Abstract

There is a rapidly growing interest in the need to use technology in language learning at an early age. Younger students need inspiration and they can easily lose their focus during the long process of language learning. Technology can be one of the ways create a real and enjoyable environment for younger learners of language when used correctly and effectively. Technology allows Younger language learners acquire language skills outside the classroom when communicating persistently. Many studies indicate that this children they can develop awareness of their language and culture through the use of technology in a variety of social, cultural and linguistic contexts awareness can be accelerated through cultural communication. Technology offers this opportunity to younger students and provides for them unlimited resources English lessons can be easy and fun when teachers use technology outside the classroom The use of technology has become a crucial a part of the educational method in and out of the category. Each language category sometimes uses some style of technology. Technology has been accustomed each facilitate and improve language learning. Technology permits lecturers to adapt room activities, thus enhancing the acquisition method. Technology continues to grow in importance as a tool to assist lecturers facilitate acquisition for his or her learners. This study focuses on the role of victimization new technologies in learning English as a second/foreign language. It mentioned completely different attitudes that support West Germanic language learners to extend their learning skills through using technologies. The literature review indicated that the effective use of latest technologies improves learners' acquisition skills.

Key words- Technology, Language, Learning,

Introduction-

Language is one in all the numerous parts that affects international communication activities.

Students utilize totally different elements of West Germanic skills like listening, speaking, reading, and writing for his or her proficiency and communication additionally Ahmadi (2017) explicit that one in all the necessary parts for learning is that the methodology that instructors use in their categories to facilitate learning method. Consistent with Becker (2000) computers square measure regarded as a vital educational instrument in language categories during which academics have convenient access square measure sufficiently ready and have some freedom within the syllabus. Computer technology is regarded by heaps of academics to be a big a part of providing a high – quality education.

Technology has always been an important part of the teaching and learning environment. It is an important part of the work teachers can use to help students reading. When we talk about technology in teaching and learning, the word 'integration' is used. With technology as an integral part of our daily lives it is time to rethink the concept of integration technology in the curriculum and aims to embed technology in teaching to support learning process. That is technology becomes an integral part of the learning experience and an important issue for teachers from the beginning of reading literacy to learning and learning process

Use of Technology in English Language

Technology is a good tool for learners. Learners should use technology as a major a part of their learning method. academics ought to model the employment of technology to support the program thus that learners will increase truth use of technology in learning their language skills. Learners' cooperation are often augmented through technology. Cooperation is one amongst the necessary tools for learning. Learners hand and glove work together to make tasks and learn from one another through reading their nobles work. The use of contemporary technology in West Germanic

language teaching has so become indispensable, particularly within the wake of unexampled developments across varied fields and disciplines. it's essential that the education sector keep rapidly of the world industrial revolution by adopting trendy technological suggests that like automation, multi-media devices, mobile phones, audio/visual effects applications, and social media, to optimize West Germanic language instruction and equip lecturers to attach with room language learners in a very systematic and advanced manner. The net provides simple, immediate, and nearly unlimited access to code, applications, and a bunch of adjuvant platforms and materials which might expedite English teaching and learning. Whereas these affordances could also be wide accessible to all or any, it's noted that lecturers usually play a key role in in operation the various tools and teaching strategies. Moreover, several such programmes are specifically designed to push effective English teaching while at the same time increasing learner understanding and attainment of West Germanic language skills.

Impact of Technology on Language

Technology may be one among the ways that to form positive impact whereas learning the language. Technology conjointly lets young language learners gain language skills outside the room once they act actively. The Impact of Technology on Shaping the net Language is {vital|is very important} and contend vital role. The excessive use of technology or net has shaped important changes within the daily use of a people language most of those squaremeasure neither sensible nor unhealthy, simply totally different.

So individuals could raise concerning the ways that technology has modified the method they speak and write on-line and offline. During this paper the main focus are on the changes that have taken place within the written items of the net users. Consequently, the changes within the English writing of the language of the net square measure found within the new vocabularies, new orthography and punctuation and descriptive linguistics. Despite of the actual fact that the utilization of the net is associate English- primarily based network that takes place simply their users virtually encounter issues on-line as a result of society variations. These

issues might be simply resolved as they assist the users of the net perceive one another. The net language is viewed as a collection {of totally different of various} genres and registers utilized in different things. The net language has some options connected to speech and writing e.g., phonetic and descriptive linguistics ones. Additionally it's seen a totally shaped language vogue with its own vocabulary, abbreviations, orthography and punctuation, grammar, slang and every one alternative options that outline a true language vogue. As Crystal (2001) states the net users have the flexibility to speak quicker and send short text messages to every alternative. All the abbreviations, acronyms enclosed within the net language form up most of Netspeak's vocabulary at the side of lists of coined words and phrases. Specifically words the new vocabulary manipulated within the transmission give a desirable insight into however quickly new words may be appeared and so abandoned. It might be argued that every a couple of years some new words became noncurrent come back to be picked out. This usage is usually related to the requirements of the net users.

Technology, therefore encompasses a massive role in dynamic the method individuals communicate. To be additional specific the method individuals speak nowadays is nearly a similar method they spoke before the web became what it's, albeit with Associate in nursing enriched vocabulary. However what's for the most part totally different is that the method individuals write nowadays. That's the realm wherever technology has had the most important impact. So this analysis is dedicated to highlight those changes occurred within the written English and to point out if these changes like abbreviations, vocabulary, writing system and punctuation and descriptive linguistics employed by native and foreign speakers, once communication with one another through the varied means that of media, become common in formal English language. For instance, email altered the structure of the letter as a communicative tool.

Conclusion

It is palpable that the electronic communication has a remarkable influence on the use of the modern English language. Language square measure attentive to this sensible impact and

suppose the teacher is that the key think about this unlimited world. It's obvious that technology brings universe ahead of youngsters. Technology is unavoidable in today's world. Not solely will it teach a brand new language however additionally it assists young learners gaining new cultural things. Therefore, young learners are often additional motivated and active via technology. Though technology is actually important for young learners, young learners don't have identical plan with them. They like technology within their reality but they need to measure real acquisition atmosphere in the room. They need to play language games and communicate with their academics. They solely need to use technology outside so as to try to their tasks and preparation. Young learners' academics ought to use technology in their categories so as to extend their students' language awareness however the academics ought to watch out whereas victimization technology within and out of doors of the room, they must organize the activities consistent with children's age, language level, interests and wishes. Additionally, language academics ought to lead the young learners and their folks to correct websites once the category amount. Academics additionally ought to produce task-based activities and prepare project-work for his or her students.
