreading of any art. Man in the beginning started to be attracted by the sounds of water, animals, birds in nature, having listened to their sounds. He wondered at the notes in their sounds. Bowing to the music of their sound, he started to imitate them. It will not be wrong if it is said that the nature was the medium of music in these days.

It can't be denied the fact of development of music by the ancient people while seeking to lead civilized life through cradle songs. Lullaby was to sleeping child by music. Even orally from person to person songs were continued although in limited means.

Our illustrious Indian folk-lore is fraught with different songs and dancing suitable to person as in Sanskrit said “MukheMukhenaSarswati” In my childhood, almost fifty years ago, technology was not developed. Then in the houses of villages, women used to sing white pounding, using Wheatstone (cradle-songs) nomenclature at the time wedding and garter wedding while receiving bride-into the home. They use to sing such song differently at different regions. Men also used to sing while plugging cultivating removing weeds from the uses of crops, making harvest and at other occasions. Here, one could realize that songs cannot be a music. Therefore music is in all times student with songs, folk life is always found with singing and dancing at different agricultural activities, different festivals social gatherings and they were become bed-rock for the development of music which is new seen in multifactor from in our modern days. Hence it is said music is the soul of mankind and modern science has already proved that with music, one could be cured even immedicable disease. In consultation the whole universe has its own perfect system with only music in it.

The changes and development in the field of music were much found in our country than in the others. In the ancient India, the Vedas and the mythological scriptures functioned as the powerful means of spreading music. The unique songs of The Ramayana, The Mahabharata and The Bhagvanta were all sung while playing with the Indian Stringed instrument named Tamboori or Veena. There were many such examples MaharsheeValmiki sang with his pupils Lava-Kush in the court of ShriRamchandra. Even the LankadeeshRavan, who was believed to be great musician and scholar was said to have sung the Samveda and they were all remained as significant medium for the development and media of the music. Our rulers kings and emperors were all music lovers and their palaces were prominent medium of music and its spread. For instance the Moghal Emperor, Badashaha had invited and patromised the most scholarly musicians from Persia, Afganistan, Turki, Arebia and other countries to his palace and were all supported to organize meaningful concerts during different festivals and celebrations and they were only means for speeding music.

During ancient and the middle age, prostitution was given political, religious and social approval. The centers of prostitution were not just meant for lusty persons to quench their sexual hunger but also arranged there dancing and singing in effective concerts. Thus the houses of prostitutes and the places of temples were the centers and medium of spreading music and this couldn't be denied.

In the modern period, we have much invention due to scientific revolution like printing press, radio, tape-recorder, T. V. and Mobiles. Internet with printing press, newspapers were brought out rapidly in huge quantity. The newspapers published criticism and reviews of music and concerts like other topics lie religious thoughts and literary views Times of India and the Marathi, Hindi, newspapers gave prominent place for music and concerts.

The first established Radio center Mumbai (Akashwani) in the country gave equal priority to music in their different programed. Today's in the modern days. Mobile, what's app, Facebook and YouTube were playing much vital role than television as a medium of music and it's relating matters. Many have found other own exclusive groups only to listen music in what's app (Internet online music)

The proverb Ravindranath Tagore underlines the fact that even children, animals and serpents would tempt for music. Man being the crown of the creation, obtain music through the possible means and spreads the

same. Music is ocean in this ocean, Indian music is a sea. I had tried to understand just a drop of it. Here I have presented a part of an atom, with available time. With this I conclude my views.

## सबाल्ट इतिहास लेखनात प्रसार माध्यमाची भूमिका

डॉ. आम्रपाली दादाराव मोढे

द्वारा— हेमंत बनसोड,

२८, मेघदुत कॉलनी, अमर कॉलनी जवळ, बायपास रोड, अमरावती.

## प्रस्तावना

“समाजातील वंचीत समूहाचा किंवा गटांचा इतिहास अभ्यासणाऱ्या नव्या इतिहासप्रवाहाचे सबाल्टन असे नामकरण केले गेले आहे.”

सबाल्टन ह्या संज्ञेने प्रसिध्दीस आलेला इतिहासलेखन प्रवाह भारतात विसाव्या शतकाच्या अखेरच्या २० वर्षांत प्रचलित झाला. परंपरागत इतिहास लेखनाला छेद देऊन नवी आव्हाने उभे करून इतिहास लेखनासाठी नवी क्षीतीजे खुली केल्या गेली. सबाल्टन या शब्दाचा अर्थ शब्दकोषात निम्न दर्जाचे लोक असा दिला आहे. म्हणजेच समाजामध्ये खालच्या दर्जाच्या लोकांचा इतिहास होय. त्यालाच आपण सर्वसामान्याचा इतिहास म्हणू शकतो. थोरा मोठ्यांचा इतिहास ही मानसीकता बदलण्याकरीता आणि भारतीय इतिहासातील अनेक दुर्लक्षित पैलुंविषयी जागरूकता निर्माण करण्याचे श्रेय सबाल्टन या इतिहासलेखन पध्दतीला देण्यात येते. तर भारतीय इतिहासलेखनाच्या क्षेत्रातील सबाल्टन लेखनप्रवाहाचे प्रणेते म्हणून रणजीत गुहा यांचे नाव प्रसिध्द आहे. ही मुळ संकल्पना अन्तोनियो ग्रामची आहे जो त्याचा प्रसिध्द झालेला 'हेजिमीतीचा' सिध्दांताच्या संकल्पनेचे विवेचन करतात 'सबाल्टन' ही संज्ञा वापरतो.

इतिहासलेखनाची स्वतःची अशी भूमिका आहे ती म्हणजे सर्वसामान्याचा इतिहास निःपक्षपातीपणे हाताळण्याचा प्रयत्न पुर्णपणे करणे व जनमाध्यमामार्फत जनमानसापर्यंत पोहचविणे.

## उद्दिष्टे

- १) सबाल्टन या इतिहासलेखन पध्दतीचे अध्ययन करणे.
- २) भारतीय वंचीत, शोषित, दुर्लक्षित समाजाचे अध्ययन करणे
- ३) इतिहासलेखनामध्ये प्रसार माध्यमांचा भूमिकेचे अध्ययन करणे
- ४) प्रसारमाध्यमांच्या सकारात्मक व नकारात्मक बाजूचे अध्ययन करणे.
- ५) प्राचीन काळापासुन तर आधुनिक काळापर्यंत बदलेल्या प्रसारमाध्यमांच्या स्वरूपाचे अध्ययन करणे.

## गृहीतके

- १) सबाल्टन या इतिहास लेखनामुळे वंचीत, शोषित समाजाचा इतिहास प्रथमता लिखित स्वरूपात मांडला गेला.
- २) प्रसार माध्यमांद्वारे लोक जागृती झाली.
- ३) सबाल्टन इतिहासलेखनाच्या अध्ययनामुळे माणसात विवेकी, सम्यक दृष्टी प्राप्त झाली.
- ४) लोकांमध्ये समतेची, बंधुत्वाची, ऐकतेची जाणीव निर्माण झाली.

## आशय

अन्तोनियो ग्रामची यांनी 'हेजिमीनी' या सिध्दांताचा आशय असा की प्रत्येक युगात सत्ताधिश अंकीत वर्गावर आपले वर्चस्व कायम ठेवण्यासाठी दोन मार्गांचा अवलंब करतात. पहिला मार्ग दमनाचा दुसरा मार्ग संमतीचा किंवा अंकीताचा असतो. दमन मार्गांनी कायदा, दंडयंत्रणा, पोलीस यंत्रणा इत्यादींवर वर्चस्व स्थापीत केले जाते. तर अंकीताच्या बौध्दीक, मानसीक व सांस्कृतीक जाणिवाना सोयीस्कर पणे प्रभावीत केले जाते. यातील दमन मार्गांचा अवलंब केल्यास सत्ता फार काळ टिकत नाही याचे उदाहरण दयायचे झाल्यास भारतावरील मुघल सत्तेची राजवटीच्या दमण शासन पध्दतीमुळे शिवाजी महाराजांनी अन्यायाचा प्रतिकार करून स्वराज्याची स्थापना केली तसेच दुसरे उदाहरण दयायचे झाल्यास ब्रिटिशांची राजवट जी त्यांच्या "फोडा आणि राज्य करा" या नीतीमुळे १५० वर्षांत गुंडाळून गेली म्हणजे दमण मार्गाने सत्ता फार काळ टिकत नाही. हे स्पष्ट तर दुसरीकडे अंकीत मार्गांचा अवलंब केल्यास शासक वर्ग आपल्या हितसंबंधांना पोषक ठरतील असे विचार, श्रध्दा मुल्ये, प्रस्तुत करून अंतर्बाह्य परीवर्तन घडवून आणतो यातुन नवी संस्कृती निर्माण करून ती इतकी खोलकर रूजविली जाते की समाजाला ती मुल्ये चिरंतन वैश्वीक मुल्ये आहेत असे वाटू लागतात. या वर्गाला बौध्दीक व सांस्कृतीक प्रभाव प्रस्तापित करण्याचे कार्य शासक वर्ग समाजातील काही विचारवंतांना हाताशी धरून करून घेतो. त्यांच्या मार्फत शिक्षण, धर्म, साहित्य, सामाजीक संस्था यांच्या माध्यमातून शासकांना हितकारक असणारी मुल्ये रूजविली जातात. आपल्या देशामध्ये सुध्दा सदाचारी जीवन जगण्यापेक्षा रूंदी परंपरावर भर आहे. म्हणजेच संस्कृतीचा एक पगडा दिसून येतो. मुलीचे लग्न करण्यासाठी आई-वडीलांना लाखो रूपये हुंडा देऊन त्यात लग्न ही मोठया थाटामाटात करावे लागते. ते पण पुरोहिताच्या हातांनीच. महात्मा ज्योतीबा फुले यांनी मात्र याला विरोध केला. पण आजही आपणास परिस्थिती जसे चे तसे दिसून येते कारण एखाद्या प्रसार माध्यमाद्वारे एका बाजूला चित्रपटामध्ये महात्मा फुले डॉ. बाबासाहेब आंबेडकर यांच्या कार्याचा आढावा दाखवला जाईल तर दुसरीकडे मनोरंजन म्हणून नट नटीचे मोठया थाटामाटात भट भटजीच्या हातांनी लग्न दाखवतील ही सध्या स्थिती आहे.

याचा परिणाम म्हणून भारतीय समाज व्यवस्थेमध्ये आपणास जात-पात धर्म, पंथ, भेद, आजही आढळून येऊन जातीधर्मानुसार सांस्कृतीक भेद ही दिसून येतात. प्राचीन काळामध्ये मातृपुजीत असणारा समाज आज पितृसत्ताक पध्दतीला नमन करतांना दिसतो. याचे कारण काय? तर कालांतराने धर्म निर्माण झाले धर्माचा प्रसार प्रचार सुरू झाला. वाङ्मयीन साहित्याची निर्माती होऊन वेद, उपनिषेद, पुराणे, स्मृती, काव्य निर्माण झाले या माध्यमाद्वारे सर्वसामान्य लोकांपर्यंत चालीरीतीची, रूढी परंपरोची, सांस्कृतीची बिजे रोवली गेली, त्यातुनच समाजाचा विचारप्रवाह बदलला तसेच स्वरूप ही बदलले यातुनच आश्रमव्यवस्था, १६ संस्काराची निर्मिती झाली. वैदीक काळामध्ये चातुर्वर्ण्य व्यवस्था उदयास आली जी केवळ कर्मावर आधारित होती ती नंतर उत्तर वैदीक काळामध्ये जन्मावर आधारित झाली. 'वेद' हा धर्मग्रंथ मानल्या गेला.

पठण वाचणाचा अधिकार मर्यादित करून सर्वसामान्य लोकांवर अन्याय, अत्याचार होऊ लागले. मनुस्मृतीमध्ये तर स्त्रिया पुरुषाचा दोष मानल्या गेला.

पिता रक्षिति क्रौमारे, भूर्ता रक्षिति यौवने॥  
रक्षिति स्थाविरे पुत्रः न स्त्री स्वातंत्र्य मर्हति॥

अशा प्रकारे स्त्रियांच्या स्वातंत्र्यावर गदा ठेवण्यात आली होती व तीची स्थिती शुद्रासारखीच झाली. या अन्यायाला वाचा फोडण्यासाठी अनेक संत महंते होऊन गेले. त्यामध्ये संत तुकाराम महाराज, संत कबीर, संत एकनाथ, संत ज्ञानेश्वर, संत नामदेव, गाडगेमहाराज या सर्वांनी आपल्या किरतन, भजन, अभंगानुन लोकजागृती घडवली. या जनमाध्यमातून त्यांनी होणाऱ्या अन्यायाची जाणीव करून दिली. अभंग, किरतन, भजनाद्वारे समाजांभीकतेवर टिकासत्र सोडण्यात आले. त्याकाळातमध्ये हे प्राथमिक स्वरूपाचे प्रसार माध्यमे होती कालांतराने या सोशन मीडियाचे स्थान वृत्तपत्र, ग्रंथ, रेडियो टेलीव्हिजन, इंटरनेट, वॉटसअप, टिवटर, इस्टाग्राम, फेसबुक या माध्यमांनी घेतली. आज याद्वारे संपुर्ण जगभरातल्या महत्वाची माहिती घडामोडी हे सगळे अगदी कमी वेळात जास्तीतजास्त लोकांपर्यंत पोहोचविले जाते याचा गैर वापरही होतांना दिसून येतो. जनमाध्यमाद्वारे महामानवाच्या फोटोचे विडंबन करून लोकांच्या भावना दुखवून जातीय दंगलीसाठी खतपाणी घातले जाते.

माध्यमे म्हणजे तिसरा डोळा ज्यातून विश्लेषण करून समाजापुढे मांडावे लागते. पण जर तो डोळा झाकून टाकला तर तो एकाक्ष म्हटला जातो. जनमाध्यमाचा समाजातील जनतेशी व्यवहार हा प्रत्यक्षपणे होतो. निर्भड व निर्मळ असणारा व्यक्ती प्रसार माध्यमाद्वारे आपले मत योग्य प्रकारे मांडू शकतो पण या प्रसारमाध्यमांचा वापर कसा करतो. यावरच त्याचा उपयोग ठरतो ते एक शस्त्र आहे. आणि ते कसं वापरल जाव यावरच त्याची उपयुक्तता किंवा घातकता ठरते. काही इतिहासकारांनी शिवाजी महाराजांचे गुरू रामदास स्वामी आहे असे लिखून केले. तर यावर अनेकांनी आक्षेप घेतला कारण शिवाजी महाराजांचा इतिहासाचा अभ्यास केल्यास शिवाजी महाराज आपल्या आईवडीलांनाच गुरू मानायचे असे संशोधनात स्पष्ट झाले आहे. एकंदरीत लेखनाद्वारे लोकांपर्यंत चुकीचे बाब सुध्दा रूढवली जाते असे दिसून येते. महाराष्ट्र शासनाने 'महाराष्ट्र भुषण' हा पुरस्कार दिलेले बळवंत पुरंदरे यांनी दादोजी कोंडदेव हे शिवाजी महाराजांचे गुरू होते हा असत्य इतिहास मांडला. इतिहास लेखन करतांना त्यात सत्यता ही तितकीच महत्वाची असावी लागते कारण ते लेखन जनसामान्यांपर्यंत माध्यमाद्वारे पोहोचविल्या जाते. बळवंत पुरंदरे यांच्या या चुकीमुळे त्यांना जाहीर झालेला 'महाराष्ट्र भुषण' हा पुरस्कार मिळू नये अशी मागणी देखील काही संघटनांनी केली होती. प्रसार माध्यमाद्वारे अनेक गालबोट सुध्दा लावण्यात आले होते. पण प्रसार माध्यमांची भूमिका ही निडरतेची असावी जे खरे आहे ते मांडण्याची हिंमत असावी पण खरं तर आज ही हिंमत जिवाशी भोवल्या जाते. सत्तेची गळचेपी झालेली दिसून येते. ५ सप्टेंबर २०१७ साली भारतीय क्रांतीकारी पत्रकार म्हणून ओळखली जाणारी गौरी शंकर या पत्रकारिकेची हत्या करण्यात आली त्या बंगळूरची एक भारतीय पत्रकार व कार्यकर्त्या होत्या. त्यांच्या मृत्युचे कारण लक्षात घेता त्यांचे क्रांतीकारी लिखन होते. कारण गौरी लंकेश यांनी हिंदुत्ववादी आणि जातीयवादी विचारांच्या संघटनांच्या विरुद्ध अनेक प्रकारे लिखन करून आवाज उठविला होता. त्यांच्या हत्येमुळे भारतीय पत्रकार आणि बुद्धीजीवी वर्गामध्ये व्यापक प्रतिक्रिया झाल्या पण अद्यापही त्यांच्या मारेकरांना शिक्षा झालेली दिसून येते नाही. याचाच अर्थ असा होतो की कुठल्याही कार्यकर्त्यांनी, लेखकांनी शोषितांची, वंचितांची स्थिती शोषकांच्या दालनेबाहेर मांडू नये असे स्पष्ट होते. सबाल्टन या इतिहास लेखनाचा उद्देश येथे पुर्ण होत नाही.

### इतिहास लेखनामध्ये माध्यमांच्या भूमिकेचे महत्व

- इतिहासकार आपल्या लेखनातून समकालीन सामाजिक रूची तथा आवश्यकतेनुसार ऐतिहासिक घटनांची मांडणी करतो याचा एकच उद्देश असतो तो म्हणजे भुतकाळ व वर्तमान काळामध्ये असा सेतु निर्माण करायचा जो भुतकाळातील घडणांद्वारे वर्तमानाला प्रशिक्षित करून भविष्याला मार्गदर्शन करेल आणि इतिहासकारांची लिखित साधने ही माध्यमांचे स्वरूप धारण करेल.
- माध्यमांची भूमिका इतिहासलेखनात अतिशय महत्वाची आहे. माध्यमाद्वारे समाजाची क्रियाशिलता आजही बघायला मिळते.
- सल्वार्टन या इतिहासलेखन पध्दतीमध्ये चळवळी व उठाव खरे कर्ते असून त्यांचाही इतिहास लोकांपर्यंत पोहोचविला जातो.
- वंचीत, शोषित, गटांचा इतिहास म्हणजे केवळ त्यांच्या कार्याचा किंवा कृतीचा इतिहास नसून तर त्या कृतीमागील अंतःप्रेरणा, जीवनपध्दती मुल्ये तसेच त्यांचे शोषणाची जाणीव हे असते व त्यांना जाणीव करून देण्याचे कार्य विविध प्रसार माध्यमाद्वारे होतांना दिसून येते.
- प्रसार माध्यमाद्वारे जनमानस अन्यायाच्या जाणीवेतून संघटीत होतात व त्यातूनच त्यांच्या चळवळीला उध्दान येतो.
- अनुभव जन्य शहाणपण शिकवण्याचे कार्य या इतिहासलेखनात होऊन प्रसार माध्यमाद्वारे त्या इतिहासाची उजळणी दिली जाते. यातूनच वंचीत, शोषित, दुर्लक्षित समाजाला प्रेरित केल्या जाते.

### स्त्रीविषयक दृष्टिकोन

मानवाच्या मनावर अनेक गोष्टींचा, विचारांचा तत्वज्ञानाचा प्रत्यक्ष व अप्रत्यक्ष परिणाम होत असतो. स्त्रिया ही भारतीय विचारधारा नसून ती पाश्चात्य आहे. १७८९ मधील फ्रेंच राज्यक्रांतीतून स्त्रीमुक्ती विचारांना निश्चित दिशा मिळाली स्वातंत्र्य, समता, बंधुता या क्रांतीने जगाला दिली. सामाजिक, राजकीय व सांस्कृतिक संरचनांना आव्हान दिली. स्त्री पुरुषांमधील लिंगाधिष्ठित साचेबंदपणा, पुरुषांच्या मनात स्त्रीविषयक प्रतिमा, स्त्रियांना समाजात मिळणारे स्थान व भूमिका, पुरुषसत्ताक कुटुंब व्यवस्था इ. प्रश्नांची चर्चा माध्यमाद्वारे होतांना दिसून येते. ईश्वरचंद्र विद्यासागर, राजाराममोहन रॉय, महात्मा फुले या सुधारकांनी स्त्रियांच्या प्रश्नाला न्याय देऊन त्यांची व्यथा आपल्या लिखनातून मांडली आहे. इ. स. १७९२ मध्ये इंग्लंडमध्ये मेरी वॉल्टन क्रॉफ्ट या झुंजार महिलेने आपल्या पुरस्कारातून 'नरनारी' समानतेचा पुरस्कार केला. स्त्री मुक्तीचा लढा ही चालू झालेली चळवळ आहे आणि आजही चालू आहे. अनेक स्त्रीया हुंडाबळी, स्त्रीभुण हत्या स्त्रीचे समाजातील दुय्यम स्थान,

लैंगिक छळ अश्या अनेक घटना रोज घडताना दिसून येते याला जबाबदार कोण आपण की शासन? यावर विचार करण्यासारखे आहे. आपण आपली जबाबदारी ओळखायला हवी स्त्रिविषयक चळवळी केवळ उभारून चालणार नाही तर ती चळवळ यशस्वीपणे पार पाडता आली पाहिजे. सीतेचे हरण करणारा दहा तोंडी रावणाने सीता बंदिस्त असतांही सितेला स्पर्शही केला नाही. मात्र आज एक तोंडी पुरुष वासने पोटी बलात्कारासारखी हिनता करतांना दिसतो. मग याला जबाबदार आपले अपुरे संस्कार मानावे का? आज प्रसार माध्यमावर नको त्या गोष्टीचा बाजार मांडला आहे. आजच्या जाहिराती तसेच नाचगणे यामध्ये कुठल्याही प्रकारची मर्यादा न पाळता प्रसारीत केल्या जाते. यामुळे नको त्या वयात नको त्या गोष्टीचे ज्ञान मुलांना होतांना दिसून येते. यातूनच जिज्ञासा जागृत होते, अश्लील विडीयोद्वारे लैंगिक वासनेला प्रेरित केल्या जाते. त्यामुळे नको त्या घटना समाजामध्ये घडल्या जातात. आजच्या इतिहासलेखनात स्त्रीच्या स्थितीला जबाबदार घटकांवर लिखान होऊन त्यावर उपाययोजना सुचवायला हव्यात. या संपुर्ण बार्बीवरून स्त्री आजही शोषित घटकांमध्ये मोंडतांना दिसते.

### वंचित घटक म्हणून शेतकरी दृष्टीकोन

१७ एप्रिल १९१७ ला महात्मा गांधींनी बिहारसारख्या मागास प्रांतात चंपारण्यासारख्या मेळेव्याल्यांच्या शोषणाने त्रस्त झालेल्या भागात आणि मुख्यत्व शेतकऱ्यांच्या प्रश्नाला समोर ठेवून नव्या प्रकारच्या आंदोलनाची सुरुवात केली. या घटनेवर डी. जी. तेंडुलकर चंपारणच्या लढयाचे महत्व विशद करणारे पुस्तक लिहिले तसेच जयंत दिवाणी यांनी केलेले इतिहासलेखन म्हणजे 'कहाणी चंपारण सत्याग्रहाची' पुस्तक प्रकाशित आहे. या माध्यमाद्वारे आपणांस हा लढा अनुभवता येतो.

महात्मा फुले यांनी 'सत्याशोधक' समाजाची स्थापना करून शेतकरी व बहुजन समाजाच्या समस्यांना केंद्रस्थानी ठेवून पुरोगामी विचारांची मांडणी केली शेतकऱ्यांवर होणारा अन्याय त्यांनी 'शेतकऱ्यांचे आसुड' या आपल्या ग्रंथातून मांडला शेतकऱ्यांची आत्महत्या हा सध्या एक चिंतेचा विषय झाला आहे आणि ते थांबवण्यासाठी अनेक संघटना कार्यरत आहे. शेतकरी आत्महत्येवर काय उपाय योजना करू शकतो शेतकऱ्यांमधील उदासीनता काढून उत्साह पेरण्यासाठी प्रसार माध्यमांची भूमिका ही महत्वाची आहे. योग्य व अयोग्य कुठले बियाने, खते आहेत याची पडताळणी करून जाहिरात करावी तसेच आपल्या बळीराजाला बळ देणारी जाहिरात, गॉट फिल्म ची निर्मिती करावी याद्वारे शेतीविषयी असलेली उदासीनता दुर करता येईल.

### वंशश्रेष्ठत्वाचा दृष्टीकोन

वंशश्रेष्ठत्वाची किड केवळ भरतालाच नव्हे तर संपुर्ण जगाला लागली होती जगामध्ये उच्च निच्य भेदभाव करून दिनदलीत वर्गाची पिळवणूक होत होती त्यामुळे या वर्गांनी दिलेला लढा उल्लेखनीय आहे. डॉ. बाबासाहेब आंबेडकरांनी मानव मुक्तीचा लढा उभारून यातून स्पृश्य-अस्पृश्य भावना नष्ट करून राज्यघटनेद्वारे त्याची पुर्ती सुध्दा केली. मुकनायक, बहिष्कृत भारत, जनता, समता, प्रबुध्द भारत या वृत्तपत्राद्वारे लोकांना त्यांच्या गुलामगिरीची जाणीव करून दिली एवढेच नव्हे तर जगाचा विचार करता अमेरीका हे एक प्रगत राष्ट्र असून तेथे काळा-गोरा या भेदभावाची मुळे पसरल्या गेली. श्वेतवर्णीयांच्या बरोबरीने नागरी हक्क मिळण्यासाठी शेकडो वर्षे कृष्णवर्णीय समाजाला लढा द्यावा लागला या इतिहासाचा उल्लेख करावा लागतो यावर प्रसिध्द गायक मायकल जॅक्सन यांचे ठसंबा 'दक' पंजम हे गाणे प्रसिध्द आहे. सबाल्टन इतिहासलेखन स्वरूप प्रसार माध्यमाद्वारे प्रसारीत करू शकतो कारण 'सबाल्टन' या सजेचा वापर वंचीत समुह किंवा गटांचा इतिहास अभ्यासणारा म्हणून केले गेले आहे. प्रसारमाध्यमाद्वारे अन्याय करणाऱ्या घटकांवर हल्लाबोल करून मानवाची लढाईला जागतीक स्वरूप देऊन त्याला चळवळीचे स्वरूप प्राप्त होऊन ते व्यापक व प्रभावी होतांना दिसून येते.

### निष्कर्ष

इतिहास हा राज्यशासन व महानव्यक्ती यावर केंद्रीत झाला परंपरागत इतिहासलेखनाची चौकट मोडून इतिहासकारांनी नव्या दिशेने इतिहासलेखन करण्याची गरज प्रतिपादीत केली आहे. कुठल्याही व्यापक चळवळीत जनसमुहांचा, गटांचा सहभाग महत्वाचा असतो. त्याशिवाय चळवळ व्यापक व प्रभावी होत नाही हे तितकेच खरे या आधारावर केलेले इतिहासलेखन व जनसामान्यापर्यंत प्रसार माध्यमाद्वारे केलेला प्रसार महत्वाचा ठरतो. लोकांमध्ये जागृती घडवण्याचे काम माध्यमे ही अधिक चांगल्या प्रकारे करू शकतात सबाल्टन यांची इतिहासलेखन शैलीचा प्रसारमाध्यमाद्वारे केलेला प्रसार यातून आपणांस विषयाला न्याय देता येतो. इतिहासलेखकाची भूमिका व प्रसार माध्यमाची त्याला जोड या दोन्ही गोष्टी चोखपणे झाल्यास उद्देश साध्य करता येतो.

## Exploitation Of Women In Media

Asst. Prof. G. R. Khanderao

Head, Dept. of English, Amolakchand Mahavidyalaya, Yavatmal

The exploitation of women in mass media is the use or portrayal of women in mass media (such as television, film and advertising) to increase the appeal of media or a product to the detriment of, or without regard to, the interests of the women portrayed, or women in general. This process includes the presentation of women as sexual objects and the setting of standards of beauty that women are expected to reflect. Feminists and other advocates of women's rights have criticized such exploitation. The most often criticized aspect of the use of women in mass media is sexual objectification, but dismemberment can be a part of the objectification as well.

### Advertising

Robert Jensen, SutJhally and other cultural critics accuse mass media of using sex in advertising that promotes the objectification of women to help sell their goods and services. In *Gender Advertisements*, Erving Goffman sought to uncover the covert ways that popular media constructs masculinity and femininity in a detailed analysis of more than 500 advertisements. The relationship between men and women, Goffman argued, was portrayed as a parent-child relationship, one characterized by male power and female subordination. Many contemporary studies of gender and sexualization in popular culture take as their starting point Goffman's analysis in *Gender Advertisements*. Among them, later research which expanded empirical framework by analysing the aspects of women's sexualization and objectification in advertisements, M.-E Kang examined the advertisements in women's magazines between 1979 and 1991 and found out there are still showing the same stereotyped images of women: Nude or partially nude images of women increased nearly 30% from 1979 to 1991. Lindner further developed Kang's analytical framework in a study of women in advertisements and found out magazines rely on gender stereotypes, but in different ways, particularly in terms of sexualization. For example, in *Vogue*, sexualized images of women are the primary way of portraying women in positions of inferiority and low social power.

Research conducted by Eric Hatton and Mary Nell Trautner included a longitudinal content analysis of images of women and men on more than four decades of *Rolling Stone* magazine covers (1967–2009). It found that the frequency of sexualized images of men and women has increased, though the intensity of sexualization between men and women is different in that women are increasingly likely to be hypersexualized, but men are not. Researchers argue that the simple presence of images of sexualized men does not signal equality in media representations of women and men. Sexualized images may legitimize or exacerbate violence against women and girls, sexual harassment, and anti-women attitudes among men. They concluded that similarly sexualized images can suggest victimization for women but confidence for men, consider the implications when women are sexualized at the same rate as men are not sexualized, as they were on the covers of *Rolling Stone* in the 2000s. Clothing designer Calvin Klein was criticized for using images of young, sexualized girls and women in his advertisements, having said: "Jeans are about sex. The abundance of bare flesh is the last gasp of advertisers trying to give redundant products a new identity."

Calvin Klein has also received media attention for its controversial advertisements in the mid-1990s. Several of Calvin Klein's advertisements featured images of teenage models, some "who were reportedly as young as 15" in overly sexual and provocative poses. In a recent analysis, it was found that almost 30% of the clothing items available for pre-teen girls on the websites of 15 national stores had sexualizing characteristics. The clothing emphasized or revealed a sexualized body part (e.g., bikinis and push-up bras), or had characteristics associated with sexiness (e.g., red satin lingerie-like dresses). This exploitation of women is being seen in younger girls. The overt use of sexuality to promote breast cancer awareness, through fundraising campaigns like "I Love Boobies" and "Save the Ta-tas", angers and offends breast cancer survivors and older women, who are at higher risk of developing breast cancer. Women who have breast cancer say that these advertising campaigns suggest that having sexy breasts is more important than saving their lives, which devalues them as human beings. Another trend that has been studied in advertising is the victimization of women. A study conducted in 2008 found that women were represented as victims in 9.51% of the advertisements they were present in. Separate examination by subcategory found that the highest frequency of this is in women's fashion magazines where 16.57% of the ads featuring women present them as victims.

## Film

In considering the way that films are put together, many feminist film critics [weasel words] have pointed to the "male gaze" that predominates in classical Hollywood film-making. Budd Boettichersummarises the view thus: "What counts is what the heroine provokes, or rather what she represents. She is the one, or rather the love or fear she inspires in the hero, or else the concern he feels for her, who makes him act the way he does. In herself the woman has not the slightest importance." Laura Mulvey's germinal essay "Visual Pleasure and Narrative Cinema" (written in 1973 and published in 1975) expands on this conception of the passive role of women in cinema to argue that film provides visual pleasure through scopophilia and identification with the on-screen male actor. She states: "In their traditional exhibitionist role women are simultaneously looked at and displayed, with their appearance coded for strong visual and erotic impact so that they can be said to connote to-be-looked-at-ness," and as a result contends that in film a woman is the "bearer of meaning, not maker of meaning". Mulvey suggests that Lacan's psychoanalytic theory is the key to understanding how film creates such a space for female sexual objectification and exploitation through the combination of the patriarchal order of society, and 'looking' in itself as a pleasurable act of voyeurism, as "the cinema satisfies a primordial wish for pleasurable looking". Researchers have determined how sexual objectification of women in film negatively impacts the mindset of girls and young women. Research has discovered that when girls have had an extended exposure to films in which female super heroes were dressed in over-sexualized costumes, they became more aware of their own body competence. This type of exposure can cause a detrimental view of female roles in the film industry. The over-sexualization of female roles in popular Hollywood films has been found to have a negative effect on girl's self-esteem and can cause them to want to alter their bodies to look more like the actresses in films and movies. The Geena Davis Institute on Gender in Media an organization that has been pushing the industry for years to expand the roles of women in film.

Research into the social implications of the presentation of women in film and its effect on the African-American community indicates that young black girls are exposed to a stereotyped portrayal of black females which goes beyond sexual objectification. Young black girls are presented with only one type of depiction: an angry black woman who is obnoxious, ignorant, confrontational and loud. Not only do they struggle with internalizing these fixed notions of who they are, they are also faced with definitions of beauty for African American girls that are measured against white standards of what beauty should be. Film and social media reflect an idea of female beauty based on features closely resembling those of women of European origin, which is nearly impossible for a black girl to attain, or indeed any young girl. At the same time black characters are typically depicted in films in occupational roles such as athletes, servants, musicians and criminals, roles which hold a lower status than the roles of white characters.

## Music

A survey conducted as a part of the Human Use of Music Information Retrieval Systems (HUMIRS) project found that 73.1% of respondents identified themselves as being "avid listeners" of music. Popular music often contains messages about women that involve misogyny, sexual violence and abuse. [citation needed] Listeners are often absorbing messages exploiting women without it being obvious. There are multiple online articles that seek to identify songs that have misogynistic undertones woven throughout them. For example, an article in the online US women's magazine Bustle provided a clip of lyrics from the song "Fine China" by Chris Brown. He sings "It's alright, I'm not dangerous / When you're mine, I'll be generous / You're irreplaceable; Collectible / Just like fine China." The article went on to conclude that the song was demeaning to women by referring to them as objects or possessions. Music is a key factor in the socialization of children. Children and adolescents often turn to music lyrics as an outlet away from loneliness or as a source of advice and information. The results of a study through A Kaiser Family Foundation Study in 2005 showed that 85% of youth ages 8–18 listen to music each day. While music is commonly thought of as only a means of entertainment, studies have found that music is often chosen by youth because it mirrors their own feelings and the content of the lyrics is important to them. Numerous studies have been conducted to research how music influences listener's behaviours and beliefs. For example, a study featured in the Journal of Youth and Adolescence found that when compared to adolescent males who did not like heavy metal music, those who liked heavy metal had a higher occurrence of deviant behaviours. These behaviours included sexual misconduct, substance abuse and family issues.

## Music videos

Gan, Zillmann and Mitrook found that exposure to sexually explicit rap promotesunfavourable evaluations of black women. Following exposure to sexual rap, as compared with exposure to romantic music or to no music, the assessment of the female performers' personality resulted in a general downgrading of

positive traits and a general upgrading of negative ones. A 2008 study by Zhang et al. showed that exposure to sexually explicit music videos was associated with stronger endorsement of sexual double standards (e.g., belief that it is less acceptable for women to be sexually experienced than for men). Exposure to sexual content was also associated with more permissive attitudes toward premarital sex, regardless of gender, overall television viewing, and previous sexual experience. However, Gad Saad argues that the premise that music videos yield harmful effects and that the harm would be sex-specific (e.g., women's self-concepts will be negatively affected) has not been supported by research. A survey found that 72.2% of black, 68.0% of white, and 69.2% of Hispanic youths agree with the suggestion that rap music videos contain "too many" references to sex. Despite the lack of adequate research linking music videos to negative self-perception by young girls, research has shown adolescents have a higher susceptibility rate than other age brackets. More importantly, music videos are one of the many significant mediums that perpetuate sexual objectification of females, implicitly creating fixed gender norms. The perpetuation of females being nothing more than seductive "creatures" to men can presumably lead to young girls internalizing their self-worth as nothing more than mere objects.

### Modelling

In her article, "Negative effect of media on girls," Monique Smith discusses the evolution of acceptable female figures throughout time. The transition between sexy meanings curvaceous to sexy meaning thin made it difficult for women to keep up with the ideal feminine figure. Striving for the virtually unattainable perfect body, women were viewed as a new way to make money. [Self-published source] The use of size 0 in advertisements and products of the clothing industry has been met with criticism. For example, Dawn Porter, a reporter from the UK who had been challenged to go on an extreme celebrity 'size zero' diet for a new BBC programme, Super Slim Me, logged her experiences about her journey to a size zero. A study conducted in the UK found evidence that anorexia nervosa is a socially transmitted disease and exposure to skinny models may be a contributing factor in the cause of anorexia nervosa. According to model, Sarah Ziff, stories are told in the industry about models being sexually assaulted. Fernanda Ly, a pink-haired model who has worked for designers such as Louis Vuitton and Christian Dior, says that she was groped at a young age by a stylist while shooting a lookbook, and the memory still haunts her. In 2007 Anand Jon Alexander, a successful designer who appeared on America's Next Top Model, was arrested on charges of rape, sexual battery and performing lewd acts on a child, charges which in many cases concerned models who aspired to work for him. He was sentenced to 59 years in prison.

Models have been denied food on shoots as they are expected to be thin, according to model Vanessa Perron. Due to the low level of regulation in the industry, modelling agencies often view their models as independent contractors rather than employees and attempts to unionize the industry have been largely unsuccessful. There are allegations that a fraudulent modelling agency in Florida drugged aspirant models and used them to create pornographic films. According to former agency executive Carolyn Kramer: "When you're a supermodel like Giselle or Christy Turlington you're treated like royalty, but 99% of models are treated like garbage". The low level of regulation makes it easy for bad agencies to thrive and treat workers as nothing more than a source for profit. In their defence, modelling agencies have said that models work at odd hours for different clients, which means they cannot be considered employees. Legally speaking, models sign on to management companies and not the other way around. The Model Alliance, created by the model Sara Ziff, provides its members with protection, advice and support. It is guided by a partnership between the American Guild of Musical Artists and the Actors' Equity Association.

### Social media

Social media has a prominent effect on people's lives, especially those who use social media platforms more frequently than others. A study conducted in 2006 found inverse relationships between the frequency of social media usage and the relationships adolescents formed with the impact it had on their sense of self. When social media usage increased, adolescents began to form stronger relationships online while their sense of self was impacted negatively. According to a study conducted by Xinyan Zhao, Mengqi Zhan, and Brooke F. Liu, social media content that weaves emotional components in a positive manner appears to have the benefit of also increasing one's online influence. Positive social media content results in increased presence on networking sites among adolescent users. Digital social media platforms such as Twitter, Instagram, and Snapchat allow individuals to establish their influence through sharing opinions, insights, experiences and perspectives with others. In the 2000s, these platforms have emerged as integral communities for publics to voice their opinions, resulting in a changed online behaviour associated largely with misinformation.[51] One example of these behaviours is displayed in a 2017 Dutch study conducted by Johanna M. F. van Oosten. This study found that adolescents play out stereotypical gender roles in their self-presentations in social media. Results of this study

show that it is predominantly women that feel pressured to conform to hyper femininity and stereotypical gender roles online, including personality traits, domestic behaviours, occupations, and physical appearances.

The prevalence of social media and its influence on self-perception among adolescents, especially young girls, is undeniable. Research has shown a significant scientific link between social media and depression among young girls. In addition, this link between depression and social media perceptions has been connected to obesity among young girls. The negative implications social media poses on women associated with their appearance or how they carry themselves reveals a chain reaction; the depression related to negative social media experiences can manifest itself in the form of poor academic performance and further mental and physical health issues. Such evidence of substantial mental and physical harm suggests that the root of the problem can be found not only within social media advertising and usage, but in the way young girls are taught to internalized responses on various social media platforms.

### Television

Television is often subject to criticism for the sexual exploitation of women on screen, particularly when teenagers are involved. In 2013, the Parents Television Council released a report that found that it was increasingly more likely for a scene to be exploitative when a teenage girl was involved. The report also found that 43 percent of teen girls on television are the targets of sexually exploitative jokes compared to 33 percent of adult women. Rev. Delman Coates, a PTC board member said, "young people are having difficulty managing the distinction between appropriate and inappropriate sexual conduct". This report is of a series that's about media sexualization of young girls. The researchers from the study claim that "[i]f media images communicate that sexual exploitation is neither serious nor harmful, the environment is being set for sexual exploitation to be viewed as trivial and acceptable. As long as there are media producers who continue to find the degradation of women to be humorous, and media outlets that will air the content, the impact and seriousness of sexual exploitation will continue to be understated and not meaningfully addressed in our society."

A 2012 study led by sociologist Stacy L. Smith found that in both prime-time television and family films, women were highly likely to be depicted as thin and scantily clad. They were also vastly underrepresented in STEM fields when compared to their male counterparts, and had fewer speaking roles. According to this study, only 28.3 percent of characters in family films, 30.8 percent of characters in children's shows, and 38.9 percent of characters on prime-time television were women. According to a report by the Women's Media Center (WMC), it found that the gender gap has not declined and that in some industries it has gotten worse. In television, it found the percentage of female TV characters has decreased and that the ones who make it on-screen are not likely to get the lead roles compared to the male characters. "According to the Center for the Study of Women in Television & Film's 'Boxed In' report, CW Television Network is the only TV network where women can be seen in accurate proportion to their representation in the U.S. population".

### Video games

According to a report done by the Entertainment Software Association in 2013, 55% of game players are male and 45% are female. Women's roles in many modern games usually are less important to the game and rely heavily on stereotypes. Video games' female characters also tend to be lighter skinned individuals, as are their male counterparts. Furthermore, many of the female characters found in video games intentionally depict woman to be sultry and enhance the body form of females in an effort to appeal to men's desires. Although not demonstrating blatantly racist stereotypes, many games practice racism through omission of racially diverse characters. Video games have been found to offer a smaller range of roles to female characters compared to male characters, and these roles tend to involve being victims or prizes to be won. The majority of female characters are also not playable. These roles for women have been found to have a negative impact on the perception of women in gaming and even main playable female characters are found to be unrealistically proportioned with revealing clothing. If a sexualized female character is the main protagonist and portrayed in a positive light, studies have shown a potential negative effect if the character is hyper-sexualized in a stereotypical manner.

A recent Ohio State University Study has found that sexist and violent content in games cause male gamers to identify with the male lead, and find less empathy with female victims of violence, although a 2017 review of this paper suggested several flaws and a reanalysis of the dataset using different statistical methods found no sexist effect, concluding "These results call into question whether use of "sexist" video games is a causal factor in the development of reduced empathy toward girls and women among adolescents". Similarly, the results of a 2015 study suggested that "sexist video game play is related to men perceiving women in a stereotypic and sexist way", but found that the same correlation did not occur with female players. A German longitudinal study from 2011 to 2015 explored the connection between gaming and sexist attitudes. The results of this study concluded both that playing video games was not predictive of sexist beliefs and that sexist beliefs

were not predicative of video game play. The researchers stressed, however, that the study did not, nor was intended to, disprove the existence of sexist attitudes in general. A 2012 study also raised concerns about the correlation between video games and individual attitudes. Focusing on the Singaporean subjects playing the game Grand Theft Auto, the study found some evidence of "first order cultivation effects" – which relate to the perceptions of situations and issues – but found that second order effects, relating to beliefs and issues, were provided with only limited support by the study. This led the authors to conclude that previous studies on cultivation effects from television may not directly relate to effects from video game playing.

The trend of portraying sex-typed images of women and violence against women in popular video games continues to proliferate and promulgate in video games. Video games depicting sexual objectification of women and violence against women resulted in statistically significant increased rape myths acceptance for male study participants but not for female participants. A 2016 study by Fox and Potocki had similar findings, in which they ran a survey which found that "video game consumption throughout the life span is associated with interpersonal aggression, hostile sexism, and RMA [Rape Myth Acceptance]". Out of the top 10 video games listed midyear 2010 (New Super Mario Brothers; Call Of Duty: Modern Warfare; Battlefield: Bad Company 2; Final Fantasy XIII; Wii Fit Plus; God of War III; Pokémon Soul Silver; Wii Sports Resort, Mass Effect 2, Pokémon Heart Gold Version; Morris, 2010), most have violent content, including violence against women, and some contain sexual objectification of women. Not only are gamers increasingly being exposed to video games containing sexual objectification of and violence against women, but research also indicates that such exposure can be excessive. A national sample of youth aged 8 to 18 found that "8.5 percent of video game players exhibited pathological patterns of play," which is "very similar to the prevalence demonstrated in many other studies of this age group, including across nations".

### Effects on society

Critics of the prevalent portrayals of women in the mass media observe possible negative consequences for various segments of the population, such as: Women self-objectify in terms of body surveillance by adopting a form of self-consciousness in which they habitually monitor their own body's outward appearance and spend significant amounts of attention on how others may perceive their physical appearance Unrealistic expectations held of how women should look or behave. Stereotyping of women who are positively portrayed by or sexualized in the media, such as the theme of a "dumb blonde" or "blonde bimbo", limiting the societal and career opportunities for people who fit these stereotypes. Psychological/psychiatric disorders such as body dysmorphic disorder, anorexia nervosa, and bulimia nervosa. The excessively coercive nature of appeal to strong sexual instincts to sell products or promote media. Increase in the likelihood and acceptance of sexual violence.

According to Muehlenkamp and Saris–Baglama, self-objectification of women can lead to depression, noting that "the relationship between self-objectification and depression can be explained by the anxiety and powerlessness women may experience as a result of not knowing when or where they will encounter objectification. These feelings may increase women's vulnerability to depressive symptoms. Once a woman starts to self-objectify and compare her body to others, it may be a risk factor for holistic human functioning, and may also lead to impairment in multiple life tasks, such as forming meaningful interpersonal relationships and achieving academic success." In addition, it can lead to sexual dysfunction. Engaging in sexual activity involves another person focusing attention on one's body and during sexual relations a woman can be distracted by thoughts about her body rather than experiencing sexual pleasure. Many studies have shown the negative effects that this exploitation of women in the media has on the mental health of young women, but recently the studies have focused on aging women in western societies. It has been observed that the exploitation of young attractive women in the media causes aging women to feel a variety of emotions including sadness, anger, concern, envy, desensitization, marginalization, and discomfort that their appearance was being judged by others. A study done in 1994 about the effects of media on young and middle-aged women found that of adolescent girls aged 11–17, the primary desire was to "lose weight and keep it off." The results were not different for older women. When asked what they'd most like to change about their lives, the answer for over half of them was their body and weight.

A recent study done by Vanderbilt University illustrated how sexist commercials have a greater impact on wellbeing than commercials that do not exploit women. The study was designed with three different groups: one was exposed to sexist media, one was exposed to neutral media, and the control group was not exposed to media at all. Of the women exposed to sexist advertising, there was a substantial difference. The women in this group expressed having a body larger than it was in actuality and expressed feeling a greater disparity between their own body and the "ideal body." Following exposure to this kind of media, there was an immediate negative effect on their mood. It was also concluded that adolescent girls exposed to sexist media are the most

highly impacted demographic. A study reported in 2018 demonstrated the effects of showing a group of women, aged from 18 to 41, images of thin and overweight (or plus size) female models. The researchers measured the change in the subjects' views of their body image and their overall anxiety levels. The results of the research showed that the social comparison effects of viewing images of thin women can worsen body image and increase anxiety.

### Effects on young children and adolescents

Statistically, a significant number of young children are exposed to sexualized media forms from early within their childhood: influence upon girls' self-image has been reported within girls as young as 5 or 6. According to the social cognitive theory, modelling such behaviours outlined within popular media have long-lasting effects upon the self-awareness and self-identity of young girls. In a study on the sexualization of women in media, by the American Psychological Association, it was found that women or girls are, statistically speaking, more likely to be dressed provocatively and forced into poses that suggest sexuality. Another study, on print media, completed by psychology researchers at Wesleyan University found that 51.8% of the time, women are objectified in advertisements. This number changes when the study was narrowed to men's print, where women were objectified in an increased 76% of advertisements. A common problem seen among young girls is any number of afflictions directly attributed to a negative body image, caused by these objectified ads. The APA is aware of this situation and put together a task force to complete a study across all major advertising and media platforms. What they found was numerous problems being found in young women can be traced back to these displays of women as sexual objects. The affects span a wide range of disorders and illnesses, from anxiety, to eating disorders, to depression, and even prevent young girls from creating a healthy sexual life. This task force is reaching out to both the media and families with young children in an attempt to properly inform all people on the negative impacts of the way media is used nowadays.

A study conducted by the Department of Psychology at Knox College provided insight into risk factors such as media consumption hours, maternal self-objectification, maternal religiosity, and television mediation; each has been shown to affect rates of media influence and rates of self-internalization of their potential negative influence.

### Effects on women of colour

Support has shown that the effects of media exploitation vary for women of different ethnicities. Research has depicted that these implications often resonate beyond cultural boundaries, to cause significant differences among African American, Latina, and Asian American women. According to the American Psychological Association, when comparing one's body to the sexualized cultural ideals, this significantly impaired the ability for women of these ethnicities to regulate cognitive functions, including logical reasoning and spatial skills. Spanish-language TV in the United States statistically projects more stereotypical roles for Latina women, often portraying them as 'exoticized' and 'overly sexual'; meanwhile, more Latina youth, on average, watch more television than that of the standard Caucasian American child. This combination projects increased rates of the acceptance of the negative effects within minority women within the US, leading to a greater acceptance of standard gender roles and negative stereotypes projected by Latina characters. However, studies have shown that Latina women who watch more black-oriented television shows see a general increase of body acceptance over time.

### Counter arguments

Gallup & Robinson, an advertising and marketing research firm, has reported that in more than 50 years of testing advertising effectiveness, it has found the use of the erotic to be a significantly above-average technique in communicating with the marketplace, "...although one of the more dangerous for the advertiser. Weighted down with taboos and volatile attitudes, sex is a Code Red advertising technique ... handle with care ... seller beware; all of which makes it even more intriguing." This research has led to the popular idea that "sex sells". Camille Paglia holds that "Turning people into sex objects is one of the specialties of our species." In her view, objectification is closely tied to (and may even be identical with) the highest human faculties toward conceptualization and aesthetics. Danish criminologist BerlKutchinsky's Studies on Pornography and sex crimes in Denmark (1970), a scientific report ordered by the Presidential Commission on Obscenity and Pornography, found that the legalizing of pornography in Denmark had not (as expected) resulted in an increase of sex crimes.[87] Since then, many other experiments have been conducted, either supporting or opposing the findings of BerlKutchinsky, who would continue his study into the social effects of pornography until his death in 1995. His life's work was summed up in the publication Law, Pornography, and Crime: The Danish Experience (1999). Milton Diamond from the University of Hawaii found that the number of reported cases of child sex abuse dropped markedly immediately after the ban on sexually explicit materials was lifted in 1989.

Some researchers, such as Susan Bordo and Rosalind Gill, argue against using the phrase "sexual objectification" to describe such images because they often depict women as active, confident, and/or sexually desirous. For this argument, there have been several refutations that intensity of women's sexualization suggests that "sexual object" may indeed be the only appropriate label. The accumulation of sexualized attributes in these images leaves little room for observers to interpret them in any way other than as instruments of sexual pleasure and visual possession for a heterosexual male audience. Yet, some scholars have criticized such statements as overly homogenizing because they render invisible differences in this process of sexualization. Some social conservatives have agreed with aspects of the feminist critique of sexual objectification. In their view however, the increase in the sexual objectification of both sexes in Western culture is one of the negative legacies of the sexual revolution. These critics, notably Wendy Shalita, advocate a return to pre-sexual revolution standards of sexual morality, which Shalita refers to as a "return to modesty", as an antidote to sexual objectification.

## गृहअर्थशास्त्रात नवविचार प्रवाहाची गरज आणि क्षेत्र

डॉ. प्रा. लता वाघेला

विभाग प्रमुख गृहअर्थशास्त्र, लोकनायक बापूजी अणे महिला महाविद्यालय, यवतमाळ

## सारांश

आजही जागतिक स्तरावर भारतीय संस्कृती सर्व श्रेष्ठ अशी मानल्या जाते. कारण शिक्षणाचा संस्कृतीशी घनिष्ट संबंध आहे. संस्कृतीच्या विकास व पतनाबरोबर शिक्षणाच्या प्रगतीचा व अवनतीचा अतुट संबंध आहे. म्हणजे शेवटी संस्कृतीच्या विकासावरच शिक्षणाची प्रगती अवलंबून असते. जवळपास इ. स पूर्व ४५०० मध्ये भारतात शिक्षणाचा विकास झालेला दिसून येतो. शिक्षणाच्या या विकासापासून आजपर्यंत शिक्षणाचा प्रवाह विविध मार्गाने जात आहे. म्हणून राष्ट्र विकासांमध्ये शिक्षणाला अनन्य साधारण महत्व आहे. कोणत्याही देशाच्या विकासाची भविष्यकालीन पाऊले त्या देशात दिल्या जाणाऱ्या शिक्षणाच्या दर्जावरून ठरत असतात. त्याच बरोबर नितिमतेचे धडे हे शिक्षणाच्याच माध्यमातून अधिक प्रभावीपणे देणे शक्य होते. राष्ट्राची उन्नती व समानता या दोहोसाठी शिक्षणातील गुंतवणुक म्हणजेच मानवी बळावरील गुंतवणुक महत्वपूर्ण ठरते. देशाच्या विकास प्रक्रियेत मानवीय भांडवल निर्मिती आवश्यक आहे. यासाठी लोकांच्या ज्ञान व कौशल्यात वाढ होणे आवश्यक आहे. मा. गांधींच्या मते शिक्षणातूनच ३५ ;भंकए भंदकए भंतजद्ध चा विकास होतो. देशाचे भवितव्यच शिक्षणातून घडते. कारण शिक्षक हा देशाचा शिल्पकार आहे. शिक्षणातील नवप्रवाह हे प्रामुख्याने आयोगे, राष्ट्रीय शैक्षणिक धोरणे, पंचवार्षिक योजना, विद्यापीठीय अभ्यासक्रम विविध उपक्रम शासनाच्या शिफारशी विविध शैक्षणिक तंत्रे, साधने इ. कडून राबविले जातात यासाठी शिक्षण शाखांचा सुक्ष्मपणे व सखोलपणे विचार करणे आवश्यक आहे. कारण शिक्षणात नवप्रवाह सारख्या संकल्पना सतत उदयास येणार आहे.

## प्रस्तावना

सध्याच्या युगात संगणकाचा इतका उदो उदो केला जातोय की संगणकाशिवाय जीवन जगणे जणु अशक्यच आहे. आज मोठ्य शहरातील उच्चभू वर्गाने संगणक हाच अध्ययनाचा एकमेव मार्ग म्हणून त्यावर शिकवामोर्तब केले आहे. जागतिकीकरणाच्या काळात भारताला आपले स्थान निर्माण करावयाचे असेल तर शिक्षणाच्या माध्यमातून नवनविन प्रवाहाचा अंगीकार होणे गरजेचे आहे. या नवीन विचार प्रवाहामध्ये चिरंतन विकासासाठी शिक्षणातील ष्ज ची भूमिका याचा समावेश करता येईल. कारण आजच्या स्पर्धात्मक आणि गतिमान युगात जर शिक्षक पारंपारीक पद्धतीने ज्ञान देणारा असेल तर विद्यार्थी अशा शिक्षकांचा आणि अभ्यासक्रमाचा स्विकार करणार नाही. म्हणून ष्ज चा वापर करून शिक्षकांमध्ये कौशल्य रूजविणे गरजेचे आहे. सद्ययुगात शिक्षकांना त्याच्या अभ्यासक्रम संदर्भातील ज्ञान आणि कौशल्ये अद्ययावत ठेवावी लागतात. त्यासाठी त्यांना बदलत्या तंत्रज्ञानाची माहिती असणे गरजेचे आहे.

२१ व्या शतकात प्रत्येक क्षेत्रात प्रगती करण्यासाठी माहिती संप्रेषण तंत्रज्ञानाचा वापर खुप मोठ्य प्रमाणावर होऊ लागल्यामुळे शिक्षण क्षेत्र या पासून वंचित राहणे अशक्य आहे. आज शिक्षण क्षेत्रात शिक्षकांची भूमिका बदलेली दिसून येते. शिक्षकांची पारंपारीक भूमिका आज पूर्णतः बदलेली आहे. पूर्वी शिक्षक आणि पुस्तक हे ज्ञानाजर्नचे दोनच मुख्य स्रोत होते पण आज ष्ज चा प्रभाव शिक्षण क्षेत्र व शिक्षकांवर झालेला दिसून येतो. इतकेच नव्हे तर आजच्या विद्यार्थ्यांची शैक्षणिक भूक वाढल्यामुळे आपली वाढती जिज्ञासा पूर्ण करण्यासाठी त्यांना पुस्तका व्यतिरिक्त ष्ज चा वापर करणे अनिवार्य झाले आहे. कारण ष्ज च्या माध्यमातून हवी ती माहिती अवघ्या काही क्षणातच उपलब्ध होते म्हणून अद्यावत ज्ञानासाठी शिक्षकालाही ष्ज चा वापर करणे गरजेचे वाटते. ज्ञानाचे विकेंद्रिकरण ष्ज मुळे झाले आहे. याचा परिणाम विद्यार्थ्यांच्या अध्ययन क्षमतेवर झाला आहे. विद्यार्थ्यांच्या वाढत्या अध्ययनक्षमता पूर्ततेसाठी प्रत्येक शिक्षकाला ष्ज ची माहिती व प्रशिक्षण घेऊन परीपूर्ण होणे महत्वपूर्ण ठरते. या शिवाय त्यांना विद्यार्थ्यांची बौद्धिक गरज पूर्ण करता येणार नाही. म्हणून शिक्षणातील नवविचार प्रवाहाची संकल्पना गरज आणि क्षेत्राच्या अभ्यासाची उद्दिष्ट पुढील प्रमाणे ठरवता येईल.

## उद्दिष्ट

- १) शिक्षणातील परीवर्तन अभ्यासणे
- २) नवविचार प्रवाहाचा अर्थ माहिती करून घेणे
- ३) नवविचार प्रवाहाच्या परीभाषा अभ्यासणे
- ४) शिक्षणात नवविचार प्रवाहाची आवश्यकता अभ्यासणे
- ५) गृहअर्थशास्त्र विषयातील नवविचार प्रवाहाची क्षेत्रे जाणून घेणे.

**तथ्य संकलन**

प्रस्तुत माहितीपर लेखासाठी दुय्यम स्रोत अंतर्गत पुस्तक, ग्रंथ, मासिक, जर्नलस्, सोविनिअर व इंटरनेटचा वापर करण्यात आला.

**नवविचार प्रवाहाचा अर्थ**

जुन्या प्रथा आणि परंपरा जेव्हा नामशेष होतात व नव्या प्रथा आणि परंपरा रूजतात तेव्हा तो विचार प्रवाह रूजला असे म्हणतात. याचा उगम ज्ञानाच्या विस्फोटातून तंत्रज्ञानाच्या प्रगतीतून, संशोधनातून, नाविण्यातून होतो. जेव्हा एखाद्या नवीन विचार बहुसंख्य व्यक्तीकडून स्विकारला जातो तेव्हा त्या विचाराला नवविचार प्रवाह म्हणतात. अशा विचारांचा उगम अनेक उपक्रमातून होतो. त्याचा प्रसार, स्वीकार आणि उपयोजनातून पुन्हा नवीन उपक्रमाचा उगम होतो. विविध प्रयोगाच्या माध्यमातून अनेक समस्यांवर वैधानिक रीतीने उपाय शोधले जातात. अशा प्रकारे कार्यशाळेच्या माध्यमातून नवीन विचार प्रवाह रूजविले जातात. या नवविचार प्रवाहामध्ये माहिती तंत्रज्ञानाचा समावेश होतो. या नवीन संकल्पनेच्या परीभाषा पुढील प्रमाणे अभ्यासता येतील.

**नवविचार प्रवाह परीभाषा**

१. माहिती मिळविण्यासाठी माहितीवर प्रक्रिया करण्यासाठी किंवा माहितीचे वितरण करण्यासाठी जी यंत्र, तंत्र प्रणाली तयार करण्यात आलेली असते तीला माहिती तंत्रज्ञान असे म्हणतात.
२. जेव्हा समाजाचा कल विशिष्ट विचाराकडे झुकलेला असतो त्या विशिष्ट विचारालाच नवविचारप्रवाह असे म्हणतात.
३. जेव्हा कालबाह्य जुन्या प्रथा आणि परंपरा नामशेष होतात व नवी प्रथा आणि परंपरा रूजतात अशा रूजलेल्या विचाराला नवविचार प्रवाह असे म्हणतात.
४. जेव्हा एखादा विचार बहुसंख्य व्यक्तीकडून स्वीकारला व अनुसरला जातो तेव्हा त्या विचाराला नवप्रवर्तन किंवा नव विचारप्रवाह असे म्हणतात. तसेच एखाद्या प्रणालीचा उद्दिष्ट प्राप्त करण्याच्या दृष्टीने जाणीवपूर्वक केला जाणारा नवीन आणि विशेष बदल म्हणजे नवप्रवर्तन होय.

वरील परीभाषेच्या अध्ययनातून असे निर्दनास येते की, पूर्वी पाठ्युस्तक हाच ज्ञानाचा केंद्रबिंदू आणि मुख्य स्रोत होता. शाब्दिक, चित्रपूर्ण पाठ्युस्तकातील आशय संबंधी तसेच सांख्यिकीय माहिती आत्मसात करणे त्या माहितीद्वारे योग्य प्रक्रिया करणे, ती साठवून ठेवणे, आवश्यकतेनुसार ती वापरणे यासाठी संगणक, दूरसंचार व इलेक्ट्रॉनिक्सचा वापर करणे म्हणजेच तंत्रज्ञानाच्या माध्यमातून नवविचार प्रवाह केल्याशिवाय जागतिक स्पर्धेत टिकू शकणार नाही म्हणून विचार प्रवाहाची गरज आणि क्षेत्र अभ्यासणे अनिवार्य झाले आहे.

**शिक्षणात नवविचार प्रवाह आवश्यकता**

अनेक क्षेत्रात झालेल्या ज्ञानाच्या प्रस्फोटांमुळे समाजातील लोकांच्या जीवनाची गती वाढली. प्रत्येक क्षेत्रातील स्पर्धेमुळे विद्यार्थ्यांच्या मनावरील मानसीक ताण वाढला आहे व एकंदर समाज या तणावाखाली वावरत आहे. त्याचे परीणाम स्वरूप मानसिक संतुलन बिघडून नैराश्य, आत्महत्या, गुन्हेगार प्रवृत्ती या सारख्या समस्या निर्माण झाल्या आहेत. या समस्या निवारण्यासाठी शिक्षण क्षेत्रात अध्यात्म, नैतिक मुल्यांशी संबंधीत विचार प्रवाहाची गरज आहे.

पारंपारीक शिक्षण पद्धत ही परीक्षानिष्ठ आणि आणि घोकंमपट्टीला उत्तेजन देणारी शिक्षण पद्धती आहे. तिच्यातून बाहेर पडणाऱ्यांना कुठलाच रोजगार मिळवून देऊ शकत नाही. देशातील उद्योग व्यवसायांना आवश्यक असलेले कुशल, प्रशिक्षित मनुष्यबळ ही तो निर्माण करू शकत नाही. त्यामुळे सुशिक्षित बेकारी वाढत आहे. वाढत जाणाऱ्या डॉक्टर, इंजिनियरना समावून घेण्यासाठी औद्योगिक क्षेत्राची वाढ न झाल्याने त्यांची बेकारी वाढत चालली आहे. एका टोकाला व्यावसायिक जगाची ओळख नसलेला युवा – युवतींचा वर्ग तर दुसऱ्या टोकाला काम धंदा नसणारा पदवीधरांचा वर्ग म्हणून समाज विज्ञानाच्या गृहअर्थशास्त्र विषयातून नित्योपगी गरजा भागविण्यासाठीचे अनेक छोटे मोठे व्यवसाय आहे. त्यातून रोजगार मिळतो व निर्माण करता येतो. भारता सारख्या कृषीप्रधान देशात कृषी संबंधीत व्यवसायाची माहिती व उत्पादनाशी संबंधित अभ्यास कामाचा संबंध जोडला गेला पाहिजे. रशिया, चीन, जपान सारख्या विकसीत देशात यांत्रिकी उद्योग, उत्पादकता यांचा शिक्षणाशी समन्वय करण्यात आला आहे. परीणामी उत्पादन कार्याचे शिक्षण दिल्याने विद्यार्थ्यांना एक नवीन दृष्टी प्राप्त होते.

शिक्षणातील नवप्रवर्तनामुळे नवनवीन विचार प्रवाहाच्या उगमाशी असलेल्या उपक्रमांची माहिती मिळाल्याने विद्यार्थ्यांची संशोधन वृत्ती वाढून त्यांना नवीन उपक्रम सुचतील. त्याच्या विचारांना चालना मिळेल. गृहअर्थशास्त्राच्या शैक्षणिक नवप्रवर्तनाचा उगम उपक्रमातून होत असल्यामुळे नवप्रवर्तनाला महत्व आहे. यामुळे पुढील यशस्वी जीवनाची वाटचाल

करण्यास मदत होऊ शकते. याचे उपयोजन करण्यासाठी प्रशिक्षण, कृतीसत्र, सेमीनार, उदबोधन वर्ग या सारख्या तंत्राचा वापर करून गटचर्चा, क्षेत्रीय सहली, अभ्यासक्रम संबंधीत ठिकाणी भेट इ. उपक्रम हे शिक्षणातील नवप्रवर्तनास सहाय्यभूत ठरतात.

### गृहअर्थशास्त्र विषयातील नवविचार प्रवाह क्षेत्र

गृहअर्थशास्त्र विषयाच्या अध्यापनात नवप्रवर्तनाचा वापर सैद्धांतिक भाग, प्रात्यक्षिक भाग आणि सरावाचा भाग अशा तीन मुख्य घटकात ष्ज च्या माध्यमातून करता येऊ शकतो

**१) सैद्धांतिक भाग** — अभ्यासक्रमातील काही अमूर्त संकल्पनांच्या स्पष्टीकरणासाठी विशेष तज्ञांच्या मार्गदर्शनाचा लाभ आभास्त वर्ग, व्हीडीओ कॉन्फरन्सिंग, न्युज ग्रुप इ. मार्फत घेता येऊ शकते. जसे प्रजनन संस्थे विषयीची माहिती तोंडी न सांगता एखाद्या प्रसुतीतज्ञांनी जर ती व्हीडीओच्या साहाय्याने सांगितल्यास प्रभावी ठरू शकते त्यामुळे विद्यार्थ्यांच्या विषयासंबंधीत संकल्पना स्पष्ट होण्यास मदत होईल. या शिवाय काही होमवर्क देऊन त्यांच्या पूर्ततेसाठी ऑनलाईन ग्रंथालय, शब्दकोश, विकीपिडीया यांचा वापर कसा करावा या बाबत मार्गदर्शन केल्यास विद्यार्थ्यांनीना स्वयंपूर्ण व स्वावलंबी करता येईल. विषयातील अभ्यासक्रमासाठी विविध विषयतज्ञांचे व्याख्यान, मार्गदर्शन, विविध स्पर्धा, कार्यशाळा, सेमीनार, वर्कशॉप, कमी कालावधीचे डिप्लोमा, सर्टीफिकेट, कोर्सचे आयोजन केल्यास विद्यार्थ्यांच्या व्यक्तिविकासाला मदतरूप ठरेल. या शिवाय स्वयंप्रेरणा वृद्धीगत करण्यासाठी, फिल्डवर्क, प्रोजेक्ट वर्क, सहल, भेट, अहवाल लेखन, विविध खेळाच्या माध्यमांनी त्यांना लेखी अभ्यासक्रमाचे शिक्षण देतांना माहिती तंत्रज्ञानाच्या विविध साधनांचा वापर करून अध्यापन जास्त प्रभावी करण्यास मदत होईल

**(२) प्रात्यक्षिक भाग** — अभ्यासक्रमातील विविध प्रकारच्या प्रात्यक्षिकासाठी माहिती तंत्रज्ञानाचा वापर करता येतो. जसे व्यक्तिमत्व विकासासाठी उत्तम संप्रेषण कौशल्य आत्मसात करण्यासाठी ष्ज चा प्रभावी वापर करता येऊ शकतो. वेळ व्यवस्थापन, ष्ज परीक्षण यासाठी विविध प्रकारचे पॉवर पॉईंट प्रेझेंटेशनचा लाभ मल्टीमीडीयाच्या साहाय्याने करता येऊ शकतो. जनजागृती अभियान, पथनाट्य, एकल अभिनयाचे सादरीकरण ष्ज च्या मदतीने खुप लोकांपर्यंत संदेश पोहचविता येतो. उदा स्वच्छता मोहीमसाठी ओल्या, कोरड्या कचऱ्याचे व्यवस्थापन, सांडपाण्याची विल्हेवाट, आहार आरोग्य विषयीची जनजागृती करता येऊ शकते. एखाद्या विषयाचे प्रात्यक्षिक सर्व स्तरावरील लोकांपर्यंत ष्ज च्या माध्यमाने एकाच वेळी देता येऊ शकते. एखाद्या शैक्षणिक खेळ किंवा साधनाची निर्मिती करण्यासाठी ब्वसनक बवउचनजपदह प्दजमतंबजपअम टपकमव चा वापर करता येतो, प्रदर्शन, कठपुतळीचा शो, फिल्मच्या माध्यमाने थोड्या वेळात खुप जास्त लोकांपर्यंत माहिती पोहचवता येते. उदा. लहान मुलांना पोषक पदार्थांचे महत्त्व समजविण्यासाठी पोषण खाद्य पदार्थांची िठक् चार्ट, सापसीडी सारख्या परंपरागत खेळाच्या माध्यमातून देता येते. अभ्यासक्रमाच्या सरावासाठी सिटीम्युलेशन तंत्राचा वापर करून प्रत्यक्ष वर्गात न जाता अध्यापनाचा सराव देता येतो.

या शिवाय तंत्रज्ञानाचा वापर अनिवार्य करणे, प्रात्यक्षिकावर भर देणे, तंत्रज्ञान हाताळण्याबाबत प्रशिक्षण देण्यासाठी तज्ञ लोकांची नियुक्ती उदबोधन, उजळणी वर्गांचे आयोजन करणाऱ्यास बाध्य करणे, अध्यापनात दृकश्राव्य माध्यमाचा स्मरणशक्तीवर प्रभावी परीणाम होतो, कारण केवळ अनुभवाद्वारे दिले जाणारे शिक्षण कायम स्वरूपाचे नसते. ऐकलेले विसरले जाते, पाहिलेले स्मरणात राहते. कारण डोळ्याद्वारे ८२ टक्के, कानाद्वारे ११ टक्के तर त्वचेद्वारे आणि इतर द्वारे ७ टक्के ज्ञान मिळविता येते. यावरून असे निदर्शनास येते की, अभ्यासक्रमात दृकश्राव्य साधनांचा वापर केला असता विद्यार्थ्यांच्या मनात अभ्यासाविषयीक कल्पना निश्चित होतात व पाठ्यक्रमाकडे डोळसपणे पाहण्याची सवय लागते.

“श्रवण आणि मनन। निज घ्यासे समाधान।

नित्य कल्पनेचे। भान उडोनि जावे ॥ ”

ही रामदासाची शिकवण आपण कायम लक्षात ठेवण्याचा प्रयत्न केला पाहिजे. आधुनिक युगात हीच संकल्पना नवप्रवर्तन म्हणून माहिती तंत्रज्ञानाच्या स्वरूपात समोर आली आहे.

**(३) समारोप** — समाजात भेडसावणाऱ्या अनेक समस्यांवर समाधान शोधण्यासाठी संशोधन अध्ययन अध्यापन पद्धतीची प्रत्येक क्षेत्रात सध्या गरज आहे. उच्च शिक्षणाने संशोधनाला व्यावहारीकता प्राप्त झाली आहे. प्रत्येक विद्यार्थ्यांनी संशोधक बनून स्वतःच्या समस्या सोडवल्या पाहिजेत. संशोधन म्हणजे नवीन ज्ञानाची जननी प्रस्थापीत ज्ञानाची पडताळणी किंवा निर्मिती करणे म्हणजे संशोधन होय. समाजासाठी, ज्ञानासाठी, संशोधन करणे उच्च शिक्षणात अपेक्षित असल्यामुळे पदव्युत्तर स्तरावर प्रयोग प्रकल्प अनिवार्य करावे. परंतु संशोधन हे नुसते कागदपत्री न राहता त्याचा उपयोग व्यावहारीक, सामाजिक, उपयुक्त, ज्ञानात्मक कृतिशिल, सृजनशील, व्यक्तिमत्व विकसीत करणारी व ज्ञान देणारी पद्धत होय.. याचा फायदा सर्वसामान्य स्तरापर्यंत होऊ शकतो. गृहअर्थशास्त्रातील विविध शाखा अंतर्गत याचा वापर प्रभावी ठरू शकतो. कारण या विषयाचा संबंध

सर्वसामान्य जनतेपासून राष्ट्रीय स्तरापर्यंत असल्यामुळे संशोधन पद्धतीमध्ये माहिती तंत्रज्ञानाचा फायदा नवप्रवर्तन म्हणून मोठ्या प्रमाणात होऊ शकतो.

### समारोप

भारतासारख्या विकसनशील देशात नवप्रवर्तन म्हणून माहितीतंत्रज्ञानाचा वापर करतांना अनेक अडचणीना शिक्षकांना तोंड द्यावे लागेल. परंतु देशाला विकसीत देशाच्या श्रेणीत आणण्यासाठी या सर्व समस्यांवर मात करणे गरजेचे आहे. कारण आज संगणकाचे ज्ञान म्हणजे साक्षरता अशी संकल्पना रूढ झाली आहे. या नवप्रवर्तनाच्या उपयोगाने माहितीची देवाण घेवाण वाढून ज्ञानाच्या कक्षा विस्तारल्यामुळे प्रगतीला वाव मिळेल. गृहअर्थशास्त्र विषयांच्या शिक्षक व विद्यार्थ्यांना अध्यावत ज्ञान सहजरित्या प्राप्त करता येईल. परिणामी त्याच्या जिवाची गुणवत्ता वाढून, स्वबळावर उभे राहण्यास, आत्मनिर्भर, स्वावलंबी व सक्षम करण्यास माहिती तंत्रज्ञानाची भूमिका प्रभावी ठरेल. म्हणून नवविचार प्रवाहामध्ये संगणकाची भूमिका महत्वपूर्ण असल्याचे निदर्शनास येते.

## Use of ICT in English Language Teaching, Learning and Evaluation

**Dr. Waman G. Jawanjal**

Assistant Professor (English), Indirabai Meghe Mahila Mahavidyalaya, Amravati  
wjawanjal067@gmail.com

### Abstract

In the postmodern era of 21<sup>st</sup> century, we are surrounded by several new, innovative and advanced things such as computers, Internet, mobiles etc. These audio-visual aids, collectively known as multimedia, have greatly affected our life. It is also a fact that no sphere of life has left untouched from it. Each field of life has come under its impact. The public as well as private life of person has a very slight curtain of difference in terms of sharing of information at both the levels. In this age, the teaching and learning process has also been pacing up with the increasing use of technology in the field of teaching. The Blogs, Twitter, e-journals, e-books etc. have made it easy to get the information. The teaching and learning of English by using all these means in proper way has created its own place as most of resources for learning are available in English. This is a golden opportunity for the teacher of English to impart soft skills among his pupils by applying easy, innovative and creative techniques with the help of audio-visual aids in classroom.

### Introduction

We are living in the twenty first century as well as in digital technology. Information and Communication Technology (ICT) is a force that has changed many aspects of the way we live. The paper concentrates over impact of ICT in Teaching, Learning and Evaluation. ICT has three components that is Information, communication and technology. Language learning deals with all three components.

- 1. Information:** Information means being able to acquire, transmit and exchange the information.
- 2. Communication:** Communication means learning how to communicate in one or many languages when receiving transmitting and sharing information.
- 3. Technology:** Technology is related to language learning in term of learning environment and the tools. ICT has added a different variable to communication which is a different form of communication and a different form of literacy and illiteracies.

### Importance of Language

In this world of Information Technology teaching method should improve according to pupil and changing circumstances in globalization trade So with the help of sources like OHP(Overhead Projector), LCD,Internet, Computer, students participation in education should increase.

Language has plays very important role in the human being development. There is no option at the international level except English though each region uses various languages. In Indian education sector the education has been imparting in different languages urge for completing education process. At the same time English has very important place. With this view different types as well as medium are used to teach English language.

Human beings has very important place in economic system. So that Government continues tries to develop human being through various shades. Except this educational development is very special aspect in the development of human beings.

According to Government, there is need to market in various sectors. Educational facilities are made on language, science, technology, management and economy These all sectors are provides the facilities for development of human beings.

### Language learning through ICT

ICT has positive effects on second language learning i.e.(English) The impact of language learning is highly developed on the way, it is used the teachers motivation and his 'Savoir -faire'.

Using ICT the following impacts seems to be the most obvious in favour of second language learning.

- 1 ICT increases learners motivation and enhances personal commitment and engagement.
- 2 ICT allowsto react upon and enables the use of daily news, it offers access to authentic materials on the web.
- 3 ICTenables to focus on one specific aspect of the lesson as vocabulary and Pronunciation etc.
- 4 Lectures become more interesting and less ordinary which boosts learners engagement.
- 5 Possibility to use alternately skills, as text and images, audio and video clips.
- 6 A quick feedback is made possible.

**Text of ICT and Influence**

The process of reading and influence of the text has changed by the second language curriculum. The ways of the student's access of the texts also changed. Multimedia texts challenge the notion of the English language and literacy as being about words, sentences and type of the text. The verbal aspect of communication is only part of what is being communicated in the text of multimedia. Reading multimedia texts therefore requires now ways of reading and new reading skills. These include the ability to read images, icons, hyperlinks formatting conventions and site maps. ICT has also changed the ways in which student's access texts.

**Place of English Language Teaching in India**

Among Indians the motivation to learn English has mostly been of the instrumental kind to learn it ; so as to earn a living and some social standing, and for extending the horizon of one's awareness. Until about decade of the Nineteen Sixties, one could not pass the school final examination in India unless one passed in English. Now this motivation is also becoming integrative with the culture.

India has long tradition of language teaching. It has successfully used the direct method, the bilingual method, the structural method, language through literature and the reading method. The communicative approach to language teaching is also being tried out.

**Bilingual Method**

The bilingual method and social wordlists were used mostly in the early years of English in India and became absolute by the middle of the eighteenth century. For its limited objective it became quite successful. It was like the holophrastic stage in child language acquisition extended conversation or communication was not possible, but the act of communication was accomplished. It created a feel for the language besides a minimum functional vocabulary on which the extended language could be built most wordlists were prepared before the mid-eighteenth century, by then learners were moving to dictionaries and grammar books and were attempting translations of longer texts.

After the successful completion of an experiment with the bilingual method of teaching English to a group of Kannada speaking children at Mysore Sastri reports that- children from the control group who had been taught English through their mother tongue had an average score of 75.2%. The success of such experiments at the central institute of English and foreign languages, Hyderabad and elsewhere has revived interest in the bilingual method.

**Evaluation**

English has been not the language of European or American countries, but has become the language of third world people. It is an International and link language. It is spoken all over the world and is widely accepted. It is used as a second and third language in many third world language like in India, China, Zimbabwe and Kenya etc. It is being taught and studied in our country but an average Indian student is not able to either English or communicate in English to a reasonable level of proficiency and fluency. Again the position of students from rural areas is so worst.

The findings from this showed most of the students knew the various benefits which ICT can provide to them. However, many students still lack of awareness on the use of ICT resources to help them especially in learning English. Therefore it is crucial for the teachers in colleges to encourage and guide the students to use ICT tools and provide the students language development. Before the teachers are able to guide the students successfully. Most importantly, the students must change their attitudes towards the use of ICT in learning before they can successfully learn from the ICT tools. Result also showed majority of the students perceived positive attitudes towards use of ICT. However, students claimed they faced certain circumstances such as lack of English proficiency and lack of training on ICT.

**Language Teaching: A New Dimension**

The participation of students in various activities in class room can be improved by employing new techniques and methods of teaching. The use of multimedia can be made to make the subject of English more live and interesting. The students generally have a kind of fear of English among them. And the teacher by using these tools can certainly remove the fear from the minds of his students and create a sporty spirit in them towards learning of English. The students can be brought closer to English language by showing them pictures, giving exercise, showing video clips English conversation, showing blogs of famous personalities. The exercise can be given by dividing them into groups and by asking to do it by allowing discussing the matter with members of the same group. In this method, the teacher can boost the confidence of his students in communicating among the students themselves as well as their teacher of English.

**Internet and Its Use**

The world of human being has widened up to the fullest of extent in terms of circulation of information through Internet. The Internet has made available the treasure of knowledge to all from all walks of life and from all the corners of world. The people from different countries can share and get the information at the same time. The e-games, blogs, e-books, language games, grammar games etc. have reduced the distance of world, classroom and one's own closet. Thus the use of modern technology and learning tools, instruments, audio visual aids has made the learner more efficient in learning process.

**Online Language Games and Learning of English**

Today on Internet, there are many grammars, vocabulary, crossword games for improving one's knowledge of English language. This helps the learners learn English in easier way. They can play the game and can know their score of marks after the game is over. There are several websites which make such games available free of cost for users. Through these activities, the students get familiar to many new words in English. By way of forming sentences in English, completing incomplete sentences, solving riddles in crossword game etc., the students can improve their understanding of construction of English sentences. This method can be used in classroom to create interest among the students in learning English as a 'language' rather than a 'subject.'

**E-Books and E-Journals**

The students can enrich their knowledge of English by going through the books which are available in their 'e' form on internet. Some e-books and e-journals are available free of charge. These online books, magazines, journals etc. are available with specialized aspects of language and literature such as criticism, grammar, contemporary literary streams, literary forms, poetry, phonetics, experiments with language etc. The teacher of English by referring his students to such books can also bring them the massive world of knowledge. The students also can get their knowledge updated with the help of these books which are available them all time.

**Conclusion**

One cannot remain dependent on the traditional method of teaching and learning. In the digital era of today, the teacher needs to change his classroom from traditional to innovative one. The students from all walks, strata and background of society need to be trained with practical knowledge of English which will open them the avenues to get proper job in the job market. Teaching mere prose and poetry without soft skills and proficiency in English would hinder their way in practical life. Therefore, the students can certainly be trained today by making effective use of technology. The availability of resources, audio visual aids, Internet etc. has opened the doors of abundant information to all the people. By adopting new, innovative and sporty ways of teaching, the teacher of English can easily impart the knowledge of English among his students.

## Importance of Yoga: A Study

**Dr. Chandrashekhar Bapurao Kanase**

Assist. Professor, Head and Research Guide, Department of Dramatics, S.P.P. Mahavidyalaya,  
SirsalaTq. Parli v. Dist. Beed. 431128.

### Abstract

*At present Modern life patterns affect our health in different aspects physically, psychologically, culturally and socially. There is a need for increasing people awareness about the effect of modern life to control the effects of the patterns of life. Promoting healthy lifestyle includes proper eating, physical activity, and better way of communicating and socializing in the community. All these have positive impacts which we can easily get in practicing yoga. Yoga will reduce the risk of getting so many diseases which resulted from our day to day lifestyles. This paper, therefore, deals with the significance and importance of yoga in modern life. This research article therefore, deals with the origin, importance and benefits of Yoga.*

**Keywords:** Yoga, Importance, Benefits

### Objectives of this Research Paper

1. To give introduction of Yoga.
2. To find out the importance of Yoga.
3. To Show the benefits of Yoga.

### Introduction

Yoga comes from the Sanskrit word, 'YUJ'. It means to join, connect or unite. It is the union of individual consciousness with universal consciousness. Yoga is 5000 years old Indian philosophy. It was first mentioned in the oldest sacred text – The Rig Veda (Vedas were a collection of texts containing mantras, spiritual information, songs and rituals to be used by Brahmins, the Vedic priests).

Yoga is being practiced in the Indian society since thousands of years. A person doing yoga will move from one posture to the other called Asana. Yoga benefits people who practice it regularly. The form of exercises performed in Yoga is called as 'Asana' which are capable of bringing about stability of body and mind. Yoga Asana are the simplest and easiest way to reduce our excess weight and keep fit.

People have learned about the merits of Yoga and have accepted it in the form of exercise and meditation. Basically Yoga is not only a form of exercise but it is an ancient wisdom for healthier, happier and peaceful way of living. It helps in finding inner peace and leads to union with self.

People generally think that yoga is a form of exercise that includes stretching and folding of body part but Yoga is much more than just exercise. Yoga is a way of life or Art of living through mental, spiritual and physical path. It allows to achieve stillness and to tap into the consciousness of inner self. It also helps in learning how to rise above the pull of mind, emotions and lower bodily needs and face challenges of day to day life. Yoga works on the level of one's body, mind and energy. Regular practice of yoga brings positive changes in the practitioner strong muscles, flexibility, patience and good health. Yoga aids in controlling a person's body, mind and soul. It brings the physical and mental discipline together to soothe the body and mind. It also aids in managing stress and anxiety and keeps you relaxed. Yoga asana are known to develop vigor, flexibility and confidence.

### Importance and Benefits of Yoga

Yoga is a practice that works on eight levels of development in the areas of mental, physical, spiritual and social health. When the physical health is intact, the mind is clear and focused and there is no more. The main goals of yoga include:

- Physical Health
- Mental Health
- Spiritual Health
- Self-Realization
- Social Health

Yoga is an art which connects our body, mind and soul together and makes us strong and peaceful. Yoga is necessary because it keeps us fit, helps burst stress and maintains out overall health. A healthy mind can concentrate well and do everything. Yoga is important because by practicing Yoga you are being benefited on the following points:

**Inner Peace** – Yoga helps achieve inner peace and fight against stress and other problems. Yoga increases the peace level in an individual and makes him become more joyful resulting in more confidence.

**Healthy** – A healthy person can achieve and do more work than an unhealthy person. Life nowadays is very stressful and there is lot of pollution around us. This is a cause of numerous health issues. Just 10-20 minutes of yoga each day can help regain your health. Better health means better life.

**Activeness** – People nowadays feel lazy, tired or sleepy. Due to which they miss out most of the fun in life and are not able to complete their work correctly. Being active keeps you aware of the things happening around you and also helps you complete your work more efficiently and quickly. And one way to achieve this is by practicing yoga regularly.

**Flexibility** – People nowadays suffer from joint pains, face difficulties while bending or touching their toes. Regular practice of yoga helps in relieving these pains. The effect can be seen in few days of practicing.

**Increase Blood Flow** – Yoga helps make your heart healthy and makes it work more efficiently by increasing blood flow in your body and veins. It helps in keeping your body oxygenated.

**Power to Concentrate** – Yoga helps your body to calm down and relax which means there is less stress and one can concentrate and focus quickly on his work. That is why children and teenagers are encouraged to do yoga because it helps them concentrate better on their studies.

#### There are also few benefits which is given below

- Improves flexibility of muscles
- Corrects the posture and alignment of the body
- Renders better digestive system
- Strengthens internal organs
- Cures asthma
- Cures diabetes
- Helps in curing heart related problems
- Helps in skin glow
- Promotes strength and stamina
- Tones internal organs
- Improves concentration
- Helps in mind and thought control
- Keeps mind calm by overcoming anxiety, stress and depression
- Helps in releasing tension
- Helps in blood circulation and muscle relaxation
- Weight reduction
- Protection from injury

These are among the numerous benefits of yoga. Yoga focuses on your natural tendency towards mental as well physical health. One of the main benefits of practicing yoga is that it helps manage stress. Stress is common these days and is known to have devastating effects on one's body and mind. Due to stress people develop serious problems like sleeping disorder, neck pain, back pain, headaches, rapid heart rate, sweaty palms, dissatisfaction, anger, insomnia and inability to concentrate. Yoga is known to be really effective in curing these kinds of problems over a period of time. It helps a person in managing stress by meditation and breathing exercise and improves a person's mental well-being. Regular practice creates mental clarity and calmness thereby relaxing the mind.

#### Conclusion

Yoga is a very useful practice which is easy to do and helps in getting rid of certain serious health problems that are common in today's life style. Thus, yoga is a miracle and once followed, it will guide you the whole life. 20-30 minutes of Yoga per day can change everybody's life in the long run by promoting a balance between physical, mental and spiritual health.

## यवतमाळ जिल्ह्यातील किशोर वयोगटाच्या लिंगगुणोत्तराचा भौगोलिक अभ्यास

प्रा. डॉ. कल्पना देशमुख

भूगोल विभाग प्रमुखए बाबाजी दाते कला आणि वाणिज्य महाविद्यालय, यवतमाळ

## सारांश

लोकसंख्येचा आकार हे एक संसाधन आहे जगाची लोकसंख्या दिवसेंदिवस वाढत असतांनाच चीन पाठोपाठ भारत हा लोकसंख्येत बराच पुढे आहे. प्राप्त संसाधने आणि वाढती लोकसंख्या यांचे असंतुलन निर्माण होऊन भारताची लोकसंख्या वाढ, लोकसंख्या विस्फोटाकडे झुकू लागली आहे. तद्वतच जागतीक लोकसंख्येत स्त्रियांच्या लोकसंख्येपेक्षा पुरुषांच्या लोकसंख्येचे प्रमाण जास्त आहे. भारताचे हे लिंगगुणोत्तर तपासतांना दर एक हजार पुरुषांमागे स्त्रियांचे प्रमाण किती? हे सांगण्याची प्रथा आहे. फार पूर्वी स्त्री-पुरुष लिंगप्रमाण भारतात अतिशय कमी असायचे. दर हजार पुरुषांमागे स्त्रियांची संख्या फार कमी येत असते. आज भारताच्या विकसनशील अवस्थेत प्रत्येक क्षेत्रात स्त्रियांना मिळणाऱ्या शिक्षणाच्या व नोकऱ्यांच्या संधी आणि वाढता साक्षरता दर यामुळे भारतातील हे प्रमाण हळूहळू वाढून आज दर हजार पुरुषांमागे स्त्रियांची संख्या वाढली आहे. यावर किशोरवयीन लोकसंख्येच्या लिंगगुणोत्तराचा विशेष परीणाम होतो. म्हणून यवतमाळ जिल्ह्यातील हे प्रमाण कसे आहे हे या शोध निबंधात अभ्यासला आहे.

**बिजसंज्ञा** – लिंगगुणोत्तर, किशोरवयीन लोकसंख्या, किशोर वयोगट, ग्रामीण, शहरी.

## प्रस्तावना

देशाच्या अथवा प्रदेशाच्या विकासात लोकसंख्या हा घटक ज्या प्रमाणे महत्वाचा आहे. त्याच बरोबर एकूण लोकसंख्येत स्त्रियांचे व पुरुषांचे प्रमाण हा विषय सुद्धा महत्वाचा आहे. लोकसंख्या हे एक संसाधन असल्याने एकूण लोकसंख्येत कार्यकारी लोकसंख्या प्रमाणवर तो देश- प्रदेश विकसित, विकसनशील किंवा अविकसित हे ठरविल्या जाते. साधारणतः ज्या देशाची – प्रदेशाची कार्यकारी लोकसंख्या जास्त तो विकसनशील किंवा विकसित प्रदेशात मोडतो. या दृष्टिने लोकसंख्येतील किशोर वयोगटातील लोकसंख्या महत्वाची ठरते. सर्वसाधारणपणे किशोरवयोगटाची लोकसंख्या ही कार्यकारी लोकसंख्येवर परिणाम करते. म्हणूनच प्रस्तुत शोध निबंधात यवतमाळ जिल्ह्याच्या लोकसंख्येत किशोरवयीन लोकसंख्येचे लिंगगुणोत्तर अभ्यासण्याचा प्रयत्न केला आहे.

## उद्दिष्टे

- १) दर १००० पुरुष किशोर लोकसंख्येमागे स्त्री किशोर लोकसंख्येचे प्रमाण अभ्यासणे.
- २) किशोर वयोगटाचे ग्रामीण व शहरी भागातील लिंगगुणोत्तर अभ्यासणे.
- ३) किशोरवयोगटातील लिंगगुणोत्तराचे जिल्ह्यातील प्रादेशिक वितरण अभ्यासणे.

## अभ्यासपद्धती व अभ्यासक्षेत्र

प्रस्तुत शोधनिबंधाकरिता पूर्णतः दुय्यम स्वरूपाच्या आकडेवारीचा उपयोग केला आहे. ही आकडेवारी जिल्हा आर्थिक व सामाजिक समालोचन तसेच यवतमाळ जिल्हा गॅझेटियर यामधून प्राप्त केली आहे. आकडेवारीचे विश्लेषण करण्याकरीता सांख्यिकीय पद्धतीचा अवलंब करून सारणीयन व नकाशापद्धतीने स्पष्टीकरण केले आहे.

अभ्यासाला घेतलेला प्रदेश पूर्व महाराष्ट्राच्या पश्चिम विदर्भात येत असून यात अमरावती, अकोला, यवतमाळ, बुलढाणा व वाशिम या पाच जिल्ह्यांचा समावेश होतो. यवतमाळ जिल्ह्याचा अक्षवृत्तीय विस्तार १९०-२६' ते २००-४२' उत्तर अक्षवृत्ते असून रेखावृत्तीय विस्तार ७७०-१८' ते ७९०-९' पूर्व रेखावृत्ते असा आहे. यवतमाळ जिल्ह्याचे क्षेत्रफळ १३५१९ चौ. कि.मी. आहे. जिल्ह्यात एकूण सोळा तालुके येतात व पश्चिम विदर्भाचे विभागीय कार्यालय अमरावती येथे आहे. यवतमाळ जिल्ह्याच्या उत्तर सीमेला वाशिम आणि अमरावती हे जिल्हे आहेत. पश्चिम सीमेला परभणी जिल्हा असून पूर्व सीमेला अकोला जिल्हा येतो. यवतमाळच्या दक्षिणेस नांदेड व अदिलाबाद जिल्ह्याच्या सीमा येतात. जिल्ह्याची उत्तर सीमा वर्धा नदीने व दक्षिण सीमा पैनगंगा नदीने निर्धारित केली आहे.

नकाशा क्र. १ स्थानदर्शक नकाशा

## विषय विवेचन

लोकसंख्येच्या आकाराबरोबरच लोकसंख्येची व्याप्ती व गुणवत्ता महत्वाची असते. लोकसंख्येच्या गुणवत्ते लोकसंख्येशी संबंधीत सर्व पैलूंचा समावेश होतो. जन्म-मृत्यू प्रमाण, स्थलांतर, लिंगगुणोत्तर प्रमाण, व्यावसायिक, धार्मिक, आर्थिक घटक इ.

एकूण लोकसंख्येतील ग्रामीण व शहरी भागातील लोकसंख्येचे लिंगगुणोत्तर व तसेच किशोरवयीन गटाचे लिंगगुणोत्तर महत्वाचे ठरते. यवतमाळ जिल्ह्यातील एकूण लोकसंख्येत किशोरवयीन गटाचे लिंगगुणोत्तर अभ्यासतांना पुढील बाबी स्पष्ट होतात. किशोरवयीन गटाचे लिंगगुणोत्तर काढण्यासाठी पुढील सूत्राचा अवलंब केला आहे.

किशोरवयीन गटाचे लिंगगुणोत्तर =  $\frac{\text{किशोरवययोगटातील स्त्रीसंख्या}}{\text{किशोरवययोगटातील पुरुष संख्या}} \times 1000$

किशोरवयोगाचे लिंगगुणोत्तर काढतांना वरील सूत्रानुसार वय वर्ष ० ते ६ या वयोगटाची लोकसंख्या विचारात घेतली आहे. सारणी क्र. १ मध्ये यवतमाळ जिल्ह्याच्या सोळा तालुक्यातील लिंगगुणोत्तर काढण्यात आले आहे.

### किशोरवयोगटाचे लिंगगुणोत्तर

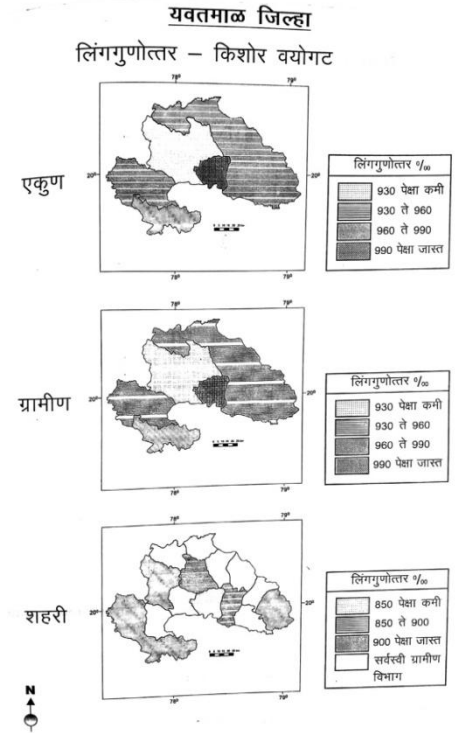

एकूण	ग्रामीण	शहरी

### किशोरवयोगटातील लोकसंख्ये लिंगगुणोत्तर (वयोगट ० ते ६ वर्षे)

सारणी क्र.१ प्रमाणे यवतमाळ जिल्ह्यातील ० ते ६ वर्षे वयोगटातील दर एक हजार मुलांमागे मुलींचे प्रमाण दिलेले आहे. घाटंजी तालुक्यात दर हजार मुलांमागे मुलींचे प्रमाण सर्वात जास्त म्हणजे मुलांपेक्षाही जास्त आहे. ते १०३८ इतके आहे. तर दर हजार बालकांमध्ये मुलींचे प्रमाण अर्थात कमी यवतमाळ तालुक्यात ९०९ इतके आहे. उर्वरित तहसीलीमध्ये केवळ उमरखेड तालुक्यात दर हजार बालकांमध्ये मुलींचे प्रमाण ९५० च्यावर म्हणजे ९६० आहे. तर इतर सर्व तालुक्याचे हे लिंगगुणोत्तर ९५० पेक्षा कमी आहे. या शिवाय नेर (९४३), बाभूळगांव (९४७), कळंब (९४९), दारव्हा (९४२), दिग्रस (९२१), पुसद (९३५), महागांव (९४२), पांढरकवडा (९४७), राळेगांव (९४५), मारेगांव (९४७), झरीजामणी ९९३४ व वणी (९३५) असे आहे.

नकाशा क्र. २ मध्ये यवतमाळ जिल्ह्यातील बालकांच्या (वय वर्षे ० ते ६) एकूण ग्रामीण व शहरी लोकसंख्येचे लिंगप्रमाण दाखविलेले आहे. यवतमाळ जिल्ह्यात यवतमाळ, आर्णी आणि दिग्रस या तीन तहसीलीमध्ये दर एक हजार पुरुष बालकांमागे स्त्री बालकांचे प्रमाण सर्वात कमी आहे. ते ९३० पेक्षा कमी येते. तसेच पुसद, महागांव, दारव्हा, नेर, बाभूळगांव, कळंब, राळेगांव, मारेगांव, पांढरकवडा, झरीजामणी, आर्णी, वणी या सोळापैकी ११ तालुक्यांमध्ये म्हणजे जिल्ह्याच्या जास्तीत जास्त भागात बालकांचे लिंग प्रमाण दरहजारी ९३० ते ९६० च्या दरम्यान आहे. तर उमरखेड तालुक्यांमध्ये हे प्रमाण ९६० ते ९९० असून केवळ घाटंजी तहसिलमध्ये दर हजार पुरुष बालकांमागे स्त्री बालकांचे प्रमाण जिल्ह्यात सर्वात जास्त, ९९० इतके आहे.

udk'kk Ø- 2

यवतमाळ जिल्ह्यातील ग्रामीण भागात दर हजार मुलांमागे मुलींचे प्रमाण घाटंजी तालुक्यात मुलांपेक्षा अधिक म्हणजे १०७५ इतके आहे. तर सर्वात कमी प्रमाण ९२३ यवतमाळ तालुक्यात आहे. उमरखेड तालुक्यामध्ये (९६४) आणि पांढरकवडा तालुक्यामध्ये (९५८) ० ते ६ वर्षे वयोगटातील बालकांचे लिंगगुणोत्तर ९५० पेक्षा अधिक आहे. उर्वरित तहसिलीमध्ये हे लिंगप्रमाण ९५० पेक्षा कमी आहे. ते नेर (९४३), बाभूळगांव (९४७), कळंब (९४४), दारव्हा (९४७), पुसद (९३६), महागांव (९४२), आर्णी (९२९), राळेगांव (९४५), मारेगांव (९४७), झरी जामणी (९३४) व वणी (९३५) इतके आहे. सारणी क्र. १ मध्ये हे दर्शविले आहे.

यवतमाळ जिल्ह्यातील ग्रामीण लोकसंख्येत दर हजार पुरुष बालकांमध्ये स्त्री बालकांचे प्रमाण किती आहे हे नकाशा क्र. २ मध्ये दर्शविले आहे. यवतमाळ जिल्ह्यातील हे लिंगप्रमाण सर्वाधिक म्हणजे ९९० पेक्षाही अधिक आहे असे घाटंजी तहसिलमध्ये आहे तर उमरखेड तहसिलमध्ये हे बालकांचे लिंगप्रमाण ९६० ते ९९० इतके आहे. आर्णी, दिग्रस, आणि यवतमाळ या तीन तहसिलीमध्ये ग्रामीण भागात बालकांचे लिंगप्रमाण दर हजारी सर्वात कमी ९३० पेक्षा कमी असून उर्वरित सर्व तहसिलींचा बालकांचा लिंगदर हा दर हजारी ९३० ते ९६० इतका आहे.

यवतमाळ जिल्ह्यातील नेर, बाभूळगांव, कळंब, महागांव, आर्णी, राळेगांव, मारेगांव, आणि झरी जामणी या तहसिलींचा समावेश ग्रामीण विभागात होतो उर्वरित शहरी विभागातील तहसिलीमध्ये वय वर्षे ० ते ६ वयोगटातील दर हजार मुलांमागे मुलींचे प्रमाण उमरखेड तालुक्यात सर्वाधिक म्हणजे ९४१ इतके आहे तर यवतमाळ (८९३), घाटंजी (८२४) आणि केळापूर (८९६) येथे हे लिंगप्रमाण ९०० पेक्षाही कमी आहे तर दारव्हा (९२९), दिग्रस (९०७), पुसद (९३१) आणि वणी (९३६) येथे हे लिंग प्रमाण ९०० ते ९५० च्या दरम्यान आहे. सारणी क्र. १ मधून ही बाब अधिक स्पष्ट होते.

नकाशा क्र. २ मध्ये यवतमाळ जिल्ह्याचे शहरी लोकसंख्येत बालकांचे वय वर्षे ० ते ७) लिंगप्रमाण दाखविले आहे. यवतमाळ जिल्ह्यातील शहरी विभागात येणाऱ्या ८ तहसिलांमध्ये घाटंजी येथे बालकांचे लिंगप्रमाण दर हजारी ८५० पेक्षा कमी म्हणजे सर्वात कमी असून यवतमाळ व पांढरकवडा येथे हे प्रमाण मध्यम स्वरूपाचे म्हणजे ८५० ते ९०० आहे तर उर्वरित उमरखेड, पुसद, दिग्रस, दारव्हा आणि वणी या तहसिलीमध्ये शहरी लोकसंख्येतील बालकांचे लिंगप्रमाण दर हजारी सर्वात जास्त ९०० पेक्षा सुद्धा जास्त आहे.

### निष्कर्ष

- १)यवतमाळ जिल्ह्यात किशोरवयोगटातील लिंगगुणोत्तर घाटंजी तालुक्यात सर्वात जास्त आहे.
- २)यवतमाळ तालुक्याचे लिंगगुणोत्तर संबंध जिल्ह्यात सर्वात कमी आहे. कारण हा शहरी भाग असल्याने पुरुष नोकरी व व्यवसायानिमित्त शहरातून राहतात स्त्रिया व मुले मात्र गावाकडे वास्तव्य करतात.
- ३)इतर तालुक्याचे किशोरवयोगटाचे लिंगगुणोत्तर ९३० ते ९४५ च्या दरम्यान आहे.
- ४)किशोर वयोगटाचे एकूण लिंगगुणोत्तर व ग्रामीण भागातील लिंगगुणोत्तर यांच्यात पूर्ण साम्य आहे. तर यवतमाळ तालुका व बाजुचे प्रदेश येथे हे लिंगगुणोत्तर कमी असलेले दिसते.

**Indian Sports Policies And Olympic Performance****Prof. Atul Pande**

Govindrao Pawar Shararik Shikshan Mahavidyalay Kalam, Dist Yavatmal

**Abstract**

*The objective of sports polices is to ensure that people have access to brod range local sports activities , whether organized by membership by sports club or independently the value and the effect of playing sports is the primary reason why the sports providing funding for sporting activities. The primary objective of this paper is to analyse the Olympic dataset using python to compare overall performance of countries and to evaluate the contribution of each country in Olympics. These analyses will give deeper insight into the performance of countries in Olympics over the years and helps sports persons to quickly analyse their own and the competitor's performance.*

**Introduction**

To live a healthy lifestyle the World Health Organization recommends 30 minutes daily practice of sports five times a week. This ambitious recommendation comes along with the fact that developed countries in Northern America and Europe but also emerging economies like China are facing problems of widespread obesity among citizens, especially among kids. This has dramatic consequences both for individual and public health. In modern welfare states (un)healthy behavior directly links to the level public health care expenditures: Obesity among community members today means increasing expenditures to cure unhealthy lifestyle tomorrow. Society has a stake in healthy citizens; so public sport agencies administer a wide range of sport and recreation services (SRS). Such health promotion policies (Kokko et al. 2009, p. 5) are also labeled mass sports policy, amateur sports policy, or health enhancing physical activities.

**Sports Policies**

Governments across the globe use sport organizations as a vehicle to achieve non-sporting objectives, and a wide range of health objectives. Sporting organizations have been required to address new policy issues like creating social capital, improving health, job creation and stimulation of tourism. Sport policies in the English speaking countries Australia, New Zealand, England, and the United states (Casey et al. 2011), but also in Continental Europe are based on the notion that participation in mass sports contributes to social cohesion, social connectedness and community wellbeing.

**Models Of Service Delivery**

Delivering sports-for-all-policy involves three types of sporting organizations and agencies; each of them pursuing different missions, goals and activities (Table 2). Public sports agencies set the broad policy goals, and develop related strategies. They allocate public funds to sport governing bodies and sport providing entities. Public funding comes from the regular budget; some revenues are generated via public gambling companies. England, Germany, and Norway (since 1948) are partly relying on publicly owned gambling companies to allocate fiscal resources to selected sport programs. Public sports agencies finally oversee traditional sport-for-all-activities and implement health enhancing physical activities (HEPA), modern life-style physical activities, special exercise programs and related health promotion policies respectively. Sport governing bodies govern one or more sport discipline in a country; examples include SportEngland, SportUk, the Landessportclub Nordrhein-Westfalen, or the Norwegian Olympic Committee. Another function of sport governing bodies is to distribute public funds to regional and local sport clubs to finance concrete sporting activities; they usually keep a share of public funding for their own administrative purposes. That means that both sport governing bodies and local sport clubs are paid for implementing mass sports policies. Sport providing entities encompass local and regional sports clubs, and community centers. Regional and local sport clubs are the „backbone of European sports movement” (Kokko et al, p. 5), since their role is to implement sports for all policies by running concrete sport programs “on the ground.

**Policy Goal Ambiguity And Complexity**

Fourth modern public sport agencies face multiple, ambiguous, complex, and sometimes contradictory agency goals. The traditional function of sport-for-all policies has been providing 7 easy access to sport facilities. To varying degrees policy goals for mass sports in Northern America, Australia and Europe now also include.

**Olympics**

The Olympic Games are international sports events with more than 200 nations participating in various competitions. The Sports persons from various countries participate in competitions and make their countries proud of their excellence in sports. Despite massive population, many most populous countries fail to grab many medals at the Olympic games. The primary objective of this paper is to analyse the Olympic dataset using

python to compare overall performance of countries and to evaluate the contribution of each country in Olympics. These analyses will give deeper insight into the performance of countries in Olympics over the years and helps sports persons to quickly analyse their own and the competitor's performance. In this paper, the exploratory data analysis techniques are used to provide comparison between performance of various countries and the contribution of each country in Olympics. Visualization of Olympics dataset in many aspects provides the status of countries in Olympics and helps countries with poor performance to produce quality players and improve nation's performance in Olympics.

Olympics is considered as most important event worldwide, which provides common platform to players from various nations to show their talents. Olympics has been started at 1896, which is being conducted once in every four years.

### Conclusion

The role of policies development in sporting or recreation organization is to guide the action of all the person involved in organization in regard to area of activity in which organization jurisdiction. policies are guidelines for directors and committee members.

## उच्च शिक्षणातील उदयोन्मुख व अभिनव कल एक अंतर्विषयक दृष्टिकोन

डॉ. पुनम विवेक राणे

चैतन्य कॉलनी, प्लॉट नं. १०८, जुना बायपास रोड, अमरावती

### समस्या

भांडवलशाहीस अनुकूल असे शिक्षणाचे खाजगीकरण

पारिभाषिक शब्दांच्या व्याख्या -

अ) भांडवलशाही - भांडवलशाही हा अर्थव्यवस्थेचा एक प्रकार आहे. अर्थव्यवस्थेच्या या प्रकारात उत्पादन साधनांची मालकी व व्यवस्थापन हे खाजगी असते. कमाल नफा मिळविणे हा उत्पादकाचा हेतू असतो.

ब) शिक्षण - शिक्षण म्हणजे मनुष्याच्या आंतरिक क्षमतांचा आध्यात्मिक साक्षात्कार व विकास होय. - डॉ. ए.पी.जे. कलाम

### कार्यपध्दती

भूतकाळातील सामाजिक शक्ती व घटना ह्यांचे प्रभावी रूपांतर होत असते. या रूपांतरणामुळे वर्तमानकाळातील परिस्थितीचा आकृतीबंध तयार होत असतो. वर्तमानातील परिस्थितीच्या कारणांचा भूतकाळाशी असलेला संबंध शोधण्याकरिता ऐतिहासिक संशोधन पध्दतीचा वापर होत असतो. यानुसार प्रस्तुत संशोधनात आपल्या देशातील एकंदरीत परिस्थितीचा अभ्यास करून शिक्षणाच्या खाजगीकरणात कोणत्या बाबी कारणीभूत ठरल्या? याचा ऐतिहासिक विश्लेषण पध्दतीने अभ्यास करण्यात आला आहे.

### गृहितके

गृहित धरलेल्या गोष्टींना गृहितके म्हटल्या जाते. संशोधनाविषयी तात्कालिन गृहित धरलेले पूर्वानुमान म्हणजेच गृहितके सामाजिक संशोधनात सामाजिक घटनेचे शास्त्रीय पध्दतीने अध्ययन करण्यात येते. यानुसार प्रस्तुत संशोधनात खालील काही गृहितकांचा विचार करण्यात आला आहे.

अ) शासनाची जबाबदारी व गुंतवणूक कमी करण्यासाठी अनेक प्रकारच्या NGO ना शिक्षणात हस्तक्षेप करण्याची संधी दिली गेली. यामुळे त्यांच्या योजनाही स्विकारल्या लागल्या.

ब) शिक्षणसंस्था उत्पादक तर विद्यार्थी ग्राहक बनले.

क) जागतिकीकरणाची गरज म्हणून इंग्रजी माध्यमाच्या प्रसाराकरिता खाजगी संस्थांची संख्या वाढली.

ड) विकेंद्रीकरणाच्या नावाखाली व जनतेच्या सहभागाच्या गोड नावाखाली केंद्र व राज्य सरकारच्या जबाबदारीची कामे स्थानिक स्वराज्य संस्थांना सोपविण्यात आली.

ई) उच्च शिक्षण क्षेत्रात दिसणाऱ्या समस्या या वेगवेगळ्या वाटत असल्या तरी त्यापैकी जास्तीत जास्त समस्या ह्या शिक्षणाच्या खाजगीकरणाचे परिणाम आहेत.

### परिकल्पना

प्रस्तुत संशोधनासाठी पुढील परिकल्पना निश्चित करण्यात आल्या आहेत.

१) शैक्षणिक विषमता निर्माण होण्यास खाजगीकरणाचे धोरण जबाबदार राहिल.

२) खाजगी शिक्षणातील नफेखोर प्रवृत्तीमुळे दर्जेदार शिक्षण हे सर्वसामान्य जनतेच्या आवाक्याबाहेर जाऊ शकते.

### प्रस्तावना

कुछ लोक अमिरी को सलाम करते है।

कुछ लोग गरिबी के गुलाम होते है।

आवाज बडे नोट नही।

छोटे सिक्के किया करते है।

इसलिए जीनकी फी भरने की हैसीयत नही।

वो गरिब बच्चे सरकारी स्कूलो मे दाखिला लिया करते है।

अशीच काहीशी अवस्था शिक्षण पध्दतीची दिसून येते. आधुनिक युगात सन्मानाने जगण्याचा हक्क शिक्षणाशिवाय मिळूच भाकत नाही. खाजगीकरणाच्या चक्रात सामान्य माणसाचा हाच हक्क आज संकटमय होत आहे. प्राथमिक शिक्षणापासून तर उच्च शिक्षणापर्यंत सर्वत्र खाजगीकरणाचे राज्य वाढत आहे. यामुळेच समाजात शिक्षणक्षेत्रात भयावह विशमता

निर्माण झाली आहे. ही सामाजिक विशमता कायम राहावी अशीच शिक्षणव्यवस्था वाढविली जात आहे. त्यामुळे दर्जेदार शिक्षण हे सर्वसामान्य जनतेच्या अवाक्याबाहेरचे होऊन बसले आहे. भारत जगातील चौथ्या क्रमांकाची अर्थव्यवस्था असताना भारतीय जनतेच्या शिक्षणासारख्या मूलभूत गरजांसाठी पुरेसा निधी उपलब्ध होत नाही, ही फार मोठी भोकांतीका आहे. खर्च भारतात एवढी गरीब होता व आहे का? एकीकडे भारतातील मोठमोठे उद्योगपती, प्रसारमाध्यमे, राजकरणी, प्रशासन व त्यांचे प्रशंसक एकत्र येऊन भारताला ज्ञानाची महासत्ता बनविण्याच्या गोष्टी करतात. परंतु जर डोळे उघडे ठेवून विचार केला तर भारतीय शिक्षणपध्दतीची घोर अंधाराकडे वाटचाल सुरू आहे हे निश्चितच लक्षात येते. सरकारी शिक्षण ठप्प पडण्याच्या मार्गावर आहे तर खाजगी शिक्षण परवडण्यासारखे नाही. या कात्रीत भारतातील पिढ्या सापडत आहे. भारताला या विशमतेच्या खोल दरीत ढकलणाऱ्या धोरणांना त्वरीत थांबविले नाही तर भारत पुन्हा एकदा मोठया संकटात सापडल्याशिवाय राहणार नाही. भारतातील शैक्षणिक विषमतेचे मूळ जाणून घेण्यासाठी त्यांचे ऐतिहासिक विश्लेषण करणे अत्यंत महत्त्वाचे आहे. कारण भांडवलशाही व खाजगीकरण यांची वाढ कशामुळे झाली हे जाणून घेण्यासाठी आवयकता आहे.

## विषय प्रतिपादन

इस १८५१ साली म. फुले यांनी पुण्यात अस्पृश्यांसाठी भाळा काढली. महर्षी कर्व्यांनी हिंगण्यात मुलींसाठी शाळा काढली. छत्रपती भाहू महाराज आणि सयाजी महाराज यांनी सर्वांसाठी शिक्षण उपलब्ध व्हावे याचा आग्रह धरला. अशा अनेक प्रयत्नांमुळेच एकोणिसाव्या भातकात भारतीयांना आधुनिक शिक्षणाचे दार खुले झाले. इंग्रजी राजवटीची गरज म्हणून इंग्रजांनी स्थानिक शिक्षित वर्ग निर्माण करायला सुरुवात केली. इंग्रजी राजवटीला टिकविण्यासाठी इंग्रजांनी गुलाम मानसिकतेचा प्रशासक, अधिकारी, नवाब व राजे यांचा दलाल वर्ग निर्माण केला. ज्या वर्गाने केवळ इंग्रजी शिक्षणाचे गोडवे गायले. स्वातंत्र्यापर्यंत हे सर्व असेच सुरू होते. स्वातंत्र्योत्तर काळात महात्मा गांधी यांनी 'नई तालीम', 'वर्धा शिक्षण पध्दती' आगळी वेगळी संकल्पना मांडली. परंतु स्वतंत्र भारताच्या शासक वर्गाला ते मंजूर नव्हते. त्यांनी आपल्या आर्थिक व राजकीय स्वार्थाकरिता मेकॉलेची शिक्षण पध्दतीच सुरू ठेवली.

इ. स. १९५०-१९६० या कालखंडात नेहरू सरकारने मिश्रअर्थव्यवस्थेच्या नावाखाली भांडवलशाहीचा देशातील मार्ग मोकळा केला. या कालखंडात सार्वत्रिक शिक्षणाकरिता मोठया प्रमाणात मोहीम हाती घ्यायला हवी होती. शिक्षणाचा पाया म्हणजे प्राथमिक शिक्षणाचा प्रामुख्याने विचार करणे व त्याच्या विकासाच्या योजना राबविणे गरजेचे होते. परंतु या काळात पूर्वप्राथमिक ते माध्यमिक शिक्षणाकडे उपेक्षेने पाहिल्या गेले. या काळात सर्वप्रथम पाया सोडून शिक्षणाचा कळस असणाऱ्या उच्च शिक्षणाचा प्रामुख्याने विकास करण्यात आला.

इस. १९६१ ते १९८६ या काळातील शिक्षणात आमूलाग्र बदल झाला. १९६५-६६ च्या कोठारी आयोगाने सर्वांगीण शिक्षणाचा अहवाल सादर केला. ज्यामध्ये समान शिक्षण, शेजार शाळा व कार्यानुभवाधारीत शिक्षणाचा पुरस्कार करण्यात आला होता. हा आयोग काही प्रमाणात अमलात आणल्या गेला तरी, देखील काही बाबी उपेक्षितच राहिल्या. इ. स. १९७० पासून जागतिक स्तरावरील भांडवलशाहीचा या कालखंडात मोठा परिणाम दिसून येतो. बहुराष्ट्रीय कंपन्यांच्या गरजेपेक्षा जास्त उत्पादनामुळे मोठया प्रमाणात मंदी आली. या मंदीच्या लाटेपासून सुटका करण्याकरिता स्टॉक मार्केट नावाचा सट्टा बाजार सुरू झाला. यातूनच या बहुराष्ट्रीय कंपन्यांनी भारतासारख्या बहुलोकसंख्येच्या देशात आपले पाय पसरविण्यास सुरुवात केली. इंग्रज देश सोडून गेले परंतु त्यांच्या लुटीची परंपरा मात्र कायमच राहिली.

इस. १९९१ च्या काळात खाजगीकरण, उदारीकरण व जागतिकीकरण (खाऊजा) धोरणांनी शिक्षणव्यवस्था चालवायला सुरुवात केली. याच काळात देशातील धनाढ्यांच्या चंगळवादी पणामुळे महागडया वस्तूंची आयात जास्त व इतर वस्तूंची निर्यात कमी या धोरणामुळे देशात चलन तुटवडा व कर्जफेडीचा प्रश्न निर्माण झाला. अशावेळी घात घालून बसलेल्या जागतिक बँक व आंतरराष्ट्रीय नाणेनिधी सारख्या संस्थांनी तारणहार कर्ज देऊन **Structural Adjustment Programme** यांच्या नावाखाली भारतावर स्वतःच्या काही अटी लादल्या या अटीनुसार शिक्षण आरोग्य व जनकल्याणाच्या योजनांवर शासकीय खर्च कमी करून या क्षेत्रात खाजगी गुंतवणूकीस मुक्त वाव दयावा असे ठरले. यालाच उदारमतवाद असे नाव दिले. म्हणजेच आता या काळापासून भारतात शिक्षणक्षेत्रात अगणवाडी ते उच्च शिक्षणापर्यंत खाजगीकरणाला उत्तेजन देऊन भोगवादी ग्राहक व गुलाम मानसिकतेचे कामगार निर्माण करण्याकडे वाटचाल सुरू झाली. इ.स. १९८५ पासूनच जागतिकीकरण, नवउदारमतवाद यांच्या नावाखाली भांडवलशाहीला अनुकूल अशी भौक्षणिक धोरणे व योजना भारतासारख्या तिसऱ्या जगातील देशात लागू करण्यात आल्या.

आज मोठया प्रमाणात प्राथमिक शिक्षणाची आबाळ दिसून येते. यामध्ये शैक्षणिक सत्राच्या मध्ये शिक्षक बदल्याचे काहूर उठविणे, कमी पटाच्या १३१४ भाळा बंद करणे भा. पो. आ. मोहीम सक्तीची करणे पण कित्येक महिने मानधन न देणे, शिष्यवृत्त्या फॉर्म ऑनलाईन भरून घेणे, पण पैसा जमा न करणे, अर्धपगारी अथवा मानधनावर शिक्षकांच्या नेमणूका

करणे, भरती प्रक्रिया न राबविणे अशा कित्येक बाबींमुळे आज सरकारी भाळांची गुणवत्ता कमी झाली आहे. शिक्षकांना जनगणना, निवडणूका, रूबेला, वृक्षारोपण ऑनलाईन कामात जुंपणे अशा कितीतरी बाबींमुळे सरकारी भाळांच्या शिक्षकांना विद्यार्थ्यांच्या शिक्षणाला न्याय देता येत नाही. सरकारी भाळांची गुणवत्ता एवढी कमी करण्यात आली की गरीब लोकही आपल्या पाल्यांना भासकीय भाळेत प्रवेश देऊ इच्छित नाहीत. नॅशनल सॅम्पल सर्वेनुसार कमी उत्पन्नाची कुटूंबेही पोटाळा चिमटा घेऊन आपल्या मुलांना महागड्या फीच्या खाजगी भाळेत पाठवत आहेत. शिक्षकांना वेगवेगळ्या प्रकारच्या प्रशिक्षणात व कामात जुंपून भासकीय भाळांचा दर्जा मुद्दाम खालविण्यात येत आहे. तर दुसरीकडे खाजगी भाळांवर देखरेख करणारे कायदे रद्द करण्यात येत आहे. दुसरीकडे खाजगी भाळांची लॉबी भासनावर दबावतंत्र वापरून मनमानेल त्या पध्दतीने फी संबंधी कायदे करून पालकांना लुटण्यास काही कसर सोडत नाहीत.

इयत्ता आठवी पर्यंत कोणत्याही बालकाला नापास करण्यात येणार नाही. यामुळे मुलांवरील परिक्षेचा मानसिक ताण नाहीसा होईल असे सांगण्यात आले. पण खरंच शिक्षणाचे उद्दिष्टे फक्त मुलांना वर्शागणिक पुढल्या वर्गात ढकलणे एवढाच आहे का? आठवीनंतर अशी मुले अनेक समस्यांनी ग्रासलेली दिसतात. मानधनावर किंवा तुटपुंज्या अनुदानावर एकाच खोलीत अनेक वर्ग चालविण्याच्या सरकारी शाळांमध्ये जिथे शिक्षण देखील तुटपुंज्या सुविधांवर चालणारी बाब आहे अशा शाळांमध्ये नापास न करण्याचा निर्णय म्हणजे आजच्या शिक्षणव्यवस्थेचा नाकर्तेपणा लपविण्याचे साधन होय.

असे म्हटल्या जाते की सरकारी भाळा ह्या एकदमच कुचकामी असून आता त्या बंद केल्या पाहिजे. पण यामागची कारणे शोधली असता असे लक्षात येते की, सरकारी शाळांची दुरावस्था होण्याचे कारण जनविरोधी धोरणांचा आणि बाजारीकरणाचा गेल्या काही दशकांतील परिणाम होय. दिवसेंदिवस भासन शिक्षणावरचा खर्च कमी करत आहे जे सरकार शिक्षणावर होणाऱ्या एकुण खर्चाच्या १०० टक्के पैकी ९९ टक्के पैसा स्वतः खर्च करते तेव्हा उरलेल्या १ टक्क्याकरिता जागतिक बँकेसमोर हात पसरविण्याची गरज काय? याचे कारण म्हणजेच जागतिक भांडवलदारांच्या दबावाखाली भारत सरकारची भासकीय धोरणे ही संपूर्ण शिक्षणाच्या बाजारीकरणाकडे वळत आहे. अमेरिकन भास्त्रज्ञ व नोबेल पारितोषिक विजेते डॉ. थिओडोर भुल्ल्ज यांनी सर्वप्रथम मानवी भांडवलातील गुंतवणूक (Investment in human capital) ही संकल्पना वापरली आणि मानवी श्रमाला 'मानवी भांडवल' ही संकल्पना अस्तित्वात आणली.

इ.स. १९८६ मध्ये केंद्र सरकारने नवीन शैक्षणिक धोरण जाहीर केले. या नवीन शैक्षणिक धोरणाचा भाग म्हणजे शिक्षण क्षेत्रातील खाजगीकरण प्रक्रियेला चालना देणे होय. इस १९९१ च्या जागतिकीकरण, शिथिलीकरण आणि खाजगीकरण यावर आधारलेल्या नव्या आर्थिक धोरणांचा परिणाम म्हणून तांत्रिकी, वैद्यकीय, व्यावसायिक अशा उच्च शिक्षणाच्या सर्व स्तरावर विना-अनुदान तत्वावर अनेक महाविद्यालये जन्माला आली. उच्च शिक्षणाचे जवळजवळ संपूर्ण खाजगीकरण झाले. ही प्रक्रिया प्रामुख्याने तंत्र, वैद्यकीय व व्यवस्थापन या क्षेत्रात प्रामुख्याने झाल्याचे दिसून येते. विनाअनुदानित संस्थामुळे उच्च शिक्षणाचा प्रसार झाला परंतु त्याचबरोबर अशा विनाअनुदानातील संस्थांमध्ये प्रत्यक्ष खर्चपेक्षा कितीतरी अधिक प्रमाणात फी आकारण्यात आली. यामुळे गरीब तर सोडूनच दया पण मध्यमवर्गीय विद्यार्थ्यांनाही हे परवडण्यासारखे नव्हते. अंतिम: उच्च शिक्षण ही फक्त धनिक वर्गाची मक्तेदारी होऊन बसली.

विद्यापीठे व महाविद्यालये अशी स्थाने असावी जिथे शिक्षक व विद्यार्थी समाजाच्या वतीने समाजासाठी एकत्र काम करणारी असावीत. भांडवली विचारसरणीपासून मुक्त, धर्म, जात, वर्ण या भेदांच्या पलीकडे जाऊन समाजाच्या सर्वांगीण प्रगतीकरीता कार्यरत असावीत. उच्च शिक्षणाचे क्षेत्र हे समाजाच्या बौद्धिक स्वातंत्र्यासाठी आवश्यक आहे. उच्च शिक्षण हे समाजाला पुढे नेणाऱ्या नवनवीन युक्त्यांचे सृजन करणारे क्षेत्र असावे नाहीतर तंत्रज्ञ, वैज्ञानिक, शिक्षक असे विशिष्ट विचारसरणीचे लोक निर्माण होतात. भांडवलशाहीच्या या जगात माणूसही मग भावन शून्य होऊन मशीनसारखा वागू लागतो जे एक प्रकारच्या गुलामगिरीचे प्रतिबिंब होय.

आज उच्च शिक्षणात स्पर्धा, व्यापार व फसवणूक यांचे स्वरूप दिसून येते. घोकंपट्टी, महागडे कोचिंग क्लास, प्रवेशपरिक्षेचे अग्निदिव्य, लाखो रूपयांची मेडीकल इंजिनअरिंग व व्यवस्थापनाची फी याची झळ संपूर्ण समाजाला जाणवत आहे. व्यवस्थेने मान्यता दिलेले मेरिट असो वा नसो कॉर्पिटेशन फी देण्याची ऐपत असेल तर प्रवेश नक्की एवढे पैसे दिल्यावरही शिक्षण दर्जेदार मिळेल याची शाश्वती नसते. यामुळेच मग महागड्या खाजगी शिकवण्या लावाव्या लागतात. त्यामुळे खाजगी शिकवण्याही जोरदार भरमसाठ पैसे घेऊन चालू आहेत. एवढे दिव्य करूनही मग रोजगार मिळेलच याची भाश्वती नसते. अशा वातावरणात विद्यार्थी मग सतत वर्षानुवर्षे तणावाखाली राहतात व आत्महत्या करतात. मुळात ती आत्महत्या नसतेच तर भांडवलशाही शैक्षणिक खाजगीकरण व्यवस्थेने केलेली ती हत्याच असते. अशा कितीतरी निष्पाप मुलांच्या हत्या आज आपणांस समाजात दिसून येतात.

उच्च शिक्षण क्षेत्रात अनेक समस्या आहेत त्यापैकी एक म्हणजे प्राध्यापक भरती होय. शेकडो महाविद्यालयात आज कंत्राटी शिक्षक भरती आहे. वेतनावरील खर्च नियंत्रित करणे व सोबतच नियमित पद असणाऱ्या भरतीवर गदा आणणे, हीच

भूमिका आज उच्च शिक्षण क्षेत्रात दिसून येते. एवढेच नव्हे तर भरतीप्रक्रियेत लाखो रूपयांचे गैरव्यवहार हा शिक्षणाच्या क्षेत्रातील शिक्षण उद्योजकांच्या नफेखोरीचे जीवंत उदाहरण होय.

उच्च शिक्षणात मोठ्या प्रमाणात निधी खर्च करण्यात येतो. जोपर्यंत संस्थांना शासन निधी पुरविते तोपर्यंत स्वस्तात शिक्षण उपलब्ध होते. शासनाने निधी बंद केलातर फी वाढवून पैसे जमा करणे हाच पर्याय खाजगी महाविद्यालयापुढे उरतो. देशाला ज्ञानाची महासत्ता बनवू पाहणाऱ्या लोकांना उच्च शिक्षणात नवीन आमूलाग्र बदल करण्याची आवश्यकता भासू लागली आहे. त्यासाठी आता नवीन शैक्षणिक धोरणाचा मसुदा देखील जाहीर झाला आहे. ज्यामध्ये नवे शैक्षणिक विषय, नवे पर्याय व कौशल्य विकासावर भर देण्यात आला आहे. परंतु दर्जेदार शिक्षणाकरिता वर्गात दर्जेदार शिक्षक उपलब्ध असावे लागते. देशात आज अनेक महाविद्यालयांमध्ये शिक्षकांच्या अभावी उच्च शिक्षणाचा दर्जा दिसोदिवस घसरत आहे.

अंबानी व बिल्हा यांनी भांडवलशाही भाषेत शिक्षणाचा मसुदा स्पष्ट केला. भांडवलशाही भाषेत सांगायचे झाले तर उद्योगपती जेव्हा शिक्षणाच्या बाजारात पैसा गुंतवितात तेव्हा त्याला ते कमाईच साधन समजून नफा मिळविण्या करिताच भांडवल लावतात. परंतु या नफेखोरीमुळेच शिक्षण महागते. विद्यार्थ्यांनाही नौकरीची गरज असते. तेव्हा शिक्षणाकरिता ते पैसा गुंतवितात. पुढे चालून हीच गुंतवणूक आपल्या भविष्याचा रोजगार बनणार आहे याच आशेने ते या बाजारपेठेत उतरतात. याचाच अर्थ की शिक्षणाच्या या भांडवलीकरणाच्या प्रक्रियेत जनतेचा उच्च शिक्षणाकडे बघण्याचा दृष्टिकोण हा व्यापारीच बनत जात आहे. शिक्षणव्यवस्थेत जर संस्थाचालक व विद्यार्थी ह्यांचा व्यापाराचाच दृष्टिकोण आहे तर मग शिक्षकांनीच मागे का रहावे? अशावेळी जिथे जास्त वेतन मिळते त्याच ठिकाणी दर्जेदार शिक्षकांचा कल नौकरी करण्याचा असतो. यामध्ये मग खाजगी वर्ग चालविणे, बोगस पदव्या प्रकरण यासारख्या गोष्टी घडतात. या सर्व प्रकारांमध्ये जर एखादा कायदा आडवा आला तर व्यवस्थापन त्या कायद्यालाच कायम आडवे करण्यास मागे पुढे बघत नाहीत.

नौकरी मिळवून पैसा कमविणे हेच एकमेव ध्येय असेल तर सर्वांगीण विकासाच्या अभ्यासक्रमाचा काहीच अर्थ उरत नाही. आजवरच्या सर्व शिक्षणविशयक आयोगांची शिफारस संपुष्टात येते. वाणिज्य साहित्य व कला यासारख्या सामाजिकदृष्ट्या महत्त्वाच्या विशयांच्या अभ्यासाचे महत्त्व कमी होते. याऊलट भौतिकवादी अभियांत्रिकी, वैद्यकीय व व्यवस्थापन यासारख्या अभ्यासक्रमांना गरजेपेक्षा जास्त महत्त्व प्राप्त होते. मग मोठे मोठे उद्योजक विद्यापीठांना त्यांच्या उद्योगाशी निगडित कामगारांची मागणी करतात. बरेचदा या मागणीप्रमाणे अभ्यासक्रम बनविले जातात. आज शिक्षण अतिशय महागड बनलेलं आहे. शिक्षण विकत घेण्याची ऐपत सर्वसामान्य जनतेकडे नसते. यामुळेच आज कोटयावधी गरीब कुटूंबातील विद्यार्थ्यांचे उच्च शिक्षणाचे स्वप्न भंग पावत आहेत. हीच विशमता या भांडवलशाही अर्थव्यवस्थेतील शिक्षण व्यवस्थेची देणगी होय.

सध्या आपल्या राज्यात स्वयं अर्थसहाय्यीत विद्यापीठे स्थापन करण्याची परवानगी देण्याचा कायदा मंजूर करण्यात आला आहे. अशी विद्यापीठे स्थापन करण्यात उद्योगपतींनी रस दाखविला आहे. या विद्यापीठांना परदेशातील नामवंत विद्यापीठांशी करार करता येणार आहे. म्हणजे पुन्हा त्यांच्या अटी मान्य करणे आलेच. या खाजगी विद्यापीठांचे वित्तप्रबंधन, खासगी, व्यापारी किंवा औद्योगिक संस्था करणार आहे. त्यामुळे येथील शिक्षणाचे शुल्क निश्चितकच अधिक राहिल. अत्यंत आकर्षक व प्रभावी व्यवस्था निर्माण करून त्या ठिकाणी निव्वळ स्पर्धात्मक पध्दतीचे शिक्षण देण्यात येईल. जे चित्र आजवर सरकारी शाळांमध्ये दिसत होतं तेच आता सरकारी महाविद्यालयात दिसणार आहे. पर्यायाने अंगणवाडी ते उच्च शिक्षण देणारी सर्व भासकीय व्यवस्था कुचकामी म्हणून बंद केली जाईल. पर्यायाने भासनाची शिक्षणाची जबाबदारी संपुष्टात येईल व समाजात मोठ्या प्रमाणात विषमता वाढेल ज्या देशाची शिक्षणव्यवस्था ही संकटात सापडते तो देश लयाला गेल्याशिवाय राहणार नाही या महागड्या शिक्षणाचा परिणाम म्हणूनच आज बहुसंख्य गोरगरीब जनता शिक्षणापासून वंचित राहत आहे. या अतिशय गंभीर प्रश्नाच्या मुळाशी वित्त आधारित चालणारी भांडवलशाही भांडवलशाहीतील शिक्षण आणि त्याकरिता शिक्षणाचे केलेले भांडवल हेच होय.

### निष्कर्ष :

- १) भासनाची जबाबदारी व गुंतवणूक कमी करण्यासाठी अनेक प्रकारच्या एन.जी.ओ.ना शिक्षणात हस्तक्षेपाची संधी देण्यात आली.
- २) शिक्षणसंस्था चालक उत्पादक तर विद्यार्थी ग्राहक बनत आहेत.
- ३) जागतिकीकरणाची गरज या नावाखालील खाजगी इंग्रजी माध्यमांचे प्रमाण वाढले आहे.
- ४) शासकीय शाळांचा दर्जा खालावण्यास शासनच जबाबदार आहे.
- ५) इ.स. १९८६ व १९९१ च्या शैक्षणिक धोरणातूनच शिक्षणाच्या खाजगीकरणाचे प्रमाण वाढले आहे.

- ६) जागतिकीकरण व नवउदारमतवाद या गोड शब्दांखाली भांडवली अर्थव्यवस्थेत शिक्षणाच्या खाजगीकरणाला उत्तेजन देण्यात आले.
- ७) सर्व प्रकारच्या शिक्षण क्षेत्रात उद्भवणाऱ्या जास्तीत जास्त समस्या ह्या शिक्षणाच्या भांडवली खाजगीकरणामुळे उद्भवल्या आहेत.
- ८) खाजगी शिक्षणाच्या नफेखोर वृत्तीमुळे सर्वसामान्य गरिबांना शिक्षण हे त्यांच्या अवाक्याबाहेरच झाले आहे.
- ९) भांडवलशाहीच्या शिक्षणातील खाजगीकरणामुळे समाजात आर्थिक व सामाजिक विषमता वाढत आहे.

## Violation of Traffic Rules and Innocent Age

**Ku.Sonali S. Dudhat**

M.A. (Economics), M.A. (Geography), B.Ed.

### Abstract

*To change in the mind set of riders and drivers and road users realizing their responsibilities alone can bring about a change people should follow traffic rules. People do not follow traffic rules and do not give way to non-motorized vehicles and pedestrians.*

**Keywords :-** Road traffic, accident human behavior, traffic rule, road range, prevention.

### Introduction

Today especially in our in our country, traffic accidents are big problems that cause trouble they cause financial problems and even also they can cause deaths of the people. Of course, there are many causes that results with accidents. These can be about the faults of drivers that is, violation of the rules, they can be about road factors and also as a result of lack of knowledge. Therefore I am going to mention about these causes. That result in traffic accidents.

One of most important factors about the traffic accidents is violation of the rules which can be with exceeding speed limit, using alcohol or driving while driver is sleepless exceeding speed limit causes great accidents because with this exceeding driver loses the control of his driving and then occur accidents which even result in deaths. Violations of rules can also be with using alcohol before driving. At though there strict legal punishments about this issue, drivers keep using it. Unfortunately. This also causes traffic accidents because after getting alcohol, driver cannot pay attention to the road. The other factor is the sleepless drivers. They like the others, cannot pay attention to the road and they even fall asleep while they are driving.

The other important factors about the traffic accident are road factors. As one can see in our country, the roads are in very bad conditions and this also has contribution to the accidents. One can observe the negative side of bad conditioned roads especially when the weathers is rainy or snowy., the vehicles slip on the road and there occur accidents.

Drivers lacking of knowledge is the other factor which causes accidents. In efficient and unlearned drivers who are not experienced enough cause real problems in traffic. The drivers who have got their licenses from bad driving courses causes traffic accidents because they become drivers without having enough knowledge about driving and traffic rules, Therefore, this makes them become responsible for undesired conditions on the road.

Violations in traffic laws are very common in a highly populated country like India. The conditions are even worse in metro cities like Delhi, Mumbai, Bangalore, The accidents associated with these violations cause a huge loss to life and property. Same is the case in Mumbai. Being a metro city and highly populated one also, has a lot of road accidents every year. Despite this the violations in traffic laws do not reduce. A lot of people disobey the rules everyday. Sometimes willingly and sometimes because they are forced to do so because of others.

The main reasons being, the carelessness of the traffic criminals without giving them punishments. Today the number of traffic violators appearing in person in the court is the least of all criminals. The data collected is not sufficient to get the exact number of violations. But it permits a reasonably sound approximation. Traffic violations occur when drivers violate laws that regulate vehicle operations on streets and highways.

### Objectives

- 1) To reduce traffic crashes and injuries and to facilitate the safe and expeditious flow of vehicular, bicycle and pedestrian. Traffic.
- 2) To address unsafe driving bicyclist or pedestrian behavior.
- 3) To change in the mind set of riders and drivers and road users realizing their responsibilities alone can bring about a change.
- 4) People should follow traffic rules.

### Moving Violation

A moving violations is any violation of the law committed by the driver of a vehicle while it is in motion. The term "motion" distinguishes it from other motor vehicle violations, such as paperwork violations

(which include violations involving automobile insurance, registration or equipment violations moving violations often increase insurance premiums.

### Types :-

While some violations, like parking violations, are civil matters involving a vehicles owner. Moving violations are charge against the actual driver.

Moving violations are usually classified as interactions or misdemeanors, but serious violations such as hit and run, driving under the influence and road rage can be considered felonies.

### Examples of moving violations :-

- Speeding, which can be exceeding a limit or simply driving at an unsafe speed.
- Tailgating or failing to maintain an assured clear distance ahead (ACDA)
- Running a stop sign or red traffic light.
- Failure to yield to another vehicle with right of way.
- Failure to signal for turns or lane changes.
- Improper lane, usage, such as failing to drive with in a single lane.
- Crossing over a center divider median
- Driving on the shoulder where it is considered illegal under certain conditons.
- Failure to use a seat belt.
- Illegal use of window tints and obstructions.
- Faiture to stop for a pedestrian in a cross walk.
- Failure to secure a load to a truck or Lorry.
- Driving in a car pool lane, illegally.
- Operating a telecommunications device while driving.
- Driving a vehicle outside the conditions of one's license.
- Driving without a license or with a suspended license or with a license from another country.
- Driving a vehicle in bus lane or on train tracks.
- Failure to stop after a traffic collision. Or make a report.
- Driving on the wrong side of the road unless there is an obstruction.

### More serious moving violations include :-

- Driving under the influence
- Reckless driving
- Street racing
- Vehicular homicide
- Playing on a pone or texting when driving.

Driving under the influence(DUI) is the crime or offense of driving or operating a motor vehicle while impaired by alcohol or other drugs. (including recreational drugs and those prescribed by physicians.) to a level that renders the driver incapable of operating a motor vehicle safely.Merriam Webster's Dictionary defines DUI as the crime of driving a vehicle while drunk, also : a person who is arrested for driving a vehicle while affected by alcohol or other drugs.

Role of human behavior has been elucidated in road Traffic Accidents (RTA) since early 1980 s. 'Most of the legislations like use of helmet for pillion riders and seat belts for cars. Were implemented around the world during that period.Literature in the field of behavior as a cause of road traffic accidents in 70% to 95% cares. Steps taken for prerention like legislations enforcing traffic rules and awareness campaigns, indirectly change human behavior, but direct interventions to change. Human behavior need evaluation of the behavior of the populations of a specific area.

The loksabha recently passed a draft legislation in parliament to make changes to the existing motor vehicles act, thereby making it easier for the innocent good Samaritans of society to avoid all sorts of legal harassment that may arise from being questioned by traffic authorities. This bill also imposes stricter penalties on the violations of traffic rules, such as a three-years jail term for parents if their minor children are caught driving vehicles and a tenfold increase in compensation for the victims of accidents and their families.

### Conclusion

In conclusion traffic accidents do not occur without any reasons. They come into being after some factors, these can be the factors about drivers, road or about some rules. As soon can see traffic accidents are mainly based on man faults, including teenagers also. In innocents age, so, I think people should be educated fully both about driving and about the traffic rules and they should be warned about the legal punishments of

their violations of the rules. Population based road users behavior needs to be studied for understanding cause of increase in road traffic accidents in India.

## Role Of Social Media In Sports

Dr. Akash More

Yuva Shakti Arts And Science Mahavidyalay Amravati, Dist. Amravati

### Abstract

*The rising of mobile phone users and social media has changed the way we look at variety things in today's society, including our engagement in sports. There are many different social media platforms like Facebook, Twitter, Instagram and YouTube etc.; people can use these social media tools really conveniently in their daily lives. Social media has become an important tool for distributing contents and attracting new readers, as well as creating more participation. The social media tools have impacted the sports from many different ways, such as communications and sports marketing.*

### Introduction

Social media is one of the most important tools for sports, the fans and the athletes. First of all, as we know, the population of social media users has increased dramatically over the past years. People can engage in the sports, follow their favorite athletes and teams, and get the most updated sports contents instantaneously. Second, for sports organizations, the advantages of using social media is that it can help sports organizations to build relationships with the public, to reduce their marketing costs and to increase sales etc. Organizations can use social media to promote two-way conversations with the public and build a community under their mission. Third, social media has got attraction as an essential tool for connecting with sports fans. For individual sports fans, social media is a very important tool for them to interact and share information with other individuals, to engage in two-way communication with sports organizations. Finally, athletes can benefit from using social media to connect with their fans, to build a personal brand and to promote themselves etc. Compared with the traditional media, the social media nowadays costs less but affects more efficiently and more consistently. Just one post per day could make the athlete active in his/her fans' sights, which will bring corresponding economic benefits. Besides, the athlete himself/herself may enjoy more while sharing their sports relevant updates, which will certainly lead to a sustainable development.

### Role social media in sports

Social media and sport have been intertwined since the latter came into existence. A large part of sport fandom is talking about the game you love, and social media gives fans a 24/7 medium for discussion, with people from all over the world connected by a shared interest. The Twittersphere is ignited every match day, Facebook is awash with sports videos, and any attendee of a game will post an obligatory Instagram photo of the field. But social has a role to play commercially, from live streaming to digital marketing, and teams are starting to grapple with this seemingly limitless potential.

And, with the rise of social media's involvement in sports, innovate startups are emerging, taking advantage of the plethora of technology available in modern stadiums. The connected arena will become the norm as more sports teams look to catch up with their competition, and we'll only see more companies emerge as the full potential of the technology is realized.

One such young company is Snaptivity. If there's one thing we can all agree on with selfies, it's that they inherently lack spontaneity and are by definition not candid. Short of asking a stranger, though, it's difficult to get a good photograph of your group of friends at a sports game without taking a selfie.

Snaptivity looks to solve this problem by using in-stadium cameras to take pictures of fans at the most emotionally charged points in the action, on their command but without their knowledge. Users input their seat numbers onto the app, and the company uses tech to isolate key moments in the competition and capture the reactions, in a similar vein to the snaps of your terrified face that you can pick up after riding a rollercoaster. The app has been used at 18 sporting events since it launched, with over 235,000 photos taken, and the company plans to expand it across different sports as it develops its technology. The app is intimately tied to social media, offering teams and venue partners a new level of exposure thanks to how brilliantly sharable the pictures are.

Social media has also emerged as a perhaps unlikely platform for live streaming of games. The giants of Twitter and Facebook have been making movements towards live streaming for some time, with the latter pushing user-generated live content to its users particularly enthusiastically. This commitment to live video is reflected in social media's designs to broadcast live sports, with Twitter partnering with the NFL to show 10 games (for \$10 million) and Facebook mimicking it with talks to host MLB games. Facebook will also stream 46 matches from Mexico's Liga MX soccer league in 2017.

Facebook is also planning to launch an app for TVs, so that users can stream this content from the world's biggest social media site directly. This won't be where Facebook will benefit, though. Zuckerberg and co. are looking to create a social experience around watching live sports, taking the second-screen experience most fans already look for and packaging it all together with the stream itself. Of course, this level of engagement then affords Facebook the opportunity to earn more advertising revenue, whilst being able to offer sponsors more detailed information on who's watching and their engagement levels.

### **Changes in sports due to social media**

The drastic change in the social media landscape over the last ten years has had a major impact on all aspects of our lives and sports industry is in no way an exception.

Today, sports events and social media go hand in hand. We're witnessing an era where every team, league, or sports association has at least one social media profile where they announce all important information. Moreover, it became impossible to scroll down your Facebook, Twitter, or Instagram account during a major sports event and not have your news feed overwhelmed with information, real-time gifs, vines, or memes about it. Also, almost every sports event or show has a related hashtag which creates a relationship with the audience and brings a fast response. Athletes use social media to establish their name, communicate with their fans, announce their activities, and even promote brands and make money, as they have millions of followers.

### **Advantages of social media**

#### **1: Report scores**

While major colleges are in the national spotlight and covered almost continuously by the sporting news world, high schools can have a harder time spreading the word about their programs and successes. Through social media high schools can report scores, teams' news, and victories as soon as they occur. Until recently, high school news was relegated to snippets in the local paper or updated weekly on their website. These updates are too slow and don't reach the potential target audience social platforms offer. With Facebook, Twitter, and Instagram, high school news can be shared by the local community and create a positive, open relationship between student-athletes and people.

#### **2: Share pictures**

Boosting interest and enthusiasm for the teams by sharing pictures of events is another positive use of social media. Frequently posting pictures and videos of events help the student-athletes feel important and supported. Coaches will be leading by example when they post a positive message and picture of the team in camaraderie while cultivating further interest in the program. Sharing helps keep people connected and reminds the student-athletes that they represent more than just themselves; they represent the team.

#### **3: Show benefits and core values of programs**

People want to know where the school budget is being utilized, and if it is a positive influence on their children. Using social media to present benefits and core values of programs can help alleviate any concerns as well as gain athletes support and opportunities. Sharing individual profile stories, sportsmanship experiences, and community involvement remove any incorrect perceptions about one or more programs at the school.

#### **4: Promote sporting events**

Attendance is physical proof of support that can be raised through social media platforms. They allow schools to keep the community and fans up to date with game schedules and relevant sporting activities. Football, basketball, and baseball are usually the most popular sports, but social media promotions can raise awareness for other sports as well. Track, crew, waterpolo, and tennis may find stronger support because they can generate support and create a spotlight in which to compete.

#### **5: Social media marketing is more affordable**

Working with a TV service provider, buying TV time, newspaper ads, bench ads, and other marketing channels can be too expensive for a school's budget. People are sensitive to how schools spend their money, so extra costs such as marketing are heavily scrutinized. Social media platforms offer a free marketing option that actually performs better than most paid options. The concept of sharing stories and information freely offers an infinite reach that is bolstered through the personal touch it requires. Communities are more willing to read news and stories from a student-athlete or coach than paid advertisement.

#### **6: Students create positive image for recruiting**

"If you want to be a good recruiter in today's college football, you have to be on social media," John Kuceyeski said. He is the Iowa State director for recruiting, and believes in positive social media use. He went on to say, "If you're not doing it, you're going to get beat by somebody that's doing it. You have to be

out there. You have to be different. You have to be completely visible and be accessible, and the best way to do that in today's recruiting world is through social media.”

Recruiters are using social media as a way to familiarize themselves with potential recruits. They have discovered that student-athletes may be a much different person online than who they are with coaches and administration. It's important for student-athletes who are serious about recruitment keep in mind their social media presence is permanent. Things said are archived, shared, and repeated, making social media platforms giant echo chambers. Keeping their online identity respectful and positive will help when recruiters are doing research and deciding who potential stars are.

### 7: Highlight student-athletes

Validation and acknowledgement are strong tools when reinforcing student-athlete's positive use of social media. Social media allows users to invest in the players and highlight who they are through write-ups and exciting iterations of intense game play. Coaches can be emphasized as well, showing people who works with their kids and what kind of influence they are. People naturally want to be recognized for their deeds and talents, so this can be the strongest use of social media. Student-athletes will naturally uphold the positive, strong image that has been created and set a good example for younger generations.

### Conclusion

Effective media relations and direct communication with customers are essential for all sports organizations. Successful managers in sports field must have a clear understanding of how Information and Communication Technology works to manage the communication process. Instagram can be a highly-targeted visual advertising channel for sports clubs. Nowadays, most people use social media and have a profile on social networking sites.

## Emerging Trends In Sports

**Prof. Dr. Anil Vaidhy**

N.A. Deshmukh Mahavidyalay Chandurbajar, Amravati, Dist. Amravati

### Abstract

*Trends and Innovation in Sports in Asia brings together research and case studies to evaluate and discuss the effectiveness of current methodologies and theories in an effort to improve promotional activities and the organization of all aspects of the sports industry. This publication is an essential reference source for academicians, researchers, industry practitioners, and upper-level students interested in the theories and practices of sports marketing and management with a special focus on Asia.*

### Introduction

Employing sports and the environments, fans, participants, and affinities they produce as a means of profiling and targeting consumers. The vast size and reach of the sports marketing arena shouldn't surprise anyone. But as with every industry in today's quickly changing technological landscape, sports marketing is experiencing foundational shifts in how it operates, the way it is structured, and the methods it employs to reach its target audiences.

As expectations and paradigms shift regarding how sports should be consumed, the sports world must cater to those changes. Agencies, leagues, bureaus, media outlets, teams, and athletes alike all vie for the consumer's attention and race to develop the next technique that will give them an edge. Here are a few of the biggest trends you can expect to see develop in the sports.

### New trends in sports

#### Emerging Sports –

On our list again this year, non-traditional sports are taking hold all across the country. The membership of USA Pickleball has grown sevenfold over the past five years to over 28,000 members. Colleges are offering scholarships for E-gaming. Drone racing has its own national league system. BMX racing is the fastest growing sport in America according to the Sports and Fitness Industry Association. Long considered international sports, cricket and Aussie Rules Football have opened offices here looking to build an infrastructure in the United States (also look up KUBB, another growing sport domestically that you may hear about in the coming years). Ultimate and quidditch are both growing. Will the day come where kids will replace bat and ball sports with League of Legends or Scripps Spelling Bee? That time may get here sooner than we think.

#### Creating Owned Events –

Another repeat from years past, our destination clients are more and more opting to invest their resources in created events. This is especially true in small and mid-tier markets that don't have the resources to compete with the big boys. If you can create an event with your local partners (or enhance/replicate ones that already exist), those are assets that you don't have to bid for against your well-funded competitors. This doesn't just apply to the traditional sports either. CVBs and sports commissions across the country are developing new events in many of the emerging sports note above. In addition, destinations are looking at special events like music festivals and motorcycle rallies to fill their tourism calendars.

The skills it takes to execute these special events is very similar to sports.

#### Bricks and Mortar –

Our last repeat from 2018, the list of communities that are using tourism related taxes (bed tax and/or food and beverage taxes) to build tourism driving sports venues is at an all time high, and we believe this practice is here to stay. The facilities arms race seems to have no saturation point in sight as communities continue to build large multi-sport complexes. By using tourism related taxes to build tourism related sports venues, CVBs and sports commissions can take control of their venue assets to drive overnight stays first, and offer enhanced places for local teams to play, second.

#### Facility Revamps –

Traditional retail is dying (call it the Amazon factor), which will continue to create more empty big box retail locations and opportunities for sports organizations looking for affordable/free space to run

tournaments and local programs. In addition, participation in golf has been flat for several years, and the profitability of municipal courses has been challenged to the point that some cities have chosen to repurpose golf real estate into multi-purpose sports complexes that can serve local groups and also attract tourism driving tournaments. With the growth of pickleball, many parks and recreation departments are converting tennis courts into smaller, more utilized pickleball layout. Everything is open for debate, including the long-standing mantra of providing facilities for classic (fading) sports like golf and tennis.

### **Tourism Improvement Districts (TIDs) –**

Improvement districts have long been a tool for driving economic development in communities both large and small. More recently, these districts have been created for the sole purpose of attracting tourism dollars through sports. While numerous municipalities have had this tool in their arsenal for years, some big players like Oklahoma and Texas have recently opened the door for implementing TIDs. Wisconsin and Illinois are looking at this opportunity as well. The competition continues to escalate.

### **Safety –**

Closely related to oversight, athlete safety continues to serve as a high-profile issue on multiple fronts. The discussion on football concussions has escalated to the highest levels, and additional sports are joining the fray. Athlete safety in several Olympic sports has spawned the creation of Safe Sport, an independent investigative organization created to protect athletes and those involved in the Olympic movement. Safe Sport, and in some cases full background checks, are now mandated by numerous sports organizations across the country, and it doesn't stop with coaches. Officials, board members, event volunteers, and others are now very likely to be required to complete a background check and the Safe Sport training program.

Games publishers are playing a more active role in building businesses around the esports scenes related to their titles. Activision Blizzard's Overwatch League is perhaps the most prominent example of the changing approach. Blizzard has adopted familiar elements from traditional sports to create the global league: franchise teams, multiple league-wide partner brands, an exclusive media rights deal. It's a bellwether project: many eyes are on it to see if Blizzard can build the large, global audience it is aiming for. There has been much PR in recent years around activity such as sports teams signing up esports players, but in reality the relationship between traditional sports and esports is only just beginning. Many sports are still working out how to connect with the sector. Even the most natural fits, such as those with existing successful game series, are only now putting serious structures in place to leverage competitive gaming.

In last year's trends, "Social responsibility is becoming more prevalent and impactful." This year, the relationship between sport and society is changing faster than ever, and staying on top of that change has become even more important. Equality, diversity, gender, race, sexuality and the environment, among other issues, are dominating the media and having an impact on every part of the sports business. In sponsorship, brands are demanding impeccable ethics from the sports they partner with. Sports can't have total control over their athletes and ambassadors, but anyone doing less than their utmost to run an ethical organization or competition is taking a big risk. On the flip side, the need for brands to communicate their purpose and social usefulness to consumers is a great opportunity for sports. For all the problems that sports continue to have, sponsorships can still provide the perfect platform for brands to communicate these messages.

### **Conclusion**

New trends became much important for sports. Trends are important patterns of social, economic or environmental activity that result in a change of behaviour. Sports must adapt to the changing environment to ensure they continue to achieve participation growth.

## Use Of Multimedia Gadgets In Sports

**Prof. Kailash Karale**  
Narsingh Mahavidyalay Akot

### Abstract

A smart device performing certain functions known as gadget. There are thousands of gadgets with various functions and methods of use, it helps in various works and also used to make each work to be simple and not complicated.

### Introduction

Device is an item or instrument used to do certain work or/and achieve a certain result. Thus, a personal computer and video camera are devices. But, for example, a gaming joystick or helicopter for a camera, they are gadgets. The field of physical education and sports can make a significant contribution to the role that technologies play in our lives by carefully considering the benefits and liabilities of new information technologies on the whole person, body as well as mind. Information technology play vital role in the human being in particularly in field of sports and games. It helps to avoid mistake in organization and administration of various sports and games at world level. Information Technology in Sports has established scientific discipline, Research activities, improve Learning and coaching, Bio-mechanical analysis and field research have evolved. In future very soon the way computer with be applicable in sports with good quality and best results.

### Benefits of new gadgets and technology in sports

1. Promote the development of e-learning resources.
2. Facilitate public-private partnerships to mobilise resources in order to support e-learning initiatives.
3. Promote the development of an integrated e-learning curriculum to support in education.
4. Promote distance education and virtual institutions, particularly in higher education and training.
5. Promote the establishment of a national ICT centre of excellence.
6. Provide affordable infrastructure to facilitate dissemination of knowledge and skills through e-learning platforms.
7. Promote the development of content to address the educational needs of primary, secondary, and tertiary institutions.
8. Create awareness of the opportunities offered by gadgets as an educational tool to the education sector. Facilitate sharing of e-learning resources between institutions.
9. Exploit e-learning opportunities to offer Kenyan education programmes for export. Integrate e-learning resources with other existing resource.

### Advantage of gadgets

Technology in sports is constantly changing in today's era. This change is making a big impact, whether the technology is a disadvantage to the sport and slows down the speed of the game or uses the technology to an advantage and speeds the game up to help make accurate calls. People are always looking for the technology to be able to get ahead of other opponents. The use of technology has crept into the athletes' games. Technology is more of an advantage or disadvantage. One of the main reason's through which technology compromise a sports experience is that people are watching the games at home instead of watching the games that are played live. Some people would rather stay at home than spend the money to go to view the game. With the game being shown on television, means fewer supporters in attendance. Fewer supporters mean less money for the teams in terms of income and profits. The enhanced experience of technology has made it easy for teams to know and learn about the opposite teams.

### Improvement of gadgets in sports

1. To update the health status of players.
2. Preparing training schedule
3. Video Feed back for players practices.
4. To assessment of physical activity.
5. Storing the results
6. To analysis the team performance at the time of competition.
7. Online registrations and profile verifications.
8. The Coach can have the self-appraisal.
9. Storing the personal data's of athletes.

10. Search engine for the latest training in sports.

### Conclusion

Technology and gadgets play vital role in the human being in particularly in field of sports and games. It helps to avoid mistake in organization and administration of various sports and games at world level. Technology in Sports has established scientific discipline, Research activities, improve Learning and coaching, Bio-mechanical analysis and field research have evolved. In future very soon the way computer with be applicable in sports with good quality and best results. Gadgets and technology makes sports more and more better.

## Impact Of Suryanamaskar On Joint Mobility Of Academic Students

**Dr. Khushal J. Alaspure**

Director of Physical Education, NarayanraoRana Mahavidyalaya, Badnera

### Abstract

The purpose of this study was to see the effect of 6 week suryanamaskar on trunk joint mobility of academic students of NarayanraoRana Mahavidyalaya, Badnera. To achieve this purpose twenty ( $n = 40$ ) voluntary interested students of various departments were randomly selected from the said college. Subjects were divided into two groups (Experimental group – 20 & Control group – 20). The criterion variable of trunk joint mobility was measured by Goniometer. The scoring unit of goniometer is in degree (max-360 degree). The reading showed by the apparatus at four sides i.e. left, right, forward and backward will be added together to get the final score. Pre test was taken prior to the Suryanamaskar training and post test was taken after six weeks of Suryanamaskar. Suryanamaskar were practices every morning i.e. five days (Monday to Friday) per week. First week the session consisted of 5 minutes warm-up 2 times suryanamaskar and 5 minutes cool-down, increased 2 times suryanamaskar every week. After six week training post test were administered and data were collected. To see this difference is significant or not at 0.05 level of significance. Researcher further calculated 't' test & above table shows that on the basis of mean difference there was difference between the means of pre and post test of control and experimental group of academic students in reference to trunk joint mobility. To see this difference is significant or not at 0.05 level of significance. Researcher further calculated 't' test & above table shows that there is significant difference between pre and post test of experimental group of trunk joint mobility, as the calculated 't' value 2.534 is greater than tabulated 't' value 2.024. But there is insignificant found between pre and post test of control group of trunk joint mobility, as the calculated 't' value 1.296 is lesser than the tabulated 't' value 2.024. Concluding we can say that experimental group shows significant difference in reference to trunk joint mobility the differences may be attributed that Surya namaskar is basically a sun salutation that leads to healthy body, mind and soul. However, morning time is the best time for suryanamaskar. Sun rises is the time when sun rays help revitalize the body and refresh the mind. It also increases the ability of muscle to perform movement with large amplitude (range of motion). It also refers to functional capacity of a joint to move through a normal range of motion.

**Keywords:** Suryanamaskar, Trunk Joint Mobility, Goniometer, etc.

### Introduction

Flexibility practices help relax firm joints that may occurs due to inactivity, stress, illness or injury. Joints and muscles can also stiffen as you age, which is another reason why you should incorporate stretching into your daily routine. Workouts that improve flexibility not only help to alleviate body stiffness, but they also enhance blood circulation and promote relaxation. To do these exercises safely, you must learn the proper techniques to avoid overstretching or pulling your muscles during movement.

### Yoga

Yoga combines a variety of poses designed to tone and lengthen muscles. Increased flexibility is one of yoga's primary benefits, along with greater freedom of movement and increased relaxation. There are various schools of yoga, including Bikram yoga, which promotes strength and flexibility in a heated environment; Power yoga, which combines meditative breathing, strength training and stretching; and Hatha yoga, which also promotes flexibility and relaxation through deep breathing and stretching. Before trying yoga at home, take a few classes with a certified instructor to learn how to execute each pose safely. Once you learn the proper techniques, do 15 to 20 minutes of yoga daily to keep your joints flexible.

Joint Mobility often also referred to as flexibility or suppleness can be defined as the ability to perform movement with greater range of motion or large amplitude. It is controlled partly by the energy liberation processes of the body and partly by the coordinative processes of central nervous system.

Though there are different way to keep you healthy, yoga promotes overall health in a balanced way. Yoga helps in recharging the body by promoting self healing, removing negative energies and enhancing personal powers. It simplifies your mind and thought process. One of the yoga postures which is simple form of daily workout for the mind and body is the Surya Namaskar. Thus, if you haven't stretched your body since ages and considering something effective then the suryanamaskar is just right for you.

In ancient times, worshipping to the sun has been practiced in India for prosperity and this has even been mentioned in the Vedas. Salutation to the Sun in the early morning was added as a daily routine for Hindus. Form that time people of all civilizations offered prayers to the sun, the ideal source of life and energy. Such practice is named as suryanamaskar.

Suryanamaskar is a complete meditative technique in itself as it includes various asanas like-Pranamasan, hasta utthanasan, padahastasan, ashwasanchalanasan, ashtanaganamasakar, bhujangasan, and parvatasan.

Increasing flexibility through stretching the body parts is one of the basic tenets of physical fitness. Flexibility is the ability of muscle to perform movement with large amplitude (range of motion). It also refers to functional capacity of a joint to move through a normal range of motion.

### Methods

The purpose of this study was to see the effect of 6 week suryanamaskar on trunk joint mobility of academic students of NarayanraoRana Mahavidyalaya, Badnera. To achieve this purpose twenty (n = 40) voluntary interested students of various departments were randomly selected from the said college. Subjects were divided into two groups (Experimental group – 20 & Control group – 20). The criterion variable of trunk joint mobility was measured by Goniometer. The scoring unit of goniometer is in degree (max-360 degree). The reading showed by the apparatus at four sides i.e. left, right, forward and backward will be added together to get the final score. Pre test was taken prior to the Suryanamaskar training and post test was taken after six weeks of Suryanamaskar. Suryanamaskar were practices every morning i.e. five days (Monday to Friday) per week. First week the session consisted of 5 minutes warm-up 2 times suryanamaskar and 5 minutes cool-down, increased 2 times suryanamaskar every week. After six week training post test were administered and data were collected.

### Statistical Procedure

Statistical analyses was done on the basis of 't' test. The level of significance were set at 0.05

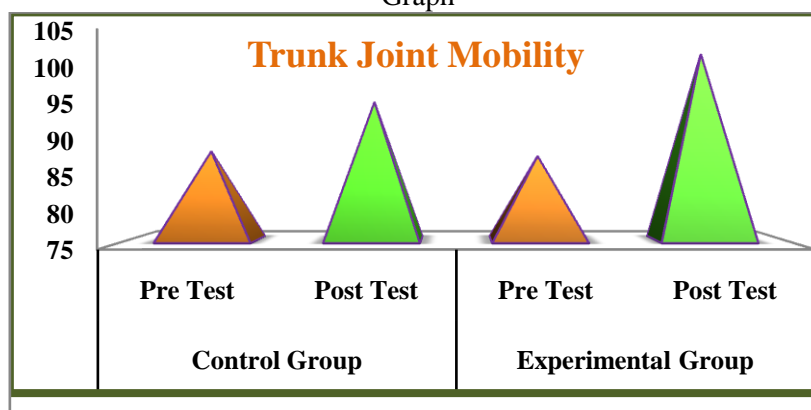

**TABLE**  
**Comparison of pre & post test**

Variables	Group	Test	Mean	S.D	S.E	M.D	D.F	Obt "t"	Tab "t"
Trunk Joint Mobility	Controlled	Pre test	88.2	17.26	5.707	7.4	38	1.296	2.024
		Post test	95.6	18.8					
	Experimental	Pre test	87.5	17.86	6.036	15.3		2.534*	
		Post test	102.8	20.24					

**\*Significant at 0.05 Level**

The above table shows that on the basis of mean difference there was difference between the means of pre and post test of control and experimental group of academic students in reference to trunk joint mobility. To see this difference is significant or not at 0.05 level of significance. Researcher further calculated 't' test & above table shows that there is significant difference between pre and post test of experimental group of trunk joint mobility, as the calculated 't' value 2.534 is greater than tabulated 't' value 2.024. But there is insignificant found between pre and post test of control group of trunk joint mobility, as the calculated 't' value 1.296 is lesser than the tabulated 't' value 2.024.

Graph

### Conclusion

Concluding we can say that both the groups experimental as well as control group shows difference in mean whereas experimental group shows significant difference in reference to trunk joint mobility the differences may be attributed that Surya namaskar is basically a sun salutation that leads to healthy body, mind and soul. However, morning time is the best time for suryanamaskar. Sun rises is the time when sun rays help revitalize the body and refresh the mind. It also increases the ability of muscle to perform movement with large amplitude (range of motion). It also refers to functional capacity of a joint to move through a normal range of motion.

**Player Classification On The Basis Of Anthropometric Measurement****Aniket Ambekar**

Assistant Professor, DCPE, Amravati

**Abstract**

Day by day the computer technology and network has developed and is still developing and growing. Thus, the amount of data in the sports industry is getting larger now a days. This huge amount of data can be helpful to analyzing and extracting meaningful information and knowledge from it. The hidden patterns of data are analyzed and then categorized into useful knowledge. This process is known as Data Mining. Among the various data mining techniques, Decision Tree is also the popular one. Decision tree uses divide and conquer technique for the basic learning strategy. A decision tree is a classifier expressed as a recursive partition of the instance space. The decision tree consists of nodes that form a rooted tree, meaning it is a directed tree with a node called "root" that has no incoming edges. All other nodes have exactly one incoming edge. A node with outgoing edges is called an internal or test node. All other nodes are called leaves (also known as terminal or decision nodes). In a decision tree, each internal node splits the instance space into two or more sub-spaces according to a certain discrete function of the input attributes values. This paper discusses algorithms of the decision tree (ID3) with respect to their application, advantages, disadvantages and features, results measured according to the iteration by using ID3 algorithm.

**Keywords:** Decision Tree, ID3, Anthropometric

**Introduction**

Data mining comprises extracting information from a data set and transforming it to a structure that is understandable. It is the computational process of discovering patterns in large data sets involving methods at the intersection of artificial intelligence, machine learning, statistics and database systems. Data mining allows you to sift through all the chaotic and repetitive noise in your data. It also helps to understand the relevant information and make good use of that information to assess likely outcomes. Thus data mining accelerates the pace of making informed decisions.

There are six classes in data mining namely Anomaly Detection, Association Rule Learning, Clustering, Classification and Regression. Classification is a data mining function that assigns items in a collection to target categories or classes. Classification aims at predicting the target class for each case in the data.

The most widely applied supervised classification technique is Decision Tree. Decision Tree induction comprises of learning and classification. These steps are simple and fast and thus Decision Tree can be applied to any domain. The goal of the decision tree is to form a model and then predict the value of a target variable by giving several inputs. A decision tree is a decision support tool that uses a tree-like graph or model of decisions and their possible outcomes. A decision tree is a classifier in the form of a tree structure where each node is either:

- Leaf node- Leaf node is an indicator of the value of target attribute (class) of examples, or
- A decision node- A decision node specifies all possible tests on a single attribute-value, with one branch and sub-tree for each possible outcome of the test

**Objective**

- The aim of this study is to compare several anthropometric variables between high-level volleyball, Handball and Basketball players.
- In order to improve the performance of players in competition, Selection and Classification can be done through this method

**Brief Literature Review**

Decision Tree learning is one of the most widely used and practical methods for inductive inference over supervised data. Based on various attributes a decision tree represents a procedure that classifies the categorical data. Besides this decision tree are also for processing a large amount of data and thus find use in data mining applications. For constructing decision trees no domain knowledge or parameter setting is required. Thus decision trees are sufficient as well as appropriate for exploratory knowledge discovery and their representation of acquired knowledge in tree form is intuitive and easy to understand.

**Why use Decision Trees**

- Decision trees can be visualized and are simple to understand and interpret
- They require very little data preparation whereas other techniques often require data normalization, the creation of dummy variables and removal of blank values.

- The cost of using the tree (for predicting data) is logarithmic in the number of data points used to train the tree.
- Decision trees can handle both categorical and numerical data whereas other techniques are specialized for only one type of variable.

#### Decision trees can handle multi-output problems.

- Uses a white box model i.e. the explanation for the condition can be explained easily by Boolean logic because there are mostly two outputs. For example yes or no.
- Decision trees can perform well even if assumptions are somewhat violated by the dataset from which the data is taken.

#### Types of Decision Trees

Decision trees used in data mining are mainly of two types:

- **Classification tree** in which analysis is done when the predicted outcome is the class to which the data belongs. For example outcome of loan application as safe or risky.
- **Regression tree** in which analysis is done when the predicted outcome can be considered a real number. For example population of a state.

Both the classification and regression trees have similarities as well as differences, such as procedure used to determine where to split. There are various decision trees algorithms namely ID3(Iterative Dichotomiser 3), C4.5, CART(Classification and Regression Tree), CHAID(Chi-squared Automatic Interaction Detector), MARS. Out of these, we will be discussing the more popular ones which are ID3, C4.5, CART. This paper discusses algorithms of the decision tree (ID3).

#### ID3 (Iterative Dichotomiser)

ID3 is an algorithm developed by Ross Quinlan used to generate a decision tree from a dataset. To construct a decision tree, ID3 uses a top-down, greedy search through the given sets, where each attribute at every tree node is tested to select the attribute that is best for classification of a given set. Therefore, the attribute with the highest information gain can be selected as the test attribute of the current node. ID3 is based on Occam's razor. In this algorithm, small decision trees are preferred over the larger ones. However, it does not always construct the smallest tree and is, therefore, a heuristic algorithm.

For building a decision tree model, ID3 only accepts categorical attributes. Accurate results are not given by ID3 when there is noise and when it is serially implemented. Therefore data is preprocessed before constructing a decision tree. For constructing a decision tree information gain is calculated for each and every attribute and attribute with the highest information gain becomes the root node. The rest possible values are denoted by arcs. After that, all the outcome instances that are possible are examined whether they belong to the same class or not. For the instances of the same class, a single name class is used to denote otherwise the instances are classified on the basis of splitting attribute.

#### Advantages of ID3

- The training data is used to create understandable prediction rules.
- It builds the fastest as well as a short tree.
- ID3 searches the whole dataset to create the whole tree.
- It finds the leaf nodes thus enabling the test data to be pruned and reducing the number of tests.
- The calculation time of ID3 is the linear function of the product of the characteristic number and node number

#### Disadvantages of ID3

- For a small sample, data may be over-fitted or over-classified.
- For making a decision, only one attribute is tested at an instant thus consuming a lot of time.
- Classifying the continuous data may prove to be expensive in terms of computation, as many trees have to be generated to see where to break the continuum.

One disadvantage of ID3 is that when given a large number of input values, it is overly sensitive to features with a large number of values

#### Methodology

**Subjects** The research was carried out on 18 males inter-colligate players of H.V.P.Mandal's Degree College of Physical Education, Amravati, 06 from each selected games of Handball, Volleyball and Basketball were selected as subjects, for the purpose of the study. The age of the subjects ranging from 18 to 23 years.

**Procedures**

The anthropometric data included 3 types of measurements: basic (Height, Weight, Leg Length, and Arm Length) according to the standard methods proposed by the International Society for the Advancement of Kinanthropometry (ISAK, 2001). Based on these measurements, we have determined a profile for Sports – Handball, Volleyball, Basketball population.

**Statistical analysis**

Decision tree ID 3 algorithm was applied for multiple comparisons to determine which differences of means were statistically significant. The statistical analysis was performed by using the MS-Excel for Windows, by adopting a significant level of 5%.

**Data Analysis**

The mean, standard deviation and minimum and maximum values are observed, and variable means were compared, by using decision tree method. To decide important criterion required for attributes from the defined game. Based on these attributes it will be convenient for allocation of games to beginners and players. Which will ensure optimum performance level.

Table No. 1: Anthropometric measurements of selected subjects for the study.

Sr.	Name	Sex	Age	Height	Weight	Arm length	Leg length	Game
1	Rahul Kumar	M	18	169	61	74	100	Basket Ball
2	Nipun Gaikwad	M	18	179	61	80	107	Basket Ball

Here,

H= Height, AL= Arm length, W= Weight, LL= Leg length HB= Hand Ball, BB= Basket Ball, VB= Volley Ball

### Decision Tree

Decision tree is a classifier in the form of a tree structure where each node is attribute is either leaf node or a decision node. Interactive Dichotomizer 3 (ID3) uses tree induction algorithm in which assign an attribute to a tree based on its information gain.

Hence decision tree method is used to decide important criterion required for particular sports. Based on these attributes it will be convenient for allocations of games to new players which will ensure optimum performance of the players leading to success.

**Table No. 2: Shortlisted parameters for applying algorithm.**

Height	Weight	Arm length	Leg length	Game
169	61	74	100	Basket Ball
179	61	80	107	Basket Ball
171	47	71	98	Basket Ball
170	70	75	100	Basket Ball
172	60	75	103	Basket Ball
173	58	72	104	Basket Ball
176	65	78	105	Hand Ball
166	59	75	100	Hand Ball
168	56	72	98	Hand Ball
173	62	72	102	Hand Ball
175	63	72	104	Hand Ball
164	55	73	89	Hand Ball
171	62	78	102	Volley Ball
169	62	71	99	Volley Ball
170	68	72	101	Volley Ball
172	60	73	102	Volley Ball
169	55	71	101	Volley Ball
171	75	76	98	Volley Ball

As the recorded data is in discrete form hence it was categorized as follows:

<b>Height</b>	$\geq 170$	$< 170$
<b>Weight</b>	$\geq 60$	$< 60$
<b>Arm length</b>	$\geq 75$	$< 75$
<b>Leg length</b>	$\geq 100$	$< 100$

$$\begin{aligned} \text{Games : BB} &= 6 & \text{Games : HB} &= 6 & \text{Games : VB} &= 6 \\ I(\text{BB,HB,VB}) &= (-6/18 \log_2 6/18) - (-6/18 \log_2 6/18) - (-6/18 \log_2 6/18) \\ &= -0.366204096 \end{aligned}$$

First Splitting Attribute	
Gain of Height=	-0.118
Gain of Weight=	-0.127
Gain of Arm length=	-0.122
Gain of Leg length=	-0.110

As the gain of leg length is more therefore it is used as first splitting attribute.

Table No. 3: Selection of Second splitting attribute.

Sr. No.	Leg length	Height	Weight	Arm length	Game
	LL >= 100cm	>=170	>=60	>=75	
		<170	<60	<75	
1	100	<170	>=60	<75	<b>BB</b>
2	107	>=170	>=60	>=75	<b>BB</b>
3	100	>=170	>=60	>=75	<b>BB</b>
4	103	>=170	>=60	>=75	<b>BB</b>
5	104	>=170	<60	<75	<b>BB</b>
6	105	>=170	>=60	>=75	<b>HB</b>
7	100	<170	<60	>=75	<b>HB</b>
8	102	>=170	>=60	<75	<b>HB</b>
9	104	>=170	>=60	<75	<b>HB</b>
10	102	>=170	>=60	>=75	<b>VB</b>
11	101	>=170	>=60	<75	<b>VB</b>
12	102	>=170	>=60	<75	<b>VB</b>
13	101	<170	<60	<75	<b>VB</b>

BB=5	HB=4	VB=4
$I(BB,HB,VB) = (-5/13 \log_2 5/13) - (-4/13 \log_2 4/13) - (-4/13 \log_2 4/13)$ $= -0.35782$		

Second Splitting Attribute	
Gain of Height	0.0004
Gain of Weight	0.0004
Gain of Arm length	-0.015

As the gain of Height and Weight are more therefore it is used as second splitting attribute.

Table No 4: Selection of second splitting attribute.

Sr. No.	Leg length	Height	Weight	Arm length	Game
		>=170	>=60	>=75	
	LL < 100cm	<170	<60	<75	
1	98	>=170	<60	<75	<b>BB</b>
2	98	<170	<60	<75	<b>HB</b>
3	89	<170	<60	<75	<b>HB</b>
4	99	<170	>=60	<75	<b>VB</b>
5	98	>=170	>=60	>=75	<b>VB</b>

BB=1	HB=2	VB=2
$I(BB,HB,VB) = (-1/5 \log_2 1/5) - (-2/5 \log_2 2/5) - (-2/5 \log_2 2/5)$ $= -0.41115$		

Second Splitting Attribute	
Gain of Height	-0.02923
Gain of Weight	-0.46868
Gain of Arm length	-0.13388

As the gain of Height is more therefore it is used as second splitting attribute.

Table No. 5: Selection of third splitting attribute.

Sr. No.	Height >=170	Weight	Arm length >=75	Game
		>=60	>=75	
		<60	<75	
1	>=170	>=60	>=75	BB
2	>=170	>=60	>=75	BB
3	>=170	>=60	>=75	BB
4	>=170	<60	<75	BB
5	>=170	>=60	>=75	HB
6	>=170	>=60	<75	HB
7	>=170	>=60	<75	HB
8	>=170	>=60	>=75	VB
9	>=170	>=60	<75	VB
10	>=170	>=60	<75	VB

BB=4	HB=3	VB=3
$I(BB,HB,VB) = (-4/10 \log_2 4/10) - (-3/10 \log_2 3/10) - (-3/10 \log_2 3/10)$ $= -0.35587$		

Third Splitting Attribute	LL >=100
Height	>=170
Gain of Weight	-0.0263
Gain of Arm length	-0.187

As the gain of Weight is more therefore it is used as Third splitting attribute

Table No. 6: Selection of third splitting attribute.

Leg Length >=100			
Sr No.	Height <170	Weight	Arm length >=75
		>=60	>=75
		<60	<75
1	<170	>=60	<75
2	<170	<60	>=75

3	<170	>=60	<75	VB

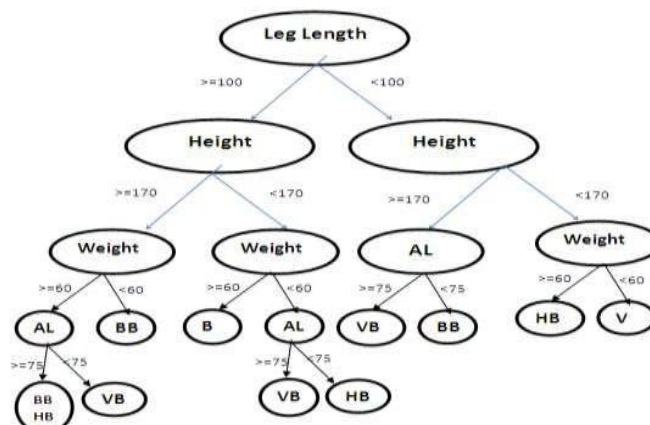

BB=0	HB=2	VB=1
------	------	------

$$I(BB,HB,VB) = (-0/3 \log_2 0/3) - (-2/3 \log_2 2/3) - (-1/3 \log_2 1/3)$$

$$= -0.63651$$

Gain of Weight=	-0.6365
Gain of Arm length=	-0.637

As the gain of Weight is more therefore it is used as Third splitting attribute.

## Conclusion

This study analyses ID3 decision tree algorithms that are used in data mining. The efficiency of ID3 decision tree algorithms can be analyzed based on their accuracy and the attribute selection measure used. Measurements of anthropometric variables can create a profile of athletes within specific sports, because different sports have different anthropometric characteristics, and could help coaches to select players for the professional level according with the playing position. In order to improve the athletes in the competition's result is usually in training through the suggestive game selection methods and classification of players to improve the athletes' competitive level and physical fitness.

## शिक्षक शिक्षणात ग्रंथालयामध्ये माहिती तंत्रज्ञानाची उपयोगीता

प्रा.कल्पना आबाराव सिडाम  
ग्रंथपाल, राजीव गांधी महाविद्यालय मुदखेड, नांदेड

### सारांश

आजच्या माहिती तंत्रज्ञानाच्या युगात आधुनिक तंत्रज्ञानाचा वापर करणे, ही काळाची गरज आहे. ही गरज लक्षात घेवून शालेय विद्यार्थ्यांपासून तर संशोधकापर्यंत माहिती तंत्रज्ञानाचा उपयोग होत आहे. या तंत्रज्ञानाच्या सहाय्याने ग्रंथालय ही अधिक कार्यक्षम आणि जलद माहिती सेवा देणारी केंद्रे बनली आहे.

### प्रस्तावना

प्रत्येक वाचक हा माहितीचा शोधक असतो. काळानुरूप माहितीचे स्वरूप हे बदलत गेले कारण माहिती ही एका पिढीकडून दुसऱ्या पिढीपर्यंत हस्तांतरीत करण्यापर्यंतची तिची अवस्था सारखी नसते. त्यानूसार विसाव्या शतकापासूनच विज्ञान व तंत्रज्ञानातील नवनवीन शोधामुळे माहिती तंत्रज्ञानाचा उपयोग सर्व स्तरातील ग्रंथालयापर्यंत होवू लागला. त्यामध्ये संगणक हे सर्वात महत्वाचे साधन मानले जाते. तसेच दूरसंप्रेषण आणि इलेक्ट्रॉनिक साधनांचा संयोगाने माहितीही संग्रहीत, वितरीत, प्रतिप्राप्तीमध्ये केली जाते.

### माहिती तंत्रज्ञानाची व्याख्या

“माहिती तंत्रज्ञान म्हणजे मायक्रोइलेक्ट्रॉनिक्सवर आधारीत संगणक आणि दूरसंप्रेषणाच्या संयोगाद्वारे शाब्दिक, चित्रयुक्त, मजकूरयुक्त आणि सांख्यिकीय माहितीचे अर्जन, प्रक्रिया, संग्रह आणि प्रसारण होय.”  
—रोवले

माहिती तंत्रज्ञानाच्या प्रभावामुळे आज ग्रंथालयातील दैनंदिन कार्य करण्यास वेळ लागत नाही. तसेच आज प्रत्येक विद्यापीठ ग्रंथालय हे ज्ञानस्रोताचे केंद्र होत चालले आहे.

### उद्देश

- लिखित किंवा मुद्रीत माहितीचे इलेक्ट्रॉनिक माहितीद्वारे वाचकांना सेवा पुरविणे.
- माहिती हाताळण्यामध्ये माहिती तंत्रज्ञानाच्या उपयोगामुळे वेळेची बचत होते.
- उदा : डिस्क, सीडीज, टेप्स, फ्लॉपीज.
- संगणकामुळे विविध कामासाठी लागणाऱ्या जागेची बचत होते.
- ग्रंथालय सहकार्याच्या माध्यमातून वाचन साहित्य सामुहिकरित्या उपयोग घेवू शकतात.
- ग्रंथालय माहिती तंत्रज्ञानाचा उपयोग
- वाचकांना माहिती एका क्षणात मिळत असते.
- कोणत्याही प्रकारचा अडथळ माहिती मिळविण्यामध्ये होत नाही.
- जागेची कमतरता भासत नाही.
- २४ तास सेवा उपलब्ध.
- माहिती ही क्षणात डाउनलोड होवू शकते.
- साक्षतरेचा प्रसार करण्यासाठी.
- कागद विहरीत, भिंती विहरीत सेवा पुरविणे.
- माहिती प्रतिप्राप्ती सेवा प्राप्त करण्यासाठी उपयुक्त.
- आधुनिक तंत्रज्ञानाच्या सहाय्याने संदर्भ साहित्य शोधणे.

### ग्रंथालयात दिल्या जाणाऱ्या सेवा सुविधा

- स्वयंचलीत ग्रंथालय सेवा.
- इंटरनेटचा वापर
- मल्टीमिडीयाची उपयुक्तता.

- ग्रंथालय नेटवर्क सेवा.
- मायक्रोफॉर्म सेवा.
- सी.डी. रोम वर आधारित डाटाबेस सुविधा.
- वाचक उपयुक्तता सेवा.

या सर्व सेवा या ग्रंथालयामध्ये वाचकांना एका क्षणात तंत्रज्ञानाच्या सहाय्याने मिळत आहे. त्यामुळे वाचकांचा वेळ वाचत आहे. त्यानंतर ग्रंथालयामध्ये इ-बुक्स, इ-जर्नल्स, इ-थेसिस, डाटाबेसेस, ई-ग्रुप, ग्रंथालय नेटवर्कस वेब ओपॅक, तसेच आभासी सेमीनार, बुलेटीन बोर्ड, ई-लर्निंग या सुध्दा सेवा माहिती तंत्रज्ञानाच्या सहयोगाने ग्रंथालयात मिळत आहे. ग्रंथालय स्वयंचालनामुळे विद्यार्थ्यांना सॉफ्टवेअरच्या सहाय्याने कार्यक्षम देवघेव सेवा देता येते. वाचकांमध्ये संगणकाबद्दलच्या जागरूकतेत वाढ होत आहे. थोडक्यात इंटरनेटवर मिळणारी माहिती ज्ञानविश्वातील प्रत्येक विषयातील असते. जी दुरवरून प्राप्त केली जाते.

## गृहअर्थशास्त्र विषयातील नवनिर्मितीची आवश्यकता आणि व्याप्ती

प्रा. कु. सरोज या. लखदिवे,  
इंदिरा महाविद्यालय, कळंब,  
जिल्हा : यवतमाळ

## सारांश

आज गृहीणीचे क्षेत्र 'चुल आणि मूल' यापुरतेच मर्यादित न राहता विस्तारित झाले आहे. कमीत कमी कौटूंबिक संसाधनांचा उपयोग करून जास्तीत जास्त समाधान मिळविणे आवश्यक असते. सामाजिक परिवर्तनात संयुक्त कुटूंब पध्दती जावून विभक्त कुटूंब पध्दतीचा बहुतेक्यांनी स्वीकार केलेला आहे. नविन बदल, बदलत्या जीवन प्रवाहाचे आव्हाने पेलण्याचे सामर्थ्य, क्षमता गृहअर्थशास्त्र हा विषय निश्चितपणे करीत आहे. हा जीवनाशी मेळ घालणारा विषय आहे. त्यात जीवन आणि प्राप्त परिस्थितीतील आव्हाने यांचा समन्य साधणारे शिक्षण आहे.

बीजशब्द :- गृहअर्थशास्त्र, क्षेत्र, गृहिणी, गृहजीवन

## प्रस्तावना

ऐतिहासिक दृष्ट्या गृहशिक्षणाचा प्रारंभ हा कुटूंबसंस्थेइतकाच जुना आहे. सर्वच प्राचीन समाजात स्त्रियांचे शिक्षण हे गृहक्षेत्रापुरतेच मर्यादित होते. आईकडून मुलीला परंपरागत पध्दतीने गृहकृत्याचे आणि तत्संबंधित इतर जबाबदारीचे शिक्षण मिळत असे. मुलींना विणकामासारख्या हस्तकलांचे शिक्षण दिले जाई. पश्चिमी समाजात १७९३ मध्ये का-ऊंट या शास्त्रज्ञाने कम्फर्ट स्वयंपाकघराची शास्त्रशुद्ध रचना कशी असावी याचा नमुना मॅसॅच्युसेट्स येथील जागतिक प्रदर्शनाज ठेवला. १७९८ मध्ये बोस्टन येथील शाळामधून वस्त्रप्रावरणे शिवणे आणि त्यांची निगा राखणे ही कौशल्ये शिकविण्यास सुरुवात झाली. १८७२ मध्ये शिवणकला या विषयाला औद्योगिक विकासाबरोबर मान्यता देण्यात आली. एम्मा विल्हाड यांनी १८२१ मध्ये सुरू केलेल्या ट्रॉस सेमिनरी मध्ये स्त्रियांना कौटूंबिक कामे करण्याचा शास्त्रीय दृष्टीकोन प्राप्त झाला. १८४० मध्ये कॅथरिन बीचर यांनी क्वउमेजपब म्बवदवउपबे त्याचबरोबर क्वउमेजपब त्मबपचम हे पुस्तक लिहिले. लेक प्लेसिड क्रुल यांनी गृहअर्थशास्त्राची मर्यादा ठरविली तर करोलिन हंट यांनी या विषयाची मूलतत्वे विशद केली. मिलवर्डडयुई या अमेरिकन दाम्पत्याने गृहअर्थशास्त्र हे नांव सुचविले, त्यानंतर १ जानेवारी १९०९ मध्ये 'अमेरिकन होम इकॉनॉमिक्स एज्युकेशन असोसिएशन स्थापना करण्यात आली.

भारतात सर्वप्रथम १९३२ मध्ये लेडी इर्विन कॉलेज, मद्रास (चेन्नई) येथे उच्च शिक्षणात गृहविज्ञानाचे शिक्षण दिल्या गेले. १९५० मध्ये महाराज सयाजीराव विद्यापीठ, बडोदा येथे गृहविज्ञान ही शाखा चालविण्यात आली. नागपूर विद्यापीठात सुरुवातीला कला शाखेत गृहविज्ञान व काही वर्षांनी कला शाखेत गृहविज्ञानाचे गृहअर्थशास्त्र असे नाव करण्यात आले. विद्यार्थ्यांचा मोठ्या प्रमाणात मिळालेला प्रतिसाद यामुळे नागपूर आणि अमरावती दोन्ही विद्यापीठात उच्च शिक्षणात पदव्युत्तर स्तरावर गृहअर्थशास्त्र शिक्षणाची सोय करण्यात आली.

## गृहअर्थशास्त्राची गरज

गृहअर्थशास्त्र हे गृहजीवना करिता शिक्षण देणारे शास्त्र आहे. ते मानवाच्या गृहजीवनाचा अभ्यास करते. कुटूंबात अनेक सदस्य असतात. त्यांच्या गरजादेखील विविध असतात. या गरजांची पूर्ती चांगल्या प्रकारे कशी करता येईल यासंबंधीचे शिक्षण गृहअर्थशास्त्रातून मिळते. कुटूंबातील घटकांच्या गृहजीवनाशी संबंधित असलेल्या सर्व आवश्यक विषयांचे उदा. गृहव्यवस्थापन, बालसंगोपन, आहारशास्त्र, आरोग्यशास्त्र, वस्त्रशास्त्र, गृहरचना, व्यक्तिमत्व विकास आणि कौटूंबिक संबंध इत्यादी ज्ञानाने परिपूर्ण असा विषय आहे. व्यक्तीची जडणघडण कुटूंबातच होते. या दृष्टीने गृहजीवनाचे शिक्षण जीवनाशी संलग्नित आहे. समाज जीवनाला आवश्यक असलेल्या निष्ठा, सांस्कृतिक मूल्ये, सहिष्णूता, प्रेमाची शिकवण, त्याग या विषयांच्या शिक्षणाचे बीजारोपण हे कुटूंबातून होते आणि या बीजाला रूजविण्यासाठी खोली निर्माण करून देणारेही कुटूंबच असते, जीवनाच्या प्रत्येक पैलूचे शिक्षण गृहअर्थशास्त्र प्रदान

करते. जीवनात येणाऱ्या समस्या सोडविण्याच्या दृष्टीने मार्गदर्शन मिळणे हा या विषयाच्या प्रमुख उद्देश आहे. या विषयाचे महत्व विशद करणारे क्षेत्रही अमर्याद आहे.

गृहअर्थशास्त्र विषयातील नवनिर्मितीची व्याप्ती

- १) गृहनिर्माण म्हणजे सिमेंट विटांनी बांधलेले घर अपेक्षित नाही तर स्वस्थ जीवन जागू शकतील अशा व्यक्तिमत्त्वाची माणसे घडविणे होय. परस्परांच्या सहकार्यातून चांगल्या गुणांची जोपासना होईल अशा कुटूंबातील व्यक्तित्वाची जडणघडण करणे होय. जीवनाच्या समृद्धतेकरिता चांगले गृहसंचलन करता येणे हे गृहअर्थशास्त्राचे क्षेत्र आहे.
- २) पाश्चात्य संस्कृतीचे अनुकरण केल्यामुळे एकत्र कुटूंब पध्दती नष्ट होऊन विभक्त कुटूंब पध्दती अस्तित्वात आली. गृहिणी उच्चशिक्षित झाल्यामुळे मुलांच्या भविष्याचे नियोजन सक्षमपणे करू शकतात. मुलांच्या मानसिक, बौदीक व शारिरीक विकासात येणाऱ्या अडचणीवर मात करू शकतात. या सर्व गोष्टी त्यांना गृहअर्थशास्त्रातून शिकायला मिळते.
- ३) वाढती महागाई, बेरोजगारीचे प्रत्येक क्षेत्रात वाढते प्रमाण, सतत वाढणाऱ्या गरजा, जीवनस्तर उंचावण्याची इच्छा, शिक्षणाच्या भरमसाठ प्रवेश फी, या सर्व बाबींच्या मेळ घालणे एकट्याच्या भरोश्यावर अशक्य आहे. आणि प्रत्येकाला रोजगारसंधी उपलब्ध होईलच असे नाही त्यामुळे गृहिणी घरबसल्या स्वयंरोजगार करू शकतात. वस्त्रोद्योग उद्योगात नवनवीन तंत्रज्ञानाचा उपयोग करून, वेगवेगळ्या फॅशनचे कपडे शिवणे, पारंपारिक पोषाख शिवून त्यावर प्रांतीय भरतकाम करून विकणे, रूखवंत करून विकणे इत्यादी बडोदा, अहमदाबाद येथे प्रांतीय भरतकलेच्या वस्त्र प्रावरणांची मोठी बाजारपेठ आहे. आर्थिक क्षेत्राचे अवलोकन केल्यास स्त्रियांनी सुरू केलेल्या उद्योग आंतरराष्ट्रीय बाजारपेठ काबीज करते. उदा. लिज्जत पापड संस्था. अन्न उद्योगात नवनवीन खाद्यपदार्थ करून विकणे, दीर्घकाळ टिकणारे पदार्थ करून विकणे, डबाबंद पदार्थ तयार करणे, रोगानुसार आहार पुरविणे, बाळंतविडा असे कितीतरी उत्पादने गृहिणी या विषयाच्या सहच्याने करू शकतात, व आपले जीवनमान उंचावू शकतात. गृहअंतर्गत रचना आणि गृहसजावट, पुष्परचना तयार करून विकणे हा पण स्वयंरोजगार करू शकतात, बालवाडी चालविणे, बाल सल्लागार केंद्र चालू शकतात.
- ४) घर आणि नोकरी असे दुहेरी क्षेत्र स्त्रीच्या वाट्याला आहे आहे. गृहकार्य ही एक समस्या बनली आहे. ती समस्या निवारण्यासाठी श्रमबचतीच्या नवनवीन साधनांचा उपयोग करून घेणे, कार्यसरलीकरणाचा उपयोग करणे तिला आवश्यक झाले आहे. गृहकृत्याविषयी वैज्ञानिक दृष्टीकोन स्विकारणे आणि घर समृद्ध करणे हे या विषयाचे क्षेत्र आहे.
- ५) स्त्रिया कितीही शिकल्या, नोकरी करणाऱ्या झाल्या तरीही घरामध्ये स्त्रियांना गृहव्यवस्थापकाची भूमिका करावी लागते. गृहिणीचा व्यवसाय हा विविधांगी आहे. तिच्या घराकरिता तिला आहारशास्त्रज्ञ, स्वयंपाकी, मोलकरीण, मालकीण, शिक्षणशास्त्रज्ञ, मानसशास्त्रज्ञ, परिचारिका, धोबी, अर्थशास्त्रज्ञ, माता आणि पत्नीची भूमिका वाठवाव्या लागतात. ही जबाबदारी पार पाडण्याकरिता आवश्यक शिक्षण हे या विषयाचे क्षेत्र आहे.

गृहजीवनाशी संबंधित आहे असे सर्व ज्ञान हे गृहअर्थशास्त्राचे क्षेत्र आहे. म्हणूनच गृहअर्थशास्त्र विषयाचे क्षेत्र जीवनव्यापी आहे असे म्हणता येईल.

## Subaltern History Writing

Dr. S. P. Chavan

Dr. Manorama &amp; Prof. H.S. Pundkar A.C.S. College, Balapur.

इतिहास लेखनात कालपरत्वे अनेक बदल झाले. प्राचीन काळी भारतात वेद, पुराने, उपनिषद, यांच्या माध्यमातून लेखन झाले. त्यात राजे-राजवाडे, राजघराणे, देवीदेवता, यावर भर होता. नंतरच्या काळात राजकिय इतिहास लेखनावर भर देण्यात आला. आधुनिक काळात इतिहास लेखनात आमूलाग्र बदल झाले. नवीन नवीन संकल्पना इतिहास लेखनात उदयास आल्या. स्त्रीयांचा इतिहास, संकल्पनांचा इतिहास यासारख्या विषयांवर इतिहास लेखन सुरु झाले. सद्यस्थितीत Subaltern History हया नवीन विचारधारेचा उदय झाला. त्यामुळे इतिहासाची व्याप्ती प्रचंड वाढली आहे. इतिहास लेखनात सामाजिक, सांस्कृतिक, आर्थिक व राजकिय लेखनासोबतच समाजातील मागासलेल्या घटकांचासुद्धा अभ्यास सुरु झाला. इतिहास हे एक सामाजिक शशास्त्र आहे. त्यामुळे समाजातील सर्वच घटकांचा अभ्यास होणे आवश्यक आहे. परंतु या शशास्त्रात राजेराजवाडे व समाजाला प्रभावित करणाऱ्या घटना व घटकांचाच अभ्यास केला जात होता. परंतु Subaltern History लेखनाच्या माध्यमातून समाजातील मागास घटकांनाही न्याय मिळाला आहे.

Subaltern History म्हणजे नेमके काय? तर जो घटक राजकिय, आर्थिक दृष्ट्या तसेच इतर क्षेत्रात पिछाडलेला असतो त्याचा अभ्यास म्हणजे Subaltern History होय. वास्तविक पाहता Subaltern या शब्दाचा अर्थ सैनिकीय अधिकाऱ्यांच्या हाताखालील सैनिक असा होतो. इतिहास लेखनात याचा अर्थ मागास घटकांचे अध्ययन असा घेतला जातो. सर्वसामान्य जनतेचा इतिहास याआधी कुठेही लिहीला गेला नाही. मागास घटकांच्या अध्ययनाने दुर्लक्षित घटकांना इतिहासात स्थान मिळाले.
